Prescription Benefit Medication Prior Authorization Criteria for Large Group Commercial

QuartzBenefits.com

These criteria apply to drugs picked up at the pharmacy.

These medication prior authorization criteria do not apply to drugs picked up at the pharmacy for State and Local Government members or BadgerCare Plus and/or Medicaid SSI members.

State and Local Government members should call **Navitus** at **(866) 333-2757** or visit navitus.com for information about your prescription drug benefits.

Quartz BadgerCare Plus and/or Medicaid SSI members must call the **Wisconsin Department of Health and Family Services** at **(800) 362-3002** or visit forwardhealth.wi.gov for information about your prescription drug benefits.

QA01672_0225

May 1, 2025
Pharmacy Benefit Drug
Prior Authorization Criteria for Large Group Commercial

A medication prior authorization request may be started by members, providers, or designated representatives by fax, electronically on Quartz's website, telephone, mail. Or, for medical benefit medications, also by Health Link, Plan Link, MyQuartzTools, or electronic prior authorization (e-PA) within the electronic medical record. Electronic (e-PA) via Surescripts verifies member eligibility and member benefit information. Quartz sends back e-PA criteria questions to the provider staff which can be answered, and medical records can be attached to the request.

Quartz strongly recommends that the health care provider initiate the prior authorization request process on behalf of the member. This is because the health care provider will be able to include the medical history necessary for a timely decision to be made based on all of the relevant information, including any case specific circumstances that can be considered. Once a request and the supporting documentation have been submitted, a pharmacist or appropriate staff review the prior authorization criteria and exception requirements separately to make a coverage decision.

Table of Contents

Prior Authorization Guideline

Guideline ID	GL-228339
Guideline Name	5-Aminosalicylates - PA, ST
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Asacol HD (mesalamine delayed-release)
Ulcerative colitis Indicated for the treatment of moderately active ulcerative colitis in adults. Limitations of Use: Safety and effectiveness of Asacol HD beyond 6 weeks have not been established.
Drug Name: Delzicol (mesalamine delayed-release)
Treatment of mildly-moderately active ulcerative colitis Indicated for the treatment of mildly to moderately active ulcerative colitis in patients 5 years of age and older. **Maintenance of remission of ulcerative colitis** Indicated for the maintenance of remission of ulcerative colitis in adults.
Drug Name: Lialda (mesalamine 1.2g) delayed-release tablet
Treatment of mildly-moderately active ulcerative colitis Indicated for the induction of remission in adult patients with mildly to moderately active ulcerative colitis. Indicated for the treatment of mildly to moderately active ulcerative colitis in pediatric patients weighing at least 24 kg.

Maintenance of remission of ulcerative colitis Indicated for the maintenance of remission in adult patients with ulcerative colitis.

Drug Name: Apriso (mesalamine extended-release) capsules

Maintenance of remission of ulcerative colitis Indicated for the maintenance of remission in adult patients with ulcerative colitis.

Drug Name: Pentasa

Ulcerative colitis Indicated for the induction of remission and for the treatment of adult patients with mildly to moderately active ulcerative colitis.

2 . Criteria

Product Name:Asacol HD, Delzicol, Brand Lialda	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ASACOL HD	MESALAMINE TAB DELAYED RELEASE 800 MG	52500030000650	Brand
DELZICOL	MESALAMINE CAP DR 400 MG	52500030006530	Brand
LIALDA	MESALAMINE TAB DELAYED RELEASE 1.2 GM	52500030000670	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), age contraindication, or intolerance to brand Apriso [5]

Product Name:Pentasa	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
PENTASA	MESALAMINE CAP ER 500 MG	52500030000220	Brand
PENTASA	MESALAMINE CAP ER 250 MG	52500030000210	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication, or intolerance to both of the following:

- Generic mesalamine (Delzicol, Asacol HD, Pentasa 500mg, Lialda)
- Brand Apriso

Product Name:Generic mesalamine ER capsules 0.375 gm (generic Apriso)	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MESALAMINE ER	MESALAMINE CAP ER 24HR 0.375 GM	52500030007020	Generic

Approval Criteria

1 - One of the following:

1.1 Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming at least 6 months use of brand Apriso within the previous 365 days

AND

3 - Justification provided for why the generic is expected to provide benefit when brand Apriso has not been shown to be effective

Prior Authorization Guideline

Guideline ID	GL-228342
Guideline Name	5HT-1 Receptor Agonists (Triptans)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Onzetra Xsail (sumatriptan)
Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Use only if a clear diagnosis of migraine has been established. If a patient has no response to the first migraine attack treated with Onzetra Xsail, reconsider the diagnosis of migraine before treatment of subsequent attacks with Onzetra Xsail. Onzetra Xsail is not indicated for the prevention of migraine attacks. Safety and effectiveness of Onzetra Xsail have not been established for the treatment of cluster headache.
Drug Name: Tosymra (sumatriptan)
Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Use only if a clear diagnosis of migraine has been established. If a patient has no response to the first migraine attack treated with Tosymra, reconsider the diagnosis before Tosymra is administered to treat any subsequent attacks. Tosymra is not indicated for the preventive treatment of migraine. Tosymra is not indicated for the treatment of cluster headache.
Drug Name: Treximet (sumatriptan/naproxen)

Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults and pediatric patients 12 years of age and older. Limitations of Use: Use only if a clear diagnosis of migraine headache has been established. If a patient has no response to the first migraine attack treated with Treximet, reconsider the diagnosis of migraine before Treximet is administered to treat any subsequent attacks. Treximet is not indicated for the prevention of migraine attacks. Safety and effectiveness of Treximet have not been established for cluster headache.
Drug Name: Zomig (zolmitriptan) nasal spray
Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults and pediatric patients 12 years of age and older. Limitations of Use: Only use Zomig if a clear diagnosis of migraine has been established. If a patient has no response to Zomig treatment for the first migraine attack, reconsider the diagnosis of migraine before Zomig is administered to treat any subsequent attacks. Zomig is not indicated for the prevention of migraine attacks. Safety and effectiveness of Zomig have not been established for cluster headache. Not recommended in patients with moderate or severe hepatic impairment.
Drug Name: Zembrace SymTouch (sumatriptan) injection solution
Migraine Headaches Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Use only if a clear diagnosis of migraine has been established. If a patient has no response to the first migraine attack treated with Zembrace SymTouch, reconsider the diagnosis before Zembrace SymTouch is administered to treat any subsequent attacks. Zembrace SymTouch injection is not indicated for the prevention of migraine attacks.

2 . Criteria

Product Name:Onzetra Xsail, Brand Treximet, Generic sumatriptan/naproxen, Tosymra, or Zembrace SymTouch	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
TREXIMET	SUMATRIPTAN-NAPROXEN SODIUM TAB 85-500 MG	67992002600320	Brand
TREXIMET	SUMATRIPTAN-NAPROXEN SODIUM TAB 10-60 MG	67992002600305	Brand
ONZETRA XSAIL	SUMATRIPTAN SUCCINATE EXHALER POWDER 11 MG/NOSEPIECE	6740607010G420	Brand
TOSYMRA	SUMATRIPTAN NASAL SPRAY 10 MG/ACT	67406070002020	Brand

SUMATRIPTAN/NAPROXEN SODIUM	SUMATRIPTAN-NAPROXEN SODIUM TAB 85-500 MG	67992002600320	Generic
ZEMBRACE SYMTOUCH	SUMATRIPTAN SUCCINATE SOLUTION AUTO-INJECTOR 3 MG/0.5ML	6740607010D505	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply) or intolerance to two of the following generics [A, B]:

- Almotriptan tablet
- Eletriptan tablet
- Frovatriptan tablet
- Naratriptan tablet
- Rizatriptan tablet/rizatriptan orally dissolving tablet (ODT)
- Sumatriptan tablet/nasal spray
- Zolmitriptan tablet/zolmitriptan ODT

Product Name:Zomig nasal spray or Brand Zolmitriptan nasal spray	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ZOMIG	ZOLMITRIPTAN NASAL SPRAY 2.5 MG/SPRAY UNIT	67406080002010	Brand
ZOMIG	ZOLMITRIPTAN NASAL SPRAY 5 MG/SPRAY UNIT	67406080002020	Brand
ZOLMITRIPTAN	ZOLMITRIPTAN NASAL SPRAY 2.5 MG/SPRAY UNIT	67406080002010	Generic
ZOLMITRIPTAN	ZOLMITRIPTAN NASAL SPRAY 5 MG/SPRAY UNIT	67406080002020	Generic

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Patient is 12 to 17 years of age

AND

2.1.2 Trial and failure (of a minimum 30-day supply) or intolerance to rizatriptan tablet/rizatriptan orally dissolving tablet (ODT)

OR

2.2 Both of the following:

2.2.1 Patient is 18 years of age or older

AND

2.2.2 Trial and failure (of a minimum 30-day supply) or intolerance to two of the following generics [A, B]:

- Almotriptan tablet
- Eletriptan tablet
- Frovatriptan tablet
- Naratriptan tablet
- Rizatriptan tablet/rizatriptan orally dissolving tablet (ODT)
- Sumatriptan tablet/nasal spray
- Zolmitriptan tablet/zolmitriptan ODT

3 . Endnotes

A. All triptans are FDA-approved for the acute treatment of migraines with or without aura in adults [3]. Those agents FDA-approved in pediatric patients include almotriptan, sumatriptan/naproxen, zolmitriptan nasal spray (for ≥12 years of age), and rizatriptan (for ≥6 years of age).
B. Triptans are a well established, effective treatment option for acute migraine [4]. There is limited head-to-head data available, which makes it difficult to recommend the use of one agent over another [4].

Actimmune (interferon gamma-1b)

Prior Authorization Guideline

Guideline ID	GL-228779
Guideline Name	Actimmune (interferon gamma-1b)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Actimmune (interferon gamma-1b)
Chronic Granulomatous Disease (CGD) Indicated for reducing the frequency and severity of serious infections associated with Chronic Granulomatous Disease (CGD). **Severe Malignant Osteopetrosis (SMO)** Indicated for delaying time to disease progression in patients with severe, malignant osteopetrosis (SMO).

2 . Criteria

Product Name:Actimmune	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ACTIMMUNE	INTERFERON GAMMA-1B INJ 100 MCG/0.5ML (2000000 UNIT/0.5ML)	21700060702020	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Chronic granulomatous disease (CGD)
- Severe, malignant osteopetrosis (SMO)

Product Name:Actimmune	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ACTIMMUNE	INTERFERON GAMMA-1B INJ 100 MCG/0.5ML (2000000 UNIT/0.5ML)	21700060702020	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-233365
Guideline Name	Adakveo (crizanlizumab-tmca)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	1/15/2020
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Adakveo (crizanlizumab-tmca)
Sickle Cell Disease Indicated to reduce the frequency of vasoocclusive crises in adults and pediatric patients aged 16 years and older with sickle cell disease.

2 . Criteria

Product Name:Adakveo	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADAKVEO	CRIZANLIZUMAB-TMCA IV SOLN 100 MG/10ML	82807020702020	Brand

Approval Criteria

1 - Diagnosis of Sickle Cell Disease

AND

2 - Patient is 16 years of age and older

AND

3 - Documentation of 2 vaso-occlusive events that required medical facility visits and treatments in the past 12 months (e.g., sickle cell crisis, acute pain episodes, acute chest syndrome, hepatic sequestration, splenic sequestration, priapism) [1, 2]

AND

4 - Trial and failure or inadequate response, contraindication, or intolerance to one of the following: [3, 4, 5, 6]

- Hydroxyurea
- L-glutamine (i.e., Endari)

AND

5 - Prescribed by or in consultation with one of the following:

- Hematologist/Oncologist
- Specialist with expertise in the diagnosis and management of sickle cell disease

Product Name:Adakveo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADAKVEO	CRIZANLIZUMAB-TMCA IV SOLN 100 MG/10ML	82807020702020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in annual rate of vaso-occlusive events, increased time between each vaso-occlusive event)

Adalimumab*

Prior Authorization Guideline

Guideline ID	GL-229091
Guideline Name	Adalimumab*
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/6/2025

Note:

*Do not approve Cordavis manufacture.

1 . Indications

Drug Name: Humira (adalimumab)
Rheumatoid arthritis (RA) Indicated for reducing signs and symptoms, inducing major clinical response, inhibiting the progression of structural damage and improving physical function in adult patients with moderately to severe active rheumatoid arthritis (RA). Humira can be used alone or in combination with methotrexate (MTX) or other non-biologic disease-modifying antirheumatic drugs (DMARDs). **Polyarticular Juvenile idiopathic arthritis (PJIA)** Indicated for reducing signs and symptoms of moderately to severely active polyarticular juvenile idiopathic arthritis in patients ages 2 years of age and older. Humira can be used alone or in combination with MTX. **Psoriatic arthritis (PsA)** Indicated for reducing signs and symptoms, inhibiting the progression of structural damage, and improving physical function in adult patients with active psoriatic arthritis. Humira can be used alone or in combination with non-biologic DMARDs.

Plaque psoriasis (PsO) Indicated for the treatment of adult patients with moderate to severe chronic plaque psoriasis who are candidates for systemic therapy or phototherapy, and when other systemic therapies are medically less appropriate. Humira should only be administered to patients who will be closely monitored and have regular follow-up visits with a physician.

Ankylosing spondylitis (AS) Indicated for reducing signs and symptoms in adult patients with active ankylosing spondylitis.

Crohn's disease (CD) Indicated for the treatment of moderately to severely active Crohn's disease in adults and pediatric patients 6 years of age and older.

Ulcerative Colitis (UC) Indicated for the treatment of moderately to severely active ulcerative colitis in adults and pediatric patients 5 years of age and older. Limitations of use: The effectiveness of Humira has not been established in patients who have lost response to or were intolerant to TNF blockers.

Hidradenitis Suppurativa (HS) Indicated for the treatment of moderate to severe hidradenitis suppurativa in patients 12 years of age and older.

Uveitis (UV) Indicated for the treatment of non-infectious intermediate, posterior and panuveitis in adults and pediatric patients 2 years of age and older.

Drug Name: Amjevita (adalimumab-atto), Cyltezo (adalimumab-adbm), Hyrimoz (adalimumab-adaz)

Rheumatoid arthritis (RA) Indicated for reducing signs and symptoms, inducing major clinical response, inhibiting the progression of structural damage, and improving physical function in adult patients with moderately to severely active rheumatoid arthritis. Can be used alone or in combination with methotrexate or other non-biologic disease-modifying anti-rheumatic drugs (DMARDs).

Polyarticular Juvenile idiopathic arthritis (PJIA) Indicated for reducing signs and symptoms of moderately to severely active polyarticular juvenile idiopathic arthritis in patients 2 years of age and older. Can be used alone or in combination with methotrexate.

Psoriatic arthritis (PsA) Indicated for reducing signs and symptoms, inhibiting the progression of structural damage, and improving physical function in adult patients with active psoriatic arthritis. Can be used alone or in combination with non-biologic DMARDs.

Plaque psoriasis (PsO) Indicated for the treatment of adult patients with moderate to severe chronic plaque psoriasis who are candidates for systemic therapy or phototherapy, and when other systemic therapies are medically less appropriate. Should only be administered to patients who will be closely monitored and have regular follow-up visits with a physician.

Ankylosing spondylitis (AS) Indicated for reducing signs and symptoms in adult patients with active ankylosing spondylitis.

Crohn's disease (CD) Indicated for the treatment of moderately to severely active Crohn's disease in adults and pediatric patients 6 years of age and older.

Ulcerative Colitis (UC) Indicated for the treatment of moderately to severely active ulcerative colitis in adult patients. Limitations of use: The effectiveness of adalimumab products has not been established in patients who have lost response to or were intolerant to TNF-blockers.

Hidradenitis Suppurativa (HS) Indicated for the treatment of moderate to severe hidradenitis suppurativa in adult patients.

Uveitis (UV) Indicated for the treatment of non-infectious intermediate, posterior, and panuveitis in adult patients.

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 8]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Function
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Notes	Approve at GPI 8 with Ignore Drug Status of I.

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn’s disease

AND

2 - One of the following [9, 10]:

- Frequent diarrhea and abdominal pain
- At least 10% weight loss
- Complications such as obstruction, fever, abdominal mass
- Abnormal lab values (e.g., C-reactive protein [CRP])
- CD Activity Index (CDAI) greater than 220

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies: [9, 10]

- 6-mercaptopurine
- azathioprine
- corticosteroids (e.g., prednisone)
- methotrexate

AND

4 - Prescribed by or in consultation with a gastroenterologist

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [11, 12]:

- Greater than 6 stools per day
- Frequent blood in the stools
- Frequent urgency
- Presence of ulcers
- Abnormal lab values (e.g., hemoglobin, ESR, CRP)
- Dependent on, or refractory to, corticosteroids

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies: [11, 12]

- 6-mercaptopurine
- Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)
- Azathioprine
- Corticosteroids (e.g., prednisone)

AND

4 - Prescribed by or in consultation with a gastroenterologist

Approval Criteria

1 - One of the following:

1.1 For patients who initiated Humira therapy within the past 12 weeks, patient demonstrates clinical remission or significant clinical benefit by eight weeks (Day 57) of therapy

OR

1.2 For patients who have been maintained on Humira therapy for longer than 12 weeks, patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 11, 12]:

- Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline
- Reversal of high fecal output state

Notes	Approve at GPI 8 with Ignore Drug Status of I.

Adasuve (loxapine)

Prior Authorization Guideline

Guideline ID	GL-233322
Guideline Name	Adasuve (loxapine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	2/18/2025
P&T Approval Date:	4/8/2014
P&T Revision Date:	3/20/2024

1 . Indications

Drug Name: Adasuve (loxapine)
Agitation Indicated for the acute treatment of agitation associated with schizophrenia or bipolar I disorder in adults. Limitations of Use: As part of the Adasuve REMS Program to mitigate the risk of bronchospasm, Adasuve must be administered only in a certified healthcare setting.

2 . Criteria

Product Name:Adasuve	
Approval Length	1 Time [A]

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADASUVE	LOXAPINE AEROSOL POWDER BREATH ACTIVATED 10 MG	59154020008010	Brand

Approval Criteria

1 - One of the following diagnoses:

- Bipolar I disorder
- Schizophrenia

AND

2 - For the treatment of acute agitation

AND

3 - Patient does not have a history of lung disease associated with bronchospasm [e.g., asthma, chronic obstructive pulmonary disease (COPD)]

3 . Endnotes

A. Because clinical trials in patients with asthma or COPD demonstrated that the degree of bronchospasm, as indicated by changes in forced expiratory volume in 1 second (FEV1), was greater following a second dose of Adasuve, limit Adasuve use to a single dose within a 24 hour period.

Adbry (tralokinumab-ldrm)

Prior Authorization Guideline

Guideline ID	GL-228757
Guideline Name	Adbry (tralokinumab-ldrm)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Adbry (tralokinumab-ldrm)
Atopic Dermatitis Indicated for the treatment of moderate-to-severe atopic dermatitis in adults and pediatric patients 12 years of age and older whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable. May be used with or without topical corticosteroids.

2 . Criteria

Product Name:Adbry

ADBRY	TRALOKINUMAB-LDRM SUBCUTANEOUS SOLN PREFILLED SYR 150 MG/ML	9027308045E520	Brand
ADBRY	TRALOKINUMAB-LDRM SUBCUTANEOUS SOLN AUTO-INJECTOR 300 MG/2ML	9027308045D530	Brand

Approval Criteria

1 - Diagnosis of moderate to severe atopic dermatitis

AND

2 - One of the following:

- Involvement of at least 10% body surface area (BSA)
- SCORing Atopic Dermatitis (SCORAD) index value of at least 25 [A]

AND

3 - Patient is 12 years of age or older

AND

4 - Prescribed by or in consultation with one of the following:

- Dermatologist
- Allergist/Immunologist

AND

5 - Trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication, or intolerance to at least ONE of the following:

- Medium or higher potency topical corticosteroid
- Pimecrolimus cream^

• Tacrolimus ointment • Eucrisa (crisaborole) ointment^	
Notes	*QL Override (For new starts only): Enter 2 PAs as follows: First PA: Approve with MDD = 0.29 & PTD = 6 syringes or 4 autoinjectors per 28 days for one month; Second PA: Approve 4 syringes or 2 autoinjectors per 28 days (no overrides needed) for the remaining 5 months. (Adbry is hard-coded with a quantity of 4 syringes per 28 days); ^Product may require step therapy

Product Name:Adbry	
Diagnosis	Atopic Dermatitis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADBRY	TRALOKINUMAB-LDRM SUBCUTANEOUS SOLN PREFILLED SYR 150 MG/ML	9027308045E520	Brand
ADBRY	TRALOKINUMAB-LDRM SUBCUTANEOUS SOLN AUTO-INJECTOR 300 MG/2ML	9027308045D530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least ONE of the following:

- Reduction in body surface area involvement from baseline
- Reduction in SCORing Atopic Dermatitis (SCORAD) index value from baseline [A]

3 . Background

Clinical Practice Guidelines
Table 1. Relative potencies of topical corticosteroids [2]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1

	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

4 . Endnotes

A. The Scoring Atopic Dermatitis (SCORAD) index is a clinical tool for assessing the severity of atopic dermatitis lesions based on affected body area and intensity of plaque characteristics. [3, 4] The extent and severity of AD over the body area (A) and the severity of 6 specific symptoms (erythema, edema/papulation, excoriations, lichenification, oozing/crusts, and dryness) (B) are assessed and scored by the Investigator. Subjective assessment of itch and sleeplessness is scored by the patient (C). The SCORAD score is a combined score (A/5 + 7B/2 + C) with a maximum of 103. Higher scores indicate greater severity/worsened state. A score of 25 to 50 indicates moderate disease severity and greater than 50 indicates severe disease. [5]

Prior Authorization Guideline

Guideline ID	GL-233312
Guideline Name	ADHD
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/13/2025
P&T Approval Date:	5/21/1999
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Adderall XR (amphetamine-dextroamphetamine mixed salts extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD) in adults and pediatric patients 6 years and older.
Drug Name: Concerta (methylphenidate extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD) in children 6 years of age and older, adolescents, and adults up to the age of 65.
Drug Name: Cotempla XR-ODT (methylphenidate extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in pediatric patients 6 to 17 years of age.

