- Patient is statin intolerant as evidenced by an inability to tolerate at least two statins, with at least one started at the lowest starting daily dose, due to intolerable symptoms or clinically significant biomarker changes of liver function or muscle function (e.g., creatine kinase)
- Patient has an FDA labeled contraindication to all statins

AND

3 - One of the following:

- Patient has been receiving at least 12 consecutive weeks of ezetimibe (Zetia) therapy as adjunct to maximally tolerated statin therapy
- Patient has a history of contraindication or intolerance to ezetimibe

AND

4 - Submission of medical records (e.g., chart notes, laboratory values) documenting one of the following:

4.1 Both of the following:

4.1.1 Patient has been receiving at least 12 consecutive weeks of Repatha therapy as adjunct to maximally tolerated lipid lowering therapy (e.g., statins, ezetimibe)

AND

4.1.2 Despite adherence to Repatha therapy, patient has been unable to achieve LDL-C goal as evidenced by one of the following within the last 120 days:

- LDL-C greater than or equal to 55 mg/dL with ASCVD [7]
- LDL-C greater than or equal to 70 mg/dL without ASCVD [7]

OR

4.2 Patient is unable to maintain adherence to Repatha therapy due to one of the following:

- Manual dexterity problems (e.g., tremors, arthritis)
- Visual impairment (e.g., best-corrected visual acuity of 20/200 or worse) [6]

OR

4.3 Patient has experienced a hypersensitivity reaction, defined as angioedema, vasculitis, urticaria, to Repatha therapy

AND

5 - Prescribed by or in consultation with one of the following:

- Cardiologist
- Endocrinologist
- Lipid specialist

AND

6 - Medication will not be used in combination with PCSK9 inhibitor therapy [2,3]

Product Name:Leqvio	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD)]
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
LEQVIO	INCLISIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 284 MG/1.5ML	3935604040E520	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting LDL-C reduction from baseline

AND

2 - One of the following:

- Patient continues to receive other lipid-lowering therapy (e.g., statins, ezetimibe) at the maximally tolerated dose
- Patient has a documented inability to take other lipid-lowering therapy (e.g., statins, ezetimibe)

AND

3 - Submission of medical records (e.g., chart notes, laboratory values) documenting one of the following:

3.1 Both of the following:

3.1.1 Patient has previously received at least 12 consecutive weeks of Repatha therapy as adjunct to maximally tolerated lipid lowering therapy (e.g., statins, ezetimibe)

AND

3.1.2 Despite adherence to Repatha therapy, patient was unable to achieve LDL-C goal as evidenced by one of the following:

- LDL-C greater than or equal to 55 mg/dL with ASCVD [7]
- LDL-C greater than or equal to 70 mg/dL without ASCVD [7]

OR

3.2 Patient continues to be unable to maintain adherence to Repatha therapy due to one of the following:

- Manual dexterity problems (e.g., tremors, arthritis)
- Visual impairment (e.g., best-corrected visual acuity of 20/200 or worse) [6]

OR

3.3 Patient has experienced a hypersensitivity reaction, defined as angioedema, vasculitis, urticaria, to Repatha therapy

AND

4 - Medication will not be used in combination with PCSK9 inhibitor therapy [2,3]

Prior Authorization Guideline

Guideline ID	GL-228459
Guideline Name	Leukotriene Modifiers
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zyflo (zileuton)
Asthma Indicated for the prophylaxis and chronic treatment of asthma in adults and children 12 years of age and older. Zyflo is not indicated for use in the reversal of bronchospasm in acute asthma attacks, including status asthmaticus. Therapy with Zyflo can be continued during acute exacerbations of asthma.
Drug Name: Zileuton extended-release
Asthma Indicated for the prophylaxis and chronic treatment of asthma in adults and children 12 years of age and older. Zileuton extended-release tablet is not indicated for use in the reversal of bronchospasm in acute asthma attacks. Therapy with zileuton extended-release tablet can be continued during acute exacerbations of asthma.

2 . Criteria

Product Name:Zyflo, Generic zileuton ER	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ZYFLO	ZILEUTON TAB 600 MG	44504085000330	Brand
ZILEUTON ER	ZILEUTON TAB SR 12HR 600 MG	44504085007420	Generic

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), intolerance or contraindication to at least one of the following generics:

- montelukast
- zafirlukast

Prior Authorization Guideline

Guideline ID	GL-228462
Guideline Name	Litfulo (ritlecitinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Litfulo (ritlecitinib)
Alopecia Areata (AA) Indicated for the treatment of adult and adolescent patients 12 years and older with severe alopecia areata. Not recommended for use in combination with other JAK inhibitors, biologic immunomodulators, cyclosporine or other potent immunosuppressants.

2 . Criteria

Product Name:Litfulo	
Diagnosis	Alopecia Areata
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LITFULO	RITLECITINIB TOSYLATE CAP 50 MG (BASE EQUIV)	90731060100120	Brand

Approval Criteria

1 - Diagnosis of alopecia areata

AND

2 - Patient has at least 50% scalp hair loss [1, 2]

AND

3 - Other causes of hair loss have been ruled out (e.g., androgenetic alopecia, trichotillomania, other scalp disease) [2]

AND

4 - Patient is 12 years of age or older

AND

5 - Prescribed by or in consultation with a dermatologist

AND

6 - Not used in combination with other JAK inhibitors, biologic immunomodulators, cyclosporine or other potent immunosuppressants*

Notes	*Litfulo may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Litfulo	
Diagnosis	Alopecia Areata
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LITFULO	RITLECITINIB TOSYLATE CAP 50 MG (BASE EQUIV)	90731060100120	Brand

Approval Criteria

1 - Documentation of positive clinical response to therapy

AND

2 - Not used in combination with other JAK inhibitors, biologic immunomodulators, cyclosporine or other potent immunosuppressants*

Notes	*Litfulo may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Prior Authorization Guideline

Guideline ID	GL-233298
Guideline Name	Livdelzi (seladelpar)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/16/2024
P&T Revision Date:	

1 . Indications

Drug Name: Livdelzi (seladelpar)
Primary biliary cholangitis (PBC) Indicated for the treatment of primary biliary cholangitis (PBC) in combination with ursodeoxycholic acid (UDCA) in adults who have had an inadequate response to UDCA, or as monotherapy in patients unable to tolerate UDCA. This indication is approved under accelerated approval based on a reduction of alkaline phosphatase (ALP). Improvement in survival or prevention of liver decompensation events have not been demonstrated. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trial(s).Limitations of Use: Use of Livdelzi is not recommended in patients who have or develop decompensated cirrhosis (e.g., ascites, variceal bleeding, hepatic encephalopathy)

2 . Criteria

Product Name:Livdelzi	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LIVDELZI	SELADELPAR LYSINE CAP 10 MG	52780070500120	Brand

Approval Criteria

1 - Diagnosis of primary biliary cholangitis (PBC) (also known as primary biliary cirrhosis)

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Patient has failed to achieve an alkaline phosphatase (ALP) level of less than 1.67 times the upper limit of normal (ULN) after at least 12 consecutive months of treatment with ursodeoxycholic acid (UDCA) (e.g., Urso, Urso Forte, ursodiol) [2, A]

AND

2.1.2 Used in combination with ursodeoxycholic acid (UDCA)

OR

2.2 History of contraindication or intolerance to ursodeoxycholic acid (UDCA)

AND

3 - Requested drug will not be used in combination with Ocaliva (obeticholic acid) or Iqirvo (elafibranor)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

Product Name:Livdelzi	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LIVDELZI	SELADELPAR LYSINE CAP 10 MG	52780070500120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., ALP level less than 1.67 times ULN, total bilirubin less than or equal to ULN, ALP decrease greater than or equal to 15% from baseline)

AND

2 - Requested drug will not be used in combination with Ocaliva (obeticholic acid) or Iqirvo (elafibranor)

3 . Endnotes

A. Biochemical response should be assessed after 1 year of treatment with UDCA [2]

4 . References

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-229176
Guideline Name	Livmarli (maralixibat) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/18/2021
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Livmarli (maralixibat)
Alagille syndrome Indicated for the treatment of cholestatic pruritus in patients with Alagille syndrome (ALGS) 3 months of age and older. **Progressive Familial Intrahepatic Cholestasis (PFIC)** Indicated for the treatment of cholestatic pruritus in patients 12 months of age and older with progressive familial intrahepatic cholestasis (PFIC). Limitations of use: LIVMARLI is not recommended in a subgroup of PFIC type 2 patients with specific ABCB11 variants resulting in non-functional or complete absence of bile salt export pump (BSEP) protein.

2 . Criteria

Product Name:Livmarli	
Diagnosis	Alagille syndrome
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 9.5 MG/ML	52350050102020	Brand
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 19 MG/ML	52350050102040	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of Alagille Syndrome (ALGS)

AND

1.2 Molecular genetic testing confirms mutations in the JAG1 or NOTCH2 gene [A, 2, 6]

AND

2 - Documentation of ONE of the following: [4]

- Total serum bile acid > 3x the upper limit of normal (ULN)
- Conjugated bilirubin > 1 mg/dL
- Fat soluble vitamin deficiency otherwise unexplainable
- Gammaglutamyl transpeptidase (GGT) > 3x ULN

AND

3 - Patient is experiencing moderate to severe cholestatic pruritus [4]

AND

4 - Patient has had an inadequate response to at least two of the following treatments used for the relief of pruritus: [B, 2, 7]

- Ursodeoxycholic acid (e.g., Ursodiol)
- Antihistamines (e.g., diphenhydramine, hydroxyzine)
- Rifampin
- Bile acid sequestrants (e.g., Questran, Colestid, Welchol)

AND

5 - Patient is 3 months of age or older

AND

6 - Prescribed by or in consultation with a hepatologist or gastroenterologist

Product Name:Livmarli	
Diagnosis	Alagille syndrome
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 9.5 MG/ML	52350050102020	Brand
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 19 MG/ML	52350050102040	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming both of the following:

1.1 Diagnosis of Alagille Syndrome (ALGS)

AND

1.2 Molecular genetic testing confirms mutations in the JAG1 or NOTCH2 gene [A, 2, 6]

AND

2 - Submission of medical records (e.g., chart notes) confirming ONE of the following: [4]

- Total serum bile acid > 3x the upper limit of normal (ULN)
- Conjugated bilirubin > 1 mg/dL
- Fat soluble vitamin deficiency otherwise unexplainable
- Gammaglutamyl transpeptidase (GGT) > 3x ULN

AND

3 - Patient is experiencing moderate to severe cholestatic pruritus [4]

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming patient has had an inadequate response to at least two of the following treatments used for the relief of pruritus: [B, 2, 7]

- Ursodeoxycholic acid (e.g., Ursodiol)
- Antihistamines (e.g., diphenhydramine, hydroxyzine)
- Rifampin
- Bile acid sequestrants (e.g., Questran, Colestid, Welchol)

AND

5 - Patient is 3 months of age or older

AND

6 - Prescribed by or in consultation with a hepatologist or gastroenterologist

Product Name:Livmarli	
Diagnosis	Progressive Familial Intrahepatic Cholestasis (PFIC)
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 9.5 MG/ML	52350050102020	Brand
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 19 MG/ML	52350050102040	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of Progressive familial intrahepatic cholestasis (PFIC)

AND

1.2 Molecular genetic testing confirms mutations in the ATP8B1, ABCB11, ABCB4, TJP2, NR1H4, or MYO5B gene [9]

AND

2 - Patient is experiencing both of the following:

- Moderate to severe pruritus
- Patient has a serum bile acid concentration above the upper limit of the normal reference for the reporting laboratory

AND

3 - Patient is 12 months of age or older

AND

4 - Patient has had an inadequate response to at least two of the following treatments used for the relief of pruritus:

- Ursodeoxycholic acid (e.g., Ursodiol)

- Antihistamines (e.g., diphenhydramine, hydroxyzine)
- Rifampin
- Bile acid sequestrants (e.g., Questran, Colestid, Welchol)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

Product Name:Livmarli	
Diagnosis	Progressive Familial Intrahepatic Cholestasis (PFIC)
Approval Length	12 month(s)
Guideline Type	Non Formulary

LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 19 MG/ML	52350050102040	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming both of the following:

1.1 Diagnosis of Progressive familial intrahepatic cholestasis (PFIC)

AND

1.2 Molecular genetic testing confirms mutations in the ATP8B1, ABCB11, ABCB4, TJP2, NR1H4, or MYO5B gene [9]

AND

2 - Patient is experiencing both of the following:

- Moderate to severe pruritus
- Submission of medical records (e.g., chart notes) confirming patient has a serum bile acid concentration above the upper limit of the normal reference for the reporting laboratory

AND

3 - Patient is 12 months of age or older

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming patient has had an inadequate response to at least two of the following treatments used for the relief of pruritus:

- Ursodeoxycholic acid (e.g., Ursodiol)
- Antihistamines (e.g., diphenhydramine, hydroxyzine)
- Rifampin
- Bile acid sequestrants (e.g., Questran, Colestid, Welchol)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

Product Name:Livmarli	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 9.5 MG/ML	52350050102020	Brand

LIVMARLI	MARALIXIBAT CHLORIDE ORAL SOLN 19 MG/ML	52350050102040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduced serum bile acids, improved pruritus)

3 . Endnotes

A. Alagille Syndrome is an autosomal dominant disease with variable expressivity, caused by heterozygous mutations in either JAG1 or NOTCH2. The vast majority of cases are due to JAG1 mutations accounting for 94%, and NOTCH2 mutations in additional 2–4%. [2]
B. The management of pruritus in ALGS is challenging, and a variety of therapies are often used. These include antihistamines, rifampin, ursodeoxycholic acid, cholestyramine, naltrexone, and sertraline. Clinical experience suggests that these drugs have variable efficacy in reducing pruritus; however, no prospective clinical trials has quantified the effect of any of these therapies, either alone or in combination. [7]
C. Diagnostic testing may include liver functions tests, liver ultrasound and biopsy, and/or bile analysis. Genetic testing may be used in selected patients to confirm diagnosis and distinguish type. All 3 subtypes of PFIC have increased serum bile acid levels. [8]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233390
Guideline Name	Livtencity (maribavir)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Livtencity (maribavir)
Cytomegalovirus (CMV) infection/disease Indicated for the treatment of adults and pediatric patients (12 years of age and older and weighing at least 35 kg) with post-transplant cytomegalovirus (CMV) infection/disease that is refractory to treatment (with or without genotypic resistance) with ganciclovir, valganciclovir, cidofovir or foscarnet.

2 . Criteria

Product Name:Livtencity	
Diagnosis	CMV infection/disease

Approval Length	8 Week(s) [1]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LIVTENCITY	MARIBAVIR TAB 200 MG	12200050000320	Brand

Approval Criteria

1 - Diagnosis of cytomegalovirus (CMV) infection/disease as confirmed by one of the following methods: [2, 3]

- quantitative polymerase chain reaction (qPCR)
- CMV pp65 antigenemia

AND

2 - Patient is a recipient of one of the following:

- Hematopoietic stem cell transplant
- Solid organ transplant

AND

3 - Trial and failure of a minimum 2 weeks duration, contraindication, or intolerance to one of the following therapies at an appropriately indicated dose:

- Intravenous (IV) ganciclovir
- Oral valganciclovir
- IV foscarnet
- IV cidofovir

AND

4 - Patient is 12 years of age or older

AND

5 - Patient weighs greater than or equal to 35kg

AND

6 - Prescribed by or in consultation with a provider who specializes in one of the following areas:

- Transplant
- Infectious Disease
- Oncology

Prior Authorization Guideline

Guideline ID	GL-233337
Guideline Name	Long Acting Insulins - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	2/18/2025

1 . Indications

Drug Name: Levemir (insulin detemir)
Diabetes Mellitus Indicated to improve glycemic control in adult and pediatric patients with diabetes mellitus. Limitations of Use: Levemir is not recommended for the treatment of diabetic ketoacidosis.
Drug Name: Tresiba (insulin degludec)
Diabetes Mellitus Indicated to improve glycemic control in patients 1 year of age and older with diabetes mellitus. Limitations of Use: Not recommended for the treatment of diabetic ketoacidosis.
Drug Name: Semglee (insulin glargine), Semglee (insulin glargine-yfgn), Insulin glargine-yfgn, Rezvoglar (insulin glargine-aglr)
Diabetes Mellitus Indicated to improve glycemic control in adult and pediatric patients with diabetes mellitus. Limitations of use: Not recommended for the treatment of diabetic ketoacidosis.

Drug Name: Basaglar (insulin glargine)
Diabetes Mellitus Indicated to improve glycemic control in adults and pediatric patients with type 1 diabetes mellitus and in adults with type 2 diabetes mellitus. Limitations of use: Not recommended for the treatment of diabetic ketoacidosis.

Drug Name: Insulin degludec
Diabetes Mellitus Indicated to improve glycemic control in patients 1 year of age and older with diabetes mellitus. Limitations of use: Not recommended for the treatment of diabetic ketoacidosis.

2 . Criteria

Prior Authorization Guideline

Guideline ID	GL-228903
Guideline Name	Long-Acting Bronchodilator Combinations - PA, ST, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Airduo Respiclick (fluticasone propionate and salmeterol) Inhalation Powder, Airduo Digihaler (fluticasone propionate and salmeterol) Inhalation Powder
Asthma Indicated for the treatment of asthma in patients aged 12 years and older. Airduo should be used for patients not adequately controlled on a long term asthma control medication such as an inhaled corticosteroid or whose disease warrants initiation of treatment with both an inhaled corticosteroid and long acting beta-2 adrenergic agonist (LABA). Limitations of Use: Airduo is NOT indicated for the relief of acute bronchospasm.
Drug Name: Bevespi Aerosphere (glycopyrrolate and formoterol fumarate)
Chronic Obstructive Pulmonary Disease (COPD) Indicated for the long-term, maintenance treatment of patients with chronic obstructive pulmonary disease (COPD). Limitation of use: Bevespi Aerosphere is not indicated for the relief of acute bronchospasm or for the treatment of asthma.
Drug Name: Dulera (mometasone/formoterol) Inhalation Aerosol
Asthma Indicated for the treatment of asthma in patients 5 years of age and older. Dulera should be used for patients not adequately controlled on a long-term asthma-control

medication such as an inhaled corticosteroid (ICS) or whose disease warrants initiation of treatment with both an ICS and long-acting beta-2-adrenergic agonist (LABA). Limitation of Use: Dulera is not indicated for the relief of acute bronchospasm.
Drug Name: Duaklir Pressair (aclidinium bromide and formoterol fumarate)
Chronic Obstructive Pulmonary Disease (COPD) Indicated for the maintenance treatment of patients with chronic obstructive pulmonary disease (COPD). Limitations of Use: Not indicated for the relief of acute bronchospasm or for the treatment of asthma.
Drug Name: Wixela Inhub (fluticasone/salmeterol) Inhalation Powder
Asthma Indicated for twice-daily treatment of asthma in patients aged 4 years and older. Wixela Inhub should be used for patients not adequately controlled on a long-term asthma control medication such as an inhaled corticosteroid (ICS) or whose disease warrants initiation of treatment with both an ICS and long-acting beta - adrenergic agonist (LABA). Limitations of Use: Wixela Inhub is NOT indicated for the relief of acute bronchospasm **Chronic Obstructive Pulmonary Disease (COPD)** Maintenance treatment of airflow obstruction and reducing exacerbations in patients with chronic obstructive pulmonary disease (COPD), including chronic bronchitis and/or emphysema. Limitations of Use: Wixela Inhub is NOT indicated for the relief of acute bronchospasm.
Drug Name: Symbicort (budesonide/formoterol fumarate dihydrate) Inhalation Aerosol, Breyna (budesonide/formoterol fumarate dihydrate) Inhalation Aerosol
Asthma Indicated for the treatment of asthma in patients 6 years of age and older. Symbicort should be used for patients not adequately controlled on a long-term asthma-control medication such as an inhaled corticosteroid (ICS) or whose disease warrants initiation of treatment with both an inhaled corticosteroid and long-acting beta2-adrenergic agonist (LABA). **Chronic Obstructive Pulmonary Disease** Maintenance treatment of airflow obstruction in patients with chronic obstructive pulmonary disease (COPD) including chronic bronchitis and/or emphysema. Limitations of Use: Not indicated for the relief of acute bronchospasm.

Prior Authorization Guideline

Guideline ID	GL-228466
Guideline Name	Lonsurf (trifluridine and tipiracil)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Lonsurf (trifluridine and tipiracil)
Metastatic Colorectal Cancer Indicated for the treatment of adult patients with metastatic colorectal cancer (mCRC), as a single agent or in combination with bevacizumab, who have been previously treated with fluoropyrimidine-, oxaliplatin- and irinotecan-based chemotherapy, an anti-VEGF biological therapy, and if RAS wild-type, an antiEGFR therapy. **Metastatic Gastric Cancer** Indicated for the treatment of adult patients with metastatic gastric or gastroesophageal junction adenocarcinoma previously treated with at least two prior lines of chemotherapy that included a fluoropyrimidine, a platinum, either a taxane or irinotecan, and if appropriate, HER2/neu-targeted therapy.

2 . Criteria

Product Name:Lonsurf

Diagnosis	Metastatic Colorectal Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LONSURF	TRIFLURIDINE-TIPIRACIL TAB 15-6.14 MG	21990002750320	Brand

LONSURF	TRIFLURIDINE-TIPIRACIL TAB 20-8.19 MG	21990002750330	Brand

Approval Criteria

1 - One of the following:

1.1 Diagnosis of Metastatic Gastric Cancer

OR

1.2 Diagnosis of metastatic gastroesophageal junction adenocarcinoma

AND

2 - Patient has been previously treated with two of the following:

- Fluoropyrimidine-based chemotherapy
- Platinum-based chemotherapy
- Taxane or irinotecan-based chemotherapy
- HER2/neu-targeted therapy (if appropriate)

Product Name:Lonsurf	
Diagnosis	Gastric/Gastroesophageal Junction Adenocarcinoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LONSURF	TRIFLURIDINE-TIPIRACIL TAB 15-6.14 MG	21990002750320	Brand
LONSURF	TRIFLURIDINE-TIPIRACIL TAB 20-8.19 MG	21990002750330	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-228467
Guideline Name	Loqtorzi (toripalimab-tpzi)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Loqtorzi (toripalimab-tpzi)
Nasopharyngeal carcinoma (NPC) Indicated, in combination with cisplatin and gemcitabine, for the first-line treatment of adults with metastatic or with recurrent, locally advanced NPC. Indicated, as a single agent, for the treatment of adults with recurrent unresectable or metastatic NPC with disease progression on or after a platinum-containing chemotherapy.

2 . Criteria

Product Name:Loqtorzi	
Diagnosis	Nasopharyngeal carcinoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LOQTORZI	TORIPALIMAB-TPZI IV SOLN 240 MG/6ML (40 MG/ML)	21357970722020	Brand

Approval Criteria

1 - Diagnosis of nasopharyngeal carcinoma (NPC)

AND

2 - Disease is one of the following:

- metastatic
- recurrent and locally advanced

AND

3 - One of the following:

3.1 All of the following:

3.1.1 Loqtorzi is being used as first line NPC treatment

AND

3.1.2 Loqtorzi is being used in combination with cisplatin and gemcitabine

AND

3.1.3 Treatment duration of Loqtorzi has not exceeded a total of 24 months during the patient's lifetime

OR

3.2 Both of the following:

3.2.1 Loqtorzi is being used as recurrent NPC treatment

AND

3.2.2 Disease has progressed on or after a platinum containing chemotherapy

Product Name:Loqtorzi	
Diagnosis	Nasopharyngeal carcinoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LOQTORZI	TORIPALIMAB-TPZI IV SOLN 240 MG/6ML (40 MG/ML)	21357970722020	Brand

Approval Criteria

1 - All of the following:

1.1 Loqtorzi is being used as first line NPC treatment

AND

1.2 Patient does not show evidence of progressive disease while on therapy

AND

1.3 Treatment duration of Loqtorzi has not exceeded a total of 24 months during the patient's lifetime

OR

2 - Both of the following:

2.1 Loqtorzi is being used as recurrent NPC treatment

AND

2.2 Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-228470
Guideline Name	Lorbrena (lorlatinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Lorbrena (lorlatinib)
Non-small cell lung cancer (NSCLC) Indicated for the treatment of adult patients with metastatic non-small cell lung cancer (NSCLC) whose tumors are anaplastic lymphoma kinase (ALK)-positive as detected by an FDA-approved test.

2 . Criteria

Product Name:Lorbrena	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LORBRENA	LORLATINIB TAB 25 MG	21530556000320	Brand
LORBRENA	LORLATINIB TAB 100 MG	21530556000330	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - One of the following:

2.1 Patient has had disease progression on, contraindication or intolerance to, or is not a candidate for one of the following:

- Alecensa (alectinib)
- Alunbrig (brugatinib)

OR

2.2 For continuation of prior therapy

Product Name:Lorbrena	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LORBRENA	LORLATINIB TAB 25 MG	21530556000320	Brand
LORBRENA	LORLATINIB TAB 100 MG	21530556000330	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while therapy

Lucemyra (lofexidine)

Prior Authorization Guideline

Guideline ID	GL-233393
Guideline Name	Lucemyra (lofexidine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	1/16/2019
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Lucemyra (lofexidine)
Opioid withdrawal Indicated for the mitigation of opioid withdrawal symptoms to facilitate abrupt opioid discontinuation in adults.

2 . Criteria

Product Name:Lucemyra	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
LUCEMYRA	LOFEXIDINE HCL TAB 0.18 MG (BASE EQUIVALENT)	62805045100315	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication, or intolerance to clonidine

3 . References

1. Lucemyra Prescribing Information. USWM, LLC. Louisville, KY. September 2020.

Date	Notes
3/14/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-229152
Guideline Name	Lumakras (sotorasib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	8/19/2021
P&T Revision Date:	8/15/2024

1 . Indications

Drug Name: Lumakras (sotorasib)
Non-Small Cell Lung Cancer (NSCLC) Indicated for the treatment of adult patients with KRAS G12C-mutated locally advanced or metastatic non-small cell lung cancer (NSCLC), as determined by an FDA-approved test, who have received at least one prior systemic therapy. This indication is approved under accelerated approval based on overall response rate (ORR) and duration of response (DOR). Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Lumakras

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUMAKRAS	SOTORASIB TAB 120 MG	21532480000320	Brand

Prior Authorization Guideline

Guideline ID	GL-228681
Guideline Name	Lumizyme (alglucosidase alfa)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Lumizyme (alglucosidase alfa)
Pompe Disease Indicated for patients with Pompe disease [acid alpha-glucosidase (GAA) deficiency].

2 . Criteria

Product Name:Lumizyme	
Diagnosis	Infantile Onset Pompe Disease (IOPD)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUMIZYME	ALGLUCOSIDASE ALFA FOR IV SOLN 50 MG	30907715002120	Brand

Approval Criteria

1 - Diagnosis of infantile-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) as confirmed by one of the following: [3]

1.1 Absence or deficiency (less than 1% of the lab specific normal mean) of GAA enzyme activity in lymphocytes, fibroblasts, or muscle tissues as confirmed by an enzymatic assay

OR

1.2 Molecular genetic testing confirms mutations in the GAA gene

AND

2 - Presence of clinical signs and symptoms of the disease (e.g., cardiomegaly, hypotonia, etc.)

AND

3 - Patient is less than or equal to 12 months of age

Product Name:Lumizyme	
Diagnosis	Infantile Onset Pompe Disease (IOPD)
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUMIZYME	ALGLUCOSIDASE ALFA FOR IV SOLN 50 MG	30907715002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Lumizyme	
Diagnosis	Late Onset Pompe Disease (LOPD)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUMIZYME	ALGLUCOSIDASE ALFA FOR IV SOLN 50 MG	30907715002120	Brand

Approval Criteria

1 - Diagnosis of late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) as confirmed by one of the following: [3, 5]

1.1 Absence or deficiency (less than 40% of the lab specific normal mean) of GAA enzyme activity in lymphocytes, fibroblasts, or muscle tissues as confirmed by an enzymatic assay

OR

1.2 Molecular genetic testing confirms mutations in the GAA gene

AND

2 - Presence of clinical signs and symptoms of the disease (e.g., respiratory distress, skeletal muscle weakness, etc.) [A]

AND

3 - Patient is 1 year of age or older

Product Name:Lumizyme	
Diagnosis	Late Onset Pompe Disease (LOPD)
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUMIZYME	ALGLUCOSIDASE ALFA FOR IV SOLN 50 MG	30907715002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. Consensus recommendation based on current clinical guidelines indicate that treatment should be started in patients with late onset Pompe disease when they become symptomatic and/or show signs of disease progression [3, 5].

Prior Authorization Guideline

Guideline ID	GL-228471
Guideline Name	Lupkynis (voclosporin) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Lupkynis (voclosporin)
Lupus Nephritis Indicated in combination with a background immunosuppressive therapy regimen for the treatment of adult patients with active lupus nephritis (LN). Limitations of Use: Safety and efficacy of Lupkynis have not been established in combination with cyclophosphamide. Use of Lupkynis is not recommended in this situation.

2 . Criteria

Product Name:Lupkynis	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUPKYNIS	VOCLOSPORIN CAP 7.9 MG	99402080000120	Brand

Approval Criteria

1 - Diagnosis of active lupus nephritis

AND

2 - Used in combination with immunosuppressive therapy (e.g., mycophenolate mofetil, methylprednisolone)

AND

3 - Prescribed by or in consultation with one of the following:

- Nephrologist
- Rheumatologist

Product Name:Lupkynis	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUPKYNIS	VOCLOSPORIN CAP 7.9 MG	99402080000120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Lupkynis	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
LUPKYNIS	VOCLOSPORIN CAP 7.9 MG	99402080000120	Brand

Approval Criteria

1 - Diagnosis of active lupus nephritis

AND

2 - Used in combination with immunosuppressive therapy (e.g., mycophenolate mofetil, methylprednisolone)

AND

3 - Prescribed by or in consultation with one of the following:

- Nephrologist
- Rheumatologist

Prior Authorization Guideline

Guideline ID	GL-228905
Guideline Name	Lynparza (olaparib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Lynparza (olaparib)
First-line maintenance treatment of BRCA-mutated advanced ovarian cancer Indicated for the maintenance treatment of adult patients with deleterious or suspected deleterious germline or somatic BRCA-mutated (gBRCAmor sBRCAm) advanced epithelial ovarian, fallopian tube or primary peritoneal cancer who are in complete or partial response to first-line platinum-based chemotherapy. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza. **Maintenance treatment of BRCA-mutated recurrent ovarian cancer** Indicated for the maintenance treatment of adult patients with deleterious or suspected deleterious germline or somatic BRCA-mutated recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer, who are in complete or partial response to platinum-based chemotherapy. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza. **First-line maintenance treatment of HRD-positive advanced ovarian cancer in combination with bevacizumab** Indicated in combination with bevacizumab for the maintenance treatment of adult patients with advanced epithelial ovarian, fallopian tube or primary peritoneal cancer who are in complete or partial response to first-line platinum-based chemotherapy and whose cancer is associated with homologous recombination deficiency

(HRD)-positive status defined by either: a deleterious or suspected deleterious BRCA mutation, and/or genomic instability. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza.

Germline BRCA-mutated HER2-negative high risk early breast cancer Indicated for the adjuvant treatment of adult patients with deleterious or suspected deleterious gBRCA-mutated, HER2-negative high risk early breast cancer who have been treated with neoadjuvant or adjuvant chemotherapy. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza.

Germline BRCA-mutated HER2-negative metastatic breast cancer Indicated for the treatment of adult patients with deleterious or suspected deleterious gBRCA-mutated, HER2-negative metastatic breast cancer, who have been treated with chemotherapy in the neoadjuvant, adjuvant, or metastatic setting. Patients with hormone receptor (HR)-positive breast cancer should have been treated with a prior endocrine therapy or be considered inappropriate for endocrine therapy. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza.

First-line maintenance treatment of germline BRCA-mutated metastatic pancreatic adenocarcinoma Indicated for the maintenance treatment of adult patients with deleterious or suspected deleterious gBRCAm metastatic pancreatic adenocarcinoma whose disease has not progressed on at least 16 weeks of a first-line platinum-based chemotherapy regimen. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza.

HRR gene-mutated metastatic castration-resistant prostate cancer Indicated for the treatment of adult patients with deleterious or suspected deleterious germline or somatic homologous recombination repair (HRR) gene-mutated metastatic castration-resistant prostate cancer (mCRPC) who have progressed following prior treatment with enzalutamide or abiraterone. Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza.

BRCA-mutated (BRCAm) metastatic castration-resistant prostate cancer (mCRPC) Indicated in combination with abiraterone and prednisone or prednisolone for the treatment of adult patients with deleterious or suspected deleterious BRCA-mutated (BRCAm) metastatic castration-resistant prostate cancer (mCRPC). Select patients for therapy based on an FDA-approved companion diagnostic for Lynparza.

2 . Criteria

Product Name:Lynparza	
Diagnosis	Epithelial ovarian, Fallopian tube, or Primary peritoneal cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Prior Authorization Guideline

Guideline ID	GL-229179
Guideline Name	Lytgobi (futibatinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/14/2022
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Lytgobi (futibatinib)
Cholangiocarcinoma Indicated for the treatment of adult patients with previously treated, unresectable, locally advanced or metastatic intrahepatic cholangiocarcinoma harboring fibroblast growth factor receptor 2 (FGFR2) gene fusions or other rearrangements. This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Lytgobi

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LYTGOBI	FUTIBATINIB TAB THERAPY PACK 4 MG (12 MG DAILY DOSE)	2153222800B720	Brand
LYTGOBI	FUTIBATINIB TAB THERAPY PACK 4 MG (16 MG DAILY DOSE)	2153222800B725	Brand
LYTGOBI	FUTIBATINIB TAB THERAPY PACK 4 MG (20 MG DAILY DOSE)	2153222800B730	Brand

Approval Criteria

1 - Diagnosis of intrahepatic cholangiocarcinoma

AND

2 - Disease is one of the following:

- Unresectable
- Locally advanced
- Metastatic

AND

3 - Disease has presence of a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangements [A]

AND

4 - Patient has been previously treated (e.g., chemotherapy)

Product Name:Lytgobi	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LYTGOBI	FUTIBATINIB TAB THERAPY PACK 4 MG (12 MG DAILY DOSE)	2153222800B720	Brand

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228906
Guideline Name	Mavyret (glecaprevir/pibrentasvir)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Mavyret (glecaprevir/pibrentasvir)
Chronic Hepatitis C (CHC) Indicated for the treatment of adult and pediatric patients 3 years and older with chronic hepatitis C virus (HCV) genotype 1, 2, 3, 4, 5 or 6 infection without cirrhosis or with compensated cirrhosis (Child-Pugh A). Indicated for the treatment of adult and pediatric patients 3 years and older with HCV genotype 1 infection, who previously have been treated with a regimen containing an HCV NS5A inhibitor or an NS3/4A protease inhibitor (PI), but not both.

2 . Criteria

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; Treatment-Naïve; without Decompensated Cirrhosis

Approval Length	8 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient is treatment-naive

AND

3 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)

Diagnosis	Chronic Hepatitis C - Genotype 1; Treatment-Experienced (Prior failure to an NS3/4A Protease Inhibitor); without Decompensated Cirrhosis
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1

AND

2 - Patient has experienced failure with a previous treatment regimen that included a HCV NS3/4A protease inhibitor [e.g., Incivek (telaprevir), Olysio (simeprevir), Victrelis (boceprevir)]

AND

3 - Patient has had no previous treatment experience with a treatment regimen that included an NS5A inhibitor (e.g., Daklinza [daclatasvir])

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist

- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1; Treatment-Experienced (Prior failure to an NS5A Inhibitor); without Decompensated Cirrhosis
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1

AND

2 - Patient has experienced failure with a previous treatment regimen that included an NS5A inhibitor (e.g., Daklinza [daclatasvir])

AND

3 - Patient has had no previous treatment experience with a treatment regimen that included a HCV NS3/4A protease inhibitor [e.g., Incivek (telaprevir), Olysio (simeprevir), Victrelis (boceprevir)]

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 3; Treatment-Experienced (Interferon- or Sovaldi-based Regimen); without Decompensated Cirrhosis
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 3

AND

2 - Patient has experienced treatment failure with a previous treatment regimen that included interferon, peginterferon, ribavirin, and/or Sovaldi (sofosbuvir)

AND

3 - Patient has had no previous treatment experience with a treatment regimen that included a HCV NS3/4A protease inhibitor [e.g., Incivek (telaprevir), Olysio (simeprevir), Victrelis (boceprevir)] or an NS5A inhibitor (e.g., Daklinza [daclatasvir])

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 4, 5, or 6; Treatment-Experienced (Interferon-based Regimen); without Cirrhosis
Approval Length	8 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with a previous interferon-based treatment regimen

AND

3 - Patient has had no previous treatment experience with a treatment regimen that included a HCV NS3/4A protease inhibitor [e.g., Incivek (telaprevir), Olysio (simeprevir), Victrelis (boceprevir)] or an NS5A inhibitor (e.g., Daklinza [daclatasvir])

AND

4 - Patient is without cirrhosis

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)

Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 4, 5, or 6; Treatment-Experienced (Interferon-based Regimen); with Compensated Cirrhosis
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with a previous interferon-based treatment regimen

AND

3 - Patient has had no previous treatment experience with a treatment regimen that included a HCV NS3/4A protease inhibitor [e.g., Incivek (telaprevir), Olysio (simeprevir), Victrelis (boceprevir)] or an NS5A inhibitor (e.g., Daklinza [daclatasvir])

AND

4 - Patient has compensated cirrhosis (e.g., Child-Pugh Class A)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 4, 5, or 6; Treatment-Experienced (Sovaldi-based regimen); without Decompensated Cirrhosis
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with a previous treatment regimen that included Sovaldi (sofosbuvir)

AND

3 - Patient has had no previous treatment experience with an HCV NS3/4A protease inhibitor inclusive combination direct acting antiviral regimen (e.g., Zepatier [elbasvir/grazoprevir])

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; Treatment-Experienced (Prior failure of Mavyret); without Decompensated Cirrhosis
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with Mavyret (glecaprevir/pibrentasvir) [2]

AND

3 - Used in combination with Sovaldi (sofosbuvir) and ribavirin [2]

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; Treatment-Experienced (Prior failure of Vosevi); without Decompensated Cirrhosis
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with Vosevi (sofosbuvir/velpatasvir/voxilaprevir) [2]

AND

3 - Used in combination with Sovaldi (sofosbuvir) and ribavirin [2]

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6 Post-Liver or Kidney Transplant; Treatment-Naive or Treatment-Experienced (Non-Direct-Acting Antiviral); without Decompensated Cirrhosis
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient has had a liver or kidney transplant [2]

AND

3 - One of the following:

- Patient is treatment-naive
- Patient has previously received non-direct-acting antiviral treatment (e.g., peginterferon)

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; HCV-Uninfected Recipients of a Liver Transplant from HCV-Viremic Donors; without Decompensated Cirrhosis
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Both of the following [2]:

- Patient was not infected with HCV prior to receiving a liver transplant
- Patient received a liver transplant from a donor with a diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

3 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

4 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; HCV-Uninfected Recipients of Non-Liver Organ Transplant from HCV-Viremic Donors; without Decompensated Cirrhosis; within First Week After Transplant
Approval Length	8 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Both of the following [2]:

- Patient was not infected with HCV prior to receiving a non-liver organ transplant
- Patient received a non-liver organ transplant from a donor with a diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Treatment initiation will occur no later than the first week after transplant

AND

3 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Mavyret (glecaprevir/pibrentasvir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; HCV-Uninfected Recipients of Non-Liver Organ Transplant from HCV-Viremic Donors; without Decompensated Cirrhosis; beyond First Week After Transplant
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MAVYRET	GLECAPREVIR-PIBRENTASVIR TAB 100-40 MG	12359902350320	Brand
MAVYRET	GLECAPREVIR-PIBRENTASVIR PELLET PACK 50-20 MG	12359902353020	Brand

Approval Criteria

1 - Both of the following [2]:

- Patient was not infected with HCV prior to receiving a non-liver organ transplant
- Patient received a non-liver organ transplant from a donor with a diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Treatment initiation will occur beyond the first week after transplant

AND

3 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Mekinist (trametinib)

Prior Authorization Guideline

Guideline ID	GL-228907
Guideline Name	Mekinist (trametinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Mekinist (trametinib)
BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma Indicated, as a single agent in BRAF-inhibitor treatment-naïve patients or in combination with dabrafenib, for the treatment of patients with unresectable or metastatic melanoma with BRAF V600E or V600K mutations as detected by an FDA-approved test. **BRAF V600E mutation-positive metastatic non-small cell lung cancer** Indicated, in combination with dabrafenib, for the treatment of patients with metastatic non-small cell lung cancer with BRAF V600E mutation as detected by an FDA-approved test. **Adjuvant treatment of BRAF V600E or V600K mutation-positive melanoma** Indicated, in combination with dabrafenib, for the adjuvant treatment of patients with melanoma with BRAF V600E or V600K mutations as detected by an FDA-approved test, and involvement of lymph node (s), following complete resection. **BRAF V600E mutation-positive locally advanced or metastatic anaplastic thyroid cancer** Indicated, in combination with dabrafenib, for the treatment of patients with locally advanced or metastatic anaplastic thyroid cancer (ATC) with BRAF V600E mutation and with no satisfactory locoregional options.

BRAF V600E mutation-positive unresectable or metastatic solid tumors Indicated, in combination with dabrafenib, for the treatment of adult and pediatric patients 1 year of age and older with unresectable or metastatic solid tumors with BRAF V600E mutation who have progressed following prior treatment and have no satisfactory alternative treatment options.

BRAF V600E mutation-positive low-grade glioma Indicated, in combination with dabrafenib, for the treatment of pediatric patients 1 year of age and older with low-grade glioma (LGG) with a BRAF V600E mutation who require systemic therapy.

Limitations of Use MEKINIST is not indicated for treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition.

2 . Criteria

Product Name:Mekinist	
Diagnosis	Unresectable or metastatic melanoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - One of the following diagnoses: [2]

- Unresectable melanoma
- Metastatic melanoma

AND

2 - Cancer is BRAF V600E or V600K mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

Product Name:Mekinist	
Diagnosis	Unresectable or metastatic melanoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Mekinist	
Diagnosis	Non-small cell lung cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand

MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer

AND

2 - Cancer is BRAF V600E mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

AND

3 - Medication is used in combination with Tafinlar (dabrafenib)

Product Name:Mekinist	
Diagnosis	Non-small cell lung cancer
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Mekinist	
Diagnosis	Adjuvant treatment for melanoma
Approval Length	12 Month [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Diagnosis of melanoma

AND

2 - Cancer is BRAF V600E mutation or V600K mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Involvement of lymph nodes following complete resection [2]

AND

4 - Used as adjunctive therapy

AND

5 - Medication is used in combination with Tafinlar (dabrafenib)

Product Name:Mekinist	
Diagnosis	Anaplastic thyroid cancer (ATC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Diagnosis of locally advanced or metastatic anaplastic thyroid cancer (ATC) [4]

AND

2 - Cancer is BRAF V600E mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Cancer may not be treated with standard locoregional treatment options

AND

4 - Medication is used in combination with Tafinlar (dabrafenib)

Product Name:Mekinist	
Diagnosis	Anaplastic thyroid cancer (ATC)
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand

MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Mekinist	
Diagnosis	Unresectable or metastatic solid tumors
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 2 MG (BASE EQUIVALENT)	21533570100330	Brand
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE FOR SOLN 0.05 MG/ML (BASE EQ)	21533570102120	Brand

Approval Criteria

1 - Diagnosis of solid tumors

AND

2 - Patient is 1 year of age or older

AND

3 - Disease is one of the following:

- unresectable
- metastatic

AND

4 - Patient has progressed on or following prior treatment and have no satisfactory alternative treatment options

AND

5 - Cancer is BRAF V600E mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

6 - Medication is used in combination with Tafinlar (dabrafenib)

Product Name:Mekinist	
Diagnosis	Unresectable or metastatic solid tumors
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MEKINIST	TRAMETINIB DIMETHYL SULFOXIDE TAB 0.5 MG (BASE EQUIVALENT)	21533570100310	Brand

Prior Authorization Guideline

Guideline ID	GL-228475
Guideline Name	Methotrexate Auto-injectors
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Otrexup (methotrexate injection)
Rheumatoid Arthritis Indicated in the management of selected adults with severe, active rheumatoid arthritis (RA) (ACR criteria), who have had an insufficient therapeutic response to, or are intolerant of, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs). **Polyarticular Juvenile Idiopathic Arthritis** Indicated in the management of children with active polyarticular juvenile idiopathic arthritis (pJIA), who have had an insufficient therapeutic response to, or are intolerant of, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs). **Psoriasis** Indicated in adults for the symptomatic control of severe, recalcitrant, disabling psoriasis that is not adequately responsive to other forms of therapy, but only when the diagnosis has been established, as by biopsy and/or after dermatologic consultation. It is important to ensure that a psoriasis “flare” is not due to an undiagnosed concomitant disease affecting immune responses. **Limitation of Use** Not indicated for the treatment of neoplastic diseases.

Drug Name: Rasuvo (methotrexate injection)
Rheumatoid Arthritis Indicated in the management of selected adults with severe, active rheumatoid arthritis (RA) (ACR criteria), who have had an insufficient therapeutic response to, or are intolerant of, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs). **Polyarticular Juvenile Idiopathic Arthritis** Indicated in the management of children with active polyarticular juvenile idiopathic arthritis (pJIA), who have had an insufficient therapeutic response to, or are intolerant of, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs). **Psoriasis** Indicated in adults for the symptomatic control of severe, recalcitrant, disabling psoriasis that is not adequately responsive to other forms of therapy, but only when the diagnosis has been established, as by biopsy and/or after dermatologic consultation. It is important to ensure that a psoriasis "flare" is not due to an undiagnosed concomitant disease affecting immune responses. **Limitation of Use** Not indicated for the treatment of neoplastic diseases.
Drug Name: Reditrex (methotrexate injection)
Rheumatoid Arthritis Indicated in the management of selected adults with severe, active rheumatoid arthritis (RA) (ACR criteria) who have had an insufficient therapeutic response to, or are intolerant of, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs). **Polyarticular Juvenile Idiopathic Arthritis** Indicated in the management of children with active polyarticular juvenile idiopathic arthritis (pJIA), who have had an insufficient therapeutic response to, or are intolerant of, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs). **Psoriasis** Indicated in adults for the symptomatic control of severe, recalcitrant, disabling psoriasis that is not adequately responsive to other forms of therapy, but only when the diagnosis has been established, as by biopsy and/or after dermatologic consultation. It is important to ensure that a psoriasis "flare" is not due to an undiagnosed concomitant disease affecting immune responses. **Limitation of Use** Not indicated for the treatment of neoplastic diseases.

Prior Authorization Guideline

Guideline ID	GL-228686
Guideline Name	Miebo (perfluorohexyloctane ophthalmic solution)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Miebo (perfluorohexyloctane ophthalmic solution)
Dry Eye Disease Indicated for the treatment of the signs and symptoms of dry eye disease.

2 . Criteria

Product Name:Miebo	
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

MIEBO	PERFLUOROHEXYLOCTANE OPHTH SOLN 1.338GM/ML	86807018002020	Brand

Approval Criteria

1 - Diagnosis of dry eye disease

Product Name:Miebo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MIEBO	PERFLUOROHEXYLOCTANE OPHTH SOLN 1.338 GM/ML	86807018002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increased tear production or improvement in dry eye symptoms)

3 . Endnotes

A. Traditional diagnostic tests include the Schirmer test, ocular surface dye staining, tear function index/fluorescein clearance test, tear break up time, tear film osmolarity, slit lamp evaluation of lid [2-4]
B. As disease severity increases, aqueous enhancement of the eye using topical agents is appropriate (e.g., emulsions, gels, ointments). Anti-inflammatory therapies (e.g., topical cyclosporine, corticosteroids), systemic omega-3 fatty acid supplements, punctal plugs, and eyeglass side shields/moisture chambers may also be considered in addition to aqueous enhancement therapies in patients who need additional symptom management [2-4]

Prior Authorization Guideline

Guideline ID	GL-228911
Guideline Name	Migraine Quantity Limit
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Amerge (naratriptan), Frova (frovatriptan), Imitrex (sumatriptan) tablets and nasal spray, Onzetra (sumatriptan), Relpax (eletriptan), Tosymra (sumatriptan), Zembrace SymTouch (sumatriptan), Zomig (zolmitriptan) tablets, Zomig-ZMT (zolmitriptan)
Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Safety and effectiveness of respective triptan therapy have not been established for cluster headache (not applicable to Zembrace SymTouch). Use only if a clear diagnosis of migraine headache has been established. If a patient has no response to the first migraine attack treated with therapy, reconsider the diagnosis of migraine before therapy is administered to treat any subsequent attacks. Therapy is not indicated for the prevention of migraine attacks.
Drug Name: Axert (almotriptan)
Migraine Headaches Indicated for the acute treatment of migraine attacks in adults with a history of migraine with or without aura. Indicated for the acute treatment of migraine headache pain in adolescents age 12 to 17 years with a history of migraine attacks with or without aura usually lasting 4 hours or more (when untreated). Important Limitations: Only use where a clear diagnosis of migraine has been established. If a patient has no response for the

first migraine attack treated with Axert, the diagnosis of migraine should be reconsidered before Axert is administered to treat any subsequent attacks. In adolescents age 12 to 17 years, efficacy of Axert on migraine-associated symptoms (nausea, photophobia, and phonophobia) was not established. Axert is not intended for the prophylactic therapy of migraine or for use in the management of hemiplegic or basilar migraine. Safety and effectiveness of Axert have not been established for cluster headache which is present in an older, predominantly male population.

Drug Name: Maxalt (rizatriptan), Maxalt-MLT (rizatriptan)

Migraine headaches Indicated for the acute treatment of migraine with or without aura in adults and in pediatric patients 6 to 17 years old. Limitations of Use: Maxalt should only be used where a clear diagnosis of migraine has been established. If a patient has no response for the first migraine attack treated with Maxalt, the diagnosis of migraine should be reconsidered before Maxalt is administered to treat any subsequent attacks. Maxalt is not indicated for use in the management of hemiplegic or basilar migraine. Maxalt is not indicated for the prevention of migraine attacks. Safety and effectiveness of Maxalt have not been established for cluster headache.

Drug Name: Migranal (dihydroergotamine mesylate)

Migraine Headaches Indicated for the acute treatment of migraine headaches with or without aura. Not intended for the prophylactic therapy of migraine or for the management of hemiplegic or basilar migraine.

Drug Name: Treximet (sumatriptan/naproxen)

Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults and pediatric patients 12 years of age or older. Limitations of Use: Use only if a clear diagnosis of migraine headache has been established. If a patient has no response to the first migraine attack treated with Treximet, reconsider the diagnosis of migraine before Treximet is administered to treat any subsequent attacks. Treximet is not indicated for the prevention of migraine attacks. Safety and effectiveness of Treximet have not been established for cluster headache.

Drug Name: Zomig (zolmitriptan) nasal spray

Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults and pediatric patients 12 years of age and older. Limitations of Use: Only use Zomig if a clear diagnosis of migraine has been established. If a patient has no response to Zomig treatment for the first migraine attack, reconsider the diagnosis of migraine before Zomig is administered to treat any subsequent attacks. Zomig is not indicated for the prevention of migraine attacks. Safety and effectiveness of Zomig have not been established for cluster headache. Not recommended in patients with moderate or severe hepatic impairment.

Drug Name: D.H.E. 45 (dihydroergotamine mesylate) injection

Migraine Headache Indicated for the acute treatment of migraine headaches with or without aura.

Cluster Headaches Indicated for acute treatment of cluster headache episodes.
Drug Name: Imitrex (sumatriptan) injection
Migraine Headache Indicated in adults for the acute treatment of migraine, with or without aura. Limitations of Use: Use only if a clear diagnosis of migraine headache has been established. If a patient has no response to the first migraine headache attack treated with Imitrex injection, reconsider the diagnosis before Imitrex injection is administered to treat any subsequent attacks. Imitrex injection is not indicated for the prevention of migraine headache attacks. **Cluster Headaches** Indicated in adults for the acute treatment of cluster headache. Limitations of Use: Use only if a clear diagnosis of cluster headache has been established. If a patient has no response to the first cluster headache attack treated with Imitrex injection, reconsider the diagnosis before Imitrex injection is administered to treat any subsequent attacks. Imitrex injection is not indicated for the prevention of cluster headache attacks.
Drug Name: Trudhesa (dihydroergotamine mesylate)
Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Not indicated for the preventive treatment of migraine or for the management of hemiplegic or basilar migraine
Drug Name: Nurtec ODT (rimegepant sulfate)
Acute Treatment of Migraine Indicated for the acute treatment of migraine with or without aura in adults. **Preventive Treatment of Episodic Migraine** Indicated for the preventive treatment of episodic migraine in adults.
Drug Name: Ubrelvy (ubrogepant)
Acute Treatment of Migraine Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Not indicated for the preventive treatment of migraine.
Drug Name: Zavzpret (zavegepant)
Acute Treatment of Migraine Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Not indicated for the preventive treatment of migraine.

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Patient is experiencing 2 or more headaches per month [10-12]

AND

3 - Patient will not be treating 15 or more headache days per month

AND

4 - Currently receiving prophylactic therapy with at least one of the following: [A, 10, 24]

- An antidepressant (i.e., Elavil [amitriptyline] or Effexor [venlafaxine])
- An anticonvulsant (i.e., Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate])
- A beta-blocker (i.e., atenolol, propranolol, nadolol, timolol, or metoprolol)
- An angiotensin receptor blocker (i.e., Atacand [candesartan])
- An angiotensin-converting enzyme (ACE) inhibitor (i.e., lisinopril)

AND

5 - Not used in combination with another triptan-containing product

AND

6 - One of the following: [B]

6.1 Higher dose or quantity is supported in the Dosage and Administration section of the manufacturer's prescribing information

OR

6.2 Higher dose or quantity is supported by one of the following compendia:

- American Hospital Formulary Service Drug Information
- Micromedex DRUGDEX System

3 . Endnotes

A. The American Academy of Neurology and American Headache Society support the use of the following medications for the prevention of episodic migraine in adult patients (with level A or B evidence): antidepressants [i.e., Elavil (amitriptyline), Effexor (venlafaxine)], antiepileptics [i.e., Depakote/Depakote ER (divalproex sodium), Topamax (topiramate)], beta-blockers [i.e., atenolol, propranolol, nadolol, timolol, metoprolol], candesartan, and lisinopril. [10, 25]
B. Published biomedical literature may be used as evidence to support safety and additional efficacy at higher than maximum doses for the diagnosis provided.

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/21/2024
P&T Revision Date:	

1 . Indications

Drug Name: Miplyffa (arimoclomol)
Niemann-Pick disease type C (NPC) Indicated for use in combination with miglustat for the treatment of neurological manifestations of Niemann-Pick disease type C (NPC) in adult and pediatric patients 2 years of age and older.

2 . Criteria

Product Name:Miplyffa	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MIPLYFFA	ARIMOCLOMOL CITRATE CAP 47 MG	62000003200120	Brand
MIPLYFFA	ARIMOCLOMOL CITRATE CAP 62 MG	62000003200130	Brand
MIPLYFFA	ARIMOCLOMOL CITRATE CAP 93 MG	62000003200140	Brand
MIPLYFFA	ARIMOCLOMOL CITRATE CAP 124 MG	62000003200150	Brand

Approval Criteria

1 - Diagnosis of Niemann-Pick disease type C (NPC)

AND

2 - Diagnosis is confirmed by one of the following:

2.1 Genetically confirmed (deoxyribonucleic acid [DNA] sequence analysis) by mutations in both alleles of NPC1 or NPC2

OR

2.2 Mutation in only one allele of NPC1 or NPC2 plus either positive filipin staining or elevated cholestane triol/oxysterols (>2 x upper limit of normal)

AND

3 - Patient has at least one neurological symptom of the disease (e.g., hearing loss, vertical supranuclear gaze palsy, ataxia, dementia, dystonia, seizures, dysarthria, or dysphagia)

AND

4 - Patient is 2 years of age or older

AND

5 - Requested drug will be used in combination with miglustat

AND

6 - Requested drug will NOT be used in combination with Aqneursa (levacetylleucine)

AND

7 - Prescribed by or in consultation with a specialist knowledgeable in the treatment of Niemann-Pick disease type C

Product Name:Miplyffa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MIPLYFFA	ARIMOCLOMOL CITRATE CAP 47 MG	62000003200120	Brand

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228910
Guideline Name	Mitoxantrone
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Mitoxantrone
Multiple Sclerosis Indicated for reducing neurologic disability and/or the frequency of clinical relapses in patients with secondary (chronic) progressive, progressive relapsing, or worsening relapsing-remitting multiple sclerosis (i.e., patients whose neurologic status is significantly abnormal between relapses). It is not indicated in the treatment of patients with primary progressive multiple sclerosis. **Prostate Cancer** Indicated, in combination with corticosteroids, as initial chemotherapy for the treatment of patients with pain related to advanced hormone-refractory prostate cancer. **Acute Non-Lymphocytic Leukemia (ANLL)** Indicated, in combination with other approved drug(s), in the initial therapy of ANLL in adults. This category includes myelogenous, promyelocytic, monocytic, and erythroid acute leukemias.

2 . Criteria

Product Name:Generic mitoxantrone	
Diagnosis	Multiple Sclerosis
Approval Length	6 Months [5-6, A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 20 MG/10ML (2 MG/ML)	21200055001320	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 25 MG/12.5ML (2 MG/ML)	21200055001325	
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 30 MG/15ML (2 MG/ML)	21200055001330	Generic

Approval Criteria

1 - Diagnosis of one of the following:

1.1 Secondary progressive multiple sclerosis: gradually worsening disability with or without superimposed relapses [2]

OR

1.2 Progressive relapsing multiple sclerosis: progression of disability from the onset with superimposed relapses [2]

OR

1.3 Worsening relapsing-remitting multiple sclerosis: neurological status remains significantly abnormal in between multiple sclerosis relapses [3]

AND

2 - Trial and failure (of a minimum 4-week supply), contraindication, or intolerance to two disease-modifying therapies for MS (e.g., Kesimpta [Ofatumumab], Avonex [Interferon beta-1a], Betaseron [Interferon beta-1b], Mayzent [Siponimod], Zeposia [ozanimod]): [B, 3, 11]

AND

3 - Left ventricular ejection fraction (LVEF) greater than or equal to 50% [2, 4-6]

AND

4 - Neutrophil count greater than or equal to 1,500 cell/mm^3

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Generic mitoxantrone	
Diagnosis	Multiple Sclerosis
Approval Length	6 Months [5-6, A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 20 MG/10ML (2 MG/ML)	21200055001320	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 25 MG/12.5ML (2 MG/ML)	21200055001325	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 30 MG/15ML (2 MG/ML)	21200055001330	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

AND

2 - Left ventricular ejection fraction (LVEF) greater than or equal to 50% [2, 4-6]

AND

3 - A lifetime cumulative dose less than 140 mg/m^2 [1]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Generic mitoxantrone	
Diagnosis	Prostate Cancer
Approval Length	6 Months [5-6, A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 20 MG/10ML (2 MG/ML)	21200055001320	Generic

MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 30 MG/15ML (2 MG/ML)	21200055001330	Generic

Approval Criteria

1 - Diagnosis of advanced hormone-refractory (castration-resistant) prostate cancer

AND

2 - Used in combination with corticosteroids (e.g., prednisone, methylprednisolone) [7, 8, 10]

AND

3 - Left ventricular ejection fraction (LVEF) greater than or equal to 50% [2, 4-6]

AND

4 - Neutrophil count greater than or equal to 1,500 cell/mm^3

Product Name:Generic mitoxantrone	
Diagnosis	Prostate Cancer
Approval Length	6 Months [5-6, A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 20 MG/10ML (2 MG/ML)	21200055001320	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 25 MG/12.5ML (2 MG/ML)	21200055001325	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 30 MG/15ML (2 MG/ML)	21200055001330	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Left ventricular ejection fraction (LVEF) greater than or equal to 50% [2, 4-6]

AND

3 - A lifetime cumulative dose less than 140mg/m^2 [1]

Product Name:Generic mitoxantrone	
Diagnosis	Acute Non-Lymphocytic Leukemia (ANLL)
Approval Length	6 Months [5-6, A]

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 25 MG/12.5ML (2 MG/ML)	21200055001325	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 30 MG/15ML (2 MG/ML)	21200055001330	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 20 MG/10ML (2 MG/ML)	21200055001320	Generic

Approval Criteria

1 - Diagnosis of acute non-lymphocytic leukemia (ANLL) (e.g., myelogenous, promyelocytic, monocytic, and erythroid)

AND

2 - Used in combination with other medications used for the treatment of ANLL [9, 10]

AND

3 - Left ventricular ejection fraction (LVEF) greater than or equal to 50% [2, 4-6]

Product Name:Generic mitoxantrone	
Diagnosis	Acute Non-Lymphocytic Leukemia (ANLL)
Approval Length	6 Months [5-6, A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 20 MG/10ML (2 MG/ML)	21200055001320	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 25 MG/12.5ML (2 MG/ML)	21200055001325	Generic
MITOXANTRONE HCL	MITOXANTRONE HCL INJ CONC 30 MG/15ML (2 MG/ML)	21200055001330	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Left ventricular ejection fraction (LVEF) greater than or equal to 50% [2, 4-6]

AND

3 - A lifetime cumulative dose less than 140mg/m^2 [1]

3 . Endnotes

A. All patients should be carefully assessed for cardiac signs and symptoms by history and physical examination prior to start of Novantrone therapy. Left ventricular ejection fraction (LVEF) should be evaluated prior to administration of the initial dose of mitoxantrone and all subsequent doses. Mitoxantrone is recommended to be dosed once every three months. Additional doses of mitoxantrone should not be administered to multiple sclerosis patients who have experienced either a drop in LVEF to below 50% or a clinically significant reduction in LVEF during mitoxantrone therapy. [1]
B. Per 2018 American Academy of Neurology (AAN) Multiple Sclerosis (MS) guideline, mitoxantrone should not be prescribed to people with MS due to the high frequency of severe adverse effects unless the potential benefit greatly outweighs the risk. Another MS agent that has relatively more side effects include Lemtrada and its prescribing information recommends reserving use after two prior lines of therapies have been tried. Due to this, a requirement of two prior agents for Mitoxantrone would be more appropriate to align with other MS agents that have more risks than benefit. [11]

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229181
Guideline Name	Molluscum Contagiosum Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/16/2023
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Ycanth (cantharidin solution)
Molluscum contagiosum Indicated for the topical treatment of molluscum contagiosum in adult and pediatric patients 2 years of age and older.

2 . Criteria

Product Name:Ycanth	
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CANTHARIDIN	CANTHARIDIN SOLN 0.7%	90750010002007	Brand
YCANTH	CANTHARIDIN SOLN 0.7%	90750010002007	Brand

Approval Criteria

1 - Diagnosis of molluscum contagiosum

AND

2 - Patient is 2 years of age or older

AND

3 - Patient has single or multiple, 2- to 5-mm-diameter, flesh-colored to translucent, dome-shaped papules, some with central umbilication [2]

AND

4 - One of the following [4]:

- Patient has eczema (e.g., atopic dermatitis)
- Patient is immunocompromised
- Patient has extensive involvement or experiences bleeds, secondary infections or discomfort from the lesions

AND

5 - Lesions have not resolved within six months of diagnosis [4]

AND

6 - One of the following:

6.1 Patient is treating new lesions that have not previously been treated with Ycanth

OR

6.2 Lesions have previously been treated with Ycanth and will not exceed a total of 4 treatments of Ycanth [A]

AND

7 - Medication is not being used concurrently with other FDA approved therapies (e.g., Zelsuvmi) on the same lesion for the treatment of molluscum contagiosum [3]

AND

8 - Prescribed by or in consultation with a dermatologist

3 . Endnotes

A. Subjects' lesions were treated with either YCANTH or vehicle at intervals of approximately 21 days until complete clearance of the lesion or for a maximum of 4 applications

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-233291
Guideline Name	Mulpleta (lusutrombopag)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/17/2018
P&T Revision Date:	6/19/2024

1 . Indications

Drug Name: Mulpleta (lusutrombopag)
Thrombocytopenia Indicated for the treatment of thrombocytopenia in adult patients with chronic liver disease who are scheduled to undergo a procedure.

2 . Criteria

Product Name:Mulpleta	
Approval Length	1 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MULPLETA	LUSUTROMBOPAG TAB 3 MG	82405045000320	Brand

Approval Criteria

1 - Diagnosis of thrombocytopenia

AND

2 - Baseline platelet count is less than 50,000/mcL

AND

3 - Patient has chronic liver disease

AND

4 - Patient is scheduled to undergo a procedure

AND

5 - Trial and failure, contraindication, or intolerance to Doptelet (avatrombopag maleate)

3 . References

1. Mulpleta Prescribing Information. Shionogi Inc. Florham Park, NJ. April 2020.

4 . Revision History

Date	Notes

1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233271
Guideline Name	Multiple Sclerosis (MS) Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/20/2000
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Aubagio (teriflunomide), Avonex (interferon beta-1a), Bafiertam (monomethyl fumarate), Betaseron (interferon beta-1b), Briumvi (ublituximab-xiiy), Copaxone (glatiramer acetate), Extavia (interferon beta-1b), Glatopa (glatiramer acetate)
Relapsing forms of multiple sclerosis (MS) Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.
Drug Name: Kesimpta (ofatumumab), Mayzent (siponimod), Plegridy (peginterferon beta-1a), Ponvory (ponesimod), Rebif (interferon beta-1a), Vumerity (diroximel fumarate)
Relapsing forms of multiple sclerosis (MS) Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.

Drug Name: Lemtrada (alemtuzumab)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include relapsing-remitting disease and active secondary progressive disease, in adults. Because of its safety profile, the use of Lemtrada should generally be reserved for patients who have had an inadequate response to two or more drugs indicated for the treatment of MS. Limitations of Use: Lemtrada is not recommended for use in patients with clinically isolated syndrome (CIS) because of its safety profile.
Drug Name: Mavenclad (cladribine)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include relapsing-remitting disease and active secondary progressive disease, in adults. Because of its safety profile, use of Mavenclad is generally recommended for patients who have had an inadequate response to, or are unable to tolerate, an alternate drug indicated for the treatment of MS. Limitations of Use: Mavenclad is not recommended for use in patients with clinically isolated syndrome (CIS) because of its safety profile.
Drug Name: Ocrevus (ocrelizumab), Ocrevus Zunovo (ocrelizumab)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults. **Primary Progressive Forms of Multiple Sclerosis (PPMS)** Indicated for the treatment of primary progressive MS, in adults.
Drug Name: Tascenso ODT (fingolimod)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in patients 10 years of age and older.

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A]

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy for continuation of therapy

AND

2.1.2 Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

OR

2.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure (of a minimum 4-week supply), contraindication, or intolerance to at least two of the following disease-modifying therapies for MS:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Dimethyl fumarate
- Fingolimod
- Kesimpta (ofatumumab)
- Mayzent (siponimod)
- Vumerity (diroximel fumarate)
- Zeposia (ozanimod)

AND

3 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Tascenso ODT	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A]

AND

2 - Patient is 10 years of age or older

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Patient is 18 years of age or older

AND

3.1.2 One of the following:

3.1.2.1 Both of the following:

3.1.2.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy for continuation of therapy

AND

3.1.2.1.2 Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

OR

3.1.2.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure (of a minimum 4-week supply), contraindication, or intolerance to at least two of the following disease-modifying therapies for MS:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Dimethyl fumarate
- Fingolimod
- Kesimpta (ofatumumab)
- Vumerity (diroximel fumarate)
- Mayzent (siponimod)
- Zeposia (ozanimod)

OR

3.2 Both of the following:

3.2.1 Patient is younger than 18 years of age

AND

3.2.2 One of the following:

3.2.2.1 All of the following:

3.2.2.1.1 Patient weighs greater than or equal to 40kg

AND

3.2.2.1.2 Submission of medical records (e.g., chart notes) confirming lack of adequate clinical response (with related symptoms) with generic fingolimod

AND

3.2.2.1.3 Submission of medical records confirming generic fingolimod has not been effective AND valid clinical justification provided explaining how the Tascenso ODT is expected to provide benefit when generic fingolimod has not been shown to be effective despite having the same active ingredient

OR

3.2.2.2 All of the following:

3.2.2.2.1 Patient weighs les than 40kg

AND

3.2.2.2.2 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) to Gilenya 0.25mg (fingolimod)

AND

3.2.2.2.3 Submission of medical records confirming generic fingolimod has not been effective AND valid clinical justification provided explaining how the Tascenso ODT is expected to provide benefit when Gilenya 0.25mg (fingolimod) has not been shown to be effective despite having the same active ingredient

AND

4 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

5 - Prescribed by or in consultation with a neurologist

AND

6 - Patient is unable to take oral tablets

3 . Endnotes

A. According to the National MS Society, of the four disease courses that have been identified in MS, relapsing-remitting MS (RRMS) is characterized primarily by relapses, and secondary-progressive MS (SPMS) has both relapsing and progressive characteristics. These two constitute “relapsing forms of MS” if they describe a disease course that is characterized by the occurrence of relapses. [7] The effectiveness of interferon beta in SPMS patients without relapses is uncertain. [6]
B. Initiation of treatment with an interferon beta medication or glatiramer acetate should be considered as soon as possible following a definite diagnosis of MS with active, relapsing disease, and may also be considered for selected patients with a first attack who are at high risk of MS. [6]
C. Based on several years of experience with glatiramer acetate and interferon beta 1a and 1b, it is the consensus of researchers and clinicians with expertise in MS that these agents are likely to reduce future disease activity and improve quality of life for many individuals with relapsing forms of MS, including those with secondary progressive disease who continue to have relapses. For those who are appropriate candidates for one of these drugs, treatment must be sustained for years. Cessation of treatment may result in a resumption of pre-treatment disease activity. [6]
D. MS specialists will use Copaxone in relapsing forms of disease, including SPMS with relapses. While there have been no trials of Copaxone in SPMS (so we have no evidenced-based data upon which to make decisions or recommendations), it's clear that where there are relapses, the injectable therapies are partially effective – they reduce relapses and new lesions on MRI. In SPMS, the trials suggest that the interferons work better in earlier, more inflammatory (i.e. those with relapses prior to the trial and with gadolinium-enhancing lesions, which is the MRI equivalent of active inflammation). Since Copaxone and the interferons appear to have rather similar efficacy in the head-to-head trials, most assume that Copaxone has a similar efficacy in SPMS: where there are relapses or active inflammation on MRI, it will likely have some benefit. Thus, most MS specialists will use Copaxone in patients with SPMS who have persistent relapses. [8]
E. According to Prescribing Information, the recommended dosage of Lemtrada is 12 mg/day administered by intravenous infusion for 2 treatment courses (first treatment

course: 12 mg/day on 5 consecutive days; second treatment course: 12 mg/day on 3 consecutive days administered 12 months after the first treatment course). Following the second treatment course, subsequent treatment courses of 12 mg per day on 3 consecutive days (36 mg total dose) may be administered, as needed, at least 12 months after the last dose of any prior treatment courses. [11]

F. Not to exceed the FDA-recommended dosage of 2 treatment courses (with the second course administered 43 weeks following the last dose of the first course). According to Prescribing Information, the recommended cumulative dosage of Mavenclad is 3.5 mg per kg body weight administered orally and divided into 2 yearly treatment courses (1.75 mg per kg per treatment course). Each treatment course is divided into 2 treatment cycles with the second cycle of each course administered 23 to 27 days after the last dose of the first cycle. Following the administration of 2 treatment courses, do not administer additional Mavenclad treatment during the next 2 years. Treatment during these 2 years may further increase the risk of malignancy. The safety and efficacy of reinitiating Mavenclad more than 2 years after completing 2 treatment courses has not been studied. [16]
G. The advantage of using combination disease-modifying therapy (DMT) compared to monotherapy DMT use has not been demonstrated, but there are safety concerns, such as reduced efficacy or disease aggravation, with combination use. [22, 23]
H. Due to the unique dosing regimen of Mavenclad, a two-month PA approval length is implemented to ensure medication for the second cycle of the same treatment course is accessible to patients before the auth expires. [16]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-233270
Guideline Name	Multiple Sclerosis (MS) Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/20/2000
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Aubagio (teriflunomide), Avonex (interferon beta-1a), Bafiertam (monomethyl fumarate), Betaseron (interferon beta-1b), Briumvi (ublituximab-xiiy), Copaxone (glatiramer acetate), Extavia (interferon beta-1b), Glatopa (glatiramer acetate)
Relapsing forms of multiple sclerosis (MS) Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.
Drug Name: Kesimpta (ofatumumab), Mayzent (siponimod), Plegridy (peginterferon beta-1a), Ponvory (ponesimod), Rebif (interferon beta-1a), Vumerity (diroximel fumarate)
Relapsing forms of multiple sclerosis (MS) Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.

Drug Name: Lemtrada (alemtuzumab)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include relapsing-remitting disease and active secondary progressive disease, in adults. Because of its safety profile, the use of Lemtrada should generally be reserved for patients who have had an inadequate response to two or more drugs indicated for the treatment of MS. Limitations of Use: Lemtrada is not recommended for use in patients with clinically isolated syndrome (CIS) because of its safety profile.
Drug Name: Mavenclad (cladribine)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include relapsing-remitting disease and active secondary progressive disease, in adults. Because of its safety profile, use of Mavenclad is generally recommended for patients who have had an inadequate response to, or are unable to tolerate, an alternate drug indicated for the treatment of MS. Limitations of Use: Mavenclad is not recommended for use in patients with clinically isolated syndrome (CIS) because of its safety profile.
Drug Name: Ocrevus (ocrelizumab), Ocrevus Zunovo (ocrelizumab)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults. **Primary Progressive Forms of Multiple Sclerosis (PPMS)** Indicated for the treatment of primary progressive MS, in adults.
Drug Name: Tascenso ODT (fingolimod)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in patients 10 years of age and older.

2 . Criteria

Product Name:Brand Aubagio, Avonex, Bafiertam, Betaseron, Brand Copaxone 40mg/mL, Generic glatiramer acetate, Glatopa, Kesimpta*, Mayzent, Generic Teriflunomide, Vumerity	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AUBAGIO	TERIFLUNOMIDE TAB 7 MG	62404070000320	Brand

GLATOPA	GLATIRAMER ACETATE SOLN PREFILLED SYRINGE 40 MG/ML	6240003010E540	Generic

Approval Criteria

1 - Diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A-D]

AND

2 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

3 - Prescribed by or in consultation with a neurologist

AND

4 - For Brand Aubagio, trial and failure (of a minimum 4-week supply), or intolerance to generic teriflunomide

Notes	*For Kesimpta, there is a QL Override (For new starts only): Please e nter 2 PAs as follows with the same start date: First PA: Approve 3 syr inges or pens per 28 days for the first month (Loading dose has a MD D of 0.05); Second PA: Approve 1 syringe or pen per 28 days (no ove rrides needed) for 12 months. (Kesimpta is hard-coded with a quantity of 1 syringe or pen per 28 days; 0.4 mL per 20 mg pen or syringe. Ma intenance dose has a MDD of 0.02)

Product Name:Brand Copaxone 20mg/mL	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COPAXONE	GLATIRAMER ACETATE SOLN PREFILLED SYRINGE 20 MG/ML	6240003010E520	Brand

Approval Criteria

1 - Diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A-D]

AND

2 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

3 - Prescribed by or in consultation with a neurologist

AND

4 - Trial and failure (of a minimum 4-week supply), or intolerance to generic glatiramer acetate

Notes	If patient meets criteria above, please approve at GPI-14

Approval Criteria

1 - Diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A]

AND

2 - Patient is 10 years of age or older

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Patient is 18 years of age or older

AND

3.1.2 One of the following:

3.1.2.1 For continuation of therapy

OR

3.1.2.2 Trial and failure (of a minimum 4-week supply), contraindication, or intolerance to at least two of the following disease-modifying therapies for MS:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Kesimpta (ofatumumab)
- Dimethyl fumarate
- Fingolimod
- Mayzent (siponimod)
- Vumerity (diroximel fumarate)
- Zeposia (ozanimod)

OR

3.2 Both of the following:

3.2.1 Patient is younger than 18 years of age

AND

3.2.2 One of the following:

3.2.2.1 Both of the following:

- Patient weighs greater than or equal to 40kg

- Trial and failure (of a minimum 4-week supply) or intolerance to generic fingolimod

OR

3.2.2.2 Both of the following:

- Patient weighs less than 40kg
- Trial and failure (of a minimum 4-week supply) or intolerance to Gilenya (fingolimod)

AND

4 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

5 - Prescribed by or in consultation with a neurologist

AND

6 - Patient is unable to take oral tablets

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A]

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy for continuation of therapy

AND

2.1.2 Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

OR

2.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure (of a minimum 4-week supply), contraindication, or intolerance to at least two of the following disease-modifying therapies for MS:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Dimethyl fumarate
- Fingolimod
- Kesimpta (ofatumumab)
- Mayzent (siponimod)
- Vumerity (diroximel fumarate)
- Zeposia (ozanimod)

AND

3 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Tascenso ODT	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TASCENSO ODT	FINGOLIMOD LAURYL SULFATE TABLET DISINTEGRATING 0.25 MG	62407025207220	Brand
TASCENSO ODT	FINGOLIMOD LAURYL SULFATE TABLET DISINTEGRATING 0.5 MG	62407025207230	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A]

AND

2 - Patient is 10 years of age or older

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Patient is 18 years of age or older

AND

3.1.2 One of the following:

3.1.2.1 Both of the following:

3.1.2.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy for continuation of therapy

AND

3.1.2.1.2 Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

OR

3.1.2.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure (of a minimum 4-week supply), contraindication, or intolerance to at least two of the following disease-modifying therapies for MS:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Dimethyl fumarate
- Fingolimod
- Kesimpta (ofatumumab)
- Vumerity (diroximel fumarate)
- Mayzent (siponimod)
- Zeposia (ozanimod)

OR

3.2 Both of the following:

3.2.1 Patient is younger than 18 years of age

AND

3.2.2 One of the following:

3.2.2.1 All of the following:

3.2.2.1.1 Patient weighs greater than or equal to 40kg

AND

3.2.2.1.2 Submission of medical records (e.g., chart notes) confirming lack of adequate clinical response (with related symptoms) with generic fingolimod

AND

3.2.2.1.3 Submission of medical records confirming generic fingolimod has not been effective AND valid clinical justification provided explaining how the Tascenso ODT is expected to provide benefit when generic fingolimod has not been shown to be effective despite having the same active ingredient

OR

3.2.2.2 All of the following:

3.2.2.2.1 Patient weighs les than 40kg

AND

3.2.2.2.2 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) to Gilenya 0.25mg (fingolimod)

AND

3.2.2.2.3 Submission of medical records confirming generic fingolimod has not been effective AND valid clinical justification provided explaining how the Tascenso ODT is expected to provide benefit when Gilenya 0.25mg (fingolimod) has not been shown to be effective despite having the same active ingredient

AND

4 - Not used in combination with another disease-modifying therapy for MS [G, 22, 23]

AND

5 - Prescribed by or in consultation with a neurologist

AND

6 - Patient is unable to take oral tablets

Product Name:Briumvi	
Approval Length	12 month(s)

AND

5 - Prescribed by or in consultation with a neurologist

3 . Endnotes

A. According to the National MS Society, of the four disease courses that have been identified in MS, relapsing-remitting MS (RRMS) is characterized primarily by relapses, and secondary-progressive MS (SPMS) has both relapsing and progressive characteristics. These two constitute “relapsing forms of MS” if they describe a disease course that is characterized by the occurrence of relapses. [7] The effectiveness of interferon beta in SPMS patients without relapses is uncertain. [6]
B. Initiation of treatment with an interferon beta medication or glatiramer acetate should be considered as soon as possible following a definite diagnosis of MS with active, relapsing disease, and may also be considered for selected patients with a first attack who are at high risk of MS. [6]
C. Based on several years of experience with glatiramer acetate and interferon beta 1a and 1b, it is the consensus of researchers and clinicians with expertise in MS that these agents are likely to reduce future disease activity and improve quality of life for many individuals with relapsing forms of MS, including those with secondary progressive disease who continue to have relapses. For those who are appropriate candidates for one of these drugs, treatment must be sustained for years. Cessation of treatment may result in a resumption of pre-treatment disease activity. [6]
D. MS specialists will use Copaxone in relapsing forms of disease, including SPMS with relapses. While there have been no trials of Copaxone in SPMS (so we have no evidenced-based data upon which to make decisions or recommendations), it's clear that where there are relapses, the injectable therapies are partially effective – they reduce relapses and new lesions on MRI. In SPMS, the trials suggest that the interferons work better in earlier, more inflammatory (i.e. those with relapses prior to the trial and with gadolinium-enhancing lesions, which is the MRI equivalent of active inflammation). Since Copaxone and the interferons appear to have rather similar efficacy in the head-to-head trials, most assume that Copaxone has a similar efficacy in SPMS: where there are relapses or active inflammation on MRI, it will likely have some benefit. Thus, most MS specialists will use Copaxone in patients with SPMS who have persistent relapses. [8]
E. According to Prescribing Information, the recommended dosage of Lemtrada is 12 mg/day administered by intravenous infusion for 2 treatment courses (first treatment

course: 12 mg/day on 5 consecutive days; second treatment course: 12 mg/day on 3 consecutive days administered 12 months after the first treatment course). Following the second treatment course, subsequent treatment courses of 12 mg per day on 3 consecutive days (36 mg total dose) may be administered, as needed, at least 12 months after the last dose of any prior treatment courses. [11]

F. Not to exceed the FDA-recommended dosage of 2 treatment courses (with the second course administered 43 weeks following the last dose of the first course). According to Prescribing Information, the recommended cumulative dosage of Mavenclad is 3.5 mg per kg body weight administered orally and divided into 2 yearly treatment courses (1.75 mg per kg per treatment course). Each treatment course is divided into 2 treatment cycles with the second cycle of each course administered 23 to 27 days after the last dose of the first cycle. Following the administration of 2 treatment courses, do not administer additional Mavenclad treatment during the next 2 years. Treatment during these 2 years may further increase the risk of malignancy. The safety and efficacy of reinitiating Mavenclad more than 2 years after completing 2 treatment courses has not been studied. [16]
G. The advantage of using combination disease-modifying therapy (DMT) compared to monotherapy DMT use has not been demonstrated, but there are safety concerns, such as reduced efficacy or disease aggravation, with combination use. [22, 23]
H. Due to the unique dosing regimen of Mavenclad, a two-month PA approval length is implemented to ensure medication for the second cycle of the same treatment course is accessible to patients before the auth expires. [16]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228912
Guideline Name	Myalept (metreleptin for injection)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Myalept (metreleptin for injection)
Congenital or acquired generalized lipodystrophy Indicated as an adjunct to diet as replacement therapy to treat the complications of leptin deficiency in patients with congenital or acquired generalized lipodystrophy

2 . Criteria

Product Name:Myalept	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYALEPT	METRELEPTIN FOR SUBCUTANEOUS INJ 11.3 MG	30906050002120	Brand

Approval Criteria

1 - Diagnosis of congenital or acquired generalized lipodystrophy

AND

2 - Patient is refractory to current standards of care for lipid and diabetic management

AND

3 - Prescribed by or in consultation with an endocrinologist

AND

4 - Documentation demonstrates that patient has at least one of the following metabolic abnormalities: [2]

- Insulin resistance (defined as requiring more than 200 units per day)
- Hypertriglyceridemia
- Diabetes mellitus

Product Name:Myalept	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYALEPT	METRELEPTIN FOR SUBCUTANEOUS INJ 11.3 MG	30906050002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy, such as one of the following:

- Sustained reduction in hemoglobin A1c level from baseline
- Sustained reduction in triglyceride levels from baseline

Prior Authorization Guideline

Guideline ID	GL-228688
Guideline Name	Myobloc (rimabotulinumtoxin B)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Myobloc (rimabotulinumtoxin B)
Cervical Dystonia (CD) Indicated for the treatment of adults with cervical dystonia to reduce the severity of abnormal head position and neck pain associated with cervical dystonia. **Chronic Sialorrhea** Indicated for the treatment of chronic sialorrhea in adults.

2 . Criteria

Product Name:Myobloc	
Diagnosis	Cervical Dystonia (also known as spasmodic torticollis)
Approval Length	3 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYOBLOC	RIMABOTULINUMTOXINB INJ 2500 UNIT/0.5ML	74400020102018	Brand
MYOBLOC	RIMABOTULINUMTOXINB INJ 5000 UNIT/ML	74400020102020	Brand
MYOBLOC	RIMABOTULINUMTOXINB INJ 10000 UNIT/2ML	74400020102022	Brand

Approval Criteria

1 - Diagnosis of cervical dystonia (also known as spasmodic torticollis) [2]

Product Name:Myobloc	
Diagnosis	Chronic Sialorrhea
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYOBLOC	RIMABOTULINUMTOXINB INJ 2500 UNIT/0.5ML	74400020102018	Brand
MYOBLOC	RIMABOTULINUMTOXINB INJ 5000 UNIT/ML	74400020102020	Brand
MYOBLOC	RIMABOTULINUMTOXINB INJ 10000 UNIT/2ML	74400020102022	Brand

Approval Criteria

1 - Diagnosis of chronic sialorrhea

Product Name:Myobloc	
Diagnosis	All indications listed above
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYOBLOC	RIMABOTULINUMTOXINB INJ 2500 UNIT/0.5ML	74400020102018	Brand
MYOBLOC	RIMABOTULINUMTOXINB INJ 5000 UNIT/ML	74400020102020	Brand
MYOBLOC	RIMABOTULINUMTOXINB INJ 10000 UNIT/2ML	74400020102022	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

AND

2 - At least 3 months have elapsed since the last treatment [B]

3 . Endnotes

A. The duration of effect in patients responding to Myobloc treatment has been observed in studies to be between 12 and 16 weeks at doses of 5,000 Units or 10,000 Units. [1]
B. The typical duration of effect of each treatment is up to 3 months with the repeat of treatments should be determined by clinical response but should generally be no frequent than every 12 weeks.

Naglazyme (galsulfase injection)

Prior Authorization Guideline

Guideline ID	GL-228689
Guideline Name	Naglazyme (galsulfase injection)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Naglazyme (galsulfase injection)
Mucopolysaccharidosis (MPS VI) Indicated for patients with Mucopolysaccharidosis VI (MPS VI). Naglazyme has been shown to improve walking and stair-climbing capacity.

2 . Criteria

Product Name:Naglazyme	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NAGLAZYME	GALSULFASE SOLN FOR IV INFUSION 1 MG/ML	30907535002020	Brand

Approval Criteria

1 - Diagnosis of Mucopolysaccharidosis VI (MPS VI, Maroteaux-Lamy Syndrome)

Product Name:Naglazyme	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NAGLAZYME	GALSULFASE SOLN FOR IV INFUSION 1 MG/ML	30907535002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . References

Prior Authorization Guideline

Guideline ID	GL-228691
Guideline Name	Nascobal (cyanocobalamin) Spray- Non Formulary
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nascobal (cyanocobalamin) Spray
Pernicious Anemia Indicated for the maintenance of normal hematologic status in pernicious anemia patients who are in remission following intramuscular vitamin B12 therapy and who have no nervous system involvement. **Vitamin B12 Deficiencies** Indicated as a supplement for other vitamin B12 deficiencies, including:1)Dietary deficiency of vitamin B12 occurring in strict vegetarians (Isolated vitamin B12 deficiency is very rare). 2) Malabsorption of vitamin B12 resulting from structural or functional damage to the stomach, where intrinsic factor is secreted, or to the ileum, where intrinsic factor facilitates vitamin B12 absorption. These conditions include HIV infection, AIDS, Crohn's disease, tropical sprue, and nontropical sprue (idiopathic steatorrhea, gluten-induced enteropathy). Folate deficiency in these patients is usually more severe than vitamin B12 deficiency. 3)Inadequate secretion of intrinsic factor, resulting from lesions that destroy the gastric mucosa (ingestion of corrosives, extensive neoplasia), and a number of conditions associated with a variable degree of gastric atrophy (such as multiple sclerosis, HIV infection, AIDS, certain endocrine disorders, iron deficiency, and subtotal gastrectomy). Total gastrectomy always produces vitamin B12 deficiency. Structural lesions leading to vitamin B12 deficiency include regional ileitis, ileal resections, malignancies, etc. 4)Competition for vitamin B12 by intestinal parasites or bacteria. The fish tapeworm (Diphyllobothrium latum)

absorbs huge quantities of vitamin B12 and infested patients often have associated gastric atrophy. The blind loop syndrome may produce deficiency of vitamin B12 or folate.
5)Inadequate utilization of vitamin B12. This may occur if antimetabolites for the vitamin are employed in the treatment of neoplasia

2 . Criteria

Product Name:Nascobal	
Diagnosis	Vitamin B12 Deficiency
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NASCOBAL	CYANOCOBALAMIN NASAL SPRAY 500 MCG/0.1ML	82100010002020	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) documenting that the patient is unable to absorb vitamin B12 via the oral route due to ONE of the following:

- strict vegetarian diet
- malabsorption from structural or functional damage to the stomach or ileum
- inadequate secretion of intrinsic factor
- competition of vitamin B12 by intestinal parasites or bacteria (e.g., tapeworm, blind loop syndrome)
- inadequate utilization of vitamin B12 (e.g., antimetabolites are employed in treatment of neoplasia)

AND

2 - Patient has a documented diagnosis of trypanophobia (ie., needle-phobia)

Product Name:Nascobal	
Diagnosis	Pernicious Anemia

Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NASCOBAL	CYANOCOBALAMIN NASAL SPRAY 500 MCG/0.1ML	82100010002020	Brand

Approval Criteria

1 - Diagnosis of pernicious anemia

AND

2 - Submission of medical records (e.g., chart notes) that the patient has had a previous administration of intramuscular vitamin B-12 therapy

AND

3 - Justification provided for why the patient can no longer receive intramuscular vitamin B-12 therapy

Prior Authorization Guideline

Guideline ID	GL-233303
Guideline Name	Nemluvio (nemolizumab-ilto)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/16/2024
P&T Revision Date:	

1 . Indications

Drug Name: Nemluvio (nemolizumab-ilto)
Prurigo Nodularis (PN) Indicated for the treatment of adults with prurigo nodularis.

2 . Criteria

Product Name:Nemluvio	
Diagnosis	Prurigo Nodularis (PN)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEMLUVIO	NEMOLIZUMAB-ILTO FOR SUBCUTANEOUS AUTO-INJECTOR 30 MG	9079355510D420	Brand

Approval Criteria

1 - Diagnosis of prurigo nodularis (PN)

AND

2 - Patient has at least 20 nodular lesions

AND

3 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Dermatologist

AND

4 - Trial and failure, contraindication, or intolerance to one medium or higher potency topical corticosteroid [2, 3]

AND

5 - Trial and failure, contraindication, or intolerance to Dupixent (dupilumab)

Product Name:Nemluvio	
Diagnosis	Prurigo Nodularis (PN)
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEMLUVIO	NEMOLIZUMAB-ILTO FOR SUBCUTANEOUS AUTO-INJECTOR 30 MG	9079355510D420	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as evidenced by at least ONE of the following:

- Reduction in the number of nodular lesions from baseline
- Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Nemluvio	
Diagnosis	Prurigo Nodularis (PN)
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NEMLUVIO	NEMOLIZUMAB-ILTO FOR SUBCUTANEOUS AUTO-INJECTOR 30 MG	9079355510D420	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of prurigo nodularis (PN)

AND

2 - Patient has at least 20 nodular lesions

AND

3 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Dermatologist

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication, or intolerance to one medium or higher potency topical corticosteroid [2, 3]

AND

5 - Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication, or intolerance to Dupixent (dupilumab)

3 . Background

Benefit/Coverage/Program Information

Table 1: Relative potencies of topical corticosteroids [4]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05

	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
	Dexamethasone	Cream	0.1

Lowest potency	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

Nerlynx (neratinib)

Prior Authorization Guideline

Guideline ID	GL-233208
Guideline Name	Nerlynx (neratinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	9/27/2017
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Nerlynx (neratinib)
Early Stage Breast Cancer Indicated as a single agent for the extended adjuvant treatment of adult patients with early-stage human epidermal growth factor receptor 2 (HER2)-positive breast cancer, to follow adjuvant trastuzumab based therapy **Advanced or Metastatic Breast Cancer** Indicated for the treatment of adult patients with advanced or metastatic HER2-positive breast cancer who have received two or more prior anti-HER2 based regimens in the metastatic setting in combination with capecitabine.

2 . Criteria

Product Name:Nerlynx	
Diagnosis	Early Stage Breast Cancer
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NERLYNX	NERATINIB MALEATE TAB 40 MG (BASE EQUIVALENT)	21533035100320	Brand

Approval Criteria

1 - Diagnosis of early stage breast cancer

AND

2 - Treatment duration of Nerlynx has not exceeded a total of 12 months [1, 2, 3, A]

Product Name:Nerlynx	
Diagnosis	Advanced or Metastatic Breast Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NERLYNX	NERATINIB MALEATE TAB 40 MG (BASE EQUIVALENT)	21533035100320	Brand

Approval Criteria

1 - Diagnosis of advanced or metastatic breast cancer

Product Name:Nerlynx	
Diagnosis	Advanced or Metastatic Breast Cancer

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NERLYNX	NERATINIB MALEATE TAB 40 MG (BASE EQUIVALENT)	21533035100320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Per the ExteNET Lancet study, Nerlynx was administered for no more than 12 months and showed improvement in disease-free survival in trastuzumab (Herceptin)-treated patients with early breast cancer. [2]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228477
Guideline Name	Neurologic Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Savella (milnacipran)
Fibromyalgia Indicated for the management of fibromyalgia. Savella is not approved for use in pediatric patients.
Drug Name: Lyrica CR (pregabalin extended-release)
Neuropathic pain associated with diabetic peripheral neuropathy Indicated for the management of neuropathic pain associated with diabetic peripheral neuropathy. Efficacy of Lyrica CR has not been established for the management of fibromyalgia or as adjunctive therapy for adult patients with partial onset seizures. **Postherpetic neuralgia** Indicated for the management of postherpetic neuralgia. Efficacy of Lyrica CR has not been established for the management of fibromyalgia or as adjunctive therapy for adult patients with partial onset seizures.
Drug Name: Gralise (gabapentin)

Postherpetic Neuralgia (PHN) Indicated for the management of PHN. Gralise is not interchangeable with other gabapentin products because of differing pharmacokinetic profiles that affect the frequency of administration.

2 . Criteria

Product Name:Savella, Brand Lyrica CR, generic pregabalin extended-release	
Approval Length	12 month(s)

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure or intolerance to generic gabapentin (generic Neurontin)

3 . Endnotes

A. Amitriptyline is part of the Beer's Criteria for potentially inappropriate medication use in older adults (independent of diagnoses or condition) because of its strong anticholinergic and sedation properties while cyclobenzaprine is listed as most muscle relaxants and antispasmodic drugs are poorly tolerated by elderly patients, since these cause anticholinergic adverse effects, sedation, and weakness. [3] However, amitriptyline and cyclobenzaprine have the strongest evidence for efficacy in fibromyalgia amongst the tricyclic antidepressants. [2,4]

Prior Authorization Guideline

Guideline ID	GL-229182
Guideline Name	New Drug to Market Program - PA
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/15/2011
P&T Revision Date:	11/21/2024

Note:

The purpose of this guideline is to establish policies and procedures on how to handle drugs included on the New Drugs to Market list for clients who opt to implement the New Drug to Market list as a Prior Authorization program to help manage prescription costs; these drugs will receive a general clinical review until the OptumRx P&T Committee can determine whether drug-specific prior authorization criteria are required. This guideline will not apply to Non-Formulary reviews, drugs that are benefit exclusions, drugs with step therapy edits, drugs that require quantity limit review only, or drugs that are not reviewed for prior authorization by OptumRx.

1 . Criteria

Product Name:Drugs included on the New Drug to Market list for which a Drug-Specific Prior Authorization Guideline is Unavailable*

Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
New drug to market			

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.1.3 Requested drug will be used at a dose which is within FDA recommendations

OR

1.2 If requested for an off-label indication, the off-label administrative guideline criteria have been met

AND

2 - One of the following:

2.1 If the requested drug has a formulary alternative with the same active ingredient, both of the following:

2.1.1 Patient has experienced intolerance (e.g., allergy to excipient) with a formulary alternative that has the same active ingredient

AND

2.1.2 Patient has tried and failed at least 2 additional formulary alternatives within the same therapeutic class. If only 1 formulary alternative within the therapeutic class is available, the patient must have tried the formulary alternative within the therapeutic class AND 1 additional formulary alternative. If there are no formulary alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to 2 formulary alternatives.

OR

2.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on formulary, both of the following:

2.2.1 Patient has experienced intolerance (e.g., allergy to excipient) with the individual ingredients in the combination product

AND

2.2.2 Patient has tried and failed at least 2 additional formulary alternatives

OR

2.3 If only over-the-counter (OTC) equivalents^ are available, patient has tried and failed or has contraindications or intolerance to 3 OTC equivalents. If only one or only two equivalents are available, the patient must have failed or had contraindications or intolerance to all available OTC equivalents [document drug(s), dose, duration of trial]

OR

2.4 If formulary alternatives are available and do not meet above scenarios, patient has tried and failed, or has contraindication or intolerance to at least three formulary alternatives. If only one or only two formulary alternatives are available, the patient must have failed or had contraindications or intolerance to all available formulary alternatives.

OR **2.5** No formulary alternative or OTC equivalent is available to treat the patient's condition	
Notes	* Drug should be reviewed using the drug-specific Prior Authorization guideline if available. If no drug-specific Prior Authorization guideline is available, proceed with the criteria above. This guideline will not apply to Non-Formulary reviews, drugs that are benefit exclusions, drugs with step therapy edits, drugs that require quantity limit review only, or drugs that are not reviewed for prior authorization by OptumRx. ^OTC equivalents refers to any covered or non-covered OTC equivalent product.

2 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228480
Guideline Name	Nexavar (sorafenib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nexavar (sorafenib)
Renal Cell Carcinoma Indicated for the treatment of patients with advanced renal cell carcinoma (RCC). **Hepatocellular Carcinoma** Indicated for the treatment of patients with unresectable hepatocellular carcinoma (HCC). **Differentiated Thyroid Carcinoma** Indicated for the treatment of patients with locally recurrent or metastatic, progressive, differentiated thyroid carcinoma (DTC) that is refractory to radioactive iodine treatment.

2 . Criteria

Product Name:Brand Nexavar, generic sorafenib

Diagnosis	Renal cell carcinoma
Approval Length	12 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXAVAR	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Brand
SORAFENIB	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic
SORAFENIB TOSYLATE	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic

Approval Criteria

1 - Diagnosis of advanced renal cell carcinoma

AND

2 - Trial and failure or intolerance to generic sorafenib (Applies to Brand Nexavar only)

Product Name:Brand Nexavar, generic sorafenib	
Diagnosis	Renal cell carcinoma
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXAVAR	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Brand
SORAFENIB	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic
SORAFENIB TOSYLATE	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Brand Nexavar, generic sorafenib	
Diagnosis	Hepatocellular carcinoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXAVAR	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Brand
SORAFENIB	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	2153306040032	
SORAFENIB TOSYLATE	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic

Approval Criteria

1 - Diagnosis of hepatocellular carcinoma

AND

2 - Trial and failure or intolerance to generic sorafenib (Applies to Brand Nexavar only)

Product Name:Brand Nexavar, generic sorafenib	
Diagnosis	Hepatocellular carcinoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXAVAR	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Brand
SORAFENIB	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic
SORAFENIB TOSYLATE	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Brand Nexavar, generic sorafenib	
Diagnosis	Differentiated Thyroid Carcinoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXAVAR	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Brand
SORAFENIB	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic
SORAFENIB TOSYLATE	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic

Approval Criteria

1 - Diagnosis of differentiated thyroid carcinoma

AND

2 - One of the following:

- Locally recurrent disease

- Metastatic disease

AND

3 - Patient has progressive disease

AND

4 - Disease is refractory to radioactive iodine (RAI) treatment

AND

5 - Trial and failure or intolerance to generic sorafenib (Applies to Brand Nexavar only)

Product Name:Brand Nexavar, generic sorafenib	
Diagnosis	Differentiated Thyroid Carcinoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXAVAR	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Brand
SORAFENIB	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic
SORAFENIB TOSYLATE	SORAFENIB TOSYLATE TAB 200 MG (BASE EQUIVALENT)	21533060400320	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Treatment should continue until the patient is no longer clinically benefiting from therapy or until unacceptable toxicity occurs. Mean progression-free survival in Study 1 as described in the Nexavar prescribing information indicates a median progression-free survival of 167 days in Nexavar-treated patients with renal cell carcinoma. [1]

Prior Authorization Guideline

Guideline ID	GL-228694
Guideline Name	Nexletol (bempedoic acid) and Nexlizet (bempedoic acid-ezetimibe)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nexletol (bempedoic acid)
HeFH or primary hyperlipidemia Indicated as an adjunct to diet, in combination with other low-density lipoprotein cholesterol (LDL-C) lowering therapies, or alone when concomitant LDL-C lowering therapy is not possible, to reduce LDL-C in adults with primary hyperlipidemia, including heterozygous familial hypercholesterolemia (HeFH). **Established CVD or high risk for a CVD event but without established CVD** Indicated to reduce the risk of myocardial infarction and coronary revascularization in adults who are unable to take recommended statin therapy (including those not taking a statin) with: established cardiovascular disease (CVD), or a high risk for a CVD event but without established CVD.
Drug Name: Nexlizet (bempedoic acid-ezetimibe)
HeFH or primary hyperlipidemia Indicated as an adjunct to diet, in combination with other low-density lipoprotein cholesterol (LDL-C) lowering therapies, or alone when concomitant LDL-C lowering therapy is not possible, to reduce LDL-C in adults with primary hyperlipidemia, including heterozygous familial hypercholesterolemia (HeFH).

Established CVD or high risk for a CVD event but without established CVD Indicated to reduce the risk of myocardial infarction and coronary revascularization in adults who are unable to take recommended statin therapy (including those not taking a statin) with: established cardiovascular disease (CVD), or a high risk for a CVD event but without established CVD.

2 . Criteria

Product Name:Nexletol, Nexlizet	
Diagnosis	Heterozygous familial hypercholesterolemia (HeFH) or primary hyperlipidemia, established cardiovascular disease (CVD) or high risk for a CVD event but without established CVD
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXLETOL	BEMPEDOIC ACID TAB 180 MG	39380020000320	Brand
NEXLIZET	BEMPEDOIC ACID-EZETIMIBE TAB 180-10 MG	39991002200320	Brand

Approval Criteria

1 - One of the following diagnoses:

- Heterozygous familial hypercholesterolemia (HeFH)
- Primary Hyperlipidemia
- Established cardiovascular disease (CVD) (e.g., coronary artery disease, symptomatic peripheral arterial disease, cerebrovascular atherosclerotic disease)
- At high risk for a CVD event but without established CVD [e.g., diabetes mellitus (type 1 or type 2) in females over 65 years of age or males over 60 years of age]

AND

2 - One of the following:

- Patient has been receiving at least 12 consecutive weeks of highest tolerable dose of statin therapy
- Patient is statin intolerant as evidenced by an inability to tolerate at least two statins, with at least one started at the lowest starting daily dose, due to intolerable symptoms or clinically significant biomarker changes of liver function or muscle function (e.g., creatine kinase)
- Patient has an FDA labeled contraindication to all statins

AND

3 - One of the following LDL-C values while on maximally tolerated statin therapy within the last 120 days:

- LDL-C greater than or equal to 55 mg/dL with ASCVD
- LDL-C greater than or equal to 70 mg/dL without ASCVD

AND

4 - One of the following:

4.1 For Nexletol, ONE of the following:

- Patient has been receiving at least 12 consecutive weeks of generic ezetimibe therapy as adjunct to maximally tolerated statin therapy
- Patient has a history of contraindication or intolerance to ezetimibe

OR

4.2 For Nexlizet, patient has been receiving at least 12 consecutive weeks of generic ezetimibe therapy as adjunct to maximally tolerated statin therapy

Product Name:Nexletol, Nexlizet	
Diagnosis	Heterozygous familial hypercholesterolemia (HeFH) or primary hyperlipidemia, established cardiovascular disease (CVD) or high risk for a CVD event but without established CVD
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXLETOL	BEMPEDOIC ACID TAB 180 MG	39380020000320	Brand
NEXLIZET	BEMPEDOIC ACID-EZETIMIBE TAB 180-10 MG	39991002200320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in LDL-C levels)

AND

2 - One of the following:

- Patient continues to receive other lipid-lowering therapy (e.g., statins, ezetimibe) at the maximally tolerated dose
- Patient has a documented inability to take other lipid-lowering therapy (e.g., statins, ezetimibe)

3 . Endnotes

A. Per the 2018 ACC/AHA national treatment guidelines, adherence, response to therapy, and adverse effects should be monitored within 4 -12 weeks following LDL-C lowering medication initiation or dose adjustment, and repeated every 3 to 12 months as needed. [3]

Prior Authorization Guideline

Guideline ID	GL-228695
Guideline Name	Nexviazyme (avalglucosidase alfa-ngpt)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nexviazyme (avalglucosidase alfa-ngpt)
Pompe Disease Indicated for the treatment of patients 1 year of age and older with late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency).

2 . Criteria

Product Name:Nexviazyme	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXVIAZYME	AVALGLUCOSIDASE ALFA-NGPT FOR IV SOLN 100 MG	30907722552120	Brand

Approval Criteria

1 - Diagnosis of late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) as confirmed by one of the following: [2, 3]

1.1 Absence or deficiency (less than 40% of the lab specific normal mean) of GAA enzyme activity in lymphocytes, fibroblasts, or muscle tissues as confirmed by an enzymatic assay

OR

1.2 Molecular genetic testing confirms mutations in the GAA gene

AND

2 - Presence of clinical signs and symptoms of the disease (e.g., respiratory distress, skeletal muscle weakness, etc.) [A]

AND

3 - Patient is 1 year of age or older

Product Name:Nexviazyme	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NEXVIAZYME	AVALGLUCOSIDASE ALFA-NGPT FOR IV SOLN 100 MG	30907722552120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

3 . Endnotes

A. Consensus recommendation based on current clinical guidelines indicate that treatment should be started in patients when they become symptomatic and/or show signs of disease progression [2, 3].

Prior Authorization Guideline

Guideline ID	GL-228914
Guideline Name	Ninlaro (ixazomib citrate)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ninlaro (ixazomib citrate)
Multiple Myeloma Indicated in combination with lenalidomide and dexamethasone for the treatment of patients with multiple myeloma who have received at least one prior therapy. Limitations of Use: NINLARO is not recommended for use in the maintenance setting or in newly diagnosed multiple myeloma in combination with lenalidomide and dexamethasone outside of controlled clinical trials

2 . Criteria

Product Name:Ninlaro	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NINLARO	IXAZOMIB CITRATE CAP 2.3 MG (BASE EQUIVALENT)	21536045100120	Brand
NINLARO	IXAZOMIB CITRATE CAP 3 MG (BASE EQUIVALENT)	21536045100130	Brand
NINLARO	IXAZOMIB CITRATE CAP 4 MG (BASE EQUIVALENT)	21536045100140	Brand

Approval Criteria

1 - Diagnosis of multiple myeloma

Product Name:Ninlaro	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NINLARO	IXAZOMIB CITRATE CAP 2.3 MG (BASE EQUIVALENT)	21536045100120	Brand
NINLARO	IXAZOMIB CITRATE CAP 3 MG (BASE EQUIVALENT)	21536045100130	Brand
NINLARO	IXAZOMIB CITRATE CAP 4 MG (BASE EQUIVALENT)	21536045100140	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-233258
Guideline Name	Nityr and Orfadin
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	4/18/2018
P&T Revision Date:	6/19/2024

1 . Indications

Drug Name: Nityr (nitisinone) tablets
Hereditary Tyrosinemia Type 1 (HT-1) Indicated for the treatment of adult and pediatric patients with hereditary tyrosinemia type 1 (HT-1) in combination with dietary restriction of tyrosine and phenylalanine.
Drug Name: Brand Orfadin capsules, Brand Orfadin oral suspension, Generic nitisinone capsules
Hereditary Tyrosinemia Type 1 (HT-1) Indicated for the treatment of adult and pediatric patients with hereditary tyrosinemia type 1 (HT-1) in combination with dietary restriction of tyrosine and phenylalanine.

2 . Criteria

Product Name:Nityr*, Brand Orfadin, Generic nitisinone	
Diagnosis	Hereditary Tyrosinemia type 1 (HT-1)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

NITISINONE	NITISINONE CAP 20 MG	30904045000140	Generic

Approval Criteria

1 - Diagnosis of hereditary tyrosinemia type 1 (HT-1)

AND

2 - Diagnosis confirmed by the presence of succinylacetone in the plasma or urine [1-3]

AND

3 - Used in combination with dietary restriction of tyrosine and phenylalanine

AND

4 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Hepatologist
- Other specialist with experience in treating inborn errors of metabolism

AND

5 - Applies to Nityr only; trial and intolerance to brand Orfadin

Notes	*For patients who have difficulties swallowing intact tablets, including pediatric patients, the tablets can be disintegrated in water and admini stered using an oral syringe. If patients can swallow semi-solid foods, the tablets can also be crushed and mixed with applesauce. For prepa ration and administration instructions, see the full prescribing informati on [1].

4 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228698
Guideline Name	Nocdurna (desmopressin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nocdurna (desmopressin acetate sublingual tablet)
Nocturia Indicated for the treatment of nocturia due to nocturnal polyuria in adults who awaken at least 2 times per night to void. In the Nocdurna clinical trials nocturnal polyuria was defined as night-time urine production exceeding one-third of the 24-hour urine production. Before starting Nocdurna: (1) Evaluate the patient for possible causes for the nocturia, including excessive fluid intake prior to bedtime, and address other treatable causes of nocturia. (2) Confirm the diagnosis of nocturnal polyuria with a 24-hour urine collection, if one has not been obtained previously.

