

Preventive Services Covered Under the Affordable Care Act

Under the Affordable Care Act, some preventive health care services are covered at no cost to you when delivered by a provider within your plan's network. **However, if a new or existing health problem is discussed during a preventive health care visit, a separate office visit will be billed as required by national coding and billing guidelines. This means that you may be subject to out-of-pocket charges (copay, coinsurance or deductible) for these additional services.**

Quartz covers routine physical exams, routine gynecological exams, routine child health exams and immunizations related to the preventive services covered under the Affordable Care Act for covered children up to age 26.

Covered Preventive Services for Adults

- ▶ **Abdominal Aortic Aneurysm** one-time screening for men of specified ages who have ever smoked
- ▶ **Alcohol Misuse** screening and counseling
- ▶ **Anxiety screening**, once annually