Drug Name: Daytrana (methylphenidate transdermal system)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in pediatric patients 6 to 17 years of age.
Drug Name: Desoxyn (methamphetamine)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit disorder with hyperactivity as an integral part of a total treatment program which typically includes other remedial measures (psychological, educational, social) for a stabilizing effect in children over 6 years of age with a behavioral syndrome characterized by the following group of developmentally inappropriate symptoms: moderate to severe distractibility, short attention span, hyperactivity, emotional lability, and impulsivity.
Drug Name: ProCentra (dextroamphetamine oral solution)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit disorder with hyperactivity as an integral part of a total treatment program which typically includes other remedial measures (psychological, educational, social) for a stabilizing effect in pediatric patients (ages 3 to 16 years) with a behavioral syndrome characterized by the following group of developmentally inappropriate symptoms: moderate to severe distractibility, short attention span, hyperactivity, emotional lability, and impulsivity. **Narcolepsy** Indicated for the treatment of narcolepsy.
Drug Name: Focalin (dexmethylphenidate)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD)
Drug Name: Focalin XR (dexmethylphenidate extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD) in patients aged 6 years and older.
Drug Name: Methylin (methylphenidate oral solution)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for Attention Deficit Hyperactivity Disorder (ADHD) in adults and pediatric patients 6 years of age and older. **Narcolepsy** Indicated for the treatment of narcolepsy.
Drug Name: Ritalin (methylphenidate)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD) in pediatric patients 6 years and older and adults. **Narcolepsy** Indicated for the treatment of narcolepsy.

Drug Name: Ritalin LA (methylphenidate extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD), in pediatric patients 6 to 12 years of age.
Drug Name: Quillivant XR (methylphenidate extended-release oral suspension)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD).
Drug Name: Aptensio XR (methylphenidate HCl extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 6 years and older. Limitations of Use: Pediatric patients younger than 6 years of age experienced higher plasma exposure than patients 6 years and older at the same dose and high rates of adverse reactions, most notably weight loss.
Drug Name: Zenzedi (dextroamphetamine)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit hyperactivity disorder (ADHD) as an integral part of a total treatment program which typically includes other remedial measures (psychological, educational, social) for a stabilizing effect in pediatric patients (ages 3 to 16 years) with a behavioral syndrome characterized by the following group of developmentally inappropriate symptoms: moderate to severe distractibility, short attention span, hyperactivity, emotional lability, and impulsivity. **Narcolepsy** Indicated for the treatment of narcolepsy.
Drug Name: Dyanavel XR (amphetamine extended-release)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 6 years of age and older
Drug Name: Quillichew ER (methylphenidate extended-release, chewable)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD)
Drug Name: Adzenys XR-ODT (amphetamine extended-release, orally disintegrating tablet)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 6 years and older.
Drug Name: Mydayis (mixed amphetamine salts)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 13 years and older. Limitation of use: Pediatric patients 12 years and younger experienced higher plasma exposure than patients

13 years and older at the same dose, and experienced higher rates of adverse reactions, mainly insomnia and decreased appetite.

Drug Name: Jornay PM (methylphenidate extended-release capsule)

Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 6 years and older.

Drug Name: CNS Stimulants

Augmentation of Depression [21-23] Have been used in the treatment of depression as part of an augmentation strategy in patients who are refractory to standard antidepressant therapy.

Drug Name: Azstarys (serdexmethylphenidate and dexmethylphenidate)

Attention Deficit Hyperactivity Disorder (ADHD) AZSTARYS is a central nervous system (CNS) stimulant indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 6 years of age and older.

Drug Name: Dexedrine (dextroamphetamine sulfate)

Narcolepsy Indicated for the treatment of narcolepsy.

Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients 6 years to 16 years.

Drug Name: Relexxi, Brand Methylphenidate ER

Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in adults (up to the age of 65 years) and pediatric patients 6 years of age and older.

Drug Name: Xelstrym (dextroamphetamine) transdermal system

Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in adults and pediatric patients 6 years and older. Limitations of Use: Pediatric patients with ADHD younger than 6 years of age experienced more long-term weight loss than patients 6 years and older.

Drug Name: Evekeo ODT (amphetamine sulfate) orally disintegrating tablets

Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in pediatric patients 6 to 17 years of age.

Drug Name: Evekeo (amphetamine sulfate)

Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of attention deficit disorder with hyperactivity as an integral part of a total treatment program which typically includes other remedial measures (psychological, educational, social) for a stabilizing

effect in children with behavioral syndrome characterized by the following group of developmentally inappropriate symptoms: moderate to severe distractibility, short attention span, hyperactivity, emotional lability , and impulsivity. **Narcolepsy** Indicated for the treatment of narcolepsy. **Exogenous Obesity** Indicated as a short term (a few weeks) adjunct in a regimen of weight reduction based on caloric restriction for patients refractory to alternative therapy, e.g., repeated diets, group programs, and other drugs.
Drug Name: Vyvanse (lisdexamfetamine dimesylate) capsules, Vyvanse (lisdexamfetamine dimesylate) chewable tablets
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in adults and pediatric patients 6 years and older. Limitation of Use: Vyvanse is not indicated or recommended for weight loss. Use of other sympathomimetic drugs for weight loss has been associated with serious cardiovascular adverse events. The safety and effectiveness of Vyvanse for the treatment of obesity have not been established. **Binge Eating Disorder (BED)** Indicated for the treatment of moderate to severe binge eating disorder (BED) in adults. Limitation of Use: Vyvanse is not indicated or recommended for weight loss. Use of other sympathomimetic drugs for weight loss has been associated with serious cardiovascular adverse events. The safety and effectiveness of Vyvanse for the treatment of obesity have not been established.
Drug Name: Metadate CD (methylphenidate hydrochloride)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD) in pediatric patients 6 to 15 years of age.
Drug Name: Adderall (amphetamine-dextroamphetamine mixed salts)
Attention Deficit Hyperactivity Disorder (ADHD) Indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD). **Narcolepsy** Indicated for the treatment of Narcolepsy.

2 . Criteria

Product Name:Azstarys, Jornay PM	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic

AZSTARYS	SERDEXMETHYLPHENIDATE-DEXMETHYLPHENIDATE CAP 39.2-7.8 MG	61409802800130	Brand
AZSTARYS	SERDEXMETHYLPHENIDATE-DEXMETHYLPHENIDATE CAP 52.3-10.4 MG	61409802800140	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication or intolerance to one of the following [8-14]:*

- amphetamine-dextroamphetamine
- dexmethylphenidate
- dextroamphetamine
- methylphenidate
- lisdexamfetamine

Notes	*Intent is to accept immediate release and/or extended release generic preparation of the listed prerequisites when available

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), contraindication or intolerance to three of the following [8-14]:*

- amphetamine-dextroamphetamine
- dexmethylphenidate
- dextroamphetamine
- methylphenidate
- lisdexamfetamine

Notes	*Intent is to accept immediate release and/or extended release generic preparation of the listed prerequisites when available

4 . Revision History

Date	Notes
1/13/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-229111
Guideline Name	Administrative Non-Formulary & Excluded Drug Exceptions Process
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	11/21/2024

Note:

The purpose of this guideline is to establish policies and procedures on how to handle non-formulary and excluded drugs. This guideline will not apply to drugs with step therapy edits, drugs that require quantity limit review only, or drugs that are not reviewed for prior authorization by OptumRx. ** Please consult client-specific resources to confirm whether benefit exclusions should be reviewed for medical necessity **

1 . Criteria

Product Name:A non-formulary or excluded* contraceptive drug	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
contraceptive			
contraception			
contraceptives			

Approval Criteria

1 - One of the following:

1.1 Both of the following:

- Patient is using the requested product for contraception or other FDA-approved condition**
- The requested product is medically necessary***

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

Notes	*Please consult client-specific resources to confirm whether benefit exclusions should be reviewed for medical necessity. **Examples of non-contraception uses: (1) Abnormal or excessive bleeding disorders (eg, amenorrhea, oligomenorrhea, menorrhagia, dysfunctional uterine bleeding); (2) Acne; (3) Decrease in bone mineral density; (4) Dysmenorrhea; (5) Endometriosis; (6) Hirsutism; (7) Irregular menses / cycles; (8) Ovarian cysts; (9) Perimenopausal symptoms; (10) History of Pelvic Inflammatory Disease (PID); (11) Polycystic Ovarian Syndrome (PCO or PCOS); (12) Premenstrual Syndrome (PMS); (13) Premenstrual Dysphoric Disorder (PMDD); (14) Prevention of endometrial and/or ovarian cancer; (15) Prevention of menstrual migraines; (16) Turner's syndrome; (17) Uterine fibroids or adenomyosis. ***Any justification of medical necessity/appropriateness provided by the prescriber is adequate to approve access.

Product Name:A non-formulary or excluded* drug	
Approval Length	6 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Non-formulary drug			
Excluded drug			
Exclusion			
non			
non-form			
non-formulary			

Approval Criteria

1 - Both of the following:

1.1 One of the following:

1.1.1 If the requested drug has a formulary alternative with the same active ingredient, both of the following:

1.1.1.1 Submission of medical records (e.g., chart notes) documenting the patient has experienced intolerance (e.g., allergy to excipient) with a formulary alternative that has the same active ingredient

AND

1.1.1.2 Submission of medical records (e.g., chart notes) or paid claims documenting the patient has tried and failed at least 2 additional formulary alternatives within the same therapeutic class. If only 1 formulary alternative within the therapeutic class is available, the patient must have tried the formulary alternative within the therapeutic class AND 1 additional formulary alternative. If there are no formulary alternatives within the same therapeutic class, the patient must have failed 2 formulary alternatives or have a contraindication or intolerance to all formulary alternatives.

OR

1.1.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on formulary, both of the following:

1.1.2.1 Submission of medical records (e.g., chart notes) documenting the patient has experienced intolerance (e.g., allergy to excipient) with the individual ingredients in the combination product

AND

1.1.2.2 Submission of medical records (e.g., chart notes) or paid claims documenting the patient has tried and failed at least 2 additional formulary alternatives

OR

1.1.3 If only over-the-counter (OTC) equivalents^ are available, patient has tried and failed or has contraindications or intolerance to 3 OTC equivalents. If only 1 or only 2 equivalents are available, the patient must have failed or has contraindications or intolerance to all available OTC equivalents [document drug(s), dose, duration of trial]

OR

1.1.4 If formulary alternatives are available and do not meet above scenarios, submission of medical records (e.g., chart notes) or paid claims documenting patient has tried and failed at least 3 formulary alternatives or has contraindications or intolerance to all formulary alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or has contraindications or intolerance to all available formulary alternatives.

OR

1.1.5 No formulary alternative or OTC equivalent is available to treat the patient's condition

AND

1.2 One of the following:

1.2.1 Both of the following:

1.2.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.2.1.2 Additional requirements listed in the "Indications and Usage" sections of the

prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.) **OR** **1.2.2** If requested for an off-label indication, the off-label guideline approval criteria have been met	
Notes	*Please consult client-specific resources to confirm whether benefit exclusions should be reviewed for medical necessity. *If the target drug is listed on the ORx Commercial grid, the patient must try and fail, or have specific medical reason(s) for why the number of alternatives specified by the grid is not appropriate. ^OTC equivalent refers to any covered or non-covered OTC equivalent product. If the diagnosis provided for the target drug is FDA approved/compendia supported, then consider the OTC equivalent(s) to have the same FDA approval/compendia support.

2 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228764
Guideline Name	Adzynma (ADAMTS13, recombinant-krhn)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Adzynma (ADAMTS13, recombinant-krhn)
Congenital Thrombotic Thrombocytopenic Purpura (cTTP) Indicated for prophylactic or on demand enzyme replacement therapy (ERT) in adult and pediatric patients with congenital thrombotic thrombocytopenic purpura (cTTP).

2 . Criteria

Product Name:Adzynma	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADZYNMA	ADAMTS13 RECOMBINANT-KRHN FOR INJ KIT 500 UNIT	85182005306420	Brand
ADZYNMA	ADAMTS13 RECOMBINANT-KRHN FOR INJ KIT 1500 UNIT	85182005306440	Brand

Approval Criteria

1 - Diagnosis of congenital thrombotic thrombocytopenic purpura (cTTP)

AND

2 - Molecular genetic testing confirms mutations in the ADAMTS13 gene

AND

3 - Trial and inadequate response, contraindication or intolerance to plasma-based infusions [B, 11]

Product Name:Adzynma	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ADZYNMA	ADAMTS13 RECOMBINANT-KRHN FOR INJ KIT 500 UNIT	85182005306420	Brand
ADZYNMA	ADAMTS13 RECOMBINANT-KRHN FOR INJ KIT 1500 UNIT	85182005306440	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Trial and inadequate response, contraindication or intolerance to plasma-based infusions [B, 11]

3 . Definitions

Definition	Description
ISTH	International Society of Thrombosis and Haemostasis.

4 . Endnotes

A. Acute TTP events were defined in protocol by a drop in platelet count (≥50% of baseline or a platelet count <100,000/μL) and an elevation of lactate dehydrogenase (LDH) (>2× baseline or >2× upper limit normal (ULN)). Subacute events were defined by a thrombocytopenia event or a microangiopathic hemolytic anemia event; and organ-specific signs and symptoms including but not limited to renal dysfunction events, neurological symptoms events, fever, fatigue/lethargy, and/or abdominal pain. Thrombocytopenia events were defined as a drop in platelet count ≥25% of baseline or a platelet count <150,000/μL. Microangiopathic hemolytic anemia events were defined as an elevation of LDH >1.5×baseline or >1.5 ×ULN. [2]

B. A trial of plasma-based infusions would be acceptable for both prophylactic and acute use in cTTP. Adzynma may be an option for those patients who have risk of antibody production, allergic reactions, time-constraints (few hours with plasma-based infusions), refractory to plasma-based infusions, volume restrictions (e.g., renal failure) etc... [11]

Aemcolo (rifamycin)

Prior Authorization Guideline

Guideline ID	GL-228761
Guideline Name	Aemcolo (rifamycin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Aemcolo (rifamycin)
Travelers' Diarrhea (TD) Indicated for the treatment of travelers' diarrhea (TD) caused by noninvasive strains of Escherichia coli in adults. Limitations of use: Aemcolo is not indicated in patients with diarrhea complicated by fever or bloody stool or due to pathogens other than noninvasive strains of Escherichia coli. To reduce the development of drug-resistant bacteria and maintain the effectiveness of Aemcolo and other antibacterial drugs, Aemcolo should be used only to treat or prevent infections that are proven or strongly suspected to be caused by bacteria.

2 . Criteria

Product Name:Aemcolo	
Approval Length	14 days [A]

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AEMCOLO	RIFAMYCIN SODIUM TAB DELAYED RELEASE 194 MG (BASE EQUIV)	16000048200620	Brand

Approval Criteria

1 - Diagnosis of travelers' diarrhea (TD) [B]

AND

2 - Diarrhea is not accompanied by fever or bloody stool [B]

AND

3 - One of the following:

3.1 Trial and failure to one of the following: [2, C]

- Zithromax (azithromycin)
- Cipro (ciprofloxacin)
- Levaquin (levofloxacin)
- Ofloxacin

OR

3.2 Resistance, contraindication, or intolerance to all of the following antibiotics:

- Zithromax (azithromycin)
- Cipro (ciprofloxacin)
- Levaquin (levofloxacin)
- Ofloxacin

3 . Endnotes

A. The recommended dosage of Aemcolo is 388 mg (two tablets) orally twice daily for three days. 14 day approval length allows for sufficient time for the patient to pick up the medication from the pharmacy. [1]
B. For those who present with uncomplicated travelers' diarrhea (TD), determination of the microbiologic agent is generally unnecessary, but when culture and susceptibility information are available, they should be considered in selecting or modifying antibacterial therapy. Aemcolo was not shown to be effective in patients with diarrhea complicated by fever and/or bloody stool. The effectiveness of Aemcolo in TD caused by pathogens other than E. coli has not been demonstrated. [1, 2]
C. According to the Centers for Disease Control and Prevention's Yellow Book, fluoroquinolones including, but not limited to, ciprofloxacin and levofloxacin, are considered first line agents in the treatment of TD. Azithromycin is also considered a first line agent for treatment of TD and is especially efficacious in the pediatric population. [2, 3]

Prior Authorization Guideline

Guideline ID	GL-228784
Guideline Name	Afinitor, Afinitor Disperz (everolimus) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Afinitor (everolimus tablet)
Advanced Neuroendocrine Tumors of Pancreatic Origin (PNET) Indicated for the treatment of progressive PNET in adult patients with unresectable, locally advanced or metastatic disease. Afinitor is not indicated for the treatment of patients with functional carcinoid tumors. **Advanced Renal Cell Carcinoma (RCC)** Indicated for the treatment of adult patients with advanced RCC after failure of treatment with sunitinib or sorafenib. **Renal Angiomyolipoma with Tuberous Sclerosis Complex (TSC)** Indicated for the treatment of adult patients with renal angiomyolipoma and tuberous sclerosis complex (TSC), not requiring immediate surgery. **Subependymal Giant Cell Astrocytoma (SEGA)** Indicated for the treatment of adult and pediatric patients aged 1 year and older with TSC who have subependymal giant cell astrocytoma (SEGA) that requires therapeutic intervention but cannot be curatively resected. **Advanced Hormone Receptor-Positive, HER2-Negative Breast Cancer (Advanced HR + BC)** Indicated for the treatment of postmenopausal women with advanced hormone receptor-

positive, HER2-negative breast cancer (advanced HR+ BC) in combination with exemestane, after failure of treatment with letrozole or anastrozole.

Neuroendocrine Tumors of Gastrointestinal or Lung Origin Indicated for the treatment of adults with progressive, well-differentiated, non-functional neuroendocrine tumors (NET) of gastrointestinal (GI) or lung origin that are unresectable, locally advanced or metastatic. AFINITOR is not indicated for the treatment of patients with functional carcinoid tumors.

Drug Name: Torpenz (everolimus tablet)

Renal Angiomyolipoma with Tuberous Sclerosis Complex (TSC) Indicated for the treatment of adult patients with renal angiomyolipoma and tuberous sclerosis complex (TSC), not requiring immediate surgery.

Subependymal Giant Cell Astrocytoma (SEGA) Indicated for the treatment of adult and pediatric patients aged 1 year and older with TSC who have subependymal giant cell astrocytoma (SEGA) that requires therapeutic intervention but cannot be curatively resected.

Advanced Hormone Receptor-Positive, HER2-Negative Breast Cancer (Advanced HR + BC) Indicated for the treatment of postmenopausal women with advanced hormone receptor-positive, HER2-negative breast cancer (advanced HR+ BC) in combination with exemestane, after failure of treatment with letrozole or anastrozole.

Drug Name: Afinitor Disperz (everolimus tablet for oral suspension)

Subependymal Giant Cell Astrocytoma (SEGA) Indicated for the treatment of adult and pediatric patients aged 1 year and older with TSC who have subependymal giant cell astrocytoma (SEGA) that requires therapeutic intervention but cannot be curatively resected. The effectiveness of Afinitor Disperz is based on demonstration of durable objective response, as evidenced by reduction in SEGA tumor volume. Improvement in disease-related symptoms and overall survival in patients with SEGA and TSC has not been demonstrated.