2 . Criteria

Product Name:Nocdurna	
Approval Length	3 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOCDURNA	DESMOPRESSIN ACETATE SUBLINGUAL TAB 27.7 MCG	30201010100710	Brand
NOCDURNA	DESMOPRESSIN ACETATE SUBLINGUAL TAB 55.3 MCG	30201010100715	Brand

Approval Criteria

1 - Diagnosis of nocturia due to nocturnal polyuria

AND

2 - Nighttime urine production exceeds one-third of the 24-hour urine production [A]

AND

3 - Patient wakes at least twice per night on a reoccurring basis to void

AND

4 - Initial serum sodium level prior to initiating therapy is within normal limits of the normal laboratory reference range

AND

5 - One of the following: [B]

5.1 Underlying causes of nocturia have been ruled out (e.g., overactive bladder, benign prostatic hyperplasia (BPH), Parkinson’s disease, excessive bedtime fluid intake)

OR

5.2 Underlying medical causes of nocturia are treated prior to initiating therapy (e.g., use of alpha-adrenergic blockers or 5-alpha reductase inhibitors for BPH, vaginal estrogens for vaginal atrophy)

Product Name:Nocdurna	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOCDURNA	DESMOPRESSIN ACETATE SUBLINGUAL TAB 27.7 MCG	30201010100710	Brand
NOCDURNA	DESMOPRESSIN ACETATE SUBLINGUAL TAB 55.3 MCG	30201010100715	Brand

Approval Criteria

1 - Documentation of positive clinical response to therapy

AND

2 - Patient has routine monitoring for serum sodium levels

3 . Endnotes

A. In clinical trials, nocturnal polyuria was defined as nighttime urine production exceeding one-third of the 24-hour urine production. [1]
B. Prior to initiating treatment, patients should be evaluated for possible causes of nocturia and to optimize the treatment of underlying conditions that may be contributing to the nocturia. [1]

Prior Authorization Guideline

Guideline ID	GL-228697
Guideline Name	Nocdurna (desmopressin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nocdurna (desmopressin acetate sublingual tablet)
Nocturia Indicated for the treatment of nocturia due to nocturnal polyuria in adults who awaken at least 2 times per night to void. In the Nocdurna clinical trials nocturnal polyuria was defined as night-time urine production exceeding one-third of the 24-hour urine production. Before starting Nocdurna: (1) Evaluate the patient for possible causes for the nocturia, including excessive fluid intake prior to bedtime, and address other treatable causes of nocturia. (2) Confirm the diagnosis of nocturnal polyuria with a 24-hour urine collection, if one has not been obtained previously.

2 . Criteria

Product Name:Nocdurna	
Approval Length	3 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOCDURNA	DESMOPRESSIN ACETATE SUBLINGUAL TAB 27.7 MCG	30201010100710	Brand
NOCDURNA	DESMOPRESSIN ACETATE SUBLINGUAL TAB 55.3 MCG	30201010100715	Brand

Approval Criteria

1 - Diagnosis of nocturia due to nocturnal polyuria

AND

2 - Nighttime urine production exceeds one-third of the 24-hour urine production [A]

AND

3 - Patient wakes at least twice per night on a reoccurring basis to void

AND

4 - Initial serum sodium level prior to initiating therapy is within normal limits of the normal laboratory reference range

AND

5 - One of the following: [B]

5.1 Underlying causes of nocturia have been ruled out (e.g., overactive bladder, benign prostatic hyperplasia (BPH), Parkinson’s disease, excessive bedtime fluid intake)

OR

5.2 Underlying medical causes of nocturia are treated prior to initiating therapy (e.g., use of alpha-adrenergic blockers or 5-alpha reductase inhibitors for BPH, vaginal estrogens for vaginal atrophy)

Product Name:Nocdurna	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Prior Authorization Guideline

Guideline ID	GL-228699
Guideline Name	Non-Essential Drug Program – PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Drugs included on the Non-Essential Drug List*			
Approval Length	14 Day(s)		
Guideline Type	Prior Authorization		
Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - All of the following:

1.1 Requested drug is FDA-approved for the condition being treated

AND

1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.3 Requested drug will be used at a dose which is within FDA recommendations

AND

2 - One of the following:

2.1 If the requested drug has an alternative(s) on the same or lower tier** with the same active ingredient, both of the following:

2.1.1 Patient has experienced intolerance (e.g., allergy to excipient) with all same and lower tier alternative(s) that has the same active ingredient if applicable

AND

2.1.2 Patient has tried and failed all same and lower tier alternative(s) within the same therapeutic class. If there are no same or lower tier alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to all same and lower tier alternatives if applicable

OR

2.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on same or lower tier**, both of the following:

2.2.1 Patient has experienced intolerance (e.g., allergy to excipient) with the individual ingredients in the combination product

AND

2.2.2 Patient has tried and failed all same and lower tier alternatives if applicable

OR

2.3 If only Over-The-Counter (OTC) equivalents^ are available, patient has tried and failed or has contraindications or intolerance to all available OTC equivalents. [document drug(s), dose, duration of trial]

OR

2.4 If alternative(s) on the same or lower tier** available and do not meet above scenarios, patient has tried and failed, or has contraindication or intolerance to all same and lower tier alternatives

AND

3 - Submission of records (e.g., chart notes) confirming why the requested drug is expected to provide benefit when the same and lower tier alternative(s) or OTC equivalent(s) has not shown to be effective

Notes	* If being used for any other indication, deny the case for medical nec essity and do not review for off-label use. **Alternatives on the same ti er refers to a requested drug on tier 1. ^OTC equivalents refers to any covered or non-covered OTC equivalent product.

Product Name:Drugs included on the Non-Essential Drug List*	
Approval Length	14 Day(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - All of the following:

1.1 Requested drug is FDA-approved for the condition being treated

AND

1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.3 Requested drug will be used at a dose which is within FDA recommendations

AND

2 - One of the following:

2.1 If the requested drug has a lower tier alternative(s) with the same active ingredient, both of the following:

2.1.1 Submission of medical records (e.g., chart notes) confirming patient has experienced intolerance (e.g., allergy to excipient) with all lower tier alternative(s) that has the same active ingredient

AND

2.1.2 Submission of medical records (e.g., chart notes) or paid claims confirming patient has tried and failed all lower tier alternative(s) within the same therapeutic class. If there are no lower tier alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to all lower tier alternatives

OR

2.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on lower tier, both of the following:

2.2.1 Submission of medical records (e.g., chart notes) confirming patient has experienced intolerance (e.g., allergy to excipient) with the individual ingredients in the combination product

AND

2.2.2 Submission of medical records (e.g., chart notes) or paid claims confirming patient has tried and failed all lower tier alternatives

OR

2.3 If only Over-The-Counter (OTC) equivalents^ are available, patient has tried and failed or has contraindications or intolerance to all available OTC equivalents. [document drug(s), dose, duration of trial]

OR

2.4 If lower tier alternatives are available and do not meet above scenarios, submission of medical records (e.g., chart notes) or paid claims confirming patient has tried and failed, or has contraindication or intolerance to all lower tier alternatives

AND

3 - Submission of records (e.g., chart notes) confirming why the requested drug is expected to provide benefit when the lower tier alternative(s) or OTC equivalent(s) has not shown to be effective

Notes	* If being used for any other indication, deny the case for non-formulary and do not review for off-label use. ^OTC equivalents refers to any covered or non-covered OTC equivalent product.

Prior Authorization Guideline

Guideline ID	GL-229123
Guideline Name	Non-Formulary & Excluded Drug Exceptions Process for Drugs of Clinical Concern
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	11/21/2024

Note:

The purpose of this guideline is to establish policies and procedures on how to handle non-formulary and excluded drugs when continuation of prior therapy (COT) is allowed. Continuation of prior therapy is allowed for drugs used in serious and complex disease states for which therapy needs to be tailored and/or there is significant variability in response among patients, AND change in medication therapy for members stable on established therapy could lead to irreversible disease progression, resistance to therapy, emergency room admission, hospitalization, significant disability, or death. Exceptions to COT may be allowed for drugs where there is limited risk for delays in therapy that may lead to adverse events. Continuation of therapy will not apply in cases where there is an AB-rated generic or interchangeable biosimilar. This guideline will not apply to drug exclusions that do not allow for continuation of prior therapy, drugs with step therapy edits, drugs that require quantity limit review only, or drugs that are not reviewed for prior authorization by OptumRx. ** Please consult client-specific resources to confirm whether benefit exclusions should be reviewed for medical necessity.**

Approval Criteria

1 - Both of the following:

1.1 One of the following:

1.1.1 Both of the following:

1.1.1.1 Submission of medical records (e.g., chart notes) documenting the patient has lack of adequate clinical response and related symptoms (e.g., allergy to excipient, worsening symptoms) with a formulary alternative that has the same active ingredient

AND

1.1.1.2 One of the following:

1.1.1.2.1 Submission of medical records (e.g., chart notes) or paid claims documenting the patient has tried and failed at least 2 additional formulary alternatives within the same therapeutic class. If only 1 formulary alternative within the therapeutic class is available, the patient must have tried the formulary alternative within the therapeutic class AND 1 additional formulary alternative. If there are no formulary alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to 2 formulary alternatives.

OR

1.1.1.2.2 For continuation of prior therapy

OR

1.1.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on formulary, one of the following:

1.1.2.1 Both of the following:

1.1.2.1.1 Submission of medical records (e.g., chart notes) documenting the patient has lack of adequate clinical response and related symptoms (e.g., allergy to excipient, worsening symptoms) with the individual ingredients in the combination product

AND

1.1.2.1.2 Submission of medical records (e.g., chart notes) or paid claims documenting the patient has tried and failed at least 2 additional formulary alternatives

OR

1.1.2.2 For continuation of prior therapy

OR

1.1.3 One of the following:

1.1.3.1 If formulary alternatives are available and do not meet above scenarios, submission of medical records (e.g., chart notes) or paid claims documenting patient has tried and failed, or has contraindication or intolerance to at least 3 formulary alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or had contraindications or intolerance to all available formulary alternatives (Refer to Table 1 for examples of equivalent formulary alternatives)

OR

1.1.3.2 For continuation of prior therapy

OR

1.1.4 No formulary alternative is available to treat the patient's condition

AND

1.2 One of the following:

1.2.1 Both of the following:

1.2.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.2.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

OR

1.2.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

Approval Criteria

1 - Both of the following:

1.1 One of the following:

1.1.1 For continuation of prior therapy

OR

1.1.2 Both of the following:

1.1.2.1 Submission of medical records (e.g., chart notes) documenting the patient has lack of adequate clinical response and related symptoms (e.g., allergy to excipient, worsening symptoms) with a formulary alternative that has the same active ingredient

AND

1.1.2.2 Submission of medical records (e.g., chart notes) or paid claims documenting the patient has tried and failed at least 2 additional formulary alternatives within the same therapeutic class. If only 1 formulary alternative within the therapeutic class is available, the patient must have tried the formulary alternative within the therapeutic class AND 1 additional formulary alternative. If there are no formulary alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to 2 formulary alternatives.

OR

1.1.3 If the requested drug is a fixed-dose combination product with each individual ingredients available on formulary, both of the following:

1.1.3.1 Submission of medical records (e.g., chart notes) documenting the patient has lack of adequate clinical response and related symptoms (e.g., allergy to excipient, worsening symptoms) with the individual ingredients in the combination product

AND

1.1.3.2 Submission of medical records (e.g., chart notes) or paid claims documenting the patient has tried and failed at least 2 additional formulary alternatives

OR

1.1.4 If formulary alternatives are available and do not meet above scenarios, submission of medical records (e.g., chart notes) or paid claims documenting patient has tried and failed, or has contraindication or intolerance to at least 3 formulary alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or had contraindications or intolerance to all available formulary alternatives (Refer to Table 1 for examples of equivalent formulary alternatives)

OR

1.1.5 No formulary alternative is available to treat the patient's condition

AND

1.2 One of the following:

1.2.1 Both of the following:

1.2.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.2.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

OR

1.2.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

2 . Background

Benefit/Coverage/Program Information

Table 1. Formulary Alternatives for Exclusion Drugs of Clinical Concern

Therapeutic Category	Excluded Medication	Preferred Formulary Altern (*May require PA)
Anticonvulsants	Fintepla (fenfluramine)	• **Valproic acid or clob** • **Diacomit (stiripento Epidiolex (cannabid lamotrigine, topiram zonisamide, levetira Briviact (brivaraceta**
Anticonvulsants	Oxtellar XR (oxcarbazepine extended-release)	• **Generic oxcarbazep**
Anticonvulsants	Aptiom (eslicarbazepine)	• **Generic oxcarbazep tablets**
Anticonvulsants	Zonisade (zonisamide oral suspension)	• **Generic zonisamide**
Anticonvulsants	Brand Vimpat (lacosamide)	• **Generic lacosamide**
Anticonvulsants	Elepsia XR (levetiracetam ER)	• **generic levet ER**
Anticonvulsants	Eprontia (topiramate oral solution)	• **Generic topiramate**
Antidepressants	Aplenzin (bupropion hydrobromide extended-release) Forfivo XL (bupropion hydrochloride extended-release) Brand Bupropion XL 450mg	• **Generic bupropion X products**

Antidepressants	Auvelity (dextromethorphan/bupropion ER 45-105 MG) Emsam (selegiline transdermal system)	• **Generic bupropion** • **Generic citalopram tablet** • **Generic desvenlafaxine ER** • **Generic duloxetine** • **Generic escitalopram** • **Generic fluoxetine** • **Generic mirtazapine** • **Generic paroxetine, Generic paroxetine ER** • **Generic sertraline tablet/solution** • **Generic venlafaxine, Generic venlafaxine ER**
Antidepressants	Brand Citalopram 30mg capsule	• **Generic citalopram tablet**
Antidepressants	Brand Sertraline capsule	• **Generic sertraline tablet**
Antidepressants	Brand Venlafaxine 112.5mg tablet	• **Generic venlafaxine** • **Generic venlafaxine ER**
Antipsychotics	Secuado (asenapine patch)	• **Generic aripiprazole** • **Generic asenapine** • **Generic clozapine** • **Generic olanzapine tablet** • **Generic paliperidone ER** • **Generic quetiapine** • **Generic risperidone** • **Generic ziprasidone**
Antipsychotics, Atypical	Caplyta (lumateperone)	• **Generic atypical antipsychotics (e.g., aripiprazole, Generic asenapine sublingual tablet, clozapine, olanzapine, paliperidone, quetiapine IR/ER, risperidone, ziprasidone)**
Antivirals	Reyataz (atazanavir sulfate) capsules	• **Generic atazanavir sulfate capsules**

Antivirals	Lexiva (fosamprenavir calcium)	• **Generic fosamprenavir calcium**
Antivirals	Norvir (ritonavir) tablets	• **Generic ritonavir tablets**
Antivirals	Ziagen (abacavir sulfate)	• **Generic abacavir sulfate**
Antivirals	Emtriva (emtricitabine) capsules	• **Generic emtricitabine capsules**
Antivirals	Epivir (lamivudine)	• **Generic lamivudine**
Antivirals	Retrovir (zidovudine)	• **Generic zidovudine**
Antivirals	Viread (tenofovir disoproxil fumarate) tablets	• **Generic tenofovir disoproxil fumarate tablets**
Antivirals	Sustiva (efavirenz)	• **Generic efavirenz**
Antivirals	Intelence (etravirine) 100 mg, 200 mg	• **Generic etravirine**
Antivirals	Viramune XR (nevirapine)	• **Generic nevirapine ER**
Antivirals	Epzicom (abacavir sulfate-lamivudine)	• **Generic abacavir sulfate-lamivudine**
Antivirals	Combivir (lamivudine-zidovudine)	• **Generic lamivudine-zidovudine**
Antivirals	Kaletra (lopinavir-ritonavir)	• **Generic lopinavir-ritonavir**
Antivirals	Trizivir (abacavir sulfate-lamivudine-zidovudine)	• **Generic abacavir sulfate-lamivudine-zidovudine**
Antivirals	Delstrigo (doravirine-lamivudine-tenofovir df)	• **No alternative available**
Antivirals	Symfi (efavirenz-lamivudine-tenofovir df), Symfi Lo (efavirenz-lamivudine-tenofovir df)	• **Generic efavirenz-lamivudine-tenofovir df**
Antivirals	Genvoya (elvitegravir-cobicistat-emtricitabine-tenofovir alafenamide)	• **No alternative available**
Antivirals	Stribild (elvitegravir-cobicistat-emtricitabine-tenofovir df)	• **No alternative available**
Antivirals	Trogarzo (ibalizumab injection)	• **No alternative available**
Central Nervous System	Lybalvi (olanzapine and samidorphan)	• **Generic aripiprazole** • **Generic asenapine**

		• **Generic clozapine** • **Generic olanzapine** • **Generic paliperidone** • **Generic quetiapine IR/ER** • **Generic risperidone** • **Generic ziprasidone**
Hemophilia Agents	Esperoct (antihemophilic factor [recombinant], glycopegylated-exei) Jivi (antihemophilic factor [recombinant], pegylated-aucl)	• **Adynovate (antihemophilic factor [recombinant] pegylated)** • **Afstyla (antihemophilic factor [recombinant], single chain)** • **Eloctate (antihemophilic factor [recombinant], Fc fusion protein)**
Immunological Agents	Xembify [immune globulin subcutaneous (human)- klhw]	• **Cuvitru [immune globulin (human)]***
Oncology Agents	Rylaze [asparaginase erwinia chrysanthemi (recombinant)-rywn]	• **Generic oncaspar**
Oncology Agents	Brukinsa (zanubrutinib)	• **No alternative available**

3 . Endnotes

A. Target drugs are brand drugs with AB-rated generics available. Continuation of prior therapy is not required for the switch between brand and its AB-rated generic since pharmacies can automatically switch to the generic at point of sale level.
B. Target drugs are brand drugs without AB-rated generics available. Continuation of prior therapy is allowed for target drugs.

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-229142
Guideline Name	Non-formulary Descovy and Truvada
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/21/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Descovy (emtricitabine/tenofovir alafenamide)
Treatment of HIV-1 Infection Indicated in combination with other antiretroviral agents, for the treatment of HIV-1 infection in adults and pediatric patients weighing at least 35kg. Indicated in combination with other antiretroviral agents other than protease inhibitors that require a CYP3A inhibitor for the treatment of HIV-1 infection in pediatric patients weighing at least 14 kg and less than 35 kg. **HIV-1 Pre-exposure Prophylaxis (PrEP)** Indicated in at-risk adults and adolescents weighing at least 35 kg for pre-exposure prophylaxis (PrEP) to reduce the risk of human immunodeficiency virus-1 (HIV-1) infection from sexual acquisition, excluding individuals at risk from receptive vaginal sex. Individuals must have a negative HIV-1 test immediately prior to initiating Descovy for HIV-1 PrEP. Limitations of Use: The indication does not include use of Descovy in individuals at risk of HIV-1 from receptive vaginal sex because effectiveness in this population has not been evaluated.

Drug Name: Truvada (emtricitabine/tenofovir disoproxil fumarate)
Treatment of HIV-1 Infection Indicated in combination with other antiretroviral agents for the treatment of HIV-1 infection in adults and pediatric patients weighing at least 17 kg. **HIV-1 Pre-Exposure Prophylaxis (PrEP)** Indicated in at-risk adults and adolescents weighing at least 35 kg for pre-exposure prophylaxis (PrEP) to reduce the risk of sexually acquired HIV-1 infection. Individuals must have a negative HIV-1 test immediately prior to initiating Truvada for HIV-1 PrEP. The dosage of TRUVADA for HIV-1 PrEP is one tablet (containing 200 mg of FTC and 300 mg of TDF) once daily.

2 . Criteria

Product Name:Descovy	
Diagnosis	Treatment of HIV Infection
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DESCOVY	EMTRICITABINE-TENOFOVIR ALAFENAMIDE FUMARATE TAB 200-25 MG	12109902290320	Brand
DESCOVY	EMTRICITABINE-TENOFOVIR ALAFENAMIDE FUMARATE TAB 120-15 MG	12109902290310	Brand

Approval Criteria

1 - Currently used for the treatment of HIV infection

Product Name:Brand Truvada	
Diagnosis	Treatment of HIV Infection
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 200-300 MG	12109902300320	Brand
TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 100-150 MG	12109902300308	Brand
TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 133-200 MG	12109902300312	Brand
TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 167-250 MG	12109902300316	Brand

Approval Criteria

1 - Using for the treatment of HIV infection

AND

2 - One of the following:

2.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial of or intolerance to generic emtricitabine/tenofovir disoproxil fumarate (generic Truvada)

OR

2.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

Product Name:Descovy 200/25 mg*, Brand Truvada 200/300 mg*	
Diagnosis	HIV Pre-exposure Prophylaxis (PrEP)
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DESCOVY	EMTRICITABINE-TENOFOVIR ALAFENAMIDE FUMARATE TAB 200-25 MG	12109902290320	Brand
TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 200-300 MG	12109902300320	Brand

Approval Criteria **1** - Currently used for HIV Pre-exposure Prophylaxis (PrEP) **AND** **2** - Submission of medical records (e.g., chart notes) confirming patient has a history of intolerance or contraindication to generic Truvada 200/300 mg (emtricitabine/tenofovir disoproxil fumarate)	
Notes	Note: *If patient meets criteria above, please approve at GPI-14.

2.2 Patient is unable to swallow a solid dosage form (e.g., oral tablet, capsule) due to one of the following:

- Age
- Physical impairment (e.g., difficulties with motor or oral coordination)
- Dysphagia
- Patient is using a feeding tube or nasal gastric tube

OR

2.3 For continuation of prior therapy

Prior Authorization Guideline

Guideline ID	GL-233375
Guideline Name	Non-steroidal Anti-Inflammatory Agents - PA, ST
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	11/18/2008
P&T Revision Date:	2/20/2025

1 . Indications

Drug Name: Cambia (diclofenac) powder
Migraine Indicated for the acute treatment of migraine attacks with or without aura in adults (18 years of age or older). Limitations of use: Cambia is not indicated for the prophylactic therapy of migraine. The safety and effectiveness of Cambia have not been established for cluster headache, which is present in an older, predominantly male population.
Drug Name: Celebrex (celecoxib)
Multiple Indicated for: 1) Osteoarthritis (OA) 2) Rheumatoid Arthritis (RA) 3) Juvenile Rheumatoid Arthritis (JRA) in patients 2 years of age or older 4) Ankylosing Spondylitis (AS) 5) Acute Pain 6) Primary Dysmenorrhea
Drug Name: Sprix (ketorolac tromethamine) nasal spray
Moderate to moderately severe pain Indicated in adult patients for the short term (up to 5 days) management of moderate to moderately severe pain that requires analgesia at the

opioid level. Limitations of Use: Sprix is not for use in pediatric patients less than 2 years of age.
Drug Name: Tivorbex (indomethacin) capsules
Mild to moderate pain Indicated for treatment of mild to moderate acute pain in adults.
Drug Name: Pennsaid (diclofenac sodium) topical solution
Osteoarthritis (OA) Indicated for the treatment of the pain of osteoarthritis of the knee(s).
Drug Name: Indocin
Multiple Indications Indicated for the treatment for the following: moderate to severe rheumatoid arthritis including acute flare of chronic disease, moderate to severe ankylosing spondylitis, moderate to severe osteoarthritis, acute painful shoulder (bursitis and/or tendinitis) or acute gouty arthritis.
Drug Name: Vivlodex
Osteoarthritis (OA) Indicated for the treatment of osteoarthritis (OA) pain.
Drug Name: Zorvolex (diclofenac)
Pain Indicated for the treatment of mild to moderate acute pain and management of osteoarthritis (OA) pain.
Drug Name: Lofena
Primary dysmenorrhea, mild to moderate pain, osteoarthritis, and rheumatoid arthritis Indicated for treatment of primary dysmenorrhea, for relief of mild to moderate pain, for relief of the signs and symptoms of osteoarthritis, for the relief of the signs and symptoms of rheumatoid arthritis.
Drug Name: Meloxicam oral suspension 7.5mg/5mL
Multiple Indicated for: 1) Osteoarthritis (OA) 2) Rheumatoid Arthritis (RA) 3) Juvenile Rheumatoid Arthritis (JRA) in patients 2 years of age or older
Drug Name: Zipsor (diclofenac potassium)
Mild to moderate acute pain Indicated for relief of mild to moderate acute pain in adult and pediatric patients 12 years of age and older.
Drug Name: Indomethacin Suspension 25mg/5ml
Multiple Indications Indicated for the treatment for the following: moderate to severe rheumatoid arthritis including acute flare of chronic disease, moderate to severe ankylosing

spondylitis, moderate to severe osteoarthritis, acute painful shoulder (bursitis and/or tendinitis) or acute gouty arthritis.

Drug Name: Tolectin (tolmetin)

Multiple Indications Indicated for the relief of signs and symptoms of rheumatoid arthritis and osteoarthritis. TOLECTIN tablets are indicated in the treatment of acute flares and the long-term management of the chronic disease. Indicated for treatment of juvenile rheumatoid arthritis. The safety and effectiveness of TOLECTIN tablets have not been established in pediatric patients under 2 years of age.

Drug Name: Fenopron

Multiple Indications Indicated for: (1) relief of mild to moderate pain in adults (2) relief of the signs and symptoms of rheumatoid arthritis (RA) (3) relief of the signs and symptoms of osteoarthritis (OA)

Drug Name: Dolobid

Symptomatic Treatment Indicated for acute or long-term use for symptomatic treatment of the following: (1) Mild to moderate pain (2) Osteoarthritis (3) Rheumatoid arthritis

2 . Criteria

Product Name:Sprix nasal spray, Brand Ketorolac nasal spray	
Approval Length	5 Days [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPRIX	KETOROLAC TROMETHAMINE NASAL SPRAY 15.75 MG/SPRAY	66100037102090	Brand
KETOROLAC TROMETHAMINE	KETOROLAC TROMETHAMINE NASAL SPRAY 15.75 MG/SPRAY	66100037102090	Generic

Approval Criteria

1 - Diagnosis of moderate to moderately severe pain

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to oral ketorolac* tablets

OR

2.2 Patient is unable to take medications orally

Notes	*Ketorolac is recommended only for patients less than 65 years old. [B, C]

Product Name:Brand Pennsaid topical solution, Generic diclofenac topical solution

Notes	*Per the American Geriatrics Society 2023 updated Beers criteria, ind omethacin is not recommended for patients greater than or equal to 6 5 years old [B] **Per the American Geriatrics Society 2023 updated B eers criteria, chronic use of NSAIDs, including diclofenac, is not reco mmended for patients greater than or equal to 65 years old unless oth er alternatives are not effective and patient can take gastroprotective agent (proton pump inhibitor or misoprostol) [B] ^Product may be excluded depending on the plan.

3 . Endnotes

A. The total duration of use of Sprix alone or sequentially with other formulations of ketorolac (IM/IV or oral) must not exceed 5 days because of the potential for increasing the frequency and severity of adverse reactions associated with the recommended doses. Treat patients for the shortest duration possible, and do not exceed 5 days of therapy with Sprix. [1]
B. This drug is included on the 2023 Beers Criteria for Potentially Inappropriate Medication Use in Older Adults greater than or equal to 65 years old. [3]
C. This drug is included on the 2013 Health Plan Employer Data and Information Set (HEDIS) list of high-risk medications in the elderly (greater than or equal to 65 years old) [4]

5 . Revision History

Date	Notes
3/13/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-228701
Guideline Name	Northera (droxidopa)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Northera (droxidopa)
Neurogenic orthostatic hypotension (NOH) Indicated for the treatment of orthostatic dizziness, lightheadedness, or the "feeling that you are about to black out" in adult patients with symptomatic neurogenic orthostatic hypotension (NOH) caused by primary autonomic failure (Parkinson's disease [PD], multiple system atrophy and pure autonomic failure), dopamine beta-hydroxylase deficiency, and non-diabetic autonomic neuropathy. Effectiveness beyond 2 weeks of treatment has not been established. The continued effectiveness of Northera should be assessed periodically.

2 . Criteria

Product Name:Brand Northera, Generic droxidopa	
Approval Length	1 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NORTHERA	DROXIDOPA CAP 100 MG	38700030000130	Brand
NORTHERA	DROXIDOPA CAP 200 MG	38700030000140	Brand
NORTHERA	DROXIDOPA CAP 300 MG	38700030000150	Brand
DROXIDOPA	DROXIDOPA CAP 100 MG	38700030000130	Generic
DROXIDOPA	DROXIDOPA CAP 200 MG	38700030000140	Generic
DROXIDOPA	DROXIDOPA CAP 300 MG	38700030000150	Generic

Approval Criteria

1 - Diagnosis of symptomatic neurogenic orthostatic hypotension (NOH)

AND

2 - NOH is caused by one of the following conditions:

- Primary autonomic failure (e.g., Parkinson's disease, multiple system atrophy, pure autonomic failure)
- Dopamine beta-hydroxylase deficiency
- Non-diabetic autonomic neuropathy

AND

3 - Prescribed by or in consultation with one of the following specialists: [2, A]

- Cardiologist
- Neurologist
- Nephrologist

AND

4 - Attempt has been made to manage NOH through at least one non-pharmacologic intervention (e.g., use of compression stockings/abdominal binder, increasing salt/fluid intake,

patient participates in regular exercise, discontinue or reduce hypotensive or antihypertensive medications) [2, 4, 5, B]

AND

5 - Trial and failure, contraindication, or intolerance to one of the following agents:

- Fludrocortisone acetate [2, 3]
- Midodrine [2, 3]

Product Name:Brand Northera, Generic droxidopa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NORTHERA	DROXIDOPA CAP 100 MG	38700030000130	Brand
NORTHERA	DROXIDOPA CAP 200 MG	38700030000140	Brand
NORTHERA	DROXIDOPA CAP 300 MG	38700030000150	Brand
DROXIDOPA	DROXIDOPA CAP 100 MG	38700030000130	Generic
DROXIDOPA	DROXIDOPA CAP 200 MG	38700030000140	Generic
DROXIDOPA	DROXIDOPA CAP 300 MG	38700030000150	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

3 . Endnotes

A. Per consultant recommendation, prescribers who are best able to manage blood pressure or neurological conditions, like NOH, include cardiologists, neurologists, and nephrologists. [4]
B. According to international treatment guidelines, as well as per consultant recommendation, NOH should be managed non-pharmacologically before using

medications, such as fludrocortisone, midodrine, or droxidopa, to treat NOH directly. This requirement of non-pharmacologic intervention is not possible for Medicare due to benefit design, and will therefore be applicable to Commercial plans only. [2, 4, 5]

Prior Authorization Guideline

Guideline ID	GL-229185
Guideline Name	Nourianz (istradefylline)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/21/2024
P&T Revision Date:	11/16/2023

1 . Indications

Drug Name: Nourianz (istradefylline)
Parkinson's Disease Indicated as adjunctive treatment to levodopa/carbidopa in adult patients with Parkinson's disease (PD) experiencing "off' episodes.

2 . Criteria

Product Name:Nourianz	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOURIANZ	ISTRADEFYLLINE TAB 20 MG	73401025000320	Brand
NOURIANZ	ISTRADEFYLLINE TAB 40 MG	73401025000340	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is experiencing "off" episodes

AND

3 - Used in combination with carbidopa/levodopa at a maximally tolerated dose [A,1,2]

AND

4 - Trial and failure, contraindication or intolerance to two of the following [A,B,1-4]:

- MAO-B Inhibitor (e.g., rasagiline, selegiline)
- Dopamine Agonist (e.g., pramipexole, ropinirole)
- COMT Inhibitor (e.g., entacapone)

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Nourianz	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOURIANZ	ISTRADEFYLLINE TAB 20 MG	73401025000320	Brand
NOURIANZ	ISTRADEFYLLINE TAB 40 MG	73401025000340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Used in combination with carbidopa/levodopa [A,1,2]

3 . Endnotes

A. Patients included in the pivotal trials continued levodopa/carbidopa treatment throughout study duration, with or without other adjunctive agents, including COMT inhibitors, MAO-B inhibitors, and dopamine agonists. Of the 195 patients of a North American phase IIb trial, 86% of patients were on adjunct dopamine agonists and 41% were on adjunct COMT inhibitors. Similarly, amongst the combined 967 patients enrolled in the other 3 trials (1 North American, 2 Japanese), about 90% were on adjunctive treatment regimens. [1, 2]
B. Management of “off” episodes is individualized to patient response and presentation, which fluctuate and change with disease progression. A 2018 evidence-based medicine review on the treatment of motor fluctuations in Parkinson’s disease recommended MAO-B inhibitors, dopamine agonists, and COMT inhibitors as clinically useful and efficacious, whereas Nourianz was recommended as possibly useful and only likely efficacious. [3, 4]

1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228486
Guideline Name	Nplate (romiplostim)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nplate (romiplostim)
Immune Thrombocytopenia (ITP) Indicated for the treatment of thrombocytopenia in adult patients with immune thrombocytopenia (ITP) who have had an insufficient response to corticosteroids, immunoglobulins, or splenectomy and in pediatric patients 1 year of age and older with ITP for at least 6 months who have had an insufficient response to corticosteroids, immunoglobulins, or splenectomy. Limitations of Use: - Nplate is not indicated for the treatment of thrombocytopenia due to myelodysplastic syndrome (MDS) or any cause of thrombocytopenia other than ITP. - Nplate should be used only in patients with ITP whose degree of thrombocytopenia and clinical condition increases the risk for bleeding. - Nplate should not be used in an attempt to normalize platelet counts. **Hematopoietic Syndrome of Acute Radiation Syndrome** Indicated to increase survival in adults and in pediatric patients (including term neonates) acutely exposed to myelosuppressive doses of radiation.

2 . Criteria

Product Name:Nplate	
Diagnosis	Immune Thrombocytopenia (ITP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NPLATE	ROMIPLOSTIM FOR INJ 250 MCG	82405060002120	Brand
NPLATE	ROMIPLOSTIM FOR INJ 500 MCG	82405060002130	Brand
NPLATE	ROMIPLOSTIM FOR INJ 125 MCG	82405060002110	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Immune thrombocytopenia (ITP) [A]
- Relapsed/refractory ITP [4]

AND

2 - Baseline platelet count is less than 30,000/mcL [2-4]

AND

3 - Patient's degree of thrombocytopenia and clinical condition increase the risk of bleeding

AND

4 - Trial and failure, contraindication, or intolerance to one of the following: [2]

- Corticosteroids (e.g., dexamethasone, prednisone)
- Immune globulins (e.g., Gammaplex, Gammagard S/D)

- Splenectomy

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Nplate	
Diagnosis	Immune Thrombocytopenia (ITP)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NPLATE	ROMIPLOSTIM FOR INJ 250 MCG	82405060002120	Brand
NPLATE	ROMIPLOSTIM FOR INJ 500 MCG	82405060002130	Brand
NPLATE	ROMIPLOSTIM FOR INJ 125 MCG	82405060002110	Brand

Approval Criteria

1 - Patient demonstrates positive response to therapy as evidenced by an increase in platelet count to a level sufficient to avoid clinically important bleeding

Product Name:Nplate	
Diagnosis	Hematopoietic Syndrome of Acute Radiation Syndrome
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NPLATE	ROMIPLOSTIM FOR INJ 250 MCG	82405060002120	Brand
NPLATE	ROMIPLOSTIM FOR INJ 500 MCG	82405060002130	Brand
NPLATE	ROMIPLOSTIM FOR INJ 125 MCG	82405060002110	Brand

Approval Criteria

1 - Diagnosis of hematopoietic syndrome of acute radiation syndrome

AND

2 - Patient is acutely exposed to myelosuppressive doses of radiation

AND

3 - Prescribed by or in consultation with a hematologist/oncologist

3 . Endnotes

A. ITP has previously been called idiopathic thrombocytopenic purpura, immune thrombocytopenic purpura, or autoimmune thrombocytopenic purpura (AITP). These terms have been replaced by "immune thrombocytopenia" to reflect the known autoantibody mechanism and the absence of purpura in some patients. [5]

Prior Authorization Guideline

Guideline ID	GL-233242
Guideline Name	Nucala (mepolizumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/17/2015
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Nucala (mepolizumab)
Severe Eosinophilic Asthma Indicated for the add-on maintenance treatment of patients with severe asthma aged 6 years and older, and with an eosinophilic phenotype. Limitations of Use: Nucala is not indicated for the relief of acute bronchospasm or status asthmaticus. **Chronic Rhinosinusitis with Nasal Polyps (CRSwNP)** Indicated for the add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult patients 18 years of age and older with inadequate response to nasal corticosteroids. **Eosinophilic Granulomatosis with Polyangiitis** Indicated for the treatment of adult patients with eosinophilic granulomatosis with polyangiitis (EGPA). **Hypereosinophilic Syndrome** Indicated for the treatment of adult and pediatric patients aged 12 years and older with hypereosinophilic syndrome (HES) for greater than or equal to 6 months without an identifiable non-hematologic secondary cause.

2 . Criteria

Product Name:Nucala	
Diagnosis	Severe Asthma
Approval Length	6 Months [G]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 40 MG/0.4ML	4460405500E520	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand
NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand

Approval Criteria

1 - Diagnosis of severe asthma [1, A]

AND

2 - Asthma is an eosinophilic phenotype as defined by one of the following [1, 3, B]:

- Baseline (pre-treatment) peripheral blood eosinophil level is greater than or equal to 150 cells/microliter
- Peripheral blood eosinophil levels were greater than or equal to 300 cells/microliter within the past 12 months

AND

3 - One of the following:

3.1 Patient has had at least two or more asthma exacerbations requiring systemic corticosteroids (e.g., prednisone) within the past 12 months [2-4, H]

OR

3.2 Prior asthma-related hospitalization within the past 12 months

AND

4 - One of the following [2-4, D]:

4.1 Both of the following:

4.1.1 Patient is 6 years of age or older but less than 12 years of age

AND

4.1.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.1.2.1 Both of the following [4]:

- Medium-dose inhaled corticosteroid (e.g., greater than 100 – 200 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.1.2.2 One medium dosed combination ICS/LABA product (e.g., Advair Diskus [fluticasone propionate 100mcg/ salmeterol 50mcg], Symbicort [budesonide 80mcg/ formoterol 4.5mcg] Breo Ellipta [fluticasone furoate 50 mcg/ vilanterol 25 mcg])

OR

4.2 Both of the following:

4.2.1 Patient is 12 years of age or older

AND

4.2.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.2.2.1 Both of the following [4]:

- High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.2.2.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg])

AND

5 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Nucala	
Diagnosis	Severe Asthma
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 40 MG/0.4ML	4460405500E520	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand
NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in exacerbations, improvement in forced expiratory volume in 1 second [FEV1], decreased use of rescue medications) [C]

AND

2 - Patient continues to be treated with an inhaled corticosteroid (ICS) (e.g., fluticasone, budesonide) with or without additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium]) unless there is a contraindication or intolerance to these medications

AND

3 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Nucala	
Diagnosis	Chronic rhinosinusitis with nasal polyps (CRSwNP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand

Approval Criteria

1 - Diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP)

AND

2 - Patient is 18 years of age or older

AND

3 - Unless contraindicated, the patient has had an inadequate response to 2 months of treatment with an intranasal corticosteroid (e.g., fluticasone, mometasone) [10, 11]

AND

4 - Used in combination with another agent for CRSwNP [J]

AND

5 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Otolaryngologist
- Pulmonologist

Product Name:Nucala	
Diagnosis	Chronic rhinosinusitis with nasal polyps (CRSwNP)
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand

Approval Criteria

1 - Diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA)

AND

2 - Patient's disease has relapsed or is refractory to standard of care therapy (i.e., corticosteroid treatment with or without immunosuppressive therapy) [F, 7]

AND

3 - Patient is currently receiving corticosteroid therapy (e.g., prednisolone, prednisone) unless there is a contraindication or intolerance to corticosteroid therapy [F, 7]

AND

4 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Rheumatologist
- Allergist/Immunologist

Product Name:Nucala	
Diagnosis	Eosinophilic Granulomatosis with Polyangiitis (EGPA)
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increase in remission time)

Product Name:Nucala	
Diagnosis	Hypereosinophilic Syndrome (HES)
Approval Length	12 Months
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand

Approval Criteria

1 - Diagnosis of hypereosinophilic syndrome (HES)

AND

2 - Patient is 12 years of age or older

AND

3 - Patient has been diagnosed for at least 6 months

AND

4 - Verification that other non-hematologic secondary causes have been ruled out (e.g., drug hypersensitivity, parasitic helminth infection, HIV infection, non-hematologic malignancy)

AND

5 - Patient is Fip1-like1-platelet-derived growth factor receptor alpha (FIP1L1-PDGFRA)-negative

AND

6 - Patient has uncontrolled HES defined as both of the following:

- History of 2 or more flares within the past 12 months [I]
- Pre-treatment blood eosinophil count greater than or equal to 1000 cells/microliter

AND

7 - Trial and failure, contraindication, or intolerance to one of the following:

- Corticosteroid therapy (e.g., prednisone)
- Cytotoxic/immunosuppressive therapy (e.g., hydroxyurea, cyclosporine, imatinib)

AND

8 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Hematologist

Product Name:Nucala	
Diagnosis	Hypereosinophilic Syndrome (HES)
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUCALA	MEPOLIZUMAB FOR INJ 100 MG	44604055002120	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 100 MG/ML	4460405500D530	Brand
NUCALA	MEPOLIZUMAB SUBCUTANEOUS SOLUTION PREF SYRINGE 100 MG/ML	4460405500E530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in flares, decreased blood eosinophil count, reduction in corticosteroid dose)

3 . Background

Clinical Practice Guidelines

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 1. Low, medium and high daily doses of inhaled corticosteroids in adolescents and adults 12 years and older [5]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	200-500	> 500-1000	> 1000
Beclometasone dipropionate (DPI or pMDI, extrafine particle*, HFA)	100-200	> 200-400	> 400

Budesonide (DPI, or pMDI, standard particle, HFA)	200-400	> 400-800	> 800
Ciclesonide (pMDI, extrafine particle*, HFA)	80-160	> 160-320	> 320
Fluticasone furoate (DPI)	100		200
Fluticasone propionate (DPI)	100-250	> 250-500	> 500
Fluticasone propionate (pMDI, standard particle, HFA)	100-250	> 250-500	> 500
Mometasone furoate (DPI)	Depends on DPI device – see product information		
Mometasone furoate (pMDI, standard particle, HFA)	200-400		> 400

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 2. Low, medium and high daily doses of inhaled corticosteroids in children 6 – 11 years [5]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	100-200	> 200-400	> 400

Beclometasone dipropionate (pMDI, extrafine particle, HFA)	50-100	> 100-200	> 200
Budesonide (DPI, or pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Budesonide (nebules)	250-500	>500-1000	>1000
Ciclesonide (pMDI, extrafine particle*, HFA)	80	>80-160	>160
Fluticasone furoate (DPI)	50		n.a.
Fluticasone propionate (DPI)	50-100	> 100-200	> 200
Fluticasone propionate (pMDI, standard particle, HFA)	50-100	> 100-200	> 200
Mometasone furoate (pMDI, standard particle, HFA)	100		200

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

4 . Endnotes

A. Patients included across the 3 pivotal studies (DREAM, MENSA, and SIRIUS) [2-4] were characterized with clinical features of severe refractory asthma per American Thoracic Society (ATS) criteria [5]. Per the ATS: "Severe asthma is defined as asthma which requires treatment with high dose inhaled corticosteroids (ICS) plus a second controller (and/or systemic corticosteroids) to prevent it from becoming 'uncontrolled' or which remains 'uncontrolled' despite this therapy.'' This definition includes patients who

received an adequate trial of these therapies in whom treatment was stopped due to lack of response. In patients greater than 6 years of age, ‘‘Gold Standard/International Guidelines treatment’’ is high dose ICS plus a long-acting beta 2-agonist (LABA), leukotriene modifier or theophylline and/or continuous or near continuous systemic corticosteroids as background therapy."

B. Inclusion criteria was modified from the DREAM study to the MENSA study to be limited to patients with eosinophils greater than or equal to 150 cells/mcL in the peripheral blood at screening or greater than or equal to 300 cells/mcL at some time during the previous year [3].
C. The primary endpoint for the DREAM and MENSA studies was the annual rate of clinically significant asthma exacerbations as a composite of the required use of systemic corticosteroids for at least 3 days, admission, or ED visit. Both studies showed mepolizumab-treated patients experienced a significant improvement in exacerbation rates compared with baseline and compared with placebo. [2, 3]
D. The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention update lists anti-interleukin- 5 treatment or anti-interleukin 5 receptor treatment as an add on option for patients with severe eosinophilic asthma that is uncontrolled on two or more controllers plus as-needed reliever medication (Step 4-5 treatment). [6]
E. Asthma treatment can often be reduced, once good asthma control has been achieved and maintained for three months and lung function has hit a plateau. However the approach to stepping down will depend on patient specific factors (e.g., current medications, risk factors). At this time evidence for optimal timing, sequence and magnitude of treatment reductions is limited. It is feasible and safe for most patients to reduce the ICS dose by 25-50% at three month intervals, but complete cessation of ICS is associated with a significant risk of exacerbations [6].
F. Nucala was approved for Eosinophilic Granulomatosis with Polyangiitis (EGPA) based on the results from the pivotal, 52-week, Phase III MIRRA study. MIRRA looked at the efficacy and safety of 300 mg of mepolizumab administered SQ every four weeks versus placebo as add-on therapy to standard of care (corticosteroids plus or minus immunosuppressants) in 136 patients with relapsing and/or refractory EGPA. MIRRA reported statistically significant outcomes with both co-primary endpoints (i.e., accrued time in remission and proportion of patients achieving remission) in favor of the treatment group [7, 8].
G. The GINA Global Strategy for Asthma Management and Prevention update recommends that patients with asthma should be reviewed regularly to monitor their symptom control, risk factors and occurrence of exacerbations, as well as to document the response to any treatment changes. Ideally, response to Type 2-targeted therapy should be re-evaluated every 3-6 months, including re-evaluation of the need for ongoing biologic therapy for patients with good response to Type 2 targeted therapy. [6]
H. Per P&T Committee, February 2019, revised exacerbation requirement to mirror other IL-5 antagonists.
I. Historical flares were defined as a worsening of HES-related clinical symptoms or a blood eosinophil count requiring an escalation in therapy. [1]
J. Other agents used for CRSwNP include intranasal corticosteroids and nasal saline.

6 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228703
Guideline Name	Nuedexta (dextromethorphan HBr/quinidine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nuedexta (dextromethorphan HBr/quinidine)
Pseudobulbar Affect (PBA) Indicated for the treatment of pseudobulbar affect (PBA). PBA occurs secondary to a variety of otherwise unrelated neurologic conditions, and is characterized by involuntary, sudden, and frequent episodes of laughing and/or crying. PBA episodes typically occur out of proportion or incongruent to the underlying emotional state. PBA is a specific condition, distinct from other types of emotional lability that may occur in patients with neurological disease or injury.

2 . Criteria

Product Name:Nuedexta	
Approval Length	3 months [A]
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUEDEXTA	DEXTROMETHORPHAN HBR-QUINIDINE SULFATE CAP 20-10 MG	62609902300120	Brand

Approval Criteria

1 - Diagnosis of pseudobulbar affect (PBA)

AND

2 - Patient has one of the following conditions: [3]

- Amyotrophic lateral sclerosis
- Multiple sclerosis
- Alzheimer's disease
- Parkinson's disease
- Stroke
- Traumatic brain injury

AND

3 - There is an absence of a cardiac rhythm disorder documented by a cardiac test (e.g., electrocardiogram)

AND

4 - Prescribed by or in consultation with one of the following specialists:

- Neurologist
- Psychiatrist

Product Name:Nuedexta	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUEDEXTA	DEXTROMETHORPHAN HBR-QUINIDINE SULFATE CAP 20-10 MG	62609902300120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. Patients should be evaluated for Nuedexta benefit after the initial 3 months of treatment. [2]

4 . References

1. Nuedexta Prescribing Information. Otsuka America Pharmaceuticals, Inc. Rockville, MD. December 2022.
2. Per clinical consultation with neurologist, September 8, 2011 and October 23, 2019.
3. Pseudobulbar affect: prevalence and management. Ther Clin Risk Manag. 2013;9:483-9.

Prior Authorization Guideline

Guideline ID	GL-228489
Guideline Name	Nulibry (fosdenopterin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nulibry (fosdenopterin)
Molybdenum cofactor deficiency (MoCD) Type A Indicated to reduce the risk of mortality in patients with molybdenum cofactor deficiency (MoCD) Type A.

2 . Criteria

Product Name:Nulibry	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NULIBRY	FOSDENOPTERIN HYDROBROMIDE FOR IV SOLN 9.5 MG	30906430202120	Brand

Approval Criteria

1 - Both of the following:

- Diagnosis of molybdenum cofactor deficiency (MoCD) Type A
- Genetic mutation in the MOCS1 gene

AND

2 - Patient has clinical and/or laboratory signs and symptoms consistent with MOCD Type A (e.g., seizures, limb/axial hypertonia, elevated levels of urinary sulfite/SSC [s-sulfocysteine] or xanthine in blood/urine, low uric acid in blood/urine)

AND

3 - Prescribed by or in consultation with a physician who specializes in the treatment of inherited metabolic disorders

Product Name:Nulibry	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NULIBRY	FOSDENOPTERIN HYDROBROMIDE FOR IV SOLN 9.5 MG	30906430202120	Brand

Approval Criteria

1 - Prescribed by or in consultation with a physician who specializes in the treatment of inherited metabolic disorders

AND

2 - Patient continues to benefit from medication

3 . References

Prior Authorization Guideline

Guideline ID	GL-233272
Guideline Name	Ocaliva (obeticholic acid)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	5/19/2016
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Ocaliva (obeticholic acid)
Primary Biliary Cholangitis Indicated for the treatment of primary biliary cholangitis (PBC) in adult patients without cirrhosis or with compensated cirrhosis who do not have evidence of portal hypertension, either in combination with ursodeoxycholic acid (UDCA) with an inadequate response to UDCA, or as monotherapy in patients unable to tolerate UDCA. This indication is approved under accelerated approval based on a reduction in alkaline phosphatase (ALP). An improvement in survival or disease-related symptoms has not been established. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials.

2 . Criteria

Product Name:Ocaliva	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OCALIVA	OBETICHOLIC ACID TAB 5 MG	52750060000320	Brand
OCALIVA	OBETICHOLIC ACID TAB 10 MG	52750060000330	Brand

Approval Criteria

1 - Patient is currently receiving treatment with Ocaliva [E, 6, 7]

AND

2 - Diagnosis of primary biliary cholangitis (also known as primary biliary cirrhosis)

AND

3 - One of the following:

3.1 Both of the following:

- Patient has failed to achieve an alkaline phosphatase (ALP) level of less than 1.67 times the upper limit of normal (ULN) after at least 12 consecutive months of treatment with ursodeoxycholic acid (UDCA) (e.g., Urso, Urso Forte, ursodiol) [A,1,4]
- Used in combination with ursodeoxycholic acid (UDCA)

OR

3.2 History of contraindication or intolerance to ursodeoxycholic acid (UDCA) [B,1-3]

AND

4 - Requested drug will not be used in combination with Iqirvo (elafibranor) or Livdelzi (seladelpar)

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

AND

6 - Patient does not have evidence of advanced cirrhosis (i.e. cirrhosis with current or prior evidence of hepatic decompensation including encephalopathy or coagulopathy) [C,5]

AND

7 - Patient does not have evidence of portal hypertension (e.g., ascites, gastroesophageal varices, persistent thrombocytopenia) [C,5]

Product Name:Ocaliva	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OCALIVA	OBETICHOLIC ACID TAB 5 MG	52750060000320	Brand
OCALIVA	OBETICHOLIC ACID TAB 10 MG	52750060000330	Brand

Approval Criteria

1 - Submission of medical records (e.g., laboratory values) documenting a reduction in ALP level from pre-treatment baseline (i.e., prior obeticholic acid therapy) while on therapy

AND

2 - Requested drug will not be used in combination with Iqirvo (elafibranor) or Livdelzi (seladelpar)

AND

3 - Patient does not have evidence of advanced cirrhosis (i.e. cirrhosis with current or prior evidence of hepatic decompensation including encephalopathy or coagulopathy) [C,D,1,5]

AND

4 - Patient does not have evidence of portal hypertension (e.g., ascites, gastroesophageal varices, persistent thrombocytopenia) [C,D,1,5]

3 . Endnotes

A. The recommended starting dosage of Ocaliva is 5 mg orally once daily for the first 3 months in adult patients without cirrhosis or with compensated cirrhosis who do not have evidence of portal hypertension, who have not achieved an adequate biochemical response to an appropriate dosage of UDCA for at least 1 year (on a stable dosage for at least 3 months) or are intolerant to UDCA. After the first 3 months, for patients who have not achieved an adequate reduction in ALP and/or total bilirubin and who are tolerating Ocaliva, increase to a maximum dosage of 10 mg once daily [1,4].
B. Obeticholic acid (OCA) was also studied as monotherapy in 60 patients with early disease stage PBC, wherein no UDCA use was allowed for at least 3 months before screening in a phase II trial. Additionally, a phase III trial included only 16 (7%) subjects treated with OCA monotherapy. In an analysis of a pooled dataset consisting of Phase 2 and Phase 3 trials, the responder rate for monotherapy at 3 months was 38%, which is similar to the 41% responder rate achieved for the combination therapy (OCA plus UDCA) [1-3].
C. On 5/26/2021, the FDA issued a black box warning restricting the use of Ocaliva in patients having primary biliary cholangitis (PBC) with advanced cirrhosis of the liver because it can cause serious harm. Some PBC patients with cirrhosis who took Ocaliva, especially those with evidence of advanced cirrhosis, developed liver failure, sometimes requiring liver transplant. In the five years since Ocaliva's accelerated approval, FDA identified 25 cases of serious liver injury leading to liver decompensation or liver failure associated with Ocaliva in PBC patients with cirrhosis, both in those without clinical signs of cirrhosis (compensated) or in those with clinical signs of cirrhosis

(decompensated). Many of these PBC patients had advanced cirrhosis before starting Ocaliva [5].

D. Patients should permanently discontinue Ocaliva if they develop laboratory or clinical evidence of hepatic decompensation (e.g., ascites, jaundice, variceal bleeding, hepatic encephalopathy), have compensated cirrhosis and develop evidence of portal hypertension (e.g., ascites, gastroesophageal varices, persistent thrombocytopenia), experience clinically significant hepatic adverse reactions, or develop complete biliary obstruction [1].
E. The Gastrointestinal Drugs Advisory Committee met on September 13, 2024, to discuss whether the supplemental new drug application submitted by Intercept Pharmaceuticals was sufficient to fulfill the accelerated approval postmarketing requirements. The review was extended beyond the initial PDUFA date of Oct. 15, 2024, due to concerns of the reliability of the data from the post-marketing study and observational study, which did not demonstrate clinical benefit, as well as inadequate data to demonstrate the safety of Ocaliva [6]. On Nov. 13, 2024, the FDA issued a complete response letter to Intercept denying full approval of Ocaliva for PBC [7].

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233226
Guideline Name	Octreotide Products - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	1/19/2001
P&T Revision Date:	12/15/2024

1 . Indications

Drug Name: Sandostatin (octreotide acetate)
Acromegaly Indicated to reduce blood levels of growth hormone and IGF-1 (somatomedin C) in acromegaly patients who have had inadequate response to or cannot be treated with surgical resection, pituitary irradiation, and bromocriptine mesylate at maximally tolerated doses. **Carcinoid Tumors, for Symptomatic Treatment of Diarrhea or Flushing** Indicated for the treatment of severe diarrhea and flushing episodes associated with metastatic carcinoid tumors. Limitations of Use: Improvement in clinical signs and symptoms, or reduction in tumor size or rate of growth, were not shown in clinical trials performed with Sandostatin Injection; these trials were not optimally designed to detect such effects. **Vasoactive Intestinal Peptide Tumors (VIPomas), for Symptomatic Treatment of Diarrhea** Indicated for the treatment of the profuse watery diarrhea associated with VIP-secreting tumors. Limitations of Use: Improvement in clinical signs and symptoms, or

reduction in tumor size or rate of growth, were not shown in clinical trials performed with Sandostatin Injection; these trials were not optimally designed to detect such effects.

Drug Name: Sandostatin LAR Depot (octreotide acetate)

General Indicated in patients in whom initial treatment with Sandostatin Injection has been shown to be effective and tolerated.

Acromegaly Indicated for long-term maintenance therapy in acromegalic patients who have had an inadequate response to surgery and/or radiotherapy, or for whom surgery and/or radiotherapy is not an option. The goal of treatment in acromegaly is to reduce GH and IGF-1 levels to normal.

Carcinoid Tumors, for Symptomatic Treatment of Diarrhea or Flushing Indicated for long-term treatment of the severe diarrhea and flushing episodes associated with metastatic carcinoid tumors. Limitation of Use: The effect of Sandostatin LAR on tumor size, rate of growth and development of metastases, has not been determined.

Vasoactive Intestinal Peptide Tumors (VIPomas), for Symptomatic Treatment of Diarrhea Indicated for long-term treatment of the profuse watery diarrhea associated with VIP-secreting tumors. Limitation of Use: The effect of Sandostatin LAR on tumor size, rate of growth and development of metastases, has not been determined.

Drug Name: Mycapssa (octreotide capsule, delayed release)

Acromegaly Indicated for long-term maintenance treatment in acromegaly patients who have responded to and tolerated treatment with octreotide or lanreotide.

Approval Criteria

1 - Diagnosis of acromegaly

AND

2 - One of the following:

2.1 Inadequate response to one of the following:

- Surgery

- Pituitary irradiation

OR

2.2 Not a candidate for surgical resection or pituitary irradiation

AND

3 - Trial and failure, contraindication, or intolerance to a dopamine agonist (e.g., bromocriptine or cabergoline) at maximally tolerated doses

AND

4 - One of the following:

4.1 Patient has had a trial of short-acting generic octreotide and responded to and tolerated therapy (applies to Sandostatin LAR and generic octreotide LAR only)

OR

4.2 Trial and failure, or intolerance to generic octreotide (applies to Brand Sandostatin only)

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of acromegaly

AND

2 - One of the following:

2.1 Inadequate response to one of the following:

- Surgery
- Pituitary irradiation

OR

2.2 Not a candidate for surgical resection or pituitary irradiation

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to a dopamine agonist (e.g., bromocriptine or cabergoline) at maximally tolerated doses

AND

4 - Both of the following (Applies to Brand Sandostatin only):

4.1 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) with generic octreotide

AND

4.2 Submission of medical records confirming generic octreotide has not been effective AND valid clinical justification provided explaining how Brand Sandostatin is expected to provide benefit when generic octreotide has not been shown to be effective despite having the same active ingredient

Product Name:Mycapssa	
Diagnosis	Acromegaly
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
MYCAPSSA	OCTREOTIDE ACETATE CAP DELAYED RELEASE 20 MG	30170070106520	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of acromegaly

AND

2 - Submission of medical records (e.g., chart notes) of one of the following to confirm diagnosis of acromegaly:

2.1 Serum GH level greater than 1 ng/mL after a 2 hour oral glucose tolerance test (OGTT) at the time of diagnosis

OR

2.2 Elevated serum IGF-1 levels (above the age and gender adjusted normal range as provided by the physician's lab) at the time of diagnosis

AND

3 - One of the following:

3.1 Inadequate response to one of the following:

- Surgery
- Pituitary irradiation

OR

3.2 Not a candidate for surgical resection or pituitary irradiation

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming patient has responded to and tolerated treatment with generic octreotide or lanreotide

AND

5 - Patient requires long-term maintenance treatment

OCTREOTIDE ACETATE	OCTREOTIDE ACETATE FOR IM INJ KIT 30 MG	30170070106430	Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of vasoactive intestinal peptide tumor requiring treatment of profuse watery diarrhea

AND

2 - Both of the following (Applies to Brand Sandostatin only):

2.1 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) with generic octreotide

AND

2.2 Submission of medical records confirming generic octreotide has not been effective AND valid clinical justification provided explaining how Brand Sandostatin is expected to provide benefit when generic octreotide has not been shown to be effective despite having the same active ingredient

Product Name:Brand Sandostatin LAR, Generic octreotide LAR	
Diagnosis	Vasoactive Intestinal Peptide Tumors, for Symptomatic Treatment of Diarrhea
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
SANDOSTATIN LAR DEPOT	OCTREOTIDE ACETATE FOR IM INJ KIT 10 MG	30170070106410	Brand
SANDOSTATIN LAR DEPOT	OCTREOTIDE ACETATE FOR IM INJ KIT 20 MG	30170070106420	Brand

1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Odomzo (sonidegib)

Prior Authorization Guideline

Guideline ID	GL-228491
Guideline Name	Odomzo (sonidegib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Odomzo (sonidegib)
Locally advanced basal cell carcinoma (BCC) Indicated for the treatment of adult patients with locally advanced basal cell carcinoma (BCC) that has recurred following surgery or radiation therapy, or those who are not candidates for surgery or radiation therapy.

2 . Criteria

Product Name:Odomzo	
Diagnosis	Basal Cell Carcinoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ODOMZO	SONIDEGIB PHOSPHATE CAP 200 MG (BASE EQUIVALENT)	21370060200120	Brand

Approval Criteria

1 - Diagnosis of locally advanced basal cell carcinoma [2]

AND

2 - One of the following:

- Cancer has recurred following surgery or radiation therapy
- Patient is not a candidate for surgery or radiation therapy

Product Name:Odomzo	
Diagnosis	Basal Cell Carcinoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ODOMZO	SONIDEGIB PHOSPHATE CAP 200 MG (BASE EQUIVALENT)	21370060200120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Verified with consultant that other specialists such as Dermatologists may prescribe sonidegib in addition to Oncologists. [3]

Ojemda (tovorafenib)

Prior Authorization Guideline

Guideline ID	GL-233332
Guideline Name	Ojemda (tovorafenib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	2/18/2025
P&T Approval Date:	7/17/2024
P&T Revision Date:	

1 . Indications

Drug Name: Ojemda (tovorafenib)
Pediatric low-grade glioma (LGG) harboring a BRAF fusion or rearrangement, or BRAF V600 mutation Indicated for the treatment of patients 6 months of age and older with relapsed or refractory pediatric low-grade glioma (LGG) harboring a BRAF fusion or rearrangement, or BRAF V600 mutation.

2 . Criteria

Product Name:Ojemda	
Diagnosis	Pediatric low-grade glioma

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OJEMDA	TOVORAFENIB TAB 100 MG	21532075000320	Brand
OJEMDA	TOVORAFENIB FOR ORAL SUSP 25 MG/ML	21532075001920	Brand

Approval Criteria

1 - Diagnosis of pediatric low-grade glioma

AND

2 - Disease is relapsed or refractory

AND

3 - Disease has a BRAF fusion or rearrangement, or BRAF V600 mutation as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - Patient does not have known or suspected diagnosis of neurofibromatosis type 1 (NF-1)

AND

5 - Patient is 6 months of age or older

AND

6 - Disease has progressed on or after at least one line of prior systemic therapy (e.g., chemotherapy)

Product Name:Ojemda	
Diagnosis	Pediatric low-grade glioma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OJEMDA	TOVORAFENIB TAB 100 MG	21532075000320	Brand

Prior Authorization Guideline

Guideline ID	GL-233187
Guideline Name	Ojjaara (momelotinib) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/16/2023
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Ojjaara (momelotinib)
Myelofibrosis Indicated for the treatment of intermediate or high risk myelofibrosis (MF), including primary MF or secondary MF [post-polycythemia vera (PV) and post-essential thrombocythemia (ET)], in adults with anemia.

2 . Criteria

Product Name:Ojjaara	
Diagnosis	Myelofibrosis
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OJJAARA	MOMELOTINIB DIHYDROCHLORIDE TAB 100 MG	21537540300320	Brand
OJJAARA	MOMELOTINIB DIHYDROCHLORIDE TAB 150 MG	21537540300330	Brand
OJJAARA	MOMELOTINIB DIHYDROCHLORIDE TAB 200 MG	21537540300340	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Primary myelofibrosis
- Post-polycythemia vera myelofibrosis
- Post-essential thrombocythemia myelofibrosis

AND

2 - Disease is intermediate or high risk

AND

3 - Patient has anemia

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Platelet count is greater than or equal to 50 x 10^9/L

AND

4.1.2 One of the following:

4.1.2.1 Trial and failure, contraindication, or intolerance to Jakafi (ruxolitinib)

OR

4.1.2.2 For continuation of prior therapy

OR

4.2 Platelet count is less than 50 x 10^9/L

Product Name:Ojjaara	
Diagnosis	Myelofibrosis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OJJAARA	MOMELOTINIB DIHYDROCHLORIDE TAB 100 MG	21537540300320	Brand

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228615
Guideline Name	Olumiant (baricitinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Olumiant (baricitinib)
Rheumatoid Arthritis (RA) Indicated for the treatment of adult patients with moderately to severely active rheumatoid arthritis who have had an inadequate response to one or more tumor necrosis factor (TNF) blockers. Limitation of Use: Not recommended for use in combination with other Janus kinase (JAK) inhibitors, biologic disease-modifying antirheumatic drugs (DMARDs), or with potent immunosuppressants such as azathioprine and cyclosporine. **Coronavirus Disease 2019 (COVID-19)** Indicated for the treatment of COVID-19 in hospitalized adults requiring supplemental oxygen, non-invasive or invasive mechanical ventilation, or extracorporeal membrane oxygenation (ECMO). **Alopecia Areata (AA)** Indicated for the treatment of adult patients with severe alopecia areata. Limitations of Use: Not recommended for use in combination with other JAK inhibitors, biologic immunomodulators, cyclosporine or other potent immunosuppressants.

2 . Criteria

Product Name:Olumiant	
Diagnosis	Rheumatoid Arthritis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OLUMIANT	BARICITINIB TAB 2 MG	66603010000320	Brand
OLUMIANT	BARICITINIB TAB 1 MG	66603010000310	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

methotrexate

leflunomide

sulfasalazine

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - One of the following:

5.1 All of the following:

5.1.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product

Rinvoq (upadacitinib)

Simponi (golimumab)

Xeljanz (tofacitinib) or Xeljanz XR (tofacitinib ER)

AND

5.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

Actemra (tocilizumab)

Orencia (abatacept)

OR

5.2 For continuation of prior Olumiant therapy, defined as no more than a 45-day gap in therapy

AND

6 - Not used in combination with other Janus kinase (JAK) inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)^

Notes	*Includes attestation that a total of two TNF inhibitors have already been tried in the past, and the patient should not be made to try a third TNF inhibitor. ** For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products ^ Olumiant may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Olumiant	
Diagnosis	Rheumatoid Arthritis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OLUMIANT	BARICITINIB TAB 2 MG	66603010000320	Brand
OLUMIANT	BARICITINIB TAB 1 MG	66603010000310	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)^

Notes	^ Olumiant may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Olumiant	
Diagnosis	Coronavirus disease 2019 (COVID-19)
Approval Length	14 Day(s)
Guideline Type	Prior Authorization, Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

5 . Revision History

Date	Notes
11/7/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-233255
Guideline Name	Omega-3-Acid Derivatives
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	9/18/2019
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Vascepa (icosapent ethyl)
Severe Hypertriglyceridemia Indicated as an adjunct to diet to reduce triglyceride (TG) levels in adult patients with severe (greater than or equal to 500 mg/dL) hypertriglyceridemia. Limitations of Use: The effect of Vascepa on the risk for pancreatitis in patients with severe hypertriglyceridemia has not been determined. **Prevention of Cardiovascular Events** Indicated as an adjunct to maximally tolerated statin therapy to reduce the risk of myocardial infarction, stroke, coronary revascularization, and unstable angina requiring hospitalization in adult patients with elevated triglyceride (TG) levels (greater than or equal to 150 mg/dL) and 1) established cardiovascular disease or 2) diabetes mellitus and 2 or more additional risk factors for cardiovascular disease.
Drug Name: Generic icosapent ethyl
Severe Hypertriglyceridemia Indicated as an adjunct to diet to reduce triglyceride (TG) levels in adult patients with severe (greater than or equal to 500 mg/dL) hypertriglyceridemia.

Limitations of Use: The effect of icosapent ethyl capsules on the risk for pancreatitis in patients with severe hypertriglyceridemia has not been determined.

Prevention of Cardiovascular Events [off-label] Indicated as an adjunct to maximally tolerated statin therapy to reduce the risk of myocardial infarction, stroke, coronary revascularization, and unstable angina requiring hospitalization in adult patients with elevated triglyceride (TG) levels (greater than or equal to 150 mg/dL) and 1) established cardiovascular disease or 2) diabetes mellitus and 2 or more additional risk factors for cardiovascular disease.

Drug Name: Lovaza (omega-3-acid ethyl esters)

Severe Hypertriglyceridemia Indicated as an adjunct to diet to reduce triglyceride (TG) levels in adult patients with severe (greater than or equal to 500 mg per dL) hypertriglyceridemia (HTG). Limitations of Use: The effect of Lovaza on the risk for pancreatitis has not been determined. The effect of Lovaza on cardiovascular mortality and morbidity has not been determined.

2 . Criteria

Product Name:Brand Lovaza, Brand Vascepa, Generic icosapent ethyl	
Diagnosis	Severe Hypertriglyceridemia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LOVAZA	OMEGA-3-ACID ETHYL ESTERS CAP 1 GM	39500045200130	Brand
VASCEPA	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Brand
VASCEPA	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Brand
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Generic
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Generic

Approval Criteria

1 - Diagnosis of hypertriglyceridemia

AND

2 - Patient has a pre-treatment triglyceride level greater than or equal to 500 mg/dL

AND

3 - Applies to Brand Lovaza ONLY: Trial and failure, contraindication or intolerance to generic omega-3-acid ethyl esters

Product Name:Brand Lovaza, Brand Vascepa, Generic icosapent ethyl	
Diagnosis	Severe Hypertriglyceridemia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LOVAZA	OMEGA-3-ACID ETHYL ESTERS CAP 1 GM	39500045200130	Brand
VASCEPA	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Brand
VASCEPA	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Brand
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Generic
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Applies to Brand Lovaza ONLY: Trial and failure, contraindication or intolerance to generic omega-3-acid ethyl esters

Product Name:Brand Vascepa, Generic icosapent ethyl	
Diagnosis	Prevention of Cardiovascular Events
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VASCEPA	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Brand
VASCEPA	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Brand
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Generic
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Generic

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of hypertriglyceridemia

AND

1.2 Patient has a pre-treatment triglyceride level of 150 mg/dL to 499 mg/dL [2,3]

AND

2 - One of the following:

2.1 Patient has established cardiovascular disease (CVD) (e.g., coronary artery disease, cerebrovascular or carotid disease, peripheral artery disease, etc.) [2]

OR

2.2 Both of the following:

2.2.1 Diagnosis of diabetes mellitus [2]

AND

2.2.2 Patient has two or more risk factors for developing cardiovascular disease (see background section for definitions) [2, 4]

AND

3 - Medication will be used as an adjunct to maximally tolerated statin therapy, unless there is a contraindication or intolerance to statin therapy [2]

Product Name:Brand Vascepa, Generic icosapent ethyl	
Diagnosis	Prevention of Cardiovascular Events
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VASCEPA	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Brand
VASCEPA	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Brand
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 1 GM	39500035100120	Generic
ICOSAPENT ETHYL	ICOSAPENT ETHYL CAP 0.5 GM	39500035100110	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

AND

2 - Medication continues to be used as an adjunct to maximally tolerated statin therapy, unless there is a contraindication or intolerance to statin therapy [2]

3 . Background

Benefit/Coverage/Program Information

REDUCE-IT Trial Inclusion Criteria for Secondary Prevention Risk Category (Established Cardiovascular Disease) [4]

Man or woman greater than or equal to 45 years of age with one or more of the following:

1. Documented **coronary artery disease** (CAD):

Documented multi vessel CAD (greater than or equal to 50% stenosis in at least two major epicardial coronary arteries – with or without antecedent revascularization);

Documented prior MI; or

Hospitalization for high-risk non-ST-segment elevation acute coronary syndrome (NSTE-ACS) (with objective evidence of ischemia: ST-segment deviation or biomarker positivity).

2. Documented **cerebrovascular or carotid disease**:

Documented prior ischemic stroke;

Symptomatic carotid artery disease with greater than or equal to 50% carotid arterial stenosis;

Asymptomatic carotid artery disease with greater than or equal to 70% carotid arterial stenosis per angiography or duplex ultrasound; or

History of carotid revascularization (catheter-based or surgical).

3. Documented **peripheral arterial disease** (PAD):

Ankle-brachial index (ABI) less than 0.9 with symptoms of intermittent claudication; or

History of aorto-iliac or peripheral arterial intervention (catheter-based or surgical).

REDUCE-IT Trial definition of risk factors for cardiovascular disease

Men greater than or equal to 55 years and women greater than or equal to 65 years
Cigarette smoker or stopped smoking within the past 3 months
Hypertension (pretreatment blood pressure greater than or equal to 140 mmHg systolic or greater than or equal to 90 mmHg diastolic)
HDL-C less than or equal to 40 mg/dL for men or less than or equal to 50 mg/dL for women
High-sensitivity C-reactive protein greater than 3.0 mg/L
Creatinine clearance greater than 30 and less than 60 mL/min
Retinopathy
Micro- or macro-albuminuria

Definition of maximally tolerated statin therapy

HIGH-INTENSITY statin therapy (i.e., atorvastatin 40-80 mg, rosuvastatin 20-40 mg) or is unable to tolerage

OR

If unable to tolerate HIGH-INTENSITY statin, then MODERATE-INTENSITY statin therapy [i.e., atorvastatin 10-20 mg, rosuvastatin 5-10 mg, simvastatin 20-40 mg, pravastatin 40-80 mg, lovastatin 40 mg, Lescol XL (fluvastatin XL) 80 mg, fluvastatin 40 mg twice daily, or Livalo (pitavastatin) 2-4 mg] or unable to tolerate

OR

If unable to tolerate MODERATE-INTENSITY statin, then LOW-INTENSITY statin therapy [i.e., simvastatin 10 mg, pravastatin 10-20 mg, lovastatin 20 mg, fluvastatin 20-40 mg, Livalo (pitavastatin) 1 mg]

OR

Unable to tolerate low- or moderate-, and high-intensity statins because of contraindications; intolerable and persistent (i.e., more than 2 weeks) symptoms for low- or moderate-, and high-intensity statins: Myalgia (muscle symptoms without CK elevations) or Myositis (muscle symptoms with CK elevations less than 10 times

ULN); or rhabdomyolysis or muscle symptoms with statin treatment with CK elevations greater than 10 times ULN [A, 3]

4 . Endnotes

In patients treated with statins, it is recommended to measure creatine kinase levels in individuals with severe statin-associated muscle symptoms. [3]

6 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Omvoh (mirikizumab-mrkz)

Prior Authorization Guideline

Guideline ID	GL-228619
Guideline Name	Omvoh (mirikizumab-mrkz)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Omvoh (mirikizumab-mrkz) IV & SC
Ulcerative Colitis (UC) Indicated for the treatment of moderately to severely active ulcerative colitis in adults.

2 . Criteria

Product Name:Omvoh IV	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OMVOH	MIRIKIZUMAB-MRKZ IV SOLN 300 MG/15ML (20 MG/ML)	52504050402030	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [2, 3]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, erythrocyte sedimentation rate, C-reactive protein)

Dependent on, or refractory to, corticosteroids

AND

3 - Prescribed by or in consultation with a gastroenterologist

AND

4 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [2, 3]:

6-mercaptopurine

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

Azathioprine

Corticosteroids (e.g., prednisone)

AND

5 - One of the following:

5.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*:

One formulary adalimumab product

Simponi (golimumab)

Skyrizi (risankizumab-rzaa)

Stelara (ustekinumab)

Rinvoq (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

OR

5.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

6 - Will be administered as an intravenous induction dose

Notes	* Includes attestation that the patient has failed to respond to the TNF inhibitor mechanism of action in the past and should not be made to tr y a second TNF inhibitor. In this case, only a single step through a pre ferred agent is required. ** For review process only: Refer to the table in the Background sectio n for carrier-specific formulary adalimumab products

Product Name:Omvoh SC	
Diagnosis	Ulcerative Colitis (UC)

Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Prescribed medication is being used for a Food and Drug Administration (FDA)-approved indication

AND

1.1.2 Both of the following labeling requirements have been confirmed:

1.1.2.1 All components of the FDA approved indication are met (e.g., concomitant use, previous therapy requirements, age limitations, testing requirements, etc.)

AND

1.1.2.2 Prescribed medication will be used at a dose which is within FDA recommendations

OR

1.2 Meets the off-label administrative guideline criteria

Product Name:Abecma, Aucatzyl, Breyanzi, Carvykti, Kymriah, Tecartus, Yescarta	
Approval Length	1 Time Authorization in Lifetime
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
ABECMA	IDECABTAGENE VICLEUCEL IV SUSP 460,000,000 CELLS	21651035401820	Brand

AUCATZYL	OBECABTAGENE AUTOLEUCEL IV SUSP 410,000,000 CELLS	21651062001840	Brand

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Prescribed medication is being used for a Food and Drug Administration (FDA)-approved indication

AND

1.1.2 Both of the following labeling requirements have been confirmed:

1.1.2.1 All components of the FDA approved indication are met (e.g., concomitant use, previous therapy requirements, age limitations, testing requirements, etc.)

AND

1.1.2.2 Prescribed medication will be used at a dose which is within FDA recommendations

AND

1.1.3 Patient has not previously received CAR-T Cell Therapy for the requested indication

OR

1.2 Meets the off-label administrative guideline criteria

2 . Revision History

Date	Notes
3/13/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-233394
Guideline Name	Onfi (clobazam), Sympazan (clobazam)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Onfi (clobazam) tablets and oral suspension, Sympazan (clobazam) oral film
Lennox-Gastaut syndrome (LGS) Indicated for the adjunctive treatment of seizures associated with Lennox-Gastaut syndrome (LGS) in patients 2 years of age or older. **Off Label Uses: Refractory Seizures** There is some clinical evidence to support the use in refractory seizures.

2 . Criteria

Product Name:Generic clobazam

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CLOBAZAM	CLOBAZAM TAB 10 MG	72100007000310	Generic
CLOBAZAM	CLOBAZAM TAB 20 MG	72100007000320	Generic
CLOBAZAM	CLOBAZAM SUSPENSION 2.5 MG/ML	72100007001830	Generic

Approval Criteria

1 - All of the following:

1.1 Diagnosis of seizures associated with Lennox-Gastaut syndrome (LGS)

AND

1.2 Used as adjunctive therapy [A]

AND

1.3 Patient is 2 years of age or older

AND

1.4 Prescribed by or in consultation with a neurologist

OR

2 - All of the following: [4]

2.1 Diagnosis of seizures associated with Dravet syndrome (DS)

AND

2.2 Used in combination with Diacomit (stiripentol)

AND

2.3 Both of the following:

Patient is 6 months of age or older

Patient weighs greater than or equal to 7 kg

AND

2.4 Prescribed by or in consultation with a neurologist

Product Name:Generic clobazam [off label]	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

SYMPAZAN	CLOBAZAM ORAL FILM 10 MG	72100007008210	Brand
SYMPAZAN	CLOBAZAM ORAL FILM 20 MG	72100007008220	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

Clobazam is approved for adjunctive therapy of LGS. In the pivotal trials, study participants were receiving from 1 to 3 concomitant antiepileptic drugs at stable doses for at least 4 weeks [1, 2]

Refractory status epilepticus is when seizures are not controlled after the administration of two antiseizure medications. [5]

5 . Revision History

Date	Notes
3/14/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-233379
Guideline Name	Onpattro (patisiran) & Tegsedi (inotersen)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	10/17/2018
P&T Revision Date:	2/20/2025

1 . Indications

Drug Name: Onpattro (patisiran), Tegsedi (inotersen)
Hereditary transthyretin-mediated amyloidosis Indicated for the treatment of the polyneuropathy of hereditary transthyretin-mediated amyloidosis in adults.

2 . Criteria

Product Name:Onpattro or Tegsedi	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ONPATTRO	PATISIRAN SODIUM IV SOLN 10 MG/5ML (2 MG/ML) (BASE EQUIV)	62706060102020	Brand
TEGSEDI	INOTERSEN SOD SUBCUTANEOUS PREF SYR 284 MG/1.5ML (BASE EQ)	6270104010E520	Brand

Approval Criteria

1 - Diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR amyloidosis) with polyneuropathy

AND

2 - Presence of a transthyretin (TTR) mutation (e.g., V30M) as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [1-4]

AND

3 - One of the following [2, 4]:

Patient has a baseline polyneuropathy disability (PND) score less than or equal to IIIb

Patient has a baseline familial amyloidotic polyneuropathy (FAP) stage of 1 or 2

Patient has a baseline neuropathy impairment score (NIS) between 5 and 130 for Onpattro or a baseline neuropathy impairment score (NIS) between 10 and 130 for Tegsedi

AND

4 - Presence of clinical signs and symptoms of the disease (e.g., peripheral/autonomic neuropathy) [2, 4]

AND

5 - Patient has not had a liver transplant

AND

6 - Requested drug is not used in combination with a TTR silencer (e.g., Amvuttra) or a TTR stabilizer (e.g., Vyndaqel)

AND

7 - Prescribed by or in consultation with a neurologist

Product Name:Onpattro or Tegsedi	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ONPATTRO	PATISIRAN SODIUM IV SOLN 10 MG/5ML (2 MG/ML) (BASE EQUIV)	62706060102020	Brand
TEGSEDI	INOTERSEN SOD SUBCUTANEOUS PREF SYR 284 MG/1.5ML (BASE EQ)	6270104010E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improved neurologic impairment, slowing of disease progression, quality of life assessment)

AND

2 - One of the following [2, 4]:

Patient continues to have a polyneuropathy disability (PND) score less than or equal to IIIb

Patient continues to have a familial amyloidotic polyneuropathy (FAP) stage of 1 or 2

Patient continues to have a neuropathy impairment score (NIS) between 5 and 130 for Onpattro or a neuropathy impairment score (NIS) between 10 and 130 for Tegsedi

AND

3 - Patient has not had a liver transplant

AND

4 - Requested drug is not used in combination with a TTR silencer (e.g., Amvuttra) or a TTR stabilizer (e.g., Vyndaqel)

4 . Revision History

Date	Notes
3/13/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-229144
Guideline Name	Onureg (azacitidine)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/12/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Onureg (azacitidine)
Acute Myeloid Leukemia (AML) Indicated for continued treatment of adult patients with acute myeloid leukemia who achieved first complete remission (CR) or complete remission with incomplete blood count recovery (CRi) following intensive induction chemotherapy and are not able to complete intensive curative therapy.

2 . Criteria

Product Name:Onureg	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ONUREG	AZACITIDINE TAB 200 MG	21300003000320	Brand
ONUREG	AZACITIDINE TAB 300 MG	21300003000330	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Patient has received previous treatment with an intensive induction chemotherapy regimen (e.g., cytarabine + daunorubicin, cytarabine + idarubicin, etc.) [2]

AND

3 - Patient has achieved one of the following:

first complete remission (CR)

complete remission with incomplete blood count recovery (CRi)

AND

4 - Patient is not able to complete intensive curative therapy

Product Name:Onureg	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

ONUREG	AZACITIDINE TAB 200 MG	21300003000320	Brand
ONUREG	AZACITIDINE TAB 300 MG	21300003000330	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Prior Authorization Guideline

Guideline ID	GL-228493
Guideline Name	Opdualag (nivolumab and relatlimab-rmbw)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Opdualag (nivolumab and relatlimab-rmbw)
Metastatic Melanoma Indicated for the treatment of adult and pediatric patients 12 years of age or older with unresectable or metastatic melanoma.

2 . Criteria

Product Name:Opdualag	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OPDUALAG	NIVOLUMAB-RELATLIMAB-RMBW 240-80 MG/20ML	21993502502020	Brand

Approval Criteria

1 - One of the following diagnoses:

Unresectable melanoma

Metastatic melanoma

AND

2 - Both of the following:

Patient is 12 years of age or older

Patient weighs at least 40 kg (88 lbs)

Product Name:Opdualag	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OPDUALAG	NIVOLUMAB-RELATLIMAB-RMBW 240-80 MG/20ML	21993502502020	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Opdualag Prescribing Information. Bristol-Myers Squibb. Princeton, NJ. March 2024.

Opfolda (miglustat)

Prior Authorization Guideline

Guideline ID	GL-228496
Guideline Name	Opfolda (miglustat)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Opfolda (miglustat)
Late-Onset Pompe disease Indicated, in combination with Pombiliti, a hydrolytic lysosomal glycogen-specific enzyme, for the treatment of adult patients with late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) weighing ≥40 kg and who are not improving on their current enzyme replacement therapy (ERT).

2 . Criteria

Product Name:Opfolda	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OPFOLDA	MIGLUSTAT (GAA DEFICIENCY) CAP 65 MG	30907760000120	Brand

Approval Criteria

1 - Diagnosis of late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency)

AND

2 - Disease is confirmed by one of the following: [2, 4-5]

Absence or deficiency (less than 40% of the lab specific normal mean) of GAA enzyme activity in lymphocytes, fibroblasts, or muscle tissues as confirmed by an enzymatic assay

Molecular genetic testing confirms mutations in the GAA gene

AND

3 - Presence of clinical signs and symptoms of the disease (e.g., respiratory distress, skeletal muscle weakness, etc.) [A]

AND

4 - Medication is used in combination with Pombiliti (cipaglucosidase alfa-atga)

AND

5 - Patient weight is greater than or equal to 40 kg

AND

6 - Trial and inadequate response to one of the following:

Lumizyme

Nexviazyme

AND

7 - Opfolda is not substituted with other miglustat products (i.e., Zavesca, Yargesa)

Product Name:Opfolda	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OPFOLDA	MIGLUSTAT (GAA DEFICIENCY) CAP 65 MG	30907760000120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in FVC, improvement in 6-minute walk distance [6MWD])

AND

2 - Medication is used in combination with Pombiliti (cipaglucosidase alfa-atga)

AND

3 - Opfolda is not substituted with other miglustat products (i.e., Zavesca, Yargesa)

3 . Endnotes

Consensus recommendation based on current clinical guidelines indicate that treatment should be started in patients with late onset Pompe disease when they become symptomatic and/or show signs of disease progression [2, 4-5].

Prior Authorization Guideline

Guideline ID	GL-228497
Guideline Name	Ophthalmic NSAIDs
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: BROMSITE (bromfenac)
Postoperative Inflammation and Prevention of Ocular Pain Indicated for the treatment of postoperative inflammation and prevention of ocular pain in patients undergoing cataract surgery.
Drug Name: ILEVRO (nepafenac)
Postoperative inflammation Indicated for the treatment of pain and inflammation associated with cataract surgery.
Drug Name: NEVANAC (nepafenac)
Postoperative inflammation Indicated for the treatment of pain and inflammation associated with cataract surgery.
Drug Name: Prolensa (bromfenac ophthalmic solution)

Postoperative inflammation Indicated for the treatment of postoperative inflammation and reduction of ocular pain in patients who have undergone cataract surgery.

2 . Criteria

Product Name:Ilevro, Nevanac	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ILEVRO	NEPAFENAC OPHTH SUSP 0.3%	86805050001840	Brand
NEVANAC	NEPAFENAC OPHTH SUSP 0.1%	86805050001820	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - One of the following:

2.1 Patient is greater than 10 but less than 18 years of age [A]

OR

2.2 Trial and failure (of a minimum 30-day supply), contraindication, or intolerance to one of the following generics:

Diclofenac ophthalmic solution

Flurbiprofen ophthalmic solution

Ketorolac ophthalmic solution

Product Name:Brand Bromsite, Brand Prolensa, Generic bromfenac ophthalmic solution 0.075%, Generic bromfenac ophthalmic solution 0.07%	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
BROMSITE	BROMFENAC SODIUM OPHTH SOLN 0.075% (BASE EQUIVALENT)	86805005102008	Brand
BROMFENAC SODIUM	BROMFENAC SODIUM OPHTH SOLN 0.075% (BASE EQUIVALENT)	86805005102008	Generic
PROLENSA	BROMFENAC SODIUM OPHTH SOLN 0.07% (BASE EQUIVALENT)	86805005102007	Brand
BROMFENAC SODIUM	BROMFENAC SODIUM OPHTH SOLN 0.07% (BASE EQUIVALENT)	86805005102007	Generic

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication, or intolerance to one of the following generics:

Diclofenac ophthalmic solution

Flurbiprofen ophthalmic solution

Ketorolac ophthalmic solution

3 . Endnotes

Pediatric patients age greater than 10 but less than 18 years of age are allowed to bypass the trial and failure requirement because Ilevro and Nevanac are approved for this pediatric population, but not Bromsite. The safety and efficacy in pediatric patients below the age of 18 years have not been established for Bromsite. [1, 2, 3]

Bromfenac Opthalmic Solution 0.075% Prescribing Information. Sun Pharmaceutical Industries, Inc.; Cranbury, NJ. February 2024.

Prior Authorization Guideline

Guideline ID	GL-228499
Guideline Name	Ophthalmic Prostaglandins
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xelpros (latanoprost)
Open-angle glaucoma Indicated for the reduction of elevated intraocular pressure (IOP) in patients with open-angle glaucoma. **Ocular hypertension** Indicated for the reduction of elevated intraocular pressure (IOP) in patients with ocular hypertension.
Drug Name: Vyzulta (latanoprostene bunod)
Open-angle glaucoma Indicated for the reduction of intraocular pressure in patients with open-angle glaucoma. **Ocular hypertension** Indicated for the reduction of intraocular pressure in patients with ocular hypertension.
Drug Name: lyuzeh (latanoprost ophthalmic solution)

Open-angle glaucoma, Ocular hypertension Indicated for the reduction of elevated intraocular pressure (IOP) in patients with open-angle glaucoma or ocular hypertension.

2 . Criteria

Product Name:Iyuzeh, Xelpros, Vyzulta	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
XELPROS	LATANOPROST OPHTH EMULSION 0.005%	86330050001620	Brand
VYZULTA	LATANOPROSTENE BUNOD OPHTH SOLN 0.024%	86330052102020	Brand
IYUZEH	LATANOPROST (PF) OPHTH SOLN 0.005%	86330050002025	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 25 days supply), contraindication, or intolerance to all of the following:

Generic latanoprost

Lumigan

Generic travoprost

Prior Authorization Guideline

Guideline ID	GL-229126
Guideline Name	Opioid Quantity Limit Overrides
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/16/2010
P&T Revision Date:	11/21/2024

Note:

Note: The Opioid Quantity Limit Override Administrative Guideline should be used for single opioids that do not have an FDA-maximum dose. For opioids with an FDA-maximum dose, such as APAP-containing opioid products, please refer to the standard Quantity Limit Override Administrative Guideline or the drug-specific guideline, if applicable.

1 . Criteria

Diagnosis	For Malignant Cancer Pain
Approval Length	5 year(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Opioid quantity limit override			

Approval Criteria

1 - In the absence of an opioid-specific quantity limit override guideline, the following approval criteria will be used:

1.1 Diagnosis of malignant (cancer) pain*

Notes	Authorization will be issued for long-term therapy. *For oral fentanyl products, please refer to the drug-specific quantity li mit override criteria in the “Oral Fentanyl Products” guideline.

Diagnosis	For Non-Malignant Pain
Approval Length	1 year(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Opioid quantity limit override			

Approval Criteria

1 - In the absence of an opioid-specific quantity limit override guideline, the following approval criteria will be used:

1.1 Prescribed by a pain specialist or by pain management consultation

AND

1.2 The prescriber maintains and provides chart documentation of the patient’s evaluation, including all of the following:

An appropriate patient medical history and physical examination

A description of the nature and intensity of the pain

Documentation of appropriate dose escalation

Documentation of ongoing, periodic review of the course of opioid therapy

An updated, comprehensive treatment plan (the treatment plan should state objectives that will be used to determine treatment success, such as pain relief or improved physical and/or psychosocial function)

Verification that the risks and benefits of the use of the controlled substance have been discussed with the patient, significant other(s), and/or guardian

2 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229127
Guideline Name	Opioid Risk Management
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Approval Criteria

1 - Medication is being used to treat postoperative pain

AND

2 - Medication is not being prescribed for pain related to a dental procedure

AND

3 - The dose being prescribed is the dose that the patient was stable on prior to discharge

Notes	*Patients with a cancer drug in their prescription claims history within the previous 365 days will not be subject to a max daily dose, day supply, or fill restriction. Additionally, if criteria is approved patients will not be subject to a max daily dose, day supply, or fill restriction.

Approval Criteria

1 - Prescriber certifies that there is an active treatment plan that includes but is not limited to a specific treatment objective and the use of other pharmacological and non-pharmacological agents for pain relief as appropriate

AND

2 - Prescriber certifies that there has been an informed consent document signed and an addiction risk assessment has been performed

AND

3 - Prescriber certifies that a written/signed agreement between prescriber and patient addressing issues of prescription management, diversion, and the use of other substances exists

Notes	Note: Patients with a cancer drug in their prescription claims history within the previous 365 days will not be subject to a max daily dose, da

	y supply, or fill restriction. Additionally, if criteria is approved patients will not be subject to a max daily dose, day supply, or fill restriction. If the prescriber is unable to certify written documentation to meet criteri on (2) and/or (3), written or verbal attestation from the provider may b e accepted confirming that the prescriber (or prescriber's representati ve) has verbally addressed criterion (2) and/or (3) with the patient.

Approval Criteria

1 - One of the following:

1.1 Quantity limit override requests must involve an FDA-approved indication

OR

1.2 Quantity limit override requests involving off-label indications must meet off-label guideline approval criteria

AND

2 - One of the following:

2.1 The maximum doses specified under the quantity restriction have been tried for an adequate period of time and been deemed ineffective in the treatment of the member's disease or medical condition

OR

2.2 If lower doses have not been tried, there is clinical support (i.e., clinical literature, patient attributes, or characteristics of the drug) that the number of doses available under the quantity restriction will be ineffective in the treatment of the member's disease or medical condition

AND

3 - One of the following:**

3.1 Higher dose or quantity is supported in the dosage and administration section of the manufacturer's prescribing information

OR

3.2 Higher dose or quantity is supported by one of following compendia:

American Hospital Formulary Service Drug Information

Micromedex DRUGDEX System

Notes	*This guideline only applies in the absence of a drug-specific quantity l imit override guideline. No override requests will be permitted for aceta minophen, alone or in combination with other agents, which will excee d a total of 4 grams of acetaminophen per day. **NOTE: Published bio medical literature may be used as evidence to support safety and addi tional efficacy at higher than maximum doses for the diagnosis provide d.

Product Name:Long Acting Opioids: Nucynta ER	
Diagnosis	Cancer or End-of-Life Care
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUCYNTA ER	TAPENTADOL HCL TAB ER 12HR 50 MG	65100091107420	Brand
NUCYNTA ER	TAPENTADOL HCL TAB ER 12HR 100 MG	65100091107430	Brand

NUCYNTA ER	TAPENTADOL HCL TAB ER 12HR 250 MG	65100091107460	Brand

Approval Criteria

1 - One of the following:

1.1 Diagnosis of cancer

OR

1.2 Patient is receiving opioids as part of end-of-life care

AND

2 - Trial and failure, contraindication or intolerance to at least two of the following preferred products

Hydromorphone ER

Morphine sulfate ER

Oxymorphone ER

Hysingla ER

Oxycontin

Xtampza ER

Notes	If the member does not meet the medical necessity reauthorization au thorization criteria requirements, a denial should be issued and a maxi mum 30-day authorization may be authorized one time for the request ed drug/strength combination up to the requested quantity and/or MM E for transition to an alternative treatment.

Product Name:Long Acting Opioids: Nucynta ER	
Diagnosis	Non-Cancer/End-of-Life Care Diagnosis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUCYNTA ER	TAPENTADOL HCL TAB ER 12HR 50 MG	65100091107420	Brand

NUCYNTA ER	TAPENTADOL HCL TAB ER 12HR 250 MG	65100091107460	Brand

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Patient has moderate to severe chronic pain that is non-neuropathic

AND

1.1.2 One of the following:

1.1.2.1 For patients that are filling the prescribed medication for the first time, prior to the start of therapy with the prescribed medication, the patient has failed an adequate (minimum 4 week) trial of a short-acting opioid [Document drug(s), dose, duration and date of trial]

OR

1.1.2.2 Patient is established on the prescribed medication and this prescription is for continuation of therapy

OR

1.2 All of the following:

1.2.1 Patient has moderate to severe neuropathic pain or fibromyalgia

AND

1.2.2 Unless contraindicated, the patient has not exhibited an adequate response to 8 weeks of treatment with gabapentin titrated to a therapeutic dose (Document drug(s), dose, duration and date of trial)

AND

1.2.3 Unless contraindicated, the patient has not exhibited an adequate response to at least 6-8 weeks of treatment with a tricyclic antidepressant (e.g., amitriptyline, nortriptyline, imipramine) titrated to a therapeutic dose (Document drug(s), dose, duration and date of trial)

AND

1.2.4 One of the following:

1.2.4.1 For patients that are filling the prescribed medication for the first time, prior to the start of therapy with the prescribed medication, the patient has failed an adequate (minimum 4 week) trial of a short-acting opioid [Document drug(s), dose, duration and date of trial]

OR

1.2.4.2 Patient is established on the prescribed medication and this prescription is for continuation of therapy

AND

2 - None of the following:

For use as an as-needed PRN analgesic

For pain that is mild or not expected to persist for an extended period of time

For acute pain

For postoperative pain, unless the patient is already receiving chronic opioid therapy prior to surgery, or if postoperative pain is expected to be moderate to severe and persist for an extended period of time

AND

NUCYNTA ER	TAPENTADOL HCL TAB ER 12HR 250 MG	65100091107460	Brand

Approval Criteria

1 - Documentation has been provided addressing ALL of the following

Treatment goals are defined, including estimated duration of treatment

Treatment plan includes the use of a nonopioid analgesic and/or nonpharmacologic intervention

Patient demonstrates meaningful improvement in pain and function using a validated instrument (e.g., Brief Pain Inventory)

Patient has been screened for substance abuse/opioid dependence using a validated instrument (e.g., DAST-10)

Rationale for not tapering and discontinuing

Patient has been screened for comorbid mental health

If a state prescription drug monitoring program (PDMP) is available, the prescriber has identified there are no concurrently prescribed controlled substances from PDMP

If used in patients with medical comorbidities or if used concurrently with a benzodiazepine or other drugs that could potentially cause drug-drug interactions, the prescriber has acknowledged that they have completed an assessment of increased risk for respiratory depression

Total daily morphine equivalent dose

Notes	If the member does not meet the medical necessity reauthorization authorization criteria requirements, a denial should be issued and a maximum 30-day authorization may be authorized one time for the requested drug/strength combination up to the requested quantity and/or MME for transition to an alternative treatment.

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Patient has moderate to severe chronic pain that is non-neuropathic

AND

1.1.2 One of the following:

1.1.2.1 For patients that are filling the prescribed medication for the first time, prior to the

start of therapy with the prescribed medication, the patient has failed an adequate (minimum 4 week) trial of a short-acting opioid [Document drug(s), dose, duration and date of trial]

OR

1.1.2.2 Patient is established on the prescribed medication and this prescription is for continuation of therapy

OR

1.2 All of the following:

1.2.1 Patient has moderate to severe neuropathic pain or fibromyalgia

AND

1.2.2 Unless contraindicated, the patient has not exhibited an adequate response to 8 weeks of treatment with gabapentin titrated to a therapeutic dose (Document drug(s), dose, duration and date of trial)

AND

1.2.3 Unless contraindicated, the patient has not exhibited an adequate response to at least 6-8 weeks of treatment with a tricyclic antidepressant (e.g., amitriptyline, nortriptyline, imipramine) titrated to a therapeutic dose (Document drug(s), dose, duration and date of trial)

AND

1.2.4 One of the following:

1.2.4.1 For patients that are filling the prescribed medication for the first time, prior to the start of therapy with the prescribed medication, the patient has failed an adequate (minimum 4 week) trial of a short-acting opioid [Document drug(s), dose, duration and date of trial]

OR

1.2.4.2 Patient is established on the prescribed medication and this prescription is for continuation of therapy

AND

2 - None of the following:

For use as an as-needed PRN analgesic

For pain that is mild or not expected to persist for an extended period of time

For acute pain

For postoperative pain, unless the patient is already receiving chronic opioid therapy prior to surgery, or if postoperative pain is expected to be moderate to severe and persist for an extended period of time

Notes	If the member is currently taking the requested long-acting opioid OR was recently switched from another long-acting opioid and does not m eet the medical necessity initial authorization criteria requirements, a denial should be issued and a maximum 30-day authorization may be authorized one time for the requested drug/strength combination up to the requested quantity and/or MME for transition to an alternative trea tment.

Approval Criteria

1 - Documentation has been provided addressing ALL of the following:

Treatment goals are defined, including estimated duration of treatment

Treatment plan includes the use of a nonopioid analgesic and/or nonpharmacologic intervention

Patient demonstrates meaningful improvement in pain and function using a validated instrument (e.g. Brief Pain Inventory)

Patient has been screened for substance abuse/opioid dependence using a validated instrument (e.g. DAST-10)

Rationale for not tapering and discontinuing opioid

Patient has been screened for comorbid mental health conditions

If a state prescription drug monitoring program (PDMP) is available, the prescriber has identified there are no concurrently prescribed controlled substances from PDMP

If used in patients with medical comorbidities or if used concurrently with a benzodiazepine or other drugs that could potentially cause drug-drug interactions, the prescriber has acknowledged that they have completed an assessment of increased risk for respiratory depression

Total daily morphine equivalent dose

Notes	If the member does not meet the medical necessity reauthorization criteria requirements, a denial should be issued and a maximum 30-day authorization may be authorized one time for the requested drug/strength combination up to the requested quantity and/or MME for transition to an alternative treatment.

Product Name:Long Acting Opioids: generic transdermal fentanyl patches, generic methadone 5 mg tablets, generic methadone 10 mg tablets, brand MS CONTIN, generic morphine sulfate ER, generic oxymorphone ER, Brand HYSINGLA ER, OXYCONTIN, generic oxycodone ER, Xtampza ER, generic hydrocodone ER, Generic Morphine Sulfate ER, generic hydromorphone ER

Diagnosis	Cancer or End-of-Life Care

Approval Criteria

1 - The patient is being treated for pain severe enough to require daily, around-the-clock, longer-term opioid treatment

AND

2 - None of the following:

For use as an as-needed PRN analgesic

For pain that is mild or not expected to persist for an extended period of time

For acute pain

For opioid dependence

AND

3 - The patient is not receiving other long-acting opioids concurrently

Notes	*Prior authorization may not apply depending on the plan. If the member is currently taking the requested long-acting opioid OR was recently switched from another long-acting opioid and does not meet the medical necessity initial authorization criteria requirements, a denial should be issued and a maximum 30-day authorization may be authorized one time for the requested drug/strength combination up to the requested quantity and/or MME for transition to an alternative treatment.

Approval Criteria

1 - Documentation has been provided addressing ALL of the following

Treatment goals are defined, including estimated duration of treatment

Treatment plan includes the use of a nonopioid analgesic and/or nonpharmacologic intervention

Patient demonstrates meaningful improvement in pain and function using a validated instrument (e.g. Brief Pain Inventory)

Patient has been screened for substance abuse/opioid dependence using a validated instrument (e.g. DAST-10) Rationale for not tapering and discontinuing opioid Patient has been screened for comorbid mental health conditions If a state prescription drug monitoring program (PDMP) is available, the prescriber has identified there are no concurrently prescribed controlled substances from PDMP If used in patients with medical comorbidities or if used concurrently with a benzodiazepine or other drugs that could potentially cause drug-drug interactions, the prescriber has acknowledged that they have completed an assessment of increased risk for respiratory depression Total daily morphine equivalent dose	
Notes	*Prior authorization may not apply depending on the plan. If the member does not meet the medical necessity reauthorization authorization criteria requirements, a denial should be issued and a maximum 30-day authorization may be authorized one time for the requested drug/strength combination up to the requested quantity and/or MME for transition to an alternative treatment.

3 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228627
Guideline Name	Opzelura (ruxolitinib) - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Opzelura (ruxolitinib)
Atopic Dermatitis Indicated for the topical short-term and non-continuous chronic treatment of mild to moderate atopic dermatitis in non-immunocompromised adult and pediatric patients 12 years of age and older whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable. Limitation of Use: Use of Opzelura in combination with therapeutic biologics, other JAK inhibitors or potent immunosuppressants such as azathioprine or cyclosporine is not recommended. **Nonsegmental Vitiligo** Indicated for the topical treatment of nonsegmental vitiligo in adult and pediatric patients 12 years of age and older. Limitation of Use: Use of Opzelura in combination with therapeutic biologics, other JAK inhibitors, or potent immunosuppressants such as azathioprine or cyclosporine is not recommended.

2 . Criteria

Product Name:Opzelura	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
OPZELURA	RUXOLITINIB PHOSPHATE CREAM 1.5%	90272060503720	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of mild to moderate atopic dermatitis

AND

1.1.2 One of the following:

1.1.2.1 Trial and failure (of a minimum 30 day supply), contraindication, or intolerance to one prescription strength topical corticosteroid (see Table 1 in Background section), unless the affected area is sensitive (i.e., face, axillae, groin) [2]

OR

1.1.2.2 Trial and failure (of a minimum 30 day supply) or intolerance to one generic topical calcineurin inhibitor (e.g., tacrolimus ointment), unless the patient is not a candidate for therapy (e.g., immunocompromised) [2]

OR

1.2 Both of the following:

1.2.1 Diagnosis of nonsegmental vitiligo

AND

1.2.2 Trial and failure of a minimum 30-day supply, contraindication, or intolerance to ONE of the following [3]:

Medium or higher potency topical corticosteroid

Tacrolimus ointment

Product Name:Opzelura	
Diagnosis	Atopic Dermatitis
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
OPZELURA	RUXOLITINIB PHOSPHATE CREAM 1.5%	90272060503720	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of mild to moderate atopic dermatitis

AND

2 - Submission of medical records (e.g., chart notes) confirming one of the following:

Greater than or equal to 3% body surface area (BSA) involvement

Involvement of sensitive body areas (e.g., face, hands, feet, scalp, groin)

AND

3 - Patient is 12 years of age or older

AND

4 - Prescribed by or in consultation with one of the following:

Dermatologist

Allergist/Immunologist

AND

5 - Trial and failure of a minimum 30-day supply of non-pharmacologic topical therapies (e.g., moisturizers) [2]

AND

6 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication, or intolerance to ALL of the following [2]:

Medium or higher potency topical corticosteroid

Elidel (pimecrolimus) cream* OR Tacrolimus ointment

Eucrisa (crisaborole) ointment*

AND

7 - Submission of medical records (e.g., chart notes) or absence of paid claims confirming Opzelura is not used in combination with therapeutic biologics, other Janus kinase (JAK) inhibitors, or potent immunosuppressants (e.g., azathioprine or cyclosporine)

AND

8 - Opzelura will only be used for short-term and/or non-continuous chronic treatment

Notes	*Product may require step therapy

Product Name:Opzelura	
Diagnosis	Nonsegmental Vitiligo
Approval Length	6 Months [B]

Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
OPZELURA	RUXOLITINIB PHOSPHATE CREAM 1.5%	90272060503720	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of nonsegmental vitiligo

AND

2 - Patient is 12 years of age or older

AND

3 - Prescribed by or in consultation with a dermatologist

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to BOTH of the following [3, 4]:

Minimum 3-month duration of a medium or higher potency topical corticosteroid

Minimum 6-month duration of tacrolimus ointment

AND

5 - Submission of medical records (e.g., chart notes) or absence of paid claims confirming Opzelura is not used in combination with therapeutic biologics, other Janus kinase (JAK) inhibitors, or potent immunosuppressants (e.g., azathioprine or cyclosporine)

3 . Background

Clinical Practice Guidelines

Table 1. Relative potencies of topical corticosteroids [2]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05

	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

4 . Endnotes

Opzelura should be discontinued when signs and symptoms (e.g., itch, rash, and redness) of atopic dermatitis resolve. If signs and symptoms do not improve within 8 weeks, patients should be reexamined by their healthcare provider.

Satisfactory patient response may require treatment with Opzelura for more than 24 weeks. If the patient does not find the repigmentation meaningful by 24 weeks, the patient should be re-evaluated by the healthcare provider.

Guideline Name	Oral Antidepressants
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Aplenzin (bupropion extended-release)
Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD), as defined by the Diagnostic and Statistical Manual (DSM). **Seasonal Affective Disorder** Indicated for the prevention of seasonal major depressive episodes in patients with a diagnosis of seasonal affective disorder (SAD).
Drug Name: Citalopram capsules
Major Depressive Disorders Indicated for the treatment of major depressive disorder (MDD) in adults.
Drug Name: Desvenlafaxine ER
Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD) in adults.
Drug Name: Fetzima (levomilnacipran extended-release)

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD).

Drug Name: Forfivo XL (bupropion extended-release)

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD), as defined by the Diagnostic and Statistical Manual (DSM).

Drug Name: Paxil (paroxetine) oral suspension

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD).

Obsessive Compulsive Disorder Indicated for the treatment of obsessive compulsive disorder (OCD)

Panic Disorder Indicated for the treatment of panic disorder (PD).

Social Anxiety Disorder Indicated for the treatment of social anxiety disorder (SAD).

Generalized Anxiety Disorder Indicated for the treatment of generalized anxiety disorder (GAD).

Posttraumatic Stress Disorder Indicated for the treatment of posttraumatic stress disorder (PTSD).

Drug Name: Trintellix (vortioxetine)

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD) in adults.

Drug Name: Sertraline capsules

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD) in adults.

Obsessive Compulsive Disorder Indicated for the treatment of obsessive compulsive disorder (OCD) in adults and pediatric patients 6 years and older.

Drug Name: Venlafaxine ER

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD) in adults.

Generalized Anxiety Disorder Indicated for the treatment of generalized anxiety disorder (GAD) in adults.

Drug Name: Auvelity (dextromethorphan hydrobromide and bupropion extended-release)

Major Depressive Disorder Indicated for the treatment of major depressive disorder (MDD) in adults.
Drug Name: Drizalma sprinkle (duloxetine delayed-relased capsules)
Multiple Indications Indicated for the treatment of: 1) Major Depressive Disorder in adults. 2) Generalized Anxiety Disorder in adults and pediatric patients 7 years of age and older. 3) Diabetic Peripheral Neuropathy in adults. 4) Fibromyalgia in adults. 5) Chronic Musculoskeletal Pain in adults.