Tuberous Sclerosis Complex (TSC) Associated Partial-onset Seizures Indicated for the adjunctive treatment of adult and pediatric patients aged 2 years and older with TSC-associated partial-onset seizures

2 - Trial and failure or intolerance to generic everolimus tablet (applies to Brand Afinitor only)

Product Name:Brand Afinitor	
Diagnosis	Breast cancer
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
AFINITOR	EVEROLIMUS TAB 2.5 MG	21532530000310	Brand
AFINITOR	EVEROLIMUS TAB 5 MG	21532530000320	Brand
AFINITOR	EVEROLIMUS TAB 7.5 MG	21532530000325	Brand
AFINITOR	EVEROLIMUS TAB 10 MG	21532530000330	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of hormone receptor positive, HER-2 negative advanced breast cancer

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to one of the following*:

- Femara (letrozole)
- Arimidex (anastrozole)

AND

3 - Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) to generic everolimus tablet

AND

4 - Submission of medical records confirming the formulary alternative(s) has not been effective AND justification/rationale provided explaining how Brand Afinitor is expected to provide benefit when the formulary alternative has not been shown to be effective despite having the same active ingredient

Notes	*Criterion is part of the FDA-approved label.

Prior Authorization Guideline

Guideline ID	GL-228785
Guideline Name	Afrezza (insulin human, inhalation powder) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Afrezza (insulin human, inhalation powder)
Diabetes Mellitus Indicated to improve glycemic control in adult patients with diabetes mellitus. Limitations of Use: Afrezza is not recommended for the treatment of diabetic ketoacidosis. The safety and efficacy of Afrezza in patients who smoke has not been established. The use of Afrezza is not recommended in patients who smoke or who have recently stopped smoking.

2 . Criteria

Product Name:Afrezza	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AFREZZA	INSULIN REGULAR (HUMAN) INHALATION POWDER 4 UNIT/CARTRIDGE	27104010002940	Brand
AFREZZA	INSULIN REGULAR (HUMAN) INH POWD 4 & 8 & 12 UNIT/CART (60)	27104010002990	Brand
AFREZZA	INSULIN REGULAR (HUMAN) INHALATION POWDER 12 UNIT/CARTRIDGE	27104010002955	Brand
AFREZZA	INSULIN REGULAR (HUMAN) INHAL POWD 90 X 4 UNIT & 90 X 8 UNIT	27104010002978	Brand
AFREZZA	INSULIN REGULAR (HUMAN) INH POWD 90 X 8 UNIT & 90 X 12 UNIT	27104010002988	Brand
AFREZZA	INSULIN REGULAR (HUMAN) INHALATION POWDER 8 UNIT/CARTRIDGE	27104010002950	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of type 1 diabetes mellitus

AND

1.1.2 Used in combination with a long-acting insulin (e.g., Lantus, Levemir)

OR

1.2 Diagnosis of type 2 diabetes mellitus

AND

2 - Unable to self-inject short-acting insulin multiple times daily due to one of the following: [4]

- Physical impairment
- Visual impairment

- Lipohypertrophy

AND

3 - Documented FEV1 within the last 60 days greater than or equal to 70% of expected normal as determined by the physician [A]

AND

4 - Prescribed by or in consultation with an endocrinologist

AND

5 - Afrezza will NOT be approved in patients:

- Who smoke cigarettes
- Who recently quit smoking (within the past 6 months) [B]
- With chronic lung disease (e.g., asthma, chronic obstructive pulmonary disease [COPD]) [C]

Product Name:Afrezza	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Prior Authorization Guideline

Guideline ID	GL-228343
Guideline Name	Agamree (vamorolone)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Agamree (vamorolone)
Duchenne muscular dystrophy (DMD) Indicated for the treatment of Duchenne muscular dystrophy (DMD) in patients 2 years of age and older.

2 . Criteria

Product Name:Agamree	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AGAMREE	VAMOROLONE ORAL SUSP 40 MG/ML	22100075001820	Brand

Approval Criteria

1 - Diagnosis of Duchenne muscular dystrophy (DMD)

AND

2 - Patient is 2 years of age or older

AND

3 - Patient has received genetic testing for a mutation of the dystrophin gene [A, 2]

AND

4 - One of the following: [A, 2]

4.1 Patient has a confirmed mutation of the dystrophin gene

OR

4.2 Muscle biopsy confirmed an absence of dystrophin protein

AND

5 - Trial and failure or intolerance to both of the following [2]:

- prednisone or prednisolone 0.75 mg/kg/day or 10 mg/kg/weekend [B, 3]
- generic deflazacort oral suspension*

AND

6 - Prescribed by or in consultation with a neurologist who has experience treating children

AND

7 - One of the following:

7.1 For patients less than or equal to 50kg, dose will not exceed 6mg/kg of body weight once daily

OR

7.2 For patients greater than 50kg, dose will not exceed 300mg/day

Notes	*This product may require prior authorization

Product Name:Agamree	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AGAMREE	VAMOROLONE ORAL SUSP 40 MG/ML	22100075001820	Brand

Approval Criteria

1 - Patient has experienced a benefit from therapy (e.g., improvement in preservation of muscle strength)

AND

2 - One of the following:

2.1 For patients less than or equal to 50kg, dose will not exceed 6mg/kg of body weight once daily **OR** **2.2** For patients greater than 50kg, dose will not exceed 300mg/day **AND** **3** - Trial and failure or intolerance to both of the following: [2] • prednisone or prednisolone 0.75 mg/kg/day or 10 mg/kg/weekend [B, 3] • generic deflazacort oral suspension*	
Notes	*This product may require prior authorization

3 . Endnotes

A. Approximately 70% of individuals with DMD have a single-exon or multi-exon deletion or duplication in the dystrophin gene, dystrophin gene deletion, and duplication testing is usually the first confirmatory test. If genetic testing does not confirm a clinical diagnosis of DMD, then a muscle biopsy sample should be tested for the presence of dystrophin protein by immunohistochemistry of tissue cryosections or by western blot of a muscle protein extract. [2]
B. Prednisone 0.75 mg/kg/d should be considered the optimal prednisone dose in DMD. Over 12 months, prednisone 10 mg/kg/weekend is equally effective, although long term outcomes of this alternative regimens are unknown. [3]

Aldurazyme (laronidase)

Prior Authorization Guideline

Guideline ID	GL-228346
Guideline Name	Aldurazyme (laronidase)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Aldurazyme (laronidase)
Mucopolysaccharidosis I (MPS I) Indicated for adult and pediatric patients with Hurler and Hurler-Scheie forms of Mucopolysaccharidosis I (MPS I) and for patients with the Scheie form who have moderate to severe symptoms. The risks and benefits of treating mildly affected patients with the Scheie form have not been established. Aldurazyme has not been evaluated for effects of the central nervous system manifestations of the disorder.

2 . Criteria

Product Name:Aldurazyme	
Approval Length	12 month(s)

Alecensa (alectinib)

Prior Authorization Guideline

Guideline ID	GL-228786
Guideline Name	Alecensa (alectinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Alecensa (alectinib)
Treatment of Metastatic ALK-Positive Non-Small Cell Lung Cancer Indicated for the treatment of patients with anaplastic lymphoma kinase (ALK)-positive metastatic non-small cell lung cancer (NSCLC) as detected by an FDA-approved test. **Adjuvant Treatment of Resected ALK-Positive Non-Small Cell Lung Cancer** Indicated as adjuvant treatment in adult patients following tumor resection of anaplastic lymphoma kinase (ALK)-positive non-small cell lung cancer (NSCLC) (tumors ≥ 4 cm or node positive), as detected by an FDA-approved test

2 . Criteria

Product Name:Alecensa

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALECENSA	ALECTINIB HCL CAP 150 MG (BASE EQUIVALENT)	21530507100120	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer

Notes	*CLIA-certified laboratories: https://wwwn.cdc.gov/clia/Resources/LabSearch.aspx

Product Name:Alecensa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALECENSA	ALECTINIB HCL CAP 150 MG (BASE EQUIVALENT)	21530507100120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-228787
Guideline Name	Alfa Interferons
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Intron A (interferon alfa-2b)
Hairy Cell Leukemia Indicated for the treatment of patients 18 years of age or older with hairy cell leukemia. **Malignant Melanoma** Indicated as adjuvant to surgical treatment in patients 18 years of age or older with malignant melanoma who are free of disease but at high risk for systemic recurrence, within 56 days of surgery. **Follicular Lymphoma** Indicated for the initial treatment of clinically aggressive follicular Non-Hodgkin's Lymphoma in conjunction with anthracycline-containing combination chemotherapy in patients 18 years of age or older. Efficacy of Intron A therapy in patients with low-grade, low-tumor burden follicular Non-Hodgkin's Lymphoma has not been demonstrated. **Condylomata Acuminata** Indicated for intralesional treatment of selected patients 18 years of age or older with condylomata acuminata involving external surfaces of the genital and perianal areas. The use of this product in adolescents has not been studied. **AIDS-Related Kaposi's Sarcoma** Indicated for the treatment of selected patients 18 years of age or older with AIDS-Related Kaposi's Sarcoma. The likelihood of response to Intron A

therapy is greater in patients who are without systemic symptoms, who have limited lymphadenopathy and who have a relatively intact immune system as indicated by total CD4 count.

Chronic Hepatitis C Indicated for the treatment of chronic hepatitis C in patients 18 years of age or older with compensated liver disease who have a history of blood or blood-product exposure and/or are HCV antibody positive. Studies in these patients demonstrated that Intron A therapy can produce clinically meaningful effects on this disease, manifested by normalization of serum alanine aminotransferase (ALT) and reduction in liver necrosis and degeneration. A liver biopsy should be performed to establish the diagnosis of chronic hepatitis. Patients should be tested for the presence of antibody to HCV. Patients with other causes of chronic hepatitis, including autoimmune hepatitis, should be excluded. Prior to initiation of Intron A therapy, the physician should establish that the patient has compensated liver disease. The following patient entrance criteria for compensated liver disease were used in the clinical studies and should be considered before Intron A treatment of patients with chronic hepatitis C: - No history of hepatic encephalopathy, variceal bleeding, ascites, or other clinical signs of decompensation - Bilirubin less than or equal to 2 mg/dL - Albumin stable and within normal limits - Prothrombin time less than 3 seconds prolonged - WBC greater than or equal to 3,000/mm3 - Platelets greater than or equal to 70,000/mm3. Serum creatinine should be normal or near normal. Prior to initiation of Intron A therapy, CBC and platelet counts should be evaluated in order to establish baselines for monitoring potential toxicity. These tests should be repeated at Weeks 1 and 2 following initiation of Intron A therapy, and monthly thereafter. Serum ALT should be evaluated at approximately 3-month intervals to assess response to treatment. Patients with preexisting thyroid abnormalities may be treated if thyroid-stimulating hormone (TSH) levels can be maintained in the normal range by medication. TSH levels must be within normal limits upon initiation of Intron A treatment and TSH testing should be repeated at 3 and 6 months. Intron A in combination with Rebetol is indicated for the treatment of chronic hepatitis C in patients 3 years of age and older with compensated liver disease previously untreated with alpha interferon therapy and in patients 18 years of age and older who have relapsed following alpha interferon therapy. See Rebetol prescribing information for additional information.

Chronic Hepatitis B Indicated for the treatment of chronic hepatitis B in patients 1 year of age or older with compensated liver disease. Patients who have been serum HBsAg positive for at least 6 months and have evidence of HBV replication (serum HBeAg positive) with elevated serum ALT are candidates for treatment. Studies in these patients demonstrated that Intron A therapy can produce virologic remission of this disease (loss of serum HBeAg), and normalization of serum aminotransferases. Intron A therapy resulted in the loss of serum HBsAg in some responding patients. Prior to initiation of Intron A therapy, it is recommended that a liver biopsy be performed to establish the presence of chronic hepatitis and the extent of liver damage. The physician should establish that the patient has compensated liver disease. The following patient entrance criteria for compensated liver disease were used in the clinical studies and should be considered before Intron A treatment of patients with chronic hepatitis B: - No history of hepatic encephalopathy, variceal bleeding, ascites, or other signs of clinical decompensation - Bilirubin normal - Albumin stable and within normal limits - Prothrombin Time - adults < 3 seconds prolonged, pediatrics less than or equal to 2 seconds prolonged - WBC greater than or equal to 4,000/mm^3 - Platelets - adults greater than or equal to 100,000/mm^3, pediatrics greater than or equal to 150,000/mm^3. Patients with causes of chronic hepatitis other than chronic hepatitis B or chronic hepatitis C should not be treated with Intron A. CBC and platelet counts should be evaluated prior to initiation of Intron

A therapy in order to establish baselines for monitoring potential toxicity. These tests should be repeated at treatment Weeks 1, 2, 4, 8, 12, and 16. Liver function tests, including serum ALT, albumin, and bilirubin, should be evaluated at treatment Weeks 1, 2, 4, 8, 12, and 16. HBeAg, HBsAg, and ALT should be evaluated at the end of therapy, as well as 3- and 6-months post-therapy, since patients may become virologic responders during the 6-month period following the end of treatment. In clinical studies in adults, 39% (15/38) of responding patients lost HBeAg 1 to 6 months following the end of Intron A therapy. Of responding patients who lost HBsAg, 58% (7/12) did so 1 to 6 months post-treatment. A transient increase in ALT greater than or equal to 2 x baseline value (flare) can occur during Intron A therapy for chronic hepatitis B. In clinical trials in adults and pediatrics, this flare generally occurred 8 to 12 weeks after initiation of therapy and was more frequent in Intron A responders (adults 63%, 24/38; pediatrics 59%, 10/17) than in non-responders (adults 27%, 13/48; pediatrics 35%, 19/55). However, in adults and pediatrics, elevations in bilirubin 3 mg/dL (2 times ULN) occurred infrequently (adults 2%, 2/86; pediatrics 3%, 2/72) during therapy. When ALT flare occurs, in general, Intron A therapy should be continued unless signs and symptoms of liver failure are observed. During ALT flare, clinical symptomatology and liver function tests including ALT, prothrombin time, alkaline phosphatase, albumin, and bilirubin, should be monitored at approximately 2-week intervals.

Drug Name: Pegasys (peginterferon alfa-2a)

Chronic Hepatitis C 1) Indicated for the treatment of Chronic Hepatitis C (CHC) in combination therapy with other hepatitis C virus drugs for adults with compensated liver disease. PEGASYS monotherapy is indicated only if patient has contraindication or significant intolerance to other HCV drugs. 2) indicated for the treatment of Chronic Hepatitis C (CHC) in combination with ribavirin for pediatric patients 5 years of age and older with compensated liver disease. Limitations of use: Pegasys alone or in combination with ribavirin without additional HCV antiviral drugs is not recommended for treatment of patients with CHC who previously failed therapy with an interferon-alfa. - Pegasys is not recommended for treatment of patients with CHC who have had solid organ transplantation.

Chronic Hepatitis B Indicated for the treatment of adult patients with HBeAg-positive and HBeAg-negative chronic hepatitis B infection who have compensated liver disease and evidence of viral replication and liver inflammation. Indicated for the treatment of HBeAg-positive CHB in non-cirrhotic pediatric patients 3 years of age and older with evidence of viral replication and elevations in serum alanine aminotransferase (ALT).

2 . Criteria

Product Name:Intron A	
Diagnosis	Chronic Hepatitis C
Approval Length	48 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INTRON A	INTERFERON ALFA-2B FOR INJ 10000000 UNIT	21700060202130	Brand
INTRON A	INTERFERON ALFA-2B FOR INJ 50000000 UNIT	21700060202160	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C

AND

2 - Patients without decompensated liver disease**

AND

3 - For patients who have not previously been treated with interferon

AND

4 - One of the following:

- Contraindication or intolerance to ribavirin
- Used in combination with ribavirin

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

Notes	**Defined as Child-Pugh Class B or C

Product Name:Pegasys	
Diagnosis	Chronic Hepatitis C
Approval Length	28 Week(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PEGASYS	PEGINTERFERON ALFA-2A INJ 180 MCG/ML	12353060052020	Brand

Prior Authorization Guideline

Guideline ID	GL-228790
Guideline Name	Alpha-1 Proteinase Inhibitors
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Aralast NP (alpha-1-proteinase inhibitor [human])
Alpha-1 proteinase inhibitor deficiency (also known as alpha-1-antitrypsin (AAT) deficiency) Indicated for chronic augmentation therapy in adults with clinically evident emphysema due to severe congenital deficiency of Alpha1-PI (alpha1-antitrypsin deficiency). Aralast NP increases antigenic and functional (anti-neutrophil elastase capacity, ANEC) serum levels and antigenic lung epithelial lining fluid levels of Alpha1-PI. The effect of augmentation therapy with Alpha1-PI, including Aralast NP, on pulmonary exacerbations and on the progression of emphysema in alpha-1-antitrypsin deficiency has not been conclusively demonstrated in randomized, controlled clinical trials. Clinical data demonstrating the long-term effects of chronic augmentation and maintenance therapy with Aralast NP or Aralast are not available. Aralast NP is not indicated as therapy for lung disease patients in whom severe congenital Alpha-1-PI deficiency has not been established.
Drug Name: Glassia (alpha-1-proteinase inhibitor [human])
Alpha-1 proteinase inhibitor deficiency (also known as alpha-1-antitrypsin (AAT) deficiency) Indicated for chronic augmentation and maintenance therapy in individuals with clinically evident emphysema due to severe hereditary deficiency of Alpha1-PI, also known as alpha1-antitrypsin (AAT) deficiency. Limitations of Use: The effect of augmentation therapy

with Glassia or any Alpha1-PI product on pulmonary exacerbations and on the progression of emphysema in Alpha1-PI deficiency has not been conclusively demonstrated in randomized, controlled clinical trials. Clinical data demonstrating the long-term effects of chronic augmentation and maintenance therapy of individuals with Glassia are not available. Glassia is not indicated as therapy for lung disease in patients in whom severe Alpha1-PI deficiency has not been established.

Drug Name: Prolastin-C (alpha-1-proteinase inhibitor [human]), Prolastin-C liquid (alpha-1-proteinase inhibitor [human])

Alpha-1 proteinase inhibitor deficiency (also known as alpha-1-antitrypsin (AAT) deficiency) Indicated for chronic augmentation and maintenance therapy in adults with clinical evidence of emphysema due to severe hereditary deficiency of Alpha1-PI (alpha1-antitrypsin deficiency). Prolastin-C increases antigenic and functional (anti-neutrophil elastase capacity, ANEC) serum levels and antigenic lung epithelial lining fluid levels of Alpha1-PI. Limitations of Use: The effect of augmentation therapy with any Alpha-1-PI product on pulmonary exacerbations and on the progression of emphysema in Alpha1-PI deficiency has not been conclusively demonstrated in randomized, controlled clinical trials. Clinical data demonstrating the long-term effects of chronic augmentation or maintenance therapy with Prolastin-C are not available. Prolastin-C is not indicated as therapy for lung disease in patients in whom severe Alpha-1-PI deficiency has not been established.

Drug Name: Zemaira (alpha-1-proteinase inhibitor [human])

Alpha-1 proteinase inhibitor deficiency (also known as alpha-1-antitrypsin (AAT) deficiency) Indicated for chronic augmentation and maintenance therapy in adults with Alpha1-PI deficiency and clinical evidence of emphysema. Zemaira increases antigenic and functional (ANEC) serum levels and lung epithelial lining fluid levels of Alpha1-PI. Clinical data demonstrating the long-term effects of chronic augmentation therapy of individuals with Zemaira are not available. The effect of augmentation therapy with Zemaira or any Alpha1-PI product on pulmonary exacerbations and on the progression of emphysema in Alpha1-PI deficiency has not been demonstrated in randomized, controlled clinical trials. Zemaira is not indicated as therapy for lung disease patients in whom severe Alpha1-PI deficiency has not been established.

2 . Criteria

Approval Criteria

1 - Diagnosis of congenital alpha-1 antitrypsin (AAT) deficiency

AND

2 - Diagnosis of emphysema [A]

AND

3 - One of the following:

3.1 Pi*ZZ, Pi*Z(null) or Pi*(null)(null) protein phenotypes (homozygous) [6]

OR

3.2 Other rare AAT disease genotypes associated with pre-treatment serum alpha1-antitrypsin (AAT) level less than 11 micromole per liter [e.g., Pi(Malton, Malton), Pi(SZ)] [B]

AND

4 - One of the following:

4.1 Circulating pre-treatment serum alpha1-antitrypsin (AAT) level less than 11 micromole per liter (which corresponds to less than 80 mg/dL if measured by radial immunodiffusion or less than 57 mg/dL if measured by nephelometry) [B, 10]

OR

4.2 Patient has a concomitant diagnosis of necrotizing panniculitis

AND

5 - Continued optimal conventional treatment for emphysema (e.g., bronchodilators)

AND

6 - One of the following: [8, 9, 10]

6.1 The FEV1 level is less than or equal to 65% of predicted

OR

6.2 Patient has experienced a rapid decline in lung function (i.e., reduction of FEV1 more than 120 mL/year) that warrants treatment [9]

OR

6.3 Patient has a concomitant diagnosis of necrotizing panniculitis

AND

7 - Patient is NOT a current smoker [C]

Product Name:Aralast NP, Glassia, Prolastin-C, Prolastin-C liquid, or Zemaira	
Approval Length	12 month(s)

ZEMAIRA	ALPHA1-PROTEINASE INHIBITOR (HUMAN) FOR IV SOLN 5000 MG	45100010102150	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Continued optimal conventional treatment for emphysema (e.g., bronchodilators)

3 . Endnotes

A. Currently, augmentation therapy is not recommended for patients without emphysema. [3, 8] Some individuals with AAT deficiency will not go on to develop panacinar

emphysema, only those with evidence of such disease should be considered for augmentation therapy.

B. Population studies suggest a minimum plasma threshold of 11 µmol/L (corresponding to 80 mg/dL in some assays and ~57 mg/dL by nephelometry), below which there is insufficient AAT to protect the lung, leading to a risk of developing emphysema. [3, 6-9]
C. The GOLD report recommends reserving alpha-1 antitrypsin augmentation therapy for those with evidence of continued and rapid progression following smoking cessation. [8]

Guideline ID	GL-228765
Guideline Name	Alvaiz (eltrombopag)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Alvaiz (eltrombopag)
Treatment of Thrombocytopenia in Patients with Persistent or Chronic Immune Thrombocytopenia Indicated for the treatment of thrombocytopenia in adult and pediatric patients 6 years and older with persistent or chronic immune thrombocytopenia (ITP) who have had an insufficient response to corticosteroids, immunoglobulins, or splenectomy. ALVAIZ should be used only in patients with ITP whose degree of thrombocytopenia and clinical condition increase the risk for bleeding. **Treatment of Thrombocytopenia in Patients with Hepatitis C Infection** Indicated for the treatment of thrombocytopenia in adult patients with chronic hepatitis C to allow the initiation and maintenance of interferon-based therapy. ALVAIZ should be used only in patients with chronic hepatitis C whose degree of thrombocytopenia prevents the initiation of interferon-based therapy or limits the ability to maintain interferon-based therapy. **Treatment of Severe Aplastic Anemia** Indicated for the treatment of adult patients with severe aplastic anemia who have had an insufficient response to immunosuppressive therapy. **Limitations of Use** ALVAIZ is not indicated for the treatment of patients with myelodysplastic

syndromes (MDS). Safety and efficacy have not been established in combination with direct-acting antiviral agents used without interferon for treatment of chronic hepatitis C infection.

2 . Criteria

Product Name:Alvaiz	
Diagnosis	Immune thrombocytopenia (ITP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALVAIZ	ELTROMBOPAG CHOLINE TAB 9 MG (BASE EQUIV)	82405030050310	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 18 MG (BASE EQUIV)	82405030050320	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 36 MG (BASE EQUIV)	82405030050330	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 54 MG (BASE EQUIV)	82405030050340	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Persistent ITP
- Chronic ITP
- Relapsed/refractory ITP [6]

AND

2 - Baseline platelet count is less than 30,000/mcL

AND

3 - Trial and failure, contraindication, or intolerance to one of the following:

- Corticosteroids
- Immunoglobulins
- Splenectomy

AND

4 - Patient's degree of thrombocytopenia and clinical condition increase the risk of bleeding

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Alvaiz	
Diagnosis	Immune thrombocytopenia (ITP)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALVAIZ	ELTROMBOPAG CHOLINE TAB 9 MG (BASE EQUIV)	82405030050310	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 18 MG (BASE EQUIV)	82405030050320	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 36 MG (BASE EQUIV)	82405030050330	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 54 MG (BASE EQUIV)	82405030050340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by an increase in platelet count to a level sufficient to avoid clinically important bleeding

Product Name:Alvaiz	
Diagnosis	Refractory Severe Aplastic Anemia
Approval Length	16 Weeks [B]

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALVAIZ	ELTROMBOPAG CHOLINE TAB 9 MG (BASE EQUIV)	82405030050310	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 18 MG (BASE EQUIV)	82405030050320	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 36 MG (BASE EQUIV)	82405030050330	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 54 MG (BASE EQUIV)	82405030050340	Brand

Approval Criteria

1 - Diagnosis of refractory severe aplastic anemia (SAA)

AND

2 - Trial and failure, contraindication, or intolerance to immunosuppressive therapy with antithymocyte globulin (ATG) and cyclosporine

AND

3 - Patient has thrombocytopenia defined as platelet count less than 30,000/mcL

AND

4 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Alvaiz	
Diagnosis	Refractory Severe Aplastic Anemia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

ALVAIZ	ELTROMBOPAG CHOLINE TAB 9 MG (BASE EQUIV)	82405030050310	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 18 MG (BASE EQUIV)	82405030050320	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 36 MG (BASE EQUIV)	82405030050330	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 54 MG (BASE EQUIV)	82405030050340	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by an increase in platelet count

Product Name:Alvaiz	
Diagnosis	Chronic Hepatitis C-Associated Thrombocytopenia
Approval Length	3 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALVAIZ	ELTROMBOPAG CHOLINE TAB 9 MG (BASE EQUIV)	82405030050310	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 18 MG (BASE EQUIV)	82405030050320	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 36 MG (BASE EQUIV)	82405030050330	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 54 MG (BASE EQUIV)	82405030050340	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C-associated thrombocytopenia

AND

2 - One of the following:

2.1 Planning to initiate and maintain interferon-based treatment [1]

OR

2.2 Currently receiving interferon-based treatment

AND

3 - Prescribed by or in consultation with one of the following:

- Hematologist/oncologist
- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

Product Name:Alvaiz	
Diagnosis	Chronic Hepatitis C-Associated Thrombocytopenia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ALVAIZ	ELTROMBOPAG CHOLINE TAB 9 MG (BASE EQUIV)	82405030050310	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 18 MG (BASE EQUIV)	82405030050320	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 36 MG (BASE EQUIV)	82405030050330	Brand
ALVAIZ	ELTROMBOPAG CHOLINE TAB 54 MG (BASE EQUIV)	82405030050340	Brand

Approval Criteria

1 - One of the following:

1.1 For patients that started treatment with Alvaiz prior to initiation of treatment with interferon, Alvaiz will be approved when both of the following criteria are met:

1.1.1 Currently on antiviral interferon therapy for treatment of chronic hepatitis C [1]

AND

1.1.2 Documentation that the patient reached a threshold platelet count that allows initiation of antiviral interferon therapy with Alvaiz treatment by week 9 [A]

OR

1.2 For patients that started treatment with Alvaiz while on concomitant treatment with interferon, Alvaiz will be approved based on the following criterion:

- Currently on antiviral interferon therapy for treatment of chronic hepatitis C

3 . Endnotes

A. Eltrombopag was studied in two phase 3 trials for chronic hepatitis C-associated thrombocytopenia in two periods. Patients received eltrombopag in the first period for a maximum of 9 weeks in order to achieve a pre-specified threshold platelet count (greater than or equal to 90 x 10^9/L for Trial 1 and greater than or equal to 100 x 10^9/L for Trial 2); if the pre-specified threshold platelet count was reached, eltrombopag was administered in combination with pegylated interferon and ribavirin for up to 48 weeks in the second period. The lowest dose of Alvaiz should be used to achieve and maintain a platelet count necessary to initiate and maintain antiviral therapy with pegylated interferon and ribavirin. Dose adjustments are based upon the platelet count response.[1]

B. In patients with refractory severe aplastic anemia, hematologic response requires dose titration, generally up to 108 mg, and may take up to 16 weeks after starting Alvaiz. The dose should be adjusted every 2 weeks as necessary to achieve the target platelet count greater than or equal to 50 x 10^9/L. If no hematologic response has occurred after 16 weeks of therapy with Alvaiz, therapy should be discontinued. [1]

Prior Authorization Guideline

Guideline ID	GL-228791
Guideline Name	Ampyra (dalfampridine) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ampyra (dalfampridine)
Improvement in walking in patients with multiple sclerosis Indicated as a treatment to improve walking in adult patients with multiple sclerosis (MS). This was demonstrated by an increase in walking speed.

2 . Criteria

Product Name:Brand Ampyra, Generic dalfampridine extended-release	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AMPYRA	DALFAMPRIDINE TAB SR 12HR 10 MG	62406030007420	Brand
DALFAMPRIDINE ER	DALFAMPRIDINE TAB ER 12HR 10 MG	62406030007420	Generic

Approval Criteria

1 - Diagnosis of multiple sclerosis [A]

AND

2 - Physician confirmation that patient has difficulty walking (e.g., timed 25-foot walk test) [B]

AND

3 - One of the following:

- Patient has an expanded disability status scale (EDSS) score less than or equal to 7
- Patient is not restricted to using a wheelchair (if EDSS is not measured)

AND

4 - For brand Ampyra, trial and failure or intolerance to generic dalfampridine extended-release

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Brand Ampyra, Generic dalfampridine extended-release	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AMPYRA	DALFAMPRIDINE TAB SR 12HR 10 MG	62406030007420	Brand
DALFAMPRIDINE ER	DALFAMPRIDINE TAB ER 12HR 10 MG	62406030007420	Generic

Approval Criteria

1 - Physician confirmation that the patient's walking improved with therapy

AND

2 - One of the following:

- Patient has an expanded disability status scale (EDSS) score less than or equal to 7
- Patient is not restricted to using a wheelchair (if EDSS is not measured)

AND

3 - For brand Ampyra, trial and failure or intolerance to generic dalfampridine extended-release

Product Name:Brand Ampyra	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
AMPYRA	DALFAMPRIDINE TAB SR 12HR 10 MG	62406030007420	Brand

Approval Criteria

1 - Diagnosis of multiple sclerosis [A]

AND

2 - Submission of medical records (e.g., chart notes) documenting physician confirmation that patient has difficulty walking (e.g., timed 25-foot walk test) [B]

AND

3 - Submission of medical records (e.g., chart notes) documenting one of the following:

- Patient has an expanded disability status scale (EDSS) score less than or equal to 7
- Patient is not restricted to using a wheelchair (if EDSS is not measured)

AND

4 - Submission of medical records (e.g., chart notes) documenting trial and failure or intolerance to generic dalfampridine extended-release

AND

5 - Prescribed by or in consultation with a neurologist

3 . Endnotes

A. Patients with clinically definite MS of any type were included in the pivotal trials for Ampyra. [2, 3]
B. Inclusion criteria in the Ampyra pivotal trials included patients who were able to walk (with or without an assistive device) 25 feet in 8-45 seconds and 8-60 seconds in the two studies, respectively. [2, 3]

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233324
Guideline Name	Amvuttra (vutrisiran)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	2/18/2025
P&T Approval Date:	9/21/2022
P&T Revision Date:	9/18/2024

1 . Indications

Drug Name: Amvuttra (vutrisiran)
Hereditary transthyretin-mediated amyloidosis Indicated for the treatment of the polyneuropathy of hereditary transthyretin-mediated amyloidosis in adults.

2 . Criteria

Product Name:Amvuttra	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AMVUTTRA	VUTRISIRAN SODIUM SOLN PREFILLED SYRINGE 25 MG/0.5ML	6270609010E520	Brand

Approval Criteria

1 - Diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR amyloidosis) with polyneuropathy

AND

2 - Patient has a transthyretin (TTR) mutation (e.g., V30M) [1-3]

AND

3 - One of the following [1-4, A, B]:

- Patient has a baseline polyneuropathy disability (PND) score less than or equal to IIIb
- Patient has a baseline familial amyloidotic polyneuropathy (FAP) stage of 1 or 2
- Patient has a baseline neuropathy impairment score (NIS) greater than or equal to 5 and less than or equal to 130
- Patient has a baseline Karnofsky Performance Status score greater than or equal to 60%

AND

4 - Presence of clinical signs and symptoms of the disease (e.g., peripheral/autonomic neuropathy, walking ability, quality of life) [1-3]

AND

5 - Patient has not had a liver transplant [2-3]

AND

6 - Requested drug is not used in combination with a TTR silencer (e.g.,Tegsedi) or a TTR stabilizer (e.g., Vyndaqel)

AND

7 - Prescribed by or in consultation with a neurologist

Product Name:Amvuttra	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AMVUTTRA	VUTRISIRAN SODIUM SOLN PREFILLED SYRINGE 25 MG/0.5ML	6270609010E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by an improvement in clinical signs and symptoms from baseline (e.g., neuropathy, quality of life, gait speed, nutritional status, decrease in serum TTR level)

AND

2 - One of the following [1-4, A, B]:

- Patient continues to have a polyneuropathy disability (PND) score less than or equal to IIIb
- Patient continues to have a familial amyloidotic polyneuropathy (FAP) stage of 1 or 2
- Patient continues to have a neuropathy impairment score (NIS) greater than or equal to 5 and less than or equal to 130

- Patient continues to have a Karnofsky Performance Status score greater than or equal to 60%

AND

3 - Requested drug is not used in combination with a TTR silencer (e.g.,Tegsedi) or a TTR stabilizer (e.g., Vyndaqel)

AND

4 - Patient has not had a liver transplant [2-3]

3 . Endnotes

A. The efficacy of vutrisiran was demonstrated in a phase 3, open label, randomized clinical trial (HELIOS-A) in which efficacy endpoints for vutrisiran were compared to an external placebo group from the APOLLO trial. Similar recruitment criteria were used for both HELIOS-A and APOLLO which resulted in similar baseline characteristics between the treatment groups in HELIOS-A and the placebo group in APOLLO [2-3].
B. Baseline characteristics in HELIOS-A included 70% of patients with stage 1 disease and 30% of patients with stage 2 disease [1-2]. The European Medicines Agency lists the full indication for Amvuttra as treatment of hereditary transthyretin-mediated amyloidosis (hATTR amyloidosis) in adult patients with stage 1 or stage 2 polyneuropathy [4].

Prior Authorization Guideline

Guideline ID	GL-228348
Guideline Name	Angiotensin Receptor Blockers
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Edarbi (azilsartan medoxomil)
Hypertension Indicated for the treatment of hypertension to lower blood pressure. Edarbi may be used alone or in combination with other antihypertensive agents.
Drug Name: Edarbyclor (azilsartan and chlorthalidone)
Hypertension Indicated for the treatment of hypertension, to lower blood pressure. Edarbyclor may be used in patients whose blood pressure is not adequately controlled on monotherapy. Edarbyclor may be used as initial therapy if a patient is likely to need multiple drugs to achieve blood pressure goals.
Drug Name: Tekturna HCT (aliskiren and hydrochlorothiazide)
Hypertension Indicated for the treatment of hypertension, to lower blood pressure. Tekturna HCT may be used in patients not adequately controlled with monotherapy. It may also be used as initial therapy in patients likely to need multiple drugs to achieve their blood pressure goals.

Drug Name: Exforge HCT (amlodipine, valsartan, hydrochlorothiazide)
Hypertension Indicated for the treatment of hypertension, to lower blood pressure. Limitations of use: Exforge HCT is not indicated for the initial therapy of hypertension.

2 . Criteria

Anktiva (nogapendekin alfa inbakicept-pmln)

Prior Authorization Guideline

Guideline ID	GL-229068
Guideline Name	Anktiva (nogapendekin alfa inbakicept-pmln)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Anktiva (nogapendekin alfa inbakicept-pmln)
non-Muscle Invasive Bladder Cancer (NMIBC) Indicated with Bacillus Calmette-Guérin (BCG) for the treatment of adult patients with BCG unresponsive nonmuscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.

2 . Criteria

Product Name:Anktiva	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ANKTIVA	NOGAPENDEKIN ALFA INBAK-PMLN INTRAVESICAL SOLN 400 MCG/0.4ML	21703055652020	Brand

Approval Criteria

1 - Diagnosis of non-Muscle Invasive Bladder Cancer (NMIBC)

AND

2 - One of the following:

- Tumor is carcinoma in situ (CIS)
- Ta/T1 high grade disease

AND

3 - Patient is not eligible for or has elected not to undergo cystectomy

AND

4 - Patient has received an adequate course of Bacillus Calmette Guérin (BCG) monotherapy defined as the administration of at least 5 of 6 doses of an initial induction course plus one of the following:

- At least two of three doses of maintenance therapy
- At least two of six doses of a second induction course

AND

5 - Tumor is unresponsive to BCG monotherapy as defined by one of the following:

- Persistent disease following adequate BCG therapy
- Disease recurrence after an initial tumor-free state following adequate BCG therapy
- T1 disease following a single induction course of BCG

AND

6 - Medication is used in combination with Bacillus Calmette-Guérin (BCG) therapy

AND

7 - The patient has had all resectable disease (Ta and T1 components) removed

AND

8 - The patient does not have extra-vesical (i.e., urethra, ureter, or renal pelvis), muscle invasive (T2-T4), or metastatic urothelial carcinoma

Product Name:Anktiva	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ANKTIVA	NOGAPENDEKIN ALFA INBAK-PMLN INTRAVESICAL SOLN 400 MCG/0.4ML	21703055652020	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

4 . Revision History

Date	Notes
11/19/2024	2025 Implementation

Prior Authorization Guideline

Guideline ID	GL-233369
Guideline Name	Anti-Parkinson’s Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	5/22/1998
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Rytary (carbidopa and levodopa) extended-release capsules
Parkinson’s disease Indicated for the treatment of Parkinson's disease, post-encephalitic parkinsonism, and parkinsonism that may follow carbon monoxide intoxication or manganese intoxication
Drug Name: Duopa (carbidopa and levodopa) enteral suspension
Advanced Parkinson's disease Indicated for the treatment of motor fluctuations in patients with advanced Parkinson’s disease.
Drug Name: Xadago (safinamide) tablets
Parkinson’s disease Indicated as adjunctive treatment to levodopa/carbidopa in patients with Parkinson's disease experiencing "off" episodes.

Drug Name: Gocovri (amantadine) extended-release capsules
Dyskinesia in Parkinson's disease Indicated for the treatment of dyskinesia in patients with Parkinson's disease receiving levodopa-based therapy, with or without concomitant dopaminergic medications. **"Off" Episodes in Parkinson's Disease** Indicated as adjunctive treatment to levodopa/carbidopa in patients with Parkinson’s disease experiencing “off” episodes.
Drug Name: Osmolex ER (amantadine) extended-release tablets
Parkinson's Disease Indicated for the treatment of Parkinson's disease. **Drug-Induced Extrapyramidal Reactions** Indicated for the treatment of drug-induced extrapyramidal reactions in adult patients.
Drug Name: Dhivy (carbidopa-levodopa)
Parkinson's Disease Indicated for the treatment of Parkinson's disease, post-encephalitic parkinsonism, and symptomatic parkinsonism that may follow carbon monoxide intoxication or manganese intoxication.
Drug Name: Crexont (carbidopa and levodopa) extended-release capsules
Parkinson's Disease Indicated for the treatment of Parkinson’s disease, post-encephalitic parkinsonism, and parkinsonism that may follow carbon monoxide intoxication or manganese intoxication in adults.
Drug Name: Ongentys (opicapone)
Parkinson’s Disease Indicated as adjunctive treatment to levodopa/carbidopa in patients with Parkinson’s disease (PD) experiencing “off” episodes.
Drug Name: Vyalev (foscarbidopa and foslevodopa) subcutaneous injection
Advanced Parkinson’s disease Indicated for the treatment of motor fluctuations in adults with advanced Parkinson’s disease.