FETZIMA TITRATION PACK	LEVOMILNACIPRAN HCL CAP ER 24HR 20 & 40 MG THERAPY PACK	5818005010B620	Brand

Approval Criteria

1 - Both of the following:

1.1 Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

1.2 Trial and failure (of a minimum 30-day supply), contraindication, or intolerance to any two of the following generics:

desvenlafaxine succinate extended-release (ER)

duloxetine

venlafaxine

venlafaxine ER

OR

2 - For continuation of prior therapy

3 . Endnotes

Treatment resistant depression should be defined after a minimum of two failed treatments with adequate dosing and duration; the minimal effective dosage administered for at least four weeks. [14]

minocycline

2 . Background

Benefit/Coverage/Program Information

Indications

Drug Name:Acticlate (doxycycline hyclate) tablets

Infections Indicated in the following conditions or diseases: 1. Rickettsial Infections: - Rocky Mountain spotted fever - typhus fever and the typhus group - Q fever - rickettsial pox - tick fevers caused by Rickettsiae 2. Sexually Transmitted Infections: - Uncomplicated urethral, endocervical or rectal infections caused by Chlamydia trachomatis. - Nongonococcal urethritis caused by Ureaplasma urealyticum. - Lymphogranuloma venereum caused by Chlamydia trachomatis. - Granuloma inguinale caused by Klebsiella granulomatis. - Uncomplicated gonorrhea caused by Neisseria gonorrhoeae. - Chancroid caused by Haemophilus ducreyi. 3. Respiratory Tract Infections: - Respiratory tract infections caused by Mycoplasma pneumoniae. - Psittacosis (ornithosis) caused by Chlamydophila psittaci. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following microorganisms, when bacteriological testing indicates appropriate susceptibility to the drug: - Respiratory tract infections caused by Haemophilus influenzae. - Respiratory tract infections caused by Klebsiella species. - Upper respiratory infections caused by Streptococcus pneumoniae. 4. Specific Bacterial Infections: - Relapsing fever due to Borrelia recurrentis. - Plague due to Yersinia pestis. - Tularemia due to Francisella tularensis. - Cholera caused by Vibrio cholerae. - Campylobacter fetus infections caused by Campylobacter fetus. - Brucellosis due to Brucella species (in conjunction with streptomycin). - Bartonellosis due to Bartonella bacilliformis. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following gram-negative microorganisms, when bacteriological testing indicates appropriate susceptibility to the drug: - Escherichia coli - Enterobacter aerogenes - Shigella species - Acinetobacter species - Urinary tract infections caused by Klebsiella species. 5. Ophthalmic Infections: - Trachoma caused by Chlamydia trachomatis, although the infectious agent is not always eliminated as judged by immunofluorescence. - Inclusion conjunctivitis caused by Chlamydia trachomatis. 6. Anthrax Including Inhalational Anthrax (Post-Exposure): Anthrax due to Bacillus anthracis, including inhalational anthrax (post-exposure): to reduce the incidence or progression of disease following exposure to aerosolized Bacillus anthracis. 7. Alternative Treatment for Selected Infections when Penicillin is Contraindicated When penicillin is contraindicated, doxycycline is an alternative drug in the treatment of the following infections: - Syphilis caused by Treponema pallidum. - Yaws caused by Treponema pallidum subspecies pertenue. - Listeriosis due to Listeria monocytogenes. - Vincent's infection caused by Fusobacterium fusiforme. - Actinomycosis caused by Actinomyces israelii. - Infections caused by Clostridium species. 8. Adjunctive Therapy for Acute Intestinal Amebiasis and Severe Acne: In acute intestinal amebiasis, doxycycline may be a useful adjunct to amebicides. In severe acne, doxycycline may be useful adjunctive therapy. 9. Prophylaxis of

Malaria: Doxycycline is indicated for the prophylaxis of malaria due to Plasmodium falciparum in short-term travelers (less than 4 months) to areas with chloroquine and/or pyrimethamine-sulfadoxine resistant strains. To reduce the development of drug-resistant bacteria and maintain the effectiveness of Acticlate and other antibacterial drugs, Acticlate should be used only to treat or prevent infections that are proven or strongly suspected to be caused by susceptible bacteria. When culture and susceptibility information are available, they should be considered in selecting or modifying antibacterial therapy. In the absence of such data, local epidemiology and susceptibility patterns may contribute to the empiric selection of therapy.

Drug Name: Doryx (doxycycline hyclate) delayed release tablets/Doryx MPC (doxycycline hyclate tablets, modified polymer coat), Doxycycline Delayed-Release (DR), Oracea (doxycycline delayed release)

Infections Indicated in the following conditions or diseases: 1. Rickettsial infections: - Rocky Mountain spotted fever, typhus fever and the typhus group, Q fever, rickettsialpox, and tick fevers caused by Rickettsiae. 2. Sexually transmitted infections: - Uncomplicated urethral, endocervical or rectal infections in adults caused by Chlamydia trachomatis. - Nongonococcal urethritis caused by Ureaplasma urealyticum. - Lymphogranuloma venereum caused by Chlamydia trachomatis. - Granuloma inguinale caused by Calymmatobacterium granulomatis. 3. Respiratory tract infections - Respiratory tract infections caused by Mycoplasma pneumoniae. - Psittacosis (ornithosis) caused by Chlamydia psittaci. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following microorganisms, when bacteriological testing indicates appropriate susceptibility to the drug: - Respiratory tract infections caused by Haemophilus influenzae. - Respiratory tract infections caused by Klebsiella species. - Upper respiratory infections caused by Streptococcus pneumoniae. 4. Specific bacterial infections: - Relapsing fever due to Borrelia recurrentis. - Plague due to Yersinia pestis. - Tularemia due to Francisella tularensis. - Cholera caused by Vibrio cholerae. - Campylobacter fetus infections caused by Campylobacter fetus. - Brucellosis due to Brucella species (in conjunction with streptomycin). - Bartonellosis due to Bartonella bacilliformis. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following gram-negative microorganisms, when bacteriological testing indicates appropriate susceptibility to the drug: - Escherichia coli - Enterobacter aerogenes - Shigella species - Acinetobacter species - Urinary tract infections caused by Klebsiella species. 5. Ophthalmic infections - Trachoma caused by Chlamydia trachomatis, although the infectious agent is not always eliminated as judged by immunofluorescence. - Inclusion conjunctivitis caused by Chlamydia trachomatis. 6. Anthrax including inhalational anthrax (post-exposure): - Anthrax due to Bacillus anthracis, including inhalational anthrax (post-exposure): to reduce the incidence or progression of disease following exposure to

aerosolized Bacillus anthracis. 7. Alternative treatment for selected infections when penicillin is contraindicated: - When penicillin is contraindicated, doxycycline is an alternative drug in the treatment of the following infections: - Syphilis caused by Treponema pallidum. - Yaws caused by Treponema pertenue. - Vincent's infection caused by Fusobacterium fusiforme. - Actinomycosis caused by Actinomyces israelii. - Infections caused by Clostridium species. 8. Adjunctive therapy for acute intestinal amebiasis and severe acne: - In acute intestinal amebiasis, doxycycline may be a useful adjunct to amebicides. - In severe acne, doxycycline may be useful adjunctive therapy. 9. Prophylaxis of malaria - Doxycycline is indicated for the prophylaxis of malaria due to Plasmodium falciparum in short-term travelers (<4 months) to areas with chloroquine and/or pyrimethamine-sulfadoxine resistant strains. To reduce the development of drug-resistant bacteria and maintain the effectiveness of Doryx and other antibacterial drugs, Doryx should be used only to treat or prevent infections that are proven or strongly suspected to be caused by susceptible bacteria. When culture and susceptibility information are available, they should be considered in selecting or modifying antibacterial therapy. In the absence of such data, local epidemiology and susceptibility patterns may contribute to the empiric selection of therapy.

Drug Name: Targadox (doxycycline hyclate) tablets

Infections Indicated in the following conditions or diseases: 1. Rickettsial infections: - Rocky Mountain spotted fever, typhus fever and the typhus group, Q fever, rickettsialpox, and tick fevers caused by Rickettsiae. 2. Sexually transmitted infections: - Uncomplicated urethral, endocervical or rectal infections in adults caused by Chlamydia trachomatis. - Nongonococcal urethritis caused by Ureaplasma urealyticum. - Lymphogranuloma venereum caused by Chlamydia trachomatis. - Granuloma inguinale caused by Calymmatobacterium granulomatis. 3. Respiratory tract infections: - Respiratory tract infections caused by Mycoplasma pneumoniae. - Psittacosis (ornithosis) caused by Chlamydia psittaci. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following microorganisms, when bacteriological testing indicates appropriate susceptibility to the drug: - Respiratory tract infections caused by Haemophilus influenzae. - Respiratory tract infections caused by Klebsiella species. - Upper respiratory infections caused by Streptococcus pneumoniae. 4. Specific bacterial infections: - Relapsing fever due to Borrelia recurrentis. - Plague due to Yersinia pestis. - Tularemia due to Francisella tularensis. - Cholera caused by Vibrio cholerae. - Campylobacter fetus infections caused by Campylobacter fetus. - Brucellosis due to Brucella species (in conjunction with streptomycin). - Bartonellosis due to Bartonella bacilliformis. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following gram-negative microorganisms, when bacteriological testing indicates appropriate susceptibility to the drug: - Escherichia coli - Enterobacter aerogenes - Shigella species - Acinetobacter species - Urinary tract infections caused by

Klebsiella species. 5. Ophthalmic infections - Trachoma caused by Chlamydia trachomatis, although the infectious agent is not always eliminated as judged by immunofluorescence. - Inclusion conjunctivitis caused by Chlamydia trachomatis. 6. Anthrax including inhalational anthrax (post-exposure): - Anthrax due to Bacillus anthracis, including inhalational anthrax (post-exposure): to reduce the incidence or progression of disease following exposure to aerosolized Bacillus anthracis. 7. Alternative treatment for selected infections when penicillin is contraindicated: - When penicillin is contraindicated, doxycycline is an alternative drug in the treatment of the following infections: - Syphilis caused by Treponema pallidum. - Yaws caused by Treponema pertenue. - Vincent's infection caused by Fusobacterium fusiforme. - Actinomycosis caused by Actinomyces israelii. - Infections caused by Clostridium species. 8. Adjunctive therapy for acute intestinal amebiasis and severe acne: - In acute intestinal amebiasis, doxycycline may be a useful adjunct to amebicides. - In severe acne, doxycycline may be useful adjunctive therapy. 9. Prophylaxis of malaria - Doxycycline is indicated for the prophylaxis of malaria due to Plasmodium falciparum in short-term travelers (<4 months) to areas with chloroquine and/or pyrimethamine-sulfadoxine resistant strains

Drug Name: Seysara (sarecycline) tablets

Acne vulgaris Indicated for the treatment of inflammatory lesions of non-nodular moderate to severe acne vulgaris in patients 9 years of age and older. Limitations of use: Efficacy of Seysara beyond 12 weeks and safety beyond 12 months have not been established. Seysara has not been evaluated in the treatment of infections. To reduce the development of drug-resistant bacteria as well as to maintain the effectiveness of other antibacterial drugs, Seysara should be used only as indicated.

Drug Name: Minolira (minocycline hydrochloride) extended-release tablets

Acne vulgaris Indicated to treat the inflammatory lesions of non-nodular moderate to severe acne vulgaris in patients 12 years of age and older. Limitations of use: This formulation of minocycline has not been evaluated in the treatment of infections. To reduce the development of drug-resistant bacteria as well as to maintain the effectiveness of other antibacterial drugs, Minolira should be used only as indicated.

Drug Name: Vibramycin (doxycycline hyclate) capsules, Vibramycin (doxycycline monohydrate) powder for oral suspension, Vibramycin (doxycycline calcium) oral syrup

Infections Indicated for the treatment of the following infections: 1. Rocky mountain spotted fever, typhus fever and the typhus group, Q fever, rickettsialpox, and tick fevers caused by Rickettsiae. 2. Respiratory tract infections caused by Mycoplasma pneumoniae. 3. Lymphogranuloma venereum caused by Chlamydia trachomatis. 4. Psittacosis (ornithosis) caused by Chlamydophila psittaci. 5. Trachoma caused by Chlamydia trachomatis, although

the infectious agent is not always eliminated as judged by immunofluorescence. 6. Inclusion conjunctivitis caused by Chlamydia trachomatis. 7. Uncomplicated urethral, endocervical or rectal infections in adults caused by Chlamydia trachomatis. 8. Nongonococcal urethritis caused by Ureaplasma urealyticum. 9. Relapsing fever due to Borrelia recurrentis. Doxycycline is also indicated for the treatment of infections caused by the following gram-negative microorganisms: - Chancroid caused by Haemophilus ducreyi. - Plague due to Yersinia pestis (formerly Pasteurella pestis). - Tularemia due to Francisella tularensis. - Cholera caused by Vibrio cholerae. - Campylobacter fetus infections caused by Campylobacter fetus. - Brucellosis due to Brucella species (in conjunction with streptomycin). - Bartonellosis due to Bartonella bacilliformis. - Granuloma inguinale caused by Klebsiella granulomatis. Because many strains of the following groups of microorganisms have been shown to be resistant to doxycycline, culture and susceptibility testing are recommended. Doxycycline is indicated for treatment of infections caused by the following gram-negative bacteria, when bacteriologic testing indicates appropriate susceptibility to the drug: 1. Escherichia coli. 2. Enterobacter aerogenes. 3. Shigella species. 4. Acinetobacter species. 5. Respiratory tract infections caused by Haemophilus influenza. 6. Respiratory tract and urinary tract infections caused by Klebsiella species. Doxycycline is indicated for treatment of infections caused by the following gram-positive microorganisms when bacteriologic testing indicates appropriate susceptibility to the drug: 1. Upper respiratory infections caused by Streptococcus pneumonia. 2. Anthrax due to Bacillus anthracis, including inhalational anthrax (post-exposure): to reduce the incidence or progression of disease following exposure to aerosolized Bacillus anthracis. When penicillin is contraindicated, doxycycline is an alternative drug in the treatment of the following infections: 1. Uncomplicated gonorrhea caused by Neisseria gonorrhoeae. 2. Syphilis caused by Treponema pallidum. 3. Yaws caused by Treponema pertenue. 4. Listeriosis due to Listeria monocytogenes. 5. Vincent's infection caused by Fusobacterium fusiforme, 6. Actinomycosis caused by Actinomyces israelii. 7. Infections caused by Clostridium species. In acute intestinal amebiasis, doxycycline may be a useful adjunct to amebicides. In severe acne, doxycycline may be useful adjunctive therapy. Doxycycline is indicated for the prophylaxis of malaria due to Plasmodium falciparum in short-term travelers (< 4 months) to areas with chloroquine and/or pyrimethamine-sulfadoxine resistant strains. To reduce the development of drug-resistant bacteria and maintain effectiveness of Vibramycin and other antibacterial drugs, Vibramycin should be used only to treat or prevent infections that are proven or strongly suspected to be caused by susceptible bacteria. When culture and susceptibility information are available, they should be considered in selecting or modifying antibacterial therapy. In the absence of such data, local epidemiology and susceptibility patterns may contribute to the empiric selection of therapy.

Drug Name: Solodyn

Acne vulgaris Indicated to treat only inflammatory lesions of non-nodular moderate to severe acne vulgaris in patients 12 years of age and older. Limitations of Use: Solodyn did not demonstrate any effect on non-inflammatory acne lesions. Safety of Solodyn has not

been established beyond 12 weeks of use. This formulation of minocycline has not been evaluated in the treatment of infections. To reduce the development of drug-resistant bacteria as well as to maintain the effectiveness of other antibacterial drugs, Solodyn should be used only as indicated.
Drug Name: LymePak (doxycycline hyclate) tablets
Lyme disease Indicated for the treatment of early Lyme disease (as evidenced by erythema migrans) due to Borrelia burgdorferi in adults and pediatric patients 8 years of age and older weighing 45 kg and above. Limitations of use: To reduce the development of drug-resistant bacteria and maintain the effectiveness of LymePak and other antibacterial drugs, LymePak should be used only to treat or prevent infections that are proven or strongly suspected to be caused by susceptible bacteria. When culture and susceptibility information are available, they should be considered in selecting or modifying antibacterial therapy. In the absence of such data, local epidemiology and susceptibility patterns may contribute to the empiric selection of therapy.

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228918
Guideline Name	Oral Fentanyl Products
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Actiq (fentanyl citrate) oral transmucosal lozenge
Breakthrough pain Indicated for the management of breakthrough pain in cancer patients 16 years of age and older who are already receiving and who are tolerant to around-the-clock opioid therapy for their underlying persistent cancer pain. Patients considered opioid tolerant are those who are taking around-the-clock medicine consisting of at least 60 mg of oral morphine daily, at least 25 mcg of transdermal fentanyl/hour, at least 30 mg of oral oxycodone daily, at least 8 mg of oral hydromorphone daily, at least 25 mg oral oxymorphone daily, at least 60 mg of oral hydrocodone per day, or an equianalgesic dose of another opioid daily for a week or longer. Patients must remain on around-the-clock opioids when taking Actiq. This product must not be used in opioid non-tolerant patients because life-threatening respiratory depression and death could occur at any dose in patients not on a chronic regimen of opioids. For this reason, Actiq is contraindicated in the management of acute or postoperative pain. Actiq is intended to be used only in the care of opioid-tolerant cancer patients and only by oncologists and pain specialists who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain. Limitations of Use: As a part of the TIRF REMS Access program, Actiq Q may be dispensed only to outpatients enrolled in the program. For inpatient administration of Actiq (e.g., hospitals, hospices, and long-term care facilities that prescribe for inpatient use), patient and prescriber enrollment is not required. Not for use in opioid non-

tolerant patients. Not for use in the management of acute or postoperative pain, including headache/migraine and dental pain.

Drug Name: Fentora (fentanyl buccal tablet)

Breakthrough pain Indicated for the management of breakthrough pain in cancer patients 18 years of age and older who are already receiving and who are tolerant to around-the-clock opioid therapy for their underlying persistent cancer pain. Patients considered opioid tolerant are those who are taking around-the-clock medicine consisting of at least 60 mg of oral morphine daily, at least 25 mcg/hr of transdermal fentanyl, at least 30 mg of oral oxycodone daily, at least 8 mg of oral hydromorphone daily, at least 25 mg oral oxymorphone daily, at least 60 mg of oral hydrocodone per day, or an equianalgesic dose of another opioid daily for a week or longer. Patients must remain on around-the-clock opioids while taking Fentora. This product must not be used in opioid non-tolerant patients because life-threatening hypoventilation and death could occur at any dose in patients not on a chronic regimen of opioids. For this reason, Fentora is contraindicated in the management of acute or postoperative pain. Fentora is intended to be used only in the care of opioid tolerant cancer patients and only by healthcare professionals who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain. Limitations of Use: As a part of the TIRF REMS Access program, Fentora may be dispensed only to outpatients enrolled in the program. For inpatient administration of Fentora (e.g., hospitals, hospices, and long-term care facilities that prescribe for inpatient use), patient and prescriber enrollment is not required. Not for use in opioid non-tolerant patients. Not for use in the management of acute or postoperative pain, including headache/migraine and dental pain.

Drug Name: Lazanda (fentanyl) nasal spray

Breakthrough pain Indicated for the management of breakthrough pain in cancer patients 18 years of age and older who are already receiving and who are tolerant to around-the-clock opioid therapy for their underlying persistent cancer pain. Patients considered opioid tolerant are those who are taking at least: 60 mg of oral morphine/day, 25 mcg of transdermal fentanyl/hour, 30 mg oral oxycodone/day, 8 mg oral hydromorphone/day, 25 mg oral oxymorphone/day, 60 mg of oral hydrocodone/day, or an equianalgesic dose of another opioid for a week or longer. Patients must remain on around-the-clock opioids when taking Lazanda. Lazanda is contraindicated for patients who are not already tolerant to opioids because life-threatening respiratory depression and death could occur in patients not taking chronic opioids. For this reason, Lazanda is contraindicated in the management of acute or postoperative pain, including headache/migraine, or dental pain. Lazanda is intended to be prescribed only by healthcare professionals who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain. Limitations of Use: As a part of the TIRF REMS Access program, Lazanda may be dispensed only to outpatients enrolled in the program.For inpatient administration of Lazanda (e.g., hospitals, hospices, and long-term care facilities that prescribefor inpatient use), patient enrollment is not required. Not for use in opioid non-tolerant patients. Not for use in the management of acute or postoperative pain, including headache/migraine and dental pain.

Drug Name: Subsys (fentanyl sublingual spray)

Breakthrough pain Indicated for the management of breakthrough pain in adult cancer patients who are already receiving and who are tolerant to around-the-clock opioid therapy for

their underlying persistent cancer pain. Patients considered opioid tolerant are those who are taking around-the-clock medicine consisting of at least 60 mg of oral morphine daily, at least 25 mcg of transdermal fentanyl/hour, at least 30 mg of oral oxycodone daily, at least 8 mg of oral hydromorphone daily, at least 60 mg of oral hydrocodone per day, or an equianalgesic dose of another opioid daily for a week or longer. Patients must remain on around-the-clock opioids when taking Subsys . This product must not be used in opioid non-tolerant patients because life-threatening respiratory depression and death could occur at any dose in patients not on a chronic regimen of opioids. For this reason, Subsys is contraindicated in the management of acute or postoperative pain. Subsys is intended to be used only in the care of cancer patients and only by oncologists and pain specialists who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain. Limitations of Use As part of the Transmucosal Immediate-Release Fentanyl (TIRF) REMS ACCESS Program, Subsys may be dispensed only to outpatients enrolled in the program. For inpatient administration (e.g., hospitals, hospices, and long-term care facilities that prescribe for inpatient use) of Subsys, patient enrollment is not required. Not for use in opioid non-tolerant patients. Not for use in the management of acute or postoperative pain, including headache/migraine and dental pain.

2 . Criteria

Product Name:Brand Actiq, Fentora*, Generic fentanyl citrate*, Lazanda*, or Subsys	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Approval Criteria

1 - For the management of breakthrough cancer pain [A]

AND

2 - Patient must have at least a one week history of one of the following medications to demonstrate tolerance to opioids: [3, B]

Morphine sulfate at doses of greater than or equal to 60 mg/day

Fentanyl transdermal patch at doses greater than or equal to 25 µg/hr

Oxycodone at a dose of greater than or equal to 30 mg/day

Oral hydromorphone at a dose of greater than or equal to 8 mg/day

Oral oxymorphone at a dose of greater than or equal to 25 mg/day

Oral hydrocodone at a dose of greater than or equal to 60mg/day

An alternative opioid at an equianalgesic dose (e.g., oral methadone greater than or equal to 20 mg/day)

AND

3 - Trial and failure or intolerance to generic fentanyl lozenge

AND

4 - The patient is currently taking a long-acting opioid around the clock for cancer pain

AND

5 - Prescribed by or in consultation with one of the following:

Pain specialist

Oncologist

Hematologist

Hospice care specialist

Palliative care specialist

Notes	*Product may be excluded depending on the plan

Approval Criteria

1 - For the management of breakthrough cancer pain

AND

2 - Prescribed by or in consultation with one of the following:

Pain specialist

Oncologist

Hematologist

Hospice care specialist

Palliative care specialist

AND

3 - The prescriber maintains and provides chart documentation of the patient's evaluation, including all of the following: [3]

An appropriate patient medical history and physical examination

A description of the nature and intensity of the pain

Documentation of appropriate dose escalation

Documentation of ongoing, periodic review of the course of opioid therapy

An updated, comprehensive treatment plan (the treatment plan should state objectives that will be used to determine treatment success, such as pain relief or improved physical and/or psychosocial function)

Verification that the risks and benefits of the use of the controlled substance have been discussed with the patient, significant other(s), and/or guardian

Notes	*Product may be excluded depending on the plan.

3 . Endnotes

Actiq, Fentora, Lazanda, and Subsys are intended to be used only in the care of cancer patients and only by oncologists and pain specialists who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain [1, 2, 4, 5]

Actiq, Fentora, Lazanda, and Subsys are only intended for patients who are opioid tolerant. Patients considered opioid tolerant are those who are taking at least 60 mg morphine/day, at least 25 mcg transdermal fentanyl/hour, at least 30 mg of oxycodone daily, at least 8 mg oral hydromorphone daily, at least 60 mg of oral hydrocodone daily, or an equianalgesic dose of another opioid for a week or longer. [1, 2, 4, 5]

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229078
Guideline Name	Orencia (abatacept)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Orencia (abatacept) SC
Rheumatoid Arthritis (RA) Indicated for the treatment of adult patients with moderately to severely active rheumatoid arthritis. Limitations of Use: The concomitant use of Orencia with other potent immunosuppressants (e.g., biologic disease-modifying antirheumatic drugs [DMARDs], Janus kinase [JAK] inhibitors) is not recommended. **Polyarticular Juvenile Idiopathic Arthritis (PJIA)** Indicated for the treatment of patients 2 years of age and older with moderately to severely active polyarticular juvenile idiopathic arthritis (PJIA). Limitations of Use: The concomitant use of Orencia with other potent immunosuppressants (e.g., biologic DMARDs, JAK inhibitors) is not recommended. **Psoriatic Arthritis (PsA)** Indicated for the treatment of patients 2 years of age and older with active psoriatic arthritis (PsA). Limitations of Use: The concomitant use of Orencia with other potent immunosuppressants (e.g., biologic DMARDs, JAK inhibitors) is not recommended.
Drug Name: Orencia (abatacept) IV
Rheumatoid Arthritis (RA) Indicated for the treatment of adult patients with moderately to severely active rheumatoid arthritis. Limitations of Use: The concomitant use of Orencia with

other potent immunosuppressants (e.g., biologic DMARDs, JAK inhibitors) is not recommended.

Polyarticular Juvenile Idiopathic Arthritis (PJIA) Indicated for the treatment of patients 2 years of age and older with moderately to severely active polyarticular juvenile idiopathic arthritis (PJIA). Limitations of Use: The concomitant use of Orencia with other potent immunosuppressants (e.g., biologic DMARDs, JAK inhibitors) is not recommended.

Psoriatic Arthritis (PsA) Indicated for the treatment of adult patients with active psoriatic arthritis (PsA). Limitations of Use: The concomitant use of Orencia with other potent immunosuppressants (e.g., biologic DMARDs, JAK inhibitors) is not recommended.

Prophylaxis for Acute Graft versus Host Disease (aGVHD) Indicated for the prophylaxis of acute graft versus host disease (aGVHD), in combination with a calcineurin inhibitor and methotrexate, in adults and pediatric patients 2 years of age and older undergoing hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated-donor. Limitations of Use: The concomitant use of Orencia with other potent immunosuppressants (e.g., biologic DMARDs, JAK inhibitors) is not recommended.

2 . Criteria

Product Name:Orencia IV or Orencia SC	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORENCIA CLICKJECT	ABATACEPT SUBCUTANEOUS SOLN AUTO-INJECTOR 125 MG/ML	6640001000D520	Brand
ORENCIA	ABATACEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.4ML	6640001000E510	Brand
ORENCIA	ABATACEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 87.5 MG/0.7ML	6640001000E515	Brand
ORENCIA	ABATACEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 125 MG/ML	6640001000E520	Brand
ORENCIA	ABATACEPT FOR IV SOLN 250 MG	66400010002120	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

methotrexate

leflunomide

sulfasalazine

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product**

Simponi (golimumab)

Rinvoq (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy	
Notes	*Includes attestation that a total of two TNF inhibitors have already be en tried in the past, and the patient should not be made to try a third T NF inhibitor. ** For review process only: Refer to the table in the Background sectio n for carrier-specific formulary products

Product Name:Orencia IV or Orencia SC	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORENCIA CLICKJECT	ABATACEPT SUBCUTANEOUS SOLN AUTO-INJECTOR 125 MG/ML	6640001000D520	Brand
ORENCIA	ABATACEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.4ML	6640001000E510	Brand
ORENCIA	ABATACEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 87.5 MG/0.7ML	6640001000E515	Brand
ORENCIA	ABATACEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 125 MG/ML	6640001000E520	Brand
ORENCIA	ABATACEPT FOR IV SOLN 250 MG	66400010002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Orencia IV or Orencia SC	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)

Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

ORENCIA	ABATACEPT FOR IV SOLN 250 MG	66400010002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 5]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Orencia IV	
Diagnosis	Prophylaxis for Acute Graft versus Host Disease (aGVHD)
Approval Length	2 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORENCIA	ABATACEPT FOR IV SOLN 250 MG	66400010002120	Brand

Approval Criteria

1 - Used for prophylaxis of acute graft versus host disease (aGVHD)

AND

2 - Patient is 2 years of age or older

AND

3 - Patient will receive hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated donor

AND

4 - Recommended antiviral prophylactic treatment for Epstein-Barr Virus (EBV) reactivation (e.g., acyclovir) will be administered prior to Orencia and continued for six months after HSCT

AND

5 - Used in combination with both of the following:

calcineurin inhibitor (e.g., cyclosporine, tacrolimus)

methotrexate

5 . Revision History

Date	Notes
12/20/2024	New program

Prior Authorization Guideline

Guideline ID	GL-228920
Guideline Name	Orgovyx (relugolix)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Orgovyx (relugolix)
Prostate Cancer Indicated for the treatment of adult patients with advanced prostate cancer.

2 . Criteria

Product Name:Orgovyx	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

ORGOVYX	RELUGOLIX TAB 120 MG	21405570000320	Brand

Approval Criteria

1 - Diagnosis of advanced prostate cancer

AND

2 - Disease is one of the following:

Evidence of biochemical or clinical relapse following local primary intervention with curative intent

Newly diagnosed androgen-sensitive metastatic disease

Advanced localized disease unlikely to be cured by local primary intervention with curative intent

Product Name:Orgovyx	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORGOVYX	RELUGOLIX TAB 120 MG	21405570000320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Documentation of serum testosterone level less than 50 ng/dL

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Oriahnn (elagolix, estradiol, and norethindrone acetate capsules; elagolix capsules), Myfembree (relugolix, estradiol, and norethindrone acetate)

Prior Authorization Guideline

Guideline ID	GL-228502
Guideline Name	Oriahnn (elagolix, estradiol, and norethindrone acetate capsules; elagolix capsules), Myfembree (relugolix, estradiol, and norethindrone acetate)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Oriahnn (elagolix, estradiol, and norethindrone acetate capsules; elagolix capsules)
Heavy Menstrual Bleeding Associated With Uterine Leiomyomas (Fibroids) Indicated for the management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids) in premenopausal women. Limitations of Use: Use should be limited to 24 months due to the risk of continued bone loss, which may not be reversible.
Drug Name: Myfembree (relugolix, estradiol, and norethindrone acetate)
Heavy Menstrual Bleeding Associated With Uterine Leiomyomas (Fibroids) Indicated for the management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids) in premenopausal women. Limitations of Use: Use should be limited to 24 months due to the risk of continued bone loss, which may not be reversible. **Pain Associated With Endometriosis** Indicated for the management of moderate to severe

pain associated with endometriosis in premenopausal women. Limitations of Use: Use should be limited to 24 months due to the risk of continued bone loss, which may not be reversible.

2 . Criteria

Product Name:Oriahnn, Myfembree	
Diagnosis	Heavy Menstrual Bleeding Associated With Uterine Leiomyomas (Fibroids)
Approval Length	12 month(s) [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORIAHNN	ELAGOLIX-ESTRAD-NORETH 300-1-0.5MG & ELAGOLIX 300MG CAP PACK	2499350340B220	Brand
MYFEMBREE	RELUGOLIX-ESTRADIOL-NORETHINDRONE ACETATE TAB 40-1-0.5 MG	24993503800320	Brand

Approval Criteria

1 - Diagnosis of heavy menstrual bleeding associated with uterine leiomyomas (fibroids)

AND

2 - Patient is premenopausal

AND

3 - One of the following: [3, 5-6]

3.1 History of inadequate control of bleeding following a trial of at least 3 months, or history of intolerance or contraindication to one of the following:

Combination (estrogen/progestin) contraceptive

Progestins

Tranexamic acid

OR

3.2 Patient has had a previous interventional therapy to reduce bleeding [B]

AND

4 - Treatment duration of therapy has not exceeded a total of 24 months [C]

Product Name:Oriahnn, Myfembree	
Diagnosis	Heavy Menstrual Bleeding Associated With Uterine Leiomyomas (Fibroids)
Approval Length	12 months(s) [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORIAHNN	ELAGOLIX-ESTRAD-NORETH 300-1-0.5MG & ELAGOLIX 300MG CAP PACK	2499350340B220	Brand
MYFEMBREE	RELUGOLIX-ESTRADIOL-NORETHINDRONE ACETATE TAB 40-1-0.5 MG	24993503800320	Brand

Approval Criteria

1 - Patient has improvement in bleeding associated with uterine leiomyomas (fibroids) (e.g., significant/sustained reduction in menstrual blood loss per cycle, improved quality of life, etc.)

AND

2 - Treatment duration of therapy has not exceeded a total of 24 months [C]

Product Name:Myfembree	
Diagnosis	Pain Associated With Endometriosis
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYFEMBREE	RELUGOLIX-ESTRADIOL-NORETHINDRONE ACETATE TAB 40-1-0.5 MG	24993503800320	Brand

Approval Criteria

1 - Diagnosis of moderate to severe pain associated with endometriosis

AND

2 - Patient is premenopausal

AND

3 - ONE of the following:

3.1 History of inadequate pain control response following a trial of 30 days, or history of intolerance or contraindication to one of the following:

Danazol

Combination (estrogen/progestin) contraceptive

Progestins

OR

3.2 Patient has had surgical ablation to prevent recurrence

AND

4 - Treatment duration of Myfembree has not exceeded a total of 24 months [C, 2]

Product Name:Myfembree	
Diagnosis	Pain Associated With Endometriosis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MYFEMBREE	RELUGOLIX-ESTRADIOL-NORETHINDRONE ACETATE TAB 40-1-0.5 MG	24993503800320	Brand

Approval Criteria

1 - Patient has improvement in pain associated with endometriosis (e.g., improvement in dysmenorrhea and nonmenstrual pelvic pain)

AND

2 - Treatment duration of Myfembree has not exceeded a total of 24 months [C, 2]

3 . Endnotes

Results of UF-EXTEND and LIBERTY Extension demonstrated that up to 12 months of elagolix or relugolix with addback therapy provided sustained efficacy in reducing menstrual blood loss with no new or unexpected adverse effects compared with results of the preceding 6-month UF-1, UF-2, LIBERTY 1, and LIBERTY 2 studies. [4, 7]

Alternatives to surgery include oral contraceptives, progestins, tranexamic acid, and a variety of interventional therapies (e.g., uterine-artery embolization and magnetic resonance–guided focused ultrasonography) [3, 5-6]

Use of Oriahnn and Myfembree should be limited to 24 months due to the risk of continued bone loss, which may not be reversible. [1, 2]

Prior Authorization Guideline

Guideline ID	GL-228705
Guideline Name	Orilissa (elagolix)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Orilissa (elagolix)
Endometriosis Indicated for the management of moderate to severe pain associated with endometriosis. Limitations of Use: Limit the duration of use based on the dose and coexisting condition.

2 . Criteria

Product Name:Orilissa 150 mg	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORILISSA	ELAGOLIX SODIUM TAB 150 MG (BASE EQUIV)	30090030100320	Brand

Approval Criteria

1 - Diagnosis of moderate to severe pain associated with endometriosis

AND

2 - One of the following: [2, 3]

2.1 History of inadequate pain control response following a trial of at least 3 months, or history of intolerance or contraindication to one of the following:

Danazol

Combination (estrogen/progesterone) oral contraceptive

Progestins

OR

2.2 Patient has had surgical ablation to prevent recurrence

Product Name:Orilissa 150 mg	
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORILISSA	ELAGOLIX SODIUM TAB 150 MG (BASE EQUIV)	30090030100320	Brand

Approval Criteria

1 - Patient has improvement in pain associated with endometriosis (e.g., improvement in dysmenorrhea and nonmenstrual pelvic pain)

AND

2 - Treatment duration of Orilissa has not exceeded a total of 24 months [1]

Product Name:Orilissa 200 mg*	
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORILISSA	ELAGOLIX SODIUM TAB 200 MG (BASE EQUIV)	30090030100330	Brand

Approval Criteria

1 - Diagnosis of moderate to severe pain associated with endometriosis

AND

2 - One of the following: [2, 3]

2.1 History of inadequate pain control response following a trial of at least 3 months, or history of intolerance or contraindication to one of the following:

Danazol

Combination (estrogen/progesterone) oral contraceptive

Progestins

OR

2.2 Patient has had surgical ablation to prevent recurrence

Notes	*NOTE: Orilissa 200 mg is used for a maximum of 6 months.

Prior Authorization Guideline

Guideline ID	GL-228925
Guideline Name	Orkambi (lumacaftor/ivacaftor)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Orkambi (lumacaftor/ivacaftor)
Cystic fibrosis (CF) Indicated for the treatment of cystic fibrosis (CF) in patients age 1 years and older who are homozygous for the F508del mutation in the CFTR gene. If the patient's genotype is unknown, an FDA-cleared CF mutation test should be used to detect the presence of the F508del mutation on both alleles of the CFTR gene. Limitations of Use: The efficacy and safety of Orkambi have not been established in patients with CF other than those homozygous for the F508del mutation.

2 . Criteria

Product Name:Orkambi (100 mg - 125 mg) tablet	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORKAMBI	LUMACAFTOR-IVACAFTOR TAB 100-125 MG	45309902300310	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF)

AND

2 - Patient is homozygous for the F508del mutation in the CF transmembrane conductance regulator (CFTR) gene as detected by an FDA-cleared cystic fibrosis mutation test or Clinical Laboratory Improvement Amendments (CLIA)-approved facility

AND

3 - Patient is 6 years of age or older

AND

4 - Prescribed by or in consultation with one of the following:

Specialist affiliated with a cystic fibrosis care center

Pulmonologist

Product Name:Orkambi (200 mg - 125 mg) tablet	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

ORKAMBI	LUMACAFTOR-IVACAFTOR TAB 200-125 MG	45309902300320	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF)

AND

2 - Patient is homozygous for the F508del mutation in the CF transmembrane conductance regulator (CFTR) gene as detected by an FDA-cleared cystic fibrosis mutation test or Clinical Laboratory Improvement Amendments (CLIA)-approved facility

AND

3 - Patient is 12 years of age or older

AND

4 - Prescribed by or in consultation with one of the following:

Specialist affiliated with a cystic fibrosis care center

Pulmonologist

Product Name:Orkambi (100 mg - 125 mg) tablet, Orkambi (200 mg - 125 mg) tablet	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORKAMBI	LUMACAFTOR-IVACAFTOR TAB 200-125 MG	45309902300320	Brand
ORKAMBI	LUMACAFTOR-IVACAFTOR TAB 100-125 MG	45309902300310	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (i.e., improvement in lung function [forced expiratory volume in one second {FEV1}], decreased number of pulmonary exacerbations)

Product Name:Orkambi (100 mg - 125 mg) granules packet, Orkambi (150 mg - 188 mg) granules packet, Orkambi (75 mg - 94 mg) granules packet	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORKAMBI	LUMACAFTOR-IVACAFTOR GRANULES PACKET 100-125 MG	45309902303010	Brand
ORKAMBI	LUMACAFTOR-IVACAFTOR GRANULES PACKET 150-188 MG	45309902303020	Brand
ORKAMBI	LUMACAFTOR-IVACAFTOR GRANULES PACKET 75-94 MG	45309902303005	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF)

AND

2 - Patient is homozygous for the F508del mutation in the CF transmembrane conductance regulator (CFTR) gene as detected by an FDA-cleared cystic fibrosis mutation test or Clinical Laboratory Improvement Amendments (CLIA)-approved facility

AND

3 - One of the following:

3.1 Patient is 1 through 5 years of age

OR

3.2 Both of the following:

Patient is 6 years of age or greater

Patient is unable to swallow oral tablets

AND

4 - Prescribed by or in consultation with one of the following:

Specialist affiliated with a cystic fibrosis care center

Pulmonologist

Product Name:Orkambi (100 mg - 125 mg) granules packet, Orkambi (150 mg - 188 mg) granules packet, Orkambi (75 mg - 94 mg) granules packet	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORKAMBI	LUMACAFTOR-IVACAFTOR GRANULES PACKET 100-125 MG	45309902303010	Brand

Orserdu (elacestrant)

Prior Authorization Guideline

Guideline ID	GL-228924
Guideline Name	Orserdu (elacestrant)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Orserdu (elacestrant)
Breast Cancer Indicated for the treatment of postmenopausal women or adult men, with ER-positive, HER2-negative, ESR1-mutated advanced or metastatic breast cancer with disease progression following at least one line of endocrine therapy.

2 . Criteria

Product Name:Orserdu	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORSERDU	ELACESTRANT HYDROCHLORIDE TAB 86 MG	21403720100320	Brand
ORSERDU	ELACESTRANT HYDROCHLORIDE TAB 345 MG	21403720100340	Brand

Approval Criteria

1 - Diagnosis of breast cancer

AND

2 - Disease is one of the following:

Advanced

Metastatic

AND

3 - Disease is estrogen receptor (ER)-positive

AND

4 - Disease is human epidermal growth factor receptor 2 (HER2)-negative

AND

5 - Presence of estrogen receptor (ESR1) mutation(s) as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

6 - Disease has progressed following at least one line of endocrine therapy [e.g., Faslodex (fulvestrant), Arimidex (anastrozole), Femara (letrozole), Aromasin (exemestane)] [A, 1, 3]

Product Name:Orserdu	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ORSERDU	ELACESTRANT HYDROCHLORIDE TAB 86 MG	21403720100320	Brand
ORSERDU	ELACESTRANT HYDROCHLORIDE TAB 345 MG	21403720100340	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

Per clinical consult, treatment can be with an aromatase inhibitor, with or without fulvestrant, with or without CD4/6 inhibitors, as not all patients are candidates for CD4/6 inhibitors [3]

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228929
Guideline Name	Otezla (apremilast)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Otezla (apremilast)
Psoriatic Arthritis (PsA) Indicated for the treatment of adult patients with active psoriatic arthritis. **Plaque Psoriasis (PsO)** Indicated for the treatment of adult patients with plaque psoriasis who are candidates for phototherapy or systemic therapy. Indicated for pediatric patients 6 years of age and older and weighing at least 20 kg with moderate to severe plaque psoriasis who are candidates for phototherapy or systemic therapy. **Oral Ulcers Associated with Behçet's Disease** Indicated for the treatment of adult patients with oral ulcers associated with Behçet's Disease.

2 . Criteria

Product Name:Otezla	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OTEZLA	APREMILAST TAB STARTER THERAPY PACK 10 MG & 20 MG & 30 MG	6670001500B720	Brand
OTEZLA	APREMILAST TAB 30 MG	66700015000330	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [2]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

Product Name:Otezla	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OTEZLA	APREMILAST TAB STARTER THERAPY PACK 10 MG & 20 MG & 30 MG	6670001500B720	Brand
OTEZLA	APREMILAST TAB 30 MG	66700015000330	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 2]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Otezla	
Diagnosis	Plaque psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228503
Guideline Name	Overactive Bladder Agents - Step Therapy
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Gelnique (oxybutynin chloride)
Overactive Bladder Symptoms Indicated for the treatment of overactive bladder with symptoms of urge urinary incontinence, urgency, and frequency.
Drug Name: Oxytrol (oxybutynin transdermal system)
Overactive Bladder Symptoms Indicated for the treatment of overactive bladder in men with symptoms of urge urinary incontinence, urgency, and frequency.
Drug Name: Oxytrol For Women (oxybutynin patch)
Overactive Bladder Symptoms Indicated for the treatment of overactive bladder in women with symptoms of urge urinary incontinence, urgency, and frequency.
Drug Name: Gemtesa (vibegron)
Overactive Bladder Symptoms Indicated for the treatment of overactive bladder (OAB) with symptoms of urge urinary incontinence, urgency, and urinary frequency in adults.

Drug Name: Vesicare LS (solifenacin) Oral Suspension
Neurogenic Detrusor Overactivity Indicated for the treatment of neurogenic detrusor overactivity in pediatric patients aged 2 years and older.

Drug Name: Toviaz (fesoterodine fumarate)
Overactive Bladder Indicated for the treatment of overactive bladder (OAB) in adults with symptoms of urge urinary incontinence, urgency, and frequency. **Neurogenic Detrusor Overactivity** Indicated for the treatment of neurogenic detrusor overactivity (NDO) in pediatric patients 6 years of age and older with a body weight greater than 25 kg.

2 . Criteria

Product Name:Gelnique, Gemtesa, Oxytrol, Oxytrol For Women, Toviaz	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
GELNIQUE	OXYBUTYNIN CHLORIDE TD GEL 10%	54100045204030	Brand
OXYTROL	OXYBUTYNIN TD PATCH TWICE WEEKLY 3.9 MG/24HR	54100045008720	Brand
GEMTESA	VIBEGRON TAB 75 MG	54200080000320	Brand
TOVIAZ	FESOTERODINE FUMARATE TAB ER 24HR 4 MG	54100020207520	Brand
TOVIAZ	FESOTERODINE FUMARATE TAB ER 24HR 8 MG	54100020207530	Brand
OXYTROL FOR WOMEN	OXYBUTYNIN TD PATCH TWICE WEEKLY 3.9 MG/24HR	54100045008720	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication, or intolerance to two of the following: [3]

Myrbetriq tablets

generic darifenacin ER

generic oxybutynin IR/ER

generic solifenacin

generic tolterodine IR/ER

generic trospium IR/ER

generic fesoterodine ER

Product Name:Vesicare LS	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
VESICARE LS	SOLIFENACIN SUCCINATE SUSP 5 MG/5ML (1 MG/ML)	54100055201820	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to one of the following:

generic oxybutynin IR/ER tablets

generic oxybutynin syrup

Prior Authorization Guideline

Guideline ID	GL-228505
Guideline Name	Oxbryta (voxelotor) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Oxbryta (voxelotor)
Sickle Cell Disease Indicated for the treatment of sickle cell disease (SCD) in adults and pediatric patients 4 years of age and older. This indication is approved under accelerated approval based on increase in hemoglobin (Hb). Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trial(s).

2 . Criteria

Product Name:Oxbryta	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OXBRYTA	VOXELOTOR TAB 500 MG	82805080000320	Brand
OXBRYTA	VOXELOTOR TAB FOR ORAL SUSP 300 MG	82805080007320	Brand
OXBRYTA	VOXELOTOR TAB 300 MG	82805080000310	Brand

Approval Criteria

1 - Diagnosis of sickle cell disease

AND

2 - Patient is 4 years of age and older

AND

3 - Patient demonstrates hemoglobin level that does not exceed 10.5 g/dL prior to therapy initiation [2]

AND

4 - Trial and failure or inadequate response, contraindication, or intolerance to hydroxyurea [3, 4]

AND

5 - Prescribed by or in consultation with one of the following:

Hematologist/Oncologist

Specialist with expertise in the diagnosis and management of sickle cell disease

Product Name:Oxbryta

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OXBRYTA	VOXELOTOR TAB 500 MG	82805080000320	Brand
OXBRYTA	VOXELOTOR TAB FOR ORAL SUSP 300 MG	82805080007320	Brand
OXBRYTA	VOXELOTOR TAB 300 MG	82805080000310	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., an increase in hemoglobin level of greater than or equal to 1 g/dL from baseline, decreased annualized incidence rate of VOCs)

AND

2 - Patient demonstrates hemoglobin level that does not exceed 10.5 g/dL

Product Name:Oxbryta	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
OXBRYTA	VOXELOTOR TAB 500 MG	82805080000320	Brand
OXBRYTA	VOXELOTOR TAB FOR ORAL SUSP 300 MG	82805080007320	Brand
OXBRYTA	VOXELOTOR TAB 300 MG	82805080000310	Brand

Approval Criteria

1 - Diagnosis of sickle cell disease

AND

2 - Patient is 4 years of age and older

AND

3 - Patient demonstrates hemoglobin level that does not exceed 10.5 g/dL prior to therapy initiation [2]

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or inadequate response, contraindication, or intolerance to hydroxyurea [3, 4]

AND

5 - Prescribed by or in consultation with one of the following:

Hematologist/Oncologist

Specialist with expertise in the diagnosis and management of sickle cell disease

Prior Authorization Guideline

Guideline ID	GL-228507
Guideline Name	Oxervate (cenegermin-bkbj) - PA, QL
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Oxervate (cenegermin-bkbj)
Neurotrophic Keratitis (NK) Indicated for the treatment of neurotrophic keratitis (NK).

2 . Criteria

Product Name:Oxervate	
Approval Length	8 weeks*
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

OXERVATE	CENEGERMIN-BKBJ OPHTH SOLN 0.002% (20 MCG/ML)	86770020202020	Brand

Approval Criteria

1 - Diagnosis of neurotrophic keratitis

AND

2 - Trial and failure or intolerance to at least one over-the-counter ocular lubricant used at an optimal dose and frequency for at least two weeks (e.g., artificial tears, lubricating gels/ointments, etc.) [3]

AND

3 - Prescribed by or in consultation with an ophthalmologist

Notes	*Initial authorization maximum coverage is limited to one 8-week approval. Oxervate is hard-coded with a quantity limit of 112 mL per lifetime.

Product Name:Oxervate	
Approval Length	One 8-Week Approval*
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OXERVATE	CENEGERMIN-BKBJ OPHTH SOLN 0.002% (20 MCG/ML)	86770020202020	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Provider attests patient is being treated for disease recurrence (e.g., new corneal damage following prior corneal healing)

AND

1.1.2 Provider attests patient has not experienced treatment failure (e.g., patient has not experienced corneal healing after a previous course of Oxervate)

OR

1.2 Provider attests treatment is for an eye that has not previously been treated with Oxervate

Notes	*Reauthorization maximum coverage is limited to one 8-week approval. Oxervate is hard-coded with a quantity limit of 112 mL per lifetime. Subsequent request will be denied for off-label

Product Name:Oxervate	
Guideline Type	Quantity Limit*

Product Name	Generic Name	GPI	Brand/Generic
OXERVATE	CENEGERMIN-BKBJ OPHTH SOLN 0.002% (20 MCG/ML)	86770020202020	Brand

Approval Criteria

1 - Requests for additional quantity will not be approved

Notes	*Requests will be denied off-label.

Oxlumo (lumasiran)

Prior Authorization Guideline

Guideline ID	GL-228509
Guideline Name	Oxlumo (lumasiran)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Oxlumo (lumasiran) injection
Primary Hyperoxaluria Type 1 Indicated for the treatment of primary hyperoxaluria type 1 (PH1) to lower urinary and plasma oxalate levels in pediatric and adult patients.

2 . Criteria

Product Name:Oxlumo	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OXLUMO	LUMASIRAN SODIUM SUBCUTANEOUS SOLN 94.5 MG/0.5ML	56626040202020	Brand

Approval Criteria

1 - Diagnosis of primary hyperoxaluria type 1 (PH1)

AND

2 - Diagnosis has been confirmed by both of the following:

2.1 One of the following:

Elevated urinary oxalate excretion

Elevated plasma oxalate concentration

Spot urinary oxalate to creatinine molar ratio greater than normal for age

AND

2.2 One of the following:

Genetic testing demonstrating a mutation in the alanine:glyoxylate aminotransferase (AGXT) gene

Liver biopsy demonstrating absence or reduced alanine:glyoxylate aminotransferase (AGT) activity

AND

3 - Patient has not received a liver transplant

AND

4 - Prescribed by or in consultation with one of the following:

Hepatologist

Nephrologist

Urologist

Geneticist

Specialist with expertise in the treatment of PH1

Product Name:Oxlumo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OXLUMO	LUMASIRAN SODIUM SUBCUTANEOUS SOLN 94.5 MG/0.5ML	56626040202020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decreased urinary oxalate excretion, decreased plasma oxalate concentration)

AND

2 - Patient has not received a liver transplant

AND

3 - Prescribed by or in consultation with one of the following:

Hepatologist

Nephrologist

Urologist

Geneticist

Specialist with expertise in the treatment of PH1

Prior Authorization Guideline

Guideline ID	GL-233188
Guideline Name	Palynziq (pegvaliase-pqpz) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	8/16/2018
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Palynziq (pegvaliase-pqpz)
Phenylketonuria (PKU) Indicated to reduce blood phenylalanine concentrations in adult patients with phenylketonuria (PKU) who have uncontrolled blood phenylalanine concentrations greater than 600 micromol/L on existing management.

2 . Criteria

Product Name:Palynziq	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 2.5 MG/0.5ML	3090855040E510	Brand
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 10 MG/0.5ML	3090855040E520	Brand
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 20 MG/ML	3090855040E530	Brand

Approval Criteria

1 - Diagnosis of phenylketonuria (PKU)

AND

2 - Patient has uncontrolled blood phenylalanine concentrations greater than 600 micromol/L on existing management (e.g., phenylalanine restricted diet, Kuvan [sapropterin])

AND

3 - One of the following:

3.1 Patient has had a trial and failure or intolerance to generic sapropterin

OR

3.2 Patient is not a candidate for generic sapropterin therapy due to the presence of two null mutations in trans

AND

4 - Patient will have phenylalanine blood levels measured every 4 weeks until a maintenance dose is established and periodically thereafter [A]

Product Name:Palynziq

Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 2.5 MG/0.5ML	3090855040E510	Brand
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 10 MG/0.5ML	3090855040E520	Brand
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 20 MG/ML	3090855040E530	Brand

Approval Criteria

1 - Patient has experienced an objective response to therapy, defined by one of the following [B, C]:

1.1 At least a 20% reduction in blood phenylalanine concentrations from pre-treatment baseline

OR

1.2 Blood phenylalanine concentrations less than or equal to 600 micromol/L

AND

2 - Patient will continue to have phenylalanine blood levels measured periodically during therapy [A]

Product Name:Palynziq	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 2.5 MG/0.5ML	3090855040E510	Brand

PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 10 MG/0.5ML	3090855040E520	Brand
PALYNZIQ	PEGVALIASE-PQPZ SUBCUTANEOUS SOLN PREF SYRINGE 20 MG/ML	3090855040E530	Brand

Approval Criteria

1 - Diagnosis of phenylketonuria (PKU)

AND

2 - Patient has uncontrolled blood phenylalanine concentrations greater than 600 micromol/L on existing management (e.g., phenylalanine restricted diet, Kuvan [sapropterin])

AND

3 - Submission of medical records (e.g., chart notes) or paid claims for one of the following:

3.1 Patient has had a trial and failure or intolerance to generic sapropterin

OR

3.2 Patient is not a candidate for generic sapropterin therapy due to the presence of two null mutations in trans

AND

4 - Patient will have phenylalanine blood levels measured every 4 weeks until a maintenance dose is established and periodically thereafter [A]

3 . Endnotes

Patients should have blood phenylalanine (Phe) concentrations measured every 4 weeks after initiation of Palynziq (pegvaliase-pqpz), until a maintenance dosage is established. Periodic monitoring should continue after a maintenance dose is established [1].

Therapy should be discontinued in patients who do not achieve at least a 20% reduction in blood phenylalanine concentration from pre-treatment baseline or a blood phenylalanine concentration less than or equal to 600 micromol/L after 16 weeks of continuous treatment with the maximum dosage of 40 mg once daily. Based on the recommended dosing regimen, patients could be evaluated for discontinuation after 49 weeks of therapy. This would allow for induction, titration, maintenance on 20 mg for 24 weeks, and maintenance on 40mg for 16 weeks.

The American College of Medical Genetics and Genomics guideline suggests blood Phe levels should be maintained in the range of 120–360 micromol/L for all patients [2].

REPATHA PUSHTRONEX SYSTEM	EVOLOCUMAB SUBCUTANEOUS SOLN CARTRIDGE/INFUSOR 420 MG/3.5ML	3935002000E230	Brand

Approval Criteria

1 - One of the following diagnoses:

1.1 Both of the following:

Heterozygous familial hypercholesterolemia (HeFH)

Patient is 10 years of age or older

OR

1.2 Atherosclerotic cardiovascular disease (ASCVD)

OR

1.3 Primary hyperlipidemia

AND

2 - One of the following:

Patient has been receiving at least 12 consecutive weeks of highest tolerable dose of statin therapy

Patient is statin intolerant as evidenced by an inability to tolerate at least two statins, with at least one started at the lowest starting daily dose, due to intolerable symptoms or clinically significant biomarker changes of liver function or muscle function (e.g., creatine kinase)

Patient has an FDA labeled contraindication to all statins

AND

3 - One of the following:

3.1 One of the following while on maximally tolerated lipid-lowering therapy (e.g., statins) within the last 120 days [5]:

Patient requires greater than or equal to 25% LDL-C reduction to achieve goal

Patient has LDL-C greater than or equal to 70 mg/dL with ASCVD

Patient has LDL-C greater than or equal to 100 mg/dL without ASCVD

OR

3.2 Both of the following:

3.2.1 Patient has been receiving PCSK9 therapy as adjunct to maximally tolerated lipid lowering therapy (e.g., statins, ezetimibe)

AND

3.2.2 LDL-C values drawn within the past 12 months while on maximally tolerated lipid lowering therapy is within normal limits

Product Name:Praluent (F)	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD), and Secondary Prevention of Cardiovascular Events in Patients with ASCVD]
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 75 MG/ML	3935001000D520	Brand
PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 150 MG/ML	3935001000D530	Brand

Approval Criteria

1 - One of the following diagnoses:

1.1 Both of the following:

Heterozygous familial hypercholesterolemia (HeFH)

Patient is 8 years of age or older

OR

1.2 Atherosclerotic cardiovascular disease (ASCVD)

OR

1.3 Primary hyperlipidemia

AND

2 - One of the following:

Patient has been receiving at least 12 consecutive weeks of highest tolerable dose of statin therapy

Patient is statin intolerant as evidenced by an inability to tolerate at least two statins, with at least one started at the lowest starting daily dose, due to intolerable symptoms or clinically significant biomarker changes of liver function or muscle function (e.g., creatine kinase)

Patient has an FDA labeled contraindication to all statins

AND

3 - One of the following:

3.1 One of the following while on maximally tolerated lipid-lowering therapy (e.g., statins) within the last 120 days [5]:

Patient requires greater than or equal to 25% LDL-C reduction to achieve goal

Patient has LDL-C greater than or equal to 70 mg/dL with ASCVD

Patient has LDL-C greater than or equal to 100 mg/dL without ASCVD

OR

3.2 Both of the following:

3.2.1 Patient has been receiving PCSK9 therapy as adjunct to maximally tolerated lipid lowering therapy (e.g., statins, ezetimibe)

AND

3.2.2 LDL-C values drawn within the past 12 months while on maximally tolerated lipid lowering therapy is within normal limits

AND

4 - For patients 10 years of age or older: Trial and failure, contraindication, or intolerance to Repatha

Product Name:Repatha, Praluent (F)	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD), and Secondary Prevention of Cardiovascular Events in Patients with ASCVD]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization, Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
REPATHA SURECLICK	EVOLOCUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 140 MG/ML	3935002000D520	Brand
REPATHA	EVOLOCUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 140 MG/ML	3935002000E520	Brand

PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 75 MG/ML	3935001000D520	Brand
PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 150 MG/ML	3935001000D530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by a reduction in LDL-C levels from baseline

AND

2 - One of the following:

Patient continues to receive other lipid-lowering therapy (e.g., statins, ezetimibe) at the maximally tolerated dose

Patient has a documented inability to take other lipid-lowering therapy (e.g., statins, ezetimibe)

AND

3 - Applies to Praluent only: For patients 10 years of age or older: Trial and failure, contraindication, or intolerance to Repatha

Product Name:Praluent (NF)	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD), and Secondary Prevention of Cardiovascular Events in Patients with ASCVD]
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Non Formulary

PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 150 MG/ML	3935001000D530	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting a positive clinical response to therapy as evidenced by a reduction in LDL-C levels from baseline

AND

2 - One of the following:

Patient continues to receive other lipid-lowering therapy (e.g., statins, ezetimibe) at the maximally tolerated dose

Patient has a documented inability to take other lipid-lowering therapy (e.g., statins, ezetimibe)

AND

3 - For patients 10 years of age or older: Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Repatha

Product Name:Repatha	
Diagnosis	Homozygous Familial Hypercholesterolemia
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization, Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
REPATHA SURECLICK	EVOLOCUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 140 MG/ML	3935002000D520	Brand

REPATHA	EVOLOCUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 140 MG/ML	3935002000E520	Brand
REPATHA PUSHTRONEX SYSTEM	EVOLOCUMAB SUBCUTANEOUS SOLN CARTRIDGE/INFUSOR 420 MG/3.5ML	3935002000E230	Brand

Approval Criteria

1 - Diagnosis of homozygous familial hypercholesterolemia as confirmed by one of the following:

1.1 Genetic confirmation of 2 mutations in the LDL receptor, ApoB, PCSK9, or LDL receptor adaptor protein 1 (i.e., LDLRAP1 or ARH)

OR

1.2 Both of the following:

1.2.1 Untreated LDL-C greater than 400 mg/dL

AND

1.2.2 One of the following:

Xanthoma before 10 years of age

Evidence of heterozygous familial hypercholesterolemia (HeFH) in both parents

AND

2 - One of the following:

Patient is receiving other lipid-lowering therapy (e.g., statin, ezetimibe)

Patient has a documented inability to take other lipid-lowering therapy (e.g., statin, ezetimibe)

AND

3 - Patient is 10 years of age or older

Product Name:Praluent (F)	
Diagnosis	Homozygous Familial Hypercholesterolemia
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 75 MG/ML	3935001000D520	Brand

PRALUENT	ALIROCUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 150 MG/ML	3935001000D530	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting a positive clinical response to therapy as evidenced by a reduction in LDL-C levels from baseline

AND

2 - One of the following:

Patient continues to receive other lipid-lowering therapy (e.g., statin, ezetimibe)

Patient has a documented inability to take other lipid-lowering therapy (e.g., statin, ezetimibe)

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Repatha

3 . Endnotes

Per the 2018 ACC/AHA national treatment guidelines, adherence, response to therapy, and adverse effects should be monitored within 4 -12 weeks following LDL-C lowering medication initiation or dose adjustment, repeated every 3 to 12 months as needed. [3]

5 . Revision History

Date	Notes
2/27/2025	Quartz Comm and EHB copied to mirrow OptumRx and EHB

Prior Authorization Guideline

Guideline ID	GL-233191
Guideline Name	Pedmark (sodium thiosulfate injection, solution)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/14/2022
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Pedmark (sodium thiosulfate injection, solution)
Prophylaxis of Cisplatin-Induced Ototoxicity. Indicated to reduce the risk of ototoxicity associated with cisplatin in pediatric patients 1 month of age and older with localized, non-metastatic solid tumors. Limitations of Use: The safety and efficacy of Pedmark have not been established when administered following cisplatin infusions longer than 6 hours. Pedmark may not reduce the risk of ototoxicity when administered following longer cisplatin infusions, because irreversible ototoxicity may have already occurred.

2 . Criteria

Product Name:Pedmark

Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PEDMARK	SODIUM THIOSULFATE IV SOLN 125 MG/ML (12.5%)	21757375602020	Brand

Approval Criteria

1 - Diagnosis of solid tumors

AND

2 - Disease is BOTH of the following:

Localized

Non-Metastatic

AND

3 - Used for the prevention of ototoxicity due to cisplatin-based chemotherapy

AND

4 - Patient is 1 month of age or older

AND

5 - Prescribed by or in consultation with an oncologist

3 . References

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228511
Guideline Name	Pemazyre (pemigatinib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Pemazyre (pemigatinib)
Cholangiocarcinoma Indicated for the treatment of adults with previously treated, unresectable locally advanced or metastatic cholangiocarcinoma with a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangement as detected by an FDA-approved test. This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s). **Myeloid/Lymphoid Neoplasms** Indicated for the treatment of adults with relapsed or refractory myeloid/lymphoid neoplasms (MLNs) with fibroblast growth factor receptor 1 (FGFR1) rearrangement.

2 . Criteria

Product Name:Pemazyre	
Diagnosis	Cholangiocarcinoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PEMAZYRE	PEMIGATINIB TAB 4.5 MG	21532260000320	Brand
PEMAZYRE	PEMIGATINIB TAB 9 MG	21532260000330	Brand
PEMAZYRE	PEMIGATINIB TAB 13.5 MG	21532260000340	Brand

Approval Criteria

1 - Diagnosis of cholangiocarcinoma

AND

2 - Disease is one of the following:

Unresectable locally advanced

Metastatic

AND

3 - Disease has presence of a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangement as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [A]

AND

4 - Patient has been previously treated (e.g., chemotherapy)

Product Name:Pemazyre

Diagnosis	Myeloid/Lymphoid Neoplasms
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PEMAZYRE	PEMIGATINIB TAB 4.5 MG	21532260000320	Brand
PEMAZYRE	PEMIGATINIB TAB 9 MG	21532260000330	Brand
PEMAZYRE	PEMIGATINIB TAB 13.5 MG	21532260000340	Brand

Approval Criteria

1 - Diagnosis of Myeloid/Lymphoid Neoplasms (MLNs)

AND

2 - Disease is relapsed or refractory

AND

3 - Disease has presence of fibroblast growth factor receptor 1 (FGFR1) rearrangement [B]

Product Name:Pemazyre	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PEMAZYRE	PEMIGATINIB TAB 4.5 MG	21532260000320	Brand
PEMAZYRE	PEMIGATINIB TAB 9 MG	21532260000330	Brand
PEMAZYRE	PEMIGATINIB TAB 13.5 MG	21532260000340	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Pemazyre	
Diagnosis	Cholangiocarcinoma
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
PEMAZYRE	PEMIGATINIB TAB 4.5 MG	21532260000320	Brand
PEMAZYRE	PEMIGATINIB TAB 9 MG	21532260000330	Brand
PEMAZYRE	PEMIGATINIB TAB 13.5 MG	21532260000340	Brand

Approval Criteria

1 - Diagnosis of cholangiocarcinoma

AND

2 - Disease is one of the following:

Unresectable locally advanced

Metastatic

AND

3 - Submission of medical records (e.g., chart notes) confirming disease has presence of a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangement as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [A]

AND

4 - Patient has been previously treated (e.g., chemotherapy)

Product Name:Pemazyre	
Diagnosis	Myeloid/Lymphoid Neoplasms
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
PEMAZYRE	PEMIGATINIB TAB 4.5 MG	21532260000320	Brand
PEMAZYRE	PEMIGATINIB TAB 9 MG	21532260000330	Brand
PEMAZYRE	PEMIGATINIB TAB 13.5 MG	21532260000340	Brand

Approval Criteria

1 - Diagnosis of Myeloid/Lymphoid Neoplasms (MLNs)

AND

2 - Disease is relapsed or refractory

AND

3 - Submission of medical records (e.g., chart notes) confirming disease has presence of fibroblast growth factor receptor 1 (FGFR1) rearrangement [B]

3 . Endnotes

Per consultant feedback, rearrangement's are specific to FGFR2.

An FDA-approved test for detection of FGFR1 rearrangement in patients with relapsed or refractory myeloid/lymphoid neoplasm for selecting patients for treatment with Pemazyre is not available. However, MLNs with FGFR1 rearrangement can be confirmed with cytogenetic evaluation. [1]

Prior Authorization Guideline

Guideline ID	GL-228513
Guideline Name	Phosphate Binders
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fosrenol (lanthanum carbonate)
Hyperphosphatemia Indicated to reduce serum phosphate in patients with end-stage renal disease (ESRD).
Drug Name: Phoslyra (calcium acetate)
Hyperphosphatemia Indicated as an adjunct to reduction in dietary intake of phosphate and dialysis to reduce serum phosphorus in patients with kidney failure on dialysis.
Drug Name: Velphoro (sucroferric oxyhydroxide)
Hyperphosphatemia Indicated for the control of serum phosphorus levels in adult and pediatric patients 9 years of age and older with chronic kidney disease on dialysis.

2 . Criteria

Product Name:Velphoro	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
VELPHORO	SUCROFERRIC OXYHYDROXIDE CHEW TAB 500 MG	52800080100520	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of hyperphosphatemia in chronic kidney disease on dialysis

AND

1.2 One of the following:

1.2.1 Trial and failure of a minimum 30-day supply, contraindication, or intolerance to two of the following:

calcium carbonate

calcium acetate

lanthanum carbonate

sevelamer carbonate

sevelamer HCl

Auryxia

OR

1.2.2 Patient is younger than or equal to 12 years of age

Product Name:Brand Fosrenol, Phoslyra	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
FOSRENOL	LANTHANUM CARBONATE CHEW TAB 500 MG (ELEMENTAL)	52800045200540	Brand

Piqray (alpelisib)

Prior Authorization Guideline

Guideline ID	GL-228931
Guideline Name	Piqray (alpelisib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Piqray (alpelisib)
Advanced or Metastatic Breast Cancer Indicated in combination with fulvestrant for the treatment of adults with hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative, PIK3CA-mutated, advanced or metastatic breast cancer as detected by an FDA-approved test following progression on or after an endocrine-based regimen.

2 . Criteria

Product Name:Piqray	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PIQRAY 200MG DAILY DOSE	ALPELISIB TAB THERAPY PACK 200 MG DAILY DOSE	2153801000B720	Brand
PIQRAY 250MG DAILY DOSE	ALPELISIB TAB PACK 250 MG DAILY DOSE (200 MG & 50 MG TABS)	2153801000B725	Brand
PIQRAY 300MG DAILY DOSE	ALPELISIB TAB PACK 300 MG DAILY DOSE (2X150 MG TAB)	2153801000B730	Brand

Approval Criteria

1 - Diagnosis of advanced or metastatic breast cancer

AND

2 - Disease is hormone receptor (HR)-positive

AND

3 - Disease is human epidermal growth factor receptor 2 (HER2)-negative

AND

4 - Cancer is PIK3CA-mutated as detected by an FDA-approved test (therascreen PIK3CA RGQ PCR Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Used in combination with fulvestrant

AND

6 - Disease has progressed on or after an endocrine-based regimen

Product Name:Piqray	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PIQRAY 200MG DAILY DOSE	ALPELISIB TAB THERAPY PACK 200 MG DAILY DOSE	2153801000B720	Brand
PIQRAY 250MG DAILY DOSE	ALPELISIB TAB PACK 250 MG DAILY DOSE (200 MG & 50 MG TABS)	2153801000B725	Brand
PIQRAY 300MG DAILY DOSE	ALPELISIB TAB PACK 300 MG DAILY DOSE (2X150 MG TAB)	2153801000B730	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Pomalyst (pomalidomide)

Prior Authorization Guideline

Guideline ID	GL-228930
Guideline Name	Pomalyst (pomalidomide)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Pomalyst (pomalidomide)
Multiple myeloma Indicated, in combination with dexamethasone, for patients with multiple myeloma who have received at least two prior therapies including lenalidomide and a proteasome inhibitor and have demonstrated disease progression on or within 60 days of completion of the last therapy. **Kaposi Sarcoma** Indicated for the treatment of: 1) Adult patients with AIDS-related Kaposi sarcoma (KS) after failure of highly active antiretroviral therapy (HAART). 2) Kaposi sarcoma (KS) in adult patients who are HIV-negative. Note: this indication is approved under accelerated approval based on overall response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Pomalyst	
Diagnosis	Multiple Myeloma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
POMALYST	POMALIDOMIDE CAP 1 MG	21450080000110	Brand
POMALYST	POMALIDOMIDE CAP 2 MG	21450080000115	Brand
POMALYST	POMALIDOMIDE CAP 3 MG	21450080000120	Brand
POMALYST	POMALIDOMIDE CAP 4 MG	21450080000125	Brand

Approval Criteria

1 - Diagnosis of multiple myeloma

Product Name:Pomalyst	
Diagnosis	Kaposi Sarcoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
POMALYST	POMALIDOMIDE CAP 1 MG	21450080000110	Brand
POMALYST	POMALIDOMIDE CAP 2 MG	21450080000115	Brand
POMALYST	POMALIDOMIDE CAP 3 MG	21450080000120	Brand
POMALYST	POMALIDOMIDE CAP 4 MG	21450080000125	Brand

Approval Criteria

1 - One of the following:

1.1 Diagnosis of AIDS-related Kaposi sarcoma

OR

1.2 Both of the following:

1.2.1 Diagnosis of Kaposi sarcoma

AND

1.2.2 Patient is HIV-negative

Product Name:Pomalyst	
Diagnosis	All Indications
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
POMALYST	POMALIDOMIDE CAP 1 MG	21450080000110	Brand
POMALYST	POMALIDOMIDE CAP 2 MG	21450080000115	Brand
POMALYST	POMALIDOMIDE CAP 3 MG	21450080000120	Brand
POMALYST	POMALIDOMIDE CAP 4 MG	21450080000125	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228707
Guideline Name	Pombiliti (cipaglucosidase alfa-atga)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Pombiliti (cipaglucosidase alfa-atga)
Late-Onset Pompe disease Indicated, in combination with Opfolda, an enzyme stabilizer, for the treatment of adult patients with late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) weighing ≥40 kg and who are not improving on their current enzyme replacement therapy (ERT).

2 . Criteria

Product Name:Pombiliti	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
POMBILITI	CIPAGLUCOSIDASE ALFA-ATGA FOR IV SOLN 105 MG	30907730052120	Brand

Approval Criteria

1 - Diagnosis of late-onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency)

AND

2 - Disease is confirmed by one of the following: [2, 4-5]

Absence or deficiency (less than 40% of the lab specific normal mean) of GAA enzyme activity in lymphocytes, fibroblasts, or muscle tissues as confirmed by an enzymatic assay

Molecular genetic testing confirms mutations in the GAA gene

AND

3 - Presence of clinical signs and symptoms of the disease (e.g., respiratory distress, skeletal muscle weakness, etc.) [A]

AND

4 - Medication is used in combination with Opfolda (miglustat)

AND

5 - Patient weight is greater than or equal to 40 kg

AND

6 - Trial and inadequate response to one of the following:

Lumizyme

Nexviazyme

AND

7 - Not to be used in combination with other miglustat products (i.e., Zavesca, Yargesa)

Product Name:Pombiliti	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
POMBILITI	CIPAGLUCOSIDASE ALFA-ATGA FOR IV SOLN 105 MG	30907730052120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in FVC, improvement in 6-minute walk distance [6MWD])

AND

2 - Medication is used in combination with Opfolda (miglustat)

AND

3 - Not to be used in combination with other miglustat products (i.e., Zavesca, Yargesa)

3 . Endnotes

Consensus recommendation based on current clinical guidelines indicate that treatment should be started in patients with late onset Pompe disease when they become symptomatic and/or show signs of disease progression [2, 4-5].

Prior Authorization Guideline

Guideline ID	GL-229145
Guideline Name	Prior Authorization Administrative Guideline
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/15/2011
P&T Revision Date:	10/16/2024

Note:

The purpose of this guideline is to establish policies and procedures on how to handle (1) formulary drugs with a prior authorization requirement that do not have official criteria posted or available, and (2) new FDA-approved indications, which are not addressed in the existing drug-specific prior authorization guideline. This guideline will not apply to drugs that are benefit exclusions, drugs with step therapy edits, drugs that require quantity limit review only, non-formulary drugs, or drugs that are not reviewed for prior authorization by OptumRx.

1 . Criteria

Product Name:Drugs with a prior authorization requirement for which a guideline is unavailable, OR new FDA-approved indications which are not addressed in the existing drug-specific prior authorization guideline	
Approval Length	12 month(s)

Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Prior Authorization			
Administrative			
Admin			
albenza			
albendazole			

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.2 Both of the following:

1.1.2.1 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.1.2.2 Requested drug will be used at a dose which is within FDA recommendations

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

Notes	This guideline should not be used to address step therapy.

2 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228515
Guideline Name	Procysbi (cysteamine bitartrate)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Procysbi (cysteamine bitartrate)
Nephropathic cystinosis Indicated for the treatment of nephropathic cystinosis in adults and pediatric patients 1 year of age and older.

2 . Criteria

Product Name:Procysbi Capsules, Procysbi Granules	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROCYSBI	CYSTEAMINE BITARTRATE DELAYED RELEASE GRANULES PACKET 75 MG	56400030103020	Brand
PROCYSBI	CYSTEAMINE BITARTRATE DELAYED RELEASE GRANULES PACKET 300 MG	56400030103040	Brand
PROCYSBI	CYSTEAMINE BITARTRATE CAP DELAYED RELEASE 25 MG (BASE EQUIV)	56400030106520	Brand
PROCYSBI	CYSTEAMINE BITARTRATE CAP DELAYED RELEASE 75 MG (BASE EQUIV)	56400030106530	Brand

Approval Criteria

1 - Diagnosis of nephropathic cystinosis

AND

2 - One of the following [A, 2, 3]:

2.1 Diagnosis is confirmed by elevated leukocyte cystine levels (LCL)

OR

2.2 Diagnosis is confirmed by genetic analysis of the CTNS gene

OR

2.3 Diagnosis is confirmed by demonstration of cysteine corneal crystals by slit lamp examination

AND

3 - Trial and failure or intolerance to Cystagon (immediate-release cysteamine bitartrate)

AND

4 - Patient is 1 year of age or older

Product Name:Procysbi Capsules, Procysbi Granules	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROCYSBI	CYSTEAMINE BITARTRATE DELAYED RELEASE GRANULES PACKET 75 MG	56400030103020	Brand
PROCYSBI	CYSTEAMINE BITARTRATE DELAYED RELEASE GRANULES PACKET 300 MG	56400030103040	Brand
PROCYSBI	CYSTEAMINE BITARTRATE CAP DELAYED RELEASE 25 MG (BASE EQUIV)	56400030106520	Brand
PROCYSBI	CYSTEAMINE BITARTRATE CAP DELAYED RELEASE 75 MG (BASE EQUIV)	56400030106530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decrease in cystine levels in white blood cells)

3 . Endnotes

A definitive diagnosis can be verified by measuring leukocyte cystine levels, genetic analysis of the CTNS gene or demonstration of corneal crystals by slit lamp examination. [2-3]

Prior Authorization Guideline

Guideline ID	GL-228934
Guideline Name	Prolia (denosumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Prolia (denosumab)
Treatment of postmenopausal women with osteoporosis at high risk for fracture Indicated for the treatment of postmenopausal women with osteoporosis at high risk for fracture, defined as a history of osteoporotic fracture, or multiple risk factors for fracture; or patients who have failed or are intolerant to other available osteoporosis therapy. In postmenopausal women with osteoporosis, Prolia reduces the incidence of vertebral, nonvertebral, and hip fractures. **Treatment to increase bone mass in men with osteoporosis at high risk for fracture** Indicated for treatment to increase bone mass in men with osteoporosis at high risk for fracture, defined as a history of osteoporotic fracture, or multiple risk factors for fracture; or patients who have failed or are intolerant to other available osteoporosis therapy. **Treatment of bone loss in men receiving androgen deprivation therapy for nonmetastatic prostate cancer [A]** Indicated as a treatment to increase bone mass in men at high risk for fracture receiving androgen deprivation therapy for nonmetastatic prostate cancer. In these patients Prolia also reduced the incidence of vertebral fractures. NOTE: The use of Prolia for the treatment of bone loss in men receiving androgen deprivation therapy for nonmetastatic prostate cancer should not be confused with the use of Xgeva (another

injectable formulation of denosumab) for the prevention of skeletal-related events (SREs) in patients with bone metastases from solid tumors (including breast cancer and prostate cancer).

Treatment of bone loss in women receiving adjuvant aromatase inhibitor therapy for breast cancer [B] Indicated as a treatment to increase bone mass in women at high risk for fracture receiving adjuvant aromatase inhibitor therapy for breast cancer. NOTE: The use of Prolia for the treatment of bone loss in women receiving adjuvant aromatase inhibitor therapy for breast cancer should not be confused with the use of Xgeva (another injectable formulation of denosumab) for the prevention of skeletal-related events (SREs) in patients with bone metastases from solid tumors (including breast cancer and prostate cancer).

Treatment of Glucocorticoid-Induced Osteoporosis Indicated for the treatment of glucocorticoid-induced osteoporosis in men and women at high risk of fracture who are either initiating or continuing systemic glucocorticoids in a daily dosage equivalent to 7.5 mg or greater of prednisone and expected to remain on glucocorticoids for at least 6 months. High risk of fracture is defined as a history of osteoporotic fracture, multiple risk factors for fracture, or patients who have failed or are intolerant to other available osteoporosis therapy.

2 . Criteria

Product Name:Prolia	
Diagnosis	Bone loss in men receiving androgen deprivation therapy for nonmetastatic prostate cancer
Approval Length	12 months [D]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Diagnosis of nonmetastatic prostate cancer

AND

2 - Patient is undergoing androgen deprivation therapy with one of the following: [11,A]

2.1 Luteinizing hormone-releasing hormone (LHRH)/gonadotropin releasing hormone (GnRH) agonist [e.g., Eligard/Lupron (leuprolide), Trelstar (triptorelin), Vantas (histrelin), and Zoladex (goserelin)]

OR

2.2 Bilateral orchiectomy (i.e., surgical castration)

AND

3 - One of the following:

3.1 Age greater than or equal to 70 years [11,C]

OR

3.2 Both of the following:

3.2.1 Age less than 70 years [11]

AND

3.2.2 One of the following:

3.2.2.1 Bone mineral density (BMD) scan T-score less than -1.0 (1.0 standard deviation or greater below the mean for young adults) [11]

OR

3.2.2.2 History of one of the following resulting from minimal trauma: [9,11]

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

AND

4 - Trial and failure, intolerance, or contraindication to one bisphosphonate (e.g., zoledronic acid) [19]

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Bone loss in men receiving androgen deprivation therapy for nonmetastatic prostate cancer
Approval Length	12 months [D]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Patient is undergoing androgen deprivation therapy with one of the following: [11,A]

1.1 Luteinizing hormone-releasing hormone (LHRH)/gonadotropin releasing hormone (GnRH) agonist [e.g., Eligard/Lupron (leuprolide), Trelstar (triptorelin), Vantas (histrelin), and Zoladex (goserelin)]

OR

1.2 Bilateral orchiectomy (i.e., surgical castration)

AND

2 - No evidence of metastases

AND

3 - Patient demonstrates positive clinical response to therapy (e.g., improved or stabilized BMD, no new fractures, improved biochemical markers, etc.)

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Bone loss in women receiving adjuvant aromatase inhibitor therapy for breast cancer
Approval Length	12 months [D]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Diagnosis of breast cancer

AND

2 - Patient is receiving adjuvant aromatase inhibitor therapy (e.g., Arimidex [anastrozole], Aromasin [exemestane], Femara [letrozole]) [12,B]

AND

3 - One of the following:

3.1 Bone mineral density (BMD) scan T-score less than -1.0 (1.0 standard deviation or greater below the mean for young adults) [12,E]

OR

3.2 History of one of the following resulting from minimal trauma: [9]

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

AND

4 - Trial and failure, intolerance, or contraindication to one bisphosphonate (e.g., alendronate) [20]

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Bone loss in women receiving adjuvant aromatase inhibitor therapy for breast cancer
Approval Length	12 months [D]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Patient is receiving adjuvant aromatase inhibitor therapy (e.g., Arimidex [anastrozole], Aromasin [exemestane], Femara [letrozole]) [12]

AND

2 - Patient demonstrates positive clinical response to therapy (e.g., improved or stabilized BMD, no new fractures, improved biochemical markers, etc.)

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Postmenopausal women with osteoporosis or osteopenia at a high risk for fracture
Approval Length	24 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	30044530000E520	Brand

Approval Criteria

1 - Diagnosis of postmenopausal osteoporosis or osteopenia [2,5]

AND

2 - One of the following: [5,17]

2.1 Bone mineral density (BMD) scan indicative of osteoporosis: T-score less than or equal to -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

OR

2.2 Both of the following:

2.2.1 BMD scan indicative of osteopenia: T-score between -1.0 and -2.5 (BMD T-score greater than -2.5 and less than or equal to -1.0) in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.2.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities:

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

OR

2.3 History of one of the following resulting from minimal trauma:

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

AND

3 - Trial and failure, intolerance, or contraindication to one bisphosphonate (e.g., alendronate)

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Postmenopausal women with osteoporosis or osteopenia at a high risk for fracture
Approval Length	24 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improved or stabilized BMD, no new fractures, improved biochemical markers, etc.) without significant adverse effects

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Increase bone mass in men at high risk for fracture
Approval Length	24 month(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Patient is a male with osteoporosis or osteopenia

AND

2 - One of the following: [16,17]

2.1 Bone mineral density (BMD) scan indicative of osteoporosis: T-score less than or equal to -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

OR

2.2 Both of the following:

2.2.1 BMD scan indicative of osteopenia: T-score between -1.0 and -2.5 (BMD T-score greater than -2.5 and less than or equal to -1.0) in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.2.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities:

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

OR

2.3 History of one of the following resulting from minimal trauma:

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

AND

3 - Trial and failure, intolerance, or contraindication to one bisphosphonate (e.g., alendronate)

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improved or stabilized BMD, no new fractures, improved biochemical markers, etc.) without significant adverse effects

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Glucocorticoid-induced osteoporosis at high risk for fracture
Approval Length	24 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Diagnosis of glucocorticoid-induced osteoporosis

AND

2 - Patient is initiating or continuing on greater than or equal to 7.5 mg/day of prednisone (or its equivalent) and is expected to remain on glucocorticoid therapy for at least 6 months

AND

3 - One of the following: [F]

3.1 BMD T-score less than or equal to -2.5 based on BMD measurements from lumbar spine, femoral neck, total hip, or radius (one-third radius site)

OR

3.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities:

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

OR

3.3 History of one of the following fractures resulting from minimal trauma:

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

OR

3.4 One of the following:

Glucocorticoid dosing of at least 30 mg per day

Cumulative glucocorticoid dosing of at least 5 grams per year

AND

4 - Trial and failure, contraindication, or intolerance to one bisphosphonate (e.g., alendronate) [G]

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Prolia	
Diagnosis	Glucocorticoid-induced osteoporosis at high risk for fracture
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROLIA	DENOSUMAB INJ SOLN PREFILLED SYRINGE 60 MG/ML	3004453000E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improved or stabilized BMD, no new fractures, improved biochemical markers, etc.) without significant adverse effects

Notes	If patient meets criteria above, please approve at GPI-12.

3 . Definitions

Definition	Description
Bone mineral density (BMD) [3]	A risk factor for fractures. By DXA, BMD is expressed as the amount of mineralized tissue in the area scanned (g/cm2); with QCT, BMD is expressed as the amount per volume of bone (mg/cm3). Hip BMD

	by DXA is considered the best predictor of hip fracture; it appears to predict other types of fractures as well as measurements made at other skeletal sites. Lumbar spine BMD may be preferable to assess changes early in menopause and after bilateral ovariectomy and may be better than hip BMD in predicting risk of spine fractures especially in women in their 50s and 60s.
Dual x-ray absorptiometry (DXA) [3]	A diagnostic test used to assess bone density at various skeletal sites using radiation exposure about one-tenth that of a standard chest X-ray. Central DXA (lumbar spine, hip) is the preferred measurement for definitive diagnosis of osteoporosis and for monitoring the effects of therapy.
Fracture [3]	Breakage of a bone, either complete or incomplete whether from trauma, repetitive stress, or bone insufficiency. Osteoporosis can contribute to any fracture at any skeletal site, but overwhelmingly affects sites that predominate in trabecular bone: femoral neck, total hip, spine, and forearm. Fractures in cortical bone dense sites are less likely to be attributed to osteoporosis, such as fingers, toes, skull, and face. Vertebral compression fractures are the most common type of osteoporotic fracture.
Osteopenia [3]	The designation for bone density between 1.0 and 2.5 standard deviations below the mean BMD of a young adult reference population (T-score between − 1.0 and − 2.5).
Osteoporosis [3]	A chronic, progressive disease characterized by low bone mass, microarchitectural deterioration of bone tissue, decreased bone strength, bone fragility, and a consequent increase in fracture risk; BMD 2.5 or more standard deviations below the mean BMD of a young adult reference population (T-score at or below − 2.5).
Peripheral DXA [3]	A DXA test used to assess bone density in the forearm, finger, and heel.
Quantitative computed tomography (QCT) [3]	A diagnostic test used to assess volumetric bone density; reflects three-dimensional BMD. Usually used to assess the lumbar spine but has been adapted for other skeletal sites (e.g., hip). It is also possible to measure trabecular and cortical bone density in the periphery by peripheral QCT (pQCT) or high-resolution pQCT (HRpQCT).
Quantitative ultrasound densitometry (QUS) [3]	A diagnostic test used to assess bone density at the calcaneus or tibia. Ultrasound measurements correlate only modestly with other assessments of bone density in the same patient, yet some

	prospective studies indicate that ultrasound may predict fractures as effectively as other measures of bone density.
Remodeling [3]	Also called bone turnover, remodeling is the process by which the skeleton repairs damage and maintains serum calcium levels through the ongoing lifelong dual processes of bone resorption (breakdown) and formation
Resorption [3]	The breakdown and removal of bone tissue during bone remodeling.
Risk factors [3]	For osteoporotic fractures, risk factors include low BMD, parental history of hip fracture, low body weight, previous fracture, smoking, excess alcohol intake, glucocorticoid use, secondary causes of osteoporosis (e.g., rheumatoid arthritis), and history of falls. These readily accessible and commonplace factors are associated with the risk of hip fracture and, in most cases, with that of vertebral and other types of fracture as well.
Severe or “established” osteoporosis [3]	Osteoporosis characterized by bone density that is 2.5 standard deviations or more below the young normal mean (T-score at or below -2.5), accompanied by the occurrence of at least one fragility-related fracture.
T-score [3]	In describing BMD, the number of standard deviations above or below the mean BMD of a young adult reference population.
Z-score [3]	In describing BMD, the number of standard deviations above or below the mean BMD for persons of the same age, sex, and ethnicity.

4 . Endnotes

Androgen deprivation therapy (ADT) is commonly used in the treatment of prostate cancer. ADT can be accomplished using luteinizing hormone-releasing hormone (LHRH) agonists (medical castration), also known as gonadotropin releasing hormone (GnRH) agonists, or bilateral orchiectomy (surgical castration), which are equally effective. [13] Examples of LHRH agonists include Eligard/Lupron (leuprolide), Trelstar (triptorelin), Vantas (histrelin), and Zoladex (goserelin).

Aromatase inhibitors (AIs) include selective, nonsteroidal AIs (Arimidex [anastrozole] and Femara [letrozole]) and steroidal AIs (Aromasin [exemestane]).

Meta-analyses have shown that advancing age increases fracture risk beyond that predicted by age related loss of BMD. Although typical changes in BMD would predict a 4-fold increase in fracture risk from ages 50 to 90 years, fracture risk actually increases 30-

fold. Estimated fracture rates using FRAX calculations reflect a strong influence of older age on risk for clinical fracture. When clinical factors were used without BMD in one cross-sectional study, FRAX estimated that 76.6% of men in their 70s and virtually all men 80 years old or older exceeded the NOF recommended risk threshold for drug therapy. [14]

Most men run a 2-year course of androgen deprivation therapy while most women receive treatment with aromatase inhibitors for about 5 years. A one year treatment authorization is reasonable. [15]

Owing to the rate of bone loss associated with breast cancer treatments (i.e., aromatase inhibitors), and uncertainties about the interaction between aromatase inhibitor use and BMD for fracture risk, the threshold for intervention has been set at a higher level than that generally recommended for postmenopausal osteoporosis. [8]

According to the American College of Rheumatology (ACR) guidelines for the prevention and treatment of glucocorticoid-induced osteoperosis, patients considered at high risk of fractures are as follows: (a) prior osteoporotic fracture, (b) a hip or spine BMD T-score less than or equal to -2.5, or (c) FRAX 10-year risk of hip or major osteoporotic fracture at 3 percent or more and 20 percent or more, respectively. [18]

According to ACR, oral bisphosphonates are considered first-line for patients with glucocorticod-induced osteoperosis at high risk for fractures. For patients in whom oral bisphosphonates are not appropriate, IV bisphosphonates should be considered. [18]

6 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228937
Guideline Name	Promacta (eltrombopag)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Promacta (eltrombopag)
Treatment of Thrombocytopenia in Patients with Persistent or Chronic Idiopathic Thrombocytopenic Purpura (ITP) Indicated for the treatment of thrombocytopenia in adult and pediatric patients 1 year and older with persistent or chronic immune (idiopathic) thrombocytopenia (ITP) who have had an insufficient response to corticosteroids, immunoglobulins, or splenectomy. Promacta should be used only in patients with ITP whose degree of thrombocytopenia and clinical condition increase the risk for bleeding. **Treatment of Thrombocytopenia in Patients with Hepatitis C Infection** Indicated for the treatment of thrombocytopenia in patients with chronic hepatitis C to allow the initiation and maintenance of interferon-based therapy. Promacta should be used only in patients with chronic hepatitis C whose degree of thrombocytopenia prevents the initiation of interferon-based therapy or limits the ability to maintain interferon-based therapy. Limitations of use: • Safety and efficacy have not been established in combination with direct-acting antiviral agents used without interferon for treatment of chronic hepatitis C infection. **Treatment of Severe Aplastic Anemia** Indicated in combination with standard immunosuppressive therapy for the first-line treatment of adult and pediatric patients 2 years

and older with severe aplastic anemia. Indicated for the treatment of patients with severe aplastic anemia who have had an insufficient response to immunosuppressive therapy.

2 . Criteria

Product Name:Promacta	
Diagnosis	Persistent or Chronic Idiopathic Thrombocytopenic Purpura (ITP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROMACTA	ELTROMBOPAG OLAMINE TAB 12.5 MG (BASE EQUIV)	82405030100310	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 25 MG (BASE EQUIV)	82405030100320	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 50 MG (BASE EQUIV)	82405030100330	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 75 MG (BASE EQUIV)	82405030100340	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 12.5 MG (BASE EQ)	82405030103030	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQ)	82405030103020	

Approval Criteria

1 - Diagnosis of one of the following:

Persistent ITP

Chronic ITP

Relapsed/refractory ITP [8]

AND

2 - Baseline platelet count is less than 30,000/mcL [2, 3, 8]

AND

3 - Trial and failure, contraindication, or intolerance to one of the following: [2, 3, 8]

Corticosteroids

Immunoglobulins

Splenectomy

AND

4 - Patient's degree of thrombocytopenia and clinical condition increase the risk of bleeding

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Promacta	
Diagnosis	Persistent or Chronic Idiopathic Thrombocytopenic Purpura (ITP)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROMACTA	ELTROMBOPAG OLAMINE TAB 12.5 MG (BASE EQUIV)	82405030100310	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 25 MG (BASE EQUIV)	82405030100320	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 50 MG (BASE EQUIV)	82405030100330	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 75 MG (BASE EQUIV)	82405030100340	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 12.5 MG (BASE EQ)	82405030103030	Brand

PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQ)	82405030103020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to Promacta therapy as evidenced by an increase in platelet count to a level sufficient to avoid clinically important bleeding

Product Name:Promacta	
Diagnosis	First-Line for Severe Aplastic Anemia
Approval Length	6 Months [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROMACTA	ELTROMBOPAG OLAMINE TAB 12.5 MG (BASE EQUIV)	82405030100310	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 25 MG (BASE EQUIV)	82405030100320	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 50 MG (BASE EQUIV)	82405030100330	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 75 MG (BASE EQUIV)	82405030100340	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 12.5 MG (BASE EQ)	82405030103030	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQ)	82405030103020	Brand

Approval Criteria

1 - Diagnosis of severe aplastic anemia

AND

2 - Used for first-line treatment (i.e., patient has not received prior immunosuppressive therapy with any equine antithymocyte globulin plus cyclosporine, alemtuzumab, or high dose cyclophosphamide) [1]

AND

3 - Patient meets at least TWO of the following [9, 10]:

Absolute neutrophil count < 500/mcL

Platelet count < 20,000/mcL

Absolute reticulocyte count < 60,000/mcL

AND

4 - Used in combination with standard immunosuppressive therapy (e.g., Atgam [antithymocyte globulin equine] and cyclosporine) [1]

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Promacta	
Diagnosis	Refractory Severe Aplastic Anemia
Approval Length	16 weeks [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROMACTA	ELTROMBOPAG OLAMINE TAB 12.5 MG (BASE EQUIV)	82405030100310	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 25 MG (BASE EQUIV)	82405030100320	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 50 MG (BASE EQUIV)	82405030100330	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 75 MG (BASE EQUIV)	82405030100340	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 12.5 MG (BASE EQ)	82405030103030	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQ)	82405030103020	Brand

Approval Criteria

1 - Diagnosis of refractory severe aplastic anemia

AND

2 - Trial and failure, contraindication, or intolerance to immunosuppressive therapy with antithymocyte globulin (ATG) and cyclosporine [5-7]

AND

3 - Patient has thrombocytopenia defined as platelet count less than 30,000/mcL

AND

4 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Promacta	
Diagnosis	Refractory Severe Aplastic Anemia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 12.5 MG (BASE EQ)	82405030103030	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQ)	82405030103020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C-associated thrombocytopenia

AND

2 - One of the following:

2.1 Planning to initiate and maintain interferon-based treatment [1]

OR

2.2 Currently receiving interferon-based treatment

AND

3 - Prescribed by or in consultation with one of the following:

Hematologist/oncologist

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

Product Name:Promacta	
Diagnosis	Chronic Hepatitis C-Associated Thrombocytopenia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PROMACTA	ELTROMBOPAG OLAMINE TAB 12.5 MG (BASE EQUIV)	82405030100310	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 25 MG (BASE EQUIV)	82405030100320	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 50 MG (BASE EQUIV)	82405030100330	Brand
PROMACTA	ELTROMBOPAG OLAMINE TAB 75 MG (BASE EQUIV)	82405030100340	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 12.5 MG (BASE EQ)	82405030103030	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQ)	82405030103020	Brand
PROMACTA	ELTROMBOPAG OLAMINE POWDER PACK FOR SUSP 25 MG (BASE EQUIV)	82405030103020	Brand

Approval Criteria

1 - One of the following:

1.1 For patients that started treatment with Promacta prior to initiation of treatment with interferon, Promacta will be approved when both of the following criteria are met:

1.1.1 Currently on antiviral interferon therapy for treatment of chronic hepatitis C [1]

AND

1.1.2 Documentation that the patient reached a threshold platelet count that allows initiation of antiviral interferon therapy with Promacta treatment by week 9 [C]

OR

1.2 For patients that started treatment with Promacta while on concomitant treatment with interferon, Promacta will be approved based on the following criterion:

1.2.1 Currently on antiviral interferon therapy for treatment of chronic hepatitis C

3 . Endnotes

The prescribing information states that the total duration of Promacta treatment for first-line severe aplastic anemia is 6 months. [1]

In patients with severe aplastic anemia, hematologic response requires dose titration, generally up to 150 mg, and may take up to 16 weeks after starting Promacta. The dose should be adjusted every 2 weeks as necessary to achieve the target platelet count greater than or equal to 50 x 10^9/L. If no hematologic response has occurred after 16 weeks of therapy with Promacta, therapy should be discontinued. [1]

Promacta was studied in two phase 3 trials for chronic hepatitis C-associated thrombocytopenia in two periods. Patients received Promacta in the first period for a maximum of 9 weeks in order to achieve a pre-specified threshold platelet count (greater than or equal to 90 x 10^9/L for Trial 1 and greater than or equal to 100 x 10^9/L for Trial 2); if the pre-specified threshold platelet count was reached, initiation of antiviral therapy in combination with interferon and ribavirin was administered for up to 48 weeks in the second period. The lowest dose of Promacta should be used to achieve and maintain a platelet count necessary to initiate and maintain interferon-based therapy. Dose adjustments are based upon the platelet count response. [1]

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233320
Guideline Name	Proton Pump Inhibitors
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/17/2025

1 . Indications

Drug Name: Aciphex (rabeprazole)
Healing of Erosive or Ulcerative GERD in Adults Indicated for short-term (4 to 8 weeks) treatment in the healing and symptomatic relief of erosive or ulcerative GERD. For those patients who have not healed after 8 weeks of treatment, an additional 8-week course of Aciphex may be considered. **Maintenance of Healing of Erosive or Ulcerative GERD in Adults** Indicated for maintaining healing and reduction in relapse rates of heartburn symptoms in patients with erosive or ulcerative gastroesophageal reflux disease (GERD Maintenance). Controlled studies do not extend beyond 12 months. **Treatment of Symptomatic Gastroesophageal Reflux Disease (GERD) in Adults** Indicated for the treatment of daytime and nighttime heartburn and other symptoms associated with GERD in adults for up to 4 weeks. **Healing of Duodenal Ulcers in Adults** Indicated for short-term (up to 4 weeks) treatment in the healing and symptomatic relief of duodenal ulcers. Most patients heal within 4 weeks. **Helicobacter pylori Eradication to Reduce the Risk of Duodenal Ulcer Recurrence in**

Adults In combination with amoxicillin and clarithromycin as a three drug regimen, indicated for the treatment of patients with H. pylori infection and duodenal ulcer disease (active or history within the past 5 years) to eradicate H. pylori. Eradication of H. pylori has been shown to reduce the risk of duodenal ulcer recurrence. In patients who fail therapy, susceptibility testing should be done. If resistance to clarithromycin is demonstrated or susceptibility testing is not possible, alternative antimicrobial therapy should be instituted.

Pathological Hypersecretory Conditions including Zollinger-Ellison Syndrome in Adults Indicated for the long-term treatment of pathological hypersecretory conditions, including Zollinger-Ellison syndrome.

Short-term Treatment of Symptomatic GERD in Adolescent Patients 12 years of Age and Older Indicated for the treatment of symptomatic GERD in adolescents 12 years of age and above for up to 8 weeks.

Drug Name: Aciphex Sprinkle (rabeprazole)

Patients 1 to 11 Years of Age Indicated for treatment of GERD in pediatric patients 1 to 11 years of age for up to 12 weeks.

Drug Name: Dexilant (dexlansoprazole)

Healing of Erosive Esophagitis Indicated in patients 12 years of age and older for healing of all grades of erosive esophagitis for up to 8 weeks.

Maintenance of Healed Erosive Esophagitis Indicated in patients 12 years of age and older to maintain healing of erosive esophagitis and relief of heartburn for up to six months in adults and 16 weeks in patients 12 to 17 years of age.

Symptomatic Non-Erosive GERD Indicated in patients 12 years of age and older for the treatment of heartburn associated with symptomatic non-erosive GERD for 4 weeks.

Drug Name: Konvomep (omeprazole and sodium bicarbonate)

Gastric Ulcer Indicated for the short-term treatment (4 to 8 weeks) of active benign gastric ulcer in adults.

Reduction of Risk of Upper Gastrointestinal Bleeding in Critically Ill Patients Indicated for the reduction of risk of upper gastrointestinal (GI) bleeding in critically ill adult patients.

Drug Name: Nexium (esomeprazole)

Healing of Erosive Esophagitis Nexium delayed-release capsules and Nexium delayed-release oral suspension are indicated for the short-term treatment (4 to 8 weeks) in the healing and symptomatic resolution of diagnostically confirmed erosive esophagitis in adults. For those patients who have not healed after 4 to 8 weeks of treatment, an additional 4 to 8 week course of Nexium may be considered. In pediatric patients 1 month to less than 1 year of age, Nexium delayed-release oral suspension is indicated for short-term treatment (up to 6 weeks) of erosive esophagitis due to acid-medicated GERD. In pediatric patients 1 year to 11 years of age, Nexium delayed-release oral suspension is indicated for the short-term

treatment (8 weeks) for the healing of EE. In pediatric patients 12 years to 17 years of age, Nexium delayed-release capsules and Nexium delayed-release oral suspension are indicated for for the short-term treatment (4 to 8 weeks) for the healing of EE.

Maintenance of Healing of Erosive Esophagitis NEXIUM delayed-release capsules and NEXIUM for delayed-release oral suspension are indicated for the maintenance of healing of erosive esophagitis in adults. Controlled studies do not extend beyond 6 months.

Symptomatic GERD NEXIUM delayed-release capsules and NEXIUM for delayed-release oral suspension are indicated for short-term treatment (4 to 8 weeks) of heartburn and other symptoms associated with GERD in adults. NEXIUM delayed-release capsules and NEXIUM for delayed-release oral suspension are indicated for short-term treatment (4 weeks) of heartburn and other symptoms associated with GERD in pediatric patients 12 years to 17 years of age. NEXIUM for delayed-release oral suspension is indicated for short-term treatment (up to 8 weeks) of heartburn and other symptoms associated with GERD in pediatric patients 1 year to 11 years of age.

Risk Reduction of NSAID-Associated Gastric Ulcer NEXIUM delayed-release capsules and NEXIUM for delayed-release oral suspension are indicated for the reduction in the occurrence of gastric ulcers associated with continuous NSAID therapy in adult patients at risk for developing gastric ulcers. Patients are considered to be at risk due to their age (60 years and older) and/or documented history of gastric ulcers. Controlled studies do not extend beyond 6 months.

Helicobacter pylori Eradication to Reduce the Risk of Duodenal Ulcer Recurrence Eradication of H. pylori has been shown to reduce the risk of duodenal ulcer recurrence. Triple therapy: NEXIUM delayed-release capsules or NEXIUM for delayed-release oral suspension in combination with amoxicillin and clarithromycin is indicated for the treatment of adult patients with H. pylori infection and duodenal ulcer disease (active or history of within the past 5 years) to eradicate H. pylori. In patients who fail therapy, susceptibility testing should be done. If resistance to clarithromycin is demonstrated or susceptibility testing is not possible, alternative antimicrobial therapy should be instituted.

Pathological Hypersecretory Conditions including Zollinger-Ellison Syndrome NEXIUM delayed-release capsules and NEXIUM for delayed-release oral suspension are indicated for the long-term treatment of pathological hypersecretory conditions, including Zollinger-Ellison syndrome, in adults.

Drug Name: Prevacid (lansoprazole)

Treatment of Active Duodenal Ulcer Indicated for short-term treatment (for 4 weeks) for healing and symptom relief of active duodenal ulcer in adults.

Eradication of H. pylori to Reduce the Risk of Duodenal Ulcer Recurrence In combination with amoxicillin plus clarithromycin as triple therapy, indicated for the treatment of patients with H. pylori infection and duodenal ulcer disease (active or one-year history of a duodenal ulcer) to eradicate H. pylori. Eradication of H. pylori has been shown to reduce the risk of duodenal ulcer recurrence. In combination with amoxicillin as dual therapy, indicated for the treatment of patients with H. pylori infection and duodenal ulcer disease (active or one-year history of a duodenal ulcer) who are either allergic or intolerant to clarithromycin or in

whom resistance to clarithromycin is known or suspected. Eradication of H. pylori has been shown to reduce the risk of duodenal ulcer recurrence.

Maintenance of Healed Duodenal Ulcers Indicated to maintain healing of duodenal ulcers in adults. Controlled studies do not extend beyond 12 months.

Treatment of Active Benign Gastric Ulcer Indicated for short-term treatment (up to 8 weeks) for healing and symptom relief of active benign gastric ulcer in adults.

Healing of NSAID-Associated Gastric Ulcer Indicated in adults for the treatment of NSAID-associated gastric ulcer in patients who continue NSAID use. Controlled studies did not extend beyond 8 weeks.

Risk Reduction of NSAID-Associated Gastric Ulcer Indicated in adults for reducing the risk of NSAID-associated gastric ulcers in patients with a history of a documented gastric ulcer who require the use of an NSAID. Controlled studies did not extend beyond 12 weeks.

Treatment of Symptomatic GERD Indicated for short-term treatment in adults and pediatric patients 12 to 17 years of age (up to eight weeks) and pediatric patients one to 11 years of age (up to 12 weeks) for the treatment of heartburn and other symptoms associated with GERD.

Treatment of Erosive Esophagitis Indicated for short-term treatment in adults and pediatric patients 12 to 17 years of age (up to eight weeks) and pediatric patients one to 11 years of age (up to 12 weeks) for healing and symptom relief of all grades of erosive esophagitis. For adults who do not heal with Prevacid for 8 weeks (5 to 10%), it may be helpful to give an additional 8 weeks of treatment. If there is a recurrence of erosive esophagitis, an additional 8-week course of Prevacid may be considered.

Maintenance of Healing of Erosive Esophagitis Indicated in adults to maintain healing of EE. Controlled studies did not extend beyond 12 months.

Pathological Hypersecretory Conditions Including Zollinger-Ellison Syndrome Indicated in adults for the long-term treatment of pathological hypersecretory conditions, including Zollinger-Ellison syndrome.

Drug Name: Prilosec (omeprazole)

Treatment of Active Duodenal Ulcer Indicated for short-term treatment of active duodenal ulcer in adults. Most patients heal within four weeks. Some patients may require an additional four weeks of therapy.

Helicobacter pylori Eradication to Reduce the Risk of Duodenal Ulcer Recurrence In combination with clarithromycin and amoxicillin, indicated for treatment of patients with H. pylori infection and duodenal ulcer disease (active or up to 1-year history) to eradicate H. pylori in adults. In combination with clarithromycin, indicated for treatment of patients with H. pylori infection and duodenal ulcer disease to eradicate H. pylori in adults. Eradication of H. pylori has been shown to reduce the risk of duodenal ulcer recurrence. Among patients who fail therapy, Prilosec with clarithromycin is more likely to be associated with the development of clarithromycin resistance as compared with triple therapy. In patients who fail therapy,

susceptibility testing should be done. If resistance to clarithromycin is demonstrated or susceptibility testing is not possible, alternative antimicrobial therapy should be instituted.

Treatment of Active Benign Gastric Ulcer Indicated for short-term treatment (4 to 8 weeks) of active benign gastric ulcer in adults.

Treatment of Symptomatic GERD Indicated for the treatment of heartburn and other symptoms associated with GERD for up to 4 weeks in patients 1 year of age and older.

Treatment of Erosive Esophagitis (EE) Due to Acid-Mediated GERD Indicated for the short-term treatment (4 to 8 weeks) of erosive esophagitis due to acid-mediated GERD that has been diagnosed by endoscopy in patients 1 year of age and older. The efficacy of Prilosec used for longer than 8 weeks in these patients has not been established. If a patient does not respond to 8 weeks of treatment, an additional 4 weeks of treatment may be given. If there is recurrence of erosive esophagitis or GERD symptoms, additional 4 to 8 week courses of omeprazole may be considered. Also indicated for the short-term treatment (up to 6 weeks) of erosive esophagitis due to acid-mediated GERD in pediatric patients 1 month to less than 1 year of age.

Maintenance of Healing of Erosive Esophagitis Due to Acid-Mediated GERD Indicated for the maintenance healing of EE due to acid-mediated GERD in patients 1 year of age and older. Controlled studies do not extend beyond 12 months.

Pathological Hypersecretory Conditions Indicated for the long-term treatment of pathological hypersecretory conditions (e.g., Zollinger-Ellison syndrome, multiple endocrine adenomas and systemic mastocytosis) in adults.

Drug Name: Protonix (pantoprazole)

Short-Term Treatment of Erosive Esophagitis Associated With GERD Indicated in adults and pediatric patients five years of age and older for the short-term treatment (up to 8 weeks) in the healing and symptomatic relief of erosive esophagitis. For those adult patients who have not healed after 8 weeks of treatment, an additional 8-week course of Protonix may be considered. Safety of treatment beyond 8 weeks in pediatric patients has not been established.

Maintenance of Healing of Erosive Esophagitis Indicated for maintenance of healing of erosive esophagitis and reduction in relapse rates of daytime and nighttime heartburn symptoms in adult patients with GERD. Controlled studies did not extend beyond 12 months.

Pathological Hypersecretory Conditions Including Zollinger-Ellison Syndrome Indicated for the long-term treatment of pathological hypersecretory conditions, including Zollinger-Ellison syndrome.

Drug Name: Zegerid (omeprazole/sodium bicarbonate)

Duodenal Ulcer Indicated for short-term treatment of active duodenal ulcer. Most patients heal within four weeks. Some patients may require an additional four weeks of therapy.