2 . Criteria

Product Name:Crexont, Rytary	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
RYTARY	CARBIDOPA & LEVODOPA CAP CR 23.75-95 MG	73209902100220	Brand
RYTARY	CARBIDOPA & LEVODOPA CAP CR 36.25-145 MG	73209902100230	Brand
RYTARY	CARBIDOPA & LEVODOPA CAP CR 48.75-195 MG	73209902100240	Brand
RYTARY	CARBIDOPA & LEVODOPA CAP CR 61.25-245 MG	73209902100250	Brand

CREXONT	CARBIDOPA & LEVODOPA CAP ER 52.5-210 MG	73209902100244	Brand
CREXONT	CARBIDOPA & LEVODOPA CAP ER 70-280 MG	73209902100255	Brand
CREXONT	CARBIDOPA & LEVODOPA CAP ER 87.5-350 MG	73209902100265	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply) of ONE of the following:

- Generic carbidopa-levodopa immediate release
- Generic carbidopa-levodopa extended release

Product Name:Xadago	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
XADAGO	SAFINAMIDE	73300028200330	Brand
XADAGO	SAFINAMIDE	73300028200320	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply) of BOTH of the following:

- rasagiline mesylate
- selegiline

Product Name:Duopa	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUOPA	CARBIDOPA-LEVODOPA ENTERAL SUSP 4.63-20 MG/ML	73209902101820	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is levodopa-responsive [A, B]

AND

3 - Patient experiences disabling “Off” periods for a minimum of 3 hours/day [B]

AND

4 - Disabling “Off" periods occur despite therapy with both of the following: [A, C]

- Oral levodopa-carbidopa
- One drug from a different class of anti-Parkinson's disease therapy (e.g., COMT inhibitor [entacapone, tolcapone], MAO-B inhibitor [selegiline, rasagiline], dopamine agonist [pramipexole, ropinirole])

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Duopa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUOPA	CARBIDOPA-LEVODOPA ENTERAL SUSP 4.63-20 MG/ML	73209902101820	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Gocovri	
Diagnosis	Dyskinesia in Parkinson’s Disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GOCOVRI	AMANTADINE HCL CAP ER 24HR 68.5 MG (BASE EQUIVALENT)	73200010107020	Brand
GOCOVRI	AMANTADINE HCL CAP ER 24HR 137 MG (BASE EQUIVALENT)	73200010107040	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is experiencing dyskinesia

AND

3 - Patient is receiving concurrent levodopa-based therapy [5, D]

AND

4 - Trial and failure or intolerance to amantadine immediate release

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Gocovri	
Diagnosis	"Off" Episodes in Parkinson's Disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GOCOVRI	AMANTADINE HCL CAP ER 24HR 68.5 MG (BASE EQUIVALENT)	73200010107020	Brand
GOCOVRI	AMANTADINE HCL CAP ER 24HR 137 MG (BASE EQUIVALENT)	73200010107040	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is experiencing "off" episodes [E, 6]

AND

3 - Used in combination with levodopa/carbidopa therapy [1]

AND

4 - Both of the following:

4.1 Trial and failure, or intolerance to amantadine immediate release

AND

4.2 Trial and failure, contraindication or intolerance to one of the following:

- MAO-B inhibitor (e.g., rasagiline, selegiline)
- Dopamine Agonist (e.g., pramipexole, ropinirole)
- COMT inhibitor (e.g., entacapone)

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Gocovri	
Diagnosis	All Indications
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GOCOVRI	AMANTADINE HCL CAP ER 24HR 68.5 MG (BASE EQUIVALENT)	73200010107020	Brand
GOCOVRI	AMANTADINE HCL CAP ER 24HR 137 MG (BASE EQUIVALENT)	73200010107040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decreased "off" periods, decreased "on" time with troublesome dyskinesia) [D]

Product Name:Osmolex ER	
Diagnosis	Parkinson's Disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR 129 MG (BASE EQUIVALENT)	73200010107520	Brand
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR 193 MG (BASE EQUIVALENT)	73200010107530	Brand
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR PAK 129 MG & 193 MG (322 MG DOSE)	7320001010C320	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Trial and failure, contraindication or intolerance to BOTH of the following:

2.1 amantadine immediate release

AND

2.2 ONE of the following: [9]

- carbidopa-levodopa
- MAO-B Inhibitor (e.g., rasagiline, selegiline)
- Dopamine Agonist (e.g., pramipexole, ropinirole)

AND

3 - Prescribed by or in consultation with a neurologist

Product Name:Osmolex ER	
Diagnosis	Drug-Induced Extrapyramidal Reactions
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR 129 MG (BASE EQUIVALENT)	73200010107520	Brand
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR 193 MG (BASE EQUIVALENT)	73200010107530	Brand
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR PAK 129 MG & 193 MG (322 MG DOSE)	7320001010C320	Brand

Approval Criteria

1 - Patient is experiencing drug-induced extrapyramidal reactions

AND

2 - One of the following: [10]

2.1 Patient has persistent extrapyramidal symptoms despite a trial of dose reduction, tapering, or discontinuation of the offending medication

OR

2.2 Patient is not a candidate for a trial of dose reduction, tapering, or discontinuation of the offending medication

AND

3 - Trial and failure or intolerance to amantadine immediate release

AND

4 - Prescribed by or in consultation with one of the following:

- Neurologist
- Psychiatrist

Product Name:Osmolex ER	
Diagnosis	Parkinson's Disease, Drug-Induced Extrapyramidal Reactions
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OSMOLEX ER	AMANTADINE HCL TAB ER 24HR 129 MG (BASE EQUIVALENT)	73200010107520	Brand

OSMOLEX ER	AMANTADINE HCL TAB ER 24HR PAK 129 MG & 193 MG (322 MG DOSE)	7320001010C320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Dhivy	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
DHIVY	CARBIDOPA & LEVODOPA TAB 25-100	73209902100320	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply) of both of the following:

- Generic carbidopa-levodopa immediate release (IR)
- Generic carbidopa-levodopa oral disintegrating tablet (ODT)

Product Name:Ongentys	
Diagnosis	Parkinson's Disease
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ONGENTYS	OPICAPONE CAP 25 MG	73153060000110	Brand
ONGENTYS	OPICAPONE CAP 50 MG	73153060000120	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (to a minimum 30 day supply), contraindication, or intolerance to entacapone

Product Name:Vyalev	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VYALEV	FOSLEVODOPA-FOSCARBIDOPA SUBCUTANEOUS INJ 240-12 MG/ML	73209902132020	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is levodopa-responsive

AND

3 - Patient experiences disabling “Off” periods for a minimum of 2.5 hours/day

AND

4 - Disabling “Off" periods occur despite therapy with both of the following:

- Oral levodopa-carbidopa
- One drug from a different class of anti-Parkinson's disease therapy (e.g., COMT inhibitor [entacapone, tolcapone], MAO-B inhibitor [selegiline, rasagiline], dopamine agonist [pramipexole, ropinirole])

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Vyalev	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VYALEV	FOSLEVODOPA-FOSCARBIDOPA SUBCUTANEOUS INJ 240-12 MG/ML	73209902132020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. The efficacy of Duopa was established in a randomized, double-blind, double-dummy, active controlled, parallel group, 12-week study in patients with advanced Parkinson's disease who were levodopa-responsive and had persistent motor fluctuations while on treatment with oral immediate-release carbidopa-levodopa and other Parkinson's disease medications. [2, 3]
B. Patients were eligible for participation in the studies if they were experiencing 3 hours or more of “Off” time on their current Parkinson's disease drug treatment and they demonstrated a clear responsiveness to treatment with levodopa. [2, 3]
C. Most patients (89%) were taking at least one concomitant medication for Parkinson’s disease (e.g., dopaminergic agonist, COMT-inhibitor, MAO B inhibitor) in addition to oral immediate-release carbidopa-levodopa. [2, 3]
D. The efficacy of Gocovri was established in two Phase III randomized, double-blind, placebo-controlled trials, a 12 week and 24 week study in patients with Parkinson's

disease were treated with levodopa. Both studies demonstrate statistically significant and clinically relevant reduction in dyskinesia compared to placebo. Also, both studies showed that Gocovri-treated patients experienced an increase in functional time daily (defined as ON time without troublesome dyskinesia) compared to placebo-treated patients. [6, 7]

E. “Off” time is defined as the amount of time the Parkinson’s Disease medication was not controlling motor symptoms. [6]

3/6/2025	Quartz Comm/EHB copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-228349
Guideline Name	Anticonvulsants
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Trokendi XR (topiramate extended-release)
Monotherapy Epilepsy Indicated as initial monotherapy for the treatment of partial-onset or primary generalized tonic-clonic seizures in patients 6 years of age and older **Adjunctive Therapy Epilepsy** Indicated as adjunctive therapy for the treatment of partial-onset seizures, primary generalized tonic-clonic seizures, and seizures associated with Lennox-Gastaut syndrome in patients 6 years of age and older **Migraine** Indicated for the preventive treatment of migraine in patients 12 years of age and older
Drug Name: Qudexy XR (topiramate extended-release)
Monotherapy Epilepsy Indicated as initial monotherapy for the treatment of partial-onset or primary generalized tonic-clonic seizures in patients 2 years of age and older. **Adjunctive Therapy Epilepsy** Indicated as adjunctive therapy for the treatment of partial-onset seizures, primary generalized tonic-clonic seizures, and seizures associated with Lennox-Gastaut Syndrome in patients 2 years of age and older.

Migraine Indicated for the preventive treatment of migraine in patients 12 years of age and older.
Drug Name: Eprontia (topiramate oral solution)
Monotherapy Epilepsy Indicated as initial monotherapy for the treatment of partial-onset or primary generalized tonic-clonic seizures in patients 2 years of age and older. **Adjunctive Therapy Epilepsy** Indicated as adjunctive therapy for the treatment of partial-onset seizures, primary generalized tonic-clonic seizures, and seizures associated with Lennox-Gastaut syndrome in patients 2 years of age and older. **Migraine** Indicated for the preventive treatment of migraine in patients 12 years and older.
Drug Name: Oxtellar XR (oxcarbazepine extended-release)
Partial-onset seizures Indicated for the treatment of partial-onset seizures in patients 6 years of age and older.
Drug Name: Briviact (brivaracetam)
Partial-onset seizures Indicated for the treatment of partial-onset seizures in patients 1 month of age and older.
Drug Name: Xcopri (cenobamate)
Partial-onset seizures Indicated for the treatment of partial-onset seizures in adult patients.
Drug Name: Elepsia XR (levetiracetam extended-release)
Partial-onset seizures Indicated as adjunctive therapy for the treatment of partial-onset seizures in patients 12 years of age and older.
Drug Name: Motpoly XR (lacosamide extended-release)
Partial-onset seizures Indicated for the treatment of partial-onset seizures in adults and pediatric patients weighing at least 50 kg.

Prior Authorization Guideline

Guideline ID	GL-229115
Guideline Name	Antiemetics Quantity Limit Overrides
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/25/2016
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Akynzeo (netupitant/palonosetron)
Chemotherapy-induced nausea and vomiting AKYNZEO capsules is indicated in combination with dexamethasone in adults for the prevention of acute and delayed nausea and vomiting associated with initial and repeat courses of cancer chemotherapy, including, but not limited to, highly emetogenic chemotherapy. AKYNZEO capsules is a combination of palonosetron and netupitant: palonosetron prevents nausea and vomiting during the acute phase and netupitant prevents nausea and vomiting during both the acute and delayed phase after cancer chemotherapy. AKYNZEO for injection and AKYNZEO injection are indicated in combination with dexamethasone in adults for the prevention of acute and delayed nausea and vomiting associated with initial and repeat courses of highly emetogenic cancer chemotherapy. AKYNZEO for injection is a combination of palonosetron and fosnetupitant, a prodrug of netupitant: palonosetron prevents nausea and vomiting during the acute phase and fosnetupitant prevents nausea and vomiting during both the acute and delayed phase after cancer chemotherapy. Limitations of Use: AKYNZEO for injection and AKYNZEO injection

have not been studied for the prevention of nausea and vomiting associated with anthracycline plus cyclophosphamide chemotherapy.

Drug Name: Anzemet (dolasetron)

Chemotherapy-induced nausea and vomiting Indicated for the prevention of nausea and vomiting associated with moderately emetogenic cancer chemotherapy, including initial and repeat courses in adults and children 2 years and older.

Off Label Uses: Radiotherapy-induced nausea and vomiting Used for the prevention and treatment of nausea and vomiting induced by radiation therapy. [11, 12]

Postoperative nausea and vomiting Used orally for the prevention of postoperative nausea and vomiting. [13]

Drug Name: Emend (aprepitant)

Chemotherapy-induced nausea and vomiting Indicated, in combination with other antiemetic agents, in patients 6 months of age and older for oral suspension, or 12 years of age and older for the capsules, for the prevention of: (1) acute and delayed nausea and vomiting associated with initial and repeat courses of highly emetogenic cancer chemotherapy (HEC) including high-dose cisplatin; (2) nausea and vomiting associated with initial and repeat courses of moderately emetogenic cancer chemotherapy (MEC). Limitations of Use: (1) Emend has not been studied for the treatment of established nausea and vomiting; (2) Chronic continuous administration of Emend is not recommended because it has not been studied, and because the drug interaction profile may change during chronic continuous use.

Postoperative Nausea and Vomiting - capsules only Indicated in adults for the prevention of postoperative nausea and vomiting. Limitations of Use: (1) Emend has not been studied for the treatment of established nausea and vomiting; (2) Chronic continuous administration of Emend is not recommended because it has not been studied, and because the drug interaction profile may change during chronic continuous use.

Drug Name: Granisetron

Chemotherapy-induced nausea vomiting Indicated for the prevention of nausea and vomiting associated with initial and repeat courses of emetogenic cancer therapy, including high-dose cisplatin.

Radiation-induced nausea and vomiting Indicated for the prevention of nausea and vomiting associated with radiation, including total body irradiation and fractionated abdominal radiation.

Off Label Uses: Postoperative nausea and vomiting Used for the prevention of postoperative nausea and vomiting. [14, 15]

Drug Name: Marinol (dronabinol)

Chemotherapy-induced nausea and vomiting Indicated in adults for the treatment of nausea and vomiting associated with cancer chemotherapy in patients who have failed to

respond adequately to conventional antiemetic treatments.

Anorexia in patients with AIDS Indicated in adults for the treatment of anorexia associated with weight loss in patients with AIDS.

Drug Name: Sancuso (granisetron transdermal system)

Chemotherapy-induced nausea and vomiting Indicated for the prevention of nausea and vomiting in adults receiving moderately and/or highly emetogenic chemotherapy regimens of up to 5 consecutive days duration.

Drug Name: Sustol (granisetron injection)

Chemotherapy-induced nausea and vomiting Indicated in combination with other antiemetics in adults for the prevention of acute and delayed nausea and vomiting associated with initial and repeat courses of moderately emetogenic chemotherapy (MEC) or anthracycline and cyclophosphamide (AC) combination chemotherapy regimens.

Drug Name: Varubi (rolapitant)

Chemotherapy-induced nausea and vomiting Indicated in combination with other antiemetic agents in adults for the prevention of delayed nausea and vomiting associated with initial and repeat courses of emetogenic cancer chemotherapy, including, but not limited to, highly emetogenic chemotherapy.

Drug Name: Zofran (ondansetron)

Chemotherapy-induced nausea and vomiting Indicated for the prevention of nausea and vomiting associated with highly emetogenic cancer chemotherapy, including cisplatin greater than or equal to 50 mg/m2. Also indicated for the prevention of nausea and vomiting associated with initial and repeat courses of moderately emetogenic cancer chemotherapy.

Radiotherapy-induced nausea and vomiting Indicated for the prevention of nausea and vomiting associated with radiotherapy in patients receiving either total body irradiation, single high-dose fraction to the abdomen, or daily fractions to the abdomen.

Postoperative nausea and vomiting Indicated for the prevention of postoperative nausea and/or vomiting. As with other antiemetics, routine prophylaxis is not recommended for patients in whom there is little expectation that nausea and/or vomiting will occur postoperatively. In patients where nausea and/or vomiting must be avoided postoperatively, Zofran Tablets, Zofran ODT Orally Disintegrating Tablets, Zofran Oral Solution, and Zuplenz are recommended even where the incidence of postoperative nausea and/or vomiting is low.

Off Label Uses: Hyperemesis gravidarum Used in the management of hyperemesis gravidarum. [10, 16]

Approval Criteria

1 - Diagnosis of nausea and vomiting due to pregnancy (i.e., hyperemesis gravidarum) [10, 16]

AND

2 - History of failure, contraindication, or intolerance to at least one of the following: [A]

- doxylamine
- metoclopramide (Reglan)
- prochlorperazine (Compazine)
- promethazine (Phenergan)
- pyridoxine (Vitamin B6)

AND

3 - Patient has had at least a partial response to therapy at a dose within the quantity limit

3 . Background

Benefit/Coverage/Program Information
Quantity Limit These products are subject to a standard quantity limit. The quantity limit may vary from the standard limit based upon plan-specific benefit design. Please refer to your benefit materials.

4 . Endnotes

A. Treatment of nausea and vomiting of pregnancy with vitamin B6 or vitamin B6 plus doxylamine is safe and effective and should be considered first-line pharmacotherapy (Level A Evidence). Treatment of nausea and vomiting of pregnancy with ginger has shown beneficial effects and can be considered as a nonpharmacologic option (Level B

Evidence). Several types of dopamine antagonists can be used for the treatment of nausea and vomiting of pregnancy such as promethazine, prochlorperazine, and metoclopramide. Antihistamines (such as dimenhydrinate and diphenhydramine) have been shown to be effective in controlling nausea and vomiting symptoms of pregnancy and are frequently used. Evidence is limited on the safety or efficacy of the 5-HT3 inhibitors (e.g. ondansetron) for nausea and vomiting of pregnancy. The ACOG recommends discussing the available data with patients as well as weighing the risks and benefits in women less than 10 weeks of gestation. Because of their limited data, they should not be advocated for first-line use until agents with established safety and efficacy have been tried and have failed. Treatment of severe nausea and vomiting of pregnancy or hyperemesis gravidarum with methylprednisolone may be efficacious in refractory cases; however, the risk profile of methylprednisolone suggests it should be a treatment of last resort (Level B Evidence). [16]

6 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228352
Guideline Name	AntiGout Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Uloric (febuxostat)
Gout A xanthine oxidase (XO) inhibitor indicated for the chronic management of hyperuricemia in patients with gout who have an inadequate response to a maximally titrated dose of allopurinol, who are intolerant to allopurinol, or for whom treatment with allopurinol is not advisable. Uloric is not recommended for the treatment of asymptomatic hyperuricemia.
Drug Name: Mitigare (colchicine) capsule
Prophylaxis of gout flares Indicated for prophylaxis of gout flares in adults. Limitation of Use: The safety and effectiveness of Mitigare for acute treatment of gout flares during prophylaxis has not been studied. Mitigare is not an analgesic medication and should not be used to treat pain from other causes.
Drug Name: Colcrys (colchicine) tablet
Prophylaxis of Gout Flares Indicated for the prophylaxis of gout flares. **Treatment of Gout Flares** Indicated for treatment of acute gout flares when taken at the first sign of a flare.

Familial Mediterranean Fever (FMF) Indicated in adults and children 4 years or older for treatment of FMF.

Drug Name: Allopurinol

Gout Indicated in: 1) the management of patients with signs and symptoms of primary or secondary gout (acute attacks, tophi, joint destruction, uric acid lithiasis, and/or nephropathy). 2) the management of patients with leukemia, lymphoma and malignancies who are receiving cancer therapy which causes elevations of serum and urinary uric acid levels. Treatment with allopurinol should be discontinued when the potential for over production of uric acid is no longer present. 3) the management of patients with recurrent calcium oxalate calculi whose daily uric acid excretion exceeds 800 mg/day in male patients and 750 mg/day in female patients. Therapy in such patients should be carefully assessed initially and reassessed periodically to determine in each case that treatment is beneficial and that the benefits outweigh the risks.

2 . Criteria

Prior Authorization Guideline

Guideline ID	GL-228797
Guideline Name	Antimalarial Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Qualaquin (quinine sulfate)
Malaria Indicated only for treatment of uncomplicated Plasmodium falciparum malaria. Quinine sulfate has been shown to be effective in geographical regions where resistance to chloroquine has been documented. Limitations of Use: 1) Not approved for patients with severe or complicated P. falciparum malaria. 2) Not approved for prevention of malaria. 3) Not indicated for the prevention or treatment of nocturnal leg cramps.

2 . Criteria

Product Name:Brand Qualaquin, Generic quinine sulfate	
Diagnosis	Nocturnal Leg Cramps*
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
QUALAQUIN	QUININE SULFATE CAP 324 MG	13000060100119	Brand
QUININE SULFATE	QUININE SULFATE CAP 324 MG	13000060100119	Generic

Approval Criteria

1 - Requests for coverage when used solely for the treatment or prevention of nocturnal leg cramps are not authorized and will not be approved [1, C]

Notes	*Nocturnal leg cramp is an off-label use.

Product Name:Brand Qualaquin, Generic quinine sulfate	
Diagnosis	Malaria
Approval Length	7 days [1]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
QUALAQUIN	QUININE SULFATE CAP 324 MG	13000060100119	Brand
QUININE SULFATE	QUININE SULFATE CAP 324 MG	13000060100119	Generic

Approval Criteria

1 - Diagnosis of uncomplicated malaria

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Treatment in areas of chloroquine-sensitive malaria [2-4, A]*

AND **2.1.2** Trial and failure, contraindication or intolerance to one of the following: • chloroquine • hydroxychloroquine **OR** **2.2** Treatment in areas of chloroquine-resistant malaria [2-4, B]*	
Notes	*Call the Malaria Hotline (770-488-7788) for additional information if n eeded.

3 . Endnotes

A. Areas of chloroquine-sensitive malaria include: Central America west of the Panama Canal, Haiti and the Dominican Republic. [2-4]
B. Areas of chloroquine-resistant malaria include: Southeast Asia, and all malarious regions except those specified as chloroquine-sensitive listed in Endnote A. [2-4]
C. Quinine is not approved for and should not be used for the prophylaxis or treatment of nocturnal leg cramps. Quinine may cause unpredictable serious and life-threatening hematologic reactions including thrombocytopenia and hemolytic-uremic syndrome/thrombotic thrombocytopenic purpura (HUS/TTP) in addition to hypersensitivity reactions, QT prolongation, serious cardiac arrhythmias including torsades de pointes, and other serious adverse events requiring medical intervention and hospitalization. Chronic renal impairment associated with the development of TTP, and fatalities have also been reported. The risk associated with the use of quinine in the absence of evidence of its effectiveness for treatment or prevention of nocturnal leg cramps, outweighs any potential benefit in treating and/or preventing this benign, self-limiting condition. [1]

Guideline ID	GL-228354
Guideline Name	Apomorphine Products
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Apokyn (apomorphine injection)
Parkinson's Disease Indicated for the acute, intermittent treatment of hypomobility, "off" episodes ("end-of-dose wearing off" and unpredictable "on/off" episodes) in patients with advanced Parkinson's disease. Apokyn has been studied as an adjunct to other medications.

2 . Criteria

Product Name:Brand Apokyn, Generic Apomorphine Hydrochloride Inj	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
APOKYN	APOMORPHINE HCL SOLN CARTRIDGE 30 MG/3ML	7320301010E220	Brand
APOMORPHINE HYDROCHLORIDE	APOMORPHINE HCL SOLN CARTRIDGE 30 MG/3ML	7320301010E220	Generic

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is experiencing intermittent OFF episodes

AND

3 - One of the following:

3.1 Patient is receiving drug in combination with carbidopa/levodopa at a maximally tolerated dose

OR

3.2 Patient has a contraindication or intolerance to carbidopa/levodopa

AND

4 - Trial and failure (of a minimum 30 day supply), contraindication or intolerance to two of the following: [A]

- MAO-B Inhibitor (e.g., rasagiline, selegiline)
- Dopamine Agonist (e.g., pramipexole, ropinirole)
- COMT Inhibitor (e.g., entacapone)

AND

5 - Both of the following:

5.1 Trial and failure (of a minimum 30 day supply), contraindication or intolerance to generic apomorphine (Applies to Brand Apokyn only)

AND

5.2 One of the following:

5.2.1 Trial and failure (of a minimum 30 day supply), contraindication or intolerance to Inbrija (levodopa) inhalation powder

OR

5.2.2 For continuation of prior therapy

AND

6 - Not used with any 5-HT3 antagonist (e.g., ondansetron, granisetron, dolasetron, palonosetron, alosetron)

AND

7 - Prescribed by or in consultation with a neurologist

Product Name:Brand Apokyn, Generic Apomorphine Hydrochloride Inj	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
APOKYN	APOMORPHINE HCL SOLN CARTRIDGE 30 MG/3ML	7320301010E220	Brand
APOMORPHINE HYDROCHLORIDE	APOMORPHINE HCL SOLN CARTRIDGE 30 MG/3ML	7320301010E220	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Aqneursa (levacetylleucine)

Prior Authorization Guideline

Guideline ID	GL-233293
Guideline Name	Aqneursa (levacetylleucine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/21/2024
P&T Revision Date:	

1 . Indications

Drug Name: Aqneursa (levacetylleucine)
Niemann-Pick disease type C (NPC) Indicated for the treatment of neurological manifestations of Niemann-Pick disease type C (NPC) in adults and pediatric patients weighing greater than or equal to 15kg.

2 . Criteria

Product Name:Aqneursa	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AQNEURSA	LEVACETYLLEUCINE FOR SUSP PACKET 1 GM	62000023003020	Brand

Approval Criteria

1 - Diagnosis of Niemann-Pick disease type C (NPC)

AND

2 - Diagnosis is confirmed by one of the following:

2.1 Genetically confirmed (deoxyribonucleic acid [DNA] sequence analysis) by mutations in both alleles of NPC1 or NPC2

OR

2.2 Mutation in only one allele of NPC1 or NPC2 plus either positive filipin staining or elevated cholestane triol/oxysterols (>2 x upper limit of normal)

AND

3 - Patient has at least one neurological symptom of the disease (e.g., hearing loss, vertical supranuclear gaze palsy, ataxia, dementia, dystonia, seizures, dysarthria, or dysphagia)

AND

4 - Patient weighs greater than or equal to 15kg

AND

5 - Requested drug will not be used in combination with Miplyffa (arimoclomol)

AND

6 - Prescribed by or in consultation with a specialist knowledgeable in the treatment of Niemann-Pick disease type C

Product Name:Aqneursa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AQNEURSA	LEVACETYLLEUCINE FOR SUSP PACKET 1 GM	62000023003020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., slowing of disease progression, improvement in neurological symptoms of the disease)

AND

2 - Requested drug will not be used in combination with Miplyffa (arimoclomol)

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228356
Guideline Name	Arcalyst (rilonacept)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Arcalyst (rilonacept) injection
Cryopyrin-Associated Periodic Syndromes (CAPS) Indicated for the treatment of Cryopyrin-Associated Periodic Syndromes (CAPS), including Familial Cold Autoinflammatory Syndrome (FCAS) and Muckle-Wells Syndrome (MWS) in adults and pediatric patients 12 years and older. **Deficiency of Interleukin-1 Receptor Antagonist (DIRA)** Indicated for the maintenance of remission of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) in adults and pediatric patients weighing at least 10 kg. **Recurrent Pericarditis** Indicated for the treatment of recurrent pericarditis and reduction in risk of recurrence in adults and pediatric patients 12 years and older.

2 . Criteria

Product Name:Arcalyst	
Diagnosis	Cryopyrin-Associated Periodic Syndromes (CAPS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ARCALYST	RILONACEPT FOR INJ 220 MG	66450060002120	Brand

Approval Criteria

1 - Diagnosis of Cryopyrin-Associated Periodic Syndromes (CAPS), including Familial Cold Auto-inflammatory Syndrome (FCAS) and/or Muckle-Wells Syndrome (MWS) [A]

AND

2 - Prescribed by or in consultation with one of the following:

- Immunologist
- Allergist
- Dermatologist
- Rheumatologist
- Neurologist
- Specialist with expertise in the management of CAPS

AND

3 - The medication will not be used in combination with another biologic agent

Product Name:Arcalyst	
Diagnosis	Cryopyrin-Associated Periodic Syndromes (CAPS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ARCALYST	RILONACEPT FOR INJ 220 MG	66450060002120	Brand

Approval Criteria

1 - Patient has experienced disease stability or improvement in clinical symptoms while on therapy as evidenced by one of the following:

- Improvement in rash, fever, joint pain, headache, or conjunctivitis
- Decreased number of disease flare days
- Normalization of inflammatory markers (C-reactive protein [CRP], erythrocyte sedimentation rate [ESR], serum amyloid A [SAA])
- Corticosteroid dose reduction
- Improvement in MD global score or active joint count

Product Name:Arcalyst	
Diagnosis	Deficiency of Interleukin-1 Receptor Antagonist (DIRA)
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ARCALYST	RILONACEPT FOR INJ 220 MG	66450060002120	Brand

Approval Criteria

1 - Diagnosis of deficiency of interleukin-1 receptor antagonist (DIRA)

AND

2 - Patient weighs at least 10 kg

AND

3 - Patient is currently in remission (e.g., no fever, skin rash, and bone pain; no radiological evidence of active bone lesions; C-reactive protein [CRP] less than 5 mg/L)

Product Name:Arcalyst	
Diagnosis	Recurrent Pericarditis
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ARCALYST	RILONACEPT FOR INJ 220 MG	66450060002120	Brand

Approval Criteria

1 - Diagnosis of recurrent pericarditis as evidenced by at least 2 episodes that occur a minimum of 4 to 6 weeks apart [1, 4-5]

AND

2 - Prescribed by or in consultation with a cardiologist

AND

3 - Trial and failure, contraindication, or intolerance to at least one of the following [4-5]:

- nonsteroidal anti-inflammatory drugs (e.g., ibuprofen, naproxen)
- colchicine
- corticosteroids (e.g., prednisone)

Product Name:Arcalyst	
Diagnosis	Recurrent Pericarditis
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ARCALYST	RILONACEPT FOR INJ 220 MG	66450060002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Definitions

Definition	Description
CIAS1 gene:	Also known as cold-induced auto-inflammatory syndrome 1, is a gene responsible for the regulation of IL-1 production. Mutation(s) in this gene leads to CAPS. [2]
Chronic Infantile Neurologic Cutaneous and Articular Syndrome:	Also known as neonatal-Onset Multisystem Inflammation, is the most severe form of the CAPS. It is characterized by nearly continuous symptoms of inflammation presenting first during the neonatal period or early infancy with migratory and nonpruritic urticaria-like rash and fever. Other features of this disease include chronic aseptic meningitis, sensorineural hearing loss and ocular changes (conjunctivitis, optic nerve atrophy), and disabling arthropathy caused by overgrowth of the patella and epiphyses of the long bones. Approximately 20% of patients with this disease die before reaching adulthood. [2, 3]
Cryopyrin-Associated Periodic Syndromes (CAPS):	A group of rare, autosomal dominantly inherited auto-inflammatory conditions comprising of Familial-Cold Auto-inflammatory Syndrome (FCAS), Muckle-Wells Syndrome (MWS), Neonatal-Onset Multisystem Inflammatory Disease (NOMID) or also known as Chronic Infantile Neurologic Cutaneous Articular Syndrome (CINCA), which are caused by the CIAS1 gene mutation and characterized by recurrent symptoms (urticaria-like skin lesions, fever chills, arthralgia, profuse sweating, sensorineural hearing/vision loss, and increased inflammation markers the blood).

	Approximately 300 people in the United States are affected by CAPS. [2, 3]
Familial Cold Autoinflammatory Syndrome:	The mildest form of CAPS, is characterized by cold-induced, daylong episodes of fever associated with rash, arthralgia, headaches and less frequently conjunctivitis, but without other signs of CNS inflammation. Symptoms usually begin during the first 6 months of life and are predominantly triggered by cold exposure. Duration of episodes usually is less than 24 hours. [2, 3]
Muckle-Wells Syndrome:	A subtype of CAPS, which is characterized by episodic attacks of inflammation associated with a generalized urticaria-like rash, fever, malise, arthralgia, and progressive hearing loss. Duration of symptoms usually lasts from 24-48 hours. [2, 3]

4 . Endnotes

A. CAPS refer to rare genetic syndromes generally caused by mutations in the NLRP-3 [Nucleotide-binding domain, leucine rich family (NLR), pyrin domain containing 3] gene (also known as Cold-Induced Auto-inflammatory Syndrome-1 [CIAS1]). CAPS disorders are inherited in an autosomal dominant pattern with male and female offspring equally affected. Features common to all disorders include fever, urticaria-like rash, arthralgia, myalgia, fatigue, and conjunctivitis. In most cases, inflammation in CAPS is associated with mutations in the NLRP-3 gene which encodes the protein cryopyrin, an important component of the inflammasome. Mutations in NLRP-3 result in an overactive inflammasome resulting in excessive release of activated IL-1β that drives inflammation. [1]

Prior Authorization Guideline

Guideline ID	GL-228358
Guideline Name	Arikayce (amikacin liposome inhalation suspension)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Arikayce (amikacin liposome inhalation suspension)
Mycobacterium avium complex Indicated in adults who have limited or no alternative treatment options, for the treatment of Mycobacterium avium complex (MAC) lung disease as part of a combination antibacterial drug regimen in patients who do not achieve negative sputum cultures after a minimum of 6 consecutive months of a multidrug background regimen therapy. As only limited clinical safety and effectiveness data for ARIKAYCE are currently available, reserve ARIKAYCE for use in adults who have limited or no alternative treatment options. This drug is indicated for use in a limited and specific population of patients.

2 . Criteria

Product Name:Arikayce	
Diagnosis	Mycobacterium avium complex (MAC) lung disease

Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ARIKAYCE	AMIKACIN SULFATE LIPOSOME INHAL SUSP 590 MG/8.4ML (BASE EQ)	07000010121830	Brand

Approval Criteria

1 - Diagnosis of Mycobacterium avium complex (MAC) lung disease

AND

2 - Requested drug will be used alongside a combination antibacterial drug regimen (e.g., clarithromycin, rifampin and ethambutol)

AND

3 - Both of the following:

3.1 Patient has received a minimum of 6 consecutive months of a multidrug background regimen therapy (e.g., a macrolide, a rifamycin, ethambutol, etc.) before starting therapy with the requested drug

AND

3.2 Patient has not achieved at least two negative sputum cultures following this treatment regimen [1,2]

AND

4 - Prescribed by or in consultation with one of the following:

- Infectious disease specialist
- Pulmonologist

Prior Authorization Guideline

Guideline ID	GL-228359
Guideline Name	Atopic Dermatitis Topical Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Eucrisa (crisaborole) ointment
Atopic Dermatitis Indicated for topical treatment of mild to moderate atopic dermatitis in adult and pediatric patients 3 months of age and older.

2 . Criteria

Product Name:Eucrisa	
Diagnosis	Atopic Dermatitis
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
EUCRISA	CRISABOROLE OINT 2%	90230025004220	Brand

Approval Criteria

1 - Trial and failure (of a minimum 30 day supply), contraindication, or intolerance to one prescription strength topical corticosteroid (see Table 1 in Background section), unless the affected area is sensitive (i.e., face, axillae, groin). [2]

OR

2 - Trial and failure (of a minimum 30-day supply) or intolerance to one generic topical calcineurin inhibitor (e.g., tacrolimus ointment), unless the patient is not a candidate for therapy (e.g., immunocompromised) [3]

3 . Background

Clinical Practice Guidelines

Table 1. Relative Potencies of Topical Corticosteroids [2]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05

	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
	Dexamethasone	Cream	0.1

Lowest potency	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

Prior Authorization Guideline

Guideline ID	GL-233363
Guideline Name	Atypical Antipsychotics - PA, ST
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	3/22/1998
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Fanapt (iloperidone)
Schizophrenia Indicated for the treatment of adults with schizophrenia. When deciding among the alternative treatments available for this condition, the prescriber should consider the finding that Fanapt is associated with prolongation of the QTc interval. Prolongation of the QTc interval is associated in some other drugs with the ability to cause torsade de pointes-type arrhythmia, a potentially fatal polymorphic ventricular tachycardia which can result in sudden death. In many cases this would lead to the conclusion that other drugs should be tried first. Whether Fanapt will cause torsade de pointes or increase the rate of sudden death is not yet known. Patients must be titrated to an effective dose of Fanapt. Thus, control of symptoms may be delayed during the first 1 to 2 weeks of treatment compared to some other antipsychotic drugs that do not require a similar titration. Prescribers should be mindful of this delay when selecting an antipsychotic drug for the treatment of schizophrenia. **Bipolar I disorder** Indicated for the acute treatment of manic or mixed episodes associated with bipolar I disorder in adults.

Drug Name: Nuplazid (pimavanserin)
Parkinson's disease psychosis Indicated for the treatment of hallucinations and delusions associated with Parkinson's disease psychosis.
Drug Name: Secuado (asenapine)
Schizophrenia Indicated for the treatment of adults with schizophrenia
Drug Name: Caplyta
Schizophrenia Indicated for the treatment of schizophrenia in adults **Bipolar Depression** Indicated for the treatment of depressive episodes associated with bipolar I or II disorder (bipolar depression) in adults, as monotherapy and as adjunctive therapy with lithium or valproate
Drug Name: Lybalvi
Schizophrenia Indicated for the treatment of schizophrenia in adults **Bipolar I disorder** Indicated for the acute treatment of manic or mixed episodes as monotherapy and as adjunct to lithium or valproate in adults with Bipolar I disorder. Indicated as maintenance monotherapy treatment in adults with Bipolar I disorder.
Drug Name: Saphris
Schizophrenia Indicated for the treatment of schizophrenia in adults **Bipolar I Disorder** Indicated for acute monotherapy of manic or mixed episodes, in adults and pediatric patients 10 to 17 years of age, indicated for adjunctive treatment to lithium or valproate in adults, and indicated for maintenance monotherapy treatment in adults
Drug Name: Invega Hafyera (paliperidone palmitate)
Schizophrenia Indicated for the treatment of schizophrenia in adults after they have been adequately treated with either a once-a-month paliperidone palmitate extended-release injectable suspension (e.g., INVEGA SUSTENNA) for at least four months, or an every-three-month paliperidone palmitate extended-release injectable suspension (e.g., INVEGA TRINZA) for at least one three-month cycle.
Drug Name: Erzofri (paliperidone palmitate)
Schizophrenia Indicated for the treatment of 1) Schizophrenia in adults, and 2) Schizoaffective disorder in adults as monotherapy and as an adjunct to mood stabilizers or antidepressants.
Drug Name: Opipza (aripiprazole)

Schizophrenia Indicated for the treatment of schizophrenia in patients ages 13 years and older.

Major Depressive Disorder (MDD) Indicated for adjunctive treatment of major depressive disorder (MDD) in adults.

Autism Indicated for irritability associated with autistic disorder in pediatric patients 6 years and older.

Tourette's Syndrome Indicated for treatment of Tourette's disorder in pediatric patients 6 years and older.

2 . Criteria

Product Name:Nuplazid	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

CAPLYTA	LUMATEPERONE TOSYLATE CAP 21 MG	59400022400115	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of Schizophrenia

AND

1.2 Trial and failure (of a minimum 30 day supply), contraindication, or intolerance to two of the following:

- aripiprazole
- olanzapine
- quetiapine IR/ER
- risperidone
- clozapine
- ziprasidone
- paliperidone
- asenapine

OR

2 - BOTH of the following:

- Patient has a diagnosis of Bipolar Depression
- Trial and failure (of a minimum 30 day supply), contraindication, or intolerance to quetiapine IR/ER

OR

3 - For continuation of prior therapy

Product Name:Erzofri	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ERZOFRI	PALIPERIDONE PALMITATE ER SUSP PREF SYR 39 MG/0.25ML	5907005010E626	Brand

4 . Revision History

Date	Notes
3/4/2025	Quartz Comm/EHB copied to mirrow Optum standard/EHB

Prior Authorization Guideline

Guideline ID	GL-229153
Guideline Name	Augtyro (repotrectinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/15/2024
P&T Revision Date:	12/18/2024

1 . Indications

Drug Name: Augtyro (repotrectinib)
Non-Small Cell Lung Cancer (NSCLC) Indicated for the treatment of adult patients with locally advanced or metastatic ROS1-positive non-small cell lung cancer (NSCLC). **Solid Tumors** Indicated for the treatment of adult and pediatric patients 12 years of age and older with solid tumors that: 1) have a neurotrophic tyrosine receptor kinase (NTRK) gene fusion, 2) are locally advanced or metastatic or where surgical resection is likely to result in severe morbidity, and 3) have progressed following treatment or have no satisfactory alternative therapy. This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s).