Gastric Ulcer Indicated for short-term treatment (4-8 weeks) of active benign gastric ulcer.

Symptomatic GERD Indicated for the treatment of heartburn and other symptoms associated with GERD for up to 4 weeks.

Erosive Esophagitis due to acid-mediated GERD Indicated for the short-term treatment (4 to 8 weeks) of erosive esophagitis due to acid-mediated GERD which has been diagnosed by endoscopy in adults. The efficacy of ZEGERID used for longer than 8 weeks in patients with EE has not been established. If a patient does not respond to 8 weeks of treatment, an additional 4 weeks of treatment may be given. If there is recurrence of EE or GERD symptoms (e.g., heartburn), additional 4 to 8-week courses of ZEGERID may be considered.

Maintenance of Healing of Erosive Esophagitis Due to Acid-Mediated GERD Indicated to maintain healing of erosive esophagitis due to acid-mediated GERD. Controlled studies do not extend beyond 12 months.

Reduction of Risk of Upper Gastrointestinal Bleeding in Critically Ill Patients (40 mg oral suspension only) Indicated for the reduction of risk of upper GI bleeding in critically ill patients.

Approval Criteria

1 - One of the following:

1.1 Trial and inadequate response to once daily PPI regimen

OR

1.2 A once daily PPI regimen is not appropriate to treat the patient's condition

AND

2 - Requested dose does not exceed maximum dose range found in labeling or supported by one of the following off label compendia for the requested product^:

American Hospital Formulary Service Drug Information

Micromedex Drug System

Clinical research in two articles from major peer reviewed medical journals that present data supporting requested dose as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal

Notes	Authorization of therapy will be issued for 12 months for all diagnoses, except for H. pylori eradication. For H. pylori eradication, authorization will be issued for 14 days. *These products may require step therapy. **Requests for greater than twice-daily dosing must be reviewed using the Quantity Limit General Administrative Guideline. ^Support found in labeling or compendia should be evaluated regardless of indication.

3 . Background

Clinical Practice Guidelines
BID Max Range Dosing Table [12-15] ***Intent of table below is to provide a quick reference for BID dosing range listed by requested product. If the requested dose exceeds max dose listed below, PA team members should still review at point of request for clinical appropriateness as off label support continuously evolves. [Last Reviewed: 9/4/24]**

	Aciphex (rabeprazole)	Dexilant (dexlansoprazole)	Nexium (esomeprazole)	Prevacid (Lansoprazole)	Prilosec (omeprazole)	Protonix (pantoprazole)	Zegerid (omeprazole/sodium bicarbonate)
DOSE RANGE	20 to 60 mg BID	30 mg BID	20 to 40 mg BID (Max = 240 mg/day)	30 to 90 mg BID	20 to 40mg BID (Max = 360 mg/day; divide doses above **80mg)**	40 to 80 mg BID (Max = 240 mg/day)	No BID support found at time of last annual review

4 . Endnotes

Both strengths of Zegerid capsule and powder for oral suspension have identical sodium bicarbonate content, respectively. Do not substitute two 20 mg capsules/packets for one 40 mg dose [4].

6 . Revision History

Date	Notes
1/16/2025	Update program

Prior Authorization Guideline

Guideline ID	GL-229130
Guideline Name	Provigil (modafinil), Nuvigil (armodafinil)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Provigil (modafinil)
Narcolepsy Indicated to improve wakefulness in adult patients with excessive sleepiness associated with narcolepsy. [1] **Obstructive sleep apnea (OSA)** Indicated to improve wakefulness in adult patients with excessive sleepiness associated with obstructive sleep apnea (OSA). Limitations of Use: Provigil is indicated to treat excessive sleepiness and not as treatment for the underlying obstruction. If continuous positive airway pressure (CPAP) is the treatment of choice for a patient, a maximal effort to treat with CPAP for an adequate period of time should be made prior to initiating and during treatment with Provigil for excessive sleepiness. [1] **Shift work disorder (SWD)** Indicated to improve wakefulness in adult patients with excessive sleepiness associated with shift work disorder. [1] **Off Label Uses: Fatigue due to multiple sclerosis (MS)** In a double-blind, placebo-controlled study, treatment with modafinil significantly improved fatigue symptoms compared

with placebo in patients with multiple sclerosis (MS) [2,3]

Adjunctive therapy for the treatment of major depressive disorder (MDD) or bipolar disorder In a meta-analysis of 4 MDD RCTs and 2 bipolar depression RCTs, adjunctive treatment with modafinil improved overall depression scores, remission rates, and fatigue symptoms. [2,4]

Drug Name: Nuvigil (armodafinil)

Narcolepsy Indicated to improve wakefulness in adult patients with excessive sleepiness associated with narcolepsy. [5]

Obstructive sleep apnea (OSA) Indicated to improve wakefulness in adult patients with excessive sleepiness associated with obstructive sleep apnea (OSA). Limitations of Use: Nuvigil is indicated to treat excessive sleepiness and not as treatment for the underlying obstruction. If continuous positive airway pressure (CPAP) is the treatment of choice for a patient, a maximal effort to treat with CPAP for an adequate period of time should be made prior to initiating Nuvigil for excessive sleepiness. [5]

Shift work disorder (SWD) Indicated to improve wakefulness in adult patients with excessive sleepiness associated with shift work disorder. [5]

ARMODAFINIL	ARMODAFINIL TAB 200 MG	61400010000335	Generic
ARMODAFINIL	ARMODAFINIL TAB 250 MG	61400010000340	Generic

Approval Criteria

1 - Diagnosis of obstructive sleep apnea defined by one of the following: [6]

1.1 15 or more obstructive respiratory events per hour of sleep confirmed by a sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible) [6,7,B,C]

OR

1.2 Both of the following: [6,7,B,C]

1.2.1 5 or more obstructive respiratory events per hour of sleep confirmed by a sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible)

AND

1.2.2 One of the following symptoms:

Unintentional sleep episodes during wakefulness

Daytime sleepiness

Unrefreshing sleep

Fatigue

Insomnia

Waking up breath holding, gasping, or choking

Loud snoring

Breathing interruptions during sleep

AND

2 - Both of the following:

2.1 Standard treatments for the underlying obstruction (e.g., continuous positive airway pressure [CPAP], bi-level positive airway pressure [BPAP], etc.) have been used for 3 months or longer [2]

AND

2.2 Patient is fully compliant with standard treatment(s) for the underlying obstruction.

AND

3 - Trial and failure or intolerance to modafinil (applies to Provigil only)

AND

4 - Trial and failure or intolerance to armodafinil (applies to Nuvigil only)

Product Name:Generic armodafinil, Generic modafinil, Brand Nuvigil, or Brand Provigil	
Diagnosis	Obstructive Sleep Apnea (OSA)
Approval Length	6 Months [A,1,5]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NUVIGIL	ARMODAFINIL TAB 50 MG	61400010000310	Brand

ARMODAFINIL	ARMODAFINIL TAB 250 MG	61400010000340	Generic

Approval Criteria

1 - Diagnosis of Shift Work Disorder confirmed by one of the following: [6,12]

1.1 Symptoms of excessive sleepiness or insomnia, for at least 3 months, which is temporally associated with a work period (usually night work) that occurs during the habitual sleep phase

OR

1.2 Sleep study demonstrating loss of a normal sleep wake pattern (i.e., disturbed chronobiologic rhythmicity)

AND

2 - Confirmation that no other medical conditions or medications are causing the symptoms of excessive sleepiness or insomnia [6,12]

AND

3 - Trial and failure or intolerance to modafinil (applies to Provigil only)

AND

4 - Trial and failure or intolerance to armodafinil (applies to Nuvigil only)

Product Name:Generic armodafinil, Generic modafinil, Brand Nuvigil, or Brand Provigil

MODAFINIL	MODAFINIL TAB 200 MG	61400024000320	Generic

Approval Criteria

1 - Treatment-resistant depression, defined as both of the following:

1.1 Diagnosis of one of the following [4]:

Major depressive disorder (MDD)

Bipolar depression

AND

1.2 History of failure, contraindication, or intolerance to at least two antidepressants from different classes (e.g., SSRIs, SNRIs, bupropion)

AND

2 - Used as adjunctive therapy

AND

3 - Trial and failure or intolerance to modafinil (applies to Provigil only)

Product Name:Generic modafinil, Brand Provigil	
Diagnosis	Adjunctive therapy for the treatment of major depressive disorder or bipolar depression (off-label) [2,4]
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

MODAFINIL	MODAFINIL TAB 200 MG	61400024000320	Generic
MODAFINIL	MODAFINIL 100MG	614002400310	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Used as adjunctive therapy

Product Name:Generic armodafinil 50 mg, Generic modafinil 100 mg, Brand Nuvigil 50 mg, or Brand Provigil 100 mg	
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
MODAFINIL	MODAFINIL TAB 100 MG	61400024000310	Generic

Provigil	MODAFINIL TAB 100 MG	61400024000310	Brand
Nuvigil	ARMODAFINIL TAB 50 MG	61400010000310	Brand
ARMODAFINIL	ARMODAFINIL TAB 50 MG	61400010000310	Generic

Approval Criteria

1 - One of the following:

1.1 Quantity limit override requests must involve an FDA-approved indication.

OR

1.2 Quantity limit override requests involving off-label indications must meet off-label guideline requirements.

AND

2 - One of the following:

2.1 For titration purposes (one time authorization)

OR

2.2 Requested strength/dose is commercially unavailable

OR

2.3 Patient is on a dose alternating schedule

Notes	Authorization will be issued for the length of therapy based on indicati on, except for titration purposes (Narcolepsy: 12 months, All other indi cations: 6 months). Not to exceed maximum FDA-approved dose.

Product Name:Generic modafinil 200 mg, Brand Provigil 200 mg	
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
Provigil	MODAFINIL TAB 200 MG	61400024000320	Brand

Approval Criteria

1 - One of the following:

1.1 Quantity limit override requests must involve an FDA-approved indication.

OR

1.2 Quantity limit override requests involving off-label indications must meet off-label guideline requirements.

AND

2 - History of inadequate response to Provigil 200 mg/day

AND

3 - One of the following:**

3.1 Higher dose or quantity is supported in the dosage and administration section of the manufacturer's prescribing information

OR

3.2 Higher dose or quantity is supported by one of following compendia:

American Hospital Formulary Service Drug Information

Micromedex DRUGDEX System

Notes	Authorization will be issued for the length of therapy based on indicati on (Narcolepsy: 12 months, All other indications: 6 months). **NOTE: Published biomedical literature may be used as evidence to support s afety and additional efficacy at higher than maximum doses for the dia gnosis provided.

Product Name:Generic armodafinil 150 mg, Brand Nuvigil 150 mg, Generic armodafinil 200 mg, Brand Nuvigil 200 mg, Generic armodafinil 250 mg, or Brand Nuvigil 250 mg	
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
Nuvigil	Armodafinil 150 mg	61400010000330	Brand
Nuvigil	Armodafinil 250 mg	61400010000340	Brand

ARMODAFINIL	ARMODAFINIL TAB 150 MG	61400010000330	Generic
ARMODAFINIL	ARMODAFINIL TAB 200 MG	61400010000335	Generic
ARMODAFINIL	ARMODAFINIL TAB 250 MG	61400010000340	Generic

Approval Criteria

1 - One of the following:

1.1 Quantity limit override requests must involve an FDA-approved indication.

OR

1.2 Quantity limit override requests involving off-label indications must meet off-label guideline requirements.

AND

2 - One of the following**

2.1 Higher dose or quantity is supported in the dosage and administration section of the manufacturer's prescribing information

OR

2.2 Higher dose or quantity is supported by one of following compendia

American Hospital Formulary Service Drug Information

Micromedex DRUGDEX System

Notes	Authorization will be issued for the length of therapy based on indication, except for titration purposes (Narcolepsy: 12 months, All other indications: 6 months). Not to exceed maximum FDA-approved dose. NOTE: Published biomedical literature may be used as evidence to support safety and additional efficacy at higher than maximum doses for the diagnosis provided.

Product Name:Brand Provigil 200mg, Generic modafinil 200mg	
Diagnosis	Narcolepsy: Twice-daily (BID) Therapy**
Approval Length	12 month(s)
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
PROVIGIL	MODAFINIL TAB 200 MG	61400024000320	Brand
MODAFINIL	MODAFINIL TAB 200 MG	61400024000320	Generic

Approval Criteria

1 - Diagnosis of narcolepsy as confirmed by sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible) [3,6,9-11,E-G]

AND

2 - One of the following

2.1 Trial and inadequate response to once daily treatment

OR **2.2** A once daily treatment is not appropriate to treat the patient's condition **AND** **3** - Requested dose does not exceed maximum dose range found in labeling or supported by one of the following off label compendia for the requested product: American Hospital Formulary Service Drug Information Micromedex Drug System Clinical research in two articles from major peer reviewed medical journals that present data supporting requested dose as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal	
Notes	**Requests for greater than twice-daily dosing must be reviewed using the Quantity Limit General Administrative Guideline.

3 . Definitions

Definition	Description
Cataplexy [13]	A sudden loss of muscle tone that leads to feelings of weakness and a loss of voluntary muscle control.
CPAP (continuous positive airway pressure) [13]	Delivers pressurized air from a machine into airways through a specially designed mask that is worn during sleep.
Multiple sleep latency test (MSLT) [13]	Assesses the severity of sleepiness by measuring the speed of falling asleep during a series of nap trials.
Narcolepsy [13]	A neurological condition in which people experience excessive daytime sleepiness, cataplexy, sleep paralysis, hallucinations and intermittent, uncontrollable sleep attacks during the daytime.

Non-Rapid Eye Movement (NREM) sleep [13]	One of the two basic states of sleep; consists of Stages 1, 2 (light sleep) and 3,4 (deep sleep).
Obstructive sleep apnea (OSA) [13]	The most common kind of sleep apnea. It is caused by a blockage of the upper airway.
Polysomnography (PSG) [13]	A test that records sleep architecture (i.e. the amount of NREM and REM sleep, number of arousals) and a variety of body functions during sleep, including breathing patterns, heart rhythms and limb movements. It is most commonly done to evaluate for sleep apnea.
Rapid Eye Movement (REM) sleep [13]	One of the two basic states of sleep. REM sleep, also known as "dream sleep," is characterized by rapid eye movements, and more irregular breathing and heart rate compared to NREM sleep.

4 . Endnotes

The effectiveness of modafinil (greater than 12 weeks for obstructive sleep apnea or SWD) and the effectiveness of armodafinil in long-term use (greater than 12 weeks) have not been systematically evaluated in placebo-controlled trials. [1,5]

International Classification of Sleep Disorders (ICSD-3) diagnostic criteria for obstructive sleep apnea-hypopnea syndrome (OSAHS) include: One of the following: 1. Polysomnography (PSG) shows greater than or equal to 5 obstructive respiratory events per hour of sleep in a patient with one or more of the following: a. sleepiness, nonrestorative sleep, fatigue or insomnia symptoms b. waking up with breath holding, gasping or choking c. habitual snoring, breathing interruptions, or both noted by a bed partner or other observer d. hypertension, mood disorder, cognitive dysfunction, coronary artery disease, stroke, congestive heart failure, atrial fibrillation, or type 2 diabetes mellitus 2. Greater than or equal to 15 obstructive respiratory events per hour of sleep, regardless of the presence of associated symptoms or comorbidities. In addition, the disorder is not explained by another current sleep disorder, medical or neurological disorder, medication use, or substance use disorder [6].

Examples of obstructive respiratory events include: obstructive and mixed apneas, hypopneas, or respiratory effort related arousals (RERA) [6].

Despite lack of consistent clinical evidence or statement/guideline from a United States professional society, use of modafinil for fatigue is considered the standard practice in MS patients [8]. The 2022 National Institute for Health and Care Excellence guidance on MS lists modafinil as an option for managing fatigue in adults with MS [3].

The American Academy of Sleep Medicine (AASM) guidelines list modafinil as a "standard" patient care strategy (generally accepted patient-care strategy that reflects a high

degree of clinical certainty). [10] The use of modafinil for the treatment of narcolepsy is a strong recommendation. [9]

ICSD-3 diagnostic criteria for narcolepsy with cataplexy (narcolepsy type 1) include: 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months. 2. One or both of the following: cataplexy and a mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques (a SOREMP within 15 minutes of sleep onset on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT); or cerebrospinal fluid (CSF) hypocretin-1 concentration is low (less than 110 pg/mL or one-third of the normative values with the same standardized assay). 3. Exclusion of alternative causes of chronic daytime sleepiness by history, physical exam, and polysomnography. Other conditions that cause chronic daytime sleepiness include insufficient sleep, untreated sleep apnea, periodic limb movements of sleep, and idiopathic hypersomnia (chronic sleepiness but without SOREMPs or other evidence of abnormal REM sleep). In addition, the effects of sedating medications should be excluded. [6,11]

ICSD-3 diagnostic criteria for narcolepsy without cataplexy (narcolepsy type 2) include: 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months. 2. Cataplexy is absent 3. CSF hypocretin-1 levels, if measured, must not meet the narcolepsy type 1 criterion. 4. A mean sleep latency of less than or equal to 8 minutes and 2 or more SOREMPs on a MSLT performed using standard techniques (a SOREMP within 15 minutes of sleep onset on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT). 5. Exclusion of alternative causes of chronic daytime sleepiness by history, physical exam, and polysomnography. Other conditions that cause chronic daytime sleepiness include insufficient sleep, untreated sleep apnea, periodic limb movements of sleep, and idiopathic hypersomnia (chronic sleepiness but without SOREMPs or other evidence of abnormal REM sleep). In addition, the effects of sedating medications should be excluded. [6,11]

6 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228936
Guideline Name	Pulmonary Arterial Hypertension Agents
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Adcirca (tadalafil) Tablets, Alyq (tadalafil) Tablets, Tadliq (tadalafil) Oral Suspension
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of pulmonary arterial hypertension (PAH) (World Health Organization [WHO] Group I) to improve exercise ability. Studies establishing effectiveness included predominately patients with New York Heart Association (NYHA) Functional Class II–III symptoms and etiologies of idiopathic or heritable PAH (61%) or PAH associated with connective tissue diseases (23%).
Drug Name: Adempas (riociguat) Tablets
Pulmonary Arterial Hypertension (PAH) Indicated for treatment of adults with PAH (WHO Group I) to improve exercise capacity, WHO Functional Class, and to delay clinical worsening. Efficacy was shown in patients on riociguat monotherapy or in combination with endothelin receptor antagonists or prostanoids. Studies establishing effectiveness included predominantly patients with WHO Functional Class II to III and etiologies of idiopathic or heritable PAH (61%) or PAH associated with connective tissue diseases (25%). **Chronic-Thromboembolic Pulmonary Hypertension (CTEPH)** Indicated for treatment of adults with persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH),

(WHO Group 4) after surgical treatment, or inoperable CTEPH, to improve exercise capacity and WHO Functional Class.

Drug Name: Flolan (epoprostenol sodium) Injection

Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to improve exercise capacity. Studies establishing effectiveness included predominantly (97%) patients with NYHA Functional Class III-IV symptoms and etiologies of idiopathic or heritable PAH (49%) or PAH associated with connective tissue diseases (51%).

Drug Name: Letairis (ambrisentan) Tablets

Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to 1) improve exercise ability and delay clinical worsening and 2) in combination with tadalafil to reduce the risks of disease progression and hospitalization for worsening PAH, and to improve exercise ability. Studies establishing effectiveness included predominantly patients with WHO Functional Class II-III symptoms and etiologies of idiopathic or heritable PAH (60%) or PAH associated with connective tissue diseases (34%).

Drug Name: Liqrev (sildenafil) suspension

Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of pulmonary arterial hypertension (PAH) (World Health Organization [WHO] Group I) in adults to improve exercise ability and delay clinical worsening.

Drug Name: Opsumit (macitentan) Tablets

Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to reduce the risks of disease progression and hospitalization for PAH. Effectiveness was established in a long-term study in PAH patients with predominantly WHO Functional Class II-III symptoms treated for an average of 2 years. Patients had idiopathic and heritable PAH (57%), PAH caused by connective tissue disorders (31%), and PAH caused by congenital heart disease with repaired shunts (8%).

Drug Name: Orenitram (treprostinil) Tablets

Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to delay disease progression and to improve exercise capacity. The studies that established effectiveness included predominately patients with WHO functional class II-III symptoms and etiologies of idiopathic or heritable PAH (66%) or PAH associated with connective tissue disease (26%).

Drug Name: Opsynvi (macitentan/ tadalafil) Tablets

Pulmonary Arterial Hypertension Indicated for the chronic treatment of adults with pulmonary arterial hypertension (PAH, WHO Group I and WHO Functional Class (FC) II–III). Macitentan reduces the risk of clinical worsening events and hospitalization. Tadalafil improves exercise ability.

Drug Name: Remodulin (treprostinil sodium) Injection
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to diminish symptoms associated with exercise. Studies establishing effectiveness included patients with NYHA Functional Class II-IV symptoms and etiologies of idiopathic or heritable PAH (58%), PAH associated with congenital systemic-to-pulmonary shunts (23%), or PAH associated with connective tissue diseases (19%). Indicated to diminish the rate of clinical deterioration in patients with PAH requiring transition from epoprostenol. Consider the risks and benefits of each drug prior to transition.
Drug Name: Revatio (sildenafil) Injection, Tablets, Oral Suspension
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I): 1) In adults to improve exercise ability and delay clinical worsening. 2) in pediatric patients 1 to 17 years old to improve exercise ability and, in pediatric patients too young to perform standardized exercise testing, pulmonary hemodynamics thought to underlie improvements in exercise.
Drug Name: Tracleer (bosentan) Tablets, Tablets for Suspension
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of pulmonary arterial hypertension (PAH) (WHO Group I): 1) In adults to improve exercise ability and to decrease clinical worsening. Studies establishing effectiveness included predominantly patients with WHO Functional Class II-IV symptoms and etiologies of idiopathic or heritable PAH (60%), PAH associated with connective tissue diseases (21%), and PAH associated with congenital heart disease with left-to right shunts (18%). 2) In pediatric patients aged 3 years and older with idiopathic or congenital PAH to improve pulmonary vascular resistance (PVR), which is expected to result in an improvement in exercise ability.
Drug Name: Tyvaso (treprostinil) Inhalation Solution, Tyvaso (treprostinil) DPI Inhalation Powder
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to improve exercise ability. Studies establishing effectiveness included predominately patients with NYHA Functional Class III symptoms and etiologies of idiopathic or heritable PAH (56%) or PAH associated with connective tissue diseases (33%). The effects diminish over the minimum recommended dosing interval of 4 hours; treatment timing can be adjusted for planned activities. While there are long-term data on use of treprostinil by other routes of administration, nearly all controlled clinical experience with inhaled treprostinil has been on a background of bosentan (an endothelin receptor antagonist) or sildenafil (a phosphodiesterase type 5 inhibitor). The controlled clinical experience was limited to 12 weeks in duration. **Pulmonary Hypertension Associated with Interstitial Lung Disease (ILD)** Indicated for the treatment of pulmonary hypertension associated with ILD (PH-ILD; WHO Group 3) to improve exercise ability. The study establishing effectiveness predominately included patients with etiologies of idiopathic interstitial pneumonia (IIP) (45%) inclusive of idiopathic pulmonary fibrosis (IPF), combined pulmonary fibrosis and emphysema (CPFE) (25%), and WHO Group 3 connective tissue disease (22%).

Drug Name: Veletri (epoprostenol) Injection
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of pulmonary arterial hypertension (PAH) (WHO Group I) to improve exercise capacity. Studies establishing effectiveness included predominantly patients with NYHA Functional Class III-IV symptoms and etiologies of idiopathic or heritable PAH or PAH associated with connective tissue diseases.
Drug Name: Ventavis (iloprost) Inhalation Solution
Pulmonary Arterial Hypertension (PAH) Indicated for the treatment of PAH (WHO Group I) to improve a composite endpoint consisting of exercise tolerance, symptoms (NYHA Class), and lack of deterioration. Studies establishing effectiveness included predominately patients with NYHA Functional Class III-IV symptoms and etiologies of idiopathic or heritable PAH (65%) or PAH associated with connective tissue diseases (23%).
Drug Name: Uptravi (selexipag) Tablets and Injection
Pulmonary Arterial Hypertension Indicated for the treatment of PAH (WHO Group I) to delay disease progression and reduce the risk of hospitalization for PAH. Effectiveness was established in a long-term study in PAH patients with WHO Functional Class II-III symptoms. Patients had idiopathic and heritable PAH (58%), PAH associated with connective tissue disease (29%), PAH associated with congenital heart disease with repaired shunts (10%).
Drug Name: Winrevair (sotatercept-csrk) Injection
Pulmonary Arterial Hypertension Indicated for the treatment of adults with pulmonary arterial hypertension (PAH, WHO Group I) to increase exercise capacity, improve WHO functional class (FC) and reduce the risk of clinical worsening events.

2 . Criteria

Product Name:Generic Alyq tablet, Generic tadalafil tablet, Adempas tablet, Brand Flolan injection, Generic epoprostenol injection, Generic ambrisentan tablet, Opsumit tablet, Orenitram tablet, Generic treprostinil injection, Generic sildenafil tablet, Generic bosentan tablet, Tracleer tablet for suspension, Tyvaso inhalation solution, Tyvaso Refill inhalation solution, Tyvaso Starter inhalation solution, Tyvaso DPI, Veletri injection, or Ventavis inhalation solution	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FLOLAN	EPOPROSTENOL SODIUM FOR INJ 0.5 MG	40170040102110	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

Product Name:Brand Adcirca tablet, Tadliq oral suspension	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADCIRCA	TADALAFIL TAB 20 MG (PAH)	40143080000320	Brand
TADLIQ	TADALAFIL ORAL SUSP 20 MG/5ML (PAH)	40143080001820	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - Trial and failure or intolerance to generic tadalfil

Product Name:Brand Letairis tablet	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LETAIRIS	AMBRISENTAN TAB 5 MG	40160007000310	Brand
LETAIRIS	AMBRISENTAN TAB 10 MG	40160007000320	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - Trial and failure or intolerance to generic ambrisentan

Product Name:Opsynvi tablet	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OPSYNVI	MACITENTAN-TADALAFIL TAB 10-20 MG	40995502500310	Brand
OPSYNVI	MACITENTAN-TADALAFIL TAB 10-40 MG	40995502500320	Brand

Approval Criteria

1 - One of the following:

1.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

1.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

2 - One of the following:

2.1 Trial and failure, contraindication or intolerance to generic ambrisentan

OR

2.2 Patient is currently being treated with a macitentan-containing product

AND

2 - Patient is unable to take Opsumit and generic tadalafil separately due to intolerance with Opsumit (e.g., allergy to excipient)

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

Product Name:Brand Remodulin injection	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REMODULIN	TREPROSTINIL INJ SOLN 20 MG/20ML (1 MG/ML)	40170080002050	Brand
REMODULIN	TREPROSTINIL INJ SOLN 50 MG/20ML (2.5 MG/ML)	40170080002060	Brand
REMODULIN	TREPROSTINIL INJ SOLN 100 MG/20ML (5 MG/ML)	40170080002070	Brand
REMODULIN	TREPROSTINIL INJ SOLN 200 MG/20ML (10 MG/ML)	40170080002080	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - Trial and failure or intolerance to generic treprostinil

Product Name:Brand Revatio tablet	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REVATIO	SILDENAFIL CITRATE TAB 20 MG	40143060100320	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - Trial and failure or intolerance to generic sildenafil tablet

Product Name:Brand Tracleer tablet	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRACLEER	BOSENTAN TAB 62.5 MG	40160015000320	Brand
TRACLEER	BOSENTAN TAB 125 MG	40160015000330	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - Trial and failure or intolerance to generic bosentan tablet

Product Name:Brand Revatio injection or Generic sildenafil injection	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REVATIO	SILDENAFIL CITRATE IV SOLN 10 MG/12.5ML (BASE EQUIVALENT)	40143060102020	Brand
SILDENAFIL	SILDENAFIL CITRATE IV SOLN 10 MG/12.5ML (BASE EQUIVALENT)	40143060102020	Generic

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - Patient is unable to take oral medications [2]

AND

6 - For Brand Revatio injection, trial and failure or intolerance to generic sildenafil injection

Product Name:Liqrev, Brand Revatio oral suspension or Generic sildenafil oral suspension	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REVATIO	SILDENAFIL CITRATE FOR SUSPENSION 10 MG/ML	40143060101920	Brand
SILDENAFIL CITRATE	SILDENAFIL CITRATE FOR SUSPENSION 10 MG/ML	40143060101920	Generic
LIQREV	SILDENAFIL CITRATE ORAL SUSP 10 MG/ML	40143060101825	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

5 - For Brand Revatio oral suspension, trial and failure, or intolerance to both of the following:

Generic sildenafil tablets

Generic sildenafil oral suspension

AND

6 - For Liqrev, trial and failure or intolerance to generic sildenafil suspension

Product Name:Adempas tablet	
Diagnosis	Chronic Thromboembolic Pulmonary Hypertension (CTEPH)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADEMPAS	RIOCIGUAT TAB 0.5 MG	40134050000310	Brand
ADEMPAS	RIOCIGUAT TAB 1 MG	40134050000320	Brand
ADEMPAS	RIOCIGUAT TAB 1.5 MG	40134050000330	Brand
ADEMPAS	RIOCIGUAT TAB 2 MG	40134050000340	Brand
ADEMPAS	RIOCIGUAT TAB 2.5 MG	40134050000350	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of inoperable or persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH)

AND

1.1.2 CTEPH is symptomatic

OR

1.2 Patient is currently on any therapy for the diagnosis of CTEPH

AND

2 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

Product Name:Tyvaso inhalation solution, Tyvaso Refill inhalation solution, or Tyvaso Start inhalation solution, Tyvaso DPI	
Diagnosis	Pulmonary Hypertension associated with Interstitial Lung Disease
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYVASO	TREPROSTINIL INHALATION SOLUTION 0.6 MG/ML	40170080002020	Brand
TYVASO STARTER	TREPROSTINIL INHALATION SOLUTION 0.6 MG/ML	40170080002020	Brand

TYVASO DPI MAINTENANCE KIT	TREPROSTINIL INH POWDER 112 X 32MCG & 112 X 48MCG	40170080002960	Brand
TYVASO DPI TITRATION KIT	TREPROSTINIL INH POWDER 112 X 16MCG & 84 X 32MCG	40170080002970	Brand
TYVASO DPI TITRATION KIT	TREPROSTINIL INH POWD 112 X 16MCG & 112 X 32MCG & 28 X 48MCG	40170080002980	Brand

Approval Criteria

1 - Diagnosis of pulmonary hypertension associated with interstitial lung disease

AND

2 - Diagnosis of pulmonary hypertension associated with interstitial lung disease was confirmed by diagnostic test(s) (e.g., right heart catheterization, doppler echocardiogram, computerized tomography imaging)

AND

3 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

OPSYNVI	MACITENTAN-TADALAFIL TAB 10-40 MG	40995502500320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - For Brand Revatio injection, Brand Tracleer, Brand Adcirca, Brand Letairis, Brand Remodulin injection, and Brand Revatio tablet, trial and failure or intolerance to its generic counterpart

AND

3 - For Brand Revatio oral suspension, trail and failure or intolerance to both of the following:

Generic sildenafil tablets

Generic sildenafil oral suspension

AND

4 - For Tadliq oral suspension, trial and failure or intolerance to generic tadalafil

AND

5 - For Liqrev, trial and failure or intolerance to generic sildenafil suspension

AND

6 - For Opsynvi, patient is unable to take Opsumit and generic tadalafil separately due to intolerance with Opsumit (e.g., allergy to excipient)

Product Name:Uptravi tablet	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
UPTRAVI	SELEXIPAG TAB THERAPY PACK 200 MCG (140) & 800 MCG (60)	4012007000B720	Brand

UPTRAVI	SELEXIPAG TAB 1600 MCG	40120070000345	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Trial and failure, contraindication, or intolerance to one of the following:

PDE-5 inhibitor [i.e., Adcirca (tadalafil), Revatio (sildenafil)]

Adempas (riociguat)

AND

4.1.2 Trial and failure, contraindication, or intolerance to an endothelin receptor antagonist [e.g., Letairis (ambrisentan), Opsumit (macitentan), Tracleer (bosentan)]

OR

4.2 For continuation of prior therapy

AND

5 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

Product Name:Uptravi injection	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
UPTRAVI	SELEXIPAG FOR IV SOLN 1800 MCG	40120070002120	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - One of the following:

3.1 Diagnosis of pulmonary arterial hypertension was confirmed by right heart catheterization [A]

OR

3.2 Patient is currently on any therapy for the diagnosis of pulmonary arterial hypertension

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Trial and failure, contraindication, or intolerance to one of the following:

PDE-5 inhibitor [i.e., Adcirca (tadalafil), Revatio (sildenafil)]

Adempas (riociguat)

AND

4.1.2 Trial and failure, contraindication, or intolerance to an endothelin receptor antagonist [e.g., Letairis (ambrisentan), Opsumit (macitentan), Tracleer (bosentan)]

OR

4.2 For continuation of prior therapy

AND

5 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

AND

6 - Patient is unable to take oral medications [13]

Product Name:Uptravi tablet/injection

WINREVAIR	SOTATERCEPT-CSRK FOR SUBCUTANEOUS SOLN KIT 2 X 60 MG	40110070206435	Brand

Approval Criteria

1 - Diagnosis of pulmonary arterial hypertension

AND

2 - Pulmonary arterial hypertension is symptomatic

AND

3 - Patient is currently on at least two therapies indicated for the treatment of pulmonary arterial hypertension from the following different mechanisms of action, unless there is a contraindication or intolerance:

Endothelin receptor antagonists (i.e., Bosentan, ambrisentan or macitentan)

Phosphodiesterase 5 inhibitors (i.e., Tadalafil or sildenafil)

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Cardiologist

Product Name:Winrevair Injection	
Diagnosis	Pulmonary Arterial Hypertension
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Pulmozyme (dornase alfa inhalation solution)

Prior Authorization Guideline

Guideline ID	GL-228942
Guideline Name	Pulmozyme (dornase alfa inhalation solution)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Pulmozyme (dornase alpha) Inhalation Solution
Cystic Fibrosis Indicated, in conjunction with standard therapies, for the management of pediatric and adult patients with cystic fibrosis (CF) to improve pulmonary function. In CF patients with an FVC ≥ 40% of predicted, daily administration of PULMOZYME has also been shown to reduce the risk of respiratory tract infections requiring parenteral antibiotics.

2 . Criteria

Product Name:Pulmozyme	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PULMOZYME	DORNASE ALFA INHAL SOLN 1 MG/ML	45304020002010	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF) [2,3]

Product Name:Pulmozyme	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PULMOZYME	DORNASE ALFA INHAL SOLN 1 MG/ML	45304020002010	Brand
PULMOZYME	DORNASE ALFA INHAL SOLN 2.5 MG/2.5ML	45304020002010	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF)

AND

2 - Patient demonstrates positive clinical response (i.e., improvement in lung function [forced expiratory volume in one second {FEV1}], decreased number of pulmonary exacerbations) to therapy

3 . References

Prior Authorization Guideline

Guideline ID	GL-228710
Guideline Name	Pyrukynd (mitapivat)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Pyrukynd (mitapivat)
Hemolytic Anemia Indicated for the treatment of hemolytic anemia in adults with pyruvate kinase (PK) deficiency.

2 . Criteria

Product Name:Pyrukynd	
Diagnosis	Hemolytic Anemia
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PYRUKYND TAPER PACK	MITAPIVAT SULFATE TAB THERAPY PACK 5 MG	8587005070B710	Brand
PYRUKYND TAPER PACK	MITAPIVAT SULFATE TAB THERAPY PACK 7 X 20 MG & 7 X 5 MG	8587005070B720	Brand

PYRUKYND	MITAPIVAT SULFATE TAB 50 MG	85870050700340	Brand

Approval Criteria

1 - Diagnosis of hemolytic anemia confirmed by the presence of chronic hemolysis (e.g., increased indirect bilirubin, elevated lactated dehydrogenase [LDH], decreased haptoglobin, increased reticulocyte count) [A, 2, 3, 4]

AND

2 - Diagnosis of pyruvate kinase deficiency confirmed by molecular testing of ALL the following mutations on the PKLR gene: [B, 1, 2, 4, 5]

Presence of at least 2 variant alleles in the pyruvate kinase liver and red blood cell (PKLR) gene, of which at least 1 was a missense variant

Patients is not homozygous for the c.1436G>A (p.R479H) variant

Patient does not have 2 non-missense variants (without the presence of another missense variant) in the PKLR gene

AND

3 - Hemoglobin is less than or equal to 10g/dL [1]

AND

4 - Patient has symptomatic anemia or is transfusion dependent [7]

AND

5 - Exclusion of other causes of hemolytic anemias (e. g., infections, toxins, drugs) [C, 2, 5]

AND

6 - Prescribed by or in consultation with a hematologist

Product Name:Pyrukynd	
Diagnosis	Hemolytic Anemia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PYRUKYND TAPER PACK	MITAPIVAT SULFATE TAB THERAPY PACK 5 MG	8587005070B710	Brand

PYRUKYND	MITAPIVAT SULFATE TAB 50 MG	85870050700340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy [e.g., hemoglobin increase greater than or equal to 1.5g/dL from baseline, reduction in transfusions of greater than or equal to 33% in the number of red blood cell units transfused during the fixed dose period compared with the patient's historical transfusion burden, improvement in markers of

hemolysis from baseline (e.g., bilirubin, lactated dehydrogenase [LDH], haptoglobin, reticulocyte count)] **AND** **2** - Prescribed by or in consultation with a hematologist	
Notes	If the member does not meet the medical necessity reauthorization criteria requirements, a denial should be issued and a 1-month authorization should be issued one time for Pyrukynd gradual therapy discontinuation.

3 . Endnotes

The first step in the evaluation of a person with possible PK deficiency is to establish if hemolysis is present. Hemolytic anemia is characterized by an increased reticulocyte count, increased indirect bilirubin, and possibly by increased LDH and decreased haptoglobin [4]

In case of decreased PK activity, sequencing of PKLR gene is highly recommended to confirm the diagnosis [2]

Since the hematological features of PK deficiency are not specific, the possibility of PK deficiency and other metabolic abnormalities should be considered in all patients displaying chronic hemolysis where an immune-mediated hemolytic process, red cell membrane defect, unstable hemoglobin, or paroxysmal nocturnal hemoglobinuria has been excluded [2]

Prior Authorization Guideline

Guideline ID	GL-228943
Guideline Name	Qinlock (ripretinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Qinlock (ripretinib)
Gastrointestinal Stromal Tumor (GIST) Indicated for the treatment of adult patients with advanced gastrointestinal stromal tumor (GIST) who have received prior treatment with 3 or more kinase inhibitors, including imatinib.

2 . Criteria

Product Name:Qinlock	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
QINLOCK	RIPRETINIB TAB 50 MG	21533053000320	Brand

Approval Criteria

1 - Diagnosis of gastrointestinal stromal tumor (GIST)

AND

2 - Disease is advanced

AND

3 - Patient has received prior treatment with three or more kinase inhibitors (e.g., sunitinib, regorafenib), one of which must include imatinib

Product Name:Qinlock	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
QINLOCK	RIPRETINIB TAB 50 MG	21533053000320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Qinlock Prescribing Information. Deciphera Pharmaceuticals, LLC. Waltham, MA. October 2023.

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228945
Guideline Name	Quantity Limit General
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Drugs subjected to Quantity Limits (in the absence of a drug-specific guideline)*	
Approval Length	6 Month(s) (except for titration or loading-dose purposes)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Quantity limit general			
Quantity			

Approval Criteria

1 - One of the following:

1.1 Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

2 - One of the following:

2.1 For titration or loading-dose purposes (one time authorization or per FDA labeling)

OR

2.2 Requested strength/dose is commercially unavailable**

OR

2.3 Patient is on a dose alternating schedule

OR

2.4 For topical applications, member has tried the dose under the quantity limit restriction for an adequate period of time and it has been deemed ineffective or insufficient in the treatment of the member's disease or medical condition

AND

3 - For the indication being requested, the higher dose, frequency of administration, and quantity are supported in one of the following:

3.1 The dosage and administration section of the manufacturer's prescribing information

OR **3.2** One of following compendia: American Hospital Formulary Service Drug Information Micromedex DRUGDEX System **OR** **3.3** Supported as being generally safe and effective by clinical research in two articles from peer reviewed medical journals	
Notes	*This guideline only applies in the absence of a drug-specific quantity l imit override guideline. No override requests will be permitted for acet aminophen, alone or in combination with other agents, which will exce ed a total of 4 grams of acetaminophen per day. **Commercially avail able strength/dose requires a formulary drug.

2 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233339
Guideline Name	Radicava (edaravone)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	3/1/2025
P&T Approval Date:	7/26/2017
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Radicava (edaravone) injection, Radicava ORS (edaravone) oral suspension
Amyotrophic Lateral Sclerosis (ALS) Indicated for the treatment of Amyotrophic Lateral Sclerosis (ALS).

2 . Criteria

Product Name:Brand Radicava IV, generic edaravone IV, Radicava ORS	
Diagnosis	Amyotrophic Lateral Sclerosis (ALS)
Approval Length	6 Months [A]

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RADICAVA	EDARAVONE INJ 30 MG/100ML (0.3 MG/ML)	74509030002010	Brand
RADICAVA ORS STARTER KIT	EDARAVONE ORAL SUSP 105 MG/5ML	74509030001820	Brand
RADICAVA ORS	EDARAVONE ORAL SUSP 105 MG/5ML	74509030001820	Brand
EDARAVONE	EDARAVONE INJ 30 MG/100ML (0.3 MG/ML)	74509030002010	Generic
EDARAVONE	EDARAVONE INJ 60 MG/100ML (0.6 MG/ML)	74509030002014	Generic

Approval Criteria

1 - Diagnosis of “definite” or “probable” amyotrophic lateral sclerosis (ALS) per the revised EL Escorial and Airlie House diagnostic criteria

AND

2 - Prescribed by or in consultation with a neurologist with expertise in the diagnosis of ALS

AND

3 - Patient has scores greater than or equal to 2 in all items of the ALS Functional Rating Scale-Revised (ALSFRS-R) criteria at the start of treatment

AND

4 - Patient has a percent (%) forced vital capacity (%FVC) greater than or equal to 80% at the start of treatment

AND

5 - Patient is not dependent on invasive ventilation or tracheostomy

Product Name:Brand Radicava IV, generic edaravone IV, Radicava ORS	
Diagnosis	Amyotrophic Lateral Sclerosis (ALS)
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RADICAVA	EDARAVONE INJ 30 MG/100ML (0.3 MG/ML)	74509030002010	Brand
RADICAVA ORS STARTER KIT	EDARAVONE ORAL SUSP 105 MG/5ML	74509030001820	Brand
RADICAVA ORS	EDARAVONE ORAL SUSP 105 MG/5ML	74509030001820	Brand
EDARAVONE	EDARAVONE INJ 30 MG/100ML (0.3 MG/ML)	74509030002010	Generic
EDARAVONE	EDARAVONE INJ 60 MG/100ML (0.6 MG/ML)	74509030002014	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.(e.g., slowing in the decline of functional abilities)

AND

2 - Patient is not dependent on invasive ventilation or tracheostomy

3 . Endnotes

Authorization period is based on the pivotal study duration of 24 weeks. [1-3]

Prior Authorization Guideline

Guideline ID	GL-228947
Guideline Name	Reblozyl (luspatercept-aamt)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Reblozyl (luspatercept-aamt)
Beta Thalassemia Indicated for the treatment of anemia in adult patients with beta thalassemia who require regular red blood cell (RBC) transfusions. Limitations of Use: Reblozyl is not indicated for use as a substitute for RBC transfusions in patients who require immediate correction of anemia. **Myelodysplastic Syndromes with Ring Sideroblasts or Myelodysplastic/ Myeloproliferative Neoplasm with Ring Sideroblasts and Thrombocytosis Associated Anemia** Indicated for the treatment of anemia failing an erythropoiesis stimulating agent and requiring 2 or more red blood cell units over 8 weeks in adult patients with very low- to intermediate-risk myelodysplastic syndromes with ring sideroblasts (MDS-RS) or with myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T). Limitations of Use: Reblozyl is not indicated for use as a substitute for RBC transfusions in patients who require immediate correction of anemia. **Myelodysplastic Syndromes Associated Anemia** Indicated for the treatment of anemia without previous erythropoiesis stimulating agent use (ESA-naïve) in adult patients with very low- to intermediate-risk myelodysplastic syndromes (MDS) who may require regular red

blood cell (RBC) transfusions. Limitations of Use: Reblozyl is not indicated for use as a substitute for RBC transfusions in patients who require immediate correction of anemia.

2 . Criteria

Product Name:Reblozyl	
Diagnosis	Beta Thalassemia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 25 MG	82400540102120	Brand
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 75 MG	82400540102140	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of beta thalassemia major [3]

AND

1.1.2 Patient requires regular red blood cell (RBC) transfusions

OR

1.2 Diagnosis of transfusion-dependent beta thalassemia [3]

AND

2 - Prescribed by or in consultation with one of the following:

Hematologist

Oncologist

Product Name:Reblozyl	
Diagnosis	Beta Thalassemia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 25 MG	82400540102120	Brand
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 75 MG	82400540102140	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy (e.g., reduction in RBC transfusion burden) [1,2]

Product Name:Reblozyl	
Diagnosis	Myelodysplastic Syndromes, Myelodysplastic/Myeloproliferative Neoplasm (MDS-RS, MDS/MPN-RS-T)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 25 MG	82400540102120	Brand
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 75 MG	82400540102140	Brand

Approval Criteria

1 - One of the following diagnoses:

1.1 Very low-to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS)

OR

1.2 Myelodysplastic or myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T)

AND

2 - Patient has failed an erythropoiesis stimulating agent [e.g., Epogen (epoetin alfa), Aranesp (darbepoetin)]

AND

3 - Patient requires transfusions of 2 or more red blood cell (RBC) units over 8 weeks

AND

4 - Prescribed by or in consultation with one of the following:

Hematologist

Oncologist

Product Name:Reblozyl	
Diagnosis	Myelodysplastic Syndromes

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 25 MG	82400540102120	Brand
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 75 MG	82400540102140	Brand

Approval Criteria

1 - Diagnosis of very low- to intermediate-risk myelodysplastic syndromes (MDS)

AND

2 - Patient does not have previous erythropoiesis stimulating agent use (ESA-naïve)

AND

3 - Patient requires transfusions of 2 or more red blood cell (RBC) units over 8 weeks

AND

4 - Prescribed by or in consultation with one of the following:

Hematologist

Oncologist

Product Name:Reblozyl	
Diagnosis	Myelodysplastic Syndromes, Myelodysplastic/Myeloproliferative Neoplasm
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 25 MG	82400540102120	Brand
REBLOZYL	LUSPATERCEPT-AAMT FOR SUBCUTANEOUS INJ 75 MG	82400540102140	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy (e.g., RBC transfusion independence, improvement in hemoglobin levels) [1,4]

3 . References

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228712
Guideline Name	Recorlev (levoketoconazole) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Recorlev (levoketoconazole)
Cushing's Syndrome Indicated for the treatment of endogenous hypercortisolemia in adult patients with Cushing's syndrome for whom surgery is not an option or has not been curative. Limitations of Use: RECORLEV is not approved for the treatment of fungal infections. The safety and effectiveness of RECORLEV for the treatment of fungal infections have not been established

2 . Criteria

Product Name:Recorlev	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RECORLEV	LEVOKETOCONAZOLE TAB 150 MG	30022040000320	Brand

Approval Criteria

1 - Diagnosis of Cushing's syndrome demonstrated by urinary free cortisol (UFC) increase of 50% from baseline [3]

AND

2 - Patient is being treated for endogenous hypercortisolemia (e.g., pituitary adenoma, ectopic tumor, adrenal adenoma)[1,2]

AND

3 - One of the following:

3.1 Patient is not a candidate for surgery

OR

3.2 Surgery has not been curative

AND

4 - Trial and failure for a minimum of 90 days, or intolerance to oral ketoconazole [A]

AND

5 - Prescribed by or in consultation with an endocrinologist

Product Name:Recorlev	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RECORLEV	LEVOKETOCONAZOLE TAB 150 MG	30022040000320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as demonstrated by ONE of the following:

Normalization of urinary free cortisol (UFC) [1]

At least a 50% decrease in UFC levels [3]

AND

2 - Trial and failure for a minimum of 90 days, or intolerance to oral ketoconazole [A]

Product Name:Recorlev	
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
RECORLEV	LEVOKETOCONAZOLE TAB 150 MG	30022040000320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of Cushing's syndrome demonstrated by urinary free cortisol (UFC) increase of 50% from baseline [3]

AND

2 - Patient is being treated for endogenous hypercortisolemia (e.g., pituitary adenoma, ectopic tumor, adrenal adenoma)[1,2]

AND

3 - One of the following:

3.1 Patient is not a candidate for surgery

OR

3.2 Surgery has not been curative

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure for a minimum of 90 days, or intolerance to oral ketoconazole [A]

AND

5 - Prescribed by or in consultation with an endocrinologist

3 . Endnotes

Per feedback from consultant, determining efficacy of ketoconazole therapy is difficult to determine as multiple dose adjustments often need to be made depending on patient's response. Consultant recommends failure to respond to therapy be defined as requiring more than 3-4 dose adjustments or no response after 4 months. [3]

Regranex (becaplermin)

Prior Authorization Guideline

Guideline ID	GL-228949
Guideline Name	Regranex (becaplermin)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Regranex Gel (becaplermin)
Diabetic Neuropathic Ulcers Indicated for the treatment of lower extremity diabetic neuropathic ulcers that extend into the subcutaneous tissue or beyond and have an adequate blood supply, when used as an adjunct to, and not a substitute for, good ulcer care practices including initial sharp debridement, pressure relief and infection control. Limitations of Use: The efficacy of Regranex Gel has not been established for the treatment of pressure ulcers and venous stasis ulcers and has not been evaluated for the treatment of diabetic neuropathic ulcers that do not extend through the dermis into subcutaneous tissue (Stage I or II, IAET staging classification) or ischemic diabetic ulcers. The effects of becaplermin on exposed joints, tendons, ligaments, and bone have not been established in humans. Regranex is not intended to be used in wounds that close by primary intention.

2 . Criteria

Product Name:Regranex	
Approval Length	5 Months [1, A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REGRANEX	BECAPLERMIN GEL 0.01%	90945020004020	Brand

Approval Criteria

1 - Patient has a lower extremity diabetic neuropathic ulcer

AND

2 - Treatment will be given in combination with ulcer wound care (e.g., debridement, infection control, and/or pressure relief) [1]

3 . Endnotes

Fifty percent of patients will achieve complete healing within 20 weeks with Regranex. Reassessment is required for further therapy. [1] If the ulcer does not decrease in size by approximately 30% after 10 weeks of treatment or complete healing has not occurred in 20 weeks, continued treatment with Regranex should be reassessed. Postmarketing studies have demonstrated an increased risk of mortality secondary to malignancy observed in patients treated with greater than or equal to 3 tubes of Regranex gel. [1]

Date	Notes

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228714
Guideline Name	Relyvrio (sodium phenylbutyrate and taurursodiol)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Relyvrio (sodium phenylbutyrate and taurursodiol)
Amyotrophic lateral sclerosis Indicated for the treatment of amyotrophic lateral sclerosis (ALS) in adults.

2 . Criteria

Product Name:Relyvrio	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Diagnosis amyotrophic lateral sclerosis (ALS)

AND

2 - Diagnosis of ALS is further supported by neurogenic changes in electromyography (EMG) [2]

AND

3 - Patient has had ALS symptoms for less than or equal to 18 months

AND

4 - Patient has a percent (%) forced vital capacity (%FVC) or slow vital capacity (%SVC) greater than or equal to 60% at the start of treatment

AND

5 - Patient does not require permanent noninvasive ventilation or invasive ventilation

AND

6 - Prescribed by or in consultation with a neurologist with expertise in the diagnosis of ALS

Product Name:Relyvrio	
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RELYVRIO	SODIUM PHENYLBUTYRATE-TAURURSODIOL POWD PACK 3-1 GM	74509902703020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., slowed disease progression)

AND

2 - Prescribed by or in consultation with a neurologist with expertise in the diagnosis of ALS

3 . Endnotes

Great care should be taken to rule out diseases that can masquerade as ALS. An evolution of atypical symptoms and a lack of progression of typical symptoms are the most important "red flags" suggesting an alternative diagnosis. [2]

Prior Authorization Guideline

Guideline ID	GL-228951
Guideline Name	Repository Corticotropin Gel Products - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Acthar Gel (repository corticotropin injection)
Infantile spasms [2, 3] Indicated as monotherapy for the treatment of infantile spasms in infants and children under 2 years of age. **Exacerbations of Multiple Sclerosis [4, 5]** Indicated for the treatment of acute exacerbations of multiple sclerosis in adults. Controlled clinical trials have shown Acthar Gel to be effective in speeding the resolution of acute exacerbations of multiple sclerosis. However, there is no evidence that it affects the ultimate outcome or natural history of the disease. **All Other Disease States [A]** *Please Note: The request for Acthar for the treatment of a condition other than Infantile Spasms (IS) or Exacerbations of Multiple Sclerosis (MS) is not authorized. There is no consensus in current peer-reviewed medical literature regarding the efficacy, safety, or long-term consequences of using repository corticotropin over conventional corticosteroids in these steroid-responsive conditions. **[Non-Approvable Use] Rheumatic Disorders* [6, 7, A]** As adjunctive therapy for short-term administration (to tide the patient over an acute episode or exacerbation) in: Psoriatic arthritis, Rheumatoid arthritis, including juvenile rheumatoid arthritis (selected cases may require low-

dose maintenance therapy), Ankylosing spondylitis.

[Non-Approvable Use] Collagen Diseases* [8-10, A] During an exacerbation or as maintenance therapy in selected cases of: systemic lupus erythematosus, systemic dermatomyositis (polymyositis).

[Non-Approvable Use] Dermatologic Diseases* [A] Severe erythema multiforme, Stevens-Johnson syndrome.

[Non-Approvable Use] Allergic States* [A] Serum sickness.

[Non-Approvable Use] Ophthalmic Diseases* [14, A] Severe acute and chronic allergic and inflammatory processes involving the eye and its adnexa such as: keratitis, iritis, iridocyclitis, diffuse posterior uveitis and choroiditis; optic neuritis; chorioretinitis; anterior segment inflammation.

[Non-Approvable Use] Respiratory Diseases* [11, A] Symptomatic sarcoidosis

[Non-Approvable Use] Edematous State* [12, 13, 15, A] To induce a diuresis or a remission of proteinuria in the nephrotic syndrome without uremia of the idiopathic type or that due to lupus erythematosus.

Drug Name: Purified Cortrophin Gel (repository corticotropin injection)

Exacerbations of Multiple Sclerosis [4, 5] Indicated for acute exacerbations of multiple sclerosis.

All Other Disease States [A] *Please Note: The request for Purified Cortrophin Gel for the treatment of a condition other than Infantile Spasms (IS) or Exacerbations of Multiple Sclerosis (MS) is not authorized. There is no consensus in current peer-reviewed medical literature regarding the efficacy, safety, or long-term consequences of using repository corticotropin over conventional corticosteroids in these steroid-responsive conditions.

[Non-Approvable Use] Rheumatic Disorders* [6, 7, A] Indicated as adjunctive therapy for short-term administration (to tide the patient over an acute episode or exacerbation) in: Psoriatic arthritis; Rheumatoid arthritis, including juvenile rheumatoid arthritis (selected cases may require low-dose maintenance therapy); Ankylosing spondylitis; Acute gouty arthritis.

[Non-Approvable Use] Collagen Diseases* [8-10, A] Indicated during an exacerbation or as maintenance therapy in selected cases of: systemic lupus erythematosus, systemic dermatomyositis (polymyositis).

[Non-Approvable Use] Dermatologic Diseases* [A] Indicated for severe erythema multiforme (Stevens-Johnson syndrome), severe psoriasis.

[Non-Approvable Use] Allergic States* [A] Indicated for atopic dermatitis, serum sickness.

[Non-Approvable Use] Ophthalmic Diseases* [14, A] Indicated for severe acute and chronic allergic and inflammatory processes involving the eye and its adnexa such as: allergic conjunctivitis, keratitis, iritis and iridocyclitis, diffuse posterior uveitis and choroiditis, optic

neuritis, chorioretinitis, anterior segment inflammation.

[Non-Approvable Use] Respiratory Diseases* [11, A] Indicated for symptomatic sarcoidosis.

[Non-Approvable Use] Edematous States* [12, 13, 15, A] Indicated to induce a diuresis or a remission of proteinuria in the nephrotic syndrome without uremia of the idiopathic type or that due to lupus erythematosus.

Off Label Uses: Infantile spasms [2, 3] Indicated as monotherapy for the treatment of infantile spasms in infants and children under 2 years of age.

2 . Criteria

CORTROPHIN	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand

Approval Criteria

1 - Diagnosis of infantile spasms (West Syndrome)

AND

2 - Prescribed by or in consultation with a neurologist

AND

3 - Patient is less than 2 years of age

Product Name:Acthar Gel, Purified Cortrophin Gel	
Diagnosis	Multiple Sclerosis
Approval Length	3 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ACTHAR	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand
CORTROPHIN	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand
ACTHAR GEL	CORTICOTROPIN SUBCUTANEOUS GEL AUTO-INJECTOR 40 UNIT/0.5ML	3030001000D120	Brand
ACTHAR GEL	CORTICOTROPIN SUBCUTANEOUS GEL AUTO-INJECTOR 80 UNIT/ML	3030001000D130	Brand

Approval Criteria

1 - Diagnosis of acute exacerbation of multiple sclerosis

AND

2 - Prescribed by or in consultation with a neurologist

AND

3 - One of the following:

3.1 Both of the following:

Patient is new to therapy with corticotropin

Trial and failure, contraindication, or intolerance to treatment with two high dose corticosteroid treatments (e.g., prednisone, IV methylprednisolone)

OR

3.2 All of the following:

Patient's multiple sclerosis exacerbations have been treated in the past with corticotropin

Patient has benefitted from treatment with corticotropin for acute exacerbations of multiple sclerosis

Medication is being used to treat a new exacerbation of multiple sclerosis

Product Name:Acthar Gel, Purified Cortrophin Gel	
Diagnosis	All Other Indications [A]
Approval Length	N/A - Requests for non-approvable diagnoses should not be approved
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ACTHAR	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand
CORTROPHIN	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand
ACTHAR GEL	CORTICOTROPIN SUBCUTANEOUS GEL AUTO-INJECTOR 40 UNIT/0.5ML	3030001000D120	Brand
ACTHAR GEL	CORTICOTROPIN SUBCUTANEOUS GEL AUTO-INJECTOR 80 UNIT/ML	3030001000D130	Brand

Approval Criteria

1 - The request for Acthar Gel and Purified Cortrophin Gel for the treatment of a condition other than Infantile Spasms (IS) or Exacerbations of Multiple Sclerosis (MS) is not authorized and will not be approved. There is no consensus in current peer-reviewed medical literature regarding the efficacy, safety, or long-term consequences of using repository corticotropin over conventional corticosteroids in these steroid-responsive conditions:

Rheumatic Disorders* [6, 7, A] As adjunctive therapy for short-term administration (to tide the patient over an acute episode or exacerbation) in: Psoriatic arthritis, Rheumatoid arthritis, including juvenile rheumatoid arthritis (selected cases may require low-dose maintenance therapy), Ankylosing spondylitis, Acute gouty arthritis.

Collagen Diseases* [8-10, A] During an exacerbation or as maintenance therapy in selected cases of: systemic lupus erythematosus, systemic dermatomyositis (polymyositis).

Dermatologic Diseases* [A] Severe erythema multiforme, Stevens-Johnson syndrome, Severe psoriasis.

Allergic States* [A] Serum sickness, Atopic dermatitis.

Ophthalmic Diseases* [14, A] Severe acute and chronic allergic and inflammatory processes involving the eye and its adnexa such as: keratitis, iritis, iridocyclitis, diffuse posterior uveitis and choroiditis; optic neuritis; chorioretinitis; anterior segment inflammation; Allergic conjunctivitis.

Respiratory Diseases* [11, A] Symptomatic sarcoidosis.

Edematous State* [12, 13, 15, A] To induce a diuresis or a remission of proteinuria in the nephrotic syndrome without uremia of the idiopathic type or that due to lupus erythematosus.

Any other disease state not mentioned [A]*

Notes	*Other disease states lack published clinical literature to support the use of Acthar or Purified Cortrophin Gel [A]

Product Name:Acthar Gel 80 unit/mL vial, Purified Cortrophin Gel [off-label]	
Diagnosis	Infantile Spasms (West Syndrome)
Approval Length	4 Week(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ACTHAR	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand
CORTROPHIN	CORTICOTROPIN INJ GEL 80 UNIT/ML	30300010004010	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of infantile spasms (West Syndrome)

AND

2 - Prescribed by or in consultation with a neurologist

AND

3 - Patient is less than 2 years of age

Product Name:Acthar Gel 40 unit/0.5 mL auto-injector, Acthar gel 80 unit/mL auto-injector	
Diagnosis	Multiple Sclerosis
Approval Length	3 Week(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ACTHAR GEL	CORTICOTROPIN SUBCUTANEOUS GEL AUTO-INJECTOR 40 UNIT/0.5ML	3030001000D120	Brand
ACTHAR GEL	CORTICOTROPIN SUBCUTANEOUS GEL AUTO-INJECTOR 80 UNIT/ML	3030001000D130	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of acute exacerbation of multiple sclerosis

AND

2 - Prescribed by or in consultation with a neurologist

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following:

3.1 Both of the following:

Patient is new to therapy with corticotropin

Trial and failure, contraindication, or intolerance to treatment with two high dose corticosteroid treatments (e.g., prednisone, IV methylprednisolone)

OR

3.2 All of the following:

Patient's multiple sclerosis exacerbations have been treated in the past with corticotropin

Patient has benefitted from treatment with corticotropin for acute exacerbations of multiple sclerosis

Medication is being used to treat a new exacerbation of multiple sclerosis

Product Name:Acthar Gel 40 unit/0.5 mL auto-injector, Acthar gel 80 unit/mL auto-injector	
Diagnosis	All Other Indications [A]
Approval Length	N/A - Requests for non-approvable diagnoses should not be approved
Guideline Type	Non Formulary

5 . Revision History

Date	Notes

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233244
Guideline Name	Retevmo (selpercatinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	7/15/2020
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Retevmo (selpercatinib)
Non-Small Cell Lung Cancer (NSCLC) Indicated for the treatment of adult patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with a rearranged during transfection (RET) gene fusion, as detected by an FDA-approved test. **Medullary Thyroid Cancer (MTC)** Indicated for the treatment of adults and pediatric patients 2 years of age and older with advanced or metastatic medullary thyroid cancer (MTC) with a RET mutation, as detected by an FDA-approved test, who require systemic therapy. **Thyroid Cancer** Indicated for the treatment of adults and pediatric patients 2 years of age and older with advanced or metastatic thyroid cancer with a RET gene fusion, as detected by an FDA-approved test, who require systemic therapy and who are radioactive iodine-refractory (if radioactive iodine is appropriate). **Solid Tumors** Indicated for the treatment of adults and pediatric patients 2 years of age or older with locally advanced or metastatic solid tumors with a RET gene fusion, as detected by

an FDA-approved test, that have progressed on or following prior systemic treatment or who have no satisfactory alternative treatment options. This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trial(s).

2 . Criteria

Product Name:Retevmo Tablets, Retevmo Capsules	
Diagnosis	Non-Small Cell Lung Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RETEVMO	SELPERCATINIB CAP 40 MG	21535779000120	Brand
RETEVMO	SELPERCATINIB CAP 80 MG	21535779000140	Brand
RETEVMO	SELPERCATINIB TAB 40 MG	21535779000320	Brand
RETEVMO	SELPERCATINIB TAB 80 MG	21535779000330	Brand
RETEVMO	SELPERCATINIB TAB 120 MG	21535779000340	Brand
RETEVMO	SELPERCATINIB TAB 160 MG	21535779000350	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is ONE of the following:

Locally Advanced

Metastatic

AND

3 - Disease has presence of rearranged during transfection (RET) gene fusion-positive tumor(s) as detected by a U.S. Food and Drug Administration (FDA) - approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

Product Name:Retevmo Tablets, Retevmo Capsules	
Diagnosis	Medullary Thyroid Cancer (MTC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RETEVMO	SELPERCATINIB CAP 40 MG	21535779000120	Brand
RETEVMO	SELPERCATINIB CAP 80 MG	21535779000140	Brand
RETEVMO	SELPERCATINIB TAB 40 MG	21535779000320	Brand
RETEVMO	SELPERCATINIB TAB 80 MG	21535779000330	Brand
RETEVMO	SELPERCATINIB TAB 120 MG	21535779000340	Brand
RETEVMO	SELPERCATINIB TAB 160 MG	21535779000350	Brand

Approval Criteria

1 - Diagnosis of medullary thyroid cancer (MTC)

AND

2 - Disease is ONE of the following:

Advanced

Metastatic

AND

3 - Patient is 2 years of age or older

AND

4 - Disease has presence of rearranged during transfection (RET) gene mutation tumor(s) as detected by a U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Disease requires treatment with systemic therapy

Product Name:Retevmo Tablets, Retevmo Capsules	
Diagnosis	Thyroid Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RETEVMO	SELPERCATINIB CAP 40 MG	21535779000120	Brand

RETEVMO	SELPERCATINIB TAB 40 MG	21535779000320	Brand
RETEVMO	SELPERCATINIB TAB 80 MG	21535779000330	Brand
RETEVMO	SELPERCATINIB TAB 120 MG	21535779000340	Brand
RETEVMO	SELPERCATINIB TAB 160 MG	21535779000350	Brand

Approval Criteria

1 - Diagnosis of thyroid cancer

AND

2 - Disease is ONE of the following:

Advanced

Metastatic

AND

3 - Patient is 2 years of age or older

AND

4 - Disease has presence of rearranged during transfection (RET) gene fusion-positive tumor(s) as detected by a U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Disease requires treatment with systemic therapy

AND

6 - ONE of the following

Patient is radioactive iodine-refractory

Radioactive iodine therapy is not appropriate

Product Name:Retevmo Tablets, Retevmo Capsules	
Diagnosis	Solid Tumors
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RETEVMO	SELPERCATINIB CAP 40 MG	21535779000120	Brand
RETEVMO	SELPERCATINIB CAP 80 MG	21535779000140	Brand
RETEVMO	SELPERCATINIB TAB 40 MG	21535779000320	Brand

RETEVMO	SELPERCATINIB TAB 160 MG	21535779000350	Brand

Approval Criteria

1 - Diagnosis of solid tumors

AND

2 - Disease is ONE of the following:

Locally Advanced

Metastatic

AND

3 - Patient is 2 years of age or older

AND

4 - Disease has presence of rearranged during transfection (RET) gene fusion-positive tumor(s) as detected by a U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [A, 1]

AND

5 - ONE of the following:

Disease has progressed on or following prior systemic treatment (e.g., chemotherapy)

There are no satisfactory alternative treatment options

Product Name:Retevmo Tablets, Retevmo Capsules	
Diagnosis	Non-Small Cell Lung Cancer, Medullary Thyroid Cancer (MTC), Thyroid Cancer, Solid Tumors
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RETEVMO	SELPERCATINIB CAP 40 MG	21535779000120	Brand
RETEVMO	SELPERCATINIB CAP 80 MG	21535779000140	Brand
RETEVMO	SELPERCATINIB TAB 40 MG	21535779000320	Brand
RETEVMO	SELPERCATINIB TAB 80 MG	21535779000330	Brand
RETEVMO	SELPERCATINIB TAB 120 MG	21535779000340	Brand
RETEVMO	SELPERCATINIB TAB 160 MG	21535779000350	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

An FDA-approved companion diagnostic test for the detection of RET gene fusions and RET gene mutations in plasma or in tumors other than NSCLC and thyroid cancer is not currently available.

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	
P&T Revision Date:	12/18/2024

1 . Indications

Drug Name: Beovu (brolucizumab)
Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of neovascular (wet) age-related macular degeneration (nAMD). **Diabetic Macular Edema (DME)** Indicated for the treatment of diabetic macular edema (DME).
Drug Name: Eylea (aflibercept)
Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of neovascular (wet) age-related macular degeneration (nAMD). **Macular Edema Following Retinal Vein Occlusion** Indicated for the treatment of patients with macular edema following retinal vein occlusion (RVO). **Diabetic Macular Edema** Indicated for the treatment of patients with diabetic macular edema

(DME).

Diabetic Retinopathy Indicated for the treatment of diabetic retinopathy (DR).

Retinopathy of Prematurity (ROP) Indicated for the treatment of retinopathy of prematurity (ROP).

Drug Name: Eylea HD (aflibercept)

Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of neovascular (wet) age-related macular degeneration (nAMD).

Diabetic Macular Edema Indicated for the treatment of patients with diabetic macular edema (DME).

Diabetic Retinopathy Indicated for the treatment of diabetic retinopathy (DR).

Drug Name: Lucentis 0.5mg (ranibizumab), Byooviz (ranibizumab-nuna), Cimerli 0.5mg (ranibizumab-eqrn)

Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of patients with neovascular (wet) age-related macular degeneration (nAMD).

Macular Edema Following Retinal Vein Occlusion Indicated for the treatment of patients with macular edema following retinal vein occlusion (RVO).

Myopic Choroidal Neovascularization Indicated for the treatment of patients with myopic choroidal neovascularization (mCNV).

Drug Name: Lucentis 0.3 mg (ranibizumab), Cimerli 0.3mg (ranibizumab-eqrn)

Diabetic Macular Edema Indicated for the treatment of patients with diabetic macular edema (DME).

Diabetic Retinopathy Indicated for the treatment of diabetic retinopathy (DR).

Drug Name: Susvimo (ranibizumab)

Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of patients with neovascular (wet) age-related macular degeneration (nAMD) who have previously responded to at least two intravitreal injections of a vascular endothelial growth factor (VEGF) inhibitor.

Drug Name: Vabysmo (faricimab-svoa)

Diabetic Macular Edema Indicated for the treatment of patients with diabetic macular edema (DME).

Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of

patients with neovascular (wet) age-related macular degeneration (nAMD).

Macular Edema Following Retinal Vein Occlusion Indicated for the treatment of patients with macular edema following retinal vein occlusion.

Drug Name: Pavblu (aflibercept-ayyh)

Neovascular (Wet) Age-Related Macular Degeneration Indicated for the treatment of neovascular (wet) age-related macular degeneration (nAMD).

Macular Edema Following Retinal Vein Occlusion Indicated for the treatment of patients with macular edema following retinal vein occlusion (RVO).

Diabetic Macular Edema Indicated for the treatment of patients with diabetic macular edema (DME).

Diabetic Retinopathy Indicated for the treatment of diabetic retinopathy (DR).

2 . Criteria

PAVBLU	AFLIBERCEPT-AYYH INTRAVITREAL SOLN PREF SYR 2 MG/0.05ML	8665501014E520	Brand
PAVBLU	AFLIBERCEPT-AYYH INTRAVITREAL INJ 2 MG/0.05ML (40 MG/ML)	86655010142020	Brand

Approval Criteria

1 - One of the following diagnoses:

Neovascular (wet) age-related macular degeneration (nAMD) [A]

Macular edema following retinal vein occlusion (RVO)

Diabetic macular edema (DME)

Diabetic retinopathy (DR)

AND

2 - Prescribed by or in consultation with an ophthalmologist experienced in the treatment of retinal diseases

Product Name:Eylea, Pavblu	
Diagnosis	Neovascular (Wet) Age-Related Macular Degeneration, Macular Edema Following Retinal Vein Occlusion, Diabetic Macular Edema, Diabetic Retinopathy
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EYLEA	AFLIBERCEPT INTRAVITREAL SOLN PREF SYR 2 MG/0.05ML	8665501000E520	Brand
EYLEA	AFLIBERCEPT INTRAVITREAL INJ 2 MG/0.05ML (40 MG/ML)	86655010002020	Brand

PAVBLU	AFLIBERCEPT-AYYH INTRAVITREAL INJ 2 MG/0.05ML (40 MG/ML)	86655010142020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., Improvement in Best Corrected Visual Acuity (BCVA) compared to baseline, stable vision)

Product Name:Eylea Injectable Vial	
Diagnosis	Retinopathy of Prematurity (ROP) [2, C]
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EYLEA	AFLIBERCEPT INTRAVITREAL INJ 2 MG/0.05ML (40 MG/ML)	86655010002020	Brand

Approval Criteria

1 - Diagnosis of retinopathy of prematurity (ROP)

AND

2 - ONE of the following: [2]

Patient gestational age at birth less than or equal to 32 weeks [D]

Patient birth weight less than or equal to 1500 grams

AND

3 - Patient weight greater than 800 grams on day of treatment [2]

AND

4 - Retinopathy of prematurity (ROP) is present in at least one eye with one of the following classifications: [2, E-H]

ROP zone 1, stage 1 plus, 2 plus, 3, or 3 plus

ROP zone 2, stage 2 plus or 3 plus

AP - ROP (aggressive posterior ROP)

AND

5 - Prescribed by or in consultation with an ophthalmologist experienced in the treatment of retinal diseases [I, 13 -14]

Product Name:Eylea Injectable Vial	
Diagnosis	Retinopathy of Prematurity (ROP) [2, C]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EYLEA	AFLIBERCEPT INTRAVITREAL INJ 2 MG/0.05ML (40 MG/ML)	86655010002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by the absence of active ROP and unfavorable structural outcomes (e.g., retinal detachment, macular dragging, macular fold, retrolental opacity) [2]

AND

2 - Prescribed by or in consultation with an ophthalmologist experienced in the treatment of retinal diseases [I, 13 -14]

Product Name:Eylea HD	
Diagnosis	Neovascular (Wet) Age-Related Macular Degeneration, Diabetic Macular Edema, Diabetic Retinopathy
Approval Length	12 month(s)

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., Improvement in Best Corrected Visual Acuity (BCVA) compared to baseline, stable vision)

3 . Definitions

Definition	Description
Retinopathy of Prematurity (ROP)	Retinopathy of prematurity (ROP) is a developmental vascular proliferative disorder that occurs in the retina of preterm infants with incomplete retinal vascularization. ROP is an important cause of severe visual impairment in childhood. [11]

4 . Endnotes

Neovascular Age-Related Macular Degeneration (nAMD) may also be referred to as wet or exudative AMD. [1]

Congress established the 503(B) facilities to provide compounded pharmaceuticals for office use without a prescription. 503(B) Outsourcing Facilities are compounding pharmacies that must meet higher federal safety, sterility, and quality control standards. [4,5]

Each sterile vial should only be used for the treatment of a single eye. Do not use the EYLEA pre-filled syringe for the treatment of ROP. [2]

Gestational age: The length of time between a baby's conception and birth. [10]

How serious the ROP is depends on what part of the eye is affected (the zone); how far the disease has progressed (the stage); and whether the blood vessels themselves are markedly abnormal (plus disease). Stages 1 and 2 are considered mild; Stages 3-5 are increasingly serious. [10]

Zone 1: This represents the least amount of retinal vascular development and includes retinal vascularization limited to a circular area centered around the optic nerve. Zone I ROP is a strong predictor for severe ROP. Zone 2: Vascularization limited to the circular area outside zone I with the optic nerve as the center. Zone 3: Vascularization within the remaining temporal, crescent-shaped area. Once vascularization extends to the nasal ora serrata and into zone III, there is little risk of a poor visual outcome from ROP. [11]

Plus disease. Defined as two quadrants of dilated and tortuous vessels and is a strong predictor of severe ROP. [11]

Stage 1. A demarcation line between vascularized and avascular retina. Stage 2. A ridge with volume in the region of the demarcation line. Stage 3. Neovascularization growing into the vitreous at the ridge. Stage 3 is a strong predictor of severe ROP and a poor outcome. Stage 4. A partial retinal detachment. Treatment of progressive stage 4 ROP can preserve and improve visual outcomes by preventing stage 5 ROP. Stage 4 is further classified by whether the macula is involved (4A without macular involvement and 4B with macular involvement) and by whether it is predominantly exudative or tractional. Exudative ROP that occurs after treatment with laser or cryotherapy may resolve spontaneously. Stage 5. Total retinal detachment. [11]

Examinations for ROP should be performed by an ophthalmologist who is experienced in the examination of preterm infants for ROP using a binocular indirect ophthalmoscope. Pediatric ophthalmology and retina fellows are less adept than experienced attending ophthalmologists at identifying clinically significant ROP when examining digital images. [13, 14]

Eylea HD contains a higher molar dose of aflibercept designed to allow for longer dosing intervals between treatments. [16]

Revlimid (lenalidomide)

Prior Authorization Guideline

Guideline ID	GL-228952
Guideline Name	Revlimid (lenalidomide)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Revlimid (lenalidomide)
Myelodysplastic Syndromes Indicated for the treatment of adult patients with transfusion-dependent anemia due to low- or intermediate-1-risk myelodysplastic syndromes (MDS) associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities. Limitations of Use: Not indicated and is not recommended for the treatment of patients with CLL outside of controlled clinical trials. [A] **Multiple Myeloma** In combination with dexamethasone is indicated for the treatment of adult patients with multiple myeloma (MM). Also indicated as maintenance therapy in adult patients with MM following autologous hematopoietic stem cell transplantation (auto-HSCT). Limitations of Use: Not indicated and is not recommended for the treatment of patients with CLL outside of controlled clinical trials. [A] **Mantle Cell Lymphoma (MCL)** Indicated for the treatment of adult patients with mantle cell lymphoma (MCL) whose disease has relapsed or progressed after two prior therapies, one of which included bortezomib. Limitations of Use: Not indicated and is not recommended for the treatment of patients with CLL outside of controlled clinical trials. [A] **Follicular Lymphoma (FL)** Revlimid in combination with a rituximab product, is indicated for

the treatment of adult patients with previously treated follicular lymphoma (FL). Limitations of Use: Not indicated and is not recommended for the treatment of patients with CLL outside of controlled clinical trials. [A]

Marginal Zone Lymphoma (MZL) Revlimid in combination with a rituximab product, is indicated for the treatment of adult patients with previously treated marginal zone lymphoma (MZL). Limitations of Use: Not indicated and is not recommended for the treatment of patients with CLL outside of controlled clinical trials. [A]

2 . Criteria

Product Name:Brand Revlimid, Generic lenalidomide	
Diagnosis	Myelodysplastic Syndromes, Multiple Myeloma, Mantle Cell Lymphoma, Follicular Lymphoma, Marginal Zone Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

REVLIMID	LENALIDOMIDE CAPS 2.5 MG	99394050000110	Brand
REVLIMID	LENALIDOMIDE CAP 20 MG	99394050000145	Brand
LENALIDOMIDE	LENALIDOMIDE CAP 5 MG	99394050000120	Generic
LENALIDOMIDE	LENALIDOMIDE CAP 10 MG	99394050000130	Generic
LENALIDOMIDE	LENALIDOMIDE CAP 15 MG	99394050000140	Generic
LENALIDOMIDE	LENALIDOMIDE CAP 25 MG	99394050000150	Generic
LENALIDOMIDE	LENALIDOMIDE CAPS 2.5 MG	99394050000110	Generic
LENALIDOMIDE	LENALIDOMIDE CAP 20 MG	99394050000145	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

Although the prescribing information for Revlimid states that it is not indicated and is not recommended for the treatment of patients with CLL outside of controlled clinical trials due to the increased risk of mortality, current NCCN practice guideline still recommends single agent lenalidomide or in combination with rituximab for relapsed/refractory CLL. [1, 2]

Prior Authorization Guideline

Guideline ID	GL-228716
Guideline Name	Reyvow (lasmiditan) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Reyvow (lasmiditan)
Migraine Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Reyvow is not indicated for the preventive treatment of migraine.

2 . Criteria

Product Name:Reyvow	
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REYVOW	LASMIDITAN SUCCINATE TAB 50 MG	67406540600310	Brand
REYVOW	LASMIDITAN SUCCINATE TAB 100 MG	67406540600320	Brand

Approval Criteria

1 - Diagnosis of migraine with or without aura

AND

2 - Will be used for the acute treatment of migraine

AND

3 - Patient has less than 15 headache days per month [2]

AND

4 - Patient is 18 years of age or older [A]

AND

5 - One of the following: [3]

Trial and failure or intolerance to two triptans (e.g., eletriptan, rizatriptan, sumatriptan)

Contraindication to all triptans

AND

6 - If patient has 4 or more headache days per month, patient must be currently treated with one of the following: [B, 3]:

Elavil (amitriptyline) or Effexor (venlafaxine) unless there is a contraindication or intolerance to these medications

Depakote/Depakote ER (divalproex sodium) or Topamax (topiramate) unless there is a contraindication or intolerance to these medications

A beta blocker (i.e., atenolol, propranolol, nadolol, timolol, or metoprolol) unless there is a contraindication or intolerance to these medications

Atacand (candesartan) unless there is a contraindication or intolerance to this medication

Generic lisinopril unless there is a contraindication or intolerance to this medication

AND

7 - Will not be used concomitantly with central nervous system (CNS) depressants (e.g., alprazolam, phenobarbital, alcohol)

AND

8 - Prescriber attests that the patient has been counseled and has agreed to adhere to the following: Will follow instructions to not drive or operate machinery until at least 8 hours after taking each dose of Reyvow

AND

9 - Trial and failure, contraindication, or intolerance to two of the following:

Nurtec

Ubrelvy

Zavzpret

Product Name:Reyvow	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REYVOW	LASMIDITAN SUCCINATE TAB 50 MG	67406540600310	Brand
REYVOW	LASMIDITAN SUCCINATE TAB 100 MG	67406540600320	Brand

Approval Criteria

1 - Patient has experienced a positive response to therapy (e.g., reduction in pain, photophobia, phonophobia, nausea)

AND

2 - Will not be used for preventive treatment of migraine

AND

3 - Trial and failure, contraindication, or intolerance to two of the following:

Nurtec

Ubrelvy

Zavzpret

Product Name:Reyvow	
Approval Length	3 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
REYVOW	LASMIDITAN SUCCINATE TAB 50 MG	67406540600310	Brand
REYVOW	LASMIDITAN SUCCINATE TAB 100 MG	67406540600320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of migraine with or without aura

AND

2 - Submission of medical records (e.g., chart notes) confirming drug will be used for the acute treatment of migraine

AND

3 - Submission of medical records (e.g., chart notes) confirming patient has less than 15 headache days per month [2]

AND

4 - Patient is 18 years of age or older [A]

AND

5 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following: [3]

Trial and failure or intolerance to two triptans (e.g., eletriptan, rizatriptan, sumatriptan)

Contraindication to all triptans

AND

6 - Paid claims or submission of medical records (e.g., chart notes) confirming that if patient has 4 or more headache days per month, patient must be currently treated with one of the following: [B, 3]:

Elavil (amitriptyline) or Effexor (venlafaxine) unless there is a contraindication or intolerance to these medications

Depakote/Depakote ER (divalproex sodium) or Topamax (topiramate) unless there is a contraindication or intolerance to these medications

A beta blocker (i.e., atenolol, propranolol, nadolol, timolol, or metoprolol) unless there is a contraindication or intolerance to these medications

Atacand (candesartan) unless there is a contraindication or intolerance to this medication

Generic lisinopril unless there is a contraindication or intolerance to this medication

AND

7 - Will not be used concomitantly with central nervous system (CNS) depressants (e.g., alprazolam, phenobarbital, alcohol)

AND

8 - Submission of medical records (e.g., chart notes) confirming that the patient has been counseled and has agreed to adhere to the following: Will follow instructions to not drive or operate machinery until at least 8 hours after taking each dose of Reyvow

AND

9 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to two of the following:

Nurtec

Ubrelvy

Zavzpret

3 . Endnotes

The safety and effectiveness in pediatric patients has not been established [1].

The American Academy of Neurology supports the use of the following medications for the prevention of episodic migraine in adult patients (with level A or B evidence): antidepressants [i.e., Elavil (amitriptyline), Effexor (venlafaxine)], antiepileptics [i.e., Depakote/Depakote ER (divalproex sodium), Topamax (topiramate)], and beta-blockers [i.e., atenolol, propranolol, nadolol, timolol, metoprolol] [4].

Prior Authorization Guideline

Guideline ID	GL-233284
Guideline Name	Rezdiffra (resmetirom) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/15/2024
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Rezdiffra (resmetirom)
Nonalcoholic steatohepatitis (NASH) Indicated in conjunction with diet and exercise for the treatment of adults with noncirrhotic nonalcoholic steatohepatitis (NASH) with moderate to advanced liver fibrosis (consistent with stages F2 to F3 fibrosis). This indication is approved under accelerated approval based on improvement of NASH and fibrosis. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials. Limitations of Use: Avoid use of Rezdiffra in patients with decompensated cirrhosis.

2 . Criteria

Product Name:Rezdiffra	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZDIFFRA	RESMETIROM 60 MG TAB	52601060000320	Brand
REZDIFFRA	RESMETIROM 80 MG TAB	52601060000330	Brand
REZDIFFRA	RESMETIROM 100 MG TAB	52601060000340	Brand

Approval Criteria

1 - Diagnosis of metabolic dysfunction-associated steatohepatitis (MASH), formerly known as nonalcoholic steatohepatitis (NASH)

AND

2 - Patient does not have cirrhosis (e.g., decompensated cirrhosis)

AND

3 - Submission of medical records (e.g., chart notes) confirming disease is fibrosis stage F2 or F3 as confirmed by one of the following: [4]

3.1 Both of the following:

Serum biomarker [e.g., enhanced liver fibrosis (ELF) test, fibrosis-4 index (FIB-4)]

Imaging biomarker [e.g., FibroScan, magnetic resonance imaging-proton density fat fraction (MRI-PDFF)]

OR

3.2 One of the following:

FibroScan aspartate aminotransferase (FAST)

MRI aspartate aminotransferase (MAST)

Magnetic Resonance Elastography combined with fibrosis-4 index (MEFIB)

Liver biopsy within the past 12 months

AND

4 - Presence of greater than or equal to 3 metabolic risk factors (e.g., Type 2 diabetes, hypertension, obesity) [3]

AND

5 - Submission of medical records (e.g., chart notes) confirming drug is used as an adjunct to lifestyle modification (e.g., dietary or caloric restriction, exercise, behavioral support, community based program)

AND

6 - Prescribed by or in consultation with one of the following:

Gastroenterologist

Hepatologist

Product Name:Rezdiffra	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZDIFFRA	RESMETIROM 60 MG TAB	52601060000320	Brand
REZDIFFRA	RESMETIROM 80 MG TAB	52601060000330	Brand

REZDIFFRA	RESMETIROM 100 MG TAB	52601060000340	Brand

Approval Criteria

1 - Patient demonstrates positive response to therapy (e.g., NASH resolution, fibrosis stage improvement, etc.)

AND

2 - Submission of medical records (e.g., chart notes) confirming drug will continue to be used as an adjunct to lifestyle modification (e.g., dietary or caloric restriction, exercise, behavioral support, community based program)

AND

3 - Submission of medical records (e.g., chart notes) confirming patient has not progressed to cirrhosis

Product Name:Rezdiffra	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
REZDIFFRA	RESMETIROM 60 MG TAB	52601060000320	Brand
REZDIFFRA	RESMETIROM 80 MG TAB	52601060000330	Brand
REZDIFFRA	RESMETIROM 100 MG TAB	52601060000340	Brand

Approval Criteria

1 - Diagnosis of metabolic dysfunction-associated steatohepatitis (MASH), formerly known as nonalcoholic steatohepatitis (NASH)

AND

2 - Patient does not have cirrhosis (e.g., decompensated cirrhosis)

AND

3 - Submission of medical records (e.g., chart notes) confirming disease is fibrosis stage F2 or F3 as confirmed by one of the following: [4]

3.1 Both of the following:

Serum biomarker [e.g., enhanced liver fibrosis (ELF) test, fibrosis-4 index (FIB-4)]

Imaging biomarker [e.g., FibroScan, magnetic resonance imaging-proton density fat fraction (MRI-PDFF)]

OR

3.2 One of the following:

FibroScan aspartate aminotransferase (FAST)

MRI aspartate aminotransferase (MAST)

Magnetic Resonance Elastography combined with fibrosis-4 index (MEFIB)

Liver biopsy within the past 12 months

AND

4 - Presence of greater than or equal to 3 metabolic risk factors (e.g., Type 2 diabetes, hypertension, obesity)

AND

5 - Submission of medical records (e.g., chart notes) confirming drug is used as an adjunct to lifestyle modification (e.g., dietary or caloric restriction, exercise, behavioral support, community based program)

AND

6 - Prescribed by or in consultation with one of the following:

Gastroenterologist

Hepatologist

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228517
Guideline Name	Rezlidhia (olutasidenib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rezlidhia (olutasidenib)
Acute Myeloid Leukemia (AML) Indicated for the treatment of adult patients with relapsed or refractory acute myeloid leukemia (AML) with a susceptible isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test.

2 . Criteria

Product Name:Rezlidhia	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZLIDHIA	OLUTASIDENIB CAP 150 MG	21534960000120	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Disease is one of the following:

Relapsed

Refractory

AND

3 - Presence of a susceptible isocitrate dehydrogenase-1 (IDH1) mutation as detected by a U.S. Food and Drug Administration (FDA)-approved test (e.g., Abbott RealTime IDH1 assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to Tibsovo (ivosidenib)

OR

4.2 For continuation of prior therapy

Product Name:Rezlidhia	
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZLIDHIA	OLUTASIDENIB CAP 150 MG	21534960000120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to Tibsovo (ivosidenib)

OR

2.2 For continuation of prior therapy

Product Name:Rezlidhia	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
REZLIDHIA	OLUTASIDENIB CAP 150 MG	21534960000120	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Disease is one of the following:

Relapsed

Refractory

AND

3 - Presence of a susceptible isocitrate dehydrogenase-1 (IDH1) mutation as detected by a U.S. Food and Drug Administration (FDA)-approved test (e.g., Abbott RealTime IDH1 assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - One of the following:

4.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Tibsovo (ivosidenib)

OR

4.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of therapy, defined as no more than a 45-day gap in therapy

Prior Authorization Guideline

Guideline ID	GL-228520
Guideline Name	Rezurock (belumosudil) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rezurock (belumosudil)
Chronic graft-versus-host disease Indicated for the treatment of chronic graft-versus-host disease (chronic GVHD) after failure of at least two prior lines of systemic therapy in adult and pediatric patients 12 years and older.

2 . Criteria

Product Name:Rezurock	
Diagnosis	Chronic graft-versus-host disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZUROCK	BELUMOSUDIL MESYLATE TAB 200 MG	99398510500320	Brand

Approval Criteria

1 - Diagnosis of chronic graft-versus-host disease

AND

2 - Trial and failure of two or more lines of systemic therapy (e.g., corticosteroids, mycophenolate, etc.)

AND

3 - Patient is 12 years of age or older

Product Name:Rezurock	
Diagnosis	Chronic graft-versus-host disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZUROCK	BELUMOSUDIL MESYLATE TAB 200 MG	99398510500320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Rezurock	
Diagnosis	Chronic graft-versus-host disease

Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
REZUROCK	BELUMOSUDIL MESYLATE TAB 200 MG	99398510500320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of chronic graft-versus-host disease

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure of three or more lines of systemic therapy (e.g., corticosteroids, mycophenolate, etc.)(2)

AND

3 - Patient is 12 years of age or older

Product Name:Rezurock	
Diagnosis	Chronic graft-versus-host disease - Twice daily (BID) Therapy
Approval Length	12 month(s)
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
REZUROCK	BELUMOSUDIL MESYLATE TAB 200 MG	99398510500320	Brand

Approval Criteria

1 - Patient is using medication concomitantly with one of the following:

Strong CYP3A inducer (e.g., carbamazepine, phenobarbital, phenytoin, rifampin)

Proton pump inhibitor (e.g., omeprazole, pantoprazole, lansoprazole)

Prior Authorization Guideline

Guideline ID	GL-228718
Guideline Name	Rezzayo (rezafungin)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rezzayo (rezafungin)
Candidemia and invasive candidiasis Indicated in patients 18 years of age or older who have limited or no alternative options for the treatment of candidemia and invasive candidiasis. Approval of this indication is based on limited clinical safety and efficacy data for Rezzayo. Limitations of Use Rezzayo has not been studied in patients with endocarditis, osteomyelitis, and meningitis due to Candida.

2 . Criteria

Product Name:Rezzayo	
Approval Length	1 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REZZAYO	REZAFUNGIN ACETATE FOR IV SOLN 200 MG (BASE EQUIVALENT)	11500070102120	Brand

Approval Criteria

1 - Diagnosis of candidemia or invasive candidiasis with limited or no alternative options

AND

2 - Patient is 18 years of age or older

AND

3 - Trial and failure, contraindication or intolerance to one of the following [2]:

generic caspofungin

generic micafungin

Prior Authorization Guideline

Guideline ID	GL-228957
Guideline Name	Riluzole Products - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Exservan (riluzole film), Rilutek (riluzole tablets), Tiglutik (riluzole suspension), Teglutik (riluzole suspension)
Amyotrophic Lateral Sclerosis (ALS) Indicated for the treatment of patients with amyotrophic lateral sclerosis (ALS).

2 . Criteria

Product Name:Brand Rilutek, Teglutik, Tiglutik	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RILUTEK	RILUZOLE TAB 50 MG	74503070000320	Brand
TIGLUTIK	RILUZOLE SUSP 50 MG/10ML	74503070001820	Brand
TEGLUTIK	RILUZOLE SUSP 50 MG/10ML	74503070001820	Brand

Approval Criteria

1 - Diagnosis of amyotrophic lateral sclerosis (ALS)

AND

2 - Trial and failure or intolerance to generic riluzole tablets

Product Name:Exservan	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EXSERVAN	RILUZOLE ORAL FILM 50 MG	74503070008220	Brand

Approval Criteria

1 - Diagnosis of amyotrophic lateral sclerosis (ALS)

AND

2 - Trial and failure or intolerance to both of the following:

generic riluzole tablets

Tiglutik suspension or Teglutik suspension

Product Name:Exservan	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
EXSERVAN	RILUZOLE ORAL FILM 50 MG	74503070008220	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of amyotrophic lateral sclerosis (ALS)

AND

2 - Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) with both of the following formulary alternatives that have the same active ingredients:

generic riluzole tablets

Tiglutik suspension or Teglutik suspension

AND

3 - Submission of medical records confirming the formulary alternatives have not been effective and valid clinical rationale provided explaining how the Non-Formulary or Excluded Medication is expected to provide benefit when the formulary alternatives have not been shown to be effective despite having the same active ingredient

Prior Authorization Guideline

Guideline ID	GL-228958
Guideline Name	Rinvoq (upadacitinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rinvoq (upadacitinib) extended-release (ER) tablets
Rheumatoid Arthritis (RA) Indicated for the treatment of adults with moderately to severely active rheumatoid arthritis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Rinvoq in combination with other Janus kinase (JAK) inhibitors, biologic disease-modifying antirheumatic drugs (DMARDs), or with potent immunosuppressants such as azathioprine and cyclosporine, is not recommended. **Ankylosing Spondylitis (AS)** Indicated for the treatment of adults with active ankylosing spondylitis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Rinvoq in combination with other JAK inhibitors, biologic DMARDs, or with potent immunosuppressants such as azathioprine and cyclosporine, is not recommended. **Non-radiographic Axial Spondyloarthritis (nr-AxSpA)** Indicated for the treatment of adults with active non-radiographic axial spondyloarthritis with objective signs of inflammation who have had an inadequate response or intolerance to TNF blocker therapy. Limitations of Use: Rinvoq is not recommended for use in combination with other JAK inhibitors, biologic DMARDs, or with potent immunosuppressants such as azathioprine and cyclosporine.

Atopic Dermatitis (AD) Indicated for the treatment of adults and pediatric patients 12 years of age and older with refractory, moderate to severe atopic dermatitis whose disease is not adequately controlled with other systemic drug products, including biologics, or when use of those therapies are inadvisable. Limitations of Use: Rinvoq is not recommended for use in combination with other JAK inhibitors, biologic immunomodulators, or with other immunosuppressants.

Crohn's Disease (CD) Indicated for the treatment of adult patients with moderately to severely active Crohn's disease who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Rinvoq is not recommended for use in combination with other JAK inhibitors, biological therapies for Crohn's disease, or with potent immunosuppressants such as azathioprine and cyclosporine.

Ulcerative Colitis (UC) Indicated for the treatment of adult patients with moderately to severely active ulcerative colitis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Rinvoq is not recommended for use in combination with other JAK inhibitors, biological therapies for ulcerative colitis, or with potent immunosuppressants such as azathioprine and cyclosporine.

Drug Name: Rinvoq (upadacitinib) ER tablets, Rinvoq LQ (upadacitinib) oral solution

Psoriatic Arthritis (PsA) Indicated for the treatment of adults and pediatric patients 2 years of age and older with active psoriatic arthritis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Rinvoq/Rinvoq LQ in combination with other JAK inhibitors, biologic DMARDs, or with potent immunosuppressants such as azathioprine and cyclosporine, is not recommended.

Polyarticular Juvenile Idiopathic Arthritis (PJIA) Indicated for the treatment of patients 2 years of age and older with active polyarticular juvenile idiopathic arthritis (pJIA) who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Rinvoq/Rinvoq LQ in combination with other JAK inhibitors, biologic DMARDs, or with potent immunosuppressants such as azathioprine and cyclosporine, is not recommended.

2 . Criteria

Product Name:Rinvoq	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

methotrexate

leflunomide

sulfasalazine

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - Not used in combination with other Janus kinase (JAK) inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq, Rinvoq LQ	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

RINVOQ LQ	UPADACITINIB ORAL SOLN 1 MG/ML	66603072002020	Brand

Approval Criteria

1 - Diagnosis of active polyarticular juvenile idiopathic arthritis (PJIA)

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 6-week trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [4]:

leflunomide

methotrexate

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, etanercept)

AND

5 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq/Rinvoq LQ may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq, Rinvoq LQ	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand
RINVOQ LQ	UPADACITINIB ORAL SOLN 1 MG/ML	66603072002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq/Rinvoq LQ may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq, Rinvoq LQ	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

RINVOQ LQ	UPADACITINIB ORAL SOLN 1 MG/ML	66603072002020	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [5]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq/Rinvoq LQ may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq, Rinvoq LQ	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 5]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq/Rinvoq LQ may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Ankylosing Spondylitis (AS)

Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [6]

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq

Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 6]:

Disease activity (e.g., pain, fatigue, inflammation, stiffness)

Lab values (erythrocyte sedimentation rate, C-reactive protein level)

Function

Axial status (e.g., lumbar spine motion, chest expansion)

Total active (swollen and tender) joint count

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-AxSpA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

Approval Criteria

1 - Diagnosis of active non-radiographic axial spondyloarthritis

AND

2 - Patient has objective signs of inflammation (e.g., C-reactive protein [CRP] levels above the upper limit of normal and/or sacroiliitis on magnetic resonance imaging [MRI], indicative of inflammatory disease, but without definitive radiographic evidence of structural damage on sacroiliac joints.) [1, 6]

AND

3 - Prescribed by or in consultation with a rheumatologist

AND

4 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [6]

AND

5 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., certolizumab pegol)

AND

6 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-AxSpA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 6]:

Disease activity (e.g., pain, fatigue, inflammation, stiffness)

Lab values (erythrocyte sedimentation rate, C-reactive protein level)

Function

Axial status (e.g., lumbar spine motion, chest expansion)

Total active (swollen and tender) joint count

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine or cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq

Diagnosis	Crohn's Disease (CD)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 30 MG	66603072007530	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 45 MG	66603072007540	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - One of the following [7, 8]:

Frequent diarrhea and abdominal pain

At least 10% weight loss

Complications such as obstruction, fever, abdominal mass

Abnormal lab values (e.g., C-reactive protein [CRP])

CD Activity Index (CDAI) greater than 220

AND

3 - Prescribed by or in consultation with a gastroenterologist

AND

4 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [7, 8]:

6-mercaptopurine

Azathioprine

Corticosteroids (e.g., prednisone)

Methotrexate

AND

5 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol)

AND

6 - Not used in combination with other JAK inhibitors, biological therapies for CD, or with potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Crohn's disease (CD)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 30 MG	66603072007530	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 45 MG	66603072007540	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 7, 8]:

Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline

Reversal of high fecal output state

AND

2 - Not used in combination with other JAK inhibitors, biological therapies for CD, or with potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 30 MG	66603072007530	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 45 MG	66603072007540	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [9, 10]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, ESR, CRP)

Dependent on, or refractory to, corticosteroids

AND

3 - Prescribed by or in consultation with a gastroenterologist

AND

4 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [9, 10]:

6-mercaptopurine

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

Azathioprine

Corticosteroids (e.g., prednisone)

AND

5 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, golimumab)

AND

6 - Not used in combination with other JAK inhibitors, biological therapies for UC, or with potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhale d corticosteroids, and/or low stable dosages of oral corticosteroids (eq uivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand

RINVOQ	UPADACITINIB TAB ER 24HR 45 MG	66603072007540	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 9, 10]:

Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline

Reversal of high fecal output state

AND

2 - Not used in combination with other JAK inhibitors, biological therapies for UC, or with potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhale d corticosteroids, and/or low stable dosages of oral corticosteroids (eq uivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Atopic Dermatitis (AD)

Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 30 MG	66603072007530	Brand

Approval Criteria

1 - Diagnosis of moderate to severe atopic dermatitis

AND

2 - Patient is 12 years of age or older

AND

3 - One of the following:

Involvement of at least 10% body surface area (BSA)

SCORing Atopic Dermatitis (SCORAD) index value of at least 25 [A]

AND

4 - Prescribed by or in consultation with one of the following:

Dermatologist

Allergist/Immunologist

AND

5 - Trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication, or intolerance to at least ONE of the following:

Medium or higher potency topical corticosteroid

Pimecrolimus cream

Tacrolimus ointment

Eucrisa (crisaborole) ointment

AND

6 - One of the following:

6.1 Trial and failure of a minimum 12-week supply of at least one systemic drug product for the treatment of atopic dermatitis (examples include, but are not limited to, Adbry [tralokinumab-ldrm], Dupixent [dupilumab], etc.)

OR

6.2 Patient has a contraindication, intolerance, or treatment is inadvisable with both of the following FDA-approved atopic dermatitis therapies:

Adbry (tralokinumab-ldrm)

Dupixent (dupilumab)

AND

7 - Not used in combination with other JAK inhibitors, biologic immunomodulators (e.g., Dupixent, Adbry), or other immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Rinvoq	
Diagnosis	Atopic Dermatitis (AD)
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RINVOQ	UPADACITINIB TAB ER 24HR 15 MG	66603072007520	Brand
RINVOQ	UPADACITINIB TAB ER 24HR 30 MG	66603072007530	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as evidenced by at least ONE of the following:

Reduction in body surface area involvement from baseline

Reduction in SCORing Atopic Dermatitis (SCORAD) index value from baseline [A]

AND

2 - Not used in combination with other JAK inhibitors, biologic immunomodulators (e.g., Dupixent, Adbry), or other immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Rinvoq may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

3 . Background

Clinical Practice Guidelines

Table 1. Relative potencies of topical corticosteroids [11]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05

	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2

	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05

4 . Endnotes

The Scoring Atopic Dermatitis (SCORAD) index is a clinical tool for assessing the severity of atopic dermatitis lesions based on affected body area and intensity of plaque characteristics. [12, 13] The extent and severity of AD over the body area (A) and the severity of 6 specific symptoms (erythema, edema/papulation, excoriations, lichenification, oozing/crusts, and dryness) (B) are assessed and scored by the Investigator. Subjective assessment of itch and sleeplessness is scored by the patient (C). The SCORAD score is a combined score (A/5 + 7B/2 + C) with a maximum of 103. Higher scores indicate greater severity/worsened state. A score of 25 to 50 indicates moderate disease severity and greater than 50 indicates severe disease. [14]

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228961
Guideline Name	Rituxan Hycela (rituximab and hyaluronidase human)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rituxan Hycela (rituximab and hyaluronidase human)
Follicular Lymphoma Indicated for the treatment of adult patients with: 1) Relapsed or refractory, follicular lymphoma as a single agent 2) Previously untreated follicular lymphoma in combination with first line chemotherapy and, in patients achieving a complete or partial response to rituximab in combination with chemotherapy, as single-agent maintenance therapy 3) Non-progressing (including stable disease), follicular lymphoma as a single agent after first-line cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy. Limitations of Use: Initiate treatment with Rituxan Hycela only after patients have received at least one full dose of a rituximab product by intravenous infusion. Rituxan Hycela is not indicated for the treatment of non-malignant conditions. **Diffuse Large B-cell Lymphoma** Indicated for the treatment of adult patients with previously untreated diffuse large B-cell lymphoma in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP) or other anthracycline-based chemotherapy regimens. Limitations of Use: Initiate treatment with Rituxan Hycela only after patients have received at least one full dose of a rituximab product by intravenous infusion. Rituxan Hycela is not indicated for the treatment of non-malignant conditions. **Chronic Lymphocytic Leukemia (CLL)** Indicated for the treatment of adult patients with

previously untreated and previously treated CLL in combination with fludarabine and cyclophosphamide (FC). Limitations of Use: Initiate treatment with Rituxan Hycela only after patients have received at least one full dose of a rituximab product by intravenous infusion. Rituxan Hycela is not indicated for the treatment of non-malignant conditions.

2 . Criteria

Product Name:Rituxan Hycela (rituximab and hyaluronidase human)	
Diagnosis	Follicular Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1400-23400 MG-UNIT/11.7ML	21990002642020	Brand
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1600-26800 MG-UNIT/13.4ML	21990002642040	Brand

Approval Criteria

1 - Diagnosis of follicular lymphoma

AND

2 - One of the following:

2.1 Disease is relapsed or refractory

OR

2.2 Patient exhibited complete or partial response to prior treatment with rituximab in combination with chemotherapy

OR

2.3 Disease is non-progressing or stable following prior treatment with first-line cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy

OR

2.4 Both of the following:

2.4.1 Disease is previously untreated

AND

2.4.2 Medication is used in combination with first-line chemotherapy

AND

3 - One of the following:

3.1 Trial and failure, or intolerance to Ruxience

OR

3.2 Continuation of therapy for patients currently in the midst of an ongoing treatment regimen

Product Name:Rituxan Hycela (rituximab and hyaluronidase human)	
Diagnosis	Follicular Lymphoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Diagnosis of chronic lymphocytic leukemia

AND

2 - Medication is being used in combination with fludarabine and cyclophosphamide (FC) therapy

AND

3 - One of the following:

3.1 Trial and failure, or intolerance to Ruxience

OR

3.2 Continuation of therapy for patients currently in the midst of an ongoing treatment regimen

3 . Endnotes

Treatment for DLBCL consists of up to 8 cycles of 21 days each, a total duration of 6 months [1,3]. There is little evidence that use of rituximab as continuation therapy following R-CHOP induction provides additional benefit above induction alone. [2] This is in contrast with follicular lymphoma, where evidence does support maintenance [4] therapy and NCCN recommends consolidation with rituximab monotherapy [3]. However, to account for potential delays in therapy without interrupting treatment, a 12 month authorization is provided.

Treatment for CLL consists of up to 6 cycles of 28 days each, a total duration of 6 months [1]. To account for potential delays in therapy without interrupting treatment, a 12 month authorization is provided.

An FDA-approved biosimilar is an appropriate substitute for rituximab. [3]

The FDA defines biosimilar as a biological product that is highly similar to and has no clinically meaningful differences from an existing FDA-approved reference product. [4]

Rituxan Hycela is not indicated for the treatment of non-malignant conditions. **Diffuse Large B-cell Lymphoma** Indicated for the treatment of adult patients with previously untreated diffuse large B-cell lymphoma in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP) or other anthracycline-based chemotherapy regimens. Limitations of Use: Initiate treatment with Rituxan Hycela only after patients have received at least one full dose of a rituximab product by intravenous infusion. Rituxan Hycela is not indicated for the treatment of non-malignant conditions. **Chronic Lymphocytic Leukemia (CLL)** Indicated for the treatment of adult patients with

previously untreated and previously treated CLL in combination with fludarabine and cyclophosphamide (FC). Limitations of Use: Initiate treatment with Rituxan Hycela only after patients have received at least one full dose of a rituximab product by intravenous infusion. Rituxan Hycela is not indicated for the treatment of non-malignant conditions.

2 . Criteria

Product Name:Rituxan Hycela (rituximab and hyaluronidase human)	
Diagnosis	Follicular Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1400-23400 MG-UNIT/11.7ML	21990002642020	Brand
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1600-26800 MG-UNIT/13.4ML	21990002642040	Brand

Approval Criteria

1 - Diagnosis of follicular lymphoma

AND

2 - One of the following:

2.1 Disease is relapsed or refractory

OR

2.2 Patient exhibited complete or partial response to prior treatment with rituximab in combination with chemotherapy

OR

2.3 Disease is non-progressing or stable following prior treatment with first-line cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy

OR

2.4 Both of the following:

2.4.1 Disease is previously untreated

AND

2.4.2 Medication is used in combination with first-line chemotherapy

AND

3 - One of the following:

3.1 Trial and failure, or intolerance to Ruxience

OR

3.2 Continuation of therapy for patients currently in the midst of an ongoing treatment regimen

Product Name:Rituxan Hycela (rituximab and hyaluronidase human)	
Diagnosis	Follicular Lymphoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1400-23400 MG-UNIT/11.7ML	21990002642020	Brand
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1600-26800 MG-UNIT/13.4ML	21990002642040	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - One of the following:

2.1 Trial and failure, or intolerance to Ruxience

OR

2.2 Continuation of therapy for patients currently in the midst of an ongoing prescribed treatment regimen

Product Name:Rituxan Hycela (rituximab and hyaluronidase human)	
Diagnosis	Diffuse Large B-cell Lymphoma
Approval Length	12 months [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1400-23400 MG-UNIT/11.7ML	21990002642020	Brand
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1600-26800 MG-UNIT/13.4ML	21990002642040	Brand

Approval Criteria

1 - Diagnosis of diffuse large B-cell lymphoma

AND

2 - Disease is previously untreated

AND

3 - Medication is being used in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP) or other anthracycline-based chemotherapy

AND

4 - One of the following:

4.1 Trial and failure, or intolerance to Ruxience

OR

4.2 Continuation of therapy for patients currently in the midst of an ongoing treatment regimen

Product Name:Rituxan Hycela (rituximab and hyaluronidase human)	
Diagnosis	Chronic Lymphocytic Leukemia
Approval Length	12 months [B]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN HYCELA	RITUXIMAB-HYALURONIDASE HUMAN INJ 1400-23400 MG-UNIT/11.7ML	21990002642020	Brand

Approval Criteria

1 - Diagnosis of chronic lymphocytic leukemia

AND

2 - Medication is being used in combination with fludarabine and cyclophosphamide (FC) therapy

AND

3 - One of the following:

3.1 Trial and failure, or intolerance to Ruxience

OR

3.2 Continuation of therapy for patients currently in the midst of an ongoing treatment regimen

3 . Endnotes

Treatment for DLBCL consists of up to 8 cycles of 21 days each, a total duration of 6 months [1,3]. There is little evidence that use of rituximab as continuation therapy following R-CHOP induction provides additional benefit above induction alone. [2] This is in contrast with follicular lymphoma, where evidence does support maintenance [4] therapy and NCCN recommends consolidation with rituximab monotherapy [3]. However, to account for potential delays in therapy without interrupting treatment, a 12 month authorization is provided.