2 . Criteria

Product Name:Augtyro	
Diagnosis	Non-Small Cell Lung Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AUGTYRO	REPOTRECTINIB CAP 40 MG	21533865000120	Brand
AUGTYRO	REPOTRECTINIB CAP 160 MG	21533865000130	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is one of the following:

- Locally advanced
- Metastatic

AND

3 - Patient has ROS1 rearrangement positive tumor(s) [A]

Product Name:Augtyro	
Diagnosis	Solid Tumors
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AUGTYRO	REPOTRECTINIB CAP 40 MG	21533865000120	Brand
AUGTYRO	REPOTRECTINIB CAP 160 MG	21533865000130	Brand

Approval Criteria

1 - Diagnosis of solid tumors

AND

2 - Disease has neurotrophic tyrosine receptor kinase (NTRK) gene fusion (e.g., ETV6-NTRK3, TPM3-NTRK1, LMNA-NTRK1) [B]

AND

3 - Patient is 12 years of age or older

AND

4 - Disease is one of the following:

- Locally advanced
- Metastatic
- Unresectable (including cases where surgical resection is likely to result in severe morbidity)

AND

5 - One of the following:

- Disease has progressed following previous treatment (e.g., radiation therapy, systemic therapy, tyrosine kinase inhibitor [TKI])
- Disease has no satisfactory alternative treatments

Product Name:Augtyro	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AUGTYRO	REPOTRECTINIB CAP 40 MG	21533865000120	Brand
AUGTYRO	REPOTRECTINIB CAP 160 MG	21533865000130	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. An FDA-approved test to detect ROS1 rearrangements for selecting patients for treatment with AUGTYRO is not currently available. [1]
B. An FDA approved test to detect NTRK1/2/3 rearrangements for selecting patients for treatment with Augtyro is not currently available. [1]

AUSTEDO XR	DEUTETRABENAZINE TAB ER 24HR 18 MG	62380030007525	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy [1]

3 . Endnotes

A. Authorization period is based on the pivotal study duration of 12 weeks. [1, 5, 6]
B. Ensures the requirement for proper diagnosing and quantifying an adequate chorea score (total maximal chorea score of greater than or equal to 10 (moderate to severe chorea) from the subscale of the Unified Huntington's Disease Rating Scale (UHDRS). [1, 2]
C. Patients were included in the pivotal randomized, double-blind, placebo-controlled trial of Austedo if they had moderate to severe tardive dyskinesia as determined by clinical observation (qualitative assessment). [6]
D. Verified with consultant for a previous medication (Ingrezza [valbenazine]) that dose reduction, tapering, or discontinuation of the offending medication is considered first-line treatment for tardive dyskinesia. [8]

Prior Authorization Guideline

Guideline ID	GL-228362
Guideline Name	Ayvakit (avapritinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ayvakit (avapritinib)
Gastrointestinal Stromal Tumor (GIST) Indicated for the treatment of adults with unresectable or metastatic gastrointestinal stromal tumor (GIST) harboring a platelet-derived growth factor receptor alpha (PDGFRA) exon 18 mutation, including PDGFRA D842V mutations. **Advanced Systemic Mastocytosis (AdvSM)** Indicated for the treatment of adult patients with advanced systemic mastocytosis (AdvSM). AdvSM includes patients with aggressive systemic mastocytosis (ASM), systemic mastocytosis with an associated hematological neoplasm (SM-AHN), and mast cell leukemia (MCL). Limitations of Use: Ayvakit is not recommended for the treatment of patients with AdvSM with platelet counts of less than 50 × 10 /L. **Indolent Systemic Mastocytosis (ISM)** Indicated for the treatment of adult patients with indolent systemic mastocytosis (ISM). Limitations of Use: Ayvakit is not recommended for the treatment of patients with ISM with platelet counts of less than 50 × 10^9/L.

2 . Criteria

Product Name:Ayvakit	
Diagnosis	Gastrointestinal Stromal Tumor (GIST)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AYVAKIT	AVAPRITINIB TAB 100 MG	21490009000320	Brand
AYVAKIT	AVAPRITINIB TAB 200 MG	21490009000330	Brand
AYVAKIT	AVAPRITINIB TAB 300 MG	21490009000340	Brand
AYVAKIT	AVAPRITINIB TAB 25 MG	21490009000310	Brand
AYVAKIT	AVAPRITINIB TAB 50 MG	21490009000315	Brand

Approval Criteria

1 - Diagnosis of gastrointestinal stromal tumor (GIST)

AND

2 - Disease is ONE of the following:

- Unresectable
- Metastatic

AND

3 - Presence of platelet-derived growth factor receptor alpha (PDGFRA) exon 18 mutation, including PDGFRA D842V mutations

Product Name:Ayvakit	
Diagnosis	Advanced Systemic Mastocytosis (AdvSM)

Approval Length	12 month(s)

AYVAKIT	AVAPRITINIB TAB 50 MG	21490009000315	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Ayvakit 25 mg	
Diagnosis	Indolent Systemic Mastocytosis (ISM)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AYVAKIT	AVAPRITINIB TAB 25 MG	21490009000310	Brand

Approval Criteria

1 - Diagnosis of indolent systemic mastocytosis (ISM)

AND

2 - Platelet count is greater than 50 x 10^9/L

Notes	If patient meets criteria above, please approve at GPI-14

Product Name:Ayvakit 25 mg	
Diagnosis	Indolent Systemic Mastocytosis (ISM)

Approval Length	12 month(s)
Therapy Stage	Reauthorization

Prior Authorization Guideline

Guideline ID	GL-228361
Guideline Name	Ayvakit (avapritinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ayvakit (avapritinib)
Gastrointestinal Stromal Tumor (GIST) Indicated for the treatment of adults with unresectable or metastatic gastrointestinal stromal tumor (GIST) harboring a platelet-derived growth factor receptor alpha (PDGFRA) exon 18 mutation, including PDGFRA D842V mutations. **Advanced Systemic Mastocytosis (AdvSM)** Indicated for the treatment of adult patients with advanced systemic mastocytosis (AdvSM). AdvSM includes patients with aggressive systemic mastocytosis (ASM), systemic mastocytosis with an associated hematological neoplasm (SM-AHN), and mast cell leukemia (MCL). Limitations of Use: Ayvakit is not recommended for the treatment of patients with AdvSM with platelet counts of less than 50 × 10 /L. **Indolent Systemic Mastocytosis (ISM)** Indicated for the treatment of adult patients with indolent systemic mastocytosis (ISM). Limitations of Use: Ayvakit is not recommended for the treatment of patients with ISM with platelet counts of less than 50 × 10^9/L.

2 . Criteria

Product Name:Ayvakit	
Diagnosis	Gastrointestinal Stromal Tumor (GIST)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AYVAKIT	AVAPRITINIB TAB 100 MG	21490009000320	Brand
AYVAKIT	AVAPRITINIB TAB 200 MG	21490009000330	Brand

Prior Authorization Guideline

Guideline ID	GL-228798
Guideline Name	Azole Antifungals - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cresemba (isavuconazonium sulfate) capsules
Invasive Aspergillosis and Invasive Mucormycosis Indicated for adult and pediatric patients 6 years of age and older who weight 16 kilograms (kg) and greater for the treatment of invasive mucormycosis and invasive aspergillosis. Specimens for fungal culture and other relevant laboratory studies (including histopathology) to isolate and identify causative organism(s) should be obtained prior to initiating antifungal therapy. Therapy may be instituted before the results of the cultures and other laboratory studies are known. However, once these results become available, antifungal therapy should be adjusted accordingly.
Drug Name: Noxafil (posaconazole) tablets
Prophylaxis of Aspergillus infection Indicated for prophylaxis of invasive Aspergillus infections in adult and pediatric patients 2 years of age and older who weigh greater than 40 kg, who are at high risk of developing these infections due to being severely immunocompromised, such as HSCT recipients with GVHD or those with hematologic malignancies with prolonged neutropenia from chemotherapy. **Prophylaxis of Candida infection** Indicated for prophylaxis of invasive Candida infections in adult and pediatric patients 2 years of age and older who weigh greater than 40kg, who are at

high risk of developing these infections due to being severely immunocompromised, such as HSCT recipients with GVHD or those with hematologic malignancies with prolonged neutropenia from chemotherapy.

Treatment of Invasive Aspergillosis Indicated for the treatment of invasive aspergillosis in adults and pediatric patients 13 years of age and older.

Drug Name: Noxafil (posaconazole) oral suspension

Prophylaxis of Aspergillus infection Indicated for prophylaxis of invasive Aspergillus infections in patients 13 years of age and older, who are at high risk of developing these infections due to being severely immunocompromised, such as HSCT recipients with GVHD or those with hematologic malignancies with prolonged neutropenia from chemotherapy.

Prophylaxis of Candida infection Indicated for prophylaxis of invasive Candida infections in patients 13 years of age and older, who are at high risk of developing these infections due to being severely immunocompromised, such as HSCT recipients with GVHD or those with hematologic malignancies with prolonged neutropenia from chemotherapy.

Oropharyngeal candidiasis Indicated for treatment of oropharyngeal candidiasis (OPC), including OPC refractory (rOPC) to itraconazole and/or fluconazole in adults and pediatric patients 13 years of age and older.

Drug Name: Noxafil PowderMix (posaconazole) for delayed-release oral suspension

Prophylaxis of Invasive Aspergillus and Candida Infections Indicated for the prophylaxis of invasive Aspergillus and Candida infections in pediatric patients 2 years of age and older who weigh 40 kg or less, who are at high risk of developing these infections due to being severely immunocompromised, such as hematopoietic stem cell transplant (HSCT) recipients with graft-versus-host disease (GVHD) or those with hematologic malignancies with prolonged neutropenia from chemotherapy.

Drug Name: Sporanox (itraconazole) capsules

Blastomycosis Indicated for the treatment of the following fungal infection in immunocompromised and non-immunocompromised patients: Blastomycosis, pulmonary and extrapulmonary

Histoplasmosis Indicated for the treatment of the following fungal infection in immunocompromised and non-immunocompromised patients: Histoplasmosis, including chronic cavitary pulmonary disease and disseminated, nonmeningeal histoplasmosis

Aspergillosis Indicated for the treatment of the following fungal infection in immunocompromised and non-immunocompromised patients: Aspergillosis, pulmonary and extrapulmonary, in patients who are intolerant of or refractory to amphotericin B therapy

Onychomycosis of the toenail Indicated for the treatment of the following fungal infection in non-immunocompromised patients: Onychomycosis of the toenail, with or without fingernail involvement, due to dermatophytes (Tinea unguium)

Onychomycosis of the fingernail Indicated for the treatment of the following fungal infection in non-immunocompromised patients: Onychomycosis of the fingernail due to dermatophytes (Tinea unguium)

Drug Name: Sporanox Pulse Pak (itraconazole)

Onychomycosis of the fingernail Indicated for the treatment of the following fungal infection in non-immunocompromised patients: Onychomycosis of the fingernail due to dermatophytes (Tinea unguium)

Drug Name: Sporanox (itraconazole) oral solution

Oropharyngeal and esophageal candidiasis Indicated for the treatment of oropharyngeal and esophageal candidiasis.

Drug Name: Tolsura (itraconazole) capsules

Blastomycosis Indicated for the treatment of the following fungal infection in immunocompromised and non-immunocompromised patients: Blastomycosis, pulmonary and extrapulmonary.

Histoplasmosis Indicated for the treatment of the following fungal infection in immunocompromised and non-immunocompromised patients: Histoplasmosis, including chronic cavitary pulmonary disease and disseminated, nonmeningeal histoplasmosis.

Aspergillosis Indicated for the treatment of the following fungal infection in immunocompromised and non-immunocompromised patients: Aspergillosis, pulmonary and extrapulmonary, in patients who are intolerant of or refractory to amphotericin B therapy.

Drug Name: Vfend (voriconazole) oral suspension, Vfend (voriconazole) tablets

Invasive Aspergillosis Indicated in adults and pediatric patients (2 years of age and older) for the treatment of invasive aspergillosis (IA). In clinical trials, the majority of isolates recovered were Aspergillus fumigatus. There was a small number of cases of culture-proven disease due to species of Aspergillus other than A. fumigatus.

Candidemia in Non-neutropenic Patients and Other Deep Tissue Candida Infections Indicated in adults and pediatric patients (2 years of age and older) for the treatment of candidemia in non-neutropenic patients and the following Candida infections: disseminated infections in skin and infections in abdomen, kidney, bladder wall, and wounds.

Esophageal Candidiasis Indicated in adults and pediatric patients (2 years of age and older) for the treatment of esophageal candidiasis (EC) in adults and pediatric patients 2 years of age and older.

Scedosporiosis and Fusariosis Indicated for the treatment of serious fungal infections caused by Scedosporium apiospermum (asexual form of Pseudallescheria boydii) and Fusarium spp. including Fusarium solani, in adults and pediatric patients (2 years of age and older) intolerant of, or refractory to, other therapy.

2 . Criteria

Product Name:Cresemba oral capsule	
Approval Length	6 Months [17, B-D]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CRESEMBA	ISAVUCONAZONIUM SULFATE CAP 186 MG (ISAVUCONAZOLE 100 MG)	11407030100120	Brand
CRESEMBA	ISAVUCONAZONIUM SULFATE CAP 74.5 MG (ISAVUCONAZOLE 40 MG)	11407030100105	Brand

Approval Criteria

1 - Diagnosis of one of the following fungal infections: [17]

- Invasive aspergillosis
- Invasive mucormycosis

AND

2 - Both of the following:

- Patient is 6 years of age or older
- Patient weighs 16 kilograms or greater

Product Name:Brand Sporanox capsules or generic itraconazole capsules	
Diagnosis	Systemic and topical fungal infections
Approval Length	6 months [5, 10-12, B-D]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

SPORANOX	ITRACONAZOLE CAP 100 MG	11407035000120	Brand
ITRACONAZOLE	ITRACONAZOLE CAP 100 MG	11407035000120	Generic

Approval Criteria

1 - Diagnosis of a systemic fungal infection (e.g., aspergillosis, histoplasmosis, blastomycosis)

OR

2 - All of the following:

2.1 One of the following diagnoses:

- Tinea corporis (ring worm)
- Tinea cruris (jock itch)
- Tinea pedis (athlete's foot)
- Tinea capitis (scalp ringworm)
- Pityriasus versicolor

AND

2.2 One of the following:

2.2.1 The tinea infection is resistant to topical antifungal treatment

OR

2.2.2 Trial and failure, contraindication, or intolerance to oral terbinafine [3]

Product Name:Brand Sporanox capsules, generic itraconazole capsules, or Sporanox Pulse Pak	
Diagnosis	Fingernail Onychomycosis
Approval Length	1 Month [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPORANOX	ITRACONAZOLE CAP 100 MG	11407035000120	Brand
ITRACONAZOLE	ITRACONAZOLE CAP 100 MG	11407035000120	Generic
SPORANOX PULSEPAK	ITRACONAZOLE CAP 100 MG	11407035000120	Brand

Approval Criteria

1 - Diagnosis of fingernail onychomycosis as confirmed by one of the following:

- Positive potassium hydroxide (KOH) preparation
- Fungal culture
- Nail biopsy

AND

2 - The patient's condition is causing debility or a disruption in their activities of daily living (e.g., limitations to manual dexterity, wearing shoes, or appropriately manicuring nails) [4]

AND

3 - Trial and failure (of a minimum 6-week supply), contraindication, or intolerance to oral terbinafine

Product Name:Brand Sporanox capsules or generic itraconazole capsules	
Diagnosis	Toenail Onychomycosis
Approval Length	3 Month [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPORANOX	ITRACONAZOLE CAP 100 MG	11407035000120	Brand
ITRACONAZOLE	ITRACONAZOLE CAP 100 MG	11407035000120	Generic

Approval Criteria

1 - Diagnosis of toenail onychomycosis as confirmed by one of the following:

- Positive potassium hydroxide (KOH) preparation
- Fungal culture
- Nail biopsy

AND

2 - The patient's condition is causing debility or a disruption in their activities of daily living (e.g., limitations to manual dexterity, walking, standing, wearing shoes, or appropriately manicuring nails) [4]

AND

3 - Trial and failure (of a minimum 12-week supply), contraindication, or intolerance to oral terbinafine

Product Name:Brand Sporanox oral solution or generic itraconazole oral solution	
Diagnosis	Candidiasis (esophageal or oropharyngeal)
Approval Length	1 month [E, F]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SPORANOX	ITRACONAZOLE ORAL SOLN 10 MG/ML	11407035002020	Brand
ITRACONAZOLE	ITRACONAZOLE ORAL SOLN 10 MG/ML	11407035002020	Generic

Approval Criteria

1 - One of the following:

1.1 Diagnosis of esophageal candidiasis

OR

1.2 Diagnosis of oropharyngeal candidiasis (OPC)

AND

2 - One of the following:

- Trial and failure, contraindication, or intolerance to fluconazole
- Susceptibility results demonstrate resistance to fluconazole

Product Name:Tolsura	
Approval Length	6 months [5, 10-12, B-D]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TOLSURA	ITRACONAZOLE CAP 65 MG	11407035000113	Brand

Approval Criteria

1 - Diagnosis of one of the following fungal infections:

- Blastomycosis
- Histoplasmosis
- Aspergillosis

AND

2 - Trial and failure or intolerance to generic itraconazole capsules

Product Name:Brand Noxafil oral suspension or generic posaconazole oral solution	
Diagnosis	Oropharyngeal Candidiasis
Approval Length	1 Month [E]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOXAFIL	POSACONAZOLE SUSP 40 MG/ML	11407060001820	Brand
POSACONAZOLE	POSACONAZOLE SUSP 40 MG/ML	11407060001820	Generic

Approval Criteria

1 - Diagnosis of oropharyngeal candidiasis (OPC)

AND

2 - Patient is 13 years of age and older

AND

3 - One of the following:

- Trial and failure, contraindication, or intolerance to fluconazole
- Susceptibility results demonstrate resistance to fluconazole

Product Name:Brand Noxafil oral suspension or generic posaconazole oral solution	
Diagnosis	Oropharyngeal Candidiasis
Approval Length	1 Month [E]
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NOXAFIL	POSACONAZOLE SUSP 40 MG/ML	11407060001820	Brand
POSACONAZOLE	POSACONAZOLE SUSP 40 MG/ML	11407060001820	Generic

Approval Criteria

1 - Diagnosis of oropharyngeal candidiasis (OPC)

AND

2 - Patient is 13 years of age and older

AND

3 - Submission of medical records (e.g., chart notes) or paid claims documenting one of the following:

- Trial and failure, contraindication, or intolerance to fluconazole
- Susceptibility results demonstrate resistance to fluconazole

Product Name:Brand Noxafil oral tablet, generic posaconazole oral tablet, Brand Noxafil oral suspension, generic posaconazole oral suspension, Noxafil PowderMix	
Diagnosis	Prophylaxis of systemic fungal infections
Approval Length	6 Months [B-D]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NOXAFIL	POSACONAZOLE TAB DELAYED RELEASE 100 MG	11407060000620	Brand

POSACONAZOLE	POSACONAZOLE SUSP 40 MG/ML	11407060001820	Generic

Approval Criteria

1 - Used as prophylaxis of invasive fungal infections caused by one of the following:

- Aspergillus
- Candida

AND

2 - One of the following:

2.1 For Noxafil (posaconazole) oral tablet, both of the following:

- Patient is 2 years of age and older
- Patient weighs greater than 40 kg

OR

2.2 For Noxafil oral suspension, patient is 13 years of age and older

OR

2.3 For Noxafil PowderMix, both of the following:

- Patient is 2 years of age and older
- Patient weighs 40 kg or less

AND

3 - One of the following:

3.1 Patient is at high risk of infections due to severe immunosuppression from one of the following conditions:

- Hematopoietic stem cell transplant (HSCT) with graft-versus-host disease (GVHD)
- Hematologic malignancies with prolonged neutropenia from chemotherapy

OR

3.2 Patient has a prior fungal infection requiring secondary prophylaxis [15, G]

Product Name:Brand Noxafil oral tablet, generic posaconazole oral tablet, Brand Noxafil oral suspension, generic posaconazole oral suspension, Noxafil PowderMix	
Diagnosis	Prophylaxis of systemic fungal infections

Approval Length	6 Months [B-D]
Guideline Type	Non Formulary

VFEND	VORICONAZOLE FOR SUSP 40 MG/ML	11407080001920	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Candidemia
- Deep tissue Candida infection (e.g., disseminated in skin, infection in abdomen, kidney, bladder wall, and wounds)

AND

2 - Patient is non-neutropenic

AND

3 - Patient is 2 years of age and older

AND

4 - One of the following:

- Trial and failure, contraindication or intolerance to fluconazole [I]
- Susceptibility results demonstrate resistance to fluconazole [K]

Product Name:Brand Vfend oral tablet, generic voriconazole oral tablet, Brand Vfend oral suspension, generic voriconazole oral suspension	
Diagnosis	Esophageal Candidiasis
Approval Length	1 Month [H, 16]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VORICONAZOLE	VORICONAZOLE TAB 50 MG	11407080000320	Generic
VFEND	VORICONAZOLE TAB 50 MG	11407080000320	Brand
VORICONAZOLE	VORICONAZOLE TAB 200 MG	11407080000340	Generic
VFEND	VORICONAZOLE TAB 200 MG	11407080000340	Brand
VORICONAZOLE	VORICONAZOLE FOR SUSP 40 MG/ML	11407080001920	Generic
VFEND	VORICONAZOLE FOR SUSP 40 MG/ML	11407080001920	Brand

Approval Criteria

1 - Diagnosis of esophageal candidiasis

AND

2 - Patient is 2 years of age and older

AND

3 - One of the following:

- Trial and failure, contraindication, or intolerance to fluconazole
- Susceptibility results demonstrate resistance to fluconazole