Treatment for CLL consists of up to 6 cycles of 28 days each, a total duration of 6 months [1]. To account for potential delays in therapy without interrupting treatment, a 12 month authorization is provided.

An FDA-approved biosimilar is an appropriate substitute for rituximab. [3]

The FDA defines biosimilar as a biological product that is highly similar to and has no clinically meaningful differences from an existing FDA-approved reference product. [4]

Guideline ID	GL-228618
Guideline Name	Rituximab - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rituxan (rituximab)
Non-Hodgkin's Lymphoma (NHL) Indicated for the treatment of patients with: a. Relapsed or refractory, low-grade or follicular, CD20-positive, B-cell non-Hodgkin's lymphoma as a single agent. b. Previously untreated follicular, CD20-positive, B-cell non-Hodgkin's lymphoma in combination with first-line chemotherapy and, in patients achieving a complete or partial response to Rituxan in combination with chemotherapy, as a single-agent maintenance therapy. c. Non-progressing (including stable disease) low-grade, CD20-positive, B-cell non-Hodgkin's lymphoma, as a single agent, after first-line CVP chemotherapy. d. Previously untreated diffuse large B-cell, CD20-positive non-Hodgkin's lymphoma in combination with CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) or other anthracycline-based chemotherapy regimens. **Pediatric Non-Hodgkin's Lymphoma (NHL)** Indicated for previously untreated, advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL) or mature B-cell acute leukemia (B-AL) in combination with chemotherapy in pediatric patients aged 6 months and older. **Chronic Lymphocytic Leukemia (CLL)** Indicated for the treatment of patients with previously untreated and previously treated CD20-positive CLL in combination fludarabine

and cyclophosphamide (FC). Limitations of Use: Rituxan is not recommended for use in patients with severe, active infections.

Rheumatoid Arthritis (RA) In combination with methotrexate, is indicated for the treatment of adult patients with moderately- to severely-active rheumatoid arthritis who have had an inadequate response to one or more TNF antagonist therapies. Limitation of Use: Rituxan is not recommended for use in patients with severe, active infections.

Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis) and Microscopic Polyangiitis (MPA) Indicated for the treatment of adult patients with Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis) and Microscopic Polyangiitis (MPA) in adult and pediatric patients 2 years of age and older in combination with glucocorticoids. Limitations of Use: Rituxan is not recommended for use in patients with severe, active infections.

Pemphigus Vulgaris Indicated for the treatment of moderate to severe Pemphigus Vulgaris (PV) in adult patients.

Off Label Uses: Immune Thrombocytopenic Purpura (ITP) Has been used for the treatment of immune or idiopathic thrombocytopenic purpura. [1, 2] Overall response rates of 35% to 52% in patients with refractory idiopathic thrombocytopenic purpura. [3, 4]

Waldenstrom's Macroglobulinemia Has been used for the treatment of relapsed/refractory Waldenstrom's macroglobulinemia. Rituximab monotherapy (1 to 8 cycles) has shown efficacy in limited studies. [5-8]

Drug Name: Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

Non-Hodgkin's Lymphoma (NHL) Indicated for the treatment of patients with: a. Relapsed or refractory, low-grade or follicular, CD20-positive, B-cell non-Hodgkin's lymphoma as a single agent. b. Previously untreated follicular, CD20-positive, B-cell non-Hodgkin's lymphoma in combination with first-line chemotherapy and, in patients achieving a complete or partial response to Rituxan in combination with chemotherapy, as a single-agent maintenance therapy. c. Non-progressing (including stable disease) low-grade, CD20-positive, B-cell non-Hodgkin's lymphoma, as a single agent, after first-line CVP chemotherapy. d. Previously untreated diffuse large B-cell, CD20-positive non-Hodgkin's lymphoma in combination with CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) or other anthracycline-based chemotherapy regimens.

Chronic Lymphocytic Leukemia (CLL) Indicated for the treatment of patients with previously untreated and previously treated CD20-positive CLL in combination with fludarabine and cyclophosphamide (FC).

Rheumatoid Arthritis (RA) In combination with methotrexate, is indicated for the treatment of adult patients with moderately- to severely-active rheumatoid arthritis who have had an inadequate response to one or more TNF antagonist therapies.

Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis) and Microscopic Polyangiitis (MPA) Indicated for the treatment of adults with Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis) and Microscopic Polyangiitis (MPA) in combination with glucocorticoids.

Off Label Uses: **Pediatric Non-Hodgkin's Lymphoma (NHL)** Indicated for previously untreated, advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL) or mature B-cell acute leukemia (B-AL) in combination with chemotherapy in pediatric patients aged 6 months and older. [25, C, D]

Drug Name: Riabni (rituximab-arrx)

Non-Hodgkin's Lymphoma (NHL) Indicated for the treatment of patients with: a. Relapsed or refractory, low-grade or follicular, CD20-positive, B-cell non-Hodgkin's lymphoma as a single agent. b. Previously untreated follicular, CD20-positive, B-cell non-Hodgkin's lymphoma in combination with first-line chemotherapy and, in patients achieving a complete or partial response to Rituxan in combination with chemotherapy, as a single-agent maintenance therapy. c. Non-progressing (including stable disease) low-grade, CD20-positive, B-cell non-Hodgkin's lymphoma, as a single agent, after first-line CVP chemotherapy. d. Previously untreated diffuse large B-cell, CD20-positive non-Hodgkin's lymphoma in combination with CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) or other anthracycline-based chemotherapy regimens.

Chronic Lymphocytic Leukemia (CLL) Indicated for the treatment of patients with previously untreated and previously treated CD20-positive CLL in combination with fludarabine and cyclophosphamide (FC).

Rheumatoid Arthritis (RA) Indicated in combination with methotrexate for the treatment of adult patients with moderately- to severely- active rheumatoid arthritis who have had an inadequate response to one or more TNF antagonist therapies.

Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis) and Microscopic Polyangiitis (MPA) Indicated for the treatment of adults with Granulomatosis with Polyangiitis (GPA) (Wegener’s Granulomatosis) and Microscopic Polyangiitis (MPA) in combination with glucocorticoids.

Off Label Uses: **Pediatric Non-Hodgkin's Lymphoma (NHL)** Indicated for previously untreated, advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL) or mature B-cell acute leukemia (B-AL) in combination with chemotherapy in pediatric patients aged 6 months and older. [25, C, D]

2 . Criteria

Product Name:Rituxan, Truxima, Riabni	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	1 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN	RITUXIMAB IV SOLN 100 MG/10ML	21351860002020	Brand
RITUXAN	RITUXIMAB IV SOLN 500 MG/50ML	21351860002040	Brand
TRUXIMA	RITUXIMAB-ABBS IV SOLN 100 MG/10ML (10 MG/ML)	21351860102020	Brand
TRUXIMA	RITUXIMAB-ABBS IV SOLN 500 MG/50ML (10 MG/ML)	21351860102040	Brand
RIABNI	RITUXIMAB-ARRX IV SOLN 100 MG/10ML (10 MG/ML)	21351860142020	Brand
RIABNI	RITUXIMAB-ARRX IV SOLN 500 MG/50ML (10 MG/ML)	21351860142040	Brand

Approval Criteria

1 - Diagnosis of moderately- to severely-active rheumatoid arthritis

AND

2 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [26, 27]:

methotrexate

leflunomide

sulfasalazine

AND

3 - Used in combination with methotrexate [A]

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

Cimzia (certolizumab)

Enbrel (etanercept)

One formulary adalimumab product

Simponi (golimumab)

Rinvoq (upadacitinib)

Xeljanz (tofacitinib) or Xeljanz XR (tofacitinib ER)

AND

4.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

Actemra (tocilizumab)

Orencia (abatacept)

OR

4.2 Continuation of prior rituximab therapy, defined as no more than a 45-day gap in therapy

AND

5 - Trial and failure or intolerance to Ruxience

Notes	*Includes attestation that a total of two TNF inhibitors have already be en tried in the past, and the patient should not be made to try a third T NF inhibitor. ** For review process only: Refer to the table in the Background sectio n for carrier-specific formulary adalimumab products

Product Name:Ruxience	
Diagnosis	Rheumatoid Arthritis (RA)

Approval Length	1 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RUXIENCE	RITUXIMAB-PVVR IV SOLN 100 MG/10ML (10 MG/ML)	21351860602020	Brand

RUXIENCE	RITUXIMAB-PVVR IV SOLN 100 MG/10ML (10 MG/ML)	21351860602020	Brand
RUXIENCE	RITUXIMAB-PVVR IV SOLN 500 MG/50ML (10 MG/ML)	21351860602040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [10, 26, 27]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

2 - At least 16 weeks have elapsed since last course of therapy [B]

Product Name:Riabni, Truxima	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	1 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TRUXIMA	RITUXIMAB-ABBS IV SOLN 100 MG/10ML (10 MG/ML)	21351860102020	Brand

RIABNI	RITUXIMAB-ARRX IV SOLN 500 MG/50ML (10 MG/ML)	21351860142040	Brand

Approval Criteria

1 - Diagnosis of moderately- to severely-active rheumatoid arthritis

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming a minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [26, 27]:

methotrexate

leflunomide

sulfasalazine

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming that medication is used in combination with methotrexate [A]

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

Cimzia (certolizumab)

Enbrel (etanercept)

One formulary adalimumab product

Simponi (golimumab)

Rinvoq (upadacitinib)

Xeljanz (tofacitinib) or Xeljanz XR (tofacitinib ER)

AND

4.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to BOTH of the following:

Actemra (tocilizumab)

Orencia (abatacept)

OR

4.2 Both of the following:

4.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior rituximab therapy, defined as no more than a 45-day gap in therapy

AND

4.2.2 Documentation of positive clinical response to therapy as evidenced by at least one of the following [10, 26, 27]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

5 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to Ruxience

Notes	*Includes attestation that a total of two TNF inhibitors have already been tried in the past, and the patient should not be made to try a third TNF inhibitor. ** For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products

Product Name:Ruxience	
Diagnosis	Non-Hodgkin's Lymphoma
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RUXIENCE	RITUXIMAB-PVVR IV SOLN 100 MG/10ML (10 MG/ML)	21351860602020	Brand
RUXIENCE	RITUXIMAB-PVVR IV SOLN 500 MG/50ML (10 MG/ML)	21351860602040	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following: [10]

Diagnosis of diffuse large B-cell, CD20-positive, non-Hodgkin’s lymphoma

Used as first-line treatment in combination with CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) or other anthracycline-based chemotherapy regimens

OR

1.2 Both of the following:

Diagnosis of follicular, CD20-positive, B-cell non-Hodgkin's lymphoma

Used as first-line treatment in combination with chemotherapy

OR

1.3 All of the following:

Diagnosis of follicular, CD20-positive, B-cell non-Hodgkin's lymphoma

Patient achieved a complete or partial response to a rituximab product in combination with chemotherapy

Followed by rituximab used as monotherapy for maintenance therapy

OR

1.4 Both of the following: [1]

1.4.1 Diagnosis of low-grade, CD20-positive, B-cell non-Hodgkin's lymphoma

AND

1.4.2 One of the following:

Patient has stable disease following first-line treatment with CVP (cyclophosphamide, vincristine, prednisolone/ prednisone) chemotherapy

Patient achieved a partial or complete response following first-line treatment with CVP (cyclophosphamide, vincristine, prednisolone/ prednisone) chemotherapy

OR

1.5 Diagnosis of relapsed or refractory, low grade or follicular CD20-positive, B-cell non-Hodgkin's lymphoma.

OR

1.6 All of the following (off-label) [25, C, D]

1.6.1 Diagnosis of one of the following previously untreated, advanced stage indications:

CD-20-positive diffuse large B-cell lymphoma (DLBCL)

Burkitt lymphoma (BL)

Burkitt-like lymphoma (BLL)

Mature B-cell acute leukemia (B-AL)

AND

1.6.2 Patient is 6 months of age or older

AND

1.6.3 Used in combination with chemotherapy

RIABNI	RITUXIMAB-ARRX IV SOLN 500 MG/50ML (10 MG/ML)	21351860142040	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following: [10]

Diagnosis of diffuse large B-cell, CD20-positive, non-Hodgkin’s lymphoma

Used as first-line treatment in combination with CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) or other anthracycline-based chemotherapy regimens

OR

1.2 Both of the following:

Diagnosis of follicular, CD20-positive, B-cell non-Hodgkin's lymphoma

Used as first-line treatment in combination with chemotherapy

OR

1.3 All of the following:

Diagnosis of follicular, CD20-positive, B-cell non-Hodgkin's lymphoma

Patient achieved a complete or partial response to a rituximab product in combination with chemotherapy

Followed by rituximab used as monotherapy for maintenance therapy

OR

1.4 Both of the following: [1]

1.4.1 Diagnosis of low-grade, CD20-positive, B-cell non-Hodgkin's lymphoma

AND

1.4.2 One of the following:

Patient has stable disease following first-line treatment with CVP (cyclophosphamide, vincristine, prednisolone/ prednisone) chemotherapy

Patient achieved a partial or complete response following first-line treatment with CVP (cyclophosphamide, vincristine, prednisolone/ prednisone) chemotherapy

OR

1.5 Diagnosis of relapsed or refractory, low grade or follicular CD20-positive, B-cell non-Hodgkin's lymphoma.

OR

1.6 All of the following (off-label) [25, C, D]:

1.6.1 Diagnosis of one of the following previously untreated, advanced stage indications:

CD-20-positive diffuse large B-cell lymphoma (DLBCL)

Burkitt lymphoma (BL)

Burkitt-like lymphoma (BLL)

Mature B-cell acute leukemia (B-AL)

AND

1.6.2 Patient is 6 months of age or older

AND

1.6.3 Used in combination with chemotherapy

AND

2 - One of the following:

2.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to Ruxience

OR

2.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of therapy for patients currently in the midst of an ongoing prescribed treatment regimen, defined as no more than a 45-day gap in therapy

Product Name:Ruxience	
Diagnosis	Chronic Lymphocytic Leukemia
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RUXIENCE	RITUXIMAB-PVVR IV SOLN 100 MG/10ML (10 MG/ML)	21351860602020	Brand
RUXIENCE	RITUXIMAB-PVVR IV SOLN 500 MG/50ML (10 MG/ML)	21351860602040	Brand

Approval Criteria

1 - Diagnosis of chronic lymphocytic leukemia [2, 12, 15-19]

AND

2 - Used in combination with fludarabine and cyclophosphamide

Product Name:Riabni, Rituxan, Truxima	
Diagnosis	Chronic Lymphocytic Leukemia
Approval Length	12 month(s)
Guideline Type	Prior Authorization

RITUXAN	RITUXIMAB IV SOLN 500 MG/50ML	21351860002040	Brand

Approval Criteria

1 - Diagnosis of immune or idiopathic thrombocytopenic purpura (off-label) [3, 4, 11]

AND

2 - Trial and failure, contraindication, or intolerance to at least ONE of the following: [12]

Glucocorticoids (e.g., prednisone, methylprednisolone)

Immunoglobulins (e.g., IVIg)

Splenectomy

AND

3 - Documented platelet count of less than 50 x 10^9 / L [11]

Product Name:Rituxan	
Diagnosis	Pemphigus Vulgaris
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN	RITUXIMAB IV SOLN 100 MG/10ML	21351860002020	Brand
RITUXAN	RITUXIMAB IV SOLN 500 MG/50ML	21351860002040	Brand

Approval Criteria

1 - Diagnosis of moderate to severe Pemphigus Vulgaris

Product Name:Rituxan	
Diagnosis	Pemphigus Vulgaris
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN	RITUXIMAB IV SOLN 100 MG/10ML	21351860002020	Brand
RITUXAN	RITUXIMAB IV SOLN 500 MG/50ML	21351860002040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Rituxan	
Diagnosis	Waldenstrom's macroglobulinemia
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN	RITUXIMAB IV SOLN 100 MG/10ML	21351860002020	Brand
RITUXAN	RITUXIMAB IV SOLN 500 MG/50ML	21351860002040	Brand

Approval Criteria

1 - Diagnosis of relapsed/refractory Waldenstrom's macroglobulinemia (off-label) [1, 2, 5-8]

Product Name:Ruxience	
Diagnosis	Wegener's Granulomatosis and Microscopic Polyangiitis
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RUXIENCE	RITUXIMAB-PVVR IV SOLN 100 MG/10ML (10 MG/ML)	21351860602020	Brand
RUXIENCE	RITUXIMAB-PVVR IV SOLN 500 MG/50ML (10 MG/ML)	21351860602040	Brand

Approval Criteria

1 - One of the following diagnoses:

Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis)

Microscopic Polyangiitis

AND

2 - Used in combination with glucocorticoids (e.g., prednisone)

Product Name:Riabni, Rituxan, Truxima	
Diagnosis	Wegener's Granulomatosis and Microscopic Polyangiitis
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RITUXAN	RITUXIMAB IV SOLN 100 MG/10ML	21351860002020	Brand

RIABNI	RITUXIMAB-ARRX IV SOLN 100 MG/10ML (10 MG/ML)	21351860142020	Brand
RIABNI	RITUXIMAB-ARRX IV SOLN 500 MG/50ML (10 MG/ML)	21351860142040	Brand

Approval Criteria

1 - One of the following diagnoses:

Granulomatosis with Polyangiitis (GPA) (Wegener's Granulomatosis)

Microscopic Polyangiitis

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming medication is used in combination with glucocorticoids (e.g., prednisone)

AND

3 - One of the following:

3.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to Ruxience

OR

3.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of therapy for patients currently in the midst of an ongoing prescribed treatment regimen, defined as no more than a 45-day gap in therapy

3 . Background

Benefit/Coverage/Program Information
Formulary Adalimumab Products Adalimumab-adaz Hyrimoz Hadlima Adalimumab-fkjp

4 . Endnotes

Aggressive, continuous and early treatment with DMARDs may slow the destructive processes in RA by preventing or delaying cartilage and bone destruction. [11] Often used in combination, the most commonly prescribed DMARDs include hydroxychloroquine, sulfasalazine, leflunomide and methotrexate, with methotrexate being the gold standard.

An open-label extension analysis of RA patients previously treated with Rituxan was conducted. Patients were eligible for the second course if they demonstrated a greater than or equal to 20% reduction in both swollen joint count and the tender joint count at any visit 16 weeks after initial treatment or later and had active disease (swollen joint count greater than or equal to 8 and tender joint count greater than or equal to 8). Repeat courses of treatment were administered at the investigator’s discretion, with a minimum interval between treatment courses of 16 weeks. [15]

The FDA defines biosimilar as a biological product that is highly similar to and has no clinically meaningful differences from an existing FDA-approved reference product. [22]

An FDA-approved biosimilar is an appropriate substitute for rituximab. [23, 25]

6 . Revision History

Date	Notes
11/7/2024	New program

Prior Authorization Guideline

Guideline ID	GL-228521
Guideline Name	Rivfloza (nedosiran)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rivfloza (nedosiran)
Primary Hyperoxaluria Type 1 (PH1) Indicated to lower urinary oxalate levels in children 9 years of age and older and adults with primary hyperoxaluria type 1 (PH1) and relatively preserved kidney function, e.g., eGFR ≥ 30 mL/min/1.73 m2.

2 . Criteria

Product Name:Rivfloza	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RIVFLOZA	NEDOSIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 128 MG/0.8ML	5662605060E520	Brand
RIVFLOZA	NEDOSIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 160 MG/ML	5662605060E530	Brand
RIVFLOZA	NEDOSIRAN SODIUM SUBCUTANEOUS SOLN 80 MG/0.5ML	56626050602020	Brand

Approval Criteria

1 - Diagnosis of primary hyperoxaluria type 1 (PH1)

AND

2 - Disease has been confirmed by both of the following: [2]

2.1 One of the following:

Elevated urinary oxalate excretion

Elevated plasma oxalate concentration

Spot urinary oxalate to creatinine molar ratio greater than normal for age

AND

2.2 One of the following:

Genetic testing demonstrating a mutation in the alanine:glyoxylate aminotransferase (AGXT) gene

Liver biopsy demonstrating absence or reduced alanine:glyoxylate aminotransferase (AGT) activity

AND

3 - Patient is 9 years of age or older [A, 1]

AND

4 - Patient has preserved kidney function (e.g., eGFR greater than or equal to 30mL/min/1.73m^2)

AND

5 - Patient has not received a liver transplant [B, 2]

AND

6 - Prescribed by or in consultation with one of the following:

Hepatologist

Nephrologist

Urologist

Geneticist

Specialist with expertise in the treatment of PH1

Product Name:Rivfloza	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RIVFLOZA	NEDOSIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 128 MG/0.8ML	5662605060E520	Brand
RIVFLOZA	NEDOSIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 160 MG/ML	5662605060E530	Brand
RIVFLOZA	NEDOSIRAN SODIUM SUBCUTANEOUS SOLN 80 MG/0.5ML	56626050602020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decreased urinary oxalate excretion, decreased plasma oxalate concentration)

AND

2 - Patient has not received a liver transplant

AND

3 - Prescribed by or in consultation with one of the following:

Hepatologist

Nephrologist

Urologist

Geneticist

Specialist with expertise in the treatment of PH1

3 . Endnotes

The safety and effectiveness of Rivfloza in patients younger than 9 years of age have not been established. [1]

Liver transplantation provides the definitive cure for PH type 1 by restoring the missing enzyme, which lowers oxalate production to the normal range. [2]

Prior Authorization Guideline

Guideline ID	GL-228963
Guideline Name	Roszet (rosuvastatin/ezetimibe) - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Roszet (rosuvastatin/ezetimibe)
Non-familial hyperlipidemia Indicated as an adjunct to diet in patients with primary non-familial hyperlipidemia to reduce low-density lipoprotein cholesterol (LDL-C). **Homozygous familial hypercholesterolemia (HoFH)** Indicated alone or as an adjunct to other LDL-C-lowering therapies in patients with homozygous familial hypercholesterolemia (HoFH) to reduce LDL-C.

2 . Criteria

Product Name:Roszet, Brand Ezetimibe-Rosuvastatin (ST)	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228965
Guideline Name	Rozlytrek (entrectinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rozlytrek (entrectinib)
Non-small cell lung cancer (NSCLC) Indicated for the treatment of adult patients with ROS1-positive metastatic non-small cell lung cancer (NSCLC), as detected by an FDA-approved test. **Solid Tumors** Indicated for the treatment of adult and pediatric patients older than 1 month of age with solid tumors that: have a neurotrophic tyrosine receptor kinase (NTRK) gene fusion as detected by an FDA-approved test without a known acquired resistance mutation, are metastatic or where surgical resection is likely to result in severe morbidity, and have progressed following treatment or have no satisfactory alternative therapy. This indication is approved under accelerated approval based on tumor response rate and durability of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in the confirmatory trials.

2 . Criteria

Product Name:Rozlytrek	
Diagnosis	Non-Small Cell Lung Cancer (NSCLC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ROZLYTREK	ENTRECTINIB CAP 100 MG	21533820000120	Brand
ROZLYTREK	ENTRECTINIB CAP 200 MG	21533820000130	Brand
ROZLYTREK	ENTRECTINIB PELLET PACK 50 MG	21533820003020	Brand

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer (NSCLC)

AND

2 - Presence of ROS1 rearrangement as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

Product Name:Rozlytrek	
Diagnosis	Solid Tumors
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ROZLYTREK	ENTRECTINIB CAP 100 MG	21533820000120	Brand
ROZLYTREK	ENTRECTINIB CAP 200 MG	21533820000130	Brand
ROZLYTREK	ENTRECTINIB PELLET PACK 50 MG	21533820003020	Brand

Approval Criteria

1 - Diagnosis of solid tumors

AND

2 - Presence of neurotrophic tyrosine receptor kinase (NTRK) gene fusion (e.g., ETV6-NTRK3, TPM3-NTRK1, TPR-NTRK1, etc.) as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [A]

AND

3 - No known acquired resistance mutation (e.g., TRKA G595R, TRKA G667C or TRKC G623R substitutions) [2]

AND

4 - Disease is one of the following:

Metastatic

Unresectable (including cases where surgical resection is likely to result in severe morbidity)

AND

5 - One of the following:

Disease has progressed following previous treatment (e.g., surgery, radiation therapy, or systemic therapy) [3]

Disease has no satisfactory alternative treatments

Diagnosis	Non-Small Cell Lung Cancer (NSCLC), Solid Tumors
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ROZLYTREK	ENTRECTINIB CAP 100 MG	21533820000120	Brand

Prior Authorization Guideline

Guideline ID	GL-233274
Guideline Name	Rybrevant (amivantamab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	7/21/2021
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Rybrevant (amivantamab)
First-Line Treatment of NSCLC with EGFR Exon 20 Insertion Mutations Indicated in combination with carboplatin and pemetrexed for the first-line treatment of adult patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with epidermal growth factor receptor (EGFR) exon 20 insertion mutations, as detected by an FDA-approved test. 2) Indicated in combination with carboplatin and pemetrexed for the first-line treatment of adult patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with epidermal growth factor receptor (EGFR) exon 20 insertion mutations, as detected by an FDA-approved test. **First-Line Treatment of NSCLC with EGFR Exon 19 Deletions or Exon 21 L858R Substitution Mutations** Indicated in combination with lazertinib for the first-line treatment of adult patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R substitution mutations, as detected by an FDA-approved test.

Previously Treated NSCLC with EGFRExon 19 Deletions or Exon 21 L858R Substitution Mutations Indicated in combination with carboplatin and pemetrexed, is indicated for the treatment of adult patients with locally advanced or metastatic NSCLC with EGFR exon 19 deletions or exon 21 L858R substitution mutations, whose disease has progressed on or after treatment with an EGFR tyrosine kinase inhibitor

Previously Treated non-small Cell Lung Cancer (NSCLC) with EGFR Exon 20 Insertion Mutations Indicated for the treatment of adult patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with epidermal growth factor receptor (EGFR) exon 20 insertion mutations, as detected by an FDA-approved test, whose disease has progressed on or after platinum-based chemotherapy.

2 . Criteria

Product Name:Rybrevant	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RYBREVANT	AMIVANTAMAB-VMJW IV SOLN 350 MG/7ML	21359710802020	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is one of the following:

Locally advanced

Metastatic

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Presence of epidermal growth factor receptor (EGFR) exon 20 insertion mutations as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3.1.2 One of the following:

3.1.2.1 Disease has progressed on or after platinum-based chemotherapy (e.g., carboplatin, cisplatin)

OR

3.1.2.2 Both of the following:

Used as first-line treatment of NSCLC

Used in combination with carboplatin and pemetrexed

OR

3.2 Both of the following:

3.2.1 Presence of epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R substitution mutations as detected by a U.S. Food and Drug Administration (FDA)-approved test

AND

3.2.2 One of the following:

3.2.2.1 Both of the following:

Used as first line treatment of NSCLC

Used in combination with Lazcluze (lazertinib)

OR

3.2.2.2 Both of the following:

Disease has progressed on or after treatment with an EGFR tyrosine kinase inhibitor (e.g., osimertinib)

Used in combination with carboplatin and pemetrexed

AND

3.2.3 Used in combination with Lazcluze (lazertinib)

4 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228964
Guideline Name	Rydapt (midostaurin)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rydapt (midostaurin) capsules
Acute Myeloid Leukemia Indicated for the treatment of adult patients with newly diagnosed acute myeloid leukemia (AML) that is FLT3 mutation positive as detected by an FDA-approved test, in combination with standard cytarabine and daunorubicin induction and cytarabine consolidation. Limitations of Use: Rydapt is not indicated as a single-agent induction therapy for the treatment of patients with AML. **Aggressive Systemic Mastocytosis, Systemic Mastocytosis with Associated Hematological Neoplasm, or Mast Cell Leukemia** Indicated for the treatment of adult patients with aggressive systemic mastocytosis (ASM), systemic mastocytosis with associated hematological neoplasm (SM-AHN), or mast cell leukemia (MCL).

2 . Criteria

Product Name:Rydapt	
Diagnosis	Acute Myeloid Leukemia (AML)
Approval Length	12 Month [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RYDAPT	MIDOSTAURIN CAP 25 MG	21533030000130	Brand

Approval Criteria

1 - Diagnosis of newly diagnosed acute myeloid leukemia (AML)

AND

2 - FMS-like tyrosine kinase 3 (FLT3) mutation-positive as detected by a U.S. Food and Drug Administration (FDA)-approved test (e.g., LeukoStrat CDx FLT3 Mutation Assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [5]

AND

3 - Used in combination with standard cytarabine and daunorubicin induction and cytarabine consolidation

Product Name:Rydapt	
Diagnosis	Aggressive Systemic Mastocytosis (ASM), Systemic Mastocytosis with Associated Hematological Neoplasm (SM-AHN), and Mast Cell Leukemia (MCL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RYDAPT	MIDOSTAURIN CAP 25 MG	21533030000130	Brand

Approval Criteria

1 - One of the following diagnoses: [4]

Aggressive systemic mastocytosis (ASM)

Systemic mastocytosis with associated hematological neoplasm (SM-AHN)

Mast cell leukemia (MCL)

Product Name:Rydapt	
Diagnosis	All Indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RYDAPT	MIDOSTAURIN CAP 25 MG	21533030000130	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

Although Rydapt (midostaurin) is not FDA-approved for maintenance therapy, the pivotal trial was designed to include induction, re-induction (if indicated), post-remission (consolidation), and maintenance therapy for a total of 12 months. Therapy significantly improved event free survival and overall survival. [1-3]

RYTELO	IMETELSTAT SODIUM FOR IV SOLN 188 MG	21535325602140	Brand

Approval Criteria

1 - Diagnosis of myelodysplastic syndrome

AND

2 - Disease is low to intermediate-1 risk [A]

AND

3 - All of the following:

Hemoglobin less than 10 g/dL

Baseline absolute neutrophil count of 1.5 x 10^9 /L or greater

Baseline platelet count of 75 x 10^9 /L or greater

AND

4 - Both of the following:

Patient does not have a confirmed mutation with deletion 5q [del(5q)]

Patient has not received prior treatment with Revlimid (lenalidomide) or hypomethylating agents (e.g., azacitidine, decitabine)

AND

5 - Patient requires 4 or more red blood cell units over 8 weeks

AND

6 - One of the following:

Previous treatment with an erythropoiesis stimulating agent shows no response

Previous treatment with an erythropoiesis stimulating agent shows loss of response

Patient is ineligible for treatment with an erythropoiesis stimulating agent

Product Name:Rytelo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RYTELO	IMETELSTAT SODIUM FOR IV SOLN 47 MG	21535325602120	Brand
RYTELO	IMETELSTAT SODIUM FOR IV SOLN 188 MG	21535325602140	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Definitions

Definition	Description

Myelodysplastic Syndromes (MDS)	Myelodysplastic syndromes (MDS) are an uncommon group of disorders characterized by abnormal blood-forming cells in the bone marrow, resulting in the reduction of peripheral blood cells, an elevated risk of acute myeloid leukemia (AML), and reduced survival. Anemia (low red blood cell counts), thrombocytopenia (low platelet counts), and leukopenia (low white blood cell counts) are common among patients with MDS [3]
The International Prognostic Scoring System (IPSS)	IPSS uses three "prognostic indicators" to predict the course of the patient's disease: • The percentage of leukemic blast cells in the marrow • The type of chromosomal changes, if any, in the marrow cells (cytogenetics) • The presence of one or more low blood cell counts (cytopenias) These 3 prognostic indicators are then assigned a total risk score from low, intermediate risk-1, intermediate risk -2, or high. [4]

4 . Endnotes

Disease was determined as low to intermediate-1 risk based on the The International Prognostic Scoring System (IPSS). [1,4]

Prior Authorization Guideline

Guideline ID	GL-228527
Guideline Name	Sabril, Vigadrone, Vigafyde (vigabatrin)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sabril (vigabatrin), Vigadrone (vigabatrin)
Refractory Complex Partial Seizures Indicated as adjunctive therapy for adults and pediatric patients 2 years of age and older with refractory complex partial seizures (CPS) who have inadequately responded to several alternative treatments and for whom the potential benefits outweigh the risk of vision loss. Sabril/Vigadrone is not indicated as a first line agent for complex partial seizures. **Infantile Spasms (1 Month to 2 Years of Age)** Indicated as monotherapy for pediatric patients with infantile spasms (IS) 1 month to 2 years of age for whom the potential benefits outweigh the potential risk of vision loss.
Drug Name: Vigafyde (vigabatrin)
Infantile Spasms (1 Month to 2 Years of Age) Indicated as monotherapy for pediatric patients with infantile spasms (IS) 1 month to 2 years of age for whom the potential benefits outweigh the potential risk of vision loss.

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

Vigabatrin Risk Evaluation and Mitigation Strategy (REMS) program overview: Vigabatrin Sponsors have created Vigabatrin REMS program to administer the REMS process, which facilitates access to vigabatrin only through select specialty and inpatient pharmacies. The REMS includes the following elements: 1) Patient Guide: outlines the vision loss that can occur with vigabatrin treatment; 2) Elements to Assure Safe Use (ETASU): Vigabatrin Sponsors will maintain a database of certified prescribers (e.g., must counsel regarding the risks associated with vigabatrin, including vission loss; ensure periodic visual monitoring is performed on an ongoing basis, report any adverse event suggestive of vision loss; enrolling patients taking vigabatrin in the REMS program) and will ensure that prescribers comply with the requirements of the REMS and may de-certify noncompliant prescribers. [3] Assessing the effectiveness of vigabatrin should be done within 12 weeks for CPS patients and within 2-4 weeks for IS. Vision monitoring is mandatory in adults and it is required to the extent possible in infants at baseline (no later than 4 weeks after starting vigabatrin) and at least 3 months while on therapy. Vision testing is also required about 3-6 months after the discontinuation of vigabatrin therapy. [1, 2] Under REMS requirement, pharmacies that dispense vigabatrin will be specially certified. Vigabatrin Sponsors will ensure that each patient treated with vigabatrin is enrolled in the Vigabatrin REMS before vigabatrin is dispensed and that vigabatrin will be dispensed to patients with documentation of safe-use conditions. 3) Implementation system: Vigabatrin Sponsors will ensure that vigabatrin is only distributed to certified pharmacies by ensuring that the wholesale/distributors comply with the program requirements, which includes submission of distribution records of all vigabatrin shipments to the REMS program. Vigabatrin Sponsors will maintain a secure database of all certified pharmacies and patients enrolled in the REMS program. A REMS program call center and website will be maintained by Vigabatrin Sponsors in order to provide resources and support for all aspects of the REMS program. [3]

To improve patient care and facilitate clinical research, the International League Against Epilepsy (ILAE) appointed a Task Force to formulate a consensus definition of drug resistant epilepsy. The following definition was formulated: Drug resistant epilepsy may be defined as failure of adequate trials of two tolerated and appropriately chosen and used antiepileptic drug (AED) schedules (whether as monotherapies or in combination) to achieve sustained seizure freedom. [4]

Prior Authorization Guideline

Guideline ID	GL-229162
Guideline Name	Saphnelo (anifrolumab-fnia)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/20/2021
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Saphnelo (anifrolumab-fnia)
Systemic Lupus Erythematosus (SLE) Indicated for the treatment of adult patients with moderate to severe SLE, who are receiving standard therapy. Limitations of Use: The efficacy of Saphnelo has not been evaluated in patients with severe active lupus nephritis or severe active central nervous system lupus. Use of Saphnelo is not recommended in these situations.

2 . Criteria

Product Name:Saphnelo

Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SAPHNELO	ANIFROLUMAB-FNIA IV SOLN 300 MG/2ML	99427010252020	Brand

Approval Criteria

1 - Diagnosis of moderate to severe systemic lupus erythematosus (SLE)

AND

2 - Trial and failure, contraindication, or intolerance to two standard of care treatments for active SLE (e.g., antimalarials [e.g., Plaquenil (hydroxychloroquine)], corticosteroids [e.g., prednisone], or immunosuppressants [e.g., methotrexate, Imuran (azathioprine)]) [4]

AND

3 - Currently receiving standard of care treatment for SLE (e.g., antimalarials [e.g., Plaquenil (hydroxychloroquine)], corticosteroids [e.g., prednisone], or immunosuppressants [e.g., methotrexate, Imuran (azathioprine)]) [1-3]

AND

4 - Prescribed by or in consultation with a rheumatologist

Product Name:Saphnelo	
Approval Length	6 Months [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

SAPHNELO	ANIFROLUMAB-FNIA IV SOLN 300 MG/2ML	99427010252020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decrease or stabilization of symptoms, improvement in functional impairment, decrease of corticosteroid dose, decrease in pain medications)

3 . Endnotes

SLE is a disease that fluctuates. The undulating course of typical lupus patients requires frequent reassessment. A 6-month authorization period is reasonable. [2]

SAPROPTERIN DIHYDROCHLORIDE	SAPROPTERIN DIHYDROCHLORIDE TAB 100 MG	30908565100320	Generic

Approval Criteria

1 - Patient has had an objective response to therapy, defined as a 30% or greater reduction in phenylalanine (Phe) blood levels from baseline [B -D]

AND

2 - Used in conjunction with a phenylalanine (Phe)-restricted diet [A]

AND

3 - Patient will continue to have blood Phe levels measured periodically during therapy [E]

3 . Endnotes

All patients who are treating phenylketonuria (PKU) with sapropterin should also be treated with a phenylalanine (Phe) restricted diet [1].

Sapropterin was evaluated in a phase III, randomized, placebo-controlled trial to determine its efficacy in reducing blood Phe concentration [2]. The primary endpoint was mean change from baseline in concentration of Phe in blood after 6 weeks. The mean age was 20 years. Results showed that after 6 weeks of therapy, patients who received sapropterin (n=41) had a decrease in mean blood Phe of 236 micromol/L, compared with a 3 micromol/L increase in the placebo group (n=47; p less than 0.0001).

Patients should be evaluated for response to therapy after treatment with saproterin at 20mg/kg per day for a period of one month [1]. The 2 month initial authorization duration allows for patients who start on 10mg/kg per day for the first month, to increase their dose to 20mg/kg per day for an additional month prior to evaluation of response.

In clinical trials, response to therapy was defined as greater than or equal to 30% decrease in blood Phe from baseline [1]. The American College of Medical Genetics and Genomics guideline notes a significant decline in blood Phe is expected in sapropterin responders once treatment is started [3]. A reduction of 30% is most often cited in the literature as evidence of effective Phe reduction.

Phe blood levels should be checked after one week of sapropterin treatment and periodically after that to assess blood Phe control [1].

Scenesse (afamelanotide)

Prior Authorization Guideline

Guideline ID	GL-228531
Guideline Name	Scenesse (afamelanotide)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Scenesse (afamelanotide)
Erythropoietic protoporphyria - Phototoxic dermatitis Indicated to increase pain free light exposure in adult patients with a history of phototoxic reactions from erythropoietic protoporphyria (EPP).

2 . Criteria

Product Name:Scenesse	
Approval Length	6 Month(s) [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SCENESSE	AFAMELANOTIDE ACETATE IMPLANT 16 MG	90922010102320	Brand

Approval Criteria

1 - Diagnosis of erythropoietic protoporphyria (EPP) confirmed by laboratory or genetic testing [B]

AND

2 - Patient has history of phototoxic reactions

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Hepatologist

Product Name:Scenesse	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SCENESSE	AFAMELANOTIDE ACETATE IMPLANT 16 MG	90922010102320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increased duration of exposure to direct sunlight without pain, decreased number of phototoxic reactions)

3 . Endnotes

Patients enrolled in clinical trial (Study CUV039, NCT 01605136) were assessed after 180 days and consultant agreed that 6 month approval duration is appropriate to determine if patient is responding to therapy. [1, 2]

Per recommendation from consultant to avoid off-label use, diagnosis of erythropoietic protoporphyria (EPP) should be confirmed by laboratory (porphyrin levels in serum and stool) or genetic testing. [2]

1 . Indications

Drug Name: Selzentry (maraviroc)
CCR5-tropic HIV-1 Indicated in combination with other antiretroviral agents for the treatment of only CCR5-tropic human immunodeficiency virus type 1 (HIV-1) infection in adult and pediatric patients weighing at least 2 kg. Limitations of Use: SELZENTRY is not recommended in patients with dual/mixed- or CXCR4-tropic HIV-1

2 . Criteria

Product Name:Brand Selzentry tablets, generic maraviroc 150mg and 300mg tablets, Selzentry solution

Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SELZENTRY	MARAVIROC TAB 150 MG	12102060000320	Brand
SELZENTRY	MARAVIROC TAB 300 MG	12102060000330	Brand
SELZENTRY	MARAVIROC TAB 25 MG	12102060000305	Brand
SELZENTRY	MARAVIROC TAB 75 MG	12102060000310	Brand
SELZENTRY	MARAVIROC ORAL SOLN 20 MG/ML	12102060002020	Brand
MARAVIROC	MARAVIROC TAB 150 MG	12102060000320	Generic
MARAVIROC	MARAVIROC TAB 300 MG	12102060000330	Generic

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Diagnosis of CCR5-tropic HIV-1 infection as confirmed by a highly sensitive tropism assay

AND

1.1.2 Patient is currently taking or will be prescribed an optimized background antiretroviral therapy regimen

AND

1.1.3 Prescribed by or in consultation with a clinician with HIV expertise

OR

1.2 For continuation of prior therapy

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228966
Guideline Name	Sensipar (cinacalcet)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sensipar (cinacalcet)
Secondary Hyperparathyroidism Indicated for the treatment of secondary hyperparathyroidism (HPT) in adult patients with chronic kidney disease (CKD) on dialysis. Limitations of Use: Sensipar is not indicated for use in adult patients with CKD who are not on dialysis because of an increased risk of hypocalcemia. **Parathyroid Carcinoma** Indicated for the treatment of hypercalcemia in adult patients with parathyroid carcinoma. **Primary Hyperparathyroidism** Indicated for the treatment of hypercalcemia in adult patients with primary HPT for whom parathyroidectomy would be indicated on the basis of serum calcium levels, but who are unable to undergo parathyroidectomy.

2 . Criteria

Product Name:Brand Sensipar, generic cinacalcet	
Diagnosis	Secondary hyperparathyroidism [1-3]
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SENSIPAR	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Brand
SENSIPAR	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Brand
SENSIPAR	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Brand
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Generic

Approval Criteria

1 - Patient is 18 years of age or older [1, A]

AND

2 - Diagnosis of secondary hyperparathyroidism with chronic kidney disease on dialysis

AND

3 - Trial and failure, contraindication or intolerance to both of the following:

A phosphate binder (e.g., PhosLo, Fosrenol, Renvela, Renagel, etc.)

A vitamin D analog (e.g., calcitriol, Hectorol, Zemplar, etc.)

AND

4 - Trial and failure or intolerance to generic cinacalcet (applies to brand Sensipar only)

AND

5 - Prescribed by or in consultation with an oncologist, endocrinologist, or nephrologist

Product Name:Brand Sensipar, generic cinacalcet	
Diagnosis	Hypercalcemia with parathyroid carcinoma
Approval Length	12 Months [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SENSIPAR	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Brand
SENSIPAR	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Brand
SENSIPAR	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Brand
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Generic

Approval Criteria

1 - Patient is 18 years of age or older [1, A]

AND

2 - Diagnosis of hypercalcemia with parathyroid carcinoma

AND

3 - Trial and failure or intolerance to generic cinacalcet (applies to brand Sensipar only)

AND

4 - Prescribed by or in consultation with an oncologist, endocrinologist, or nephrologist

Product Name:Brand Sensipar, generic cinacalcet	
Diagnosis	Severe hypercalcemia with primary hyperparathyroidism [4-5]
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SENSIPAR	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Brand
SENSIPAR	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Brand
SENSIPAR	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Brand
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Generic

Approval Criteria

1 - Patient is 18 years of age or older [1, A]

AND

2 - Diagnosis of severe hypercalcemia (level greater than 1 mg/dL above the upper limit of normal) with primary hyperparathyroidism [C, D]

AND

3 - Patient is unable to undergo parathyroidectomy

AND

4 - Trial and failure or intolerance to generic cinacalcet (applies to brand Sensipar only)

AND

5 - Prescribed by or in consultation with an oncologist, endocrinologist, or nephrologist

Product Name:Brand Sensipar, generic cinacalcet	
Diagnosis	All diagnoses listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SENSIPAR	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Brand
SENSIPAR	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Brand
SENSIPAR	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Brand
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 30 MG (BASE EQUIV)	30905225100320	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 60 MG (BASE EQUIV)	30905225100330	Generic
CINACALCET HYDROCHLORIDE	CINACALCET HCL TAB 90 MG (BASE EQUIV)	30905225100340	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

Sensipar is not indicated for use in pediatric patients. In aggregate, pediatric clinical studies did not establish a safe and effective Sensipar dosing regimen for the pediatric

population. Dosing with Sensipar in Pediatric Study 1 was stopped because of a fatality in a Sensipar-treated individual. The individual was noted to be severely hypocalcemic at the time of death. [1]

In the pivotal study of Sensipar for parathyroid carcinoma, patients were treated with maintenance therapy for up to 48 weeks. [1]

As recommended by an endocrinologist consultant, hypercalcemia is defined as serum calcium level greater than or equal to 12.5 mg/dL. [5]

In the pivotal study of Sensipar for primary hyperparathyroidism, severe hypercalcemia was defined as a screening serum calcium level of > 12.5 mg/dL. The median exposure to Sensipar was 270 days (range: 32-1,105 days). [1]

Prior Authorization Guideline

Guideline ID	GL-228534
Guideline Name	Sernivo (betamethasone dipropionate)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sernivo (betamethasone dipropionate)
Mild to moderate plaque psoriasis Indicated for the treatment of mild to moderate plaque psoriasis in patients 18 years of age or older.

2 . Criteria

Product Name:Sernivo	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic

SERNIVO	BETAMETHASONE DIPROPIONATE SPRAY EMULSION 0.05% (BASE EQUIV)	90550020001620	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure within the past 180 days, contraindication, or intolerance to three of the following:

Clocortolone 0.1% cream

Fluocinolone acetonide 0.025% ointment

Flurandrenolide 0.05% ointment

Fluticasone propionate 0.05% cream

Hydrocortisone valerate 0.2% ointment

Mometasone furoate 0.1% cream/lotion/solution

Triamcinolone 0.1% cream/ointment

Triamcinolone 0.05% ointment

Triamcinolone aerosol spray

Brand/generic Taclonex (calcipotriene-betamethasonne dipropionate) suspension

Enstilar foam

Prior Authorization Guideline

Guideline ID	GL-228536
Guideline Name	Sevenfact [coagulation factor VIIa (recombinant)-jncw] - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sevenfact [coagulation factor VIIa (recombinant)-jncw]
Hemophilia A or B with Inhibitors Indicated for the treatment and control of bleeding episodes occurring in adults and adolescents (12 years of age and older) with hemophilia A or B with inhibitors. Limitation of Use: Sevenfact is not indicated for the treatment of patients with congenital Factor VII deficiency.

2 . Criteria

Product Name:Sevenfact	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
SEVENFACT	COAGULATION FACTOR VIIA (RECOM)-JNCW FOR INJ 1 MG (1000 MCG)	85100026402117	Brand
SEVENFACT	COAGULATION FACTOR VIIA (RECOM)-JNCW FOR INJ 5 MG (5000 MCG)	85100026402145	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial of or intolerance to Novoseven RT

Product Name:Sevenfact	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228971
Guideline Name	SGLT2 Inhibitors - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Brenzavvy (bexagliflozin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of Use: Brenzavvy is not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus.
Drug Name: Invokamet (canagliflozin/metformin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Canagliflozin is indicated to reduce the risk of major adverse cardiovascular events (cardiovascular death, nonfatal myocardial infarction and nonfatal stroke) in adults with type 2 diabetes mellitus and established cardiovascular disease (CVD). Canagliflozin is indicated to reduce the risk of end-stage kidney disease (ESKD), doubling of serum creatinine, cardiovascular (CV) death, and hospitalization for heart failure in adults with type 2 diabetes mellitus and diabetic nephropathy with albuminuria greater than 300 mg/day. Limitations of Use: Not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus.
Drug Name: Invokamet XR (canagliflozin/metformin)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Canagliflozin is indicated to reduce the risk of major adverse cardiovascular events (cardiovascular death, nonfatal myocardial infarction and nonfatal stroke) in adults with type 2 diabetes mellitus and established cardiovascular disease (CVD). Canagliflozin is indicated to reduce the risk of end-stage kidney disease (ESKD), doubling of serum creatinine, cardiovascular (CV) death, and hospitalization for heart failure in adults with type 2 diabetes mellitus and diabetic nephropathy with albuminuria greater than 300 mg/day. Limitations of Use: Not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus.

Drug Name: Invokana (canagliflozin)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Indicated to reduce the risk of major adverse cardiovascular events (cardiovascular death, nonfatal myocardial infarction and nonfatal stroke) in adults with type 2 diabetes mellitus and established cardiovascular disease (CVD). Indicated to reduce the risk of end-stage kidney disease (ESKD), doubling of serum creatinine, cardiovascular (CV) death, and hospitalization for heart failure in adults with type 2 diabetes mellitus and diabetic nephropathy with albuminuria greater than 300 mg/day. Limitations of use: Invokana is not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus. Not recommended for use to improve glycemic control in adults with type 2 diabetes mellitus with an eGFR less than 30 mL/min/1.73 m 2. INVOKANA is likely to be ineffective in this setting based upon its mechanism of action.

Drug Name: Qtern (dapagliflozin and saxagliptin)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of Use: QTERN is not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus

Drug Name: Segluromet (ertugliflozin and metformin)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of Use: Not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus.

Drug Name: Steglatro (ertugliflozin)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: Not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus

Drug Name: Steglujan (ertugliflozin and sitagliptin)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of Use: Not recommended for use to improve glycemic control in patients with type 1 diabetes mellitus. Has not been studied in patients

with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at increased risk for the development of pancreatitis while using STEGLUJAN.
Drug Name: Inpefa
Heart failure or Type 2 diabetes mellitus, chronic kidney disease, and other cardiovascular risk factors Indicated to reduce the risk of cardiovascular death, hospitalization for heart failure, and urgent heart failure visit in adults with: 1) heart failure, or 2) type 2 diabetes mellitus, chronic kidney disease, and other cardiovascular risk factors

Prior Authorization Guideline

Guideline ID	GL-228537
Guideline Name	Short Acting Insulin - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Humalog (insulin lispro)
Diabetes Mellitus Indicated to improve glycemic control in adults and children with diabetes mellitus.
Drug Name: Lyumjev (insulin lispro-aabc)
Diabetes Mellitus Indicated to improve glycemic control in adults and pediatric patients with diabetes mellitus.
Drug Name: Novolog (insulin aspart)
Diabetes Mellitus Indicated to improve glycemic control in adults and pediatric patients with diabetes mellitus.
Drug Name: Novolin (human insulin)
Diabetes Mellitus Indicated to improve glycemic control in adults and pediatric patients with diabetes mellitus.

2 . Criteria

Product Name:Humalog Tempo Pen, Lyumjev Tempo Pen	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
LYUMJEV TEMPO PEN	INSULIN LISPRO-AABC SOLN PEN-INJ W/TRANSMIT PORT 100 UNIT/ML	2710400505D224	Brand
HUMALOG TEMPO PEN	INSULIN LISPRO SOLN PEN-INJ W/TRANSMITTER PORT 100 UNIT/ML	2710400500D224	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30 day supply), contraindication, or intolerance to two of the following:

Brand Humalog (insulin lispro) or Brand Insulin lispro

Brand Novolog (insulin aspart)

Lyumjev (insulin lispro)

Admelog (insulin lispro)

Apidra (insulin glulisine)

Fiasp (insulin aspart)

Product Name:Novolog Relion, Novolog Flexpen Relion, Novolog Mix 70/30 Relion, Novolog Mix 70/30 Flexpen Relion	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NOVOLOG FLEXPEN RELION	INSULIN ASPART SOLN PEN-INJECTOR 100 UNIT/ML	2710400200D220	Brand

NOVOLOG RELION	INSULIN ASPART INJ SOLN 100 UNIT/ML	27104002002022	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Both of the following:

2.1 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) to Novolog/Novolog mix (insulin aspart) AND Fiasp (insulin aspart)

AND

2.2 Submission of medical records confirming Novolog/Novolog mix (insulin aspart) AND Fiasp (insulin aspart) have not been effective AND justification/rationale provided explaining how the Non-Formulary or Excluded Medication is expected to provide benefit when the formulary alternatives have not been shown to be effective despite having the same active ingredient

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure (of a minimum 30 day supply), contraindication, or intolerance to three of the following:

Brand Humalog (insulin lispro) or Brand Insulin lispro

Lyumjev (insulin lispro)

Admelog (insulin lispro)

Apidra (insulin glulisine)

Product Name:Novolin R Relion, Novolin N Relion, Novolin 70/30 Relion	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NOVOLIN R RELION	INSULIN REGULAR (HUMAN) INJ 100 UNIT/ML	27104010002005	Brand

Prior Authorization Guideline

Guideline ID	GL-228970
Guideline Name	Short-Acting Bronchodilators
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Proventil HFA (albuterol sulfate inhalation aerosol)
Bronchospasm Indicated in adults and children 4 years of age and older for the treatment or prevention of bronchospasm with reversible obstructive airway disease and for the prevention of exercise-induced bronchospasm.
Drug Name: Xopenex HFA (levalbuterol tartrate inhalation aerosol)
Bronchospasm Indicated for the treatment or prevention of bronchospasm in adults, adolescents, and children 4 years of age and older with reversible obstructive airway disease.
Drug Name: Ventolin HFA, Proair HFA (albuterol sulfate inhalation aerosol), Proair Digihaler (albuterol sulfate inhalation powder), Proair Respiclick (albuterol sulfate powder)
Bronchospasm Indicated for the treatment of or prevention of bronchospasm in patients 4 years of age and older with reversible obstructive airway disease.

Exercise-Induced Bronchospasm Indicated for the prevention of exercise-induced bronchospasm in patients 4 years of age and older.

2 . Criteria

Product Name:Proair Digihaler, Proair HFA, Proair Respiclick, Proventil HFA, Xopenex HFA, levalbuterol HFA, Ventolin HFA or Brand Albuterol HFA (Prasco manufacturer only, NDC 66993-0019-68)	
Approval Length	12 Months
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
PROVENTIL HFA	ALBUTEROL SULFATE INHAL AERO 108 MCG/ACT (90MCG BASE EQUIV)	44201010103410	Brand

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229099
Guideline Name	Signifor, Signifor LAR (pasireotide) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Signifor LAR (pasireotide)
Acromegaly Indicated for the treatment of patients with acromegaly who have had an inadequate response to surgery and/or for whom surgery is not an option. **Cushing’s disease** Indicated for the treatment of patients with Cushing's disease for whom pituitary surgery is not an option or has not been curative.
Drug Name: Signifor (pasireotide)
Cushing's disease Indicated for the treatment of adult patients with Cushing's disease for whom pituitary surgery is not an option or has not been curative.

2 . Criteria

Product Name:Signifor LAR	
Diagnosis	Acromegaly
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 10 MG (BASE EQUIV)	3017007540G210	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 20 MG (BASE EQUIV)	3017007540G220	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 30 MG (BASE EQUIV)	3017007540G225	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 40 MG (BASE EQUIV)	3017007540G230	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 60 MG (BASE EQUIV)	3017007540G240	Brand

Approval Criteria

1 - Diagnosis of acromegaly

AND

2 - One of the following:

Inadequate response to surgery

Patient is not a candidate for surgery

Product Name:Signifor LAR	
Diagnosis	Acromegaly
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 10 MG (BASE EQUIV)	3017007540G210	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 20 MG (BASE EQUIV)	3017007540G220	Brand

SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 20 MG (BASE EQUIV)	3017007540G220	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 30 MG (BASE EQUIV)	3017007540G225	Brand

SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 40 MG (BASE EQUIV)	3017007540G230	Brand
SIGNIFOR LAR	PASIREOTIDE PAMOATE FOR IM ER SUSP 60 MG (BASE EQUIV)	3017007540G240	Brand

Approval Criteria

1 - Diagnosis of endogenous Cushing's disease

AND

2 - One of the following:

2.1 Pituitary surgery has not been curative for the patient

OR

2.2 Patient is not a candidate for pituitary surgery

AND

3 - Prescribed by or in consultation with an endocrinologist

Product Name:Signifor, Signifor LAR	
Diagnosis	Cushing's disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIGNIFOR	PASIREOTIDE DIASPARTATE INJ 0.3 MG/ML (BASE EQUIV)	30170075202020	Brand

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228540
Guideline Name	Siklos (hydroxyurea)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Siklos (hydroxyurea)
Sickle Cell Anemia Indicated to reduce the frequency of painful crises and to reduce the need for blood transfusions in adult and pediatric patients, 2 years of age and older, with sickle cell anemia with recurrent moderate to severe painful crises.

2 . Criteria

Product Name:Siklos	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIKLOS	HYDROXYUREA TAB 100 MG	82803030000320	Brand
SIKLOS	HYDROXYUREA TAB 1000 MG	82803030000340	Brand

Approval Criteria

1 - Diagnosis of sickle cell anemia

AND

2 - Patient has moderate to severe painful crises

AND

3 - Patient is 2 years of age or older

AND

4 - One of the following:

Patient is less than 18 years of age

Trial and failure, or intolerance to Droxia

3 . References

Siklos Prescribing Information. Addmedica, France. December 2021.

Prior Authorization Guideline

Guideline ID	GL-229075
Guideline Name	Siliq (brodalumab) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Siliq (brodalumab)
Plaque Psoriasis Indicated for the treatment of moderate to severe plaque psoriasis in adult patients who are candidates for systemic therapy or phototherapy and have failed to respond or have lost response to other systemic therapies.

2 . Criteria

Product Name:Siliq	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SILIQ	BRODALUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 210 MG/1.5ML	9025052000E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

Greater than or equal to 3% body surface area involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

AND

5 - One of the following:

5.1 Trial and failure, contraindication, or intolerance to TWO of the following:

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product*

One formulary ustekinumab product*

Skyrizi (risankizumab)

Tremfya (guselkumab)

Otezla (apremilast)

Sotyktu (deucravacitinib)

OR

5.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

6 - Trial and failure, contraindication, or intolerance to BOTH of the following:

Bimzelx (bimekizumab-bkzx)

Cosentyx (secukinumab)

Notes	* For review process only: Refer to the table in the Background section for carrier-specific formulary products

Product Name:Siliq	
Diagnosis	Plaque Psoriasis

1 . Indications

Drug Name: Simponi (golimumab) - for subcutaneous use
Rheumatoid Arthritis (RA) In combination with methotrexate, indicated for the treatment of adult patients with moderately to severely active rheumatoid arthritis. **Psoriatic Arthritis (PsA)** Alone or in combination with methotrexate, indicated for the treatment of adult patients with active psoriatic arthritis. **Ankylosing Spondylitis (AS)** Indicated for the treatment of adult patients with active ankylosing spondylitis. **Ulcerative Colitis (UC)** Indicated in adult patients with moderately to severely active ulcerative colitis who have demonstrated corticosteroid dependence or who have had an inadequate response to or failed to tolerate oral aminosalicylates, oral corticosteroids, azathioprine or 6-mercaptopurine for: (1) inducing and maintaining clinical response, (2)

improving endoscopic appearance of the mucosa during induction, (3) inducing clinical remission, and (4) achieving and sustaining clinical remission in induction responders.

Drug Name: Simponi Aria (golimumab) - for intravenous use

Rheumatoid Arthritis (RA) In combination with methotrexate, indicated for the treatment of adult patients with moderately to severely active rheumatoid arthritis.

Polyarticular Juvenile Idiopathic Arthritis (PJIA) Indicated for the treatment of active polyarticular juvenile idiopathic arthritis (PJIA) in patients 2 years of age and older.

Psoriatic Arthritis (PsA) Indicated for the treatment of active psoriatic arthritis in patients 2 years of age and older.

Ankylosing Spondylitis (AS) Indicated for the treatment of adult patients with active ankylosing spondylitis.

2 . Criteria

Product Name:Simponi or Simponi Aria	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	

Approval Criteria

1 - Diagnosis of moderately to severely active RA

AND

2 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [3, 4]:

methotrexate

leflunomide

sulfasalazine

AND

3 - Used in combination with methotrexate

AND

4 - Prescribed by or in consultation with a rheumatologist

Product Name:Simponi or Simponi Aria	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	Brand

SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Simponi Aria	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand

Approval Criteria

1 - Diagnosis of moderate to severely active PJIA

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 6-week trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [5]:

leflunomide

methotrexate

Product Name:Simponi Aria	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [2, 5]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Simponi or Simponi Aria	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	Brand

SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand

Approval Criteria

1 - Diagnosis of active PsA

AND

2 - One of the following [6]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

Product Name:Simponi or Simponi Aria	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 2, 6]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Simponi or Simponi Aria	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	Brand

SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis

AND

2 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [7]

AND

3 - Prescribed by or in consultation with a rheumatologist

Product Name:Simponi or Simponi Aria	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand
SIMPONI ARIA	GOLIMUMAB IV SOLN 50 MG/4ML	66270040002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 2, 7]:

Disease activity (e.g., pain, fatigue, inflammation, stiffness)

Lab values (erythrocyte sedimentation rate, C-reactive protein level)

Function

Axial status (e.g., lumbar spine motion, chest expansion)

Total active (swollen and tender) joint count

Product Name:Simponi	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [8, 9]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, ESR, CRP)

Dependent on, or refractory to, corticosteroids

AND

3 - One of the following:

3.1 Patient is corticosteroid dependent (i.e., an inability to successfully taper corticosteroids without a return of the symptoms of UC)

OR

3.2 Trial and failure, contraindication, or intolerance to one of the following conventional therapies [1, 8, 9]

6-mercaptopurine

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

Azathioprine

Corticosteroids (e.g., prednisone)

AND

4 - Prescribed by or in consultation with a gastroenterologist

Product Name:Simponi	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 100 MG/ML	6627004000D540	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/ML	6627004000E540	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 50 MG/0.5ML	6627004000D520	Brand
SIMPONI	GOLIMUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/0.5ML	6627004000E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 8, 9]:

Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline

Reversal of high fecal output state

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228542
Guideline Name	Skin Cancer Agents
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Klisyri (tirbanibulin) ointment
Actinic Keratosis indicated for the topical treatment of actinic keratosis on the face or scalp.

2 . Criteria

Product Name:Klisyri	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
KLISYRI	TIRBANIBULIN OINTMENT 1%	90374580004220	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure, contraindication, or intolerance to both of the following generics:

fluorouracil

imiquimod

3 . References

Skyclarys (omaveloxolone)

Prior Authorization Guideline

Guideline ID	GL-228972
Guideline Name	Skyclarys (omaveloxolone)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Skyclarys (omaveloxolone)
Friedreich's ataxia Indicated for the treatment of Friedreich's ataxia in adults and adolescents aged 16 years and older.

2 . Criteria

Product Name:Skyclarys	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SKYCLARYS	OMAVELOXOLONE CAP 50 MG	74135060000120	Brand

Approval Criteria

1 - Diagnosis of Friedreich's ataxia confirmed via genetic testing demonstrating mutation in the FXN gene

AND

2 - Patient is 16 years of age or older

AND

3 - Patient has a Modified Friedreich's Ataxia Rating Scale (mFARS) score of greater than or equal to 20 and less than or equal to 80

AND

4 - Patient has a B-type natriuretic peptide value less than or equal to 200 pg/mL

AND

5 - Prescribed by or in consultation with one of the following:

Neurologist

Neurogeneticist

Physiatrist (Physical Medicine and Rehabilitation Specialist)

Product Name:Skyclarys	
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SKYCLARYS	OMAVELOXOLONE CAP 50 MG	74135060000120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Patient has a Modified Friedreich's Ataxia Rating Scale (mFARS) score of less than or equal to 80 [A]

3 . Endnotes

Patients enrolled in the trial were those with an mFARS score between 20 and 80. There is no evidence of benefit for patients with severe neurologic dysfunction with an mFARS score of greater than 80.

Prior Authorization Guideline

Guideline ID	GL-228974
Guideline Name	Skyrizi (risankizumab-rzaa)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Skyrizi SC (risankizumab-rzaa)
Plaque Psoriasis (PsO) Indicated for the treatment of moderate-to-severe plaque psoriasis in adults who are candidates for systemic therapy or phototherapy. **Psoriatic Arthritis (PsA)** Indicated for the treatment of active psoriatic arthritis in adults. **Crohn's Disease (CD)** Indicated for the treatment of moderately to severely active Crohn's disease in adults. **Ulcerative Colitis (UC)** Indicated for the treatment of moderately to severely active ulcerative colitis in adults.
Drug Name: Skyrizi IV (risankizumab-rzaa)
Crohn's Disease (CD) Indicated for the treatment of moderately to severely active Crohn's disease in adults.

Ulcerative Colitis (UC) Indicated for the treatment of moderately to severely active ulcerative colitis in adults.

2 . Criteria

Product Name:Skyrizi SC 150 mg	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SKYRIZI PEN	RISANKIZUMAB-RZAA SOLN AUTO-INJECTOR 150 MG/ML	9025057070D520	Brand
SKYRIZI	RISANKIZUMAB-RZAA SOLN PREFILLED SYRINGE 150 MG/ML	9025057070E540	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

Greater than or equal to 3% body surface area involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

Notes	If patient meets criteria above, please approve at GPI-14

Product Name:Skyrizi SC 150 mg	
Diagnosis	Plaque Psoriasis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name:Skyrizi IV	
Diagnosis	Crohn's Disease (CD)
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SKYRIZI	RISANKIZUMAB-RZAA IV SOLN 600 MG/10ML (60 MG/ML)	52504060702020	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease (CD)

AND

2 - One of the following [5, 6]:

Frequent diarrhea and abdominal pain

At least 10% weight loss

Complications such as obstruction, fever, abdominal mass

Abnormal lab values (e.g., C-reactive protein [CRP])

CD Activity Index (CDAI) greater than 220

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies [5, 6]:

6-mercaptopurine

Azathioprine

Methotrexate

Corticosteroid (e.g., prednisone)

AND

4 - Will be administered as an intravenous induction dose

AND

5 - Prescribed by or in consultation with a gastroenterologist

Product Name:Skyrizi SC 180 mg, 360 mg	
Diagnosis	Crohn's Disease (CD)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233277
Guideline Name	Sodium Oxybate Containing Agents - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	5/17/2011
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Xyrem (sodium oxybate) oral solution
Narcolepsy with Cataplexy (i.e., Narcolepsy Type 1) Indicated for the treatment of cataplexy in patients 7 years of age and older with narcolepsy. **Narcolepsy without Cataplexy (i.e., Narcolepsy Type 2)** Indicated for the treatment of excessive daytime sleepiness (EDS) in patients 7 years of age and older with narcolepsy.
Drug Name: Lumryz (sodium oxybate) extended-release oral solution
Narcolepsy with Cataplexy (i.e., Narcolepsy Type 1) Indicated for the treatment of cataplexy in patients 7 years of age and older with narcolepsy. **Narcolepsy without Cataplexy (i.e., Narcolepsy Type 2)** Indicated for the treatment of excessive daytime sleepiness (EDS) in patients 7 years of age and older with narcolepsy.

Drug Name: Xywav (calcium, magnesium, potassium, and sodium oxybates) oral solution
Narcolepsy with Cataplexy (Narcolepsy Type 1) Indicated for the treatment of cataplexy in patients 7 years of age and older with narcolepsy. **Narcolepsy without Cataplexy (Narcolepsy Type 2)** Indicated for the treatment of excessive daytime sleepiness (EDS) in patients 7 years of age and older with narcolepsy. **Idiopathic Hypersomnia (IH)** Indicated for the treatment of idiopathic hypersomnia (IH) in adults.

2 . Criteria

Product Name:Brand Sodium Oxybate (Hikma manufacturer only, NDC 00054-9628-57)*, Lumryz	
Diagnosis	Narcolepsy with Cataplexy (Narcolepsy Type 1) [2, 3, A, C, D]
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SODIUM OXYBATE	SODIUM OXYBATE ORAL SOLUTION 500 MG/ML	62450060202020	Generic
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 4.5 GM	62450060203020	Brand
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 6 GM	62450060203025	Brand
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 7.5 GM	62450060203030	Brand
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 9 GM	62450060203035	Brand
LUMRYZ STARTER PACK	SODIUM OXYBATE PACK FOR ER SUSP 4.5 & 6 & 7.5 GM STARTER PAK	6245006020B120	Brand

Approval Criteria

1 - Diagnosis of narcolepsy as confirmed by sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible)

AND

2 - Symptoms of cataplexy are present

AND

3 - Symptoms of excessive daytime sleepiness (e.g., irrepressible need to sleep or daytime lapses into sleep) are present

AND

4 - Patient is 7 years of age or older

AND

5 - Prescribed by or in consultation with one of the following:

Neurologist

Psychiatrist

Sleep Medicine Specialist

Notes	*If member meets criteria above, please approve at NDC level.

Product Name:Brand Sodium Oxybate (Hikma manufacturer only, NDC 00054-9628-57)*, Lumryz	
Diagnosis	Narcolepsy with Cataplexy (Narcolepsy Type 1)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

SODIUM OXYBATE	SODIUM OXYBATE ORAL SOLUTION 500 MG/ML	62450060202020	Generic
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 4.5 GM	62450060203020	Brand
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 6 GM	62450060203025	Brand
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 7.5 GM	62450060203030	Brand
LUMRYZ	SODIUM OXYBATE PACK FOR ORAL ER SUSP 9 GM	62450060203035	Brand
LUMRYZ STARTER PACK	SODIUM OXYBATE PACK FOR ER SUSP 4.5 & 6 & 7.5 GM STARTER PAK	6245006020B120	Brand

Approval Criteria

1 - Patient demonstrates a reduction in the frequency of cataplexy attacks associated with therapy

OR

2 - Patient demonstrates a reduction in symptoms of excessive daytime sleepiness associated with therapy

Notes	*If member meets criteria above, please approve at NDC level.

Product Name:Brand Sodium Oxybate (Hikma manufacturer only, NDC 00054-9628-57)*, Lumryz	
Diagnosis	Narcolepsy without Cataplexy (Narcolepsy Type 2) [2, 3, B, C, E]
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

LUMRYZ STARTER PACK	SODIUM OXYBATE PACK FOR ER SUSP 4.5 & 6 & 7.5 GM STARTER PAK	6245006020B120	Brand

Approval Criteria

1 - Diagnosis of narcolepsy as confirmed by sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible)

AND

2 - Symptoms of cataplexy are absent

AND

3 - Symptoms of excessive daytime sleepiness (e.g., irrepressible need to sleep or daytime lapses into sleep) are present

AND

4 - Patient is 7 years of age or older

AND

5 - BOTH of the following:

5.1 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight) or intolerance to both of the following:

Generic modafinil or armodafinil

Sunosi

AND

5.2 ONE of the following

5.2.1 Trial and failure, contraindication, or intolerance to an amphetamine (e.g., amphetamine, dextroamphetamine) or methylphenidate based stimulant

OR

5.2.2 Patient is not a candidate

AND

6 - Prescribed by or in consultation with one of the following:

Neurologist

Psychiatrist

Sleep Medicine Specialist

Notes	*If member meets criteria above, please approve at NDC level.

Product Name:Brand Sodium Oxybate (Hikma manufacturer only, NDC 00054-9628-57)*, Lumryz

XYWAV	CALCIUM, MAG, POTASSIUM, & SOD OXYBATES ORAL SOLN 500 MG/ML	62459904202020	Brand

Approval Criteria

1 - Patient demonstrates a reduction in symptoms of excessive daytime sleepiness associated with therapy

3 . Endnotes

International classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy with cataplexy (narcolepsy type 1) include: 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months. 2. One or both of the following: cataplexy and a mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques (a SOREMP within 15 minutes of sleep onset on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT); or cerebrospinal fluid (CSF) hypocretin-1 concentration is low (less than 110 pg/mL or one-third of the normative values with the same standardized assay). 3. Exclusion of alternative causes of chronic daytime sleepiness by history, physical exam, and polysomnography. Other conditions that cause chronic daytime sleepiness include insufficient sleep, untreated sleep apnea, periodic limb movements of sleep, and idiopathic hypersomnia (chronic sleepiness but without SOREMPs or other evidence of abnormal REM sleep). In addition, the effects of sedating medications should be excluded. [4-6]

International classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy without cataplexy (narcolepsy type 2) include: 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months. 2. Cataplexy is absent 3. CSF hypocretin-1 levels, if measured, must not meet the narcolepsy type 1 criterion. 4. A mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques (a SOREMP within 15 minutes of sleep onset on the preceding nocturnal polysomnogram may replace 1 of the

SOREMPs on the MSLT). 5. Exclusion of alternative causes of chronic daytime sleepiness by history, physical exam, and polysomnography. Other conditions that cause chronic daytime sleepiness include insufficient sleep, untreated sleep apnea, periodic limb movements of sleep, and idiopathic hypersomnia (chronic sleepiness but without SOREMPs or other evidence of abnormal REM sleep). In addition, the effects of sedating medications should be excluded. [4-6]

Narcolepsy is often misdiagnosed. Treatment can often be given for the wrong reason if the patient has another condition with symptoms of excessive sleepiness. The diagnosis is the most important, and should be the focus in determining appropriate treatment. Both clinical symptoms and sleep study criteria (both daytime and nighttime tests) are needed to guide the diagnosis. [7]

Xyrem is very effective and can be considered a first-line treatment for cataplexy in patients with narcolepsy (narcolepsy type 1). Antidepressants have mixed issues. Currently, there are no safety data with antidepressants for the treatment of cataplexy, and tricyclics and SSRIs cause a lot of side effects including anticholinergic effects, sedation, impotence and EKG changes. Xyrem offers the advantage of treating cataplexy, and giving the patient more energy without the side effects compared to antidepressants. [7]

Generally, modafinil or armodafinil is given first for excessive daytime sleepiness without cataplexy (narcolepsy type 2), followed by on-demand stimulants, then by Xyrem. There are no head-to-head trials with Xyrem, but anecdotal and clinical practice reports find that patients receive a similar response as with modafinil/armodafinil, but not as good as stimulants for excessive daytime sleepiness. [7]

International classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy with cataplexy (narcolepsy type 1) : 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months. 2. Presence of one or both of the following: cataplexy and a mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques (a SOREMP within 15 minutes of sleep onset on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT); or cerebrospinal fluid (CSF) hypocretin-1 concentration is less than or equal to 110 pg/mL or less than one-third of the mean values obtained in normal subjects with the same standardized assay). 3. Exclusion of alternative causes of chronic daytime sleepiness by history, physical exam, and polysomnography. Other conditions that cause chronic daytime sleepiness include insufficient sleep, untreated sleep apnea, periodic limb movements of sleep, and idiopathic hypersomnia (chronic sleepiness but without SOREMPs or other evidence of abnormal REM sleep). In addition, the effects of sedating medications should be excluded. [14-18]

International classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy without cataplexy (narcolepsy type 2) : 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months. 2. Cataplexy is absent 3. CSF hypocretin-1 levels, if measured, is greater than 110 pg/mL or greater than one-third of the mean values obtained in normal subjects with the same standardized assay) 4. A mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques (a SOREMP within 15 minutes of sleep onset on

the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT). 5. Exclusion of alternative causes of chronic daytime sleepiness by history, physical exam, and polysomnography. Other conditions that cause chronic daytime sleepiness include insufficient sleep, untreated sleep apnea, periodic limb movements of sleep, and idiopathic hypersomnia (chronic sleepiness but without SOREMPs or other evidence of abnormal REM sleep). In addition, the effects of sedating medications should be excluded. [14-18]

International classification of Sleep Disorders (ICSD-3) diagnostic criteria for idiopathic hypersomnia requires all of the following: 1. Daily periods of irrepressible need for sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) for at least 3 months 2. Cataplexy is absent 3. A multiple sleep latency test (MSLT) documents fewer than two sleep-onset rapid eye movement periods (SOREMPs), or no SOREMPs if the REM sleep latency on the preceding polysomnogram was ≤15 minutes 4. The presence of at least one of the following: MSLT shows a mean sleep latency of ≤8 minutes or Total 24-hour sleep time is ≥660 minutes (typically 12 to 14 hours) on 24-hour polysomnography or by wrist actigraphy in association with a sleep log 5. Insufficient sleep syndrome is ruled out (if deemed necessary, by lack of improvement of sleepiness after an adequate trial of increased nocturnal time in bed, preferably confirmed by at least a week of wrist actigraphy) 6. No better explanation by another sleep disorder, medical or psychiatric disorder or use of drugs or medications. [14-18]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Sohonos (palovarotene)

Prior Authorization Guideline

Guideline ID	GL-233192
Guideline Name	Sohonos (palovarotene)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/16/2023
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Sohonos (palovarotene)
Fibrodysplasia Ossificans Progressiva (FOP) Indicated for reduction in the volume of new heterotopic ossification in adults and children aged 8 years and older for females and 10 years and older for males with fibrodysplasia ossificans progressiva (FOP).

2 . Criteria

Product Name:Sohonos	
Approval Length	3 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOHONOS	PALOVAROTENE CAP 1 MG	75886060000120	Brand
SOHONOS	PALOVAROTENE CAP 1.5 MG	75886060000125	Brand
SOHONOS	PALOVAROTENE CAP 2.5 MG	75886060000130	Brand
SOHONOS	PALOVAROTENE CAP 5 MG	75886060000135	Brand
SOHONOS	PALOVAROTENE CAP 10 MG	75886060000140	Brand

Approval Criteria

1 - Diagnosis of Fibrodysplasia Ossificans Progressiva (FOP)

AND

2 - Molecular genetic testing confirms mutation in the ACVR1 gene

AND

3 - One of the following:

3.1 Both of the following:

Patient is female

Patient is 8 years of age or older

OR

3.2 Both of the following:

Patient is male

Patient is 10 years of age or older

AND

4 - Prescribed by or in consultation with one of the following: [8]

Geneticist

Orthopedic physician

Rheumatologist

Endocrinologist

Product Name:Sohonos	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOHONOS	PALOVAROTENE CAP 1 MG	75886060000120	Brand
SOHONOS	PALOVAROTENE CAP 1.5 MG	75886060000125	Brand
SOHONOS	PALOVAROTENE CAP 2.5 MG	75886060000130	Brand
SOHONOS	PALOVAROTENE CAP 5 MG	75886060000135	Brand
SOHONOS	PALOVAROTENE CAP 10 MG	75886060000140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction of volume in new abnormal bone growth)

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228977
Guideline Name	Soliris (eculizumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Soliris (eculizumab)
Paroxysmal Nocturnal Hemoglobinuria (PNH) Indicated for the treatment of patients with paroxysmal nocturnal hemoglobinuria (PNH) to reduce hemolysis. **Atypical Hemolytic Uremic Syndrome (aHUS)** Indicated for the treatment of patients with atypical hemolytic uremic syndrome (aHUS) to inhibit complement-mediated thrombotic microangiopathy. Limitations of Use: Soliris is not indicated for the treatment of patients with Shiga toxin E. coli related hemolytic uremic syndrome (STEC-HUS). **Generalized Myasthenia Gravis (gMG)** Indicated for the treatment of adult patients with generalized Myasthenia Gravis (gMG) who are anti-acetylcholine receptor (AchR) antibody positive. **Neuromyelitis Optica Spectrum Disorder (NMOSD)** Indicated for the treatment of neuromyelitis optica spectrum disorder (NMOSD) in adult patients who are anti-aquaporin-4 (AQP4) antibody positive.

2 . Criteria

Product Name:Soliris	
Diagnosis	Paroxysmal Nocturnal Hemoglobinuria (PNH)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOLIRIS	ECULIZUMAB IV SOLN 300 MG/30ML (10 MG/ML) (FOR INFUSION)	85805050002020	Brand

Approval Criteria

1 - Diagnosis of paroxysmal nocturnal hemoglobinuria (PNH)

AND

2 - Trial and failure, contraindication, or intolerance to Ultomiris (ravulizumab)

AND

3 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Soliris	
Diagnosis	Paroxysmal Nocturnal Hemoglobinuria (PNH)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOLIRIS	ECULIZUMAB IV SOLN 300 MG/30ML (10 MG/ML) (FOR INFUSION)	85805050002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response (e.g., hemoglobin stabilization, decrease in the number of red blood cell transfusions) to therapy

AND

2 - Trial and failure, contraindication, or intolerance to Ultomiris (ravulizumab)

Product Name:Soliris	
Diagnosis	Atypical Hemolytic Uremic Syndrome (aHUS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOLIRIS	ECULIZUMAB IV SOLN 300 MG/30ML (10 MG/ML) (FOR INFUSION)	85805050002020	Brand

Approval Criteria

1 - Diagnosis of atypical hemolytic uremic syndrome (aHUS)

AND

2 - Trial and failure, contraindication, or intolerance to Ultomiris (ravulizumab)

AND

3 - Prescribed by or in consultation with one of the following:

Hematologist

Nephrologist

Product Name:Soliris	
Diagnosis	Atypical Hemolytic Uremic Syndrome (aHUS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOLIRIS	ECULIZUMAB IV SOLN 300 MG/30ML (10 MG/ML) (FOR INFUSION)	85805050002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response (e.g., increase in mean platelet counts, hematologic normalization) to therapy

AND

2 - Trial and failure, contraindication, or intolerance to Ultomiris (ravulizumab)

Product Name:Soliris	
Diagnosis	Generalized Myasthenia Gravis (gMG)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOLIRIS	ECULIZUMAB IV SOLN 300 MG/30ML (10 MG/ML) (FOR INFUSION)	85805050002020	Brand

Approval Criteria

1 - Diagnosis of generalized myasthenia gravis (gMG)

AND

2 - Patient is anti-acetylcholine receptor (AChR) antibody positive

AND

3 - Trial and failure, contraindication, or intolerance to one of the following:

Ultomiris (ravulizumab)

Vyvgart (efgartigimod)

AND

4 - One of the following: [2, 3]

4.1 Trial and failure, contraindication, or intolerance to two immunosuppressive therapies (e.g., glucocorticoids, azathioprine, cyclosporine, mycophenolate mofetil, methotrexate, tacrolimus)

OR

4.2 Both of the following:

4.2.1 Trial and failure, contraindication, or intolerance to one immunosuppressive therapy (e.g., glucocorticoids, azathioprine, cyclosporine, mycophenolate mofetil, methotrexate, tacrolimus)

AND

4.2.2 Trial and failure, contraindication, or intolerance to one of the following:

Chronic plasmapheresis or plasma exchange (PE)

Intravenous immunoglobulin (IVIG)

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Soliris	
Diagnosis	Generalized Myasthenia Gravis (gMG)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233287
Guideline Name	Somatuline Depot (lanreotide)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/13/2007
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Somatuline Depot (lanreotide)
Acromegaly Indicated for the long-term treatment of acromegalic patients who have had an inadequate response to surgery and/or radiotherapy, or for whom surgery and/or radiotherapy is not an option. The goal of treatment in acromegaly is to reduce growth hormone (GH) and insulin growth factor-1 (IGF-1) levels to normal. **Gastroenteropancreatic Neuroendocrine Tumors (GEP-NETs)** Indicated for the treatment of adult patients with unresectable, well or moderately differentiated, locally advanced or metastatic gastroenteropancreatic neuroendocrine tumors (GEP-NETs) to improve progression-free survival. **Carcinoid Syndrome** Indicated for the treatment of adults with carcinoid syndrome; when used, it reduces the frequency of short-acting somatostatin analog rescue therapy.
Drug Name: Lanreotide Injection

Acromegaly Indicated for the long-term treatment of acromegalic patients who have had an inadequate response to surgery and/or radiotherapy, or for whom surgery and/or radiotherapy is not an option. The goal of treatment in acromegaly is to reduce growth hormone (GH) and insulin growth factor-1 (IGF-1) levels to normal.

Gastroenteropancreatic Neuroendocrine Tumors (GEP-NETs) Indicated for the treatment of adult patients with unresectable, well or moderately differentiated, locally advanced or metastatic gastroenteropancreatic neuroendocrine tumors (GEP-NETs) to improve progression-free survival.

Off Label Uses: Carcinoid Syndrome [3] Indicated for the treatment of adults with carcinoid syndrome; when used, it reduces the frequency of short-acting somatostatin analog rescue therapy.

2 . Criteria

Product Name:Brand Somatuline Depot, Generic lanreotide	
Diagnosis	Acromegaly
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOMATULINE DEPOT	LANREOTIDE ACETATE EXTENDED RELEASE INJ 60 MG/0.2ML	30170050102025	Brand

4 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229134
Guideline Name	Somavert (pegvisomant)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	7/14/2006
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Somavert (pegvisomant)
Acromegaly Indicated for the treatment of acromegaly in patients who have had an inadequate response to surgery or radiation therapy, or for whom these therapies are not appropriate. The goal of treatment is to normalize serum insulin-like growth factor-1 (IGF-1) levels.

2 . Criteria

Product Name:Somavert	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOMAVERT	PEGVISOMANT FOR INJ 10 MG (AS PROTEIN)	30180060002120	Brand
SOMAVERT	PEGVISOMANT FOR INJ 15 MG (AS PROTEIN)	30180060002130	Brand
SOMAVERT	PEGVISOMANT FOR INJ 20 MG (AS PROTEIN)	30180060002140	Brand
SOMAVERT	PEGVISOMANT FOR INJ 25 MG (AS PROTEIN)	30180060002150	Brand
SOMAVERT	PEGVISOMANT FOR INJ 30 MG (AS PROTEIN)	30180060002160	Brand

Approval Criteria

1 - Diagnosis of acromegaly

AND

2 - One of the following: [2]

2.1 Inadequate response to one of the following:

Surgery

Radiation therapy

Dopamine agonist (e.g., bromocriptine, cabergoline) therapy

OR

2.2 Not a candidate for all of the following:

Surgery

Radiation therapy

Dopamine agonist (e.g., bromocriptine, cabergoline) therapy

AND

3 - One of the following: [2]

3.1 Inadequate response, contraindication, or intolerance to a somatostatin analog (e.g., octreotide, Somatuline [lanreotide])

OR

3.2 Clinical rationale provided for preferred treatment with pegvisomant (e.g., comorbid diabetes mellitus is present with acromegaly)

AND

4 - Prescribed by or in consultation with an endocrinologist

Product Name:Somavert	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOMAVERT	PEGVISOMANT FOR INJ 10 MG (AS PROTEIN)	30180060002120	Brand
SOMAVERT	PEGVISOMANT FOR INJ 15 MG (AS PROTEIN)	30180060002130	Brand
SOMAVERT	PEGVISOMANT FOR INJ 20 MG (AS PROTEIN)	30180060002140	Brand
SOMAVERT	PEGVISOMANT FOR INJ 25 MG (AS PROTEIN)	30180060002150	Brand
SOMAVERT	PEGVISOMANT FOR INJ 30 MG (AS PROTEIN)	30180060002160	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (such as biochemical control, decrease or normalization of IGF-1 levels)

3 . References

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Sotyktu (deucravacitinib)

Prior Authorization Guideline

Guideline ID	GL-229089
Guideline Name	Sotyktu (deucravacitinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Sotyktu	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOTYKTU	DEUCRAVACITINIB TAB 6 MG	90250524000320	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

At least 3% body surface area (BSA) involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

AND

5 - Trial and failure, contraindication, or intolerance to TWO of the following:

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product*

Skyrizi (risankizumab-rzaa)

Stelara (ustekinumab)

Tremfya (guselkumab)

Otezla (apremilast)

AND

6 - Not used in combination with other potent immunosuppressants (e.g., azathioprine, cyclosporine, biologic disease-modifying antirheumatic drugs [DMARDs])

Notes	* For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products

Product Name:Sotyktu	
Diagnosis	Plaque Psoriasis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOTYKTU	DEUCRAVACITINIB TAB 6 MG	90250524000320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following [1-3]:

Reduction in the body surface area (BSA) involvement from baseline

Improvement in symptoms (e.g., pruritus, inflammation) from baseline

AND

2 - Not used in combination with other potent immunosuppressants (e.g., azathioprine, cyclosporine, biologic DMARDs)

2 . Background

Benefit/Coverage/Program Information
Formulary Adalimumab Products **Adalimumab-adaz** **Hyrimoz** **Hadlima** **Adalimumab-fkjp**

4 . Revision History

Date	Notes
12/23/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-228980
Guideline Name	Sovaldi (sofosbuvir)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sovaldi (sofosbuvir)
Chronic Hepatitis C (CHC) ADULT PATIENTS: Indicated for the treatment of adult patients with chronic hepatitis C virus (HCV) infection as a component of a combination antiviral treatment regimen. - Genotype 1 or 4 infection without cirrhosis or with compensated cirrhosis for use in combination with pegylated interferon and ribavirin. - Genotype 2 or 3 infection without cirrhosis or with compensated cirrhosis for use in combination with ribavirin. PEDIATRIC PATIENTS: Indicated for the treatment of chronic HCV genotype 2 or 3 infection in pediatric patients 3 years of age and older without cirrhosis or with compensated cirrhosis for use in combination with ribavirin.

2 . Criteria

Product Name:Sovaldi

Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 1 or 4 - Sovaldi Plus Peginterferon Plus Ribavirin
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOVALDI	SOFOSBUVIR TAB 200 MG	12353080000310	Brand
SOVALDI	SOFOSBUVIR TAB 400 MG	12353080000320	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 150 MG	12353080003015	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 200 MG	12353080003020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1 or 4

AND

2 - Used in combination with peginterferon alfa and ribavirin

AND

3 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Patient has not experienced failure with a previous treatment regimen that includes Sovaldi

AND

6 - One of the following:

6.1 Both of the following:

6.1.1 Trial and failure, intolerance, or contraindication to ONE of the following:

Epclusa (sofosbuvir/velpatasvir)

Harvoni (ledipasvir/sofosbuvir)

AND

6.1.2 Trial and failure, contraindication, or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

6.2 For continuation of prior Sovaldi (sofosbuvir) therapy

Product Name:Sovaldi	
Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 2 - Sovaldi Plus Ribavirin
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOVALDI	SOFOSBUVIR TAB 200 MG	12353080000310	Brand
SOVALDI	SOFOSBUVIR TAB 400 MG	12353080000320	Brand

SOVALDI	SOFOSBUVIR PELLET PACK 150 MG	12353080003015	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 200 MG	12353080003020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 2 infection

AND

2 - Used in combination with ribavirin

AND

3 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Patient has not experienced failure with a previous treatment regimen that includes Sovaldi

AND

6 - One of the following:

6.1 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to BOTH of the following:

Epclusa (sofosbuvir/velpatasvir)

Mavyret (glecaprevir/pibrentasvir)

OR

6.2 For continuation of prior Sovaldi (sofosbuvir) therapy

Product Name:Sovaldi	
Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 3 - Sovaldi Plus Ribavirin
Approval Length	24 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOVALDI	SOFOSBUVIR TAB 200 MG	12353080000310	Brand
SOVALDI	SOFOSBUVIR TAB 400 MG	12353080000320	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 150 MG	12353080003015	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 200 MG	12353080003020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 3 infection

AND

2 - Used in combination with ribavirin

AND

3 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Patient has not experienced failure with a previous treatment regimen that includes Sovaldi

AND

6 - One of the following:

6.1 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to BOTH of the following:

Epclusa (sofosbuvir/velpatasvir)

Mavyret (glecaprevir/pibrentasvir)

OR

6.2 For continuation of prior Sovaldi (sofosbuvir) therapy

Product Name:Sovaldi	
Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 1, 2, 3, 4, 5, or 6; Treatment-Experienced (Prior failure of Mavyret)

Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOVALDI	SOFOSBUVIR TAB 200 MG	12353080000310	Brand
SOVALDI	SOFOSBUVIR TAB 400 MG	12353080000320	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 150 MG	12353080003015	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 200 MG	12353080003020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with Mavyret (glecaprevir/pibrentasvir) [2]

AND

3 - Used in combination with Mavyret (glecaprevir/pibrentasvir) and ribavirin [2]

AND

4 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

Product Name:Sovaldi	
Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 1, 2, 3, 4, 5, or 6; Treatment-Experienced (Prior failure of Vosevi)
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOVALDI	SOFOSBUVIR TAB 200 MG	12353080000310	Brand
SOVALDI	SOFOSBUVIR TAB 400 MG	12353080000320	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 150 MG	12353080003015	Brand
SOVALDI	SOFOSBUVIR PELLET PACK 200 MG	12353080003020	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient has experienced treatment failure with Vosevi (sofosbuvir/velpatasvir/voxilaprevir) [2]

AND

3 - Used in combination with Mavyret (glecaprevir/pibrentasvir) and ribavirin [2]

AND

4 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228982
Guideline Name	Spevigo (spesolimab-sbzo)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Spevigo (spesolimab-sbzo)
Generalized Pustular Psoriasis (GPP) Indicated for the treatment of generalized pustular psoriasis (GPP) in adults and pediatric patients 12 years of age and older and weighing at least 40 kg.

2 . Criteria

Product Name:Spevigo IV	
Approval Length	14 Days [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPEVIGO	SPESOLIMAB-SBZO IV SOLN 450 MG/7.5ML (60 MG/ML)	90250577702050	Brand

Approval Criteria

1 - Diagnosis of generalized pustular psoriasis (GPP)

AND

2 - Patient has a moderate to severe GPP flare based on one of the following:

Presence of fresh pustules (new appearance or worsening of pustules)

At least 5% of body surface area (BSA) covered with erythema and the presence of pustules

A Generalized Pustular Psoriasis Physician Global Assessment (GPPPGA) total score of at least 3 (moderate) [B]

GPPPGA pustulation sub score of at least 2 (mild)

AND

3 - Both of the following:

Patient is 12 years of age or older

Patient weighs at least 40kg

AND

4 - Prescribed by or in consultation with a dermatologist

AND

5 - Patient has not already received two infusions of Spevigo for a single flare

Product Name:Spevigo SC	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPEVIGO	SPESOLIMAB-SBZO SUBCUTANEOUS SOLN PREF SYR 150 MG/ML	9025057770E530	Brand

Approval Criteria

1 - Diagnosis of generalized pustular psoriasis (GPP) as defined by both of the following [2]:

Primary, sterile, macroscopically visible pustules on non-acral skin (excluding cases where pustulation is restricted to psoriatic plaques)

Disease is relapsing (>1 episode) or persistent (>3 months)

AND

2 - Subcutaneous formulation will not be used to treat GPP flare

AND

3 - Both of the following:

Patient is 12 years of age or older

Patient weighs at least 40kg

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Spevigo SC	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPEVIGO	SPESOLIMAB-SBZO SUBCUTANEOUS SOLN PREF SYR 150 MG/ML	9025057770E530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in number of flares)

3 . Endnotes

Spevigo is administered as a single intravenous infusion. If GPP flare symptoms persist, an additional intravenous dose may be administered one week after the initial dose [1].

The total Generalized Pustular Psoriasis Physician Global Assessment (GPPPGA) score ranges from 0 (clear) to 4 (severe) [1].

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228720
Guideline Name	Spravato (esketamine) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Spravato (esketamine)
Depression Indicated, in conjunction with an oral antidepressant, for the treatment of: - Treatment-resistant depression (TRD) in adults - Depressive symptoms in adults with major depressive disorder (MDD) with acute suicidal ideation or behavior. Limitations of Use: The effectiveness of Spravato in preventing suicide or in reducing suicidal ideation or behavior has not been demonstrated. Use of Spravato does not preclude the need for hospitalization if clinically warranted, even if patients experience improvement after an initial dose of Spravato. Spravato is not approved as an anesthetic agent. The safety and effectiveness of Spravato as an anesthetic agent have not been established.

2 . Criteria

Product Name:Spravato

Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPRAVATO 56MG DOSE	ESKETAMINE HCL NASAL SOLN 28 MG/DEVICE X 2 (56 MG DOSE PACK)	5811002010C520	Brand
SPRAVATO 84MG DOSE	ESKETAMINE HCL NASAL SOLN 28 MG/DEVICE X 3 (84 MG DOSE PACK)	5811002010C530	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

Diagnosis of major depressive disorder

Patient has not experienced a clinical meaningful improvement after treatment with at least two antidepressants from different classes for an adequate duration (at least 4 weeks each) in the current depressive episode [1-5, A, B]

OR

1.2 Both of the following:

1.2.1 Diagnosis of major depressive disorder

AND

1.2.2 Patient has both of the following:

Depressive symptoms

Acute suicidal ideation or behavior

AND

2 - Used in combination with an oral antidepressant (e.g., duloxetine, escitalopram, sertraline)

AND

3 - Prescribed by or in consultation with a psychiatrist

Product Name:Spravato	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPRAVATO 56MG DOSE	ESKETAMINE HCL NASAL SOLN 28 MG/DEVICE X 2 (56 MG DOSE PACK)	5811002010C520	Brand
SPRAVATO 84MG DOSE	ESKETAMINE HCL NASAL SOLN 28 MG/DEVICE X 3 (84 MG DOSE PACK)	5811002010C530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

AND

2 - Used in combination with an oral antidepressant (e.g., duloxetine, escitalopram, sertraline)

Product Name:Spravato	
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
SPRAVATO 56MG DOSE	ESKETAMINE HCL NASAL SOLN 28 MG/DEVICE X 2 (56 MG DOSE PACK)	5811002010C520	Brand
SPRAVATO 84MG DOSE	ESKETAMINE HCL NASAL SOLN 28 MG/DEVICE X 3 (84 MG DOSE PACK)	5811002010C530	Brand

Approval Criteria

1 - One of the following:

1.1 Submission of medical records (e.g. chart notes) documenting Both of the following:

Diagnosis of major depressive disorder

Patient has not experienced a clinical meaningful improvement after treatment with at least two antidepressants from different classes for an adequate duration (at least 4 weeks each) in the current depressive episode [1-5, A, B]

OR

1.2 Submission of medical records (e.g. chart notes) documenting Both of the following:

1.2.1 Diagnosis of major depressive disorder

AND

1.2.2 Patient has both of the following:

Depressive symptoms

Acute suicidal ideation or behavior

AND

2 - Submission of medical records (e.g. chart notes) or paid claims documenting use in combination with an oral antidepressant (e.g., duloxetine, escitalopram, sertraline)

AND

3 - Prescribed by or in consultation with a psychiatrist

3 . Endnotes

According to the American Psychiatric Association, generally, 4–8 weeks of treatment are needed before concluding that a patient is partially responsive or unresponsive to a specific intervention. [2]

Per clinical consults with psychiatrists: A trial of antidepressants should include different classes (mechanisms of action) when defining treatment resistance. [4-5]

DASATINIB	DASATINIB TAB 140 MG	21531820000380	Generic

Approval Criteria

1 - Diagnosis of Ph+/BCR ABL acute lymphoblastic leukemia (ALL)

AND

2 - Trial and failure, or intolerance to generic dasatinib (applies to Brand Sprycel only)

AND

3 - One of the following (applies to Brand Sprycel only)

3.1 Trial and failure, contraindication, or intolerance to generic imatinib

OR

3.2 Continuation of prior therapy

Product Name:Brand Sprycel, generic dasatinib	
Diagnosis	Ph+/BCR ABL Chronic Myelogenous/Myeloid Leukemia (CML)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Approval Criteria

1 - The following mandates apply to Illinois:

1.1 Effective 1/1/2018, step therapy requirements are deemed met if the provider submits medical records confirming the patient is currently stabilized on the requested medication for the medical condition under consideration.

OR

1.2 Effective 1/1/2019, any clinical criteria component involving a trial/failure requirement are deemed met if the prescription drug is used to treat the patient's stage four advanced metastatic cancer and treatment is consistent with the U.S. Food and Drug Administration-

approved indication or the National Comprehensive Cancer Network Drugs & Biologics Compendium indication for the treatment of stage four advanced metastatic cancer.

OR

1.3 Effective 6/9/2023, all clinical criteria are deemed met for the requested therapy when the medication is being used for a diagnosis of pediatric autoimmune neuropsychiatric disorders associated with streptococcal infections (PANDAS) or pediatric acute onset neuropsychiatric syndrome (PANS).

OR

2 - The following mandates apply to Iowa:

2.1 Effective 1/1/2018, any clinical criteria component involving a trial/failure requirement are deemed met if supporting rationale and documentation demonstrate any of the following circumstances apply:

2.1.1 The prescription drug required under the tried/failed protocol is contraindicated pursuant to the drug manufacturer's prescribing information for the drug or, due to a documented adverse event with a previous use or a documented medical condition, including a comorbid condition, is likely to do any of the following:

Cause an adverse reaction to a patient.

Decrease the ability of a patient to achieve or maintain reasonable functional ability in performing daily activities.

Cause physical or mental harm to a patient.

OR

2.1.2 The prescription drug required under the tried/failed protocol is expected to be ineffective based on the known clinical characteristics of the patient, such as the patient's adherence to or compliance with the patient's individual plan of care, and any of the following:

The known characteristics of the prescription drug regimen as described in peer-reviewed literature or in the manufacturer's prescribing information for the drug.

The health care professional's medical judgment based on clinical practice guidelines or peer-reviewed journals.

The patient's documented experience with the prescription drug regimen.

OR

2.1.3 The patient has had a trial of a therapeutically equivalent dose of the prescription drug under the tried/failed protocol while under the patient's current or previous health benefit plan for a period of time to allow for a positive treatment outcome, and such prescription drug was discontinued by the patient's health care professional due to lack of effectiveness.

OR

2.1.4 The patient is currently receiving a positive therapeutic outcome on a prescription drug selected by the patient's health care professional for the medical condition under consideration while under the patient's current or previous health benefit plan. Note: Bypass protocols may be applied to all applicable medications except a generic equivalent or interchangeable biological product. The use of a pharmaceutical sample for the sole purpose of meeting the requirements for a tried/failed exception may not count as sufficient experience with the requested medication to be considered stable on the medication.

OR

2.2 Effective 1/1/2025, all clinical criteria are deemed met for a covered prescription drug for any patient who is stable on such drug as determined by the prescribing health care professional, if all of the following apply:

The prescription drug was previously approved by the health carrier for coverage for the patient.

The patient's prescribing health care professional has prescribed the drug for the patient's medical condition within the previous six months.

The patient continues to be an enrollee for the health benefit plan

OR

3 - The following applies to Minnesota:

3.1 Effective 1/1/2020, any clinical criteria component involving a trial/failure requirement are deemed met if the prescription drug is used to treat the patient's stage four advanced metastatic cancer, or an associated condition, and treatment is consistent with the U.S. Food and Drug Administration-approved indication or the National Comprehensive Cancer Network

Drugs & Biologics Compendium indication for the treatment of stage four advanced metastatic cancer

OR

3.2 Effective 1/1/2020, all clinical criteria are deemed met for the requested therapy when the medication is being used for a diagnosis of pediatric autoimmune neuropsychiatric disorders associated with streptococcal infections (PANDAS) or pediatric acute onset neuropsychiatric syndrome (PANS)

OR

3.3 Effective 1/1/2019, any clinical criteria component involving a trial/failure requirement are deemed met if at least one of the following apply:

3.3.1 The provider submits documentation that the required prescription drug is contraindicated pursuant to the pharmaceutical manufacturer's prescribing information for the drug or, due to a documented adverse event with a previous use or a documented medical condition, including a comorbid condition, is likely to do any of the following:

Cause an adverse reaction to the patient

Decrease the ability of the patient to achieve or maintain reasonable functional ability in performing daily activities

Cause physical or mental harm to the patient

OR

3.3.2 The patient has had a trial of the required prescription drug covered by their current or previous health plan, or another prescription drug in the same pharmacologic class or with the same mechanism of action, was adherent for a period of time sufficient to allow for a positive treatment outcome, and the prescription drug was discontinued due to lack of effectiveness or an adverse event.

OR

3.3.3 The provider submits documentation that the patient is currently receiving a positive therapeutic outcome on a prescription drug if, while on their current health plan or the immediately preceding health plan, the patient received coverage for the prescription drug and that the change in the required prescription drug is expected to be ineffective or cause

harm to the patient based on the known characteristics of the specific patient and the known characteristics of the required prescription drug. Note: Bypass protocols may be applied to all applicable medications except a generic equivalent drug or a biosimilar. Pharmaceutical samples cannot be used for the primary purpose of meeting the requirements for an exception. Biosimilar (United States Code, chapter 42, section 262(i)(2): The biological product is highly similar to the reference product notwithstanding minor differences in clinically inactive components; and there are no clinically meaningful differences between the biological product and the reference product in terms of the safety, purity, and potency of the product

OR

3.4 Effective 7/1/2018, all clinical criteria and review types other than quantity limit are deemed met for an antipsychotic drug prescribed to treat emotional disturbance or mental illness, when the health care provider indicates orally or in writing that the prescription must be dispensed as communicated to provide maximum medical benefit to the patient and certifies in writing that they have considered all equivalent drugs in the formulary and have determined that the drug prescribed will best treat the patient's condition. Note: If a medication is being approved using the Minnesota Antipsychotic Bypass Protocol, the case should be approved for one (1) year, unless a longer duration is specified in a drug-specific guideline. Emotional Disturbance: An organic disorder of the brain or a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that is detailed in a diagnostic codes list published by the commissioner and seriously limits a child's capacity to function in primary aspects of daily living such as personal relations, living arrangements, work, school, and recreation. Emotional Disturbance is a generic term and is intended to reflect all categories of disorder described in the clinical code list published by the commissioner as "usually first evident in childhood or adolescence." Mental Illness: An organic disorder of the brain or a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that is detailed in a diagnostic codes list published by the commissioner, and that seriously limits a person's capacity to function in primary aspects of daily living such as personal relations, living arrangements, work, and recreation

OR

4 - For Wisconsin, (effective 11/1/2019), any clinical criteria component involving a trial/failure requirement are deemed met when the provider confirms a patient has previously received either a documented step one prescription drug or submits medical records documenting another prescription drug was received that has the same mechanism of action as the documented step one prescription drug, and the prescription drug was discontinued due to lack of efficacy or effectiveness, diminished effect, or an adverse event, the patient will not be required to try any other alternatives within the same pharmacological class or with the same mechanism of action. Where documented step one prescription drugs are deemed met due to this process, all documented step one prescription drugs with the same mechanism of action will count towards the number of alternatives to be tried/failed. If step through other prescription drugs with a different mechanism of action is still required, the patient must meet the additional criteria. Any clinical criteria component involving a trial/failure requirement are also deemed met if the provider submits medical records confirming that the patient is

currently stabilized on the requested medication for the medical condition under consideration, or if submitted justification and clinical documentation support that the required step one prescription drug is expected to be ineffective.

2 . Background

Benefit/Coverage/Program Information
Background: This document serves as a reference for changes requested to pharmacy utilization management programs based on state mandates. This includes but is not limited to step therapy, prior authorization regulations, supply limits, first line trial duration limitations, and pain therapy/end of life regulations. **Additional Clinical Rules:** Applicable clinical programs will apply.

3 . Revision History

Date	Notes
3/6/2025	Updated state mandate for Iowa.

Prior Authorization Guideline

Guideline ID	GL-228544
Guideline Name	Statins
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Altoprev (lovastatin extended-release)
Prevention of coronary heart disease A) Indicated in patients without symptomatic coronary heart disease (CHD), but at high risk, to reduce the risk of myocardial infarction, unstable angina, and coronary revascularization procedures. B) Indicated to slow the progression of coronary atherosclerosis in patients with coronary heart disease as part of a treatment strategy to lower Total-C and LDL-C to target levels. Limitations of use: Altoprev has not been studied in Fredrickson Types I, III, and V. **Hyperlipidemia** Indicated as an adjunct to diet for the reduction of elevated Total-C, LDL-C, Apo B, and TG, and to increase HDL-C in patients with primary hypercholesterolemia (heterozygous familial and non-familial) and mixed dyslipidemia (Fredrickson types IIa and IIb). Limitations of use: Altoprev has not been studied in Fredrickson Types I, III, and V.
Drug Name: Lipitor (atorvastatin)
Prevention of cardiovascular disease A) Indicated in adult patients without clinically evident coronary heart disease, but with multiple risk factors for coronary heart disease such as age, smoking, hypertension, low HDL-C, or a family history of early coronary heart disease, to reduce the risk of myocardial infarction, risk of stroke, and risk for revascularization

procedures and angina. B) Indicated in adult patients with type 2 diabetes, and without clinically evident coronary heart disease, but with multiple risk factors for coronary heart disease such as retinopathy, albuminuria, smoking, or hypertension, to reduce the risk of myocardial infarction and stroke. C) Indicated in adult patients with clinically evident coronary heart disease to reduce the risk of non-fatal myocardial infarction, fatal and non-fatal stroke, revascularization procedures, hospitalization for chronic heart failure (CHF), and angina.

Hyperlipidemia Indicated as 1) An adjunct to diet to reduce low-density lipoprotein cholesterol (LDL-C) in: a) Adults with primary hyperlipidemia and b) Adult and pediatric patients aged 10 years and older with heterozygous familial hypercholesterolemia (HeFH). 2) As an adjunct to other LDL-C lowering therapies, or alone if such treatments are unavailable, to reduce LDL-C in adults and pediatric patients aged 10 years and older with homozygous familial hypercholesterolemia (HoFH). 3) As an adjunct to diet for the treatment of adults with: a) primary dysbetalipoproteinemia and b) hypertriglyceridemia.

Drug Name: Zypitamag (pitavastatin magnesium)

Primary hyperlipidemia and mixed dyslipidemia Indicated as an adjunctive therapy to diet to reduce elevated total cholesterol (TC), low-density lipoprotein cholesterol (LDL-C), apolipoprotein B (Apo B), triglycerides (TG), and to increase high-density lipoprotein cholesterol (HDL-C) in adult patients with primary hyperlipidemia or mixed dyslipidemia. Limitations of use: The effect of Zypitamag on cardiovascular morbidity and mortality has not been determined.

Drug Name: Livalo (pitavastatin calcium)

Primary hyperlipidemia and mixed dyslipidemia Indicated as an adjunctive therapy to diet in: A) Adults with primary hyperlipidemia and B) Adults and pediatric patients aged 18 years and older with heteroygous familial hypercholesterolemia (HeFH).

Drug Name: Flolipid (simvastatin)

Reductions in risk of CHD mortality and cardiovascular events Indicated in patients at high risk of coronary events because of existing coronary heart disease, diabetes, peripheral vessel disease, history of stroke or other cerebrovascular disease to reduce the risk of total mortality by reducing CHD deaths, non-fatal myocardial infarction and stroke, and reduce the need for coronary and non-coronary revascularization procedures. Limitations of use: Flolipid has not been studied in conditions where the major abnormality is elevation of chylomicrons (i.e., hyperlipidemia Fredrickson types I and V).

Hyperlipidemia Indicated to reduce elevated total cholesterol (total-C), low-density lipoprotein cholesterol (LDL-C), apolipoprotein B (Apo B), and triglycerides (TG), and to increase high-density lipoprotein cholesterol (HDL-C) in patients with primary hyperlipidemia (Fredrickson type IIa, heterozygous familial and nonfamilial) or mixed dyslipidemia (Fredrickson type IIb); to reduce elevated TG in patients with hypertriglyceridemia (Fredrickson type IV hyperlipidemia); to reduce elevated TG and VLDL-C in patients with primary dysbetalipoproteinemia (Fredrickson type III hyperlipidemia); and to reduce total-C and LDL-C in patients with homozygous familial hypercholesterolemia (HoFH) as an adjunct to other lipid-lowering treatments (e.g., LDL apheresis) or if such treatments are unavailable. Limitations of use: Flolipid has not been studied in conditions where the major abnormality is

elevation of chylomicrons (i.e., hyperlipidemia Fredrickson types I and V).

Adolescent patients with heterozygous familial hypercholesterolemia (HeFH) Indicated as an adjunct to diet to reduce total-C, LDL-C, and Apo B levels in adolescent boys and girls who are at least one year post-menarche, 10-17 years of age, with HeFH, if after an adequate trial of diet therapy the following findings are present: (1) LDL cholesterol remains greater than or equal to 190 mg/dL; or (2) LDL cholesterol remains greater than or equal to 160 mg/dL and there is a positive family history of premature cardiovascular disease (CVD) or two or more other CVD risk factors are present in the adolescent patient. The minimum goal of treatment in pediatric and adolescent patients is to achieve a mean LDL-C less than 130 mg/dL. The optimal age at which to initiate lipid-lowering therapy to decrease the risk of symptomatic adulthood CAD has not been determined. Limitations of use: Flolipid has not been studied in conditions where the major abnormality is elevation of chylomicrons (i.e., hyperlipidemia Fredrickson types I and V).

Drug Name: Ezallor (rosuvastatin)

Homozygous familial hypercholesterolemia (HoFH) Indicated as an adjunct to other LDL-C-lowering therapies, or alone if such treatments are unavailable, to reduce LDL-C in adults and pediatric patients aged 7 years and older with homozygous familial hypercholesterolemia (HoFH).

Primary Dysbetalipoproteinemia (Type III Hyperlipoproteinemia) Indicated as an adjunct to diet for the treatment of adult patients with primary dysbetalipoproteinemia (Type III Hyperlipoproteinemia) or Hypertriglyceridemia.

Heterozygous Familial Hypercholesterolemia Indicated as an adjunct to diet to: A) reduce LDL-C in adults with primary hyperlipidemia, B) Reduce low-density lipoprotein (LDL-C) and slow the progression of atherosclerosis in adults, or C) Reduce LDL-C in adults and pediatric patients aged 8 years and older with heterozygous familial hypercholesterolemia (HeFH).

Prevention of Cardiovascular disease Indicated to reduce the risk of stroke, myocardial infarction, and arterial revascularization procedures in adults without established coronary heart disease who are at increased risk of cardiovascular (CV) disease based on age, hsCRP ≥2 mg/L, and at least one additional CV risk factor.

Drug Name: Lescol XL (fluvastatin sodium) extended-release

Hypercholesterolemia Indicated as an adjunct to reduce LDL-C in adults and pediatric patients 10 years of age and older with heterozygous familial hypercholesterolemia (HeFH) who require 80 mg of fluvastatin daily.

Primary hyperlipidemia Indicated as an adjunct to diet to reduce LDL-C in adults with primary hyperlidpidemia.

Secondary Prevention of Cardiovascular Disease Indicated in patients with clinically evident Coronary Heart Disease (CHD) to reduce the risk of undergoing coronary revascularization procedures and slow the progression of coronary atherosclerosis.

Drug Name: Zocor (simvastatin) film coated
Diagnosis A) Indicated to reduce the risk of total mortality by reducing risk of coronary heart disease death, non-fatal myocardial infarction and stroke, and the need for coronary and noncoronary revascularization procedures in adults with established coronary heart disease, cerebrovascular disease, peripheral vascular disease, and/or diabetes, who are at high risk of coronary heart disease events. B) As an adjunct to diet to reduce low-density lipoprotein cholesterol (LDL-C): In adults with primary hyperlipidemia, In adults and pediatric patients aged 10 years and older with heterozygous familial hypercholesterolemia (HeFH). C) Indicated as an adjunct to other LDL-C-lowering therapies to reduce LDL-C in adults with homozygous familial hypercholesterolemia (HoFH). D) Indicated as an adjunct to diet for the treatment of adults with Primary dysbetalipoproteinemia, Hypertriglyceridemia.

Prior Authorization Guideline

Guideline ID	GL-228983
Guideline Name	Stelara (ustekinumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Stelara SC (ustekinumab)
Plaque Psoriasis (PsO) Indicated for the treatment of patients 6 years or older with moderate to severe plaque psoriasis who are candidates for phototherapy or systemic therapy. **Psoriatic Arthritis (PsA)** Indicated for the treatment of patients 6 years or older with active psoriatic arthritis. **Crohn's Disease (CD)** Indicated for the treatment of adult patients with moderately to severely active Crohn's disease. **Ulcerative Colitis (UC)** Indicated for the treatment of adult patients with moderately to severely active ulcerative colitis.
Drug Name: Stelara IV (ustekinumab)
Crohn's Disease (CD) Indicated for the treatment of adult patients with moderately to severely active Crohn's disease.

Ulcerative Colitis (UC) Indicated for the treatment of adult patients with moderately to severely active ulcerative colitis.

2 . Criteria

Product Name:Stelara SC 45 mg/0.5 mL	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB INJ 45 MG/0.5ML	90250585002020	Brand
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 45 MG/0.5ML	9025058500E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

Greater than or equal to 3% body surface area involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Patient is 6 years of age or older

AND

4 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

5 - Prescribed by or in consultation with a dermatologist

Product Name:Stelara SC 90 mg/1 mL	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 90 MG/ML	9025058500E540	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

Greater than or equal to 3% body surface area involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Patient's weight is greater than 100 kg (220 lbs)

AND

4 - Patient is 6 years of age or older

AND

5 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

6 - Prescribed by or in consultation with a dermatologist

Product Name:Stelara SC	
Diagnosis	Plaque Psoriasis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB INJ 45 MG/0.5ML	90250585002020	Brand
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 45 MG/0.5ML	9025058500E520	Brand
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 90 MG/ML	9025058500E540	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following [1-3]:

Reduction in the body surface area (BSA) involvement from baseline

Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Stelara SC 45 mg/0.5 mL	
Diagnosis	Psoriatic arthritis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB INJ 45 MG/0.5ML	90250585002020	Brand
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 45 MG/0.5ML	9025058500E520	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [4]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Patient is 6 years of age or older

AND

4 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

Product Name:Stelara SC 90 mg/1 mL	
Diagnosis	Psoriatic arthritis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 90 MG/ML	9025058500E540	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [4]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Diagnosis of co-existent moderate to severe psoriasis [1, 4]

AND

4 - Patient's weight is greater than 100 kg (220 lbs)

AND

5 - Patient is 6 years of age or older

AND

6 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

Diagnosis	Psoriatic arthritis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB INJ 45 MG/0.5ML	90250585002020	Brand
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 45 MG/0.5ML	9025058500E520	Brand
STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 90 MG/ML	9025058500E540	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Stelara IV	
Diagnosis	Crohn's Disease
Approval Length	1 Time(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB IV SOLN 130 MG/26ML (5 MG/ML) (FOR IV INFUSION)	52504070002020	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - One of the following [5, 6]:

Frequent diarrhea and abdominal pain

At least 10% weight loss

Complications such as obstruction, fever, abdominal mass

Abnormal lab values (e.g., C-reactive protein [CRP])

CD Activity Index (CDAI) greater than 220

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [5, 6]:

6-mercaptopurine

azathioprine

corticosteroids (e.g., prednisone)

methotrexate

AND

4 - Stelara is to be administered as an intravenous induction dose

AND

5 - Stelara induction dosing is in accordance with the United States Food and Drug Administration approved labeled dosing for Crohn's disease:

260 mg for patients weighing 55 kg or less

390 mg for patients weighing more than 55 kg to 85 kg

520 mg for patients weighing more than 85 kg

AND

6 - Prescribed by or in consultation with a gastroenterologist

Product Name:Stelara SC	
Diagnosis	Crohn's Disease
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB INJ 45 MG/0.5ML	90250585002020	Brand

STELARA	USTEKINUMAB SOLN PREFILLED SYRINGE 90 MG/ML	9025058500E540	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - Will be used as a maintenance dose following the intravenous induction dose

AND

3 - Prescribed by or in consultation with a gastroenterologist

Product Name:Stelara IV

Diagnosis	Ulcerative Colitis
Approval Length	1 Time(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
STELARA	USTEKINUMAB IV SOLN 130 MG/26ML (5 MG/ML) (FOR IV INFUSION)	52504070002020	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [7, 8]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, ESR, CRP)

Dependent on, or refractory to, corticosteroids

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [7, 8]:

Corticosteroid (e.g., prednisone)

6-mercaptopurine

Azathioprine

Aminosalicylates (e.g., mesalamine, olsalazine, sulfasalazine)

AND

4 - Stelara is to be administered as an intravenous induction dose

AND

5 - Stelara induction dosing is in accordance with the United States Food and Drug Administration approved labeled dosing for ulcerative colitis:

260 mg for patients weighing 55 kg or less

390 mg for patients weighing more than 55 kg to 85 kg

520 mg for patients weighing more than 85 kg

AND

6 - Prescribed by or in consultation with a gastroenterologist

Prior Authorization Guideline

Guideline ID	GL-233397
Guideline Name	Sublingual Allergen Immunotherapy Products (Grastek, Odactra, Oralair, Ragwitek)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	5/21/2014
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Grastek (Timothy Grass Pollen Allergen Extract)
Allergic Rhinitis Indicated as immunotherapy for the treatment of grass pollen-induced allergic rhinitis with or without conjunctivitis confirmed by positive skin test or in vitro testing for pollen-specific IgE antibodies for Timothy grass or cross-reactive grass pollens. Grastek is approved for use in persons 5 through 65 years of age. Grastek is not indicated for the immediate relief of allergic symptoms.
Drug Name: Odactra (House Dust Mite [Dermatophagoides farinae and Dermatophagoides pteronyssinus] Allergen Extract)
Allergic Rhinitis Indicated as immunotherapy for the treatment of house dust mite (HDM)-induced allergic rhinitis, with or without conjunctivitis, confirmed by positive in vitro testing for IgE antibodies to Dermatophagoides farinae or Dermatophagoides pteronyssinus house dust mites, or by positive skin testing to licensed house dust mite allergen extracts. Odactra is

approved for use in persons 12 through 65 years of age. Odactra is not indicated for the immediate relief of allergic symptoms.
Drug Name: Oralair (Sweet Vernal, Orchard, Perennial Rye, Timothy, and Kentucky Blue Grass Mixed Pollens Allergen Extract)
Allergic Rhinitis Indicated as immunotherapy for the treatment of grass pollen-induced allergic rhinitis with or without conjunctivitis confirmed by positive skin test or in vitro testing for pollen-specific IgE antibodies for any of the five grass species contained in this product. Oralair is approved for use in persons 5 through 65 years of age. Oralair is not indicated for the immediate relief of allergy symptoms.
Drug Name: Ragwitek (Short Ragweed Pollen Allergen Extract)
Allergic Rhinitis Indicated as immunotherapy for the treatment of short ragweed pollen-induced allergic rhinitis, with or without conjunctivitis, confirmed by positive skin test or in vitro testing for pollen-specific IgE antibodies for short ragweed pollen. Ragwitek is approved for use in persons 5 through 65 years of age. Ragwitek is not indicated for the immediate relief of allergic symptoms.

Date	Notes
3/14/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-233249
Guideline Name	Sucraid (sacrosidase) Oral Solution
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/14/2022
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Sucraid (sacrosidase) Oral Solution
Congenital Sucrase-Isomaltase Deficiency (CSID) Indicated for the treatment of sucrase deficiency, which is part of congenital sucrase-isomaltase deficiency (CSID), in adult and pediatric patients 5 months of age and older.

2 . Criteria

Product Name:Sucraid	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUCRAID	SACROSIDASE SOLN 8500 UNIT/ML	51200060002030	Brand

Approval Criteria

1 - Diagnosis of sucrase deficiency (which is part of congenital sucrose-isomaltase deficiency [CSID])

AND

2 - Disease is confirmed by ONE of the following: [1, 2]

Disaccharidase assay via a small bowel biopsy

Carbon -13 sucrose breath test

Molecular genetic testing confirms mutation in the SI gene

Stool pH less than 6, an increase in breath hydrogen of greater than 10 parts-per-million (ppm) when challenged with sucrose after fasting and a negative lactose breath test

AND

3 - Patient is 5 months of age or older.

AND

4 - Prescribed by or in consultation with ONE of the following:

Gastroenterologist

Geneticist

Product Name:Sucraid

Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUCRAID	SACROSIDASE SOLN 8500 UNIT/ML	51200060002030	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decrease in symptoms of abdominal pain, cramps, bloating or gas; decrease in number and frequency of stools per day)

SUNLENCA	LENACAPAVIR SODIUM SUBCUTANEOUS SOLN 463.5 MG/1.5ML	12101555202030	Brand

Approval Criteria

1 - All of the following:

1.1 Diagnosis of HIV-1 infection

AND

1.2 Both of the following:

1.2.1 Patient is heavily treatment-experienced with multidrug resistance as confirmed by a resistance assay

AND

1.2.2 Patient is failing their current antiretroviral regimen due to one of the following:

Resistance

Intolerance

Safety considerations

AND

1.3 Patient is currently taking, or will be prescribed, an active and optimized background antiretroviral therapy regimen

AND

1.4 Prescribed by or in consultation with a clinician with HIV expertise

OR

2 - For continuation of prior therapy

1 . Indications

Drug Name: Sunosi (solriamfetol)
Narcolepsy Indicated to improve wakefulness in adults patients with excessive daytime sleepiness associated with narcolepsy. **Obstructive sleep apnea (OSA)** Indicated to improve wakefulness in adult patients with excessive daytime sleepiness associated with obstructive sleep apnea (OSA). Limitations of use: Sunosi is not indicated to treat the underlying airway obstruction in OSA. Ensure that the underlying airway obstruction is treated (e.g., with continuous positive airway pressure (CPAP)) for at least one month prior to initiating Sunosi for excessive daytime sleepiness. Modalities to treat the underlying airway obstruction should be continued during treatment with Sunosi. Sunosi is not a substitute for these modalities.

2 . Criteria

Product Name:Sunosi	
Diagnosis	Narcolepsy
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUNOSI	SOLRIAMFETOL HCL TAB 75 MG (BASE EQUIV)	61370070200320	Brand
SUNOSI	SOLRIAMFETOL HCL TAB 150 MG (BASE EQUIV)	61370070200340	Brand

Approval Criteria

1 - Diagnosis of narcolepsy as confirmed by sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible) [A, B]

AND

2 - BOTH of the following;

2.1 Trial and failure, contraindication, or intolerance to ONE of the following:

generic modafinil

generic armodafinil

AND

2.2 ONE of the following:

2.2.1 Trial and failure, contraindication, or intolerance to an amphetamine (e.g., amphetamine, dextroamphetamine) or methylphenidate based stimulant

OR

2.2.2 History of or potential for a substance use disorder

Product Name:Sunosi	
Diagnosis	Narcolepsy
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUNOSI	SOLRIAMFETOL HCL TAB 75 MG (BASE EQUIV)	61370070200320	Brand
SUNOSI	SOLRIAMFETOL HCL TAB 150 MG (BASE EQUIV)	61370070200340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

Product Name:Sunosi	
Diagnosis	Obstructive Sleep Apnea (OSA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUNOSI	SOLRIAMFETOL HCL TAB 75 MG (BASE EQUIV)	61370070200320	Brand
SUNOSI	SOLRIAMFETOL HCL TAB 150 MG (BASE EQUIV)	61370070200340	Brand

Approval Criteria

1 - Diagnosis of obstructive sleep apnea defined by one of the following: [4]

1.1 15 or more obstructive respiratory events per hour of sleep confirmed by a sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible) [C]

OR

1.2 Both of the following:

1.2.1 5 or more obstructive respiratory events per hour of sleep confirmed by a sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible) [C]

AND

1.2.2 One of the following signs/symptoms are present:

Daytime sleepiness

Nonrestorative sleep

Fatigue

Insomnia

Waking up with breath holding, gasping, or choking

Habitual snoring noted by a bed partner or other observer

Observed apnea

AND

2 - Both of the following:

2.1 Standard treatment(s) for the underlying obstruction (e.g., with continuous positive airway pressure [CPAP], bi-level positive airway pressure [BiPAP]) have been used for one month or longer

AND

2.2 Patient is fully compliant with ongoing treatment(s) for the underlying airway obstruction

AND

3 - Trial and failure, contraindication or intolerance to ONE of the following:

generic modafinil

generic armodafinil

Product Name:Sunosi	
Diagnosis	Obstructive Sleep Apnea (OSA)
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUNOSI	SOLRIAMFETOL HCL TAB 75 MG (BASE EQUIV)	61370070200320	Brand
SUNOSI	SOLRIAMFETOL HCL TAB 150 MG (BASE EQUIV)	61370070200340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy.

AND

2 - Patient continues to be fully compliant with ongoing treatment(s) for the underlying airway obstruction (e.g., CPAP, BiPAP)

3 . Endnotes

International Classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy type 1 (narcolepsy with cataplexy) require: 1) Daily periods of irrepressible need to sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) occurring for at least 3 months. 2) The presence of one or both of the following: cataplexy and a mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques. A SOREMP (within 15 minutes of sleep onset) on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT; or cerebrospinal fluid (CSF) hypocretin-1 concentration is low (less than or equal to 110 pg/mL or less than

one-third of mean values obtained in normal subjects with the same standardized assay) [2,3].

International Classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy type 2 (narcolepsy without cataplexy) include: 1) Daily periods of irrepressible need to sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) occurring for at least 3 months. 2) Cataplexy is absent. 3) CSF hypocretin-1 levels, if measured, is either greater than 100 pg/mL or greater than one-third of mean values obtained in normal subjects with the same standardized assay. 4) A mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques. A SOREMP (within 15 minutes of sleep onset) on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT. 5) Hypersomnolence and/or MSLT findings are not better explained by other causes such as insufficient sleep, obstructive sleep apnea, delayed sleep phase disorder, or the effect of medication or substances or their withdrawal [2,3].

Examples of obstructive respiratory events include: obstructive and mixed apneas, hypopneas, or respiratory effort related arousals (RERA) [2].

Prior Authorization Guideline

Guideline ID	GL-228990
Guideline Name	Sutent (sunitinib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sutent (sunitinib)
Gastrointestinal stromal tumor (GIST) Indicated for the treatment of adult patients with gastrointestinal stromal tumor (GIST) after disease progression on or intolerance to imatinib mesylate. **Advanced pancreatic neuroendocrine tumors (pNET)** Indicated for the treatment of progressive, well-differentiated pancreatic neuroendocrine tumors (pNET) in adult patients with unresectable locally advanced or metastatic disease. **Advanced renal cell carcinoma** Indicated for the treatment of adult patients with advanced renal cell carcinoma (RCC). **Adjuvant treatment of renal cell carcinoma** Indicated for the adjuvant treatment of adult patients at high risk of recurrent renal cell carcinoma following nephrectomy.

2 . Criteria

Product Name:Brand Sutent, Generic sunitinib	
Diagnosis	Gastrointestinal Stromal Tumor (GIST)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Sylvant (siltuximab)
Multicentric Castleman's Disease Indicated for the treatment of patients with multicentric Castleman’s disease (MCD) who are human immunodeficiency virus (HIV) negative and human herpesvirus-8 (HHV-8) negative. Limitation of use: Sylvant was not studied in patients with MCD who are HIV positive or HHV-8 positive because Sylvant did not bind to virally produced IL-6 in a nonclinical study.

2 . Criteria

Product Name:Sylvant	
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYLVANT	SILTUXIMAB FOR IV INFUSION 100 MG	99473080002120	Brand
SYLVANT	SILTUXIMAB FOR IV INFUSION 400 MG	99473080002140	Brand

Approval Criteria

1 - Diagnosis of multicentric Castleman's disease (MCD)

AND

2 - Patient is human immunodeficiency virus (HIV) negative

AND

3 - Patient is human herpesvirus-8 (HHV-8) negative

Product Name:Sylvant	
Approval Length	6 Months [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYLVANT	SILTUXIMAB FOR IV INFUSION 100 MG	99473080002120	Brand
SYLVANT	SILTUXIMAB FOR IV INFUSION 400 MG	99473080002140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Patient is human immunodeficiency virus (HIV) negative

AND

3 - Patient is human herpesvirus-8 (HHV-8) negative

3 . Endnotes

Patients should be evaluated for response to the drug every 3-6 months. A length of authorization of 6 months would be reasonable. [2]

Symdeko (tezacaftor/ivacaftor)

Prior Authorization Guideline

Guideline ID	GL-228548
Guideline Name	Symdeko (tezacaftor/ivacaftor)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Symdeko (tezacaftor/ivacaftor)
Cystic Fibrosis (CF) Indicated for the treatment of cystic fibrosis (CF) in patients age 6 years and older who are homozygous for the F508del mutation or who have at least one mutation in the cystic fibrosis transmembrane conductance regulator (CFTR) gene that is responsive to tezacaftor/ivacaftor based on in vitro data and/or clinical evidence. If the patient's genotype is unknown, an FDA-cleared CF mutation test should be used to detect the presence of a CFTR mutation followed by verification with bi-directional sequencing when recommended by the mutation test instructions for use.

2 . Criteria

Product Name:Symdeko	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYMDEKO	TEZACAFTOR-IVACAFTOR 100-150 MG & IVACAFTOR 150 MG TAB TBPK	4530990280B720	Brand
SYMDEKO	TEZACAFTOR-IVACAFTOR 50-75 MG & IVACAFTOR 75 MG TAB TBPK	4530990280B710	Brand

Approval Criteria

1 - Patient is 6 years of age or older

AND

2 - Diagnosis of cystic fibrosis (CF) [2,3]

AND

3 - One of the following:

3.1 Patient is homozygous for the F508del mutation in the CF transmembrane conductance regulator (CFTR) gene as detected by a U.S. Food and Drug Administration (FDA)-cleared cystic fibrosis mutation test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

OR

3.2 Patient has at least one mutation in the CFTR gene that is responsive to tezacaftor/ivacaftor based in vitro data and/or clinical evidence* as detected by a U.S. Food and Drug Administration (FDA)-cleared cystic fibrosis mutation test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist Specialist affiliated with a CF care center

Notes	*Please consult Background section for table of CFTR gene mutations responsive to Symdeko.

Product Name:Symdeko	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYMDEKO	TEZACAFTOR-IVACAFTOR 100-150 MG & IVACAFTOR 150 MG TAB TBPK	4530990280B720	Brand
SYMDEKO	TEZACAFTOR-IVACAFTOR 50-75 MG & IVACAFTOR 75 MG TAB TBPK	4530990280B710	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in lung function or decreased number of pulmonary exacerbations) [2,3]

3 . Background

Clinical Practice Guidelines
CFTR Gene Mutations that are Responsive to Symdeko [1] *Intent of table is to provide a quick reference; PA team members should still review at point of request for clinical appropriateness as off label support continuously evolves. [Last Reviewed: 1/29/24]

Prior Authorization Guideline

Guideline ID	GL-228549
Guideline Name	Symlin (pramlintide acetate injection)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Symlin (pramlintide acetate)
Type 1 Diabetes Mellitus Indicated as an adjunctive treatment in patients with type 1 diabetes who use mealtime insulin therapy and who have failed to achieve desired glucose control despite optimal insulin therapy. **Type 2 Diabetes Mellitus** Indicated as an adjunctive treatment in patients with type 2 diabetes who use mealtime insulin therapy and who have failed to achieve desired glucose control despite optimal insulin therapy.

2 . Criteria

Product Name:Symlin	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYMLINPEN 60	PRAMLINTIDE ACETATE PEN-INJ 1500 MCG/1.5ML (1000 MCG/ML)	2715005010D220	Brand
SYMLINPEN 120	PRAMLINTIDE ACETATE PEN-INJ 2700 MCG/2.7ML (1000 MCG/ML)	2715005010D240	Brand

Approval Criteria

1 - One of the following diagnoses:

Type 1 diabetes

Type 2 diabetes

AND

2 - Patient has failed to achieve desired glucose control despite optimal insulin therapy

AND

3 - Patient is taking concurrent mealtime insulin therapy (e.g., Humulin, Humalog, Novolin, Novolog)

Product Name:Symlin	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYMLINPEN 60	PRAMLINTIDE ACETATE PEN-INJ 1500 MCG/1.5ML (1000 MCG/ML)	2715005010D220	Brand
SYMLINPEN 120	PRAMLINTIDE ACETATE PEN-INJ 2700 MCG/2.7ML (1000 MCG/ML)	2715005010D240	Brand

Approval Criteria

1 - Patient has experienced an objective response to therapy demonstrated by an improvement in HbA1c from baseline

AND

2 - Patient is receiving concurrent mealtime insulin therapy (e.g., Humulin, Humalog, Novolin, Novolog)

Synagis (palivizumab)

Prior Authorization Guideline

Guideline ID	GL-228992
Guideline Name	Synagis (palivizumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Synagis (palivizumab)
Prophylaxis of respiratory syncytial virus (RSV) Indicated for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) in pediatric patients: with a history of premature birth (less than or equal to 35 weeks gestational age) and who are 6 months of age or younger at the beginning of respiratory syncytial virus (RSV) season; with bronchopulmonary dysplasia (BPD) that required medical treatment within the previous 6 months and who are 24 months of age or younger at the beginning of respiratory syncytial virus (RSV) season; with hemodynamically significant congenital heart disease (CHD) and who are 24 months of age or younger at the beginning of respiratory syncytial virus (RSV) season. Limitations of use: The safety and efficacy of Synagis have not been established for treatment of RSV disease.

2 . Criteria

Product Name:Synagis	
Diagnosis	Premature Infants (without other indications)
Approval Length	5 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYNAGIS	PALIVIZUMAB IM SOLN 50 MG/0.5ML	19502060002015	Brand
SYNAGIS	PALIVIZUMAB IM SOLN 100 MG/ML	19502060002020	Brand

Approval Criteria

1 - Born prematurely at or before 29 weeks, 0 days gestation [2, B]

AND

2 - Age < 12 months at the start of the respiratory syncytial virus (RSV) season [A].

AND

3 - Used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) during the respiratory syncytial virus (RSV) season for the patient's geographic region.

AND

4 - Patient has not received Beyfortus (nirsevimab) for the current RSV season [4]

Notes	Authorization will be issued for up to a maximum of 5 months (5 doses) during respiratory syncytial virus (RSV) season. Initiation of Synagis prophylaxis after start of respiratory syncytial virus (RSV) season will not require all 5 doses for these conditions. [A] Typical RSV season is from November through March; however, RSV season can fall outside this time frame. If outside this time frame, refe r to the CDC surveillance reports (http://www.cdc.gov/surveillance/nre vss/rsv/index.html) to confirm the start of RSV season based on regio n.

Product Name:Synagis	
Diagnosis	Chronic Lung Disease of Prematurity
Approval Length	5 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYNAGIS	PALIVIZUMAB IM SOLN 50 MG/0.5ML	19502060002015	Brand
SYNAGIS	PALIVIZUMAB IM SOLN 100 MG/ML	19502060002020	Brand

Approval Criteria

1 - Chronic lung disease (CLD) of prematurity [2]

AND

2 - Born before 32 weeks, 0 days gestation [2]

AND

3 - Received greater than 21% oxygen supplementation for at least the first 28 days after birth

AND

4 - One of the following:

4.1 Age < 12 months at the start of the respiratory syncytial virus (RSV) season.

OR

4.2 Both of the following:

Age at least 12 to < 24 months at the start of the RSV season

Received medical support (i.e., chronic corticosteroid therapy, diuretic therapy, or supplemental oxygen) within 6 months before the start of the second RSV season

AND

5 - Prescribed by or in consultation with one of the following:

Pediatric pulmonologist

Neonatologist

Pediatric intensivist

Infectious disease specialist

AND

6 - Used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) during the respiratory syncytial virus (RSV) season for the patient's geographic region.

AND

7 - Patient has not received Beyfortus (nirsevimab) for the current RSV season

Notes	Authorization will be issued for up to a maximum of 5 months (5 doses) during respiratory syncytial virus (RSV) season. Initiation of Synagis prophylaxis after start of respiratory syncytial virus (RSV) season will not require all 5 doses for these conditions. [A] Typical RSV season is from November through March; however, RSV season can fall outside this time frame. If outside this time frame, refe r to the CDC surveillance reports (http://www.cdc.gov/surveillance/nre vss/rsv/index.html) to confirm the start of RSV season based on regio n.

Product Name:Synagis	
Diagnosis	Hemodynamically Significant Congenital Heart Disease
Approval Length	5 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYNAGIS	PALIVIZUMAB IM SOLN 50 MG/0.5ML	19502060002015	Brand
SYNAGIS	PALIVIZUMAB IM SOLN 100 MG/ML	19502060002020	Brand

Approval Criteria

1 - One of the following:

1.1 Age < 12 months at the start of the respiratory syncytial virus (RSV) season, with one of the following: [C] (persons of all ages).

1.1.1 All of the following:

Acyanotic heart failure

Receiving medication to control congestive heart failure

Patient will require a cardiac surgical procedure

OR

1.1.2 Moderate to severe pulmonary hypertension

OR

1.1.3 Cyanotic heart defect

OR

1.2 Both of the following*: [D]

Age < 24 months

Patient will or has undergone a cardiac transplantation during the respiratory syncytial virus (RSV)season

AND

2 - Prescribed by or in consultation with a pediatric cardiologist

AND

3 - Used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) during the respiratory syncytial virus (RSV) season for the patient's geographic region

AND

4 - Patient has not received Beyfortus (nirsevimab) for the current RSV season

Notes	Authorization will be issued for up to a maximum of 5 months (5 doses) during respiratory syncytial virus (RSV) season. Initiation of Synagis prophylaxis after start of respiratory syncytial virus (RSV) season will not require all 5 doses for these conditions. *ONE additional postoper ative dose allowed for patients undergoing cardiac transplantation, car diac bypass or extracorporeal membrane oxygenation. [A, D] Typical RSV season is from November through March; however, RSV season can fall outside this time frame. If outside this time frame, refe r to the CDC surveillance reports (http://www.cdc.gov/surveillance/nre vss/rsv/index.html) to confirm the start of RSV season based on regio n.

Product Name:Synagis	
Diagnosis	Pulmonary Abnormality or Neuromuscular Disorder
Approval Length	5 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYNAGIS	PALIVIZUMAB IM SOLN 50 MG/0.5ML	19502060002015	Brand
SYNAGIS	PALIVIZUMAB IM SOLN 100 MG/ML	19502060002020	Brand

Approval Criteria

1 - Pulmonary abnormalities (e.g., pulmonary malformations, tracheoesophageal fistula, conditions requiring tracheostomy) or neuromuscular disease (e.g., cerebral palsy) [2]

AND

2 - Age < 12 months at the start of the respiratory syncytial virus (RSV) season.

AND

3 - Impaired ability to clear secretions from the upper airway due to an ineffective cough

AND

4 - Prescribed by or in consultation with one of the following:

Pediatric pulmonologist

Neurologist

AND

5 - Used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) during the respiratory syncytial virus (RSV) season for the patient's geographic region

AND

6 - Patient has not received Beyfortus (nirsevimab) for the current RSV season

Notes	Authorization will be issued for up to a maximum of 5 months (5 doses) during respiratory syncytial virus (RSV) season. Initiation of Synagis prophylaxis after start of respiratory syncytial virus (RSV) season will not require all 5 doses for these conditions. [A] Typical RSV season is from November through March; however, RSV season can fall outside this time frame. If outside this time frame, refe r to the CDC surveillance reports (http://www.cdc.gov/surveillance/nre

	vss/rsv/index.html) to confirm the start of RSV season based on regio n.

Product Name:Synagis	
Diagnosis	Immunocompromised Children
Approval Length	5 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYNAGIS	PALIVIZUMAB IM SOLN 50 MG/0.5ML	19502060002015	Brand
SYNAGIS	PALIVIZUMAB IM SOLN 100 MG/ML	19502060002020	Brand

Approval Criteria

1 - Prescriber attests that patient is immunocompromised

AND

2 - Age < 24 months

AND

3 - Prescribed by or in consultation with one of the following:

Pediatric pulmonologist

Infectious disease specialist

Pediatric intensivist

AND

4 - Used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) during the respiratory syncytial virus (RSV) season for the patient's geographic region

AND

5 - Patient has not received Beyfortus (nirsevimab) for the current RSV season

Notes	Authorization will be issued for up to a maximum of 5 months (5 doses) during respiratory syncytial virus (RSV) season. Initiation of Synagis prophylaxis after start of respiratory syncytial virus (RSV) season will not require all 5 doses for these conditions. [A] Typical RSV season is from November through March; however, RSV season can fall outside this time frame. If outside this time frame, refe r to the CDC surveillance reports (http://www.cdc.gov/surveillance/nre vss/rsv/index.html) to confirm the start of RSV season based on regio n.

Product Name:Synagis	
Diagnosis	Children with Cystic Fibrosis
Approval Length	5 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYNAGIS	PALIVIZUMAB IM SOLN 50 MG/0.5ML	19502060002015	Brand
SYNAGIS	PALIVIZUMAB IM SOLN 100 MG/ML	19502060002020	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis [2]

AND

2 - One of the following:

2.1 Both of the following:

Age < 12 months

Clinical evidence of chronic lung disease (CLD) and/or nutritional compromise (i.e., failure to thrive) **OR** **2.2** Both of the following: Age at least 12 to < 24 months Severe lung disease (previous hospitalization for pulmonary exacerbation in the first year of life, abnormalities on chest radiography or chest computed tomography that persist when stable) or weight for length < 10th percentile on pediatric growth chart [E] **AND** **3** - Used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) during the respiratory syncytial virus (RSV) season for the patient's geographic region **AND** **4** - Patient has not received Beyfortus (nirsevimab) for the current RSV season	
Notes	Authorization will be issued for up to a maximum of 5 months (5 doses) during respiratory syncytial virus (RSV) season. Initiation of Synagis prophylaxis after start of respiratory syncytial virus (RSV) season will not require all 5 doses for these conditions. [A] Typical RSV season is from November through March; however, RSV season can fall outside this time frame. If outside this time frame, refe r to the CDC surveillance reports (http://www.cdc.gov/surveillance/nre vss/rsv/index.html) to confirm the start of RSV season based on regio n.

3 . Endnotes

Five monthly doses of palivizumab will provide more than 6 months of prophylactic serum palivizumab concentrations. Administration of more than five monthly doses is not recommended. If RSV season onset is in November, the first dose should be administered in November, and the fifth and final dose should be administered in March. If RSV season onset is in November and the first dose is given in January, the third and

final dose should be administered in March. In most of North America, peak RSV activity typically occurs between November and March, usually beginning in November or December, peaking in January or February, and ending by the end of March or sometime in April. Communities in the southern United States, particularly some communities in the state of Florida, tend to experience the earliest onset of RSV. Data from the Centers for Disease Control and Prevention (CDC) have identified variations in the onset and offset of the RSV “season” in the state of Florida that could affect the timing of palivizumab administration. [2] For analysis of National Respiratory and Enteric Virus Surveillance System (NREVSS) reports in the CDC Morbidity and Mortality Weekly Report (MMWR), season onset is defined as the first of 2 consecutive weeks during which the mean percentage of specimens testing positive for RSV antigen is at least 10% and RSV season offset is defined as the last of 2 consecutive weeks during which the mean percentage of positive specimens is at least 10%. [3] NREVSS surveillance data can be viewed here (http://www.cdc.gov/surveillance/nrevss/rsv/)

Palivizumab prophylaxis is not recommended for otherwise healthy infants born at or after 29 weeks, 0 days' gestation. [2]

The following conditions are NOT considered hemodynamically significant congenital heart disease: secundum atrial septal defect, small ventricular septal defect, pulmonary stenosis, uncomplicated aortic stenosis, mild coaractation of the aorta, and patent ductus arteriosus; lesions adequately corrected by surgery, unless continuing required medication for congestive heart failure; mild cardiomyopathy and not receiving medical therapy for the condition; children in the second year of life. [2]

Pediatric growth charts can be viewed here (http://www.cdc.gov/growthcharts/who_charts.htm)

Children undergoing these procedures should receive an additional dose of palivizumab as soon as possible after the procedure. Thereafter, doses should be administered monthly as scheduled. [2]

Monthly prophylaxis should be discontinued in any infant or child who experiences a breakthrough RSV hospitalization. [2]

Palivizumab prophylaxis is not recommended for prevention of health care-associated RSV disease. [2]

The burden of RSV disease and costs associated with transport from remote locations may result in a broader use of palivizumab for RSV prevention in Alaska Native populations and possibly in selected other American Indian populations. [2]

Prior Authorization Guideline

Guideline ID	GL-228994
Guideline Name	Tafinlar (dabrafenib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tafinlar (dabrafenib)
BRAF V600E mutation-positive unresectable or metastatic melanoma Indicated as a single agent for the treatment of patients with unresectable or metastatic melanoma with BRAF V600E mutation as detected by an FDA-approved test. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma. **BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma** Indicated in combination with trametinib for the treatment of patients with unresectable or metastatic melanoma with BRAF V600E or V600K mutations, as detected by an FDA-approved test. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma. **BRAF V600E mutation-positive metastatic non-small cell lung cancer** Indicated in combination with trametinib for the treatment of patients with metastatic non-small cell lung

cancer (NSCLC) with BRAF V600E mutation as detected by an FDA-approved test. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma.

BRAF V600E or V600K mutation-positive adjunctive treatment for melanoma Indicated for adjuvant treatment in combination with trametinib for patients with melanoma with BRAF V600E or V600K mutations as detected by an FDA-approved test, and involvement of lymph node(s), following complete resection. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma.

Anaplastic thyroid cancer (ATC) with BRAF V600E mutation Indicated in combination with trametinib for the treatment of patients with locally advanced or metastatic anaplastic thyroid cancer (ATC) with BRAF V600E mutation and with no satisfactory locoregional treatment options. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma.

BRAF V600E mutation-positive unresectable or metastatic solid tumors Indicated, in combination with trametinib, for the treatment of adult and pediatric patients 1 year of age and older with unresectable or metastatic solid tumors with BRAF V600E mutation who have progressed following prior treatment and have no satisfactory alternative treatment options. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma.

BRAF V600E mutation-positive low-grade glioma Indicated, in combination with trametinib, for the treatment of pediatric patients 1 year of age and older with low-grade glioma (LGG) with a BRAF V600E mutation who require systemic therapy. Limitation of use: Tafinlar is not indicated for treatment of patients with wild-type BRAF solid tumors. Tafinlar is not indicated for the treatment of patients with colorectal cancer because of known intrinsic resistance to BRAF inhibition. Indication BRAF V600E or V600K mutation-positive unresectable or metastatic melanoma.

2 . Criteria

Product Name:Tafinlar	
Diagnosis	Unresectable or metastatic melanoma
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - One of the following diagnoses: [2]

Unresectable melanoma

Metastatic melanoma

AND

2 - One of the following:

2.1 Cancer is BRAFV600E mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

OR

2.2 Both of the following:

2.2.1 Cancer is BRAFV600E or V600K mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

AND

2.2.2 Medication is used in combination with Mekinist (trametinib)

Product Name:Tafinlar	
Diagnosis	Unresectable or metastatic melanoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Tafinlar	
Diagnosis	Non-small cell lung cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer

AND

2 - Cancer is BRAF V600E mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

AND

3 - Medication is used in combination with Mekinist (trametinib)

Product Name:Tafinlar	
Diagnosis	Non-small cell lung cancer
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand

TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Tafinlar	
Diagnosis	Adjunctive treatment for melanoma
Approval Length	12 Month [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Diagnosis of melanoma

AND

2 - Cancer is BRAF V600E mutation or V600K mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Involvement of lymph nodes following complete resection [2]

AND

4 - Used as adjunctive therapy

AND

5 - Medication is used in combination with Mekinist (trametinib)

Product Name:Tafinlar	
Diagnosis	Anaplastic thyroid cancer (ATC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Diagnosis of locally advanced or metastatic anaplastic thyroid cancer (ATC) [2]

AND

2 - Cancer is BRAF V600E mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Cancer may not be treated with standard locoregional treatment options

AND

4 - Medication is used in combination with Mekinist (trametinib)

Product Name:Tafinlar	
Diagnosis	Anaplastic thyroid cancer (ATC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Tafinlar	
Diagnosis	Unresectable or metastatic solid tumors
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Diagnosis of solid tumors

AND

2 - Patient is 1 year of age or older

AND

3 - Disease is one of the following:

unresectable

metastatic

AND

4 - Patient has progressed on or following prior treatment and have no satisfactory alternative treatment options

AND

5 - Cancer is BRAF V600E mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

6 - Medication is used in combination with Mekinist (trametinib)

Product Name:Tafinlar	
Diagnosis	Unresectable or metastatic solid tumors
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand

TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Tafinlar	
Diagnosis	Low-grade glioma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Diagnosis of low-grade glioma

AND

2 - Patient is 1 year of age or older

AND

3 - Patient requires systemic therapy

AND

4 - Cancer is BRAF V600E mutation type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Medication is used in combination with Mekinist (trametinib)

Product Name:Tafinlar	
Diagnosis	Low-grade glioma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAFINLAR	DABRAFENIB MESYLATE CAP 50 MG (BASE EQUIVALENT)	21532025100120	Brand
TAFINLAR	DABRAFENIB MESYLATE CAP 75 MG (BASE EQUIVALENT)	21532025100130	Brand
TAFINLAR	DABRAFENIB MESYLATE TAB FOR ORAL SUSP 10 MG (BASE EQUIV)	21532025107320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

The recommended dosage of TAFINLAR is 150 mg orally taken twice daily in combination with trametinib until disease recurrence or unacceptable toxicity for up to 1 year for the adjuvant treatment of melanoma [1].

Prior Authorization Guideline

Guideline ID	GL-233250
Guideline Name	Tagrisso (osimertinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	1/27/2016
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Tagrisso (osimertinib)
First-line Treatment of EGFR Mutation-Positive Metastatic Non-Small Cell Lung Cancer (NSCLC) Indicated for the first-line treatment of patients with metastatic non-small cell lung cancer (NSCLC) whose tumors have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test. **Previously Treated EGFR T790M Mutation-Positive Metastatic NSCLC** Indicated for the treatment of patients with metastatic epidermal growth factor receptor (EGFR) T790M mutation-positive non-small cell lung cancer (NSCLC), as detected by an FDA-approved test, whose disease has progressed on or after EGFR tyrosine kinase inhibitor (TKI) therapy. **Adjuvant Treatment of EGFR Mutation-Positive Non-Small Cell Lung Cancer (NSCLC)** Indicated as adjuvant therapy after tumor resection in adult patients with non-small cell lung cancer (NSCLC) whose tumors have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test.

First-line Treatment of EGFR Mutation-Positive Locally Advanced or Metastatic NSCLC Indicated in combination with pemetrexed and platinum-based chemotherapy for the first-line treatment of adult patients with locally advanced or metastatic NSCLC whose tumors have EGFR exon 19 or exon 21 L858R mutations, as detected by an FDA-approved test.

Locally Advanced, Unresectable (Stage III) EGFR Mutation-Positive NSCLC Indicated for the treatment of adult patients with locally advanced, unresectable (stage III) NSCLC whose disease has not progressed during or following concurrent or sequential platinum-based chemoradiation therapy and whose tumors have EGFR exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test.

2 . Criteria

Product Name:Tagrisso	
Diagnosis	First-line Treatment of EGFR Mutation-Positive NSCLC
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAGRISSO	OSIMERTINIB MESYLATE TAB 40 MG (BASE EQUIVALENT)	21360068200320	Brand
TAGRISSO	OSIMERTINIB MESYLATE TAB 80 MG (BASE EQUIVALENT)	21360068200330	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of metastatic non-small cell lung cancer (NSCLC)

AND

1.1.2 Patient has known active epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations as detected by an U.S. Food and Drug Administration (FDA)-

approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

OR

1.2 All of the following:

1.2.1 Diagnosis of locally advanced NSCLC

AND

1.2.2 Patient has known active epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations as detected by an U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

1.2.3 Used in combination with both of the following:

Pemetrexed

Platinum-based chemotherapy (e.g., cisplatin, carboplatin)

Product Name:Tagrisso	
Diagnosis	Previously Treated EGFR T790M Mutation-Positive Metastatic NSCLC
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAGRISSO	OSIMERTINIB MESYLATE TAB 40 MG (BASE EQUIVALENT)	21360068200320	Brand
TAGRISSO	OSIMERTINIB MESYLATE TAB 80 MG (BASE EQUIVALENT)	21360068200330	Brand

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer (NSCLC)

AND

2 - Patient has a known active epidermal growth factor receptor (EGFR) T790M mutation as detected by a U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Patient has experienced disease progression on or after one of the following EGFR Tyrosine Kinase Inhibitors (TKIs): [1-3]

Gilotrif (afatinib)*

Iressa (gefitinib)*

Tarceva (erlotinib)*

Vizimpro (dacomitinib)*

Product Name:Tagrisso	
Diagnosis	Adjuvant Treatment of EGFR Mutation-Positive Non-Small Cell Lung Cancer (NSCLC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

TAGRISSO	OSIMERTINIB MESYLATE TAB 40 MG (BASE EQUIVALENT)	21360068200320	Brand
TAGRISSO	OSIMERTINIB MESYLATE TAB 80 MG (BASE EQUIVALENT)	21360068200330	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Patient has known active epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations as detected by an U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Both of the following:

Patient is receiving as adjuvant therapy

Patient has had a complete surgical resection of the primary non-small cell lung cancer (NSCLC) tumor

Product Name:Tagrisso	
Diagnosis	Locally Advanced, Unresectable (Stage III) EGFR Mutation-Positive NSCLC
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAGRISSO	OSIMERTINIB MESYLATE TAB 40 MG (BASE EQUIVALENT)	21360068200320	Brand
TAGRISSO	OSIMERTINIB MESYLATE TAB 80 MG (BASE EQUIVALENT)	21360068200330	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is one of the following:

Locally advanced

Unresectable (Stage III)

AND

3 - Presence of known active epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations as detected by an U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - Disease has not progressed during or following concurrent or sequential platinum-based chemoradiation therapy

Product Name:Tagrisso	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAGRISSO	OSIMERTINIB MESYLATE TAB 40 MG (BASE EQUIVALENT)	21360068200320	Brand
TAGRISSO	OSIMERTINIB MESYLATE TAB 80 MG (BASE EQUIVALENT)	21360068200330	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-229073
Guideline Name	Taltz (ixekizumab) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Taltz	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 80 MG/ML	9025055400D520	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 80 MG/ML	9025055400E520	Brand

TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 20 MG/0.25ML	9025055400E510	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 40 MG/0.5ML	9025055400E515	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

Greater than or equal to 3% body surface area involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Patient is 6 years of age or older

AND

4 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

5 - Prescribed by or in consultation with a dermatologist

AND

6 - Both of the following:

6.1 One of the following:

6.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following:

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product*

One formulary ustekinumab product*

Skyrizi (risankizumab)

Tremfya (guselkumab)

Otezla (apremilast)

Sotyktu (deucravacitinib)

OR

6.1.2 Both of the following:

6.1.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

6.1.2.2 Documentation of positive clinical response to therapy as evidenced by ONE of the following [2]:

Reduction the body surface area (BSA) involvement from baseline

Improvement in symptoms (e.g., pruritus, inflammation) from baseline

AND

6.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to BOTH of the following:

Bimzelx (bimekizumab-bkzx)

Cosentyx (secukinumab)

Notes	* For review process only: Refer to the table in the Background sectio n for carrier-specific formulary products

Product Name:Taltz	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 80 MG/ML	9025055400D520	Brand

TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 80 MG/ML	9025055400E520	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [4]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

AND

4 - One of the following:

4.1 All of the following:

4.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following:

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product*

Simponi (golimumab)

One formulary ustekinumab product*

Skyrizi (risankizumab-rzaa)

Tremfya (guselkumab)

Rinvoq/LQ (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

AND

4.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Cosentyx (secukinumab)

AND

4.1.3 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to ONE of the following:

Bimzelx (bimekizumab-bkzx)

Orencia (abatacept)

AND

4.2 Both of the following:

4.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

4.2.2 Documentation of positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Taltz	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 80 MG/ML	9025055400D520	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 80 MG/ML	9025055400E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Taltz	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 80 MG/ML	9025055400D520	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 80 MG/ML	9025055400E520	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 20 MG/0.25ML	9025055400E510	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 40 MG/0.5ML	9025055400E515	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [4]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

AND

4 - One of the following:

4.1 All of the following:

4.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following:

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product*

Simponi (golimumab)

One formulary ustekinumab product*

Skyrizi (risankizumab-rzaa)

Tremfya (guselkumab)

Rinvoq/LQ (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

AND

4.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Cosentyx (secukinumab)

AND

4.1.3 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to ONE of the following:

Bimzelx (bimekizumab-bkzx)

Orencia (abatacept)

AND

4.2 Both of the following:

4.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

4.2.2 Documentation of positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Product Name:Taltz	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 80 MG/ML	9025055400D520	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 80 MG/ML	9025055400E520	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen) at maximally tolerated doses [5]

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product*

Simponi (golimumab)

Rinvoq (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

AND

4.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to BOTH of the following:

Bimzelx (bimekizumab-bkzx)

Cosentyx (secukinumab)

OR

4.2 Both of the following:

4.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

4.2.2 Documentation of positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 5]:

Disease activity (e.g., pain, fatigue, inflammation, stiffness)

Lab values (erythrocyte sedimentation rate, C-reactive protein level)

Function

Axial status (e.g., lumbar spine motion, chest expansion)

Total active (swollen and tender) joint count

Notes	* Includes attestation that a total of two TNF inhibitors have already been tried in the past, and the patient should not be made to try a third TNF inhibitor. ** For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products

Product Name:Taltz	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 80 MG/ML	9025055400D520	Brand
TALTZ	IXEKIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 80 MG/ML	9025055400E520	Brand

Approval Criteria

1 - Diagnosis of active non-radiographic axial spondyloarthritis

AND

2 - Patient has objective signs of inflammation (e.g., C-reactive protein [CRP] levels above the upper limit of normal and/or sacroiliitis on magnetic resonance imaging [MRI], indicative of inflammatory disease, but without definitive radiographic evidence of structural damage on sacroiliac joints.) [1, 3]

AND

3 - Prescribed by or in consultation with a rheumatologist

AND

4 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [5]

AND

5 - One of the following:

5.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to ALL of the following:

Cimzia (certolizumab pegol)

Bimzelx (bimekizumab-bkzx)

Cosentyx (secukinumab)

Rinvoq (upadacitinib)

OR

5.2 Both of the following:

5.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

5.2.2 Documentation of positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 5]:

Disease activity (e.g., pain, fatigue, inflammation, stiffness)

Lab values (erythrocyte sedimentation rate, C-reactive protein level)

Function

Axial status (e.g., lumbar spine motion, chest expansion)

Total active (swollen and tender) joint count

Product Name:Taltz	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)

4 . Revision History

Date	Notes
12/20/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-233213
Guideline Name	Talvey (talquetamab-tgvs)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/18/2023
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Talvey (talquetamab-tgvs)
Multiple Myeloma Indicated for the treatment of adult patients with relapsed or refractory multiple myeloma who have received at least four prior lines of therapy, including a proteasome inhibitor, an immunomodulatory agent, and an anti-CD38 monoclonal antibody. This indication is approved under accelerated approval based on response rate and durability of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Talvey

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALVEY	TALQUETAMAB-TGVS SUBCUTANEOUS SOLN 3 MG/1.5ML (2 MG/ML)	21352076802020	Brand
TALVEY	TALQUETAMAB-TGVS SUBCUTANEOUS SOLN 40 MG/ML	21352076802040	Brand

Approval Criteria

1 - Diagnosis of multiple myeloma

AND

2 - Disease is one of the following:

Relapsed

Refractory

AND

3 - Patient has received at least four prior lines of therapy which include all of the following:

An immunomodulatory agent (e.g., lenalidomide, thalidomide)

A proteasome inhibitor (e.g., bortezomib, carfilzomib)

A CD38-directed monoclonal antibody (e.g., daratumumab)

Product Name:Talvey	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALVEY	TALQUETAMAB-TGVS SUBCUTANEOUS SOLN 3 MG/1.5ML (2 MG/ML)	21352076802020	Brand
TALVEY	TALQUETAMAB-TGVS SUBCUTANEOUS SOLN 40 MG/ML	21352076802040	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229163
Guideline Name	Talzenna (talazoparib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/19/2018
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Talzenna (talazoparib)
Breast Cancer Indicated for the treatment of adult patients with deleterious or suspected deleterious germline breast cancer susceptibility gene (BRCA)-mutated (gBRCAm) human epidermal growth factor receptor 2 (HER2)-negative locally advanced or metastatic breast cancer. Select patients for therapy based on an FDA-approved companion diagnostic for TALZENNA. **HRR Gene-mutated mCRPC** Indicated in combination with enzalutamide for the treatment of adult patients with homologous recombination repair (HRR) gene-mutated metastatic castration-resistant prostate cancer (mCRPC).

2 . Criteria

Product Name:Talzenna	
Diagnosis	Breast Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TALZENNA	TALAZOPARIB TOSYLATE CAP 0.25 MG (BASE EQUIVALENT)	21535580400110	Brand

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228998
Guideline Name	Tarceva (erlotinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tarceva (erlotinib)
Non-Small Cell Lung Cancer (NSCLC) Indicated for metastatic non-small cell lung cancer (NSCLC) whose tumors have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations as detected by an FDA-approved test receiving first-line, maintenance, or second or greater line treatment after progression following at least one prior chemotherapy regimen. Limitations of use: Safety and efficacy of Tarceva have not been established in patients with NSCLC whose tumors have other EGFR mutations. Tarceva is not recommended for use in combination with platinum-based chemotherapy. **Pancreatic Cancer** Indicated for the first-line treatment of patients with locally advanced, unresectable or metastatic pancreatic cancer in combination with gemcitabine.

2 . Criteria

Product Name:Brand Tarceva, Generic erlotinib	
Diagnosis	Non-Small Cell Lung Cancer (NSCLC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TARCEVA	ERLOTINIB HCL TAB 25 MG (BASE EQUIVALENT)	21360025100320	Brand
ERLOTINIB HYDROCHLORIDE	ERLOTINIB HCL TAB 25 MG (BASE EQUIVALENT)	21360025100320	Generic
TARCEVA	ERLOTINIB HCL TAB 100 MG (BASE EQUIVALENT)	21360025100330	Brand

ERLOTINIB HYDROCHLORIDE	ERLOTINIB HCL TAB 150 MG (BASE EQUIVALENT)	21360025100360	Generic

Approval Criteria

1 - One of the following diagnoses:

Locally advanced pancreatic cancer

Unresectable pancreatic cancer

Metastatic pancreatic cancer

AND

2 - Used in combination with Gemzar (gemcitabine)

Product Name:Brand Tarceva, Generic erlotinib	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228999
Guideline Name	Targretin (bexarotene)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Targretin (bexarotene) capsules
Cutaneous T-Cell Lymphoma Indicated for the treatment of cutaneous manifestations of cutaneous T-cell lymphoma in patients who are refractory to at least one prior systemic therapy.
Drug Name: Targretin (bexarotene) gel 1%
Cutaneous T-Cell Lymphoma Indicated for the topical treatment of cutaneous lesions in patients with cutaneous T-cell lymphoma (Stage 1A and 1B) who have refractory or persistent disease after other therapies or who have not tolerated other therapies.

2 . Criteria

Product Name:Brand Targretin capsules, Generic bexarotene capsules, Brand Targretin gel, Generic bexarotene Gel	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TARGRETIN	BEXAROTENE CAP 75 MG	21708220000120	Brand
TARGRETIN	BEXAROTENE GEL 1%	90376220004020	Brand

BEXAROTENE	BEXAROTENE GEL 1%	90376220004020	Generic

Approval Criteria

1 - Patient does not show evidence of disease progression while on therapy

3 . Endnotes

Cutaneous T-cell lymphomas (CTCLs) are a group of non-Hodgkin's lymphomas (NHLs) primarily developing in the skin and at times progress to involve lymph nodes, blood, and visceral organs. Mycosis fungoides (MF) is the most common subtype and is usually associated with an indolent clinical course with intermittent, stable, or slow progression of the lesions. Extracutaneous involvement (lymph nodes, blood, or less commonly, other organs) or large cell transformation (LCT) may be seen in advanced-stage disease. Sezary Syndrome (SS) is a rare erythrodermic, leukemic variant of CTCL and is characterized by significant blood involvement, erythroderma, and often lymphadenopathy. Primary cutaneous CD30+ T cell lymphoproliferative disorders are also included as a subtype of CTCL. [3]

Prior Authorization Guideline

Guideline ID	GL-228724
Guideline Name	Tarpeyo (budesonide) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tarpeyo (budesonide)
Primary Immunoglobulin A Nephropathy (IgAN) Indicated to reduce the loss of kidney function in adults with primary immunoglobulin A nephropathy (IgAN) who are at risk for disease progression.

2 . Criteria

Product Name:Tarpeyo	
Approval Length	9 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TARPEYO	BUDESONIDE DELAYED RELEASE CAP 4 MG	22100012006520	Brand

Approval Criteria

1 - Diagnosis of primary immunoglobulin A nephropathy (IgAN) as confirmed by a kidney biopsy [A]

AND

2 - Patient is at risk for disease progression

AND

3 - Used to reduce the loss of kidney function

AND

4 - Estimated glomerular filtration rate (eGFR) greater than or equal to 35 mL/min/1.73 m2

AND

5 - ONE of the following:

5.1 Patient has been on a minimum 90-day trial of a maximally tolerated dose and will continue to receive therapy with one of the following: [2]

An angiotensin-converting enzyme (ACE) inhibitor (e.g., benazepril, lisinopril)

An angiotensin II receptor blocker (ARB) (e.g., losartan, valsartan)

OR

5.2 Patient has a contraindication or intolerance to both ACE inhibitors and ARBs

AND

6 - Trial and failure, contraindication, or intolerance to another glucocorticoid (e.g., methylprednisolone, prednisone)

AND

7 - Prescribed by or in consultation with a nephrologist

Product Name:Tarpeyo	
Approval Length	9 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TARPEYO	BUDESONIDE DELAYED RELEASE CAP 4 MG	22100012006520	Brand

Approval Criteria

1 - Diagnosis of primary immunoglobulin A nephropathy (IgAN) as confirmed by a kidney biopsy [A]

AND

2 - Patient is at risk for disease progression

AND

3 - Used to reduce the loss of kidney function

AND

4 - Submission of medical records (e.g., chart notes) confirming estimated glomerular filtration rate (eGFR) greater than or equal to 35 mL/min/1.73 m2

AND

5 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following:

5.1 Patient has been on a minimum 90-day trial of a maximally tolerated dose and will continue to receive therapy with one of the following: [2]

An angiotensin-converting enzyme (ACE) inhibitor (e.g., benazepril, lisinopril)

An angiotensin II receptor blocker (ARB) (e.g., losartan, valsartan)

OR

5.2 Patient has a contraindication or intolerance to both ACE inhibitors and ARBs

AND

6 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to another glucocorticoid (e.g., methylprednisolone, prednisone)

AND

7 - Prescribed by or in consultation with a nephrologist

3 . Endnotes

IgAN can only be diagnosed with a kidney biopsy. [2]

Prior Authorization Guideline

Guideline ID	GL-229003
Guideline Name	Tasigna (nilotinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tasigna (nilotinib)
Newly diagnosed Ph+ Chronic Myeloid Leukemia Indicated for the treatment of adult and pediatric patients greater than or equal to 1 year of age with newly diagnosed Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML) in chronic phase. **Resistant or intolerant CML in chronic phase (CP) and accelerated phase (AP)** Indicated for the treatment of chronic phase and accelerated phase Ph+ CML in adult patients resistant to or intolerant to prior therapy that included imatinib. **Resistant or intolerant CML in chronic phase (CP) and accelerated phase (AP), Pediatric** Indicated for pediatric patients greater than or equal to 1 year of age with chronic phase and accelerated phase Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML) with resistance or intolerance to prior tyrosine-kinase inhibitor (TKI) therapy.

2 . Criteria

Product Name:Tasigna	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TASIGNA	NILOTINIB HCL CAP 50 MG (BASE EQUIVALENT)	21531860200110	Brand
TASIGNA	NILOTINIB HCL CAP 150 MG (BASE EQUIVALENT)	21531860200115	Brand
TASIGNA	NILOTINIB HCL CAP 200 MG (BASE EQUIVALENT)	21531860200125	Brand

Approval Criteria

1 - Diagnosis of Philadelphia chromosome-positive/BCR ABL positive (Ph+/BCR ABL) chronic myelogenous/myeloid leukemia (CML) (A)

AND

2 - Patient is 1 year of age or older

AND

3 - One of the following:

3.1 Trial and failure, contraindication, or intolerance to generic imatinib

OR

3.2 Continuation of prior therapy

Product Name:Tasigna	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TASIGNA	NILOTINIB HCL CAP 50 MG (BASE EQUIVALENT)	21531860200110	Brand
TASIGNA	NILOTINIB HCL CAP 150 MG (BASE EQUIVALENT)	21531860200115	Brand
TASIGNA	NILOTINIB HCL CAP 200 MG (BASE EQUIVALENT)	21531860200125	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to generic imatinib

OR

2.2 Continuation of prior therapy

3 . Endnotes

BCR-ABL1 refers to a gene sequence found in an abnormal chromosome 22. The cause of chronic myelogenous leukemia (CML) can be traced to a single, specific genetic abnormality in one chromosome. The presence of the gene sequence known as BCR-ABL1 confirms the diagnosis of CML.

Prior Authorization Guideline

Guideline ID	GL-228552
Guideline Name	Tavalisse (fostamatinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tavalisse (fostamatinib)
Chronic Immune Thrombocytopenia (ITP) Indicated for the treatment of thrombocytopenia in adult patients with chronic immune thrombocytopenia (ITP) who have had an insufficient response to a previous treatment.

2 . Criteria

Product Name:Tavalisse	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAVALISSE	FOSTAMATINIB DISODIUM TAB 100 MG (BASE EQUIVALENT)	85756040100310	Brand
TAVALISSE	FOSTAMATINIB DISODIUM TAB 150 MG (BASE EQUIVALENT)	85756040100320	Brand

Approval Criteria

1 - Diagnosis of one of the following:

Chronic immune thrombocytopenia (ITP) [A]

Relapsed/refractory ITP [3]

AND

2 - Baseline platelet count is less than 30,000/mcL [2-4]

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following: [1-4]

Corticosteroids (e.g., dexamethasone, prednisone)

Immune globulins (e.g., Gammaplex, Gammagard S/D)

Splenectomy

AND

4 - Patient’s degree of thrombocytopenia and clinical condition increase the risk of bleeding [3]

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Tavalisse	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAVALISSE	FOSTAMATINIB DISODIUM TAB 100 MG (BASE EQUIVALENT)	85756040100310	Brand
TAVALISSE	FOSTAMATINIB DISODIUM TAB 150 MG (BASE EQUIVALENT)	85756040100320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by an increase in platelet count to a level sufficient to avoid clinically important bleeding

Prior Authorization Guideline

Guideline ID	GL-229135
Guideline Name	Tavneos (avacopan) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/15/2021
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Tavneos (avacopan)
Anti-Neutrophil Cytoplasmic Autoantibody (ANCA)-Associated Vasculitis Indicated as an adjunctive treatment of adult patients with severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis (granulomatosis with polyangiitis [GPA] and microscopic polyangiitis [MPA]) in combination with standard therapy including glucocorticoids. Tavneos does not eliminate glucocorticoid use.

2 . Criteria

Product Name:Tavneos

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAVNEOS	AVACOPAN CAP 10 MG	85805510000120	Brand

Approval Criteria

1 - Diagnosis of one of the following types of severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis:

Granulomatosis with polyangiitis (GPA)

Microscopic polyangiitis (MPA)

AND

2 - Diagnosis is confirmed by one of the following: [4]

ANCA test positive for proteinase 3 (PR3) antigen

ANCA test positive for myeloperoxidase (MPO) antigen

Tissue biopsy

AND

3 - Patient is receiving concurrent immunosuppressant therapy with one of the following: [1-3]

cyclophosphamide

rituximab

AND

4 - One of the following:

4.1 Patient is concurrently on glucocorticoids (e.g., prednisone)

OR

4.2 History of contraindication or intolerance to glucocorticoids (e.g., prednisone)

AND

5 - Prescribed by or in consultation with one of the following:

Nephrologist

Pulmonologist

Rheumatologist

Product Name:Tavneos	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAVNEOS	AVACOPAN CAP 10 MG	85805510000120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Patient is receiving concurrent immunosuppressant therapy (e.g., azathioprine, cyclophosphamide, methotrexate, rituximab)

AND

3 - Prescribed by or in consultation with one of the following:

Nephrologist

Pulmonologist

Rheumatologist

Product Name:Tavneos	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TAVNEOS	AVACOPAN CAP 10 MG	85805510000120	Brand

Approval Criteria

1 - Diagnosis of one of the following types of severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis:

Granulomatosis with polyangiitis (GPA)

Microscopic polyangiitis (MPA)

AND

2 - Diagnosis is confirmed by one of the following: [4]

ANCA test positive for proteinase 3 (PR3) antigen

ANCA test positive for myeloperoxidase (MPO) antigen

Tissue biopsy

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming patient is receiving concurrent immunosuppressant therapy with one of the following: [1-3]

cyclophosphamide

rituximab

AND

4 - One of the following:

4.1 Paid claims or submission of medical records (e.g., chart notes) confirming patient is concurrently on glucocorticoids (e.g., prednisone)

OR

4.2 Paid claims or submission of medical records (e.g., chart notes) confirming contraindication or intolerance to glucocorticoids (e.g., prednisone)

AND

5 - Prescribed by or in consultation with one of the following:

Nephrologist

Pulmonologist

Rheumatologist

Prior Authorization Guideline

Guideline ID	GL-228553
Guideline Name	Tazverik (tazemetostat) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tazverik (tazemetostat)
Epithelioid Sarcoma Indicated for the treatment of adults and pediatric patients aged 16 years and older with metastatic or locally advanced epithelioid sarcoma not eligible for complete resection. This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s). **Follicular Lymphoma** Indicated for the treatment of adult patients with relapsed or refractory (R/R) follicular lymphoma (FL) whose tumors are positive for an EZH2 mutation as detected by an FDA-approved test and who have received at least 2 prior systemic therapies. Also indicated for the treatment of adult patients with R/R FL who have no satisfactory alternative treatment options. These indications are approved under accelerated approval based on overall response rate and duration of response. Continued approval for these indications may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

TECELRA	AFAMITRESGENE AUTOLEUCEL IV SUSP 10,000,000,000 CELLS	21651006101820	Brand

Approval Criteria

1 - Diagnosis of synovial sarcoma

AND

2 - Disease is one of the following:

Unresectable

Metastatic

AND

3 - Both of the following:

3.1 Patient is HLA-A*02:01P, HLA-A*02:02P, HLA-A*02:03P, or HLA-A*02:06P positive

AND

3.2 Patient does not have HLA-A*02:05P in either allele

AND

4 - Presence of MAGE-A4 antigen as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Patient has received prior therapy with one of the following:

An anthracycline (e.g. doxorubicin)

Ifosfamide

AND

6 - Patient is 16 years of age or older

AND

7 - Patient has never received Tecelra treatment in their lifetime

Product Name:Tecelra	
Diagnosis	Synovial Sarcoma
Approval Length	1 Time Authorization in Lifetime
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TECELRA	AFAMITRESGENE AUTOLEUCEL IV SUSP 10,000,000,000 CELLS	21651006101820	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of synovial sarcoma

AND

2 - Disease is one of the following:

Unresectable

Metastatic

AND

3 - Submission of medical records (e.g., chart notes) confirming both of the following:

3.1 Patient is HLA-A*02:01P, HLA-A*02:02P, HLA-A*02:03P, or HLA-A*02:06P positive

AND

3.2 Patient does not have HLA-A*02:05P in either allele

AND

4 - Submission of medical records (e.g., chart notes) confirming presence of MAGE-A4 antigen as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Submission of medical records (e.g., chart notes) or paid claims confirming patient has received prior therapy with one of the following:

An anthracycline (e.g. doxorubicin)

Ifosfamide

AND

6 - Patient is 16 years of age or older

AND

7 - Patient has never received Tecelra treatment in their lifetime

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233279
Guideline Name	Tecfidera (dimethyl fumarate) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	5/20/2021
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Tecfidera (dimethyl fumarate)
Relapsing forms of MS Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.

2 . Criteria

Product Name:Generic dimethyl fumarate	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DIMETHYL FUMARATE	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 120 MG	62405525006520	Generic
DIMETHYL FUMARATE	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 240 MG	62405525006540	Generic
DIMETHYL FUMARATE STARTERPACK	DIMETHYL FUMARATE CAPSULE DR STARTER PACK 120 MG & 240 MG	6240552500B320	Generic

Approval Criteria

1 - Diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [4]

AND

2 - Not used in combination with another disease-modifying therapy for MS [B, 6, 7]

AND

3 - Prescribed by or in consultation with a neurologist

Product Name:Brand Tecfidera	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TECFIDERA	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 120 MG	62405525006520	Brand
TECFIDERA	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 240 MG	62405525006540	Brand

TECFIDERA STARTER PACK	DIMETHYL FUMARATE CAPSULE DR STARTER PACK 120 MG & 240 MG	6240552500B320	Brand

Approval Criteria

1 - Diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [3]

AND

2 - All of the following:

2.1 Trial and failure of at least 4 weeks, or intolerance to generic dimethyl fumarate

AND

2.2 Trial and failure of at least 4 weeks, or intolerance to at least one of the following disease-modifying therapies for MS: [A, 5]

Bafiertam (monomethyl fumarate)

Vumerity (diroximel fumarate)

AND

2.3 One of the following:

2.3.1 Trial and failure (of a minimum 4-week supply), contraindication, or intolerance to generic fingolimod

OR

2.3.2 For continuation of therapy

AND

3 - Not used in combination with another disease-modifying therapy for MS [B, 6, 7]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Brand Tecfidera, generic dimethyl fumarate	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TECFIDERA	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 120 MG	62405525006520	Brand
DIMETHYL FUMARATE	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 120 MG	62405525006520	Generic
TECFIDERA	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 240 MG	62405525006540	Brand
DIMETHYL FUMARATE	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 240 MG	62405525006540	Generic
DIMETHYL FUMARATE STARTERPACK	DIMETHYL FUMARATE CAPSULE DR STARTER PACK 120 MG & 240 MG	6240552500B320	Generic
TECFIDERA STARTER PACK	DIMETHYL FUMARATE CAPSULE DR STARTER PACK 120 MG & 240 MG	6240552500B320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

AND

2 - All of the following: (applies to Brand Tecfidera only)

2.1 Trial and failure of at least 4 weeks, or intolerance to generic dimethyl fumarate

AND

2.2 Trial and failure of at least 4 weeks, or intolerance to at least one of the following disease-modifying therapies for MS: [A, 5]

Bafiertam (monomethyl fumarate)

Vumerity (diroximel fumarate)

AND

2.3 One of the following:

2.3.1 Trial and failure (of a minimum 4-week supply), contraindication, or intolerance to generic fingolimod

OR

2.3.2 For continuation of therapy

AND

3 - Not used in combination with another disease-modifying therapy for MS [B, 6, 7]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Brand Tecfidera	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

TECFIDERA	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 120 MG	62405525006520	Brand
TECFIDERA	DIMETHYL FUMARATE CAPSULE DELAYED RELEASE 240 MG	62405525006540	Brand
TECFIDERA STARTER PACK	DIMETHYL FUMARATE CAPSULE DR STARTER PACK 120 MG & 240 MG	6240552500B320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of a relapsing form of MS (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [3]

AND

2 - Both of the following:

2.1 Submission of medical records (e.g., chart notes) confirming objective information indicating a lack of adequate clinical response after at least a 4-week trial with generic dimethyl fumarate

AND

2.2 Valid clinical justification provided explaining how Brand Tecfidera is expected to provide benefit when generic dimethyl fumarate has not been shown to be effective despite having the same active ingredient

AND

3 - Submission of medical records (e.g., chart notes) or paid claims confirming failure after a trial of at least 4 weeks or intolerance to both of the following:

Bafiertam

Vumerity

AND

4 - One of the following:

4.1 Submission of medical records (e.g., chart notes) or paid claims confirming failure after a trial of at least 4 weeks, contraindication or intolerance to one formulary alternatives from the following:

Avonex (interferon beta-1a)

Betaseron (interferon beta-1b)

Copaxone/Glatopa (glatiramer acetate)

Fingolimod

Kesimpta (ofatumumab)

Mayzent (siponimod)

Zeposia (ozanimod)

OR

4.2 Both of the following:

4.2.1 Submission of medical records (e.g., chart notes) or paid claims confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy for continuation of therapy

AND

4.2.2 Patient demonstrates positive clinical response to therapy

AND

5 - Not used in combination with another disease-modifying therapy for MS [B, 6, 7]

AND

6 - Prescribed by or in consultation with a neurologist

3 . Endnotes

Although the trial results of Bafiertam and Vumerity were based off of Tecfidera, the consultant thinks that the two drugs should have the same efficacy and safety profile as Tecfidera since they were approved via the FDA 505(b)(2) pathway. [5]

The advantage of using combination disease-modifying therapy (DMT) compared to monotherapy DMT use has not been demonstrated, but there are safety concerns, such as reduced efficacy or disease aggravation, with combination use. [6, 7]

5 . Revision History

Date	Notes

1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228782
Guideline Name	Tepezza (teprotumumab-trbw)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tepezza (teprotumumab-trbw)
Thyroid Eye Disease (TED) Indicated for the treatment of thyroid eye disease regardless of Thyroid Eye Disease (TED) activity or duration.

2 . Criteria

Product Name:Tepezza	
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

TEPEZZA	TEPROTUMUMAB-TRBW FOR IV SOLN 500 MG	30192070402120	Brand

Approval Criteria

1 - Diagnosis of thyroid eye disease (TED)

AND

2 - Trial and failure (minimum 4 weeks), contraindication or intolerance to at least one oral or IV glucocorticosteroid (e.g., prednisone, methylprednisolone)

AND

3 - Prescribed by or in consultation with one of the following: [3]

Endocrinologist

Ophthalmologist

AND

4 - Treatment with Tepezza has not exceeded a total of 8 infusions [A, 1]

3 . Endnotes

In the pivotal trials, patients were given intravenous infusions (10 mg/kg for first infusion and 20 mg/kg for the remaining 7 infusions) every 3 weeks for a total of 8 infusions. [1]

Prior Authorization Guideline

Guideline ID	GL-229005
Guideline Name	Tepmetko (tepotinib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tepmetko (tepotinib)
Non-small cell lung cancer (NSCLC) Indicated for the treatment of adult patients with metastatic non-small cell lung cancer (NSCLC) harboring mesenchymal-epithelial transition (MET) exon 14 skipping alterations.

2 . Criteria

Product Name:Tepmetko	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TEPMETKO	TEPOTINIB HCL TAB 225 MG	21533773100320	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is metastatic

AND

3 - Presence of mesenchymal-epithelial transition (MET) exon 14 skipping alterations [A]

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to Tabrecta

OR

4.2 For continuation of prior therapy

Product Name:Tepmetko	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TEPMETKO	TEPOTINIB HCL TAB 225 MG	21533773100320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to Tabrecta

OR

2.2 For continuation of prior therapy

Product Name:Tepmetko	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TEPMETKO	TEPOTINIB HCL TAB 225 MG	21533773100320	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is metastatic

AND

3 - Presence of mesenchymal-epithelial transition (MET) exon 14 skipping alterations [A]

AND

4 - One of the following:

4.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Tabrecta

OR

4.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

3 . Endnotes

An FDA-approved test for detection of MET exon 14 skipping alterations in NSCLC for selecting patients for treatment with Tepmetko is not available. Testing for the presence of MET exon 14 skipping alterations in plasma specimens is recommended only in patients for whom a tumor biopsy cannot be obtained. [1]

Prior Authorization Guideline

Guideline ID	GL-233451
Guideline Name	Teriparatide Products - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Forteo (teriparatide injection), Teriparatide (teriparatide injection)
Postmenopausal women with osteoporosis at high risk of fracture Indicated for the treatment of postmenopausal women with osteoporosis at high risk for fracture, defined as a history of osteoporotic fracture, multiple risk factors for fracture, or patients who have failed or are intolerant to other available osteoporosis therapy. In postmenopausal women with osteoporosis, teriparatide reduces the risk of vertebral and nonvertebral fractures. **Increase of bone mass in men with primary or hypogonadal osteoporosis at high risk for fracture** Indicated to increase bone mass in men with primary or hypogonadal osteoporosis at high risk for fracture, defined as a history of osteoporotic fracture, multiple risk factors for fracture, or patients who have failed or are intolerant to other available osteoporosis therapy. **Men and women with glucocorticoid-induced osteoporosis at high risk for fracture** Indicated for the treatment of men and women with osteoporosis associated with sustained systemic glucocorticoid therapy (daily dosage equivalent to 5 mg or greater of prednisone) at high risk for fracture, defined as a history of osteoporotic fracture, multiple risk factors for fracture, or patients who have failed or are intolerant to other available osteoporosis therapy.

2 . Criteria

Product Name:Brand Forteo, Brand Teriparatide, generic teriparatide	
Diagnosis	Postmenopausal osteoporosis or osteopenia at high risk for fracture, Primary or hypogonadal osteoporosis or osteopenia at high risk for fracture
Approval Length	24 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TERIPARATIDE	TERIPARATIDE (RECOMBINANT) SOLN PEN-INJ 620 MCG/2.48ML	3004407000D221	Brand
FORTEO	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Brand
TERIPARATIDE	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Generic

Approval Criteria

1 - Diagnosis of one of the following:

Postmenopausal osteoporosis or osteopenia

Primary or hypogonadal osteoporosis or osteopenia

AND

2 - One of the following: [2,4,8,10,D]

2.1 For diagnosis of osteoporosis, both of the following:

2.1.1 Bone mineral density (BMD) T-score of -2.5 or lower in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.1.2 One of the following:

2.1.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.1.2.2 Trial and failure, contraindication, or intolerance to one osteoporosis treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab])

OR

2.2 For diagnosis of osteopenia, both of the following:

2.2.1 BMD T-score between -1.0 and -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.2.2 One of the following:

2.2.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.2.2.2 Both of the following:

2.2.2.2.1 Trial and failure, contraindication, or intolerance to one osteoporosis treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab])

AND

2.2.2.2.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities: [F]

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

AND

3 - For Brand Forteo, trial and failure or intolerance to all of the following:

Brand Teriparatide

Generic teriparatide

Tymlos (abaloparatide)

AND

4 - One of the following: [7,B]

4.1 Treatment duration of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) has not exceeded a total of 24 months during the patient's lifetime

OR

4.2 Patient remains at or has returned to having a high risk for fracture despite a total of 24 months of use of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide])

Product Name:Brand Forteo, Brand Teriparatide, generic teriparatide	
Diagnosis	Postmenopausal osteoporosis or osteopenia at high risk for fracture, Primary or hypogonadal osteoporosis or osteopenia at high risk for fracture
Approval Length	12 month(s)

1 - Diagnosis of one of the following:

Postmenopausal osteoporosis or osteopenia

Primary or hypogonadal osteoporosis or osteopenia

AND

2 - One of the following: [2,4,8,10,D]

2.1 For diagnosis of osteoporosis, both of the following:

2.1.1 Bone mineral density (BMD) T-score of -2.5 or lower in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.1.2 One of the following:

2.1.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.1.2.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to one osteoporosis treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab])

OR

2.2 For diagnosis of osteopenia, both of the following:

2.2.1 BMD T-score between -1.0 and -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.2.2 One of the following:

2.2.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.2.2.2 Both of the following:

2.2.2.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to one osteoporosis treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab])

AND

2.2.2.2.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities: [F]

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to all of the following:

Brand Teriparatide

Generic teriparatide

Tymlos (abaloparatide)

AND

4 - One of the following: [7,B]

4.1 Treatment duration of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) has not exceeded a total of 24 months during the patient's lifetime

OR

4.2 Patient remains at or has returned to having a high risk for fracture despite a total of 24 months of use of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide])

Product Name:Brand Forteo, Brand Teriparatide, generic teriparatide	
Diagnosis	Glucocorticoid-induced osteoporosis at high risk for fracture
Approval Length	24 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TERIPARATIDE	TERIPARATIDE (RECOMBINANT) SOLN PEN-INJ 620 MCG/2.48ML	3004407000D221	Brand
FORTEO	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Brand
TERIPARATIDE	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Generic

Approval Criteria

1 - Diagnosis of glucocorticoid-induced osteoporosis

AND

2 - History of prednisone or its equivalent at a dose greater than or equal to 5 mg/day for greater than or equal to 3 months [C]

AND

3 - One of the following: [8,A]

3.1 BMD T-score less than or equal to -2.5 based on BMD measurements from lumbar spine, femoral neck, total hip, or radius (one-third radius site)

OR

3.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities:

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

OR

3.3 History of one of the following fractures resulting from minimal trauma:

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

OR

3.4 One of the following:

Glucocorticoid dosing of at least 30 mg per day

Cumulative glucocorticoid dosing of at least 5 grams per year

AND

4 - Trial and failure, contraindication, or intolerance to one bisphosphonate (e.g., alendronate) [E]

AND

5 - For Brand Forteo, trial and failure or intolerance to both of the following:

Brand Teriparatide

Generic teriparatide

AND

6 - One of the following: [7,B]

6.1 Treatment duration of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) has not exceeded a total of 24 months during the patient's lifetime

OR

6.2 Patient remains at or has returned to having a high risk for fracture despite a total of 24 months of use of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide])

Product Name:Brand Forteo, Brand Teriparatide, generic teriparatide

Product Name	Generic Name	GPI	Brand/Generic
TERIPARATIDE	TERIPARATIDE (RECOMBINANT) SOLN PEN-INJ 620 MCG/2.48ML	3004407000D221	Brand
FORTEO	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Brand

TERIPARATIDE	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Generic

Approval Criteria

1 - One of the following: [7,B]

1.1 Treatment duration of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) has not exceeded a total of 24 months during the patient's lifetime

OR

1.2 Patient remains at or has returned to having a high risk for fracture despite a total of 24 months of use of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide])

AND

2 - For Brand Forteo, trial and failure or intolerance to both of the following:

Brand Teriparatide

Generic teriparatide

Product Name:Brand Forteo	
Diagnosis	Glucocorticoid-induced osteoporosis at high risk for fracture
Approval Length	24 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
FORTEO	TERIPARATIDE SOLN PEN-INJ 560 MCG/2.24ML	3004407000D216	Brand

Approval Criteria

1 - Diagnosis of glucocorticoid-induced osteoporosis

AND

2 - History of prednisone or its equivalent at a dose greater than or equal to 5 mg/day for greater than or equal to 3 months [C]

AND

3 - One of the following: [8,A]

3.1 BMD T-score less than or equal to -2.5 based on BMD measurements from lumbar spine, femoral neck, total hip, or radius (one-third radius site)

OR

3.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities:

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

OR

3.3 History of one of the following fractures resulting from minimal trauma:

Vertebral compression fracture

Fracture of the hip

Fracture of the distal radius

Fracture of the pelvis

Fracture of the proximal humerus

OR

3.4 One of the following:

Glucocorticoid dosing of at least 30 mg per day

Cumulative glucocorticoid dosing of at least 5 grams per year

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to one bisphosphonate (e.g., alendronate) [E]

AND

5 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to both of the following:

Brand Teriparatide

Generic teriparatide

AND

6 - One of the following: [7,B]

6.1 Treatment duration of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) has not exceeded a total of 24 months during the patient's lifetime

OR

6.2 Patient remains at or has returned to having a high risk for fracture despite a total of 24 months of use of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide])

3 . Definitions

Definition	Description

Dual x-ray absorptiometry (DXA) [3]	A diagnostic test used to assess bone density at various skeletal sites using radiation exposure about one-tenth that of a standard chest X-ray. Central DXA (lumbar spine, hip) is the preferred measurement for definitive diagnosis of osteoporosis and for monitoring the effects of therapy.
Osteopenia [3]	The designation for bone density between 1.0 and 2.5 standard deviations below the mean BMD of a young adult reference population (T-score between − 1.0 and − 2.5).
Osteoporosis [3]	A chronic, progressive disease characterized by low bone mass, microarchitectural deterioration of bone tissue, decreased bone strength, bone fragility, and a consequent increase in fracture risk; BMD 2.5 or more standard deviations below the mean BMD of a young adult reference population (T-score at or below − 2.5).
Quantitative computed tomography (QCT) [3]	A diagnostic test used to assess volumetric bone density; reflects three-dimensional BMD. Usually used to assess the lumbar spine but has been adapted for other skeletal sites (e.g., hip). It is also possible to measure trabecular and cortical bone density in the periphery by peripheral QCT (pQCT) or high-resolution pQCT (HRpQCT).
T-score [3]	In describing BMD, the number of standard deviations above or below the mean BMD of a young adult reference population.
Z-score [3]	In describing BMD, the number of standard deviations above or below the mean BMD for persons of the same age, sex, and ethnicity.

4 . Endnotes

According to the American College of Rheumatology (ACR) guidelines for the prevention and treatment of glucocorticoid-induced osteoperosis, patients considered at high risk of fractures are as follows: (a) prior osteoporotic fracture, (b) a hip or spine BMD T-score less than or equal to -2.5,(c) FRAX 10-year risk of hip or major osteoporotic fracture at 3 percent or more and 20 percent or more, respectively, or (d) glucocorticoid use of at least 30mg per day or cumulative glucocorticoid doses of at least 5 grams per year. [9]

Use for more than 2 years during a patient's lifetime should only be considered if a patient remains at or has returned to having a high risk for fracture. [1]

Most of the evidence supporting the efficacy of Forteo is based on studies evaluating its use in the treatment of glucocorticoid-induced osteoporosis (GIOP). To identify high risk patients, the GIOP studies (Saag et al, 2009) included patients with a history of

prednisone or its equivalent at a dose greater than or equal to 5 mg/day for greater than or equal to 3 months. [5, 6]

According to AACE, alendronate, risedronate, zoledronic acid, or denosumab have evidence for broad spectrum anti-fracture efficacy (spine, hip, nonvertebral fracture risk reduction) and are appropriate as initial therapy for most patients at high risk of fracture. Raloxifene or ibandronate may be appropriate initial therapy in some cases where patients requiring drugs with spine-specific efficacy. Teriparatide has been shown to reduce the risk of vertebral and nonvertebral fractures. It is recommended for patients with very high fracture risk or those in whom bisphosphonate therapy has been ineffective. [2]

According to ACR, oral bisphosphonates are considered first-line for patients with glucocorticoid-induced osteoporosis at high risk for fractures. For patients in whom oral bisphosphonates are not appropriate, IV bisphosphonates should be considered. If bisphosphonate therapy is not appropriate, teriparatide should be considered. [9]

The WHO FRAX tool is available at www.shef.ac.uk/FRAX and incorporates multiple clinical factors that predict fracture risk, largely independent of BMD. [2]

3/31/2025	GPI change

Prior Authorization Guideline

Guideline ID	GL-233343
Guideline Name	Testosterone
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	3/1/2025
P&T Approval Date:	5/17/2005
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Androderm (testosterone [T] patch), Androgel (T gel and pump), Fortesta (T gel), Natesto (T nasal gel), Testim (T gel), and Vogelxo (T gel and pump)
Primary hypogonadism (congenital or acquired) Indicated for replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired) is testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter's syndrome, chemotherapy or toxic damage from alcohol or heavy metals. These men usually have low testosterone serum levels and gonadotropins (FSH, LH) above the normal range. Important limitations of use: Safety and efficacy in men with "age-related hypogonadism (also referred to as "late-onset hypogonadism") have not been established. Safety and efficacy in males less than 18 years old have not been established. Topical testosterone products may have different doses, strengths, or application instructions that may result in different systemic exposure. **Hypogonadotropic hypogonadism (congenital or acquired)** Indicated for replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous

testosterone. Gonadotropin or luteinizing hormone-releasing hormone (LHRH) deficiency or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Important limitations of use: Safety and efficacy in men with "age-related hypogonadism (also referred to as "late-onset hypogonadism") have not been established. Safety and efficacy in males less than 18 years old have not been established. Topical testosterone products may have different doses, strengths, or application instructions that may result in different systemic exposure.

Drug Name: Methitest (methyltestosterone) tablet

Delayed puberty in males Indicated for stimulation of puberty in carefully selected males with clearly delayed puberty. These patients usually have a familial pattern of delayed puberty that is not secondary to a pathological disorder; puberty is expected to occur spontaneously at a relatively late date. Brief treatment with conservative doses may occasionally be justified in these patients if they do not respond to psychological support. The potential adverse effect on bone maturation should be discussed with the patient and parents prior to androgen administration. An X-ray of the hand and wrist to determine bone age should be obtained every six months to assess the effect of treatment on the epiphyseal centers.

Metastatic mammary cancer in females Indicated for secondary use in women with advancing inoperable metastatic (skeletal) mammary cancer who are 1 to 5 years postmenopausal. Primary goals of therapy in these women include ablation of the ovaries. Other methods of counteracting estrogen activity are adrenalectomy, hypophysectomy, and/or antiestrogen therapy. This treatment has also been used in premenopausal women with breast cancer who have benefited from oophorectomy and are considered to have a hormone-responsive tumor. Judgment concerning androgen therapy should be made by an oncologist with expertise in this field.

Primary hypogonadism (congenital or acquired) Indicated for replacement therapy in conditions associated with a deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired) is testicular failure due to cryptorchidism, bilateral torsions, orchitis, vanishing testis syndrome, or orchidectomy.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for replacement therapy in conditions associated with a deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired) is idiopathic gonadotropin or LHRH deficiency, or pituitary hypothalamic injury from tumors, trauma, or radiation. If the above conditions occur prior to puberty, androgen replacement therapy will be needed during the adolescent years for development of secondary sexual characteristics. Prolonged androgen treatment will be required to maintain sexual characteristics in these and other males who develop testosterone deficiency after puberty.

Drug Name: Depo-Testosterone (testosterone cypionate) injection

Primary hypogonadism (congenital or acquired) Indicated for replacement therapy in the male in conditions associated with symptoms of deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired) - testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, or orchiectomy. Safety and efficacy of Depo-Testosterone (testosterone cypionate) in men with "age-related

hypogonadism" (also referred to as "late-onset hypogonadism") have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for replacement therapy in the male in conditions associated with symptoms of deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired) - Gonadotropin or LHRH deficiency, or pituitary-hypothalamic injury from tumors, trauma, or radiation. Safety and efficacy of Depo-Testosterone (testosterone cypionate) in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established.

Drug Name: Testopel (testosterone) pellet

Primary hypogonadism (congenital or acquired) Indicated for replacement therapy in conditions associated with a deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired) - testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, or orchiectomy. If the above conditions occur prior to puberty, androgen replacement therapy will be needed during the adolescent years for development of secondary sex characteristics. Prolonged androgen treatment will be required to maintain sexual characteristics in these and other males who develop testosterone deficiency after puberty. Safety and efficacy of Testopel in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism" have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for replacement therapy in the male in conditions associated with symptoms of deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired)- idiopathic gonadotropin or LHRH deficiency, or pituitary-hypothalamic injury from tumors, trauma, or radiation. If the above conditions occur prior to puberty, androgen replacement therapy will be needed during the adolescent years for development of secondary sexual characteristics. Prolonged androgen treatment will be required to maintain sexual characteristics in these and other males who develop testosterone deficiency after puberty. If the above conditions occur prior to puberty, androgen replacement therapy will be needed during the adolescent years for development of secondary sex characteristics. Prolonged androgen treatment will be required to maintain sexual characteristics in these and other males who develop testosterone deficiency after puberty. Safety and efficacy of Testopel in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism" have not been established.

Delayed puberty in males Indicated for stimulation of puberty in carefully selected males with clearly delayed puberty. These patients usually have a familial pattern of delayed puberty that is not secondary to a pathological disorder; puberty is expected to occur spontaneously at a relatively late date. Brief treatment with conservative doses may occasionally be justified in these patients if they do not respond to psychological support. The potential adverse effect on bone maturation should be discussed with the patient and parents prior to androgen administration. An X-ray of the hand and wrist to determine bone age should be obtained every six months to assess the effect of treatment on the epiphyseal centers.

Drug Name: Aveed (testosterone undecanoate) injection

Primary hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous

testosterone. Primary hypogonadism (congenital or acquired): testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter's syndrome, chemotherapy, or toxic damage from alcohol or heavy metals. These men usually have low serum testosterone concentrations and gonadotropins (follicle-stimulating hormone [FSH], luteinizing hormone [LH]) above the normal range. Aveed should only be used in patients who require testosterone replacement therapy and in whom the benefits of the product outweigh the serious risks of pulmonary oil microembolism and anaphylaxis. Limitations of use: Safety and efficacy of Aveed in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established. Safety and efficacy of Aveed in males less than 18 years old have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired): idiopathic gonadotropin or luteinizing hormone-releasing hormone (LHRH) deficiency or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Aveed should only be used in patients who require testosterone replacement therapy and in whom the benefits of the product outweigh the serious risks of pulmonary oil microembolism and anaphylaxis. Limitations of use: Safety and efficacy of Aveed in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established. Safety and efficacy of Aveed in males less than 18 years old have not been established.

Drug Name: Testone CIK (testosterone cypionate) injection

Primary hypogonadism (congenital or acquired) Indicated for replacement therapy in the male in conditions associated with symptoms of deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired) - testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome; or orchidectomy. Limitations of Use: Safety and efficacy of testosterone cypionate in men with “age-related hypogonadism” (also referred to as “late-onset hypogonadism”) have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for replacement therapy in the male in conditions associated with symptoms of deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired) - idiopathic gonadotropin or LHRH deficiency, or pituitary-hypothalamic injury from tumors, trauma, or radiation. Limitations of Use: Safety and efficacy of testosterone cypionate in men with “age-related hypogonadism” (also referred to as “late-onset hypogonadism”) have not been established.

Drug Name: Xyosted (testosterone enanthate) injection

Primary hypogonadism (congenital or acquired) Indicated for replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired) - Testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter’s syndrome, chemotherapy, or toxic damage from alcohol or heavy metals. These men usually have low serum testosterone concentrations and gonadotropins (FSH, LH) above the normal range. Safety and efficacy of Xyosted in males less than 18 years old have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired) - Gonadotropin or LHRH deficiency, or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Safety and efficacy of Xyosted in males less than 18 years old have not been established.

Drug Name: Jatenzo (testosterone undecanoate) capsule

Primary hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone: Primary hypogonadism (congenital or acquired) is testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter syndrome, chemotherapy, or toxic damage from alcohol or heavy metals. These men usually have low serum testosterone concentrations and gonadotropins (follicle-stimulating hormone [FSH], luteinizing hormone [LH]) above the normal range. Limitations of Use: Safety and efficacy of Jatenzo in males less than 18 years old have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone: Hypogonadotropic hypogonadism (congenital or acquired) is gonadotropin or luteinizing hormone releasing hormone (LHRH) deficiency or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Limitations of Use: Safety and efficacy of Jatenzo in males less than 18 years old have not been established.

Drug Name: Tlando (testosterone undecanoate) capsule

Primary hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone: Primary hypogonadism (congenital or acquired) is testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter syndrome, chemotherapy, or toxic damage from alcohol or heavy metals. These men usually have low serum testosterone concentrations and gonadotropins (follicle-stimulating hormone [FSH], luteinizing hormone [LH]) above the normal range. Limitations of Use: Safety and efficacy of Tlando in males less than 18 years old have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone: Hypogonadotropic hypogonadism (congenital or acquired) is gonadotropin or luteinizing hormone releasing hormone (LHRH) deficiency or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Limitations of Use: Safety and efficacy of Tlando in males less than 18 years old have not been established.

Drug Name: Kyzatrex (testosterone undecanoate) capsule

Primary hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous

testosterone: Primary hypogonadism (congenital or acquired) is testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter syndrome, chemotherapy, or toxic damage from alcohol or heavy metals. These men usually have low serum testosterone concentrations and gonadotropins (follicle-stimulating hormone [FSH], luteinizing hormone [LH]) above the normal range. Limitations of Use: Safety and efficacy of Kyzatrex in males less than 18 years old have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone: Hypogonadotropic hypogonadism (congenital or acquired) is gonadotropin or luteinizing hormone releasing hormone (LHRH) deficiency or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Limitations of Use: Safety and efficacy of Kyzatrex in males less than 18 years old have not been established.

Drug Name: Androderm, Androgel, Aveed, Azmiro, Depo-Testosterone, Fortesta, Methitest, Natesto, Testone CIK, Testim, Testopel, Vogelxo, Xyosted

Off Label Uses: Transgender male (female-to-male) - Gender Dysphoria/Gender Incongruence [11-12, 17, 28-29] Testosterone in 3 different formulations, including transdermal gel, significantly increased testosterone levels from the physiological range for women to the normal male range by week 30 of treatment in an observational study in transgender male (female-to-male) individuals. Hormonal sex reassignment therapy was associated with significantly fewer symptoms related to social distress, anxiety, and depression compared with those not receiving hormonal therapy in 1 cross-sectional study. Gender transition treatment can be initiated in adults and adolescents with confirmed persistent gender dysphoria/gender incongruence who have the capacity to make fully informed decisions and consent, usually by age 16 years, and have well-controlled, if any, mental health concerns. The goals of therapy are to suppress endogenous sex hormones of the designated gender and to replace these with endogenous sex hormones of the affirmed gender. Either parenteral or transdermal testosterone may be used to achieve and maintain testosterone levels in the normal male range. Avoid sustained supraphysiologic levels to reduce risk of adverse reactions. Compelling reasons may exist to initiate therapy at younger than 16 years; although, studies in this population are minimal. Initial therapy to undergo suppression of pubertal development at Tanner stages G2/B2 is suggested. Neither puberty suppression nor gender-affirming hormone therapies are recommended in pre-pubertal children.

Drug Name: Azmiro (testosterone cypionate) injection

Primary hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone. Primary hypogonadism (congenital or acquired): testicular failure due to cryptorchidism, bilateral torsion, orchitis, vanishing testis syndrome, orchiectomy, Klinefelter's syndrome, chemotherapy, or toxic damage from alcohol or heavy metals. These men usually have low serum testosterone concentrations and gonadotropins (follicle-stimulating hormone [FSH], luteinizing hormone [LH]) above the normal range. Limitations of Use: Safety and efficacy of Azmiro in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established. Additionally, safety and efficacy of Azmiro in pediatric patients below the age of 12 years old have not been established.

Hypogonadotropic hypogonadism (congenital or acquired) Indicated for testosterone replacement therapy in males for conditions associated with a deficiency or absence of endogenous testosterone. Hypogonadotropic hypogonadism (congenital or acquired): gonadotropin or luteinizing hormone-releasing hormone (LHRH) deficiency or pituitary-hypothalamic injury from tumors, trauma, or radiation. These men have low testosterone serum concentrations but have gonadotropins in the normal or low range. Limitations of Use: Safety and efficacy of Azmiro in men with "age-related hypogonadism" (also referred to as "late-onset hypogonadism") have not been established. Additionally, safety and efficacy of Azmiro in pediatric patients below the age of 12 years old have not been established.

2 . Criteria

Product Name:Androderm, Brand Androgel gel and pump (1%), Brand Androgel gel and pump (1.62%), Generic testosterone gel and pump 20.25 mg/1.25 g, 40.5 mg/2.5 g (1.62%), Natesto, Generic testosterone gel 25 mg/2.5 g (1%), Generic testosterone gel 50 mg/5 g (1%), Generic testosterone gel pump (1%), Generic testosterone topical solution 30 mg/act, Generic testosterone gel 10 mg/act (2%), Aveed, Azmiro, Generic testosterone enanthate, Brand Depo-Testosterone, Brand Fortesta, Brand Testim, Brand Testosterone Cypionate, Testone CIK, Testopel, Testosterone implant pellets, Xyosted, Brand Vogelxo

Approval Criteria

1 - Diagnosis of hypogonadism (e.g., testicular hypofunction, male hypogonadism)

AND

2 - Male patient at birth [C]

AND

3 - Patient is 18 years of age or older

AND

4 - One of the following:

4.1 Two pre-treatment serum total testosterone levels less than 300 ng/dL (< 10.4 nmol/L) or less than the reference range for the lab** [7, 9]

OR

4.2 Both of the following:

4.2.1 Patient has a condition that may cause altered sex-hormone binding globulin (SHBG) (e.g., thyroid disorder, HIV disease, liver disorder, diabetes, obesity)

AND

4.2.2 One pre-treatment calculated free or bioavailable testosterone level less than 5 ng/dL (< 0.17 nmol/L) or less than the reference range for the lab**

OR

4.3 Patient has a history of one of the following:

Bilateral orchiectomy

Panhypopituitarism

A genetic disorder known to cause hypogonadism (e.g., congenital anorchia, Klinefelter's syndrome)

OR

4.4 Both of the following:

4.4.1 Patient is continuing testosterone therapy

AND

4.4.2 One of the following:

4.4.2.1 Follow-up total serum testosterone level or calculated free or bioavailable testosterone level drawn within the past 12 months is within or below the normal limits of the reporting lab

OR

4.4.2.2 Follow-up total serum testosterone level or calculated free or bioavailable

testosterone level drawn within the past 12 months is outside of upper limits of normal for the reporting lab and the dose is adjusted

AND

5 - Trial and failure or intolerance to both of the following (applies to Aveed, Azmiro, Testopel, Testosterone implant pellets, Testone CIK, Brand Depo-Testosterone, Brand Testosterone Cypionate only):

Generic testosterone cypionate

Generic testosterone enanthate

AND

6 - Trial and failure or intolerance to one of the following (applies to Xyosted only):

Generic testosterone cypionate

Generic testosterone enanthate

AND

7 - Trial and failure or intolerance to generic testosterone gel (applies to Brand Androgel, Brand Fortesta, Brand Testim, Brand Vogelxo, and Brand Natesto only)

Notes	**This may require treatment to be temporarily held.

Product Name:Generic testosterone cypionate	
Diagnosis	Male hypogonadism
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

AZMIRO	TESTOSTERONE CYPIONATE IM SOLN PREF SYRINGE IN OIL 200 MG/ML	2310003010E530	Brand

Approval Criteria

1 - One of the following:

1.1 Follow-up total serum testosterone level drawn within the past 6 months for patients new to testosterone therapy, or 12 months for patients continuing testosterone therapy, is within or below the normal limits of the reporting lab

OR

1.2 Follow-up total serum testosterone level drawn within the past 6 months for patients new to testosterone therapy, or 12 months for patients continuing testosterone therapy, is outside of upper limits of normal for the reporting lab and the dose is adjusted

OR

1.3 Both of the following:

1.3.1 Patient has a condition that may cause altered sex-hormone binding globulin (SHBG) (e.g., thyroid disorder, HIV disease, liver disorder, diabetes, obesity)

AND

1.3.2 One of the following:

1.3.2.1 Follow-up calculated free or bioavailable testosterone level drawn within the past 6 months for patients new to testosterone therapy, or 12 months for patients continuing testosterone therapy, is within or below the normal limits of the reporting lab

OR

1.3.2.2 Follow-up calculated free or bioavailable testosterone level drawn within the past 6 months for patients new to testosterone therapy, or 12 months for patients continuing testosterone therapy, is outside of upper limits of normal for the reporting lab and the dose is adjusted

AND

2 - Trial and failure or intolerance to one of the following (applies to Xyosted only):

Generic testosterone cypionate

Generic testosterone enanthate

Product Name:Methitest, Generic testosterone enanthate, Testopel, Testosterone implant pellets, Generic methyltestosterone, Brand Testosterone Cypionate [off-label]	
Diagnosis	Delayed puberty [E]

TESTOSTERONE ENANTHATE	TESTOSTERONE ENANTHATE IM INJ IN OIL 200 MG/ML	23100030202010	Generic

Approval Criteria

1 - Diagnosis of breast cancer

AND

2 - Breast cancer is inoperable

AND

3 - Used for palliative treatment

AND

4 - Female patient at birth [C]

3 . Endnotes

Delayed puberty is defined as the lack of the initial signs of sexual maturation by an age that is more than 2-2.5 standard deviations above the mean for the population (traditionally, the age of 14 years in boys and 13 years in girls). In most cases, delayed puberty is not due to an underlying pathology, but instead represents an extreme end of the normal spectrum of pubertal timing, a developmental pattern referred to as constitutional delay of growth and puberty (CDGP). CDGP is the most common cause of delayed puberty in both sexes, but it can be diagnosed only after underlying conditions have been ruled out. Management of CDGP may involve expectant observation or therapy with low-dose sex steroids. [9]

Initial authorization of 6 months, and reauthorization of 12 months is based on the Endocrine Society's Clinical Practice Guideline's recommendation to monitor testosterone level 3 to 6 months after initiation of testosterone therapy, and then annually to assess whether symptoms have responded to treatment and whether the patient is suffering from any adverse effects. [8]

The gender criteria in place for male hypogonadism, delayed puberty, and inoperable breast cancer are to ensure safe and effective medication utilization due to FDA-approved labeling supporting the gender restriction [refer to individual Package Inserts]. Age and/or gender criteria will remain in the guideline, consistent with the following direction approved by OptumRx Legal & Regulatory: “Age and gender edits in place due to FDA safety guidance, labeling or supported by medical literature to satisfy medical necessity criteria would not be inconsistent with the [Section 1557 HCR non-discrimination] regulation."

According to DRUGDEX, for the treatment of transgender male (female-to-male) patients with gender dysphoria, various forms and dosages of testosterone have been used. [12] Clinical studies have also demonstrated the efficacy of several different androgen preparations to induce masculinization in female-to-male transgender persons. Regimens to change secondary sex characteristics follow the general principle of hormone replacement treatment of male hypogonadism. Either parenteral or transdermal preparations can be used to achieve testosterone values in the normal male range. [11]

An X-ray of the hand and wrist to determine bone age should be taken every 6 months to assess the effect of treatment on epiphyseal center [19-20].

Per consult with specialist, the pharmacokinetics of T. cypionate and T. enanthate are quite similar and physiologically produce similar results. The two agents are very close in efficacy and behavioral effects. Although T. cypionate isn't FDA-approved for delayed puberty, it is used in practice due to its similarity to T. enanthate. [25]

P&T Approval Date:	10/16/2024
P&T Revision Date:	

1 . Indications

Drug Name: Tevimbra (tislelizumab)
Esophageal Squamous Cell Carcinoma Indicated for the treatment of adult patients with unresectable or metastatic esophageal squamous cell carcinoma after prior systemic chemotherapy that did not include a PD-(L)1 inhibitor

2 . Criteria

Product Name:Tevimbra	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TEVIMBRA	TISLELIZUMAB-JSGR IV SOLN 100 MG/10ML	21357967002020	Brand

Approval Criteria

1 - Diagnosis of esophageal squamous cell carcinoma

AND

2 - Disease is one of the following:

Unresectable

Metastatic

AND

3 - Patient has received prior systemic chemotherapy

AND

4 - Patient has not previously been treated with a PD-(L)1 inhibitor (e.g., Keytruda, Opdivo)

Product Name:Tevimbra	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TEVIMBRA	TISLELIZUMAB-JSGR IV SOLN 100 MG/10ML	21357967002020	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228725
Guideline Name	Tezspire (tezepelumab-ekko) - PA
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tezspire (tezepelumab-ekko) injection, for subcutaneous use
Severe Asthma Indicated for the add-on maintenance treatment of adult and pediatric patients aged 12 years and older with severe asthma. Limitations of Use: Tezspire is not indicated for the relief of acute bronchospasm or status asthmaticus.

2 . Criteria

Product Name:Tezspire	
Approval Length	6 Month(s) [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TEZSPIRE	TEZEPELUMAB-EKKO SUBCUTANEOUS SOLN PREF SYR 210 MG/1.91ML	4460807525E520	Brand
TEZSPIRE	TEZEPELUMAB-EKKO SUBCUTANEOUS SOLN AUTO-INJ 210 MG/1.91ML	4460807525D520	Brand

Approval Criteria

1 - Diagnosis of severe asthma

AND

2 - One of the following: [2,3]

2.1 Patient has had two or more asthma exacerbations requiring systemic corticosteroids (e.g., prednisone) within the past 12 months

OR

2.2 Prior asthma-related hospitalization within the past 12 months

AND

4 - Patient is 12 years of age or older

AND

3 - Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

3.1 Both of the following: [2,3]

High-dose inhaled corticosteroid (ICS) (i.e., greater than 500 mcg fluticasone propionate equivalent/day)

Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

3.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg]) [B]

AND

5 - Prescribed by or in consultation with one of the following:

Pulmonologist

Allergist/Immunologist

Product Name:Tezspire	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TEZSPIRE	TEZEPELUMAB-EKKO SUBCUTANEOUS SOLN PREF SYR 210 MG/1.91ML	4460807525E520	Brand
TEZSPIRE	TEZEPELUMAB-EKKO SUBCUTANEOUS SOLN AUTO-INJ 210 MG/1.91ML	4460807525D520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in exacerbations, improvement in in forced expiratory volume in 1 second [FEV1], decreased use of rescue medications)

AND

2 - Patient continues to be treated with an inhaled corticosteroid (ICS) (e.g., fluticasone, budesonide) with or without additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium]) unless there is a contraindication or intolerance to these medications [4]

AND

3 - Prescribed by or in consultation with one of the following:

Pulmonologist

Allergist/Immunologist

3 . Endnotes

The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention update recommends that patients with asthma should be reviewed regularly to monitor their symptom control, risk factors and occurrence of exacerbations, as well as to document the response to any treatment changes. Ideally, after initiation of treatment, patients should be re-evaluated in 3 to 6 months. [4]

The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention guideline recommend patients with severe asthma should be treated with maximal optimized high dose ICS-LABA therapy. [4]

Prior Authorization Guideline

Guideline ID	GL-228556
Guideline Name	Thyroid Agents
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Levothyroxine Sodium capsules
Hypothyroidism Indicated as replacement therapy in adults and pediatric patients 6 years and older with primary (thyroidal), secondary (pituitary), and tertiary (hypothalamic) congenital or acquired hypothyroidism. Limitations of Use: Not indicated for treatment of hypothyroidism during the recovery phase of subacute thyroiditis. **Pituitary Thyrotropin (Thyroid-Stimulating Hormone, TSH) Suppression** Indicated as an adjunct to surgery and radioiodine therapy in the management of adults and pediatric patients 6 years and older with thyrotropin-dependent well-differentiated thyroid cancer. Limitations of Use: Not indicated for suppression of benign thyroid nodules and nontoxic diffuse goiter in iodine-sufficient patients as there are no clinical benefits and overtreatment with may induce hyperthyroidism.
Drug Name: Thyquidity (levothyroxine sodium) oral solution
Hypothyroidism Indicated as a replacement therapy in primary (thyroidal), secondary (pituitary), and tertiary (hypothalamic) congenital or acquired hypothyroidism. Limitations of Use: Not indicated for treatment of hypothyroidism during the recovery phase of subacute thyroiditis.

Pituitary Thyrotropin (Thyroid-Stimulating Hormone, TSH) Suppression Indicated as an adjunct to surgery and radioiodine therapy in the management of thyrotropin-dependent well-differentiated thyroid cancer. Limitations of Use: Not indicated for suppression of benign thyroid nodules and nontoxic diffuse goiter in iodine-sufficient patients as there are no clinical benefits and overtreatment with Thyquidity may induce hyperthyroidism.

1 . Indications

Drug Name: Tibsovo (ivosidenib)
Newly-Diagnosed Acute Myeloid Leukemia (AML) Indicated in combination with azacitidine or as monotherapy for the treatment of newly diagnosed acute myeloid leukemia (AML) with a susceptible isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test in adults 75 years or older, or who have comorbidities that preclude use of intensive induction chemotherapy. **Relapsed or Refractory Acute Myeloid Leukemia (AML)** Indicated for the treatment of adult patients with relapsed or refractory acute myeloid leukemia (AML) with a susceptible isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test. **Locally Advanced or Metastatic Cholangiocarcinoma** Indicated for the treatment of adult patients with previously treated, locally advanced or metastatic cholangiocarcinoma with an isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test. **Relapsed or Refractory Myelodysplastic Syndromes (MDS)** Indicated for the treatment of adult patients with relapsed or refractory myelodysplastic syndromes with a susceptible isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test.

2 . Criteria

Product Name:Tibsovo	
Diagnosis	Newly-Diagnosed Acute Myeloid Leukemia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TIBSOVO	IVOSIDENIB TAB 250 MG	21534940000320	Brand

Approval Criteria

1 - Diagnosis of newly-diagnosed acute myeloid leukemia (AML)

AND

2 - Patient has an isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test (e.g., Abbott RealTime IDH1 assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

AND

3 - One of the following:

3.1 Patient is greater than or equal to 75 years old

OR

3.2 Patient has comorbidities that preclude use of intensive induction chemotherapy [A]

Product Name:Tibsovo	
Diagnosis	Relapsed or Refractory Acute Myeloid Leukemia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TIBSOVO	IVOSIDENIB TAB 250 MG	21534940000320	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Disease is one of the following:

Relapsed

Refractory

AND

3 - Patient has an isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test (e.g., Abbott RealTime IDH1 assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

Product Name:Tibsovo	
Diagnosis	Locally Advanced or Metastatic Cholangiocarcinoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

TIBSOVO	IVOSIDENIB TAB 250 MG	21534940000320	Brand

Approval Criteria

1 - Diagnosis of cholangiocarcinoma

AND

2 - Disease is one of the following:

Locally Advanced

Metastatic

AND

3 - Patient has an isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test (e.g., Abbott RealTime IDH1 assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

AND

4 - Patient has been previously treated

Product Name:Tibsovo	
Diagnosis	Relapsed or Refractory Myelodysplastic Syndromes (MDS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TIBSOVO	IVOSIDENIB TAB 250 MG	21534940000320	Brand

Approval Criteria

1 - Diagnosis of Myelodysplastic Syndromes (MDS)

AND

2 - Disease is one of the following:

Relapsed

Refractory

AND

3 - Patient has an isocitrate dehydrogenase-1 (IDH1) mutation as detected by an FDA-approved test (e.g., Abbott RealTime IDH1 assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

Product Name:Tibsovo	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TIBSOVO	IVOSIDENIB TAB 250 MG	21534940000320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

Examples of comorbid conditions are severe cardiac or pulmonary disease, baseline ECOG performance status greater than or equal to 2, hepatic impairment with bilirubin greater than 1.5 times the upper limit of normal, or creatinine clearance less than 45 mL/min. [1]

Prior Authorization Guideline

Guideline ID	GL-229009
Guideline Name	Tobramycin Inhaled Products - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Bethkis (tobramycin) Inhalation Solution
Cystic Fibrosis Indicated for the management of cystic fibrosis patients with Pseudomonas aeruginosa. Safety and efficacy have not been demonstrated in patients under the age of six years, patients with FEV 1 less than 40% or greater than 80% predicted, or patients colonized with Burkholderia cepacia.
Drug Name: Kitabis Pak (co-packaged tobramycin inhalation solution PARI LC PLUS reusable nebulizer)
Cystic fibrosis Indicated for the management of cystic fibrosis in adults and pediatric patients 6 years of age and older with P. aeruginosa. Safety and efficacy have not been demonstrated in patients under the age of 6 years, patients with FEV1 less than 25% or greater than 75% predicted, or patients colonized with Burkholderia cepacia.
Drug Name: TOBI (tobramycin) Inhalation Solution
Cystic fibrosis Indicated for the management of cystic fibrosis in adults and pediatric patients 6 years of age and older with Pseudomonas aeruginosa. Safety and efficacy have not been

demonstrated in patients under the age of 6 years, patients with forced expiratory volume in 1 second (FEV1) <25% or >75% predicted, or patients colonized with Burkholderia cepacia.

2 . Criteria

Product Name:Brand Bethkis Inhalation Solution, Kitabis Pak, Brand TOBI Inhalation Solution	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
TOBI	TOBRAMYCIN NEBU SOLN 300 MG/5ML	07000070002520	Brand
KITABIS PAK	TOBRAMYCIN NEBU SOLN 300 MG/5ML	07000070002520	Brand
BETHKIS	TOBRAMYCIN NEBU SOLN 300 MG/4ML	07000070002530	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication.

AND

2 - Trial and failure of a minimum 30 day supply, or intolerance to both of the following:

generic tobramycin 300 mg/4 ml nebulized solution

generic tobramycin 300 mg/5 ml nebulized solution

Product Name:Brand Bethkis Inhalation Solution, Kitabis Pak, Brand TOBI Inhalation Solution	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
TOBI	TOBRAMYCIN NEBU SOLN 300 MG/5ML	07000070002520	Brand
KITABIS PAK	TOBRAMYCIN NEBU SOLN 300 MG/5ML	07000070002520	Brand
BETHKIS	TOBRAMYCIN NEBU SOLN 300 MG/4ML	07000070002530	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication.

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure of a minimum 30 day supply, or intolerance to both of the following:

generic tobramycin 300 mg/4 ml nebulized solution

generic tobramycin 300 mg/5 ml nebulized solution

Prior Authorization Guideline

Guideline ID	GL-228621
Guideline Name	Tocilizumab
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Actemra IV & SC (tocilizumab), Tofidence IV (tocilizumab-bavi), Tyenne IV & SC (tocilizumab-aazg)
Rheumatoid arthritis (RA) Indicated for the treatment of adult patients with moderately- to severely-active rheumatoid arthritis who have had an inadequate response to one or more disease-modifying antirheumatic drugs (DMARDs). **Polyarticular Juvenile Idiopathic Arthritis (PJIA)** Indicated for the treatment of active polyarticular juvenile idiopathic arthritis in patients 2 years of age and older. **Systemic Juvenile Idiopathic Arthritis (SJIA)** Indicated for the treatment of active systemic juvenile idiopathic arthritis in patients 2 years of age and older. **Giant Cell Arteritis (GCA) - Off Label for Tofidence** Indicated for the treatment of giant cell arteritis (GCA) in adult patients.
Drug Name: Actemra SC (tocilizumab)

Systemic Sclerosis-Associated Interstitial Lung Disease (SSc-ILD) Indicated for slowing the rate of decline in pulmonary function in adult patients with systemic sclerosis-associated interstitial lung disease (SSc-ILD).
Drug Name: Tyenne SC (tocilizumab-aazg)
Off Label Uses: Systemic Sclerosis-Associated Interstitial Lung Disease (SSc-ILD) Tocilizumab SC has been used for slowing the rate of decline in pulmonary function in adult patients with systemic sclerosis-associated interstitial lung disease (SSc-ILD).
Drug Name: Actemra IV (tocilizumab)
Cytokine Release Syndrome Indicated for the treatment of chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome in adults and pediatric patients 2 years of age and older. **Coronavirus Disease 2019 (COVID-19)** Indicated for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized adult patients who are receiving systemic corticosteroids and require supplemental oxygen, non-invasive or invasive mechanical ventilation, or extracorporeal membrane oxygenation (ECMO).
Drug Name: Tofidence IV (tocilizumab-bavi), Tyenne IV (tocilizumab-aazg)
Off Label Uses: Cytokine Release Syndrome Tocilizumab IV has been used for the treatment of chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome in adults and pediatric patients 2 years of age and older [1]. **Coronavirus Disease 2019 (COVID-19)** Tocilizumab IV has been used for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized adult patients who are receiving systemic corticosteroids and require supplemental oxygen, non-invasive or invasive mechanical ventilation, or extracorporeal membrane oxygenation (ECMO) [1].

2 . Criteria

TYENNE	TOCILIZUMAB-AAZG SUBCUTANEOUS SOLN PREF SYR 162 MG/0.9ML	6650007017E520	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

methotrexate

leflunomide

sulfasalazine

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

Cimzia (certolizumab pegol)

Enbrel (etanercept)

One formulary adalimumab product

Rinvoq (upadacitinib)

Simponi (golimumab)

Xeljanz/XR (tofacitinib/ER)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

5 - Both of the following: (Applies to Tofidence IV, Tyenne IV or SC only)

5.1 Paid claims or submission of medical records (e.g., chart notes) confirming a minimum duration of a 6-month trial of Actemra (tocilizumab)

AND

5.2 Submission of medical records documenting why the covered product has not been effective

Notes	*Includes attestation that a total of two TNF inhibitors have already been tried in the past, and the patient should not be made to try a third TNF inhibitor. ** For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products

Product Name:Actemra IV or SC, Tofidence IV, Tyenne IV or SC

TYENNE	TOCILIZUMAB-AAZG SUBCUTANEOUS SOLN PREF SYR 162 MG/0.9ML	6650007017E520	Brand

Approval Criteria

1 - Diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) as documented by the following [6-8]:

1.1 Exclusion of other known causes of interstitial lung disease (ILD)

AND

1.2 One of the following:

1.2.1 In patients not subjected to surgical lung biopsy, the presence of idiopathic interstitial pneumonia (e.g., fibrotic nonspecific interstitial pneumonia [NSIP], usual interstitial pneumonia [UIP] and centrilobular fibrosis) pattern on high-resolution computed tomography (HRCT) revealing SSc-ILD or probable SSc-ILD

OR

1.2.2 In patients subjected to a lung biopsy, both HRCT and surgical lung biopsy pattern revealing SSc-ILD or probable SSc-ILD

AND

2 - Prescribed by or in consultation with a pulmonologist or rheumatologist

AND

3 - Both of the following: (Applies to Tyenne SC only)

3.1 Paid claims or submission of medical records (e.g., chart notes) confirming a minimum duration of a 6-month trial of Actemra (tocilizumab)

AND

3.2 Submission of medical records documenting why the covered product has not been effective

Approval Criteria

1 - Diagnosis of COVID-19

AND

2 - Patient is hospitalized

AND

3 - Currently receiving systemic corticosteroids

AND

4 - Patient requires one of the following:

Supplemental oxygen

Non-invasive mechanical ventilation

Invasive mechanical ventilation

Extracorporeal membrane oxygenation (ECMO)

AND

5 - Both of the following: (Applies to Tofidence IV and Tyenne IV only)

5.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial of Actemra (tocilizumab)

AND

5.2 Submission of medical records documenting why the covered product has not been effective

Product Name:Actemra IV, Tofidence IV [off-label], Tyenne IV [off-label]	
Diagnosis	Cytokine Release Syndrome (CRS) Risk due to CAR T-Cell Therapy
Approval Length	2 Months [A]

Approval Criteria

1 - Patient will receive or is receiving chimeric antigen receptor (CAR) T-cell immunotherapy (e.g., Kymriah [tisagenlecleucel], Yescarta [axicabtagene ciloleucel])

AND

2 - Prescribed by or in consultation with an oncologist or hematologist

AND

3 - Both of the following: (Applies to Tofidence IV and Tyenne IV only)

3.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial of Actemra (tocilizumab)

AND

3.2 Submission of medical records documenting why the covered product has not been effective

3 . Background

Benefit/Coverage/Program Information
Formulary Adalimumab Products Adalimumab-adaz Hyrimoz Hadlima Adalimumab-fkjp

4 . Endnotes

Patients should have Actemra on board for initial CAR T-cell therapy and be evaluated for signs and symptoms of CRS for at least 4 weeks after, up to a total of 4 doses of Actemra with at least 8 hours between doses. [1]

The recommended dosage of Actemra for treatment of adult patients with COVID-19 is 8 mg/kg administered as a single 60-minute intravenous infusion. If clinical signs or symptoms worsen or do not improve after the first dose, one additional infusion of Actemra may be administered at least 8 hours after the initial infusion. [1]

6 . Revision History

Date	Notes
11/7/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-229008
Guideline Name	Tolvaptan Products - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Samsca (tolvaptan)
Hyponatremia, hypervolemic and euvolemic Indicated for the treatment of clinically significant hypervolemic and euvolemic hyponatremia (serum sodium < 125 mEq/L or less marked hyponatremia that is symptomatic and has resisted correction with fluid restriction), including patients with heart failure and Syndrome of Inappropriate Antidiuretic Hormone (SIADH). Important limitations: Patients requiring intervention to raise serum sodium urgently to prevent or to treat serious neurological symptoms should not be treated with Samsca. It has not been established that raising serum sodium with Samsca provides a symptomatic benefit to patients.
Drug Name: Jynarque (tolvaptan)
Autosomal Dominant Polycystic Kidney Disease Indicated to slow kidney function decline in adults at risk of rapidly progressing autosomal dominant polycystic kidney disease (ADPKD).

2 . Criteria

Product Name:Brand Samsca or Generic tolvaptan	
Approval Length	30 Days [1]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TOLVAPTAN	TOLVAPTAN TAB 15 MG	30454060000320	Generic
SAMSCA	TOLVAPTAN TAB 15 MG	30454060000320	Brand

Approval Criteria

1 - Diagnosis of rapidly progressing autosomal dominant polycystic kidney disease (ADPKD)

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Patient is new to therapy or has received Jynarque for less than or equal to 18 months

AND

2.1.2 Alanine transaminase (ALT), aspartate transaminase (AST), and bilirubin will be measured prior to initiation, at 2 weeks and 4 weeks after initiation, then monthly for the first 18 months of therapy [E]

OR

2.2 Both of the following:

2.2.1 Patient has received Jynarque for longer than 18 months

AND

2.2.2 ALT, AST, and bilirubin will be measured at least every 3 months [E]

AND

3 - Patient does not have a history of significant liver impairment or injury, not including uncomplicated polycystic liver disease [E]

Product Name:Jynarque	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

3.2.1 Patient has received Jynarque for longer than 18 months

AND

3.2.2 ALT, AST, and bilirubin will be measured at least every 3 months [E]

3 . Endnotes

Normal extracellular fluid volume and osmolality are maintained when the serum sodium concentration is regulated within a narrow range (136 to 148 mEq/L). [2] Hypotonic hyponatremia, a disorder of impaired water excretion rather than salt depletion, results from the kidneys' inability to excrete enough free water to offset water intake. [2] Hypotonic hyponatremia is classified based on the patient's extracellular fluid (ECF) volume status as hypovolemic hyponatremia, euvolemic hyponatremia, or hypervolemic hyponatremia. [3] Samsca is indicated for the treatment of clinically significant euvolemic and hypervolemic hyponatremia, defined as a serum sodium of less than 125 mEq/L or

less marked hyponatremia that is symptomatic and has resisted correction with fluid restriction. [1]

Many different hypo-osmolar disorders can potentially present clinically with a normal ECF volume, or euvolemia, in part because it is difficult to detect modest changes in volume status using standard methods of clinical assessment. [3] Most patients with hyponatremia have clinical euvolemia (most commonly associated with the syndrome of inappropriate secretion of antidiuretic hormone [SIADH] or due to other causes [e.g., hypothyroidism, adrenal insufficiency, other disorders of excess water intake]) and are generally diagnosed clinically from the history, physical examination, and laboratory results. [2-3] Patients without clinical signs of volume depletion (e.g., orthostatic decreases in blood pressure and increases in pulse rate, dry mucus membranes, decreased skin turgor) or volume expansion (e.g., subcutaneous edema, ascites) should be considered to have euvolemia unless there is alternative evidence suggesting an abnormal ECF volume status. [3] Supportive laboratory results include a normal or low blood urea nitrogen (BUN) and a low serum uric acid level. [3] A spot urine sodium concentration should be greater than or equal to 30 mmol/L in most patients with euvolemic hyponatremia unless they have become secondarily sodium depleted. [3]

The presence of clinically detectable increased ECF volume generally reflects hypervolemia from some degree of body sodium excess. [3] Hyponatremia with ECF volume excess can arise in a variety of diseases (e.g., congestive heart failure, cirrhosis, renal failure). [3] Because intravascular volume cannot be easily measured directly, volume excess is generally diagnosed clinically from the history, physical examination, and laboratory results. [3] Patients with clinical signs of volume overload (e.g., subcutaneous edema, ascites, pulmonary edema) should be considered to have hypervolemia unless there are alternative explanations for these findings. [3] Elevation of plasma levels of brain natriuretic peptide (BNP) provides useful laboratory support for the presence of volume overload. [3] The urine sodium, or fractional sodium excretion, is usually low (spot urine sodium of less than 30 mmol/L) in patients with hypervolemic hyponatremia due to activation of the renin-angiotensin-aldosterone system (RAAS) with secondary renal sodium conservation despite the whole-body volume overload. [3]

Because of the risk of osmotic demyelination associated with overly-rapid correction of serum sodium, tolvaptan should be initiated in a hospital so that the serum sodium concentration can be monitored easily. If therapy is discontinued for any reason and the patient becomes hyponatremic, tolvaptan should be re-initiated in a hospital if further treatment with tolvaptan is indicated. "In a hospital" means anywhere in a hospital where the patient can be observed and serum sodium levels can be obtained (e.g., an emergency department, an observation unit, or an inpatient bed). [1]

Jynarque can cause serious and potentially fatal liver injury. Acute liver failure requiring liver transplantation has been reported in the post-marketing ADPKD experience. Discontinuation in response to laboratory abnormalities or signs or symptoms of liver injury (such as fatigue, anorexia, nausea, right upper abdominal discomfort, vomiting, fever, rash, pruritus, icterus, dark urine or jaundice) can reduce the risk of severe hepatotoxicity. ALT, AST and bilirubin should be monitored prior to initiation, at 2 weeks and 4 weeks after initiation, then monthly for 18 months and every 3 months thereafter. [4]

Prior Authorization Guideline

Guideline ID	GL-233448
Guideline Name	Topical Acne Treatments - PA, ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Benzaclin (clindamycin phosphate and benzoyl peroxide gel), Benzamycin (erthyromycin and benzoyl peroxide gel)
Acne vulgaris Indicated for the treatment of acne vulgaris.
Drug Name: Acanya (clindamycin phosphate and benzoyl peroxide gel), Veltin (clindamycin phosphate and tretinoin gel), Ziana (clindamycin phosphate and tretinoin gel)
Acne vulgaris Indicated for treatment of acne vulgaris in patients 12 years and older.
Drug Name: Clindagel (clindamycin)
Acne vulgaris Indicated for topical application in the treatment of acne vulgaris.
Drug Name: Onexton (clindamycin phosphate and benzoyl peroxide gel)
Acne vulgaris Indicated for the topical treatment of acne vulgaris in patients 12 years of age and older.

2 . Criteria

Product Name:Brand Acanya, Brand Benzaclin, Brand Benzamycin, Brand Veltin, Brand Ziana	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
BENZAMYCIN	BENZOYL PEROXIDE-ERYTHROMYCIN GEL 5-3%	90059902104010	Brand
ACANYA	CLINDAMYCIN PHOSPHATE-BENZOYL PEROXIDE GEL 1.2-2.5%	90059902194030	Brand
VELTIN	CLINDAMYCIN PHOSPHATE-TRETINOIN GEL 1.2-0.025%	90059902654020	Brand
ZIANA	CLINDAMYCIN PHOSPHATE-TRETINOIN GEL 1.2-0.025%	90059902654020	Brand

Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ciclopirox Kit (ciclopirox)
Onychomycosis Indicated as topical treatment in immunocompetent patients with mild to moderate onychomycosis of fingernails and toenails without lunula involvement, due to Trichophyton rubrum. The comprehensive management program includes removal of the unattached, infected nails as frequently as monthly, by a health care professional who has special competence in the diagnosis and treatment of nail disorders, including minor nail procedures.
Drug Name: Jublia (efinaconazole) topical solution
Onychomycosis of the toenails Indicated for the topical treatment of onychomycosis of the toenail(s) due to Trichophyton rubrum and Trichophyton mentagrophytes.
Drug Name: Kerydin (tavaborole) topical solution
Onychomycosis of the toenails Indicated for the treatment of onychomycosis of the toenails due to Trichophyton rubrum or Trichophyton mentagrophytes.

2 . Criteria

Product Name:Ciclopirox Kit	
Diagnosis	Fingernail Onychomycosis
Approval Length	48 Weeks [3, 6, A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CICLOPIROX TREATMENT	CICLOPIROX SOLUTION KIT 8%	90150030006420	Generic

Approval Criteria

1 - Diagnosis of onychomycosis of the fingernail(s)

AND

2 - The patient does not have dermatophytomas or lunula (matrix) involvement

AND

3 - Diagnosis of fingernail onychomycosis has been confirmed by one of the following:

Positive potassium hydroxide (KOH) preparation

Culture

Histology

AND

4 - Trial and failure (of a minimum 6-week supply), contraindication, or intolerance to oral terbinafine [B]

Product Name:Ciclopirox Kit, Generic tavaborole, Jublia	
Diagnosis	Toenail Onychomycosis

2 - The patient does not have dermatophytomas or lunula (matrix) involvement

AND

3 - Diagnosis of toenail onychomycosis has been confirmed by one of the following:

Positive potassium hydroxide (KOH) preparation

Culture

Histology

AND

4 - Patient has mild to moderate disease involving at least one target toenail

AND

5 - Treatment is requested due to a documented medical condition and not for cosmetic purposes (e.g. patients with history of cellulitis of the lower extremity, patients with diabetes who have additional risk factors for cellulitis of lower extremity, patients who experience pain/discomfort associated with the infected nail)

AND

6 - One of the following:

6.1 Paid claims or submission of medical records (e.g., chart notes) confirming history of failure, contraindication, or intolerance to 12 weeks of treatment with ciclopirox

OR

6.2 Patient is 6 to 12 years of age

AND

7 - Paid claims or submission of medical records (e.g., chart notes) confirming history of failure, contraindication, or intolerance to 12 weeks of treatment with ONE of the following oral antifungal agents:

itraconazole

terbinafine

griseofulvin

3 . Endnotes

Considering that toenails can take 12 to 18 months to grow out, many clinicians consider that 1 year is too short to assess clinical effectiveness. [4] Reports of long-term follow-up of treated patients have been presented, suggesting that positive mycology at 12 and 24 weeks after commencement of therapy are poor prognostic signs and may indicate a need for retreatment or for a change of drug. [5]

Oral terbinafine has been shown to have superior efficacy compared to topical treatments and is recommended as first-line therapy for onychomycosis. [4, 6, 7] Compared to itraconazole, terbinafine has been found to have lower long-term mycological recurrence rates and better tolerability. [4, 6]

1.2.1 Patient is older than 25 years of age

AND

1.2.2 Diagnosis of acne vulgaris (i.e., acne)

AND

1.2.3 Trial and failure (of a minimum 30-day supply) within the past 180 days, contraindication, or intolerance to BOTH of the following generics:

adapalene (cream, gel)

Topical tretinoin or tretinoin microsphere

Notes	Treatment for cosmetic purposes (i.e., wrinkles, senile lentigo, solar el astosis, dyschromia, melasma or chloasma, hyperpigmentation of skin , facial mottling) is a benefit exclusion. [A]

Product Name:Arazlo, Fabior, Brand Tazarotene 0.1% foam, Brand Tazorac 0.1% cream and gel	
Diagnosis	Acne Vulgaris
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAZORAC	TAZAROTENE CREAM 0.1%	90250070003730	Brand
TAZORAC	TAZAROTENE GEL 0.1%	90250070004030	Brand
FABIOR	TAZAROTENE (ACNE) FOAM 0.1%	90050027003930	Brand
ARAZLO	TAZAROTENE (ACNE) LOTION 0.045%	90050027004120	Brand
TAZAROTENE	TAZAROTENE (ACNE) FOAM 0.1%	90050027003930	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Patient is 25 years of age or younger

AND

1.1.2 Trial and failure (of a minimum 30-day supply) within the past 180 days, contraindication or intolerance to BOTH of the following:

1.1.2.1 generic tazarotene

AND

1.1.2.2 One of the following:

generic adapalene

generic topical tretinoin or tretinoin microsphere

OR

1.2 All of the following:

1.2.1 Patient is older than 25 years of age

AND

1.2.2 Diagnosis of acne vulgaris (i.e., acne)

AND

1.2.3 Trial and failure (of a minimum 30-day supply) within the past 180 days, contraindication or intolerance to BOTH of the following:

1.2.3.1 generic tazarotene

AND

1.2.3.2 One of the following:

generic adapalene

generic topical tretinoin or tretinoin microsphere

Notes	Treatment for cosmetic purposes (i.e., wrinkles, senile lentigo, solar el astosis, dyschromia, melasma or chloasma, hyperpigmentation of skin , facial mottling) is a benefit exclusion. [A]

Product Name:Brand Tazorac	
Diagnosis	Plaque Psoriasis
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAZORAC	TAZAROTENE CREAM 0.05%	90250070003720	Brand

Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TAZAROTENE	TAZAROTENE CREAM 0.1%	90250070003730	Generic
TAZAROTENE	TAZAROTENE GEL 0.1%	90250070004030	Generic

Approval Criteria

1 - One of the following:

1.1 Patient is 25 years of age or younger

OR

1.2 Both of the following:

Patient is older than 25 years of age

Diagnosis of acne vulgaris (i.e., acne)

Notes	Treatment for cosmetic purposes (i.e., wrinkles, senile lentigo, solar el astosis, dyschromia, melasma or chloasma, hyperpigmentation of skin , facial mottling) is a benefit exclusion. [A]

3 . Background

Clinical Practice Guidelines

Table 1. The use of topical retinoids for the following conditions was clarified as either medical or cosmetic (plan exclusions) [10]

Uses	Medical vs. Cosmetic

Actinic keratosis	Medical
Alopecia areata	Medical
Chloasma	Cosmetic
Fine wrinkles on face	Cosmetic
Hyperkeratosis	Medical
Hyperpigmentation of skin, Facial mottling	Cosmetic
Keloid scar	Medical
Roughness of skin, Facial tactile roughness	Cosmetic
Systematized epidermal nevus	Medical
Ultraviolet-induced change in normal skin	Cosmetic
Wound healing (mild)	Medical

Table 2. Relative potencies of topical corticosteroids [14-15]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment, gel	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream, lotion	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1

	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment, lotion	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream, lotion	0.1
	Triamcinolone acetonide	Cream, ointment, lotion	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

4 . Endnotes

The use of topical retinoids for the following conditions was clarified as either medical or cosmetic (plan exclusions). [10] Please refer to Background section for table with details.

Prior Authorization Guideline

Guideline ID	GL-228561
Guideline Name	Topical Rosacea Agents
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zilxi (minocycline) foam, Epsolay (benzoyl peroxide) cream
Rosacea Indicated for the treatment of inflammatory lesions of rosacea in adults.
Drug Name: Finacea (azelaic acid) gel
Rosacea Indicated for topical treatment of the inflammatory papules and pustules of mild to moderate rosacea. Efficacy for treatment of erythema in rosacea in the absence of papules and pustules has not been evaluated.
Drug Name: Noritate (metronidazole) cream
Rosacea Indicated for the topical treatment of inflammatory lesions and erythema of rosacea.
Drug Name: Metrogel (metronidazole) gel
Rosacea Indicated for the topical treatment of inflammatory lesions of rosacea.
Drug Name: Rhofade (oxymetazoline hydrochloride) cream

Rosacea Indicated for the topical treatment of persistent facial erythema associated with rosacea in adults.

2 . Criteria

Product Name:Epsolay Cream, Brand Finacea Gel, Zilxi Foam, Noritate Cream	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ZILXI	MINOCYCLINE HCL MICRONIZED FOAM 1.5%	90060044123920	Brand
FINACEA	AZELAIC ACID GEL 15%	90060010004020	Brand
NORITATE	METRONIDAZOLE CREAM 1%	90060040003720	Brand
EPSOLAY	BENZOYL PEROXIDE CREAM 5%	90050010003710	Brand

Approval Criteria

1 - Trial and failure (of a minimum 30-day supply), contraindication or intolerance to one of the following:

azelaic acid gel

Soolantra cream

Finacea foam

Product Name:Brand Metrogel	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
METROGEL	METRONIDAZOLE GEL 1%	90060040004020	Brand

Approval Criteria

1 - Trial and failure (of a minimum 30-day supply), contraindication or intolerance to one of the following:

generic metronidazole gel

Soolantra cream

Finacea foam

Product Name:Rhofade	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
RHOFADE	OXYMETAZOLINE HCL CREAM 1%	90060050103720	Brand

Approval Criteria

1 - Trial and failure (of a minimum 30-day supply), contraindication or intolerance to Mirvaso (brimonidine gel)

Prior Authorization Guideline

Guideline ID	GL-233381
Guideline Name	Trastuzumab - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	9/8/2000
P&T Revision Date:	2/20/2025

1 . Indications

Drug Name: Herceptin (trastuzumab), Hercessi (trastuzumab-strf), Herzuma (trastuzumab-pkrb), Kanjinti (trastuzumab-anns), Ogivri (trastuzumab-dkst), Ontruzant (trastuzumab-dkst), Trazimera (trastuzumab-qyyp)
Adjuvant Breast Cancer Indicated for adjuvant treatment of HER2 overexpressing node positive or node negative (ER/PR negative or with one high risk feature) breast cancer: 1) as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel, 2) with docetaxel and carboplatin, 3) as a single agent following multi-modality anthracycline based therapy. **Metastatic Breast Cancer** Indicated: 1) In combination with paclitaxel for first-line treatment of HER2-overexpressing metastatic breast cancer, 2) As a single agent for treatment of HER2-overexpressing breast cancer in patients who have received one or more chemotherapy regimens for metastatic disease. **Metastatic Gastric Cancer** Indicated in combination with cisplatin and capecitabine or 5-fluorouracil, for the treatment of patients with HER2 overexpressing metastatic gastric or

gastroesophageal junction adenocarcinoma, who have not received prior treatment for metastatic disease.

Drug Name: Herceptin Hylecta (trastuzumab and hyaluronidase-oysk)

Adjuvant Breast Cancer Indicated for adjuvant treatment of adults with HER2 overexpressing node positive or node negative (ER/PR negative or with one high risk feature) breast cancer: 1) as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel, 2) as part of a treatment regimen with docetaxel and carboplatin, 3) as a single agent following multi-modality anthracycline based therapy.

Metastatic Breast Cancer Indicated in adults: 1) In combination with paclitaxel for first-line treatment of HER2-overexpressing metastatic breast cancer, 2) As a single agent for treatment of HER2-overexpressing breast cancer in patients who have received one or more chemotherapy regimens for metastatic disease.

2 . Criteria

Product Name:Kanjinti, Trazimera	
Diagnosis	Adjuvant or Neoadjuvant Breast Cancer
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KANJINTI	TRASTUZUMAB-ANNS FOR IV SOLN 150 MG	21170070142110	Brand
KANJINTI	TRASTUZUMAB-ANNS FOR IV SOLN 420 MG	21170070142121	Brand
TRAZIMERA	TRASTUZUMAB-QYYP FOR IV SOLN 150 MG	21170070652110	Brand
TRAZIMERA	TRASTUZUMAB-QYYP FOR IV SOLN 420 MG	21170070652120	Brand

Approval Criteria

1 - Diagnosis of HER2-overexpressing of breast cancer [A]

AND

2 - One of the following treatment regimens: [4, C]

Adjuvant treatment

Used in combination with Perjeta (pertuzumab)

Product Name:Kanjinti, Trazimera	
Diagnosis	Metastatic Breast Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KANJINTI	TRASTUZUMAB-ANNS FOR IV SOLN 150 MG	21170070142110	Brand

TRAZIMERA	TRASTUZUMAB-QYYP FOR IV SOLN 150 MG	21170070652110	Brand
TRAZIMERA	TRASTUZUMAB-QYYP FOR IV SOLN 420 MG	21170070652120	Brand

Approval Criteria

1 - Diagnosis of HER2-overexpressing of breast cancer [A]

AND

2 - Disease is metastatic

AND

3 - One of the following treatment regimens: [3-5, 7, C]

Used in combination with a taxane

Used as a single agent in a patient who has received one or more chemotherapy regimens for metastatic disease

Used in combination with Perjeta (pertuzumab)

Product Name:Kanjinti, Trazimera	
Diagnosis	Metastatic Breast Cancer
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KANJINTI	TRASTUZUMAB-ANNS FOR IV SOLN 150 MG	21170070142110	Brand
KANJINTI	TRASTUZUMAB-ANNS FOR IV SOLN 420 MG	21170070142121	Brand
TRAZIMERA	TRASTUZUMAB-QYYP FOR IV SOLN 150 MG	21170070652110	Brand
TRAZIMERA	TRASTUZUMAB-QYYP FOR IV SOLN 420 MG	21170070652120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Kanjinti, Trazimera	
Diagnosis	Metastatic Gastric Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KANJINTI	TRASTUZUMAB-ANNS FOR IV SOLN 150 MG	21170070142110	Brand

HERCESSI	TRASTUZUMAB-STRF FOR IV SOLN 420 MG	21170070402160	Brand

Approval Criteria

1 - Diagnosis of HER2-overexpressing of breast cancer [A]

AND

2 - Disease is metastatic

AND

3 - One of the following treatment regimens: [1, 4-6, 8-9, C]

Used in combination with a taxane

Used as a single agent in a patient who has received one or more chemotherapy regimens for metastatic disease

Used in combination with Perjeta (pertuzumab)

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to both of the following:

Kanjinti

Trazimera

OR

4.2 Continuation of therapy for patients currently in the midst of an ongoing prescribed treatment regimen

Product Name:Herceptin, Hercessi, Herzuma, Ogivri, Ontruzant

3 . Endnotes

Detection of HER2 protein overexpression is necessary for selection of patients appropriate for trastuzumab therapy because these are the only patients studied and for whom benefit has been shown. Due to differences in tumor histopathology, use FDA-approved tests for the specific tumor type (e.g. breast or gastric/gastroesophageal adenocarcinoma) to assess HER2 protein overexpression and HER2 gene amplification. Assessment of HER2 protein overexpression and HER2 gene amplification should be performed using FDA-approved tests specific for breast cancer by laboratories with demonstrated proficiency. Improper assay performance, including use of suboptimally fixed tissue, failure to utilize specified reagents, deviation from specific assay instructions, and failure to include appropriate controls for assay validation, can lead to unreliable results. Assessment of HER2 protein overexpression and HER2 gene amplification in metastatic gastric cancer should be performed using FDA-approved tests specifically for gastric cancers due to differences in gastric vs. breast histopathology, including incomplete membrane staining and more frequent heterogeneous expression of HER2 seen in gastric cancers. Study 7 demonstrated that gene amplification and protein overexpression were not as well correlated as with breast cancer. Treatment outcomes for metastatic gastric cancer (Study 7) are based on HER2 gene amplification (FISH) and HER 2 protein overexpression (IHC) test results. [1-3, 6-9]

Herceptin, Kanjinti, Ogivri, Trazimera, Herzuma and Ontruzant are indicated for the treatment of HER-2 overexpressing metastatic gastric or gastroesophageal junction adenocarcinoma. A pivotal study included patients previously untreated for metastatic gastric or gastroesophageal junction adenocarcinoma. [1, 3, 6-9]

The FDA defines biosimilar as a biological product that is highly similar to and has no clinically meaningful differences from an existing FDA-approved reference product. [5]

5 . Revision History

Date	Notes
3/13/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-229016
Guideline Name	Tremfya (guselkumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tremfya SC (guselkumab)
Plaque Psoriasis (PsO) Indicated for the treatment of adult patients with moderate-to-severe plaque psoriasis who are candidates for systemic therapy or phototherapy. **Psoriatic Arthritis (PsA)** Indicated for the treatment of adult patients with active psoriatic arthritis. **Ulcerative Colitis (UC)** Indicated for the treatment of adult patients with moderately to severely active ulcerative colitis.
Drug Name: Tremfya IV (guselkumab)
Ulcerative Colitis (UC) Indicated for the treatment of adult patients with moderately to severely active ulcerative colitis.

2 . Criteria

Product Name:Tremfya SC 100 mg	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TREMFYA	GUSELKUMAB SOLN AUTO-INJECTOR 100 MG/ML	9025054200D520	Brand
TREMFYA	GUSELKUMAB SOLN PREFILLED SYRINGE 100 MG/ML	9025054200E520	Brand

Approval Criteria

1 - Diagnosis of moderate-to-severe plaque psoriasis

AND

2 - One of the following [2]:

Greater than or equal to 3% body surface area involvement

Severe scalp psoriasis

Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

corticosteroids (e.g., betamethasone, clobetasol)

vitamin D analogs (e.g., calcitriol, calcipotriene)

tazarotene

calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

Notes	If patient meets criteria above, please approve at GPI-14

Product Name:Tremfya SC 100 mg	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TREMFYA	GUSELKUMAB SOLN AUTO-INJECTOR 100 MG/ML	9025054200D520	Brand
TREMFYA	GUSELKUMAB SOLN PREFILLED SYRINGE 100 MG/ML	9025054200E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following [1-3]:

Reduction in the body surface area (BSA) involvement from baseline

Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Notes	If patient meets criteria above, please approve at GPI-14

Product Name:Tremfya SC 100 mg	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

TREMFYA	GUSELKUMAB SOLN PREFILLED SYRINGE 100 MG/ML	9025054200E520	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis (PsA)

AND

2 - One of the following [4]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

Notes	If patient meets criteria above, please approve at GPI-14

Product Name:Tremfya SC 100 mg	
Diagnosis	Psoriatic Arthritis (PsA)

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

TREMFYA	GUSELKUMAB SOLN PREFILLED SYRINGE 100 MG/ML	9025054200E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

Notes	If patient meets criteria above, please approve at GPI-14

Product Name:Tremfya IV	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TREMFYA	GUSELKUMAB IV SOLN 200 MG/20ML (10 MG/ML)	52504025002030	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [5, 6]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, erythrocyte sedimentation rate, C-reactive protein)

Dependent on, or refractory to, corticosteroids

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies [5, 6]:

6-mercaptopurine

Azathioprine

Corticosteroid (e.g., prednisone)

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

AND

4 - Will be administered as an intravenous induction dose

AND

5 - Prescribed by or in consultation with a gastroenterologist

Diagnosis	Ulcerative Colitis (UC)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TREMFYA	GUSELKUMAB SOLN AUTO-INJECTOR 100 MG/ML	9025054200D520	Brand

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233194
Guideline Name	Trikafta (elexacaftor/tezacaftor/ivacaftor)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/14/2019
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Trikafta (elexacaftor/tezacaftor/ivacaftor)
Cystic Fibrosis Indicated for the treatment of cystic fibrosis (CF) in patients aged 2 years and older who have at least one F508del mutation in the cystic fibrosis transmembrane conductance regulator (CFTR) gene or a mutation in the CFTR gene that is responsive based on in vitro data. If the patient's genotype is unknown, an FDA-cleared CF mutation test should be used to confirm the presence of at least one F508del mutation or a mutation that is responsive based on in vitro data.

2 . Criteria

Product Name:Trikafta

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

TRIKAFTA	ELEXACAF-TEZACAF-IVACAF 100-50-75 MG& IVACAF 75MG THPK GRAN	4530990340B140	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF)

AND

2 - One of the following:

For granule packets, patient is at least 2 to less than 6 years of age

For tablets, patient is 6 years of age or older

AND

3 - Patient has at least one of the following mutations in the cystic fibrosis transmembrane conductance regulator (CFTR) gene as detected by a FDA-cleared cystic fibrosis mutation test or a test performed at a Clinical Laboratory Improvement Amendments (CLIA)-approved facility:*

F508del mutation

A mutation in the CFTR gene that is responsive based on in vitro data

AND

4 - Prescribed by or in consultation with one of the following:

Pulmonologist

Specialist affiliated with a CF care center

Notes	*Please consult Background section for table of CFTR gene mutations responsive to Trikafta.

Product Name:Trikafta

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228564
Guideline Name	Trodelvy (sacituzumab govitecan-hziy)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Trodelvy (sacituzumab govitecan-hziy)
Breast Cancer Indicated for the treatment of adult patients with unresectable locally advanced or metastatic triple-negative breast cancer (mTNBC) who have received two or more prior systemic therapies, at least one of them for metastatic disease. **Breast Cancer** Indicated for the treatment of adult patients with unresectable locally advanced or metastatic hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative (IHC 0, IHC 1+ or IHC 2+/ISH–) breast cancer who have received endocrine-based therapy and at least two additional systemic therapies in the metastatic setting. **Urothelial Cancer** Indicated for the treatment of adult patients with locally advanced or metastatic urothelial cancer (mUC) who have previously received a platinum-containing chemotherapy and either programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor. This indication is approved under accelerated approval based on tumor response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial.

2 . Criteria

Product Name:Trodelvy	
Diagnosis	Triple Negative Breast Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRODELVY	SACITUZUMAB GOVITECAN-HZIY FOR IV SOLN 180 MG	21551065402120	Brand

Approval Criteria

1 - Diagnosis of triple negative breast cancer (TNBC) [A]

AND

2 - Disease is one of the following:

Unresectable locally advanced

Metastatic

AND

3 - Patient has received at least two prior therapies for at least one of which is for metastatic disease (e.g., chemotherapy with or without programmed cell death protein-1 (PD-1) inhibitor [e.g., Keytruda (pembrolizumab)], neoadjuvant/adjuvant therapy, poly-ADP ribose polymerase (PARP) inhibitor [e.g., Olaparib, talazoparib], etc.) [1-3]

Product Name:Trodelvy	
Diagnosis	HR-positive, HER2-negative Breast Cancer

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRODELVY	SACITUZUMAB GOVITECAN-HZIY FOR IV SOLN 180 MG	21551065402120	Brand

Approval Criteria

1 - Diagnosis of breast cancer

AND

2 - Disease is one of the following:

Unresectable locally advanced

Metastatic

AND

3 - Disease is hormone-receptor (HR) - positive

AND

4 - Disease is human epidermal growth factor receptor 2 (HER2) - negative

AND

5 - Both of the following:

5.1 Patient has received endocrine-based therapy (e.g., tamoxifen, aromatase inhibitors [e.g., Aromasin (exemestane), Femara (letrozole), Arimidex (anastrozole)], fulvestrant)

AND

5.2 Patient has received at least two additional systemic therapies in the metastatic setting (e.g., chemotherapy, poly-ADP ribose polymerase (PARP) inhibitor [e.g., olaparib, talazoparib], fam-trastuzumab deruxtecan-nxki) [B, 3]

Product Name:Trodelvy	
Diagnosis	Urothelial Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRODELVY	SACITUZUMAB GOVITECAN-HZIY FOR IV SOLN 180 MG	21551065402120	Brand

Approval Criteria

1 - Diagnosis of urothelial cancer

AND

2 - Disease is one of the following:

Locally advanced

Metastatic

AND

3 - Patient has previously received both of the following:

3.1 Platinum-containing chemotherapy (e.g., cisplatin, carboplatin)

AND

3.2 One of the following:

Programmed death receptor-1 (PD-1) inhibitor [e.g., Keytruda (pembrolizumab)]

Programmed death-ligand 1 (PD-L1) inhibitor [e.g., Bavencio (avelumab)]

Product Name:Trodelvy	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRODELVY	SACITUZUMAB GOVITECAN-HZIY FOR IV SOLN 180 MG	21551065402120	Brand
TRODELVY	SACITUZUMAB GOVITECAN-HZIY FOR IV SOLN 180 MG	21551065402120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

Triple-negative breast cancer is defined by a lack of tumor-cell expression of the estrogen receptor, progesterone receptor, and human epidermal growth factor receptor 2 (HER2). [2]

Adjuvant or neoadjuvant therapy for early-stage disease will qualify as one of the required prior regimens if the development of unresectable, locally advanced or metastatic disease occurred within 12 months of adjuvant therapy. [1]

Prior Authorization Guideline

Guideline ID	GL-229161
Guideline Name	Truqap (capivasertib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	1/17/2024
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Truqap (capivasertib)
Breast Cancer Indicated, in combination with fulvestrant for the treatment of adult patients with hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative, locally advanced or metastatic breast cancer with one or more PIK3CA/AKT1/PTEN-alterations as detected by an FDA-approved test following progression on at least one endocrine-based regimen in the metastatic setting or recurrence on or within 12 months of completing adjuvant therapy.

2 . Criteria

Product Name:Truqap

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRUQAP	CAPIVASERTIB TAB 160 MG	21530320000320	Brand
TRUQAP	CAPIVASERTIB TAB 200 MG	21530320000325	Brand

TRUQAP	CAPIVASERTIB TAB THERAPY PACK 200 MG	2153032000B725	Brand

Approval Criteria

1 - Diagnosis of breast cancer

AND

2 - Disease is one of the following:

Locally advanced

Metastatic

AND

3 - Will be taken in combination with fulvestrant

AND

4 - Disease is hormone receptor (HR)-positive

AND

5 - Disease is human epidermal growth factor receptor 2 (HER2)-negative

AND

6 - Patient has one or more PIK3CA/AKT1/PTEN-alterations as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

7 - One of the following:

7.1 Following progression on at least one endocrine-based regimen in the metastatic setting (e.g., anastrozole, letrozole, exemestane, tamoxifen, etc).

OR

7.2 Recurrence on or within 12 months of completing adjuvant therapy (e.g., chemotherapy)

Product Name:Truqap	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Truvada 200/300 mg (emtricitabine/tenofovir disoproxil fumarate)

Prior Authorization Guideline

Guideline ID	GL-233215
Guideline Name	Truvada 200/300 mg (emtricitabine/tenofovir disoproxil fumarate)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/21/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Truvada (emtricitabine/tenofovir disoproxil fumarate)
Treatment of HIV-1 Infection Indicated in combination with other antiretroviral agents for the treatment of HIV-1 infection in adults and pediatric patients weighing at least 17 kg. **HIV-1 Pre-Exposure Prophylaxis (PrEP)** Indicated in at-risk adults and adolescents weighing at least 35 kg for pre-exposure prophylaxis (PrEP) to reduce the risk of sexually acquired HIV-1 infection. Individuals must have a negative HIV-1 test immediately prior to initiating Truvada for HIV-1 PrEP.

2 . Criteria

Product Name:Brand Truvada 200/300 mg	
Diagnosis	Treatment of HIV Infection
Approval Length	24 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 200-300 MG	12109902300320	Brand

Approval Criteria

1 - Truvada is being used for the treatment of HIV infection

Product Name:Brand Truvada 200/300 mg	
Diagnosis	HIV Pre-exposure Prophylaxis (PrEP)
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRUVADA	EMTRICITABINE-TENOFOVIR DISOPROXIL FUMARATE TAB 200-300 MG	12109902300320	Brand

Approval Criteria

1 - Truvada is being used for HIV Pre-exposure Prophylaxis (PrEP)

AND

2 - Patient has a history of intolerance to generic emtricitabine-tenofovir disoproxil fumarate 200/300 mg

3 . References

Prior Authorization Guideline

Guideline ID	GL-229017
Guideline Name	Tukysa (tucatinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tukysa (tucatinib)
Breast Cancer Indicated in combination with trastuzumab and capecitabine for treatment of adult patients with advanced unresectable or metastatic HER2-positive breast cancer, including patients with brain metastases, who have received one or more prior anti-HER2-based regimens in the metastatic setting. **Colorectal cancer** Indicated in combination with trastuzumab for the treatment of adult patients with RAS wild-type, HER2-positive unresectable or metastatic colorectal cancer that has progressed following treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy. This indication is approved under accelerated approval based on tumor response rate and durability of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials.

2 . Criteria

Product Name:Tukysa	
Diagnosis	Breast Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TUKYSA	TUCATINIB TAB 50 MG	21170080000320	Brand
TUKYSA	TUCATINIB TAB 150 MG	21170080000340	Brand

Approval Criteria

1 - Diagnosis of breast cancer

AND

2 - Disease is one of the following:

Advanced unresectable

Metastatic

AND

3 - Disease is human epidermal growth factor receptor 2 (HER2)-positive

AND

4 - Used in combination with trastuzumab and capecitabine

AND

5 - Patient has received one or more prior anti-HER2 based regimens (e.g., trastuzumab, pertuzumab, ado-trastuzumab emtansine)

Product Name:Tukysa	
Diagnosis	Colorectal Cancer
Approval Length	12 month(s)

Prior Authorization Guideline

Guideline ID	GL-229021
Guideline Name	Tykerb (lapatinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tykerb (lapatinib)
Metastatic breast cancer (1) In combination with Xeloda (capecitabine), indicated for the treatment of patients with advanced or metastatic breast cancer whose tumors over-express HER2 and who have received prior therapy including an anthracycline, a taxane, and trastuzumab. Limitations of use: Patients should have disease progression on trastuzumab prior to initiation of treatment with Tykerb in combination with capecitabine.; (2) In combination with Femara (letrozole), indicated for the treatment of postmenopausal women with hormone receptor positive metastatic breast cancer that overexpresses the HER2 receptor for whom hormonal therapy is indicated. Tykerb in combination with an aromatase inhibitor has not been compared to a trastuzumab-containing chemotherapy regimen for the treatment of metastatic breast cancer. **Off Label Uses: HER2-positive Breast Cancer [4-6]** Used for the first-line treatment of HER2-positive locally-advanced or metastatic breast cancer.

2 . Criteria

Product Name:Brand Tykerb, generic lapatinib	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LAPATINIB DITOSYLATE	LAPATINIB DITOSYLATE TAB 250 MG (BASE EQUIV)	21533026100320	Generic
TYKERB	LAPATINIB DITOSYLATE TAB 250 MG (BASE EQUIV)	21533026100320	Brand

Approval Criteria

1 - Diagnosis of HER2-positive metastatic or recurrent breast cancer [2-6]

AND

2 - Used in combination with one of the following: [3]

Trastuzumab

Xeloda (capecitabine)

Aromatase inhibitors [e.g., Aromasin (exemestane), Femara (letrozole), Arimidex (anastrozole)]

Product Name:Brand Tykerb, generic lapatinib	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Tymlos (abaloparatide injection)

Prior Authorization Guideline

Guideline ID	GL-228727
Guideline Name	Tymlos (abaloparatide injection)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tymlos (abaloparatide injection)
Postmenopausal women with osteoporosis at high risk of fracture Indicated for the treatment of postmenopausal women with osteoporosis at high risk for fracture defined as a history of osteoporotic fracture, multiple risk factors for fracture, or patients who have failed or are intolerant to other available osteoporosis therapy. In postmenopausal women with osteoporosis, Tymlos reduces the risk of vertebral fractures and nonvertebral fractures. **Increase Bone Density in Men with Osteoporosis at High Risk for Fracture** Indicated to increase bone density in men with osteoporosis at high risk for fracture (defined as a history of osteoporotic fracture or multiple risk factors for fracture), or patients who have failed or are intolerant to other available osteoporosis therapy.

2 . Criteria

Product Name:Tymlos	
Approval Length	24 month(s)*
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYMLOS	ABALOPARATIDE SUBCUTANEOUS SOLN PEN-INJECTOR 3120 MCG/1.56ML	3004400500D230	Brand

Approval Criteria

1 - One of the following diagnoses:

1.1 Postmenopausal osteoporosis or osteopenia

OR

1.2 Primary or hypogonadal osteoporosis or osteopenia

AND

2 - One of the following: [2,4,5]

2.1 For diagnosis of osteoporosis, both of the following:

2.1.1 Bone mineral density (BMD) T-score of -2.5 or lower in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.1.2 One of the following:

2.1.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.1.2.2 Trial and failure, contraindication, or intolerance to one osteoporosis treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab])

OR

2.2 For diagnosis of osteopenia, both of the following:

2.2.1 BMD T-score between -1.0 and -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.2.2 One of the following:

2.2.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.2.2.2 Both of the following:

2.2.2.2.1 Trial and failure, contraindication, or intolerance to one osteoporosis treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab])

AND

2.2.2.2.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities: [A]

Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions

Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

AND

3 - Treatment duration of parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) has not exceeded a total of 24 months during the patient's lifetime [1,2]	
Notes	Parathyroid hormones (e.g., teriparatide, Tymlos [abaloparatide]) not to exceed the FDA-recommended treatment duration of 2 years. *Tymlos will not be approved if the patient has already received 24 months of therapy; if the patient has not yet received 24 months of therapy, approval may be granted for the balance of the time remaining.

3 . Definitions

Definition	Description
Osteopenia [3]	The designation for bone density between 1.0 and 2.5 standard deviations below the mean BMD of a young adult reference population (T-score between − 1.0 and − 2.5).
Osteoporosis [3]	A chronic, progressive disease characterized by low bone mass, microarchitectural deterioration of bone tissue, decreased bone strength, bone fragility, and a consequent increase in fracture risk; BMD 2.5 or more standard deviations below the mean BMD of a young adult reference population (T-score at or below − 2.5).
T-score [3]	In describing BMD, the number of standard deviations above or below the mean BMD of a young adult reference population.

4 . Endnotes

The WHO FRAX tool is available at www.shef.ac.uk/FRAX and incorporates multiple clinical factors that predict fracture risk, largely independent of BMD. [2]

Prior Authorization Guideline

Guideline ID	GL-229166
Guideline Name	Tyrvaya (varenicline solution)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/15/2021
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Tyrvaya (varenicline solution) nasal spray
Dry Eye Disease Indicated for the treatment of the signs and symptoms of dry eye disease.

2 . Criteria

Product Name:Tyrvaya	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYRVAYA	VARENICLINE TARTRATE NASAL SOLN 0.03 MG/ACT	86280080202020	Brand

Approval Criteria

1 - Diagnosis of dry eye disease

AND

2 - Trial and failure, contraindication, or intolerance to at least one OTC ocular lubricant (e.g., artificial tears, lubricating gels/ointments) [B, 2-4]

AND

3 - Trial and failure, contraindication, or intolerance to one of the following:

Restasis (cyclosporine 0.05%)

Xiidra (lifitegrast)

AND

4 - Prescribed by or in consultation with one of the following:

Ophthalmologist

Optometrist

Product Name:Tyrvaya	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYRVAYA	VARENICLINE TARTRATE NASAL SOLN 0.03 MG/ACT	86280080202020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy. (e.g., increased tear production or improvement in dry eye symptoms)

3 . Endnotes

Traditional diagnostic tests include the Schirmer test, ocular surface dye staining, tear function index/fluorescein clearance test, tear break up time, tear film osmolarity, slit lamp evaluation of lid [2-4]

As disease severity increases, aqueous enhancement of the eye using topical agents is appropriate (e.g., emulsions, gels, ointments). Anti-inflammatory therapies (e.g., topical cyclosporine, corticosteroids), systemic omega-3 fatty acid supplements, punctal plugs, and eyeglass side shields/moisture chambers may also be considered in addition to aqueous enhancement therapies in patients who need additional symptom management [2-4]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229023
Guideline Name	Tysabri (natalizumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Tysabri (natalizumab)
Multiple Sclerosis (MS) Indicated as monotherapy for the treatment of relapsing forms of multiple sclerosis, to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults. Tysabri increases the risk of progressive multifocal leukoencephalopathy (PML). When initiating and continuing treatment with Tysabri, physicians should consider whether the expected benefit of Tysabri is sufficient to offset this risk. **Crohn's Disease (CD)** Indicated for inducing and maintaining clinical response and remission in adult patients with moderately to severely active CD with evidence of inflammation who have had an inadequate response to, or are unable to tolerate, conventional CD therapies and inhibitors of TNF-alpha. In CD, Tysabri should not be used in combination with immunosuppressants (e.g., 6-mercaptopurine, azathioprine, cyclosporine, or methotrexate) or inhibitors of TNF-alpha.

2 . Criteria

Product Name:Tysabri	
Diagnosis	Multiple Sclerosis (MS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYSABRI	NATALIZUMAB FOR IV INJ CONC 300 MG/15ML	62405050001320	Brand

Approval Criteria

1 - Diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [B]

AND

2 - One of the following:

2.1 Trial and failure (of a minimum 4-week supply), contraindication, or intolerance to one disease-modifying therapy for MS (e.g., Kesimpta [Ofatumumab], Mavenclad [Cladribine], Avonex [Interferon beta-1a], Betaseron [Interferon beta-1b], Mayzent [Siponimod], Zeposia [ozanimod])

OR

2.2 Patient is not a candidate for any of the drugs listed as prerequisites due to the severity of their multiple sclerosis [2]

OR

2.3 For continuation of prior therapy [2]

AND

3 - Not used in combination with another disease-modifying therapy for MS

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Tysabri	
Diagnosis	Multiple Sclerosis (MS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYSABRI	NATALIZUMAB FOR IV INJ CONC 300 MG/15ML	62405050001320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

AND

2 - Not used in combination with another disease-modifying therapy for MS

AND

3 - Prescribed by or in consultation with a neurologist

Product Name:Tysabri

Diagnosis	Crohn’s Disease (CD)
Approval Length	3 Months [D]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYSABRI	NATALIZUMAB FOR IV INJ CONC 300 MG/15ML	62405050001320	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - Crohn's disease has evidence of inflammation (e.g., elevated C-reactive protein [CRP], elevated erythrocyte sedimentation rate, presence of fecal leukocytes) [1,3]

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies [3, 7]:

corticosteroids (e.g., prednisone)

6-mercaptopurine

azathioprine

methotrexate

AND

4 - Trial and failure, contraindication, or intolerance to a tumor necrosis factor (TNF)-inhibitor (e.g., certolizumab pegol, adalimumab)

AND

5 - Not used in combination with TNF inhibitors (e.g., certolizumab pegol, adalimumab) or immunosuppressants (e.g., 6-MP, azathioprine, cyclosporine, or methotrexate) [A, C]

AND

6 - Prescribed by or in consultation with a gastroenterologist

Product Name:Tysabri	
Diagnosis	Crohn's Disease (CD)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TYSABRI	NATALIZUMAB FOR IV INJ CONC 300 MG/15ML	62405050001320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 3, 7]:

Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline

Reversal of high fecal output state

AND

2 - Not used in combination with TNF inhibitors (e.g., certolizumab pegol, adalimumab) or immunosuppressants (e.g., 6-MP, azathioprine, cyclosporine, or methotrexate) [A, C]

3 . Endnotes

To minimize the risk of progressive multifocal leukoencephalopathy, natalizumab must be administered as a monotherapy without concomitant immunosuppressive therapy. Aminosalicylates may be continued during treatment with Tysabri. [1, 3]

Of the four disease courses of MS, relapse-remitting MS (RRMS) is characterized primarily by relapse, while secondary-progressive MS (SPMS) has both relapsing and progressive characteristics. Most patients with RRMS eventually develop SPMS. As a person transitions from RRMS to SPMS, the disease begins to worsen more steadily, with or without occasional relapses, slight remissions, or plateaus. As long as the patient continues to have relapses, the SPMS course is considered to be both progressive and relapsing. [4]

In the postmarketing setting, additional cases of PML have been reported in multiple sclerosis and Crohn’s disease patients who were receiving no concomitant immunomodulatory therapy. Three factors that are known to increase the risk of PML in Tysabri-treated patients have been identified: 1) Longer treatment duration, especially beyond 2 years. 2) Prior treatment with an immunosuppressant (e.g., mitoxantrone, azathioprine, methotrexate, cyclophosphamide, mycophenolate mofetil). 3) The presence of anti-JCV antibodies. Patients who are anti-JCV antibody positive have a higher risk for developing PML. [1]

Tysabri should be discontinued in patients with Crohn’s disease who have not experienced therapeutic benefit by 12 weeks of induction therapy. For patients with Crohn’s disease who start Tysabri while on chronic oral corticosteroids, steroid tapering should begin as soon as a therapeutic benefit of Tysabri has occurred. Tysabri should be discontinued if patients cannot be tapered off of oral corticosteroids within six months of starting Tysabri. Other than the initial six-month taper, prescribers should consider discontinuing Tysabri for patients who require additional steroid use that exceeds three months in a calendar year to control their Crohn’s disease. [1]

Ultomiris (ravulizumab-cwvz)

Prior Authorization Guideline

Guideline ID	GL-229026
Guideline Name	Ultomiris (ravulizumab-cwvz)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ultomiris (ravulizumab-cwvz)
Paroxysmal Nocturnal Hemoglobinuria (PNH) Indicated for the treatment of patients one month of age and older with paroxysmal nocturnal hemoglobinuria (PNH). **Atypical Hemolytic Uremic Syndrome (aHUS)** Indicated for the treatment of adults and pediatric patients one month of age and older with atypical hemolytic uremic syndrome (aHUS) to inhibit complement-mediated thrombotic microangiopathy (TMA). Limitations of Use: Ultomiris is not indicated for the treatment of patients with Shiga toxin E. coli related hemolytic uremic syndrome (STEC-HUS). **Generalized Myasthenia Gravis (gMG)** Indicated for the treatment of adult patients with generalized myasthenia gravis (gMG) who are anti-acetylcholine receptor (AChR) antibody-positive. **Neuromyelitis Optica Spectrum Disorder** Indicated for the treatment of adult patients with neuromyelitis optica spectrum disorder (NMOSD) who are anti-aquaporin-4 (AQP4) antibody positive.

2 . Criteria

Product Name:Ultomiris	
Diagnosis	Paroxysmal Nocturnal Hemoglobinuria (PNH)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228568
Guideline Name	Unituxin (dinutuximab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Unituxin (dinutuximab)
Neuroblastoma Indicated, in combination with granulocyte-macrophage colony-stimulating factor (GM-CSF), interleukin-2 (IL-2), and 13-cis-retinoic acid (RA), for the treatment of pediatric patients with high-risk neuroblastoma who achieve at least a partial response to prior first-line multiagent, multimodality therapy.

2 . Criteria

Product Name:Unituxin	
Diagnosis	Neuroblastoma
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
UNITUXIN	DINUTUXIMAB IV SOLN 17.5 MG/5ML (3.5 MG/ML)	21356028002020	Brand

Approval Criteria

1 - Diagnosis of high-risk neuroblastoma

AND

2 - Used in combination with all of the following:

Granulocyte-macrophage colony-stimulating factor (GM-CSF) [e.g., Leukine (sargramostim)]

Interleukin-2 (IL-2) [e.g., Proleukin (aldesleukin)]

13-cis-retinoic acid (RA) [e.g., isotretinoin]

AND

3 - Patient responded to prior first-line multiagent, multimodality therapy (e.g., chemotherapy, surgery, stem cell transplant, radiation therapy)

AND

2 - Patient is anti-aquaporin-4 (AQP4) antibody positive

AND

3 - Prescribed by or in consultation with one of the following:

Neurologist

Ophthalmologist

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to rituximab

OR

4.2 For continuation of prior therapy

Product Name:Uplizna	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
UPLIZNA	INEBILIZUMAB-CDON IV SOLN 100 MG/10ML (10 MG/ML)	99405040202020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . References

Uplizna Prescribing Information. Horizon Therapeutics USA, Inc. Deerfield, IL. July 2021.

Prior Authorization Guideline

Guideline ID	GL-233217
Guideline Name	Upneeq (oxymetazoline hydrochloride)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/21/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Upneeq (oxymetazoline hydrochloride ophthalmic solution)
Blepharoptosis Indicated for the treatment of acquired blepharoptosis in adults.

2 . Criteria

Product Name:Upneeq	
Diagnosis	Cosmetic Purposes
Guideline Type	Excluded Use

Product Name	Generic Name	GPI	Brand/Generic
UPNEEQ	OXYMETAZOLINE HCL OPHTH SOLN 0.1%	86802236102020	Brand

Approval Criteria

1 - Requests for coverage of Upneeq when used solely for lifting the eyelid to improve appearance is not authorized and will not be approved. This use is considered cosmetic only.

Product Name:Upneeq	
Diagnosis	Blepharoptosis
Approval Length	6 Week(s) [1, 4]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
UPNEEQ	OXYMETAZOLINE HCL OPHTH SOLN 0.1%	86802236102020	Brand

Approval Criteria

1 - Both of the following:

Diagnosis of acquired blepharoptosis

Patient has obstructed visual field in primary gaze or down gaze due to blepharoptosis

AND

2 - One of the following: [2]

Marginal reflex distance-1 (MRD-1) is less than or equal to 2 mm in primary gaze

Marginal reflex distance-1 (MRD-1) is less than or equal to 2 mm in down gaze

Superior visual field loss of at least 12 degrees or 24 percent

AND

3 - Other treatable causes of blepharoptosis have been ruled out (e.g., recent botulinum toxin injection, myasthenia gravis)

AND

4 - Prescribed by or in consultation with an ophthalmologist or optometrist

Product Name:Upneeq	
Diagnosis	Blepharoptosis
Approval Length	6 Week(s) [1, 4]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
UPNEEQ	OXYMETAZOLINE HCL OPHTH SOLN 0.1%	86802236102020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in superior visual field, increase in Marginal reflex distance-1 [MRD-1])

AND

2 - One of the following: [2]

Marginal reflex distance-1 (MRD-1) is less than or equal to 2 mm in primary gaze

Marginal reflex distance-1 (MRD-1) is less than or equal to 2 mm in down gaze

Superior visual field loss of at least 12 degrees or 24 percent

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228572
Guideline Name	Urea Cycle Disorder Agents - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Buphenyl (sodium phenylbutyrate)
Urea cycle disorders (UCDs) Indicated as adjunctive therapy in the chronic management of patients with urea cycle disorders involving deficiencies of carbamylphosphate synthetase (CPS), ornithine transcarbamylase (OTC), or argininosuccinic acid synthetase (AS). It is indicated in all patients with neonatal-onset deficiency (complete enzymatic deficiency, presenting within the first 28 days of life). It is also indicated in patients with late-onset disease (partial enzymatic deficiency, presenting after the first month of life) who have a history of hyperammonemic encephalopathy. It is important that the diagnosis be made early and treatment initiated immediately to improve survival. Any episode of acute hyperammonemia should be treated as a life-threatening emergency.
Drug Name: Pheburane (sodium phenylbutyrate)
Urea cycle disorders (UCDs) Indicated as adjunctive therapy to standard of care, which includes dietary management, for the chronic management of adult and pediatric patients with urea cycle disorders (UCDs), involving deficiencies of carbamylphosphate synthetase (CPS), ornithine transcarbamylase (OTC) or argininosuccinic acid synthetase (AS). Limitations of use: Episodes of acute hyperammonemia may occur in patients while on Pheburane. Pheburane is not indicated for the treatment of acute hyperammonemia, which can be a life-

threatening medical emergency that requires rapid acting interventions to reduce plasma ammonia levels.

Drug Name: Ravicti (glycerol phenylbutyrate)

Urea cycle disorders (UCDs) Indicated for use as a nitrogen-binding agent for chronic management of patients with urea cycle disorders (UCDs) who cannot be managed by dietary protein restriction and/or amino acid supplementation alone. Ravicti must be used with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements). Limitations of use: Ravicti is not indicated for the treatment of acute hyperammonemia in patients with UCDs because more rapidly acting interventions are essential to reduce plasma ammonia levels. The safety and efficacy of Ravicti for the treatment of N-acetylglutamate synthase (NAGS) deficiency has not been established.

Drug Name: Olpruva (sodium phenylbutyrate)

Urea cycle disorders (UCDs) Indicated for use as a nitrogen-binding agent, as an adjunctive therapy to standard of care, which includes dietary management, for the chronic management of adult and pediatric patients weighing 20 kg or greater and with a body surface area (BSA) of 1.2 m or greater, with urea cycle disorders (UCDs) involving deficiencies of carbamylphosphate synthetase (CPS), ornithine transcarbamylase (OTC), or argininosuccinic acid synthetase (AS). Limitations of Use: Olpruva is not indicated for the treatment of acute hyperammonemia

2 . Criteria

Product Name:Brand Buphenyl, generic sodium phenylbutyrate tablet	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BUPHENYL	SODIUM PHENYLBUTYRATE TAB 500 MG	30908060000320	Brand
BUPHENYL	SODIUM PHENYLBUTYRATE ORAL POWDER 3 GM/TEASPOONFUL	30908060002950	Brand
SODIUM PHENYLBUTYRATE	SODIUM PHENYLBUTYRATE TAB 500 MG	30908060000320	Generic

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of urea cycle disorder (UCD)

AND

1.2 One of the following deficiencies:

carbamylphosphate synthetase (CPS)

ornithine transcarbamylase (OTC)

argininosuccinic acid synthetase (AS)

AND

2 - Molecular genetic testing confirms mutations in the CPS1, OTC, or ASS1 gene [2]

AND

3 - Trial and failure, or intolerance to generic sodium phenylbutyrate powder

AND

4 - Used as an adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

5 - Prescribed by or in consultation with a specialist focused on the treatment of metabolic disorders

Product Name:Pheburane	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PHEBURANE	SODIUM PHENYLBUTYRATE ORAL PELLETS 483 MG/GM	30908060008920	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of urea cycle disorder (UCD)

AND

1.2 One of the following deficiencies:

carbamylphosphate synthetase (CPS)

ornithine transcarbamylase (OTC)

argininosuccinic acid synthetase (AS)

AND

2 - Molecular genetic testing confirms mutations in the CPS1, OTC, or ASS1 gene [2]

AND

3 - Used as an adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

4 - Prescribed by or in consultation with a specialist focused on the treatment of metabolic disorders

Product Name:Olpruva, Ravicti	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RAVICTI	GLYCEROL PHENYLBUTYRATE LIQUID 1.1 GM/ML	30908030000920	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 2 GM THERAPY PACK	3090806000B120	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 3 GM THERAPY PACK	3090806000B130	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 4 GM THERAPY PACK	3090806000B140	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 5 GM THERAPY PACK	3090806000B150	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 6 GM THERAPY PACK	3090806000B160	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 6.67 GM THERAPY PACK	3090806000B170	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of urea cycle disorder (UCD)

AND

1.2 One of the following deficiencies:

carbamylphosphate synthetase (CPS)

ornithine transcarbamylase (OTC)

argininosuccinic acid synthetase (AS)

AND

2 - Molecular genetic testing confirms mutations in the CPS1, OTC, or ASS1 gene [2]

AND

3 - Inadequate response to one of the following:

Dietary protein restriction

Amino acid supplementation

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Patient is 18 years of age or older

AND

4.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

generic sodium phenylbutyrate powder

Pheburane

OR

4.2 Both of the following:

4.2.1 Patient is less than 18 years of age

AND

4.2.2 Trial and failure, contraindication or intolerance to one of the following:

Generic sodium phenylbutyrate powder

Pheburane

AND

5 - Used as an adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

6 - Prescribed by or in consultation with a specialist focused on the treatment of metabolic disorders

Product Name:Brand Buphenyl, generic sodium phenylbutyrate tablet, Pheburane	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BUPHENYL	SODIUM PHENYLBUTYRATE TAB 500 MG	30908060000320	Brand
BUPHENYL	SODIUM PHENYLBUTYRATE ORAL POWDER 3 GM/TEASPOONFUL	30908060002950	Brand
SODIUM PHENYLBUTYRATE	SODIUM PHENYLBUTYRATE TAB 500 MG	30908060000320	Generic
PHEBURANE	SODIUM PHENYLBUTYRATE ORAL PELLETS 483 MG/GM	30908060008920	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., plasma ammonia and amino acid levels within normal limits)

AND

2 - Used as an adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

3 - Trial and failure, or intolerance to generic sodium phenylbutyrate powder [Applies to Brand Buphenyl and generic sodium phenylbutyrate tablet only]

Product Name:Olpruva, Ravicti	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RAVICTI	GLYCEROL PHENYLBUTYRATE LIQUID 1.1 GM/ML	30908030000920	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 2 GM THERAPY PACK	3090806000B120	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 3 GM THERAPY PACK	3090806000B130	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 4 GM THERAPY PACK	3090806000B140	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 5 GM THERAPY PACK	3090806000B150	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 6 GM THERAPY PACK	3090806000B160	Brand
OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 6.67 GM THERAPY PACK	3090806000B170	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., plasma ammonia and amino acid levels within normal limits)

AND

2 - Used as an adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Patient is 18 years of age or older

AND

3.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

generic sodium phenylbutyrate powder

Pheburane

OR

3.2 Both of the following:

3.2.1 Patient is less than 18 years of age

AND

3.2.2 Trial and failure, contraindication or intolerance to one of the following:

generic sodium phenylbutyrate powder

Pheburane

Product Name:Buphenyl	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
BUPHENYL	SODIUM PHENYLBUTYRATE TAB 500 MG	30908060000320	Brand
BUPHENYL	SODIUM PHENYLBUTYRATE ORAL POWDER 3 GM/TEASPOONFUL	30908060002950	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming both of the following:

1.1 Diagnosis of urea cycle disorder (UCD)

AND

1.2 One of the following deficiencies:

carbamylphosphate synthetase (CPS)

ornithine transcarbamylase (OTC)

argininosuccinic acid synthetase (AS)

AND

2 - Submission of medical records (e.g., chart notes) confirming molecular genetic testing confirms mutations in the CPS1, OTC, or ASS1 gene [2]

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to generic sodium phenylbutyrate powder

AND

4 - Used as an adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

5 - Prescribed by or in consultation with a specialist focused on the treatment of metabolic disorders

Product Name:Olpruva, Ravicti	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

OLPRUVA	SODIUM PHENYLBUTYRATE PACKET FOR SUSP 6.67 GM THERAPY PACK	3090806000B170	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming both of the following:

1.1 Diagnosis of urea cycle disorder (UCD)

AND

1.2 One of the following deficiencies:

carbamylphosphate synthetase (CPS)

ornithine transcarbamylase (OTC)

argininosuccinic acid synthetase (AS)

AND

2 - Submission of medical records (e.g., chart notes) confirming molecular genetic testing confirms mutations in the CPS1, OTC, or ASS1 gene [2]

AND

3 - Inadequate response to one of the following:

Dietary protein restriction

Amino acid supplementation

AND

4 - One of the following:

4.1 All of the following:

4.1.1 ONE of the following:

Patient is new to Ravicti or Olpruva therapy

Patient has not previously been approved for Ravicti or Olpruva prior authorization with OptumRx

AND

4.1.2 ONE of the following:

4.1.2.1 Both of the following:

4.1.2.1.1 Patient is 18 years of age or older

AND

4.1.2.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to BOTH of the following:

generic sodium phenylbutyrate powder

Pheburane

OR

4.1.2.2 Both of the following:

4.1.2.2.1 Patient is less than 18 years of age

AND

4.1.2.2.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication or intolerance to one of the following:

Generic sodium phenylbutyrate powder

Pheburane

OR

4.2 All of the following:

Previously been approved for a prior authorization for Ravicti or or Olpruva

Patient demonstrates positive clinical response to therapy (e.g., plasma ammonia and amino acid levels within normal limits)

Used as adjunct with dietary protein restriction and, in some cases, dietary supplements (e.g., essential amino acids, arginine, citrulline, protein-free calorie supplements)

AND

5 - Prescribed by or in consultation with a specialist focused on the treatment of metabolic disorders

Prior Authorization Guideline

Guideline ID	GL-228729
Guideline Name	Vafseo (vadadustat) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vafseo (vadadustat)
Anemia Due to Chronic Kidney Disease Indicated for the treatment of anemia due to chronic kidney disease (CKD) in adults who have been receiving dialysis for at least three months. Limitations of Use:Not been shown to improve quality of life, fatigue, or patient well-being. Not indicated for use as a substitute for transfusion in patients requiring immediate correction of anemia or in patients with anemia due to CKD not on dialysis.

2 . Criteria

Product Name:Vafseo	
Approval Length	6 Months [A, 1]
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VAFSEO	VADADUSTAT TAB 150 MG	82402580000320	Brand
VAFSEO	VADADUSTAT TAB 300 MG	82402580000330	Brand

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Patient has been on dialysis for at least 3 months

AND

3 - Adequate iron stores confirmed by both of the following: [D, 1]

Patient's ferritin level is greater than 100mcg/L

Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - Hemoglobin level less than 11 g/dL

AND

5 - Trial and failure, contraindication or intolerance to one of the following: [B, 1]

Retacrit

Procrit

Aranesp

AND

6 - Prescribed by or in consultation with one of the following:

hematologist

nephrologist

AND

7 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

Product Name:Vafseo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VAFSEO	VADADUSTAT TAB 150 MG	82402580000320	Brand
VAFSEO	VADADUSTAT TAB 300 MG	82402580000330	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increase in hemoglobin)

AND

2 - Hemoglobin level does not exceed 11g/dL [C, 1]

AND

3 - Adequate iron stores confirmed by both of the following:

Patient's ferritin level is greater than 100mcg/L

Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - Trial and failure, contraindication or intolerance to one of the following:

Retacrit

Procrit

Aranesp

AND

5 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

Product Name:Vafseo	
Approval Length	6 Months [A, 1]
Therapy Stage	Initial Authorization
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

VAFSEO	VADADUSTAT TAB 300 MG	82402580000330	Brand

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Submission of medical records (e.g., chart notes) confirming patient has been on dialysis for at least 3 months

AND

3 - Submission of medical records (e.g., chart notes) confirming adequate iron stores by both of the following: [D, 1]

Patient's ferritin level is greater than 100mcg/L

Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - Submission of medical records (e.g., chart notes) confirming hemoglobin level less than 11 g/dL

AND

5 - One of the following:

5.1 Submission of medical records (e.g., chart notes) or paid claims confirming a minimum 12 -week trial and failure, to one of the following: [B, 1]

Retacrit

Procrit

Aranesp

OR

5.2 Submission of medical records (e.g., chart notes) confirming contraindication or intolerance to ALL of the following:

Retacrit

Procrit

Aranesp

AND

6 - Prescribed by or in consultation with one of the following:

hematologist

nephrologist

AND

7 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

Product Name:Vafseo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Non Formulary

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increase in hemoglobin)

AND

2 - Submission of medical records (e.g., chart notes) confirming hemoglobin level does not exceed 11g/dL [C, 1]

AND

3 - Submission of medical records (e.g., chart notes) confirming adequate iron stores by both of the following:

Patient's ferritin level is greater than 100mcg/L

Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - One of the following:

4.1 Submission of medical records (e.g., chart notes) or paid claims confirming a minimum 12 -week trial and failure, to one of the following:

Retacrit

Procrit

Aranesp

OR

4.2 Submission of medical records (e.g., chart notes) confirming contraindication or intolerance to ALL of the following:

Retacrit

Procrit

Aranesp

AND

5 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

3 . Endnotes

Efficacy in each study was based on the difference in mean change of Hb from baseline to the primary evaluation period (Weeks 24 to 36). [1]

In both the INNO2VATE-1 and INNO2VATE-2 trials, Vafseo was non-inferior to darbepoetin alfa in correcting and maintaining Hb levels. Recommended Starting Dose of Vafseo: Adults Not Being Treated with an ESA: The recommended starting dose is 300 mg orally once daily. Adults Being Switched from an ESA: When converting from an ESA to Vafseo, the recommended starting dose is 300 mg orally once daily. [1]

If the Hb level exceeds 11 g/dL, interrupt the dose of Vafseo until Hb is less than or equal to 11 g/dL then resume with a dose that is 150 mg less than the dose prior to interruption. [1]

Evaluate iron status in all patients before and during treatment. Administer supplemental iron therapy when serum ferritin is less than 100 mcg/L or when serum transferrin saturation is less than 20%. The majority of patients with CKD will require supplemental iron during the course of therapy. [1]

Prior Authorization Guideline

Guideline ID	GL-228575
Guideline Name	Valchlor (mechlorethamine gel)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Valchlor (mechlorethamine gel)
Mycosis fungoides-type cutaneous T-cell lymphoma (MF-CTCL) Indicated for the topical treatment of Stage IA and IB mycosis fungoides-type cutaneous T-cell lymphoma in patients who have received prior skin-directed therapy.

2 . Criteria

Product Name:Valchlor	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VALCHLOR	MECHLORETHAMINE HCL GEL 0.016% (BASE EQUIVALENT)	90371050204030	Brand

Approval Criteria

1 - One of the following diagnoses:

Stage IA mycosis fungoides-type cutaneous T-cell lymphoma (MF-CTCL)

Stage IB mycosis fungoides-type cutaneous T-cell lymphoma (MF-CTCL)

AND

2 - Patient has received at least one prior skin-directed therapy (e.g., topical corticosteroids [e.g., clobetasol, fluocinonide], phototherapy, bexarotene topical gel [Targretin topical gel], etc.)

Product Name:Valchlor	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VALCHLOR	MECHLORETHAMINE HCL GEL 0.016% (BASE EQUIVALENT)	90371050204030	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Prior Authorization Guideline

Guideline ID	GL-228577
Guideline Name	Vanflyta (quizartinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vanflyta (quizartinib)
Acute Myeloid Leukemia Indicated in combination with standard cytarabine and anthracycline induction and cytarabine consolidation, and as maintenance monotherapy following consolidation chemotherapy, for the treatment of adult patients with newly diagnosed acute myeloid leukemia (AML) that is FLT3 internal tandem duplication (ITD)-positive as detected by an FDA-approved test. Limitations of Use: Vanflyta is not indicated as maintenance monotherapy following allogeneic hematopoietic stem cell transplantation (HSCT); improvement in overall survival with Vanflyta in this setting has not been demonstrated.

2 . Criteria

Product Name:Vanflyta

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VANFLYTA	QUIZARTINIB DIHYDROCHLORIDE TAB 17.7 MG	21533047100320	Brand
VANFLYTA	QUIZARTINIB DIHYDROCHLORIDE TAB 26.5 MG	21533047100325	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Patient has a FMS-like tyrosine kinase 3 (FLT3) internal tandem duplication (FLT3-ITD) mutation as detected by a U.S. Food and Drug Administration (FDA)-approved test (e.g., LeukoStrat CDx FLT3 Mutation Assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Both of the following:

Used in combination with standard cytarabine and anthracycline (e.g., daunorubicin, idarubicin) induction and cytarabine consolidation

Used as maintenance monotherapy following consolidation chemotherapy

Product Name:Vanflyta	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

VANFLYTA	QUIZARTINIB DIHYDROCHLORIDE TAB 17.7 MG	21533047100320	Brand
VANFLYTA	QUIZARTINIB DIHYDROCHLORIDE TAB 26.5 MG	21533047100325	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Vanflyta Prescribing Information. Daiichi Sankyo, Inc., Basking Ridge. June 2024.

clinicaltrials.gov. Quizartinib With Standard of Care Chemotherapy and as Continuation Therapy in Patients With Newly Diagnosed FLT3-ITD (+) Acute Myeloid Leukemia (AML) (QuANTUM-First). Available at: https://clinicaltrials.gov/study/NCT02668653?term=nct02668653&rank=1. Accessed August 29, 2023.

Prior Authorization Guideline

Guideline ID	GL-228624
Guideline Name	Velsipity (etrasimod) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Velsipity (etrasimod)
Ulcerative Colitis (UC) Indicated for the treatment of moderately to severely active ulcerative colitis (UC) in adults.

2 . Criteria

Product Name:Velsipity	
Diagnosis	Ulcerative Colitis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VELSIPITY	ETRASIMOD ARGININE TAB 2 MG	52504525100350	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [2, 3]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, ESR, CRP)

Dependent on, or refractory to, corticosteroids

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to one of the following conventional therapies [2, 3]:

6-mercaptopurine

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

Azathioprine

Corticosteroids (e.g., prednisone)

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*:

One formulary adalimumab product

Simponi (golimumab)

Skyrizi (risankizumab-rzaa)

Stelara (ustekinumab)

Rinvoq (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

AND

4.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Zeposia (ozanimod)

OR

4.2 Both of the following:

4.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior Velsipity therapy, defined as no more than a 45-day gap in therapy

AND

4.2.2 Documentation of positive clinical response to therapy as evidenced by at least one of the following [1-3]:

Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline

Reversal of high fecal output state

AND

5 - Prescribed by or in consultation with a gastroenterologist

Notes	* Includes attestation that the patient has failed to respond to the TNF inhibitor mechanism of action in the past and should not be made to tr y a second TNF inhibitor. In this case, only a single step through a pre ferred agent is required. ** For review process only: Refer to the table in the Background sectio n for carrier-specific formulary adalimumab products

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/18/2023
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Veopoz (pozelimab-bbfg)
CD55-deficient protein-losing enteropathy (PLE) Indicated for the treatment of adult and pediatric patients 1 year of age and older with CD55-deficient protein-losing enteropathy (PLE), also known as CHAPLE disease.

2 . Criteria

Product Name:Veopoz	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VEOPOZ	POZELIMAB-BBFG INJ SOLN 400 MG/2ML	85805070152020	Brand

Approval Criteria

1 - Diagnosis of active CD55-deficient protein-losing enteropathy (PLE), also known as CHAPLE disease

AND

2 - Patient has a confirmed genotype of biallelic CD55 loss-of-function mutation

AND

3 - Patient is 1 year of age or older

AND

4 - Patient has hypoalbuminemia (serum albumin concentration of less than or equal to 3.2 g/dL)

AND

5 - Patient has at least one of the following signs or symptoms within the last six months:

abdominal pain

diarrhea

peripheral edema

facial edema

AND

6 - Prescribed by or in consultation with one of the following:

Immunologist

Geneticist

Hematologist

Gastroenterologist

Prior Authorization Guideline

Guideline ID	GL-228731
Guideline Name	Verkazia (cyclosporine ophthalmic emulsion 0.1%) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Verkazia (cyclosporine ophthalmic emulsion 0.1%)
Vernal Keratoconjunctivitis Indicated for the treatment of vernal keratoconjunctivitis in children and adults.

2 . Criteria

Product Name:Verkazia	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VERKAZIA	CYCLOSPORINE (OPHTH) EMULSION 0.1%	86720020001630	Brand

Approval Criteria

1 - Diagnosis of moderate to severe vernal keratoconjunctivitis confirmed by the presence of clinical signs and symptoms (e.g., itching, photophobia, giant papillae at the upper tarsal conjunctiva or at the limbus, thick mucus discharge, conjunctival hyperaemia) [A, 1, 2, 3]

AND

2 - Trial and failure, contraindication, or intolerance to ONE of the following:

Topical ophthalmic “dual-acting” mast cell stabilizer and antihistamine (e.g., olopatadine, azelastine)

Topical ophthalmic mast cell stabilizers (e.g., cromolyn)

AND

3 - Trial and failure, contraindication, or intolerance, for short term use (up to 2 to 3 weeks), of topical ophthalmic corticosteroids (e.g., dexamethasone, prednisolone, fluoromethalone)

AND

4 - Prescribed by or in consultation with ONE of the following: [B ,3]

Ophthalmologist

Optometrist

Product Name:Verkazia	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VERKAZIA	CYCLOSPORINE (OPHTH) EMULSION 0.1%	86720020001630	Brand

Approval Criteria

Product Name:Verkazia	
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
VERKAZIA	CYCLOSPORINE (OPHTH) EMULSION 0.1%	86720020001630	Brand

Approval Criteria

1 - Diagnosis of moderate to severe vernal keratoconjunctivitis confirmed by the presence of clinical signs and symptoms (e.g., itching, photophobia, giant papillae at the upper tarsal conjunctiva or at the limbus, thick mucus discharge, conjunctival hyperaemia) [A, 1, 2, 3]

AND

2 - Submission of medical records (e.g., chart notes) or paid claims confirming trial and failure, contraindication, or intolerance to ONE of the following:

Topical ophthalmic “dual-acting” mast cell stabilizer and antihistamine (e.g., olopatadine, azelastine)

Topical ophthalmic mast cell stabilizers (e.g., cromolyn)

AND

3 - Submission of medical records (e.g., chart notes) or paid claims confirming trial and failure, contraindication, or intolerance, for short term use (up to 2 to 3 weeks), of topical ophthalmic corticosteroids (e.g., dexamethasone, prednisolone, fluoromethalone)

AND

4 - Prescribed by or in consultation with ONE of the following: [B ,3]

Ophthalmologist

Optometrist

3 . Endnotes

No precise diagnostic criteria have been established for this disease. Diagnosis is based on typical clinical signs and symptoms; thus, many mild or atypical cases may escape diagnosis. The lack of standardized diagnostic criteria and lack of common language among physicians regarding the severity of VKC renders this disease more difficult to diagnose and treat. [2]

A short-term, high-dose pulse regimen of topical corticosteroids is often necessary in patients with VKC who fail to respond to two to three weeks of a dual-acting antihistamine/mast cell stabilizer, particularly those with significant seasonal exacerbations. Close follow-up with an ophthalmologist is required due to vision-threatening side effects of topical corticosteroids, such as glaucoma, cataracts, and secondary infections. Patients should know that blindness is a risk of unsupervised topical corticosteroid therapy. [3]

Prior Authorization Guideline

Guideline ID	GL-228581
Guideline Name	Verquvo (vericiguat)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Verquvo (vericiguat)
Chronic Heart Failure Indicated to reduce the risk of cardiovascular death and heart failure (HF) hospitalization following a hospitalization for heart failure or need for outpatient IV diuretics, in adults with symptomatic chronic HF and ejection fraction less than 45%.

2 . Criteria

Product Name:Verquvo	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VERQUVO	VERICIGUAT TAB 2.5 MG	40900085000321	Brand
VERQUVO	VERICIGUAT TAB 5 MG	40900085000330	Brand
VERQUVO	VERICIGUAT TAB 10 MG	40900085000340	Brand

Approval Criteria

1 - Diagnosis of chronic heart failure

AND

2 - Patient has an ejection fraction less than 45 percent

AND

3 - Patient has New York Heart Association (NYHA) Class II, III, or IV symptoms

AND

4 - One of the following:

4.1 Patient was hospitalized for heart failure within the last 6 months

OR

4.2 Patient used outpatient intravenous diuretics (e.g., bumetanide, furosemide) for heart failure within the last 3 months

AND

5 - Trial and failure, contraindication, or intolerance to all of the following at a maximally tolerated dose: [1-4]

5.1 One of the following:

Angiotensin converting enzyme (ACE) inhibitor (e.g., captopril, enalapril)

Angiotensin II receptor blocker (ARB) (e.g., candesartan, valsartan)

Angiotensin receptor-neprilysin inhibitor (ARNI) [e.g., Entresto (sacubitril and valsartan)]

AND

5.2 One of the following: [A, 4]

bisoprolol

carvedilol

metoprolol succinate extended-release

AND

5.3 Sodium-glucose co-transporter 2 (SGLT2) inhibitor [e.g., Jardiance (empagliflozin), Farxiga (dapagliflozin), Xigduo XR (dapagliflozin and metformn)]

AND

5.4 Mineralocorticoid receptor antagonist (MRA) [e.g., eplerenone, spironolactone]

AND

6 - Prescribed by or in consultation with a cardiologist

Product Name:Verquvo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VERQUVO	VERICIGUAT TAB 2.5 MG	40900085000321	Brand
VERQUVO	VERICIGUAT TAB 5 MG	40900085000330	Brand
VERQUVO	VERICIGUAT TAB 10 MG	40900085000340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

Per 2022 AHA/ACC/HFSA guideline for the management of Heart Failure, three beta blockers have been shown to be effective in reducing the risk of death in patients with HFrEF: bisoprolol, metoprolol succinate, and carvedilol. [4]

Prior Authorization Guideline

Guideline ID	GL-228734
Guideline Name	Vijoice (alpelisib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vijoice (alpelisib)
PIK3CA-Related Overgrowth Spectrum (PROS) Indicated for the treatment of adult and pediatric patients 2 years of age and older with severe manifestations of PIK3CA-Related Overgrowth Spectrum (PROS) who require systemic therapy. This indication is approved under accelerated approval based on response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Vijoice	
Approval Length	6 months [A]
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VIJOICE	ALPELISIB (PROS) TAB THERAPY PACK 50 MG DAILY DOSE	9948601000B720	Brand

Prior Authorization Guideline

Guideline ID	GL-229169
Guideline Name	Viltepso (viltolarsen) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/21/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Viltepso (viltolarsen)
Duchenne muscular dystrophy (DMD) Indicated for the treatment of Duchenne muscular dystrophy (DMD) in patients who have a confirmed mutation of the DMD gene that is amenable to exon 53 skipping. This indication is approved under accelerated approval based on an increase in dystrophin production in skeletal muscle observed in patients treated with Viltepso. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial.

2 . Criteria

Product Name:Viltepso

Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VILTEPSO	VILTOLARSEN IV SOLN 250 MG/5ML (50 MG/ML)	74600080002020	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of Duchenne muscular dystrophy (DMD)

AND

1.2 Confirmed mutation of the dystrophin gene amenable to exon 53 skipping

AND

2 - Patient is 4 years of age or older

AND

3 - Prescribed by or in consultation with a neurologist with expertise in the treatment of DMD

AND

4 - Dose will not exceed 80 milligrams per kilogram of body weight infused once weekly

AND

5 - Patient is ambulatory without needing an assistive device (e.g., without side-by-side assist, cane, walker, wheelchair) [2, 3]

Product Name:Viltepso	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VILTEPSO	VILTOLARSEN IV SOLN 250 MG/5ML (50 MG/ML)	74600080002020	Brand

Approval Criteria

1 - Patient is tolerating therapy

AND

2 - Dose will not exceed 80 milligrams per kilogram of body weight infused once weekly

AND

3 - Prescribed by or in consultation with a neurologist with expertise in the treatment of DMD

AND

4 - Patient is maintaining ambulatory status without needing an assistive device (e.g., without side-by-side assist, cane, walker, wheelchair)

Product Name:Viltepso	
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
VILTEPSO	VILTOLARSEN IV SOLN 250 MG/5ML (50 MG/ML)	74600080002020	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting both of the following:

1.1 Diagnosis of Duchenne muscular dystrophy (DMD)

AND

1.2 Confirmed mutation of the dystrophin gene amenable to exon 53 skipping

AND

2 - Patient is 4 years of age or older

AND

3 - Prescribed by or in consultation with a neurologist with expertise in the treatment of DMD

AND

4 - Dose will not exceed 80 milligrams per kilogram of body weight infused once weekly

AND

5 - Submission of medical records (e.g., chart notes, laboratory values) documenting the patient is ambulatory without needing an assistive device (e.g., without side-by-side assist, cane, walker, wheelchair) [2, 3]

Prior Authorization Guideline

Guideline ID	GL-228738
Guideline Name	Vimovo (naproxen/esomeprazole magnesium)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vimovo (naproxen/esomeprazole magnesium)
Osteoarthritis Indicated in adult and adolescent patients 12 years of age and older weighing at least 38 kg, requiring naproxen for symptomatic relief of arthritis and esomeprazole magnesium to decrease the risk for developing naproxen-associated gastric ulcers. The naproxen component is indicated for the relief of signs and symptoms of osteoarthritis in adults. Limitations of use: do not substitute Vimovo with the single-ingredient products of naproxen and esomeprazole magnesium. Vimovo is not recommended for initial treatment of acute pain because the absorption of naproxen is delayed compared to absorption from other naproxen-containing products. Controlled studies do not extend beyond 6 months. **Rheumatoid Arthritis** Indicated in adult and adolescent patients 12 years of age and older weighing at least 38 kg, requiring naproxen for symptomatic relief of arthritis and esomeprazole magnesium to decrease the risk for developing naproxen-associated gastric ulcers. The naproxen component is indicated for the relief of signs and symptoms of rheumatoid arthritis in adults. Limitations of use: do not substitute Vimovo with the single-ingredient products of naproxen and esomeprazole magnesium. Vimovo is not recommended for initial treatment of acute pain because the absorption of naproxen is delayed compared to absorption from other naproxen-containing products. Controlled studies do not extend beyond 6 months.

Ankylosing Spondylitis Indicated in adult and adolescent patients 12 years of age and older weighing at least 38 kg, requiring naproxen for symptomatic relief of arthritis and esomeprazole magnesium to decrease the risk for developing naproxen-associated gastric ulcers. The naproxen component is indicated for the relief of signs and symptoms of ankylosing spondylitis in adults. Limitations of use: do not substitute Vimovo with the single-ingredient products of naproxen and esomeprazole magnesium. Vimovo is not recommended for initial treatment of acute pain because the absorption of naproxen is delayed compared to absorption from other naproxen-containing products. Controlled studies do not extend beyond 6 months.

Juvenile idiopathic arthritis (JIA) Indicated in adult and adolescent patients 12 years of age and older weighing at least 38 kg, requiring naproxen for symptomatic relief of arthritis and esomeprazole magnesium to decrease the risk for developing naproxen-associated gastric ulcers. The naproxen component is indication for the relief of signs and symptoms juvenile idiopathic arthritis (JIA) in adolescent patients. Limitations of use: do not substitute Vimovo with the single-ingredient products of naproxen and esomeprazole magnesium. Vimovo is not recommended for initial treatment of acute pain because the absorption of naproxen is delayed compared to absorption from other naproxen-containing products. Controlled studies do not extend beyond 6 months.

Naproxen-associated gastric ulcers risk reduction Indicated in adult and adolescent patients 12 years of age and older weighing at least 38 kg, requiring naproxen for symptomatic relief of arthritis and esomeprazole magnesium to decrease the risk for developing naproxen-associated gastric ulcers. The esomeprazole magnesium component of Vimovo is indicated to decrease the risk of developing naproxen-associated gastric ulcers. Limitations of use: do not substitute Vimovo with the single-ingredient products of naproxen and esomeprazole magnesium. Vimovo is not recommended for initial treatment of acute pain because the absorption of naproxen is delayed compared to absorption from other naproxen-containing products. Controlled studies do not extend beyond 6 months.

2 . Criteria

Product Name:Brand Vimovo, Generic naproxen/esomeprazole magnesium	
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VIMOVO	NAPROXEN-ESOMEPRAZOLE MAGNESIUM TAB DR 375-20 MG	66109902440620	Brand
VIMOVO	NAPROXEN-ESOMEPRAZOLE MAGNESIUM TAB DR 500-20 MG	66109902440640	Brand

NAPROXEN-ESOMEPRAZOLE	NAPROXEN-ESOMEPRAZOLE MAGNESIUM TAB DR 500-20 MG	66109902440640	Generic

Approval Criteria

1 - One of the following diagnoses:

Osteoarthritis

Rheumatoid arthritis

Ankylosing spondylitis

Juvenile idiopathic arthritis

AND

2 - One of the following [2]:

History of peptic ulcer disease

History of gastrointestinal (GI) bleeding, obstruction, or perforation

Erosive esophagitis

Used in combination with aspirin

AND

3 - History of a minimum 30 day trial and failure, or intolerance to two of the following generics:

etodolac

fenoprofen

flurbiprofen

ibuprofen

indomethacin

naproxen

ketoprofen

ketorolac

meloxicam

nabumetone

oxaprozin

piroxicam

sulindac

tolmetin

diclofenac

AND

4 - History of a minimum 30 day trial and failure, or intolerance to two of the following generic proton pump inhibitors:

rabeprazole

esomeprazole

lansoprazole

omeprazole

pantoprazole

omeprazole/sodium bicarbonate

AND

5 - Physician has provided rationale for needing to use fixed-dose combination therapy with brand Vimovo or generic naproxen/esomeprazole magnesium instead of taking individual products in combination

Prior Authorization Guideline

Guideline ID	GL-228582
Guideline Name	Vitrakvi (larotrectinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vitrakvi (larotrectinib)
Solid Tumors Indicated for the treatment of adult and pediatric patients with solid tumors that have a neurotrophic receptor tyrosine kinase (NTRK) gene fusion without a known acquired resistance mutation and are metastatic or where surgical resection is likely to result in severe morbidity, and have no satisfactory alternative treatments or that have progressed following treatment.

2 . Criteria

Product Name:Vitrakvi	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VITRAKVI	LAROTRECTINIB SULFATE CAP 25 MG (BASE EQUIVALENT)	21533835200120	Brand
VITRAKVI	LAROTRECTINIB SULFATE CAP 100 MG (BASE EQUIVALENT)	21533835200150	Brand
VITRAKVI	LAROTRECTINIB SULFATE ORAL SOLN 20 MG/ML (BASE EQUIVALENT)	21533835202020	Brand

Approval Criteria

1 - Presence of solid tumors (e.g., salivary gland, soft tissue sarcoma, infantile fibrosarcoma, thyroid cancer, lung, melanoma, colon, etc.) with positive for neurotrophic receptor tyrosine kinase (NTRK) gene fusion (e.g. ETV6-NTRK3, TPM3-NTRK1, LMNA-NTRK1, etc.) [1]

AND

2 - Disease is without a known acquired resistance mutation [e.g., TRKA G595R substitution, TRKA G667C substitution, or other recurrent kinase domain (solvent front and xDFG) mutations] [1]

AND

3 - Disease is one of the following:

Metastatic

Unresectable (including cases where surgical resection is likely to result in severe morbidity)

AND

4 - One of the following:

Disease has progressed on previous treatment (e.g., surgery, radiotherapy, or systemic therapy)

Disease has no satisfactory alternative treatments

Product Name:Vitrakvi	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Vonjo (pacritinib)

Prior Authorization Guideline

Guideline ID	GL-228739
Guideline Name	Vonjo (pacritinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vonjo (pacritinib)
Primary or Secondary Myelofibrosis Indicated for the treatment of adults with intermediate or high-risk primary or secondary (post-polycythemia vera or post-essential thrombocythemia) myelofibrosis with a platelet count below 50 x 10^9/L.

2 . Criteria

Product Name:Vonjo	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VONJO	PACRITINIB CITRATE CAP 100 MG	21537550100120	Brand

Approval Criteria

1 - Diagnosis of ONE of the following:[1]

Primary myelofibrosis

Post-polycythemia vera myelofibrosis

Post-essential thrombocythemia myelofibrosis

AND

2 - Disease is intermediate or high risk [1]

AND

3 - Pre-treatment platelet count below 50 x 10^9/L [1]

Product Name:Vonjo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VONJO	PACRITINIB CITRATE CAP 100 MG	21537550100120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., symptom improvement, spleen volume reduction)

3 . Endnotes

There is no "gold standard" for the diagnosis of PMF, although criteria have been proposed by the Italian Society of Hematology, the World Health Organization (WHO), and others [4]

Secondary myelofibrosis refers to myelofibrosis that develops after polycythemia vera (PV) or essential thrombocythemia (ET). Our approach to evaluation and management of secondary myelofibrosis follows the suggestions for PMF [4]

Prior Authorization Guideline

Guideline ID	GL-228742
Guideline Name	Vonoprazan Containing Agents
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Voquezna Dual Pak (vonoprazan, amoxicillin)
Helicobacter pylori (H. pylori) Indicated for the treatment of Helicobacter pylori (H. pylori) in adults.
Drug Name: Voquezna Triple Pak (vonoprazan, amoxicillin, clarithromycin)
Helicobacter pylori (H. pylori) Indicated for the treatment of Helicobacter pylori (H. pylori) in adults.
Drug Name: Voquezna (vonoprazan)
Healing and Relief of Heartburn associated with Erosive Esophagitis Indicated for healing of all grades of erosive esophagitis and relief of heartburn associated with erosive esophagitis in adults. **Maintenance of Healing and Relief of Heartburn associated with Erosive Esophagitis** Indicated to maintain healing of all grades of erosive esophagitis and relief of heartburn associated with erosive esophagitis in adults.

Helicobacter pylori (H. pylori) Indicated in combination with amoxicillin and clarithromycin or in combination with amoxicillin for the treatment of H. pylori infection in adults.

Relief of Heartburn Associated with Non-Erosive Gastroesophageal Reflux Disease (NERD) Indicated for the relief of heartburn associated with non-erosive gastroesophageal reflux disease in adults.

2 . Criteria

Product Name:Voquezna Dual Pak, Voquezna Triple Pak	
Diagnosis	Helicobacter pylori (H. pylori) Infection
Approval Length	1 month [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOQUEZNA DUAL PAK	AMOXICILLIN CAP 500 MG & VONOPRAZAN TAB 20 MG THERAPY PACK	4999320220B120	Brand
VOQUEZNA TRIPLE PAK	AMOXICILLIN CAP & CLARITHROMYCIN TAB & VONOPRAZAN TAB PACK	4999320320B120	Brand

Approval Criteria

1 - Diagnosis of Helicobacter pylori infection

AND

2 - Trial and failure, contraindication, or intolerance to ONE of the following first line treatment regimens [B, C, 1, 3]

Clarithromycin based therapy (e.g., clarithromycin based triple therapy, clarithromycin based concomitant therapy) [D]

Bismuth quadruple therapy (e.g., bismuth and metronidazole and tetracycline and proton pump inhibitor [PPI])

Product Name:Voquezna 20mg tablet	
Diagnosis	Helicobacter pylori (H. pylori) Infection
Approval Length	1 month [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOQUEZNA	VONOPRAZAN FUMARATE TAB 20 MG (BASE EQUIV)	49275087100340	Brand

Approval Criteria

1 - Diagnosis of Helicobacter pylori infection

AND

2 - One of the following:

Used in combination with amoxicillin and clarithromycin for the treatment of H. pylori infection

Used in combination with amoxicillin for the treatment of H. pylori infection

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following first line treatment regimens [B, C, 1, 3]

Clarithromycin based therapy (e.g., clarithromycin based triple therapy, clarithromycin based concomitant therapy) [D]

Bismuth quadruple therapy (e.g., bismuth and metronidazole and tetracycline and proton pump inhibitor [PPI])

Product Name:Voquezna 20mg tablet	
Diagnosis	Healing and Relief of Heartburn associated with Erosive Esophagitis
Approval Length	8 Week(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOQUEZNA	VONOPRAZAN FUMARATE TAB 20 MG (BASE EQUIV)	49275087100340	Brand

Approval Criteria

1 - Diagnosis of erosive esophagitis

AND

2 - Used for healing of all grades of erosive esophagitis and relief of heartburn associated with erosive esophagitis [E, 2, 6]

AND

3 - Trial (of a minimum 8-week supply) and inadequate response (within the last 365 days), contraindication, or intolerance to TWO of the following generic proton pump inhibitors (PPI's) [F, 9]

omeprazole

esomeprazole

pantoprazole

lansoprazole

rabeprazole

dexlansoprazole

Product Name:Voquezna 10mg tablet	
Diagnosis	Maintenance of Healing and Relief of Heartburn associated with Erosive Esophagitis
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOQUEZNA	VONOPRAZAN FUMARATE TAB 10 MG (BASE EQUIV)	49275087100320	Brand

Approval Criteria

1 - Used to maintain healing and relief of heartburn associated with erosive esophagitis

AND

2 - Trial (of a minimum 8-week supply) and inadequate response (within the last 365 days), contraindication, or intolerance to TWO of the following generic proton pump inhibitors (PPI's) [F, 9]

omeprazole

esomeprazole

pantoprazole

lansoprazole

rabeprazole

dexlansoprazole

Product Name:Voquezna 10mg tablet	
Diagnosis	Relief of Heartburn associated with Non-Erosive Gastroesophageal Reflux Disease
Approval Length	1 Month [G, 2]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOQUEZNA	VONOPRAZAN FUMARATE TAB 10 MG	49275087100320	Brand

Approval Criteria

1 - Diagnosis of non-erosive Gastroesophageal Reflux Disease

AND

2 - Both of the following: [M, 2, 14]

Patient has history of heartburn for at least 6 months

Heartburn symptoms are present for at least 4 days during any consecutive 7-day period

AND

3 - Trial (of a minimum 8-week supply) and inadequate response (within the last 365 days), contraindication, or intolerance to TWO of the following generic proton pump inhibitors (PPI's) [H-L,15-18]

omeprazole

esomeprazole

pantoprazole

lansoprazole

rabeprazole

dexlansoprazole

3 . Endnotes

H. pylori is an infectious disease that is typically treated with combinations of 2–3 antibiotics along with a PPI, taken concomitantly or sequentially. Current guidelines recommend extended (10 to 14 days) treatment with all antibiotic regimens for H. pylori. [1]

The American College of Gastroenterology, (ACG) treatment guideline for first-line and salvage therapies was last updated in 2017. The 2017 ACG guideline outlines evidence-based, frontline treatment strategies for providers in North America. These include clarithromycin triple therapy, bismuth quadruple therapy, concomitant therapy, sequential therapy, hybrid therapy, levofloxacin triple therapy. Due to the complexity of treatment,

hybrid therapy as first line treatment is limited. Sequential therapy is also complex, and it is not uniformly endorsed as first line treatment. Due to the rising rates of levofloxacin resistance, levofloxacin should not be used for treatment, unless the H. pylori strain is known to be sensitive to it or if levofloxacin resistance rates are known to be less than 15 %. Studies evaluating the efficacy of levofloxacin containing regimens in North America are lacking. In clinical practice, the initial course of eradication therapy, heretofore referred to as “first-line” therapy, generally offers the greatest likelihood of treatment success. Thus, careful attention to the selection of the most appropriate first-line eradication therapy for an individual patient is essential. The ACG guidelines for the treatment of H pylori recommend several regimens for 1st line eradication therapy with no preference of 1 regimen over another. Therapy is individualized based on patient's previous antibiotic history and local resistance patterns. [1, 4]

In the selection of the most appropriate empiric treatment regimen for H pylori, previous antibiotic exposure, regional antibiotic-resistance patterns, and eradication rates should be taken into consideration because these factors can impact successful treatment. Successful treatment also relies on host factors such as allergies and adherence. [3]

Clarithromycin triple therapy consists of a PPI, clarithromycin, and amoxicillin or metronidazole. Clarithromycin based concomitant therapy consists of a PPI, amoxicillin, clarithromycin, and a nitroimidazole (e.g., tinidazole or metronidazole) [1, 4]

Esophagitis will be graded according to the LA Classification of Esophagitis, Grades A to D [2,6]

PPI's are recommended for the healing and maintenance of healing from erosive esophagitis. Meta-analyses suggest that overall GERD symptom relief and healing rates differ little among the available PPIs. There is conceptual rationale for a trial of switching PPIs for patients who have not responded to one PPI. For patients who have not responded to one PPI, more than one switch to another PPI cannot be supported. [9]

The effectiveness and safety of Voquezna was evaluated in a randomized, placebo-controlled, double-blind, four-week efficacy trial with a 20-week safety extension. [2]

Acid-suppressive therapy with proton-pump inhibitors (PPIs) is a mainstay in the treatment of non-erosive Gastroesophageal Reflux Disease. [15]

Proton pump inhibitors (PPIs) have been shown to be superior to histamine-2–receptor antagonists in patients with NERD. [16]

Treatment for NERD is similar to that for erosive GERD. [17]

For patients with classic GERD symptoms of heartburn and regurgitation who have no alarm symptoms, we recommend an 8-week trial of empiric proton pump inhibitor (PPI) once daily before a meal. We recommend attempting to discontinue the PPIs in patients whose classic GERD symptoms respond to an 8-week empiric trial of PPIs. For GERD patients who do not have erosive esophagitis or Barrett’s esophagus, and whose symptoms have resolved with PPI therapy, an attempt should be made to discontinue PPIs or to switch to on-demand therapy in which PPIs are taken only when symptoms occur and discontinued when they are relieved. [18]

PPIs are the most commonly prescribed medication based on ample data demonstrating consistently superior heartburn and regurgitation relief, as well as improved healing compared to H2RAs. Studies on GERD treatment typically last only 8-12 weeks, in part because symptom relief and healing appear to peak in that time frame. In some cases, patients with NERD and otherwise non-complicated GERD can be managed successfully with on-demand or intermittent PPI therapy. Switching PPIs can be considered for patients who experience minor side PPI effects including headache, abdominal pain, nausea, vomiting, diarrhea, constipation and flatulence. [18]

Per clinical trials, patient had to have history of heartburn for at least 6 months and heartburn was present on at least 4 or more days during any consecutive 7-day period. [14]

Voranigo (Vorasidenib)

Prior Authorization Guideline

Guideline ID	GL-229110
Guideline Name	Voranigo (Vorasidenib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/16/2024
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Voranigo (Vorasidenib)
Astrocytoma or Oligodendroglioma Indicated for the treatment of adult and pediatric patients 12 years and older with Grade 2 astrocytoma or oligodendroglioma with a susceptible IDH1 or IDH2 mutation following surgery including biopsy, sub-total resection, or gross total resection.

2 . Criteria

Product Name:Voranigo	
Diagnosis	Grade 2 Astrocytoma or Oligodendroglioma

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VORANIGO	VORASIDENIB TAB 10 MG	21535180000320	Brand
VORANIGO	VORASIDENIB TAB 40 MG	21535180000340	Brand

Approval Criteria

1 - One of the following diagnoses:

1.1 Astrocytoma

OR

1.2 Oligodendroglioma

AND

2 - Presence of a susceptible isocitrate dehydrogenase-1 (IDH1) or isocitrate dehydrogenase-2 (IDH2) mutation as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - History of one of the following:

Biopsy

Sub-total resection

Gross total resection

AND

4 - Patient is 12 years of age or older

Product Name:Voranigo	
Diagnosis	Grade 2 Astrocytoma or Oligodendroglioma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228584
Guideline Name	Vosevi (sofosbuvir/velpatasvir/voxilaprevir)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vosevi (sofosbuvir/velpatasvir/voxilaprevir)
Chronic Hepatitis C (CHC) Indicated for the treatment of adult patients with chronic hepatitis C virus (HCV) infection without cirrhosis or with compensated cirrhosis (Child-Pugh A) who have: • Genotype 1, 2, 3, 4, 5, or 6 infection and have previously been treated with an HCV regimen containing an NS5A inhibitor. • Genotype 1a or 3 infection and have previously been treated with an HCV regimen containing sofosbuvir without an NS5A inhibitor. (Additional benefit of Vosevi over sofosbuvir/velpatasvir was not shown in adults with genotype 1b, 2, 4, 5, or 6 infection previously treated with sofosbuvir without an NS5A inhibitor.)

2 . Criteria

Product Name:Vosevi (sofosbuvir/velpatasvir/voxilaprevir)

Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; without Decompensated Cirrhosis; Prior Relapser to NS5A-Based Regimen
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOSEVI	SOFOSBUVIR-VELPATASVIR-VOXILAPREVIR TAB 400-100-100 MG	1235990380033	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient is a previous relapser to an NS5A-based regimen (e.g., Daklinza [daclatasvir]; Epclusa [sofosbuvir/velpatasvir]; Harvoni [ledipasvir/sofosbuvir]; Mavyret [glecaprevir/pibrentasvir]; Technivie [ombitasvir/paritaprevir/ritonavir]; Viekira [ombitasvir/paritaprevir/ritonavir & dasabuvir]; Zepatier [elbasvir/grazoprevir])

AND

3 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Vosevi (sofosbuvir/velpatasvir/voxilaprevir)	
Diagnosis	Chronic Hepatitis C - Genotype 1a or 3; without Decompensated Cirrhosis; Prior Relapser to Sofosbuvir-Based Regimen without an NS5A Inhibitor
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOSEVI	SOFOSBUVIR-VELPATASVIR-VOXILAPREVIR TAB 400-100-100 MG	12359903800330	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1a or 3

AND

2 - Patient is a previous relapser to a sofosbuvir-based regimen without an NS5A inhibitor

AND

3 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Product Name:Vosevi (sofosbuvir/velpatasvir/voxilaprevir)	
Diagnosis	Chronic Hepatitis C - Genotype 1, 2, 3, 4, 5, or 6; without Decompensated Cirrhosis; Prior Failure to Vosevi
Approval Length	24 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOSEVI	SOFOSBUVIR-VELPATASVIR-VOXILAPREVIR TAB 400-100-100 MG	12359903800330	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1, 2, 3, 4, 5, or 6

AND

2 - Patient had a prior treatment failure with Vosevi (sofosbuvir/velpatasvir/voxilaprevir) [2]

AND

3 - Used in combination with ribavirin [2]

AND

4 - Patient is without decompensated liver disease (e.g., Child-Pugh Class B or C)

AND

5 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir)]

Prior Authorization Guideline

Guideline ID	GL-229031
Guideline Name	Votrient (pazopanib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Votrient (pazopanib)
Renal Cell Carcinoma (RCC) Indicated for the treatment of patients with advanced renal cell carcinoma (RCC). **Soft tissue sarcoma (STS)** Indicated for the treatment of patients with advanced soft tissue sarcoma (STS) who have received prior chemotherapy. Limitation of Use: The efficacy of Votrient for the treatment of patients with adipocytic STS or gastrointestinal stromal tumors has not been demonstrated.

2 . Criteria

Product Name:Brand Votrient, Generic pazopanib	
Diagnosis	Renal Cell Carcinoma (RCC)

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOTRIENT	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Brand
PAZOPANIB HYDROCHLORIDE	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Generic

Approval Criteria

1 - Diagnosis of renal cell carcinoma

AND

2 - One of the following: [2]

Disease has relapsed

Diagnosis of stage IV disease

AND

3 - Trial and failure, or intolerance to generic pazopanib (applies to brand Votrient only)

AND

4 - One of the following: [2]

4.1 One of the following:

4.1.1 Both of the following:

Used in the treatment of non-clear cell renal cell carcinoma

Trial and failure, contraindication or intolerance to generic sunitinib

OR

4.1.2 For continuation of prior therapy

OR

4.2 Patient has clear cell renal cell carcinoma

Product Name:Brand Votrient, Generic pazopanib	
Diagnosis	Renal Cell Carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOTRIENT	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Brand
PAZOPANIB HYDROCHLORIDE	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Trial and failure, or intolerance to generic pazopanib (applies to brand Votrient only)

AND

3 - One of the following:

3.1 One of the following:

3.1.1 Both of the following:

Used in the treatment of non-clear cell renal cell carcinoma

Trial and failure, contraindication or intolerance to generic sunitinib

OR

3.1.2 For continuation of prior therapy

OR

3.2 Patient has clear cell renal cell carcinoma

Product Name:Brand Votrient, Generic pazopanib	
Diagnosis	Soft tissue sarcoma (STS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOTRIENT	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Brand
PAZOPANIB HYDROCHLORIDE	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Generic

Approval Criteria

1 - Diagnosis of advanced soft tissue sarcoma (STS) [4, A]

AND

2 - Trial and failure, or intolerance to generic pazopanib (Applies to Brand Votrient only)

Product Name:Brand Votrient, Generic pazopanib	
Diagnosis	Soft tissue sarcoma (STS)

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOTRIENT	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Brand
PAZOPANIB HYDROCHLORIDE	PAZOPANIB HCL TAB 200 MG (BASE EQUIV)	21533042100320	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Trial and failure, or intolerance to generic pazopanib (Applies to Brand Votrient only)

3 . Endnotes

Votrient is an active drug in anthracycline pretreated STS patients with an increase in median PFS of 13 weeks. [3]

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228586
Guideline Name	Voxzogo (vosoritide)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Voxzogo (vosoritide)
Increase linear growth in pediatric patients with achondroplasia Indicated to increase linear growth in pediatric patients with achondroplasia with open epiphyses. This indication is approved under accelerated approval based on an improvement in annualized growth velocity. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trial(s).

2 . Criteria

Product Name:Voxzogo	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOXZOGO	VOSORITIDE FOR SUBCUTANEOUS INJ 0.4 MG	30950080002120	Brand
VOXZOGO	VOSORITIDE FOR SUBCUTANEOUS INJ 0.56 MG	30950080002130	Brand
VOXZOGO	VOSORITIDE FOR SUBCUTANEOUS INJ 1.2 MG	30950080002140	Brand

Approval Criteria

1 - Patient has open epiphyses

AND

2 - Diagnosis of achondroplasia as confirmed by one of the following: [2, 3]

2.1 Both of the following:

2.1.1 Patient has clinical manifestations characteristic of achondroplasia (e.g., macrocephaly, frontal bossing, midface retrusion, disproportionate short stature with rhizomelic shortening of the arms and the legs, brachydactyly, trident configuration of the hands, thoracolumbar kyphosis, and accentuated lumbar lordosis)

AND

2.1.2 Patient has radiographic findings characteristic of achondroplasia (e.g., large calvaria and narrowing of the foramen magnum region, undertubulated, shortened long bones with metaphyseal abnormalities, narrowing of the interpedicular distance of the caudal spine, square ilia and horizontal acetabula, small sacrosciatic notches, proximal scooping of the femoral metaphyses, and short and narrow chest)

OR

2.2 Molecular genetic testing confirmed c.1138G>A or c.1138G>C variant (i.e., p.Gly380Arg mutation) in the fibroblast growth factor receptor-3 (FGFR3) gene

AND

3 - Patient did not have limb-lengthening surgery in the previous 18 months and does not plan on having limb-lengthening surgery while on Voxzogo therapy

AND

4 - Prescribed by or in consultation with one of the following:

Clinical geneticist

Endocrinologist

A physician who has specialized expertise in the management of achondroplasia

Product Name:Voxzogo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOXZOGO	VOSORITIDE FOR SUBCUTANEOUS INJ 0.4 MG	30950080002120	Brand
VOXZOGO	VOSORITIDE FOR SUBCUTANEOUS INJ 0.56 MG	30950080002130	Brand
VOXZOGO	VOSORITIDE FOR SUBCUTANEOUS INJ 1.2 MG	30950080002140	Brand

Approval Criteria

1 - Patient continues to have open epiphyses

AND

2 - Patient demonstrates positive clinical response to therapy as evidenced by one of the following:

Improvement in annualized growth velocity (AGV) compared to baseline

Improvement in height Z-score compared to baseline

AND

3 - Prescribed by or in consultation with one of the following:

Clinical geneticist

Endocrinologist

A physician who has specialized expertise in the management of achondroplasia

Voydeya (danicopan)

Prior Authorization Guideline

Guideline ID	GL-233333
Guideline Name	Voydeya (danicopan)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	2/18/2025
P&T Approval Date:	5/16/2024
P&T Revision Date:	6/19/2024

1 . Indications

Drug Name: Voydeya (danicopan)
Paroxysmal Nocturnal Hemoglobinuria (PNH) Indicated as add-on therapy to ravulizumab or eculizumab for the treatment of extravascular hemolysis (EVH) in adults with paroxysmal nocturnal hemoglobinuria (PNH). Limitations of Use: Voydeya has not been shown to be effective as monotherapy and should only be prescribed as an add-on to ravulizumab or eculizumab.

2 . Criteria

Product Name:Voydeya

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOYDEYA	DANICOPAN TAB THERAPY PACK 50 MG & 100 MG	8580852000B720	Brand
VOYDEYA	DANICOPAN TAB 100 MG	85808520000320	Brand

Approval Criteria

1 - Diagnosis of paroxysmal nocturnal hemoglobinuria (PNH)

AND

2 - Will be used as add-on therapy to Ultomiris (ravulizumab) or Soliris (eculizumab)

AND

3 - Hemoglobin levels less than or equal to 9.5 g/dL

AND

4 - Absolute reticulocyte count greater than or equal to 120 × 10^9 /L

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Voydeya	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOYDEYA	DANICOPAN TAB THERAPY PACK 50 MG & 100 MG	8580852000B720	Brand
VOYDEYA	DANICOPAN TAB 100 MG	85808520000320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., hemoglobin stabilization, decrease in the number of red blood cell transfusions)

AND

2 - Will be used as add-on therapy to Ultomiris (ravulizumab) or Soliris (eculizumab)

Prior Authorization Guideline

Guideline ID	GL-229033
Guideline Name	Vyndaqel (tafamidis meglumine), Vyndamax (tafamidis)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Vyndaqel (tafamidis meglumine), Vyndamax (tafamidis)
Transthyretin-mediated amyloidosis with cardiomyopathy (ATTR-CM) Indicated for the treatment of the cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (ATTR-CM) in adults to reduce cardiovascular mortality and cardiovascular-related hospitalization.

2 . Criteria

Product Name:Vyndaqel, Vyndamax	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VYNDAQEL	TAFAMIDIS MEGLUMINE (CARDIAC) CAP 20 MG	40550080200120	Brand
VYNDAMAX	TAFAMIDIS CAP 61 MG	40550080000120	Brand

Approval Criteria

1 - Diagnosis of transthyretin-mediated amyloidosis with cardiomyopathy (ATTR-CM)

AND

2 - One of the following: [3, 4]

2.1 Patient has a transthyretin (TTR) mutation (e.g., V122I)

OR

2.2 Cardiac or noncardiac tissue biopsy demonstrating histologic confirmation of TTR amyloid deposits

OR

2.3 All of the following:

Echocardiogram or cardiac magnetic resonance imaging suggestive of amyloidosis

Scintigraphy scan suggestive of cardiac TTR amyloidosis

Absence of light-chain amyloidosis

AND

3 - One of the following: [2]

History of heart failure, with at least one prior hospitalization for heart failure

Presence of clinical signs and symptoms of heart failure (e.g., dyspnea, edema)

AND

4 - Patient has New York Heart Association (NYHA) Functional Class I, II, or III heart failure [2]

AND

5 - Requested drug is not used in combination with a TTR silencer (e.g., Amvuttra) or a TTR stabilizer (e.g., Diflunisal)

AND

6 - Prescribed by or in consultation with a cardiologist

Product Name:Vyndaqel, Vyndamax

Approval Criteria

1 - Diagnosis of chronic inflammatory demyelinating polyneuropathy (CIDP) as confirmed by all of the following [3]:

1.1 Progressive symptoms present for at least 2 months

AND

1.2 Symptomatic polyradiculoneuropathy as indicated by one of the following:

1.2.1 Progressive or relapsing motor impairment of more than one limb

OR

1.2.2 Progressive or relapsing sensory impairment of more than one limb

AND

1.3 Electrophysiologic findings when three of the following four criteria are present:

Partial conduction block of 1 or more motor nerve

Reduced conduction velocity of 2 or more motor nerves

Prolonged distal latency of 2 or more motor nerves

Prolonged F-wave latencies of 2 or more motor nerves or the absence of F waves

AND

2 - Trial and failure, contraindication, or intolerance to one of the following standard of care treatments [3][4]:

Corticosteroids (minimum 3 month trial duration)

Immunoglobulin

Plasma exchange

AND

3 - Prescribed by or in consultation with one of the following:

Immunologist

Neurologist

Hematologist

Product Name:Vyvgart Hytrulo	
Diagnosis	Chronic inflammatory demyelinating polyneuropathy (CIDP)

Prior Authorization Guideline

Guideline ID	GL-233400
Guideline Name	Wainua (eplontersen)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	3/20/2024
P&T Revision Date:	2/20/2025

1 . Indications

Drug Name: Wainua (eplontersen)
Hereditary transthyretin-mediated amyloidosis Indicated for the treatment of the polyneuropathy of hereditary transthyretin-mediated amyloidosis in adults.

2 . Criteria

Product Name:Wainua	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WAINUA	EPLONTERSEN SODIUM SUBCUTANEOUS SOLN AUTO-INJ 45 MG/0.8ML	6270102510D520	Brand

Approval Criteria

1 - Diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR amyloidosis) with polyneuropathy

AND

2 - Presence of a transthyretin (TTR) mutation (e.g., V30M) as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [1]

AND

3 - One of the following [2, 3]:

Patient has a baseline familial amyloidotic polyneuropathy (FAP) stage of 1 or 2

Patient has a baseline neuropathy impairment score (NIS) greater than or equal to 10 and less than or equal to 130

Patient has a baseline Karnofsky Performance Status score greater than 50%

AND

4 - Presence of clinical signs and symptoms of the disease (e.g., neuropathy, quality of life) [2]

AND

5 - Patient has not had a liver transplant [2, 3]

AND

6 - Requested drug is not used in combination with a TTR silencer (e.g., Amvuttra) or a TTR stabilizer (e.g., Vyndaqel)

AND

7 - Prescribed by or in consultation with a neurologist

Product Name:Wainua	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WAINUA	EPLONTERSEN SODIUM SUBCUTANEOUS SOLN AUTO-INJ 45 MG/0.8ML	6270102510D520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improved quality of life, decreased serum TTR level)

AND

2 - One of the following [2, 3]:

Patient continues to have a familial amyloidotic polyneuropathy (FAP) stage of 1 or 2

Patient continues to have a neuropathy impairment score (NIS) greater than or equal to 10 and less than or equal to 130

Patient continues to have a Karnofsky Performance Status score greater than 50%

AND

3 - Patient has not had a liver transplant [2, 3]

AND

4 - Requested drug is not used in combination with a TTR silencer (e.g., Amvuttra) or a TTR stabilizer (e.g., Vyndaqel)

4 . Revision History

Date	Notes
3/14/2025	Quartz guideline copied to mirrow Optumrx

Prior Authorization Guideline

Guideline ID	GL-228748
Guideline Name	Wakix (pitolisant)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Wakix (pitolisant)
Narcolepsy with Cataplexy (i.e., Narcolepsy Type 1) Indicated for the treatment of cataplexy in adult patients with narcolepsy. **Narcolepsy without Cataplexy (i.e., Narcolepsy Type 2)** Indicated for the treatment of excessive daytime sleepiness (EDS) in pediatric patients 6 years of age and older with narcolepsy.

2 . Criteria

Product Name:Wakix	
Diagnosis	Narcolepsy with Cataplexy (i.e., Narcolepsy Type 1)
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WAKIX	PITOLISANT HCL TAB 4.45 MG (BASE EQUIVALENT)	61450070100318	Brand
WAKIX	PITOLISANT HCL TAB 17.8 MG (BASE EQUIVALENT)	61450070100338	Brand

Approval Criteria

1 - Diagnosis of narcolepsy as confirmed by sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible)

AND

2 - Symptoms of cataplexy are present

AND

3 - Symptoms of excessive daytime sleepiness (e.g., irrepressible need to sleep or daytime lapses into sleep) are present

AND

4 - Prescribed by or in consultation with one of the following:

Neurologist

Psychiatrist

Sleep Medicine Specialist

Product Name:Wakix	
Diagnosis	Narcolepsy with Cataplexy (i.e., Narcolepsy Type 1)
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WAKIX	PITOLISANT HCL TAB 4.45 MG (BASE EQUIVALENT)	61450070100318	Brand
WAKIX	PITOLISANT HCL TAB 17.8 MG (BASE EQUIVALENT)	61450070100338	Brand

Approval Criteria

1 - Patient demonstrates a reduction in the frequency of cataplexy attacks associated with therapy

OR

2 - Patient demonstrates a reduction in symptoms of excessive daytime sleepiness associated with therapy

Product Name:Wakix	
Diagnosis	Narcolepsy without cataplexy (Narcolepsy Type 2)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WAKIX	PITOLISANT HCL TAB 4.45 MG (BASE EQUIVALENT)	61450070100318	Brand
WAKIX	PITOLISANT HCL TAB 17.8 MG (BASE EQUIVALENT)	61450070100338	Brand

Approval Criteria

1 - Diagnosis of narcolepsy as confirmed by sleep study (unless the prescriber provides justification confirming that a sleep study would not be feasible) [A, B]

AND

2 - Symptoms of cataplexy are absent

AND

3 - Patient is 6 years of age or older

AND

4 - Symptoms of excessive daytime sleepiness (e.g., irrepressible need to sleep or daytime lapses into sleep) are present

AND

5 - BOTH of the following:

5.1 Trial and failure, contraindication (e.g., age), or intolerance to BOTH of the following:

Generic modafinil or armodafinil

Sunosi

AND

5.2 Trial and failure, contraindication, or intolerance to an amphetamine (e.g., amphetamine, dextroamphetamine) or methylphenidate based stimulant UNLESS patient is not a candidate

AND

6 - Prescribed by or in consultation with one of the following:

Neurologist

Psychiatrist

Sleep Medicine Specialist

Product Name:Wakix	
Diagnosis	Narcolepsy without cataplexy (Narcolepsy Type 2)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WAKIX	PITOLISANT HCL TAB 4.45 MG (BASE EQUIVALENT)	61450070100318	Brand
WAKIX	PITOLISANT HCL TAB 17.8 MG (BASE EQUIVALENT)	61450070100338	Brand

Approval Criteria

1 - Patient demonstrates a reduction in symptoms of excessive daytime sleepiness associated with therapy

AND

2 - BOTH of the following:

2.1 Trial and failure, contraindication (e.g., age), or intolerance to BOTH of the following:

Generic modafinil or armodafinil

Sunosi

AND

2.2 Trial and failure, contraindication, or intolerance to an amphetamine (e.g., amphetamine, dextroamphetamine) or methylphenidate based stimulant UNLESS patient is not a candidate

3 . Endnotes

International Classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy type 1 (narcolepsy with cataplexy) require: 1) Daily periods of irrepressible need to sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) occurring for at least 3 months. 2) The presence of one or both of the following: cataplexy and a mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques. A SOREMP (within 15 minutes of sleep onset) on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT; or cerebrospinal fluid (CSF) hypocretin-1 concentration is low (less than or equal to 110 pg/mL or less than one-third of mean values obtained in normal subjects with the same standardized assay) [2,3].

International Classification of Sleep Disorders (ICSD-3) diagnostic criteria for narcolepsy type 2 (narcolepsy without cataplexy) include: 1) Daily periods of irrepressible need to sleep or daytime lapses into sleep (i.e., excessive daytime sleepiness) occurring for at least 3 months. 2) Cataplexy is absent. 3) CSF hypocretin-1 levels, if measured, is either greater than 100 pg/mL or greater than one-third of mean values obtained in normal subjects with the same standardized assay. 4) A mean sleep latency of less than or equal to 8 minutes and 2 or more sleep onset REM periods (SOREMPs) on a multiple sleep latency test (MSLT) performed using standard techniques. A SOREMP (within 15 minutes of sleep onset) on the preceding nocturnal polysomnogram may replace 1 of the SOREMPs on the MSLT. 5) Hypersomnolence and/or MSLT findings are not better explained by other causes such as insufficient sleep, obstructive sleep apnea, delayed sleep phase disorder, or the effect of medication or substances or their withdrawal [2,3].

Prior Authorization Guideline

Guideline ID	GL-233221
Guideline Name	Welireg (belzutifan)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/18/2021
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Welireg (belzutifan)
Von Hippel-Lindau (VHL) disease Indicated for treatment of adult patients with von Hippel-Lindau (VHL) disease who require therapy for associated renal cell carcinoma (RCC), central nervous system (CNS) hemangioblastomas, or pancreatic neuroendocrine tumors (pNET), not requiring immediate surgery **Advanced Renal Cell Carcinoma (RCC)** Indicated for treatment of adult patients with advanced renal cell carcinoma (RCC) following a programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor and a vascular endothelial growth factor tyrosine kinase inhibitor (VEGF-TKI).

2 . Criteria

Product Name:Welireg	
Diagnosis	von Hippel-Lindau (VHL) disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WELIREG	BELZUTIFAN TAB 40 MG	21421020000320	Brand

Approval Criteria

1 - Diagnosis of von Hippel-Lindau (VHL) disease [A, 1]

AND

2 - Patient requires therapy for one of the following [A, 1] :

Renal cell carcinoma (RCC)

Central nervous system (CNS) hemangioblastoma

Pancreatic neuroendocrine tumor (pNET)

AND

3 - Patient does not require immediate surgery [A,1]

Product Name:Welireg	
Diagnosis	von Hippel-Lindau (VHL) disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WELIREG	BELZUTIFAN TAB 40 MG	21421020000320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy [A, 1]

Product Name:Welireg	
Diagnosis	Advanced Renal Cell Carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WELIREG	BELZUTIFAN TAB 40 MG	21421020000320	Brand

Approval Criteria

1 - Diagnosis of advanced renal cell carcinoma

AND

2 - Disease has progressed after treatment with both of the following:

2.1 One of the following:

Programmed death receptor-1 (PD-1) inhibitor [e.g., Keytruda (pembrolizumab), Opdivo (nivolumab)]

Programmed death-ligand 1 (PD-L1) inhibitor [e.g., Bavencio (avelumab), Imfinzi (durvalumab)]

AND

2.2 Vascular endothelial growth factor tyrosine kinase inhibitor (VEGF-TKI) [e.g., Votrient (pazopanib), Inlyta (axitinib)]

Product Name:Welireg	
Diagnosis	Advanced Renal Cell Carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
WELIREG	BELZUTIFAN TAB 40 MG	21421020000320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

The efficacy of WELIREG was evaluated in Study 004 (NCT03401788), an open-label clinical trial in 61 patients with VHL-associated RCC diagnosed based on a VHL germline alteration and with at least one measurable solid tumor localized to the kidney as defined by response evaluation criteria in solid tumors (RECIST) v1.1. Enrolled patients had other VHL-associated tumors including CNS hemangioblastomas and pNET. CNS hemangioblastomas and pNET in these patients were diagnosed based on the presence of at least one measurable solid tumor in brain/spine or pancreas, respectively, as defined by RECIST v1.1 and identified by IRC. The study excluded patients with metastatic disease. Patients received WELIREG 120 mg once daily until progression of disease or unacceptable toxicity. The study population characteristics were: median age 41 years [range 19-66 years], 3.3% age 65 or older; 53% male; 90% were White, 3.3% were Black or AfricanAmerican, 1.6% were Asian, and 1.6% were Native Hawaiian or other Pacific Islander; 82% had an ECOG PS of 0, 16% had an ECOG PS of 1, and 1.6% had an ECOG PS of 2; and 84% had VHL Type I Disease. The median diameter of RCC target lesions per central independent review committee (IRC) was 2.2 cm (range 1-6.1). Median time from initial radiographic diagnosis of VHL-associated RCC tumors that led to enrollment on Study 004 to the time of treatment with WELIREG was 17.9 months (range 2.8-96.7). Seventy- seven percent of patients had prior surgical procedures for RCC. The major efficacy endpoint for the treatment of VHL-associated RCC was overall response rate (ORR) measured by radiology assessment

using RECIST v1.1 as assessed by IRC. Additional efficacy endpoints included duration of response (DoR), and time to response (TTR).

1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229035
Guideline Name	Xalkori (crizotinib) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xalkori (crizotinib)
Non-small cell lung cancer (NSCLC) Indicated for the treatment of patients with metastatic non-small cell lung cancer (NSCLC) whose tumors are anaplastic lymphoma kinase (ALK)- or ROS1-positive as detected by an FDA-approved test. **Anaplastic Large Cell Lymphoma (ALCL)** Indicated for the treatment of pediatric patients 1 year of age and older and young adults with relapsed or refractory, systemic anaplastic large cell lymphoma (ALCL) that is ALK-positive. Limitations of use: The safety and efficacy of Xalkori have not been established in older adults with relapsed or refractory, systemic ALK-positive ALCL. **Inflammatory Myofibroblastic Tumor** Indicated for the treatment of adult and pediatric patients 1 year of age and older with unresectable, recurrent, or refractory inflammatory myofibroblastic tumor (IMT) that is ALK-positive.

2 . Criteria

Product Name:Xalkori	
Diagnosis	Non-small Cell Lung Cancer (NSCLC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XALKORI	CRIZOTINIB CAP 200 MG	21530517000120	Brand
XALKORI	CRIZOTINIB CAP 250 MG	21530517000125	Brand
XALKORI	CRIZOTINIB CAP SPRINKLE 20 MG	21530517006820	Brand

XALKORI	CRIZOTINIB CAP SPRINKLE 150 MG	21530517006850	Brand

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer (NSCLC)

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Patient has an anaplastic lymphoma kinase (ALK)-positive tumor as detected with a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

2.1.2 One of the following:

2.1.2.1 Patient has had disease progression on, contraindication or intolerance to, or is not a candidate for one of the following:

Alecensa (alectinib)

Alunbrig (brugatinib)

OR

2.1.2.2 For continuation of therapy

OR

2.2 Patient has ROS1 rearrangements-positive tumor as detected with a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

Product Name:Xalkori

Collarettes [B, 2]

Eyelid margin erythema

Eyelash anomalies (e.g., eyelash misdirection)

AND

3 - Submission of medical records (e.g., chart notes) confirming that patient is experiencing symptoms or architectural changes associated with Demodex infestation (e.g., burning, tearing, itching, foreign body sensation, eyelashes missing, eyelashes growing inward) [C, 3]

AND

4 - Submission of medical records (e.g., chart notes) confirming trial and inadequate response (minimum 6 weeks) to tea tree-oil [D-E, I, 3-4, 10-11]

AND

5 - Symptoms persist despite practicing good eye-lid hygiene (e.g.,treatment with warm compress, eyelid cleansing, artificial tears, non-prescription tree-tea oil)

AND

6 - Prescribed by or in consultation with one of the following:

Ophthalmologist

Optometrist

3 . Definitions

Definition	Description
Collarettes	Solidified exudative excretions that form a cylindrical collar around the base of the eyelash follicle - are the pathognomonic sign of Demodex blepharitis [2].

4 . Endnotes

Xdemvy kills the "adult" mite. However, the product does not kill the eggs. The life cycle of the mite is about 27 days. The eggs will hatch. If stop prior to this, those 2nd generation mites won't be killed. Need 2 or 3 generations to eradicate mites and eggs that will hatch. Multiple courses of treatment may be necessary. The physician would re-evaluate patient after 3 months not 6 weeks. Goal of treatment is to get to a threshold below where the patient is not experiencing symptoms. Mites live on clothes, pillowcases, sheets so re-infection possible. For this reason, difficult to eradicate to where there are "zero" mites.[3]

Collarettes are often referred to in the literature as cylindrical dandruff (CD), sleeves, cuffs, crusting, or lash debris [2]

If Demodex is not overpopulated and not causing problem can leave it alone; if burning, tearing, itching, foreign body sensation, etc. or architectural changes in lid, eyelashes missing, eyelashes grow inward (scratching cornea, scarring), consider treating the Demodex blepharitis [3]

Tea Tree Oil has been the standard treatment. It suppresses the mite and tricks the mite into coming out of its buried status in the skin. Mites are nocturnal, so they are embedded during the day and come out at night. Tea tree oil is available in shampoos, soaps, and

specific ocular products (e.g., Cliradex 10% wipes or foam) and are available OTC. Cliradex 50% is available and is used as an in office procedure since higher concentrations can be very irritating to the eyes and skin [3]

In general, topical formulations containing tea tree oil were reported to be effective in reducing the number of Demodex mites on eyelashes. Other emerging treatment options include anti-parasitic drugs and IPL, but there is currently limited high-quality evidence to ascertain the efficacy of these treatments for ocular Demodex with any certainty. [4]

Because patients with Demodex blepharitis can often be asymptomatic, it is important to begin every clinical evaluation at the slit lamp with the patient's eyes closed for a better view of the superior lid and lash margin, looking for the presence of collarettes. [7]

Slit-lamp examination is all an eye care provider needs to do to make the diagnosis [8]

Several conditions such as rosacea, MGD, and DED often occur with DB [52–55]. Since clinically these conditions are often very similar, the panel concurred that DB is frequently underdiagnosed or misdiagnosed. The consensus, therefore, was that all patients presenting for an eye exam should be evaluated for collarettes, especially those with lid abnormalities or those not responding to treatment for DED or MGD. DEPTH panellists shared that slit lamp examination with the patient looking down is simple and easy to incorporate into routine exams. [9]

It has been recommended to use tea tree oil treatments for at least two Demodex mite life cycles (i.e. approximately six weeks) in order to ensure adequate killing of the parasite [10]

6 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229039
Guideline Name	Xeljanz, Xeljanz XR (tofacitinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xeljanz (tofacitinib) tablets, Xeljanz XR (tofacitinib) extended-release tablets
Rheumatoid Arthritis (RA) Indicated for the treatment of adult patients with moderately to severely active rheumatoid arthritis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Xeljanz/Xeljanz XR in combination with biologic disease-modifying antirheumatic drugs (DMARDs) or with potent immunosuppressants such as azathioprine and cyclosporine is not recommended. **Psoriatic Arthritis (PsA)** Indicated for the treatment of adult patients with active psoriatic arthritis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Xeljanz/Xeljanz XR in combination with biologic DMARDs or with potent immunosuppressants such as azathioprine and cyclosporine is not recommended. **Ankylosing Spondylitis (AS)** Indicated for the treatment of adult patients with active ankylosing spondylitis who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Xeljanz/Xeljanz XR in combination with biologic DMARDs or with potent immunosuppressants such as azathioprine and cyclosporine is not recommended.

Ulcerative Colitis (UC) Indicated for the treatment of adult patients with moderately to severely active ulcerative colitis, who have an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Xeljanz/Xeljanz XR in combination with biological therapies for UC or with potent immunosuppressants such as azathioprine and cyclosporine is not recommended.

Drug Name: Xeljanz (tofacitinib) tablets and oral solution

Polyarticular Course Juvenile Idiopathic Arthritis Indicated for the treatment of active polyarticular course juvenile idiopathic arthritis (pcJIA) in patients 2 years of age and older who have had an inadequate response or intolerance to one or more TNF blockers. Limitations of Use: Use of Xeljanz in combination with biologic DMARDs or with potent immunosuppressants such as azathioprine and cyclosporine is not recommended.

2 . Criteria

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

methotrexate

leflunomide

sulfasalazine

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - Not used in combination with other Janus kinase (JAK) inhibitors, biologic disease-modifying antirheumatic drugs (DMARDs), or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand

XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets and oral solution	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE ORAL SOLN 1 MG/ML (BASE EQUIVALENT)	66603065102020	Brand

Approval Criteria

1 - Diagnosis of active polyarticular course juvenile idiopathic arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 6-week trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [4]:

leflunomide

methotrexate

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, etanercept)

AND

5 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets and oral solution	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE ORAL SOLN 1 MG/ML (BASE EQUIVALENT)	66603065102020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis (PsA)

AND

2 - One of the following [5]:

Actively inflamed joints

Dactylitis

Enthesitis

Axial disease

Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

Dermatologist

Rheumatologist

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 5]:

Reduction in the total active (swollen and tender) joint count from baseline

Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline

Reduction in the body surface area (BSA) involvement from baseline

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [6]

AND

4 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

AND

5 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topi cal or inhaled corticosteroids, and/or low stable dosages of oral cortic osteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 6]:

Disease activity (e.g., pain, fatigue, inflammation, stiffness)

Lab values (erythrocyte sedimentation rate, C-reactive protein level)

Function

Axial status (e.g., lumbar spine motion, chest expansion)

Total active (swollen and tender) joint count

AND

2 - Not used in combination with other JAK inhibitors, biologic DMARDs, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets

Diagnosis	Ulcerative Colitis (UC)
Approval Length	4 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 22 MG (BASE EQUIVALENT)	66603065107550	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [7, 8]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, ESR, CRP)

Dependent on, or refractory to, corticosteroids

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [7, 8]:

6-mercaptopurine

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

Azathioprine

Corticosteroids (e.g., prednisone)

AND

4 - Prescribed by or in consultation with a gastroenterologist

AND

5 - Patient has had an inadequate response or intolerance to one or more TNF inhibitors (e.g., adalimumab, golimumab)

AND

6 - Not used in combination with other JAK inhibitors, biological therapies for UC, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topi cal or inhaled corticosteroids, and/or low stable dosages of oral cortic osteroids (equivalent to 10 mg or less of prednisone daily).

Product Name:Xeljanz tablets or Xeljanz XR tablets	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XELJANZ	TOFACITINIB CITRATE TAB 5 MG (BASE EQUIVALENT)	66603065100320	Brand
XELJANZ	TOFACITINIB CITRATE TAB 10 MG (BASE EQUIVALENT)	66603065100330	Brand

XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 11 MG (BASE EQUIVALENT)	66603065107530	Brand
XELJANZ XR	TOFACITINIB CITRATE TAB ER 24HR 22 MG (BASE EQUIVALENT)	66603065107550	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 7, 8]:

Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline

Reversal of high fecal output state

AND

2 - Not used in combination with other JAK inhibitors, biological therapies for UC, or potent immunosuppressants (e.g., azathioprine, cyclosporine)*

Notes	*Xeljanz/Xeljanz XR may be used with concomitant methotrexate, topical or inhaled corticosteroids, and/or low stable dosages of oral corticosteroids (equivalent to 10 mg or less of prednisone daily).

3 . Endnotes

Initial approval length of 4 months based on dosing recommendation provided in the labeling of Xeljanz 10 mg twice daily or Xeljanz XR 22 mg once daily for at least 8 weeks, followed by Xeljanz 5 mg once or twice daily, 10 mg twice daily, or Xeljanz XR 11 mg once daily depending on therapeutic response. Xeljanz should be discontinued after 16 weeks (4 months) of treatment with Xeljanz 10 mg twice daily or Xeljanz XR 22 mg once daily if adequate therapeutic response is not achieved.

TETRABENAZINE	TETRABENAZINE TAB 25 MG	62380070000320	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

Verified with consultant for a previous medication (Ingrezza [valbenazine]) that dose reduction, tapering, or discontinuation of the offending medication is considered first-line treatment for tardive dyskinesia. [5]

Authorization period is based on the pivotal study duration of 12 weeks. [1]

Ensures the requirement for proper diagnosing and quantifying an adequate chorea score (total maximal chorea score of greater than or equal to 10 (moderate to severe chorea) from the subscale of the Unified Huntington's Disease Rating Scale (UHDRS). Note that the pivotal trial that established efficacy of tetrabenazine included patients with a total maximal chorea of greater than or equal to 10. [1]

Prior Authorization Guideline

Guideline ID	GL-228749
Guideline Name	Xeomin (incobotulinumtoxinA)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xeomin (incobotulinumtoxinA)
Blepharospasm Indicated for the treatment of blepharospasm in adults. **Cervical Dystonia** Indicated for the treatment of cervical dystonia in adults. **Chronic Sialorrhea** Indicated for the treatment of chronic sialorrhea in patients 2 years of age and older. **Adult Upper Limb Spasticity** Indicated for the treatment of upper limb spasticity in adults. **Pediatric Upper Limb Spasticity** Indicated for the treatment of upper limb spasticity in pediatric patients 2 to 17 years of age, excluding spasticity caused by cerebral palsy. **Cosmetic Uses [Non-approvable Use]** Is indicated for the temporary improvement in the appearance of moderate to severe glabellar lines associated with corrugator and/or procerus muscle activity in adults. *Note: Use of Xeomin for the improvement in the appearance of glabellar lines is excluded, as this is considered a cosmetic use.

2 . Criteria

Product Name:Xeomin	
Diagnosis	Cervical Dystonia (also known as spasmodic torticollis)
Approval Length	3 months [A]

2 - At least 4 months have elapsed or will have elapsed since the last treatment [E]

Product Name:Xeomin	
Diagnosis	Cosmetic Use
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XEOMIN	INCOBOTULINUMTOXINA FOR INJ 50 UNIT	74400020202120	Brand
XEOMIN	INCOBOTULINUMTOXINA FOR INJ 100 UNIT	74400020202130	Brand

XEOMIN	INCOBOTULINUMTOXINA FOR IM INJ 200 UNIT	74400020202140	Brand

Approval Criteria

1 - Requests for coverage of any Xeomin product for treating the appearance of facial lines are not authorized and will not be approved. These uses are considered cosmetic only.

3 . Endnotes

In a randomized, double-blind, active-controlled, parallel group study, 463 patients with a documented stable therapeutic response to Botox as a result of the last two consecutive injection sessions directly prior to trial entry (70 to 300 Units) were included. Patients in the study received IM injections of 70 to 300 Units of Xeomin or Botox, based on the previous two consecutive doses of Botox prior to study entry. [2]

The total initial dose of Xeomin in both eyes should not exceed 50 Units (25 Units/eye). [1]

The median onset of treatment effect with incobotulinumtoxinA was 4 days (range, 0 to 30 days), time to waning of treatment effect was 6 weeks (range 1 to 15 weeks), and duration of treatment effect was 10.6 weeks (range, 6.1 to 19.1 weeks). [4]

The typical duration of effect of each treatment is up to 12-16 weeks; however, the duration of effect may vary in individual patients. [1]

The timing for repeat treatment of chronic sialorrhea should be determined based on the actual clinical need of the individual patient, and no sooner than every 16 weeks (4 months). [1]

Prior Authorization Guideline

Guideline ID	GL-233197
Guideline Name	Xermelo (telotristat ethyl)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	4/26/2017
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Xermelo (telotristat ethyl)
Carcinoid syndrome diarrhea Indicated for the treatment of carcinoid syndrome diarrhea in combination with somatostatin analog (SSA) therapy in adults inadequately controlled by SSA therapy.

2 . Criteria

Product Name:Xermelo	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XERMELO	TELOTRISTAT ETIPRATE TAB 250 MG (TELOTRISTAT ETHYL EQUIV)	52570075100330	Brand

Approval Criteria

1 - Diagnosis of carcinoid syndrome diarrhea

AND

2 - Diarrhea is inadequately controlled by a stable dose of somatostatin analog (SSA) therapy (e.g., octreotide [Sandostatin, Sandostatin LAR], lanreotide [Somatuline Depot]) for at least 3 months [A,B,1-6]

AND

3 - Used in combination with SSA therapy

AND

4 - Prescribed by or in consultation with one of the following:

Oncologist

Endocrinologist

Gastroenterologist

Product Name:Xermelo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XERMELO	TELOTRISTAT ETIPRATE TAB 250 MG (TELOTRISTAT ETHYL EQUIV)	52570075100330	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy [C,D,6,7]

AND

2 - Medication will continue to be used in combination with SSA therapy

3 . Endnotes

In the pivotal trial population, patients were experiencing 4 to 12 bowel movements (BM) daily despite the use of SSA therapy (e.g., octreotide, lanreotide) at a stable dose for at least 3 months [1].

Diarrhea is often chronic with carcinoid syndrome, in about 80% of cases, and can occur up to 30 times a day. SSA therapy provides symptomatic relief in 50 to 70% of patients. [2].

In an open label extension of the TELESTAR trial, bowel movement (BM) reductions were consistent with the results from the double-blind trial period [6].

Long-term safety and efficacy were demonstrated in the open label extension study. Throughout the up to 6 years of follow up, patients experienced symptomatic relief but no new safety concerns [7].

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229044
Guideline Name	Xgeva (denosumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xgeva (denosumab)
Multiple myeloma and Bone metastasis from solid tumors Indicated for the prevention of skeletal-related events in patients with multiple myeloma and in patients with bone metastases from solid tumors. **Giant cell tumor of bone** Indicated for the treatment of adults and skeletally mature adolescents with giant cell tumor of bone that is unresectable or where surgical resection is likely to result in severe morbidity. **Hypercalcemia of malignancy** Indicated for the treatment of hypercalcemia of malignancy refractory to bisphosphonate therapy.

2 . Criteria

Product Name:Xgeva	
Diagnosis	Skeletal prevention in multiple myeloma and bone metastasis from solid tumors (BMST)
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XGEVA	DENOSUMAB INJ 120 MG/1.7ML	30044530002030	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of multiple myeloma

AND

1.1.2 Trial and failure, contraindication (e.g., renal insufficiency), or intolerance, to one intravenous bisphosphonate (e.g., zoledronic acid) [9]

OR

1.2 Both of the following:

1.2.1 Diagnosis of solid tumors (e.g., breast cancer, kidney cancer, lung cancer, prostate cancer, thyroid cancer) [1-5]

AND

1.2.2 Documented evidence of one or more metastatic bone lesions

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Xgeva

Diagnosis	Giant cell tumor of bone
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Diagnosis of giant cell tumor of bone

AND

2 - One of the following:

2.1 Tumor is unresectable

OR

2.2 Surgical resection is likely to result in severe morbidity

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Xgeva	
Diagnosis	Giant cell tumor of bone
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XGEVA	DENOSUMAB INJ 120 MG/1.7ML	30044530002030	Brand

Approval Criteria	
1 - Patient does not show evidence of progressive disease while on Xgeva therapy [A]	
Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Xgeva	
Diagnosis	Hypercalcemia of malignancy
Approval Length	2 Month [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XGEVA	DENOSUMAB INJ 120 MG/1.7ML	30044530002030	Brand

Approval Criteria

1 - Diagnosis of hypercalcemia of malignancy

AND

2 - Trial and failure, contraindication, or intolerance to one intravenous bisphosphonate (e.g., pamidronate, zoledronic acid) [6, 7]

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Xgeva	
Diagnosis	Hypercalcemia of malignancy
Approval Length	2 Month [B]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XGEVA	DENOSUMAB INJ 120 MG/1.7ML	30044530002030	Brand

Approval Criteria **1** - Documentation of positive clinical response to Xgeva therapy	
Notes	If patient meets criteria above, please approve at GPI-12.

3 . Endnotes

Xgeva should be continued until disease progression in responding patients. [8]

Median time on the study for the treatment of hypercalcemia of malignancy was 56 days. [6]

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229045
Guideline Name	Xiaflex (collagenase clostridium histolyticum)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xiaflex (collagenase clostridium histolyticum)
Dupuytren's Contracture Indicated for the treatment of adult patients with Dupuytren's contracture with a palpable cord. **Peyronie's Disease** Indicated for the treatment of adult men with Peyronie's disease with a palpable plaque and curvature deformity of at least 30 degrees at the start of therapy.

2 . Criteria

Product Name:Xiaflex	
Diagnosis	Dupuytren’s contracture
Approval Length	12 month(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIAFLEX	COLLAGENASE CLOSTRIDIUM HISTOLYTICUM FOR INJ 0.9 MG	99350035002120	Brand

Approval Criteria

1 - Diagnosis of Dupuytren's contracture with a palpable cord

AND

2 - Patient has a positive "table top test" (defined as the inability to simultaneously place the affected finger and palm flat against a table top) [A]

AND

3 - Patient has a documented contracture of at least 20 degrees flexion for a metacarpophalangeal joint or a proximal interphalangeal joint [B]

AND

4 - Patient has a flexion deformity that results in functional limitations

Product Name:Xiaflex	
Diagnosis	Peyronie's disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIAFLEX	COLLAGENASE CLOSTRIDIUM HISTOLYTICUM FOR INJ 0.9 MG	99350035002120	Brand

Approval Criteria

1 - Diagnosis of Peyronie’s disease

AND

2 - Patient has a palpable plaque and curvature deformity of at least 30 degrees at the start of therapy [C]

AND

3 - The plaques do not involve the penile urethra

AND

4 - Patient has a curvature deformity that results in pain (e.g., pain upon erection or intercourse) [C]

Product Name:Xiaflex	
Diagnosis	Peyronie’s disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIAFLEX	COLLAGENASE CLOSTRIDIUM HISTOLYTICUM FOR INJ 0.9 MG	99350035002120	Brand

Approval Criteria

1 - Diagnosis of Peyronie’s disease

AND

2 - Patient has a palpable plaque and curvature deformity of at least 30 degrees at the start of therapy

AND

3 - The plaques do not involve the penile urethra

AND

4 - Patient has a curvature deformity that results in pain (e.g., pain upon erection or intercourse)

AND

5 - Patient has a new plaque that results in a curvature deformity

3 . Endnotes

Dupuytren's disease diagnosis can include a table top test to assess the severity of the disease. When a patient is unable to place his or her palm and the affected finger flat on the table, the test can help diagnosis Dupuytren's disease. [1]

Dupuytren's disease is associated with joint contracture. Xiaflex was studied in a patient population with joint contracture of at least 20 degrees. Evidence does not support any benefit in patients with joint contracture less than 20 degrees. Our program requires that the patient has a flexion deformity that results in functional limitations to protect against cosmetic use. [1]

Peyronie's disease is characterized by a curvature deformity. Xiaflex was studied in a patient population with a curvature deformity of at least 30 degrees. Evidence does not support any benefit in patients with a curvature deformity less than 30 degrees. To prevent cosmetic use, patients must also have a curvature deformity that results in pain. [1]

Prior Authorization Guideline

Guideline ID	GL-228751
Guideline Name	Xifaxan (rifaximin) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xifaxan (rifaximin)
Travelers' Diarrhea 200mg is indicated for the treatment of travelers' diarrhea (TD) caused by noninvasive strains of Escherichia coli in adults and pediatric patients 12 years of age and older. Limitations of use: Do not use in patients with diarrhea complicated by fever or blood in the stool or diarrhea due to pathogens other than Escherichia coli. [A] **Prophylaxis of Hepatic Encephalopathy Recurrence** 550 mg is indicated for reduction in risk of overt hepatic encephalopathy (HE) recurrence in adults. In the trials of Xifaxan for HE, 91% of patients were using lactulose concomitantly. Differences in the treatment effect of those patients not using lactulose concomitantly could not be assessed. Xifaxan has not been studied in patients with MELD (Model for End-Stage Liver Disease) score greater than 25, and only 8.6% of patients in the controlled trial had MELD scores over 19. There is increased systemic exposure in patients with more severe hepatic dysfunction. **Irritable Bowel Syndrome with Diarrhea** 550 mg is indicated for the treatment of irritable bowel syndrome with diarrhea (IBS-D) in adults. **Off Label Uses: Treatment of Hepatic Encephalopathy** Used for the treatment of hepatic encephalopathy. [4, 5, 22]

Small Bowel Bacterial Overgrowth (SBBO)/Small Intestinal Bacterial Overgrowth (SIBO)
Has been used for the treatment of small intestinal bacterial overgrowth. [7, 8, 10, 13]

2 . Criteria

Product Name:Xifaxan 200 mg tablets*	
Diagnosis	Travelers' Diarrhea (TD)
Approval Length	1 Time only
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 200 MG	16000049000320	Brand

Approval Criteria

1 - Diagnosis of travelers' diarrhea (TD)

AND

2 - Disease is moderate to severe [D, 9]

AND

3 - One of the following:

3.1 Trial and failure of one of the following: [2, 3, D, E]

Zithromax (azithromycin)

Cipro (ciprofloxacin)

Levaquin (levofloxacin)

Ofloxacin

OR

3.2 Resistance, contraindication, or intolerance to all of the following antibiotics:

Zithromax (azithromycin)

Cipro (ciprofloxacin)

Levaquin (levofloxacin)

Ofloxacin

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan 200 mg tablets*	
Diagnosis	Travelers' Diarrhea (TD)
Approval Length	1 Time only
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 200 MG	16000049000320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of travelers' diarrhea (TD)

AND

2 - Disease is moderate to severe [D, 9]

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following:

3.1 Trial and failure to two of the following: [2, 3, D, E]

Zithromax (azithromycin)

Cipro (ciprofloxacin)

Levaquin (levofloxacin)

Ofloxacin

OR

3.2 Resistance, contraindication, or intolerance to all of the following antibiotics:

Zithromax (azithromycin)

Cipro (ciprofloxacin)

Levaquin (levofloxacin)

Ofloxacin

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan	
Diagnosis	Small Bowel Bacterial Overgrowth (SBBO)/Small Intestinal Bacterial Overgrowth (SIBO) (off-label)
Approval Length	3 Months [C]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 200 MG	16000049000320	Brand
XIFAXAN	RIFAXIMIN TAB 550 MG	16000049000340	Brand

Approval Criteria

1 - Diagnosis of Small Bowel Bacterial Overgrowth (SBBO)/Small Intestinal Bacterial Overgrowth (SIBO)

AND

2 - One of the following:

2.1 Trial and failure of two of the following antibiotics: [5, 16-21]

Neomycin

Augmentin (amoxicillin/clavulanic acid)

Cipro (ciprofloxacin)

Bactrim (trimethoprim-sulfamethoxazole)

Vibramycin (doxycycline) or Minocin (minocycline) or tetracycline

Flagyl (metronidazole)

Keflex (cephalexin)

OR

2.2 Resistance, contraindication, or intolerance to all of the following antibiotics:

Neomycin

Augmentin (amoxicillin/clavulanic acid)

Cipro (ciprofloxacin)

Bactrim (trimethoprim-sulfamethoxazole)

Vibramycin (doxycycline) or Minocin (minocycline) or tetracycline

Flagyl (metronidazole)

Keflex (cephalexin)

Product Name:Xifaxan	
Diagnosis	Small Bowel Bacterial Overgrowth (SBBO)/Small Intestinal Bacterial Overgrowth (SIBO) (off-label)
Approval Length	3 Months [C]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 200 MG	16000049000320	Brand
XIFAXAN	RIFAXIMIN TAB 550 MG	16000049000340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., resolution of symptoms or relapse with Xifaxan discontinuation) [B]

AND

2 - One of the following:

2.1 Trial and failure of two of the following antibiotics: [5, 16-21]

Neomycin

Augmentin (amoxicillin/clavulanic acid)

Cipro (ciprofloxacin)

Bactrim (trimethoprim-sulfamethoxazole)

Vibramycin (doxycycline) or Minocin (minocycline) or tetracycline

Flagyl (metronidazole)

Keflex (cephalexin)

OR

2.2 Resistance, contraindication, or intolerance to all of the following antibiotics:

Neomycin

Augmentin (amoxicillin/clavulanic acid)

Cipro (ciprofloxacin)

Bactrim (trimethoprim-sulfamethoxazole)

Vibramycin (doxycycline) or Minocin (minocycline) or tetracycline

Flagyl (metronidazole)

Keflex (cephalexin)

Product Name:Xifaxan 200 mg tablets*	
Diagnosis	Small Bowel Bacterial Overgrowth (SBBO)/Small Intestinal Bacterial Overgrowth (SIBO) (off-label)
Approval Length	3 Months [C]
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 200 MG	16000049000320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of Small Bowel Bacterial Overgrowth (SBBO)/Small Intestinal Bacterial Overgrowth (SIBO)

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following:

2.1 Trial and failure of three of the following antibiotics: [5, 16-21]

Neomycin

Augmentin (amoxicillin/clavulanic acid)

Cipro (ciprofloxacin)

Bactrim (trimethoprim-sulfamethoxazole)

Vibramycin (doxycycline) or Minocin (minocycline) or tetracycline

Flagyl (metronidazole)

Keflex (cephalexin)

OR

2.2 Resistance, contraindication, or intolerance to all of the following antibiotics:

Neomycin

Augmentin (amoxicillin/clavulanic acid)

Cipro (ciprofloxacin)

Bactrim (trimethoprim-sulfamethoxazole)

Vibramycin (doxycycline) or Minocin (minocycline) or tetracycline

Flagyl (metronidazole)

Keflex (cephalexin)

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan 550 mg tablets*	
Diagnosis	Irritable Bowel Syndrome with Diarrhea (IBS-D)
Approval Length	2 Weeks [1, I]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 550 MG	16000049000340	Brand

Approval Criteria

1 - Diagnosis of irritable bowel syndrome with diarrhea (IBS-D) [F]

AND

2 - Patient is 18 years of age or older [L]

AND

3 - Trial and failure, contraindication, or intolerance to both of the following:

A Tricyclic Antidepressant (e.g., amitriptyline, nortriptyline)

Viberzi

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan 550 mg tablets*	
Diagnosis	Irritable Bowel Syndrome with Diarrhea (IBS-D)
Approval Length	2 Weeks [1, I]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 550 MG	16000049000340	Brand

Approval Criteria

1 - Symptoms of Irritable Bowel Syndrome continue to persist [G, H]

AND

2 - Patient demonstrates positive clinical response to therapy as evidenced by both of the following: [1]

Improvement in abdominal pain

Reduction in the Bristol Stool Scale

AND

3 - Trial and failure, contraindication, or intolerance to both of the following:

A Tricyclic Antidepressant (e.g., amitriptyline, nortriptyline)

Viberzi

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan 550 mg tablets*	
Diagnosis	Prophylaxis of Hepatic Encephalopathy (HE) Recurrence
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 550 MG	16000049000340	Brand

Approval Criteria

1 - Used for prophylaxis of hepatic encephalopathy (HE) recurrence

AND

2 - Patient is 18 years of age or older [L]

AND

3 - One of the following: [J, 22]

3.1 Both of the following:

3.1.1 Used as add-on therapy to lactulose

AND

3.1.2 Patient is unable to achieve an optimal clinical response with lactulose monotherapy

OR

3.2 History of contraindication or intolerance to lactulose

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan 550 mg tablets*	
Diagnosis	Prophylaxis of Hepatic Encephalopathy (HE) Recurrence
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIFAXAN	RIFAXIMIN TAB 550 MG	16000049000340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy [M, 27, 28]

AND

2 - One of the following: [J, 22]

2.1 Both of the following:

2.1.1 Used as add-on therapy to lactulose

AND

2.1.2 Patient is unable to achieve an optimal clinical response with lactulose monotherapy

OR

2.2 History of contraindication or intolerance to lactulose

Notes	Note: *If patient meets criteria above, please approve at GPI-14.

Product Name:Xifaxan	
Diagnosis	Treatment of Hepatic Encephalopathy (Off-Label)
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming used for the treatment of hepatic encephalopathy (HE) [5, K]

AND **2** - Patient is 18 years of age or older [L] **AND** **3** - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following: [22, K] **3.1** Both of the following: **3.1.1** Used as add-on therapy to lactulose **AND** **3.1.2** Patient is unable to achieve an optimal clinical response with lactulose monotherapy **OR** **3.2** History of contraindication or intolerance to lactulose	
Notes	Note: *If patient meets criteria above, please approve at GPI-14.

3 . Endnotes

Antibiotic treatment should be avoided in diarrhea caused by enterohemorrhagic E. coli. [6]

The main goals in the treatment of SBBO are 1) treatment of underlying small intestinal abnormality, when possible; 2) concentration on long-term antibiotic therapy when surgical management is not feasible; 3) adjunctive treatment of dysmotility, such as a prokinetic agent; and 4) nutritional support, particularly in patients with weight loss or vitamin deficiency. [7]

In most patients, a single course of treatment (10 days) markedly improves symptoms, and patients may remain free of symptoms for months. In others, symptoms recur quickly, and acceptable results can only be obtained with cyclic treatment (1 of every 4 weeks). In still others, continuous treatment may be needed for 1 to 2 months. If the antimicrobial agent is effective, a resolution or marked diminution of symptoms will be notable within

several days of initiating therapy. Diarrhea and steatorrhea will decrease, and cobalamin malabsorption will be corrected. [7]

According to the Centers for Disease Control and Prevention's Yellow Book, antibiotics may be used to treat cases of moderate to severe travelers' diarrhea. Fluoroquinolones including, but not limited to, ciprofloxacin and levofloxacin, are considered first line agents in the treatment of Traveler's Diarrhea (TD). Azithromycin is also considered a first line agent for treatment of TD and is especially efficacious in the pediatric population. The overall usefulness of Rifaximin for empiric self-treatment remains to be determined as Rifaximin has only been shown to be efficacious in patients with noninvasive strains of E. coli. [9]

Levofloxacin, ofloxacin and ciprofloxacin have all been shown to be highly effective in the treatment and prevention of Travelers' Diarrhea and should be considered first-line therapy options for this indication. [11]

In the TARGET I, II and III pivotal trials, Irritable Bowel Syndrome was diagnosed using the ROME II diagnostic criteria. According to the ROME-II criteria, an IBS-D diagnosis requires at least 12 consecutive weeks in the previous 12 months of abdominal discomfort or pain that has two out of the three following features: relieved with defecation; and/or onset associated with a change in frequency of stool; and/or onset associated with a change in appearance of stool [12, 14]

In the TARGET III pivotal trial, a total of 636 responders (59%) required retreatment. The median time to recurrence for patients who experienced initial response was 10 weeks (range from 6 to 24 weeks) [14]

According to the ROME-IV criteria, recurrent signs and symptoms of IBS-D include the following: a return of abdominal pain or mushy/watery stool consistency for at least 3 weeks during a 4-week follow-up period. [15]

The recommended dose of Xifaxan for IBS-D is one 550 mg tablet taken orally three times a day for 14 days. [1]

The American Association for the Study of Liver Diseases (AASLD) and the European Association for the Study of the Liver (EASL) recommend rifaximin as an effective add-on therapy to lactulose for prevention of over hepatic encephalopathy with strength of recommendation 1A. No solid data support the use of rifaximin alone. [22]

Rifaximin has been used for the treatment of HE in a number of trials comparing it with placebo, other antibiotics, nonabsorable disaccharides, and in dose-ranging studies. These trials showed effect of rifaximin that was equivalent or superior to the compared agents with good tolerability. No solid data support the use of rifaximin alone. [22]

A minimum age requirement that aligns with the prescribing information was added for prophylaxis and treatment of hepatic encephalopathy and IBS-D to prevent misuse of Xifaxan in pediatrics. The same age requirement was not added for traveler's diarrhea or SBBO/SIBO due to the patient population (e.g., pediatrics) that Xifaxan was studied in. [1, 8, 10, 13, 26]

The risk of a breakthrough episode of hepatic encephalopathy (HE) in patients who recently had history of recurrent overt HE was reduced while taking Xifaxan. Additionally, patients on Xifaxan achieved full resolution of HE, so there is benefit with long-term use of Xifaxan for the prophylaxis of HE. [27, 28]

Prior Authorization Guideline

Guideline ID	GL-228590
Guideline Name	Xiidra (lifitegrast)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xiidra (lifitegrast)
Dry eye disease Indicated for the treatment of the signs and symptoms of dry eye disease (DED).

2 . Criteria

Product Name:Xiidra	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIIDRA	LIFITEGRAST OPHTH SOLN 5%	86734050002020	Brand

Approval Criteria

1 - Diagnosis of dry eye disease

Product Name:Xiidra	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XIIDRA	LIFITEGRAST OPHTH SOLN 5%	86734050002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increased tear production or improvement in dry eye symptoms)

3 . Endnotes

As disease severity increases, aqueous enhancement of the eye using topical agents is appropriate (i.e., emulsions, gels, and ointments can be used). Topical cyclosporine, topical corticosteroids, topical lifitegrast, systemic omega-3 fatty acid supplements, punctual plugs and spectacle side shields/moisture chambers may also be considered in addition to aqueous enhancement therapies in patients who need additional symptom management. [2]

Prior Authorization Guideline

Guideline ID	GL-229047
Guideline Name	Xolair (omalizumab)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xolair (omalizumab)
Allergic Asthma Indicated for adults and pediatric patients 6 years of age and older with moderate to severe persistent asthma who have a positive skin test or in vitro reactivity to a perennial aeroallergen and whose symptoms are inadequately controlled with inhaled corticosteroids. Limitations of Use: Xolair is not indicated for treatment of other allergic conditions. Xolair is not indicated for the relief of acute bronchospasm or status asthmaticus. **Chronic Spontaneous Urticaria (CSU)** Indicated for the treatment of adults and adolescents 12 years of age and older with chronic spontaneous urticaria who remain symptomatic despite H1 antihistamine treatment. Limitations of Use: Xolair is not indicated for treatment of other forms of urticaria. **Chronic Rhinosinusitis with Nasal Polyps (CRSwNP)** Indicated for add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult patients 18 years of age and older with inadequate response to nasal corticosteroids. **IgE-Mediated Food Allergy** Indicated for the reduction of allergic reactions (Type I), including anaphylaxis, that may occur with accidental exposure to one or more foods in adult and pediatric patients aged 1 year and older with IgE-mediated food allergy. XOLAIR is to be used

in conjunction with food allergen avoidance. Limitations of Use: XOLAIR is not indicated for the emergency treatment of allergic reactions, including anaphylaxis.

2 . Criteria

Product Name:Xolair	
Diagnosis	Allergic Asthma
Approval Length	6 months [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOLAIR	OMALIZUMAB FOR INJ 150 MG	44603060002120	Brand

XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	4460306000E530	Brand

Approval Criteria

1 - Diagnosis of moderate to severe persistent allergic asthma [1, 2]

AND

2 - Positive skin test or in vitro reactivity to a perennial aeroallergen [1, D]

AND

3 - One of the following:

3.1 All of the following:

3.1.1 Patient is 6 years of age or older but less than 12 years of age

AND

3.1.2 Pre-treatment serum immunoglobulin (Ig)E level between 30 to 1300 IU/mL

AND

3.1.3 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications [3]:

3.1.3.1 Both of the following:

Medium-dose inhaled corticosteroid (e.g., greater than 100 – 200 mcg fluticasone propionate equivalent/day)

Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

3.1.3.2 One medium dosed combination ICS/LABA product (e.g., Advair Diskus [fluticasone propionate 100mcg/ salmeterol 50mcg], Symbicort [budesonide 80mcg/ formoterol 4.5mcg] Breo Ellipta [fluticasone furoate 50 mcg/ vilanterol 25 mcg])

OR

3.2 All of the following:

3.2.1 Patient is 12 years of age or older

AND

3.2.2 Pre-treatment serum immunoglobulin (Ig)E level between 30 to 700 IU/mL

AND

3.2.3 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications [3]:

3.2.3.1 Both of the following:

High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day)

Additional asthma controller medication (e.g., leukotriene receptor antagonist [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

3.2.3.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg])

AND

4 - Prescribed by or in consultation with one of the following: [G]

Pulmonologist

Allergist/Immunologist

Product Name:Xolair	
Diagnosis	Allergic Asthma
Approval Length	12 Months
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOLAIR	OMALIZUMAB FOR INJ 150 MG	44603060002120	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 75 MG/0.5ML	4460306000E510	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/ML	4460306000E520	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 75 MG/0.5ML	4460306000D510	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 150 MG/ML	4460306000D520	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 300 MG/2ML	4460306000D530	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	4460306000E530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in exacerbations, improvement in forced expiratory volume in 1 second [FEV1], decreased use of rescue medications)

AND

2 - Patient continues to be treated with an inhaled corticosteroid (ICS) (e.g., fluticasone, budesonide) with or without additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium]) unless there is a contraindication or intolerance to these medications [3]

AND

3 - Prescribed by or in consultation with one of the following: [G]

Pulmonologist

Allergist/immunologist

Product Name:Xolair	
Diagnosis	Chronic Spontaneous Urticaria (CSU)
Approval Length	3 months [E]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOLAIR	OMALIZUMAB FOR INJ 150 MG	44603060002120	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 75 MG/0.5ML	4460306000E510	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/ML	4460306000E520	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 75 MG/0.5ML	4460306000D510	Brand

XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	4460306000E530	Brand

Approval Criteria

1 - Diagnosis of chronic spontaneous urticaria [1]

AND

2 - Patient is 12 years of age or older

AND

3 - Persistent symptoms (itching and hives) for at least 4 consecutive weeks despite titrating to an optimal dose with a second generation H1 antihistamine (e.g., cetirizine, fexofenadine), unless there is a contraindication or intolerance to H1 antihistamines

AND

4 - Used concurrently with an H1 antihistamine, unless there is a contraindication or intolerance to H1 antihistamines

AND

5 - Patient has tried and had an inadequate response or intolerance at least TWO of the following additional therapies: [6, 7]

Doxepin

H1 antihistamine

H2 antagonist (e.g., famotidine, cimetidine)

Hydroxyzine

Leukotriene receptor antagonist (e.g., montelukast)

AND

6 - Prescribed by or in consultation with one of the following:

Allergist/immunologist

Dermatologist

Product Name:Xolair	
Diagnosis	Chronic Spontaneous Urticaria (CSU)
Approval Length	6 months [B]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	4460306000E530	Brand

Approval Criteria

1 - Patient's disease status has been re-evaluated since the last authorization to confirm the patient's condition warrants continued treatment

AND

2 - Patient has experienced at least one of the following:

Reduction in itching severity from baseline

Reduction in the number of hives from baseline

Product Name:Xolair	
Diagnosis	Chronic Rhinosinusitis with Nasal Polyps (CRSwNP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	4460306000E530	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of IgE Mediated Food Allergy as evidenced by one of the following:

Positive skin prick test (defined as greater than or equal to 4 mm wheal greater than saline control) to food

Positive food specific IgE (greater than or equal to 6 kUA/L)

Positive oral food challenge, defined as experiencing dose-limiting symptoms at a single dose of less than or equal to 300 mg of food protein

AND

1.1.2 Clinical history of IgE Mediated Food Allergy

OR

1.2 Provider attestation that patient has a history of severe allergic response, including anaphylaxis, following exposure to one or more foods

AND

2 - Patient is 1 year of age or older

AND

3 - Used in conjunction with food allergen avoidance

AND

4 - Both of the following:

Baseline (pre-Xolair treatment) serum total IgE level is greater than or equal to 30 IU/mL and less than or equal to 1850 IU/mL

Dosing is according to serum total IgE levels and body weight

AND

5 - Prescribed by or in consultation with one of the following:

Allergist

Immunologist

Product Name:Xolair	
Diagnosis	IgE-Mediated Food Allergy
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOLAIR	OMALIZUMAB FOR INJ 150 MG	44603060002120	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 75 MG/0.5ML	4460306000E510	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/ML	4460306000E520	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 75 MG/0.5ML	4460306000D510	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 150 MG/ML	4460306000D520	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 300 MG/2ML	4460306000D530	Brand
XOLAIR	OMALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	4460306000E530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy(e.g., reduction of type 1 allergic reactions, including anaphylaxis, following accidental exposure to one or more foods)

AND

2 - Used in conjunction with food allergen avoidance

AND

3 - Dosing will continue to be based on body weight and pretreatment total IgE serum levels

AND

4 - Prescribed by or in consultation with one of the following:

Allergist

Immunologist

3 . Background

Clinical Practice Guidelines

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 1. Low, medium and high daily doses of inhaled corticosteroids in adolescents and adults 12 years and older [3]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	200-500	> 500-1000	> 1000
Beclometasone dipropionate (DPI or pMDI, extrafine particle*, HFA)	100-200	> 200-400	> 400
Budesonide (DPI, or pMDI, standard particle, HFA)	200-400	> 400-800	> 800
Ciclesonide (pMDI, extrafine particle*, HFA)	80-160	> 160-320	> 320
Fluticasone furoate (DPI)	100		200
Fluticasone propionate (DPI)	100-250	> 250-500	> 500
Fluticasone propionate (pMDI, standard particle, HFA)	100-250	> 250-500	> 500
Mometasone furoate (DPI)	Depends on DPI device – see product information		

Mometasone furoate (pMDI, standard particle, HFA)	200-400	> 400

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 2. Low, medium and high daily doses of inhaled corticosteroids in children 6 – 11 years [5]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Beclometasone dipropionate (pMDI, extrafine particle, HFA)	50-100	> 100-200	> 200
Budesonide (DPI, or pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Budesonide (nebules)	250-500	>500-1000	>1000
Ciclesonide (pMDI, extrafine particle*, HFA)	80	>80-160	>160
Fluticasone furoate (DPI)	50		n.a.
Fluticasone propionate (DPI)	50-100	> 100-200	> 200
Fluticasone propionate (pMDI, standard particle, HFA)	50-100	> 100-200	> 200

Mometasone furoate (pMDI, standard particle, HFA)	100	200

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

4 . Endnotes

National treatment guidelines recommend the combination of an inhaled glucocorticosteroid and a long-acting beta2-agonist for the treatment of moderate persistent or severe persistent asthma. [2-5]

The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention update recommends that patients with asthma should be reviewed regularly to monitor their symptom control, risk factors and occurrence of exacerbations, as well as to document the response to any treatment changes. Ideally, response to Type 2-targeted therapy should be re-evaluated every 3-6 months, including re-evaluation of the need for ongoing biologic therapy for patients with good response to Type 2 targeted therapy. Clinical studies for allergic asthma evaluated an initial 16-week steroid stable phase in which subjects received omalizumab with a constant dose of inhaled steroids. This 16-week period may not be sufficient amount of time to show reduction in exacerbations. For allergic asthma, initial authorization duration increased from 16 weeks to 6 months. [3, 4]

Asthma treatment can often be reduced, once good asthma control has been achieved and maintained for three months and lung function has hit a plateau. However the approach to stepping down will depend on patient specific factors (e.g., current medications, risk factors). At this time evidence for optimal timing, sequence and magnitude of treatment reductions is limited. It is feasible and safe for most patients to reduce the ICS dose by 25-50% at three month intervals, but complete cessation of ICS is associated with a significant risk of exacerbations [3].

Sensitization to a perennial allergen (e.g., mite, cat, dog) should be required. [4] Xolair is indicated for children and adults (6 years of age and above) with moderate to severe persistent asthma who have a positive skin test or in vitro reactivity to a perennial aeroallergen and whose symptoms are inadequately controlled with inhaled corticosteroids. [1]

For chronic idiopathic urticaria, response observed at 12 weeks (one 24-week trial with data reported at 12 weeks, and one 12-week trial) [1]

Per clinical consult, April 2024.

Referral to an asthma specialist for consultation or comanagement is recommended if Xolair is being considered. [2]

Other agents used for nasal polyps include intranasal corticosteroids and nasal saline.

6 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229049
Guideline Name	Xolremdi (mavorixafor)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xolremdi (mavorixafor)
WHIM syndrome Indicated in patients 12 years of age and older with WHIM syndrome (warts, hypogammaglobulinemia, infections and myelokathexis) to increase the number of circulating mature neutrophils and lymphocytes.

2 . Criteria

Product Name:Xolremdi	
Diagnosis	WHIM syndrome
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOLREMDI	MAVORIXAFOR CAP 100 MG	82502046000120	Brand

Approval Criteria

1 - Diagnosis of WHIM (warts, hypogammaglobulinemia, infections and myelokathexis) syndrome

AND

2 - Patient has genotype confirmed variant of CXCR4 as detected by an FDA-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Patient has an absolute neutrophil count (ANC) less than 500 cells /µL [A]

AND

4 - Patient is 12 years of age or older

AND

5 - Prescribed by or in consultation with one of the following:

Immunologist

Hematologist

Geneticist

Allergist

Product Name:Xolremdi	
Diagnosis	WHIM syndrome
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOLREMDI	MAVORIXAFOR CAP 100 MG	82502046000120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in ANC, reduction in infections)

3 . Endnotes

Per consult with immunologist/ allergist, severe neutropenia (less than or equal to 500 cells per µL) is used in standard practice as a cut off for ANC levels [2].

Prior Authorization Guideline

Guideline ID	GL-228592
Guideline Name	Xospata (gilteritinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xospata (gilteritinib) tablets
Relapsed or Refractory Acute Myeloid Leukemia Indicated for the treatment of adult patients who have relapsed or refractory acute myeloid leukemia (AML) with a FMS-like tyrosine kinase 3 (FLT3) mutation as detected by an FDA-approved test.

2 . Criteria

Product Name:Xospata	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOSPATA	GILTERITINIB FUMARATE TABLET 40 MG (BASE EQUIVALENT)	21533020200320	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Disease is relapsed or refractory

AND

3 - Patient has a FMS-like tyrosine kinase 3 (FLT3) mutation as determined by a U.S. Food and Drug Administration (FDA)-approved test (e.g., LeukoStrat CDx FLT3 Mutation Assay) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [2]

Product Name:Xospata	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XOSPATA	GILTERITINIB FUMARATE TABLET 40 MG (BASE EQUIVALENT)	21533020200320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Guideline ID	GL-233402
Guideline Name	Xphozah (tenapanor) - ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	1/17/2024
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Xphozah (tenapanor)
Hyperphosphatemia in Chronic Kidney Disease on Dialysis Indicated to reduce serum phosphorus in adults with chronic kidney disease (CKD) on dialysis as add-on therapy in patients who have an inadequate response to phosphate binders or who are intolerant of any dose of phosphate binder therapy.

2 . Criteria

Product Name:Xphozah	
Approval Length	12 month(s)

Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
XPHOZAH	TENAPANOR HCL TAB 20 MG	30903260600325	Brand
XPHOZAH	TENAPANOR HCL TAB 30 MG	30903260600330	Brand

Approval Criteria

1 - Diagnosis of hyperphosphatemia in chronic kidney disease

AND

2 - Patient is on dialysis

AND

3 - Trial (minimum 30-day supply) and inadequate response, contraindication or intolerance to two of the following: [A-B, 2-3]

calcium carbonate

calcium acetate

lanthanum carbonate

sevelamer carbonate

sevelamer HCl

Auryxia

Product Name:Xphozah	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
XPHOZAH	TENAPANOR HCL TAB 20 MG	30903260600325	Brand
XPHOZAH	TENAPANOR HCL TAB 30 MG	30903260600330	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of hyperphosphatemia in chronic kidney disease

AND

2 - Patient is on dialysis

AND

3 - Submission of medical records (e.g., chart notes) or paid claims confirming trial (minimum 30-day supply) and inadequate response, contraindication or intolerance to two of the following: [A-B, 2-3]

calcium carbonate

calcium acetate

lanthanum carbonate

sevelamer carbonate

sevelamer HCl

Auryxia

3 . Endnotes

Phosphate binders are categorized as calcium-containing and non-calcium-containing. All are equivalently effective in lowering phosphate. [2]

The Kidney Disease: Improving Global Outcomes (KDIGO) guidelines do not strongly prefer 1 type of phosphate binder over another for adults and have noted that the selection of an appropriate phosphate binder should be individualized and based on various clinical parameters, not phosphorus lowering alone. All phosphate binders are efficacious in reducing serum phosphate levels; one product has not been found to be superior over another and therapy should be individualized to meet the patient's unique medical needs [3]

Prior Authorization Guideline

Guideline ID	GL-228597
Guideline Name	Xpovio (selinexor)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xpovio (selinexor)
Multiple Myeloma 1) Indicated in combination with bortezomib and dexamethasone for the treatment of adult patients with multiple myeloma who have received at least one prior therapy. 2) Indicated in combination with dexamethasone for the treatment of adult patients with relapsed or refractory multiple myeloma (RRMM) who have received at least four prior therapies and whose disease is refractory to at least two proteasome inhibitors, at least two immunomodulatory agents, and an anti-CD38 monoclonal antibody. **Diffuse Large B-cell Lymphoma (DLBCL)** Indicated for the treatment of adult patients with relapsed or refractory diffuse large B-cell lymphoma (DLBCL), not otherwise specified, including DLBCL arising from follicular lymphoma, after at least 2 lines of systemic therapy.

2 . Criteria

Product Name:Xpovio	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-229052
Guideline Name	Xtandi (enzalutamide)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xtandi (enzalutamide)
Castration-resistant prostate cancer (CRPC) Indicated for the treatment of patients with castration-resistant prostate cancer (CRPC). **Metastatic castration-sensitive prostate cancer (mCSPC)** Indicated for the treatment of patients with metastatic castration-sensitive prostate cancer (mCSPC). **Non-metastatic castration-sensitive prostate cancer (nmCSPC)** Indicated for the treatment of patients with non-metastatic castration-sensitive prostate cancer (nmCSPC) with biochemical recurrence at high risk for metastasis (high-risk BCR). **Off Label Uses: HRR Gene-mutated mCRPC [3]** Indicated for the treatment of adult patients with HRR gene-mutated metastatic castration-resistant prostate cancer (mCRPC) in combination with Talzenna (talazoparib).

2 . Criteria

Product Name:Xtandi	
Diagnosis	Castration-resistant prostate cancer (CRPC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XTANDI	ENZALUTAMIDE CAP 40 MG	21402430000120	Brand
XTANDI	ENZALUTAMIDE TAB 40 MG	21402430000320	Brand
XTANDI	ENZALUTAMIDE TAB 80 MG	21402430000340	Brand

Approval Criteria

1 - Diagnosis of castration-resistant (chemical or surgical) prostate cancer

AND

2 - If HRR gene-mutated metastatic disease, medication will be taken in combination with Talzenna (talazoparib)

Product Name:Xtandi	
Diagnosis	Metastatic castration-sensitive prostate cancer (mCSPC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XTANDI	ENZALUTAMIDE CAP 40 MG	21402430000120	Brand
XTANDI	ENZALUTAMIDE TAB 40 MG	21402430000320	Brand
XTANDI	ENZALUTAMIDE TAB 80 MG	21402430000340	Brand

Approval Criteria

1 - Diagnosis of metastatic, castration-sensitive prostate cancer

Product Name:Xtandi	
Diagnosis	Non-metastatic castration-sensitive prostate cancer (nmCSPC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XTANDI	ENZALUTAMIDE CAP 40 MG	21402430000120	Brand
XTANDI	ENZALUTAMIDE TAB 40 MG	21402430000320	Brand
XTANDI	ENZALUTAMIDE TAB 80 MG	21402430000340	Brand

Approval Criteria

1 - Diagnosis of non-metastatic, castration-sensitive prostate cancer (nmCSPC)

AND

2 - Patient has high-risk biochemical recurrence (BCR) defined by a PSA doubling time less than or equal to 9 months and one of the following:

PSA values greater than or equal to 1 ng/mL if the patient had prior prostatectomy (with or without radiotherapy)

PSA values at least 2 ng/mL above the nadir if the patient had prior radiotherapy only

Product Name:Xtandi	
Diagnosis	All indications listed above
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XTANDI	ENZALUTAMIDE CAP 40 MG	21402430000120	Brand
XTANDI	ENZALUTAMIDE TAB 40 MG	21402430000320	Brand
XTANDI	ENZALUTAMIDE TAB 80 MG	21402430000340	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-228596
Guideline Name	Xuriden (uridine triacetate)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Xuriden (uridine triacetate)
Hereditary orotic aciduria Indicated in adult and pediatric patients for the treatment of hereditary orotic aciduria.

2 . Criteria

Product Name:Xuriden	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XURIDEN	URIDINE TRIACETATE ORAL GRANULES PACKET 2 GM	30903875203020	Brand

Approval Criteria

1 - Diagnosis of hereditary orotic aciduria [A]

AND

2 - Prescribed by or in consultation with a medical geneticist or other specialist that treats inborn errors of metabolism [B]

Product Name:Xuriden	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
XURIDEN	URIDINE TRIACETATE ORAL GRANULES PACKET 2 GM	30903875203020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy [C]

3 . Endnotes

Hereditary orotic aciduria (uridine monophosphate [UMP] synthase deficiency) or HOA is a rare congenital disorder of pyrimidine metabolism caused by a defect in UMP synthase, a bi-functional enzyme that catalyzes the final 2 steps of the de novo pyrimidine biosynthetic pathway in mammalian cells. Ten defects in pyrimidine metabolic pathways have been identified to date; all exhibit autosomal recessive inheritance, however, the ubiquitous presence of pyrimidine-derived compounds underlies the heterogeneity in

clinical expression, even within families, thus often making recognition difficult. While the true prevalence of these rare disorders is unknown, inborn errors of pyrimidine metabolism are now increasingly being recognized in adults with partial deficiencies, and so may present from birth onwards. [1-2]

Three subtypes of HOA have been described; alongside clinical presentation (notably macrocytic hypochromic megaloblastic anemia and crystalluria), the ratio of urinary orotidine to orotate provides a means of differentiating the 3 subtypes. The enzyme defect in HOA can be bypassed by the administration of oral uridine which is not Food and Drug Administration-approved, but is available over-the-counter in various dietary/food supplements or as a bulk powder from which doses may be compounded; oral uridine has been used as a treatment for patients with HOA for more than 4 decades. Because uridine is widely used for several non-HOA conditions, the addition of a specialist prescriber requirement was added to reserve the use of XURIDEN for those patients with rare HOA. [1-4]

The recommended starting dosage of oral Xuriden is 60 mg/kg once daily. The dose can be increased to 120 mg/kg (not to exceed 8 grams) once daily for insufficient efficacy, such as the occurrence of one of the following: (1) levels of orotic acid in urine remain above normal or increase above the usual or expected range for the patient, (2) laboratory values (eg, red blood cell or white blood cell indices) affected by hereditary orotic aciduria show evidence of worsening, or (3) worsening of other signs or symptoms of the disease. Case reports have demonstrated that the effects of exogenous uridine were maintained over months and years, as long as treatment continued at sufficient doses (with appropriate dose increases based on body weight increases). Most hematologic abnormalities and orotic aciduria reappeared within days to up to 2 or 3 weeks when administration of uridine was stopped or the dose was reduced. If treatment was interrupted for longer periods, body weight growth receded. [1]

P&T Approval Date:	11/21/2024
P&T Revision Date:	

1 . Indications

Drug Name: Yorvipath (palopegteriparatide)
Hypoparathyroidism Indicated for the treatment of hypoparathyroidism in adults. Limitations of Use: (1) Not studied for acute post-surgical hypoparathyroidism; (2) Titration scheme only evaluated in adults who first achieved an albumin-corrected serum calcium of at least 7.8 mg/dL using calcium and active vitamin D treatment

2 . Criteria

Product Name:Yorvipath	
Approval Length	6 Months [A-C, 1-4]

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
YORVIPATH	PALOPEGTERIPARATIDE PEN-INJ 168 MCG/0.56ML (TERIPARATIDE EQ)	3090516000D220	Brand
YORVIPATH	PALOPEGTERIPARATIDE PEN-INJ 294 MCG/0.98ML (TERIPARATIDE EQ)	3090516000D230	Brand
YORVIPATH	PALOPEGTERIPARATIDE PEN-INJ 420 MCG/1.4ML (TERIPARATIDE EQ)	3090516000D240	Brand

Approval Criteria

1 - Diagnosis of hypoparathyroidism

AND

2 - Requested drug is not being used in the setting of acute post-surgical hypoparathyroidism [1]

AND

3 - Patient has achieved albumin-corrected serum calcium of at least 7.8 mg/dL using calcium and active vitamin D (e.g., calcitriol) treatment [D-F, 1, 2, 5]

AND

4 - Prescribed by or in consultation with an endocrinologist

Product Name:Yorvipath	
Approval Length	12 Months [3,4]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
YORVIPATH	PALOPEGTERIPARATIDE PEN-INJ 168 MCG/0.56ML (TERIPARATIDE EQ)	3090516000D220	Brand
YORVIPATH	PALOPEGTERIPARATIDE PEN-INJ 294 MCG/0.98ML (TERIPARATIDE EQ)	3090516000D230	Brand
YORVIPATH	PALOPEGTERIPARATIDE PEN-INJ 420 MCG/1.4ML (TERIPARATIDE EQ)	3090516000D240	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by maintenance of normalized calcium levels compared to baseline

3 . Endnotes

Patients randomized to Yorvipath therapy in the PaTHway pivotal trial were given therapy for 26-week duration. [1, 2]

An international systematic current practice survey of expert panelists recommends monitoring patients every 6 to 12 months as the optimal strategy for stable patients with chronic hypoparathyroidism. For patients with changes in therapy, such as treatment initiation or dosage titration, monitoring should be done more frequently than the 1 to 2 times per year for well-controlled patients. [3, 4]

In the PaTHway pivotal trial, patients were monitored within 1 to 2 weeks after any dosage adjustments. [2]

Patients eligible for inclusion in the PaTHway trial must have been treated with conventional therapy for at least 12 weeks prior to screening. [2]

Serum calcium concentration should be measured within 7 to 10 days of Yorvipath initiation. Doses of active vitamin D or calcium supplement or both should be adjusted based on serum calcium value and clinical assessment (i.e., signs and symptoms of hypocalcemia or hypercalcemia). [1]

Throughout the trial, most patients treated with Yorvipath maintained serum calcium levels in normal range upon discontinuation of active vitamin D and calcium therapies. [5]

ZELBORAF	VEMURAFENIB TAB 240 MG (BASE EQUIVALENT)	21532080000320	Brand
ZELBORAF	VEMURAFENIB TAB 240 MG	21532080000320	Brand

Approval Criteria

1 - Diagnosis of Erdheim-Chester disease (ECD)

AND

2 - Disease is BRAF V600 mutant type (MT)

Product Name:Zelboraf	
Diagnosis	All Indications
Approval Length	12 Month [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZELBORAF	VEMURAFENIB TAB 240 MG (BASE EQUIVALENT)	21532080000320	Brand
ZELBORAF	VEMURAFENIB TAB 240 MG	21532080000320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

In the pivotal trial (Trial 1) evaluating treatment naive patients who received Zelboraf (vemurafenib), the median follow-up was 6.2 months and the median progression free survival (PFS) was 5.3 months (95% CI, 4.9 - 6.6). In the pivotal trial (Trial 2) evaluating Zelboraf (vemurafenib) in patients who received prior systemic therapy, the best overall response rate was 52% (95% CI, 43 - 61%), the median time to response was 1.4 months, and the median duration of response was 6.5 months (95% CI, 5.6 - not reached). [1] According to the NCCN melanoma guidelines, Zelboraf (vemurafenib) is associated with a 40-50% response rate in patients with a V600 mutated BRAF gene; however, the median duration of response is only 5 - 6 months. [2]

Zepatier (elbasvir/grazoprevir)

Prior Authorization Guideline

Guideline ID	GL-229058
Guideline Name	Zepatier (elbasvir/grazoprevir)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zepatier (elbasvir/grazoprevir)
Chronic Hepatitis C (CHC) Indicated with or without ribavirin for the treatment of chronic hepatitis C virus (HCV) genotypes 1 or 4 infection in adult and pediatric patients 12 years of age and older or weighing at least 30 kg.

2 . Criteria

Product Name:Zepatier	
Diagnosis	Chronic Hepatitis C - Genotype 1a: treatment-naïve or PegIFN/RBV-experienced or PegIFN/RBV/protease inhibitor-experienced WITHOUT baseline NS5A polymorphisms*
Approval Length	12 Week(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZEPATIER	ELBASVIR-GRAZOPREVIR TAB 50-100 MG	12359902300320	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1a

AND

2 - One of the following:

Patient is 12 years of age or older

Patient weight is at least 30 kg

AND

3 - One of the following:

3.1 Patient is treatment-naive

OR

3.2 Patient has prior failure to peginterferon alfa plus ribavirin treatment

OR

3.3 Both of the following:

Patient has prior failure to treatment with peginterferon alfa plus ribavirin plus a HCV NS3/4A protease inhibitor (e.g., boceprevir, simeprevir, or telaprevir)

Used in combination with ribavirin

AND

4 - Both of the following: [1, A]

4.1 Patient has been tested for the presence of NS5A resistance-associated polymorphisms

AND

4.2 Patient is without baseline NS5A resistance-associated polymorphisms (i.e., polymorphisms at amino acid positions 28, 30, 31, or 93)

AND

5 - Prescribed by or in consultation with one of the following:

Hepatologist

Gastroenterologist

Infectious disease specialist

HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

7 - Patient does not have moderate to severe hepatic impairment (e.g., Child-Pugh Class B or C) [B]

AND

8 - One of the following:

8.1 Both of the following:

8.1.1 Trial and failure, intolerance, or contraindication to ONE of the following:

Epclusa (sofosbuvir/velpatasvir)

Harvoni (ledipasvir/sofosbuvir)

AND

8.1.2 Trial and failure, contraindication, or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

8.2 For continuation of prior Zepatier (elbasvir/grazoprevir) therapy

Notes	*NS5A resistance-associated polymorphisms at amino acid positions 28, 30, 31, or 93.

Product Name:Zepatier	
Diagnosis	Chronic Hepatitis C - Genotype 1a: treatment-naïve or PegIFN/RBV-experienced or PegIFN/RBV/protease inhibitor-experienced WITH baseline NS5A polymorphisms*

6 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

7 - Patient does not have moderate to severe hepatic impairment (e.g., Child-Pugh Class B or C) [B]

AND

8 - One of the following:

8.1 Both of the following:

8.1.1 Trial and failure, intolerance, or contraindication to ONE of the following:

Epclusa (sofosbuvir/velpatasvir)

Harvoni (ledipasvir/sofosbuvir)

AND

8.1.2 Trial and failure, contraindication, or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

8.2 For continuation of prior Zepatier (elbasvir/grazoprevir) therapy

3 . Endnotes

Testing patients with HCV genotype 1a infection for the presence of virus with NS5A resistance-associated polymorphisms is recommended prior to initiation of treatment with Zepatier to determine dosage regimen and duration. In subjects receiving Zepatier for 12 weeks, sustained virologic response (SVR12) rates were lower in genotype 1a-infected patients with one or more baseline NS5A resistance-associated polymorphisms at amino acid positions 28, 30, 31, or 93. [1]

Zepatier is contraindicated in patients with moderate or severe hepatic impairment (Child-Pugh B or C) due to the expected significantly increased grazoprevir plasma concentration and the increased risk of alanine aminotransferase (ALT) elevations. [1]

ZEPOSIA	OZANIMOD HCL CAP 0.92 MG	62407050200120	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [4, 5]:

Greater than 6 stools per day

Frequent blood in the stools

Frequent urgency

Presence of ulcers

Abnormal lab values (e.g., hemoglobin, ESR, CRP)

Dependent on, or refractory to, corticosteroids

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies [4, 5]:

6-mercaptopurine

Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

Azathioprine

Corticosteroids (e.g., prednisone)

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to TWO of the following:

One formulary adalimumab product*

Simponi (golimumab)

One formulary ustekinumab product*

Omvoh (mirikizumab-mrkz)

Skyrizi (risankizumab-rzaa)

Tremfya (guselkumab)

Rinvoq (upadacitinib)

Xeljanz/XR (tofacitinib/ER)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

5 - Prescribed by or in consultation with a gastroenterologist

Notes	* For review process only: Refer to the table in the Background sectio n for carrier-specific formulary products

Product Name:Zeposia	
Diagnosis	Ulcerative Colitis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

3 . Endnotes

According to the National MS Society, of the four disease courses that have been identified in MS, relapsing-remitting MS (RRMS) is characterized primarily by relapses, and secondary-progressive MS (SPMS) has both relapsing and progressive characteristics. These two constitute “relapsing forms of MS” if they describe a disease course that is characterized by the occurrence of relapses. [2] The effectiveness of interferon beta in SPMS patients without relapses is uncertain. [1]

Prior Authorization Guideline

Guideline ID	GL-229060
Guideline Name	Zokinvy (lonafarnib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zokinvy (lonafarnib)
Hutchinson-Gilford Progeria Syndrome (HGPS) Indicated in patients 12 months of age and older with a body surface area (BSA) of 0.39 m^2 and above to reduce the risk of mortality in Hutchinson-Gilford Progeria Syndrome (HGPS). Limitations of Use: ZOKINVY is not indicated for other Progeroid Syndromes or processing-proficient Progeroid Laminopathies. Based upon its mechanism of action, ZOKINVY would not be expected to be effective in these populations. **Processing-Deficient Progeroid Laminopathies** Indicated in patients 12 months of age and older with a body surface area (BSA) of 0.39 m^2 and above for the treatment of processing-deficient Progeroid Laminopathies with either heterozygous LMNA mutation with progerin-like protein accumulation or homozygous or compound heterozygous ZMPSTE24 mutations. Limitations of Use: ZOKINVY is not indicated for other Progeroid Syndromes or processing-proficient Progeroid Laminopathies. Based upon its mechanism of action, ZOKINVY would not be expected to be effective in these populations.

2 . Criteria

Product Name:Zokinvy	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228604
Guideline Name	Zoryve (roflumilast) – PA, ST, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zoryve (roflumilast) 0.3% cream
Plaque Psoriasis (PsO) Indicated for the topical treatment of plaque psoriasis, including intertriginous areas, in patients 6 years of age and older.
Drug Name: Zoryve (roflumilast) 0.15% cream
Atopic Dermatitis (AD) Indicated for topical treatment of mild to moderate atopic dermatitis in adult and pediatric patients 6 years of age and older.
Drug Name: Zoryve (roflumilast) foam
Seborrheic Dermatitis Indicated for the treatment of seborrheic dermatitis in adult and pediatric patients 9 years of age and older.

2 . Criteria

Product Name:Zoryve 0.3% cream	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST CREAM 0.3%	90230061003730	Brand

Approval Criteria

1 - Diagnosis of plaque psoriasis

AND

2 - Patient is 6 years of age or older

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to ONE of the following generic topical therapies [3]:

Corticosteroids (e.g., betamethasone, clobetasol)

Vitamin D analogs (e.g., calcitriol, calcipotriene)

Tazarotene

Calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

Combination topical therapy (e.g., vitamin D analog/corticosteroid)

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Zoryve 0.3% cream	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST CREAM 0.3%	90230061003730	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by one of the following [1, 3]:

Reduction in the body surface area (BSA) involvement from baseline

Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Zoryve 0.3% cream	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST CREAM 0.15%	90230061003720	Brand
ZORYVE	ROFLUMILAST CREAM 0.3%	90230061003730	Brand
ZORYVE	ROFLUMILAST FOAM 0.3%	90230061003920	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of plaque psoriasis

AND

2 - Patient is 6 years of age or older

AND

3 - Both of the following:

3.1 Paid claims or submission of medical records (e.g., chart notes) confirming a minimum duration of a 4-week trial and failure, contraindication, or intolerance to THREE of the following generic topical therapies [3]:

Corticosteroids (e.g., betamethasone, clobetasol)

Vitamin D analogs (e.g., calcitriol, calcipotriene)

Tazarotene

Calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

Combination topical therapy (e.g., vitamin D analog/corticosteroid)

AND

3.2 Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication, or intolerance to Vtama (tapinarof)

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Zoryve 0.15% cream	
Diagnosis	Atopic Dermatitis (AD)
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST CREAM 0.15%	90230061003720	Brand

Approval Criteria

1 - Diagnosis of mild to moderate atopic dermatitis

AND

2 - Trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication, or intolerance to ALL of the following [4]:

Medium or higher potency topical corticosteroid

Pimecrolimus cream OR Tacrolimus ointment

Eucrisa (crisaborole) ointment*

Notes	*Product may require step therapy

Product Name:Zoryve 0.15% cream	
Diagnosis	Atopic Dermatitis (AD)
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST CREAM 0.15%	90230061003720	Brand
ZORYVE	ROFLUMILAST CREAM 0.3%	90230061003730	Brand
ZORYVE	ROFLUMILAST FOAM 0.3%	90230061003920	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of mild to moderate atopic dermatitis

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication, or intolerance to ALL of the following [4]:

Medium or higher potency topical corticosteroid

Pimecrolimus cream OR Tacrolimus ointment

Eucrisa (crisaborole) ointment*

Notes	*Product may require step therapy

Product Name:Zoryve foam	
Diagnosis	Seborrheic Dermatitis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST FOAM 0.3%	90230061003920	Brand

Approval Criteria

1 - Diagnosis of seborrheic dermatitis

AND

2 - Patient is 9 years of age or older

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to TWO of the following generic topical therapies [2, 5, 6]:

Corticosteroids (e.g., betamethasone, clobetasol)

Antifungals (e.g., ciclopirox, ketoconazole)

Calcineurin inhibitors (e.g., tacrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Zoryve foam	
Diagnosis	Seborrheic Dermatitis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST FOAM 0.3%	90230061003920	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for one of the following [2, 7]:

Scaling

Erythema

Pruritus

Body surface area (BSA) involvement

Product Name:Zoryve foam

Diagnosis	Seborrheic Dermatitis
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ZORYVE	ROFLUMILAST FOAM 0.3%	90230061003920	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of seborrheic dermatitis

AND

2 - Patient is 9 years of age or older

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming a minimum duration of a 4-week trial and failure, contraindication, or intolerance to TWO of the following generic topical therapies [2, 5, 6]:

Corticosteroids (e.g., betamethasone, clobetasol)

Antifungals (e.g., ciclopirox, ketoconazole)

Calcineurin inhibitors (e.g., tacrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

3 . Background

Benefit/Coverage/Program Information

Table 1. Relative potencies of topical corticosteroids [4]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05

	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

Prior Authorization Guideline

Guideline ID	GL-228754
Guideline Name	Ztalmy (ganaxolone)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ztalmy (ganaxolone)
Seizures Indicated for the treatment of seizures associated with cyclin-dependent kinase-like 5 (CDKL5) deficiency disorder (CDD) in patients 2 years of age and older.

2 . Criteria

Product Name:Ztalmy	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZTALMY	GANAXOLONE SUSP 50 MG/ML	72600033001820	Brand

Approval Criteria

1 - Diagnosis of cyclin-dependent kinase-like 5 (CDKL5) deficiency disorder (CDD)

AND

2 - Patient has a mutation in the CDKL5 gene

AND

3 - Patient is 2 years of age or older

AND

4 - Patient is experiencing motor seizures (e.g., bilateral tonic, generalized tonic-clonic, bilateral clonic, atonic, focal, or bilateral tonic-clonic)

AND

5 - One of the following:

5.1 Trial and failure, contraindication, or intolerance to two formulary anticonvulsants (e.g., valproic acid, levetiracetam, lamotrigine)

OR

5.2 For continuation of prior therapy

AND

6 - Prescribed by or in consultation with a neurologist

Product Name:Ztalmy	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZTALMY	GANAXOLONE SUSP 50 MG/ML	72600033001820	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by a reduction in the frequency of seizures from baseline

ZURZUVAE	ZURANOLONE CAP 25 MG	58060090000125	Brand
ZURZUVAE	ZURANOLONE CAP 30 MG	58060090000130	Brand

Approval Criteria

1 - One of the following:

1.1 Diagnosis of moderate to severe postpartum depression (PPD)

OR

1.2 Both of the following:

1.2.1 Diagnosis of mild postpartum depression (PPD)

AND

1.2.2 Trial and failure, contraindication or intolerance to at least one oral SSRI or SNRI (e.g., escitalopram, duloxetine)

AND

2 - Patient is 18 years of age or older

AND

3 - Onset of symptoms in the third trimester or within 4 weeks of delivery

AND

4 - Prescriber attests that the patient has been counseled and has agreed to adhere to the following: Will follow instructions to not drive or operate machinery until at least 12 hours after taking each dose of Zurzuvae for the duration of the 14-day treatment course and that

patients are informed that they may not be able to assess their own driving competence or the degree of driving impairment caused by Zurzuvae

Prior Authorization Guideline

Guideline ID	GL-233223
Guideline Name	Zyclara (imiquimod)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	9/18/2019
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Zyclara (imiquimod)
Actinic Keratosis Indicated for the topical treatment of clinically typical visible or palpable, actinic keratoses (AK) of the full face or balding scalp in immunocompetent adults. **External Genital Warts** Indicated for the treatment of external genital and perianal warts (EGW)/condyloma acuminata in patients 12 years or older.

2 . Criteria

Product Name:Zyclara 2.5% cream, Brand Zyclara 3.75% cream, Generic imiquimod 3.75% cream

Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ZYCLARA PUMP	IMIQUIMOD CREAM 2.5%	90773040003710	Brand
IMIQUIMOD PUMP	IMIQUIMOD CREAM 3.75%	90773040003715	Generic
ZYCLARA PUMP	IMIQUIMOD CREAM 3.75%	90773040003715	Generic
ZYCLARA	IMIQUIMOD CREAM 3.75%	90773040003715	Generic
IMIQUIMOD	IMIQUIMOD CREAM 3.75%	90773040003715	Generic

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), or intolerance of generic imiquimod 5%

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Zydelig (idelalisib)

Prior Authorization Guideline

Guideline ID	GL-229150
Guideline Name	Zydelig (idelalisib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/14/2014
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Zydelig (idelalisib)
Relapsed Chronic Lymphocytic Leukemia Indicated, in combination with rituximab, for the treatment of patients with relapsed chronic lymphocytic leukemia (CLL) for whom rituximab alone would be considered appropriate therapy due to other co-morbidities. Limitation of Use: Zydelig is not indicated and is not recommended for first-line treatment of any patient, including patients with CLL, small lymphocytic lymphoma (SLL), follicular lymphoma (FL), and other indolent non-Hodgkin lymphomas. Zydelig is not indicated and is not recommended in combination with bendamustine and rituximab, or in combination with rituximab for the treatment of patients with FL, SLL, and other indolent non-Hodgkin lymphomas.

2 . Criteria

Product Name:Zydelig	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYDELIG	IDELALISIB TAB 100 MG	21538040000320	Brand
ZYDELIG	IDELALISIB TAB 150 MG	21538040000330	Brand

Approval Criteria

1 - Diagnosis of Chronic Lymphocytic Leukemia (CLL)

AND

2 - Patient has relapsed on at least one prior therapy (e.g., purine analogues [fludarabine, pentostatin, cladribine], alkylating agents [chlorambucil, cyclophosphamide], or monoclonal antibodies [rituximab])

AND

3 - Used in combination with Rituxan (rituximab)* [2]

AND

4 - Patient is a candidate for Rituxan (rituximab) monotherapy due to presence of other comorbidities (e.g., coronary artery disease, peripheral vascular disease, diabetes mellitus, pulmonary disease [COPD], etc.)

Notes	*This drug may require prior authorization.

Product Name:Zydelig	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Prior Authorization Guideline

Guideline ID	GL-229064
Guideline Name	Zykadia (ceritinib)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zykadia (ceritinib)
Non-small Cell Lung Cancer (NSCLC) Indicated for the treatment of adult patients with metastatic non-small cell lung cancer (NSCLC) whose tumors are anaplastic lymphoma kinase (ALK)-positive as detected by an FDA-approved test.

2 . Criteria

Product Name:Zykadia	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYKADIA	CERITINIB TAB 150 MG	21530514000330	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - One of the following: [2]

Disease is metastatic

Disease is recurrent

AND

3 - Tumor is anaplastic lymphoma kinase (ALK)-positive as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - One of the following:

4.1 Patient has had disease progression on, contraindication or intolerance to, or is not a candidate for one of the following:

Alecensa (alectinib)

Alunbrig (brigatinib)

OR

4.2 For continuation of prior therapy

Product Name:Zykadia	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYKADIA	CERITINIB TAB 150 MG	21530514000330	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-228605
Guideline Name	Zynlonta (loncastuximab tesirine-lpyl)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zynlonta (loncastuximab tesirine-lpyl)
Large B-cell lymphoma Indicated for the treatment of adult patients with relapsed or refractory large B-cell lymphoma after two or more lines of systemic therapy, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified, DLBCL arising from low-grade lymphoma, and high-grade B-cell lymphoma. This indication is approved under accelerated approval based on overall response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Zynlonta	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYNLONTA	LONCASTUXIMAB TESIRINE-LPYL FOR IV SOLN 10 MG	21351640502120	Brand

Approval Criteria

1 - One of the following diagnoses:

Diffuse large B-cell lymphoma (DLBCL)

DLBCL arising from low-grade lymphoma

High-grade B-cell lymphoma

AND

2 - Disease is one of the following:

Relapsed

Refractory

AND

3 - Patient has received at least two prior systemic therapies (e.g. chemotherapy, immunotherapy) [2]

Product Name:Zynlonta	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYNLONTA	LONCASTUXIMAB TESIRINE-LPYL FOR IV SOLN 10 MG	21351640502120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Prior Authorization Guideline

Guideline ID	GL-228606
Guideline Name	Zynyz (retifanlimab-dlwr)
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zynyz (retifanlimab-dlwr)
Merkel Cell Carcinoma (MCC) Indicated for the treatment of adult patients with metastatic or recurrent locally advanced Merkel cell carcinoma (MCC). This indication is approved under accelerated approval based on tumor response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials.

2 . Criteria

Product Name:Zynyz	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYNYZ	RETIFANLIMAB-DLWR IV SOLN 500 MG/20ML (25 MG/ML)	21357960202020	Brand

Approval Criteria

1 - Diagnosis of Merkel cell carcinoma (MCC)

AND

2 - Disease is one of the following:

metastatic

recurrent locally advanced

AND

3 - Treatment duration of therapy has not exceeded a total of 24 months [A]

Product Name:Zynyz	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYNYZ	RETIFANLIMAB-DLWR IV SOLN 500 MG/20ML (25 MG/ML)	21357960202020	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Treatment duration of therapy has not exceeded a total of 24 months [A]

3 . Endnotes

Zynyz is recommended to be administered until disease progression, unacceptable toxicity, or up to 24 months. There is no evidence of additional benefit beyond 24 months and a higher risk of adverse events. [1,2]

Prior Authorization Guideline

Guideline ID	GL-229066
Guideline Name	Zytiga (abiraterone acetate) - PA, NF
Formulary	Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Zytiga (abiraterone acetate)
Metastatic castration-resistant prostate cancer (mCRPC) Indicated for the treatment of patients with metastatic castration-resistant prostate cancer (mCRPC) in combination with prednisone. **Metastatic castration-sensitive prostate cancer (mCSPC)** Indicated for the treatment of patients with metastatic high risk castration-sensitive prostate cancer (mCSPC) in combination with prednisone.

2 . Criteria

Product Name:Brand Zytiga	
Diagnosis	Castration-resistant prostate cancer

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYTIGA	ABIRATERONE ACETATE TAB 250 MG	21406010200320	Brand
ZYTIGA	ABIRATERONE ACETATE TAB 500 MG	21406010200330	Brand

Approval Criteria

1 - Diagnosis of castration resistant (chemical or surgical) prostate cancer [2]

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to Xtandi (enzalutamide)

OR

2.2 For continuation of prior therapy

Product Name:Brand Zytiga	
Diagnosis	Castration-resistant prostate cancer
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ZYTIGA	ABIRATERONE ACETATE TAB 250 MG	21406010200320	Brand
ZYTIGA	ABIRATERONE ACETATE TAB 500 MG	21406010200330	Brand

Approval Criteria

1 - Diagnosis of castration resistant (chemical or surgical) prostate cancer [2]

AND

2 - One of the following:

2.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Xtandi (enzalutamide)

OR

2.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

Product Name:Generic abiraterone acetate	
Diagnosis	Castration-resistant prostate cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