3 . Endnotes

A. Fingernail infections are usually reevaluated 18 weeks or longer after completion of therapy. Toenail infections are usually reevaluated 6-9 months after completion of therapy. [5] Indeed, considering that toenails can take 12 to 18 months to grow out, many clinicians consider that 1 year is too short to assess clinical effectiveness. [6] Reports of long-term follow-up of treated patients have recently been presented, suggesting that positive mycology at 12 and 24 weeks after commencement of therapy are poor prognostic signs and may indicate a need for retreatment or for a change of drug. [8]
B. The optimal duration of therapy for aspergillosis has not been defined. Most clinicians treat infections (pulmonary) until resolution or stabilization of clinical and radiographic manifestations. The IDSA recommends a minimal treatment period of 6 – 12 weeks in immunocompetent patients for invasive conditions. [11]
C. According to the IDSA guidelines for aspergillosis, duration of therapy for most conditions for aspergillosis has not been optimally defined. Most experts attempt to treat pulmonary infection until resolution or stabilization of all clinical and radiographic manifestations. Other factors include site of infection (e.g., osteomyelitis), level of immunosuppression, and extent of disease. Reversal of immunosuppression, if feasible, is important for a favorable outcome for invasive aspergillosis." [11]
D. According to the IDSA guidelines for the treatment of aspergillosis, both Amphotericin B and itraconazole are listed as second line treatment options for the treatment of invasive disease. [11]
E. For fluconazole-refractory OPC, either itraconazole or posaconazole for up to 28 days is recommended. For fluconazole-refractory esophageal candidiasis, itraconazole or voriconazole for 14 to 21 days is recommended. [3, 5]
F. Patients may be expected to relapse shortly after discontinuing therapy with Sporanox oral solution. Limited data on the safety of long-term use (> 6 months) of Sporanox Oral Solution are available at this time. [2]
G. NCCN recommends secondary prophylaxis with an appropriate antifungal agent in patients with prior chronic disseminated candidiasis or with invasive filamentous fungal infection during subsequent cycles of chemotherapy or HSCT. In patients with invasive aspergillosis before HSCT, antifungal therapy for more than a month and resolution of radiologic abnormalities correlate with a lower likelihood of post-transplant recurrence of infection. Secondary prophylaxis with a mold-active agent is advised for the entire period of immunosuppression. Secondary prophylaxis is generally administered for the duration of immunosuppression. Per recommendation from an infectious disease specialist, posaconazole is used for secondary prophylaxis of prior fungal infections. [15]
H. Voriconazole prescribing information states that for candidemia in non-neutropenic patients and other deep tissue Candida infections, patients should be treated for at least

14 days following resolution of symptoms or following last positive culture, whichever is long. For esophageal candidiasis, patients should be treated for a minimum of 14 days and for at least 7 days following resolution of symptoms. [16]

I. According to the 2016 IDSA guideline for candidemia in nonneutropenic patients, fluconazole, intravenous or oral, is an acceptable alternative to an echinocandin (e.g., caspofungin, micafungin, anidulafungin) in patients who are not critically ill and who are considered unlikely to have fluconazole-resistant Candida species. Voriconazole is effective for candidemia, however, offers little advantage over fluconazole as the initial therapy. [5]
J. According to the 2016 IDSA guideline for the treatment of esophageal candidiasis, oral fluconazole 200-400 mg for 14 to 21 days is strongly recommended (high-quality evidence). Intravenous fluconazole may be used in patients who cannot tolerate oral therapy. For fluconazole-refractory disease, voriconazole either intravenous or oral is recommended. [5]
K. Of the Candida species, C. krusei and C. glabrata are the two species with higher likelihood of fluconazole-resistance for serious candida infections due to widespread azole treatment. In these cases, voriconazole may be used as oral therapy in patients with infections due to C. krusei or fluconazole-resistant, voriconazole-susceptible C. glabrata infections. [5]

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228363
Guideline Name	Bacterial Vaginosis Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Nuvessa
Bacterial Vaginosis Indicated for the treatment of bacterial vaginosis in females 12 years of age and older.
Drug Name: Cleocin suppository
Bacterial Vaginosis Indicated for 3-day treatment of bacterial vaginosis in non-pregnant women. There are no adequate and well-controlled studies of CLEOCIN Vaginal Ovules in pregnant women.
Drug Name: Brand Cleocin vaginal cream
Bacterial Vaginosis Indicated in the treatment of bacterial vaginosis (formerly referred to as Haemophilus vaginitis, Gardnerella vaginitis, nonspecific vaginitis, Corynebacterium vaginitis, or anaerobic vaginosis). CLEOCIN Vaginal Cream 2%, can be used to treat non-pregnant women and pregnant women during the second and third trimester.
Drug Name: Solosec (secnidazole)

Bacterial Vaginosis Indicated for the treatment of bacterial vaginosis in female patients 12 years of age and older.

Trichomonasis Indicated for the treatment of trichomoniasis in patients 12 years of age and older.

Drug Name: Brand Vandazole (metronidazole gel)

Bacterial Vaginosis Indicated in the treatment of bacterial vaginosis (formerly referred to as Haemophilus vaginitis, Gardnerella vaginitis, nonspecific vaginitis, Corynebacterium vaginitis, or anaerobic vaginosis) in post-menarchal females.

2 . Criteria

Product Name:Nuvessa, Cleocin suppository, Brand Cleocin vaginal cream, Brand Vandazole	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
NUVESSA	METRONIDAZOLE VAGINAL GEL 1.3%	55100035004030	Brand
CLEOCIN	CLINDAMYCIN PHOSPHATE VAGINAL CREAM 2%	55100018103720	Brand
CLEOCIN	CLINDAMYCIN PHOSPHATE VAGINAL SUPPOS 100 MG	55100018105220	Brand
VANDAZOLE	METRONIDAZOLE VAGINAL GEL 0.75%	55100035004020	Generic

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - One of the following:

2.1 Trial and failure of a minimum 5 day supply within the past 180 days, contraindication, or intolerance to generic metronidazole 0.75% vaginal gel

OR

2.2 Trial and failure of a minimum 3 day supply within the past 180 days, contraindication, or intolerance to clindamycin 2% vaginal cream

Product Name:Solosec	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
SOLOSEC	SECNIDAZOLE GRANULES PACKET 2 GM	14000080003020	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of bacterial vaginosis

AND

1.1.2 One of the following:

1.1.2.1 Trial and failure of a minimum 5 day supply within the past 180 days, contraindication, or intolerance to:

- generic metronidazole 0.75% vaginal gel

OR

1.1.2.2 Trial and failure of a minimum 3 day supply within the past 180 days, contraindication, or intolerance to:

- generic clindamycin 2% vaginal cream

OR

1.2 Both of the following:

1.2.1 Diagnosis of trichomoniasis

AND

1.2.2 Trial and failure within the past 180 days, contraindication, or intolerance to ONE of the following generics: [6]

- metronidazole tablet
- tinidazole tablet

Prior Authorization Guideline

Guideline ID	GL-228365
Guideline Name	Balversa (erdafitinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Balversa (erdafitinib)
Urothelial Carcinoma Indicated for the treatment of adult patients with locally advanced or metastatic urothelial carcinoma (mUC) with susceptible FGFR3 genetic alterations whose disease has progressed on or after at least one line of prior systemic therapy. Select patients for therapy based on an FDA-approved companion diagnostic for BALVERSA. Limitations of Use: BALVERSA is not recommended for the treatment of patients who are eligible for and have not received prior PD-1 or PD-L1 inhibitor therapy.

2 . Criteria

Product Name:Balversa	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BALVERSA	ERDAFITINIB TAB 3 MG	21532225000320	Brand
BALVERSA	ERDAFITINIB TAB 4 MG	21532225000325	Brand
BALVERSA	ERDAFITINIB TAB 5 MG	21532225000330	Brand

Approval Criteria

1 - Diagnosis of urothelial carcinoma

AND

2 - Disease is one of the following:

- Locally advanced
- Metastatic

AND

3 - Presence of susceptible fibroblast growth factor receptor (FGFR) 3 genetic alterations as detected by a U.S. Food and Drug Administration (FDA)-approved test (therascreen FGFR RGQ RT-PCR Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - Disease has progressed on or after at least one line of prior systemic therapy (e.g., chemotherapy)

AND

5 - One of the following:

5.1 Patient had been treated with prior PD-1 inhibitor therapy (e.g., Opdivo [nivolumab], Keytruda [pembrolizumab]) or PD-L1 inhibitor therapy (e.g., Bavencio [avelumab])

OR

5.2 Patient is not a candidate for PD-1 or PD-L1 inhibitor therapy

Product Name:Balversa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BALVERSA	ERDAFITINIB TAB 3 MG	21532225000320	Brand
BALVERSA	ERDAFITINIB TAB 4 MG	21532225000325	Brand
BALVERSA	ERDAFITINIB TAB 5 MG	21532225000330	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . References

Prior Authorization Guideline

Guideline ID	GL-228802
Guideline Name	Banzel (rufinamide)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Banzel (rufinamide) tablets and oral suspension
Lennox-Gastaut Syndrome (LGS) Indicated for the adjunctive treatment of seizures associated with Lennox-Gastaut Syndrome in pediatric patients 1 year of age and older and in adults.

2 . Criteria

Product Name:Brand Banzel	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BANZEL	RUFINAMIDE TAB 200 MG	72600065000320	Brand
BANZEL	RUFINAMIDE TAB 400 MG	72600065000330	Brand
BANZEL	RUFINAMIDE SUSP 40 MG/ML	72600065001820	Brand

Approval Criteria

1 - Diagnosis of seizures associated with Lennox-Gaustaut Syndrome (LGS)

AND

2 - Used as adjunctive therapy

AND

3 - Patient is 1 year of age or older

AND

4 - One of the following:

- Trial of and inadequate response to, contraindication, or intolerance to ONE generic formulary anticonvulsant (e.g., topiramate, lamotrigine, valproate)
- For continuation of prior therapy if the patient is established on Brand Banzel

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:generic rufinamide	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
RUFINAMIDE	RUFINAMIDE SUSP 40 MG/ML	72600065001820	Generic

2 - Disease has progressed during or within 6 months of treatment with rituximab or a rituximab-containing regimen

Notes	If patient meets criteria above, please approve at NDC level.

3 . Endnotes

A. For Bendeka: The recommended dose for chronic lymphocytic leukemia (CLL) is 100 mg/m2 administered intravenously over 10 minutes on Days 1 and 2 of a 28-day cycle, up to 6 cycles. [3]
B. For Bendeka: The recommended dose for non-Hodgkin lymphoma (NHL) is 120 mg/m2 administered intravenously over 10 minutes on Days 1 and 2 of a 21-day cycle, up to 8 cycles. [3]

C. For Belrapzo, Bendamustine, Treanda: The recommended dose for chronic lymphocytic leukemia (CLL) is 100 mg/m2 administered intravenously over 30 minutes on Days 1 and 2 of a 28-day cycle, up to 6 cycles. [1, 2, 4]
D. For Belrapzo, Bendamustine, Treanda: The recommended dose for non-Hodgkin lymphoma (NHL) is 120 mg/m2 administered intravenously over 60 minutes on Days 1 and 2 of a 21-day cycle, up to 8 cycles. [1, 2, 4]
E. For Vivimusta: The recommended dose for chronic lymphocytic leukemia (CLL) is 100 mg/m2 administered intravenously over 20 minutes on Days 1 and 2 of a 28-day cycle for up to 6 cycles. [5]
F. For Vivimusta: The recommended dose for non-Hodgkin lymphoma (NHL) is 20 mg/m2 administered intravenously over 20 minutes on Days 1 and 2 of a 21-day cycle for up to 8 cycles. [5]

Effective Date:	1/1/2025

1 . Indications

Drug Name: Benlysta (belimumab IV), Benlysta (belimumab SC)
Systemic Lupus Erythematosus (SLE) Indicated for the treatment of patients aged 5 years and older with active systemic lupus erythematosus (SLE) who are receiving standard therapy. Limitations of Use: The efficacy of Benlysta has not been evaluated in patients with severe active central nervous system lupus. Use of Benlysta is not recommended in these situations. **Lupus Nephritis** Indicated for the treatment of patients aged 5 years and older with active lupus nephritis who are receiving standard therapy. Limitations of Use: The efficacy of Benlysta has not been evaluated in patients with severe active central nervous system lupus. Use of Benlysta is not recommended in these situations.

2 . Criteria

Product Name:Benlysta SC prefilled syringe	
Diagnosis	Systemic lupus erythematosus
Approval Length	6 months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BENLYSTA	BELIMUMAB SUBCUTANEOUS SOLUTION PREFILLED SYRINGE 200 MG/ML	9942201500E520	Brand

Approval Criteria

1 - Diagnosis of active systemic lupus erythematosus (SLE)

AND

2 - Autoantibody positive (i.e., anti-nuclear antibody [ANA] titer greater than or equal to 1:80 or anti-dsDNA level greater than or equal to 30 IU/mL) [2, 3]

AND

3 - Patient is 18 years of age or older

AND

4 - Trial and failure, contraindication, or intolerance to two standard of care treatments for active SLE (e.g., antimalarials [e.g., Plaquenil (hydroxychloroquine)], corticosteroids [e.g., prednisone], or immunosuppressants [e.g., methotrexate, Imuran (azathioprine)]) [5]

AND

5 - Currently receiving at least one standard of care treatment for active SLE (e.g., antimalarials [e.g., Plaquenil (hydroxychloroquine)], corticosteroids [e.g., prednisone], or immunosuppressants [e.g., methotrexate, Imuran (azathioprine)]) [2, 3]

AND

6 - Prescribed by or in consultation with a rheumatologist

Product Name:Benlysta IV or Benlysta SC autoinjector	
Diagnosis	Systemic lupus erythematosus
Approval Length	6 months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BENLYSTA	BELIMUMAB FOR IV SOLN 120 MG	99422015002120	Brand
BENLYSTA	BELIMUMAB FOR IV SOLN 400 MG	99422015002140	Brand
BENLYSTA	BELIMUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 200 MG/ML	9942201500D520	Brand

Approval Criteria

1 - Diagnosis of active systemic lupus erythematosus (SLE)

AND

2 - Autoantibody positive (i.e., anti-nuclear antibody [ANA] titer greater than or equal to 1:80 or anti-dsDNA level greater than or equal to 30 IU/mL) [2, 3]

AND

3 - Patient is 5 years of age or older

AND

4 - Trial and failure, contraindication, or intolerance to two standard of care treatments for

active SLE (e.g., antimalarials [e.g., Plaquenil (hydroxychloroquine)], corticosteroids [e.g., prednisone], or immunosuppressants [e.g., methotrexate, Imuran (azathioprine)]) [5]

AND

5 - Currently receiving at least one standard of care treatment for active SLE (e.g., antimalarials [e.g., Plaquenil (hydroxychloroquine)], corticosteroids [e.g., prednisone], or immunosuppressants [e.g., methotrexate, Imuran (azathioprine)]) [2, 3]

AND

6 - Prescribed by or in consultation with a rheumatologist

Product Name:Benlysta IV or Benlysta SC	
Diagnosis	Lupus nephritis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BENLYSTA	BELIMUMAB FOR IV SOLN 120 MG	99422015002120	Brand
BENLYSTA	BELIMUMAB FOR IV SOLN 400 MG	99422015002140	Brand
BENLYSTA	BELIMUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 200 MG/ML	9942201500D520	Brand
BENLYSTA	BELIMUMAB SUBCUTANEOUS SOLUTION PREFILLED SYRINGE 200 MG/ML	9942201500E520	Brand

Approval Criteria

1 - Diagnosis of active lupus nephritis

AND

2 - One of the following:

- For Benlysta IV, patient is 5 years of age or older
- For Benlysta SC, patient is 18 years of age or older

AND

3 - Currently receiving standard of care treatment for active lupus nephritis (e.g., corticosteroids [e.g., prednisone] with mycophenolate or cyclophosphamide) [1, 4]

AND

4 - Prescribed by or in consultation with one of the following:

- Nephrologist
- Rheumatologist

Product Name:Benlysta IV or Benlysta SC	
Diagnosis	All indications listed above
Approval Length	6 months [2, A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BENLYSTA	BELIMUMAB FOR IV SOLN 120 MG	99422015002120	Brand
BENLYSTA	BELIMUMAB FOR IV SOLN 400 MG	99422015002140	Brand
BENLYSTA	BELIMUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 200 MG/ML	9942201500D520	Brand
BENLYSTA	BELIMUMAB SUBCUTANEOUS SOLUTION PREFILLED SYRINGE 200 MG/ML	9942201500E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decrease or stabilization of symptoms, improvement in functional impairment, decrease of corticosteroid dose, decrease in pain medications)

3 . Endnotes

A. SLE is a disease that fluctuates. The undulating course of typical lupus patients requires frequent reassessment. A 6-month authorization period is reasonable. [2]

Prior Authorization Guideline

Guideline ID	GL-228369
Guideline Name	Besremi (ropeginterferon alfa-2b-njft) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Besremi (ropeginterferon alfa-2b-njft)
Polycythemia Vera Indicated for the treatment of adults with polycythemia vera.

2 . Criteria

Product Name:Besremi	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

BESREMI	ROPEGINTERFERON ALFA-2B-NJFT SOLN PREFILLED SYR 500 MCG/ML	2170007750E520	Brand

Approval Criteria

1 - Diagnosis of polycythemia vera as confirmed by all of the following [A]:

1.1 One of the following:

- Hemoglobin greater than 16.5 g/dL for men or hemoglobin greater than 16.0 g/dL for women
- Hematocrit greater than 49% for men or hematocrit greater than 48% for women
- Increased red cell mass

AND

1.2 Bone marrow biopsy showing hypercellularity for age with trilineage growth (panmyelosis) including prominent erythroid, granulocytic and megakaryocytic proliferation with pleomorphic, mature megakaryocytes

AND

1.3 One of the following:

- Presence of JAK2 or JAK2 exon 12 mutation
- Subnormal serum erythropoietin level

AND

2 - One of the following:

2.1 For high-risk polycythemia vera only (patient greater than or equal to 60 years old and/or prior thrombosis history), trial and inadequate response, contraindication or intolerance to hydroxyurea

OR

2.2 For continuation of prior therapy

Product Name:Besremi	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BESREMI	ROPEGINTERFERON ALFA-2B-NJFT SOLN PREFILLED SYR 500 MCG/ML	2170007750E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in hematological response, resolution of splenomegaly, absence of thromboembolic events) [2]

Product Name:Besremi	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
BESREMI	ROPEGINTERFERON ALFA-2B-NJFT SOLN PREFILLED SYR 500 MCG/ML	2170007750E520	Brand

Approval Criteria

1 - Diagnosis of polycythemia vera as confirmed by all of the following [A]:

1.1 One of the following:

- Hemoglobin greater than 16.5 g/dL for men or hemoglobin greater than 16.0 g/dL for women
- Hematocrit greater than 49% for men or hematocrit greater than 48% for women
- Increased red cell mass

AND

1.2 Bone marrow biopsy showing hypercellularity for age with trilineage growth (panmyelosis) including prominent erythroid, granulocytic and megakaryocytic proliferation with pleomorphic, mature megakaryocytes

AND

1.3 One of the following:

- Presence of JAK2 or JAK2 exon 12 mutation
- Subnormal serum erythropoietin level

AND

2 - One of the following:

2.1 For high-risk polycythemia vera only (patient greater than or equal to 60 years old and/or prior thrombosis history), submission of medical records (e.g., chart notes) confirming trial and inadequate response, contraindication or intolerance to hydroxyurea

OR

2.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

3 . Endnotes

A. According to the World Health Organization (WHO), diagnosis of polycythemia vera requires meeting either all three major criteria or the first two major criteria and one minor criterion. The three major criteria are as follows: 1) Hemoglobin > 16.5 g/dL for men or hemoglobin > 16.0 g/dL for women, or Hematocrit > 49% for men or Hematocrit > 48% for women, or increased red cell mass; 2) Bone marrow biopsy showing hypercellularity for age with trilineage growth (panmyelosis) including prominent erythroid, granulocytic and megakaryocytic proliferation with pleomorphic, mature megakaryocytes (differences in size); 3) Presence of JAK2 or JAK2 exon 12 mutation. The minor criterion is subnormal serum erythropoietin level. [3]

Prior Authorization Guideline

Guideline ID	GL-228801
Guideline Name	Bevacizumab - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Avastin (bevacizumab)
Metastatic Colorectal Cancer (mCRC) Indicated for the first- or second-line treatment of patients with metastatic carcinoma of the colon or rectum in combination with intravenous 5-fluorouracil-based chemotherapy. Bevacizumab, in combination with fluoropyrimidine-irinotecan- or fluoropyrimidine-oxaliplatin-based chemotherapy, is also indicated for second-line treatment of patients with metastatic colorectal cancer who have progressed on a first-line bevacizumab product-containing regimen. Limitation of use: Bevacizumab is not indicated for adjuvant treatment of colon cancer. **First-line Non-Squamous Non–Small Cell Lung Cancer (NSCLC)** Indicated for the first-line treatment of unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer in combination with carboplatin and paclitaxel. **Recurrent Glioblastoma** Indicated for the treatment of recurrent glioblastoma in adults. **Metastatic Renal Cell Carcinoma (mRCC)** Indicated for the treatment of metastatic renal cell carcinoma in combination with interferon alfa. **Persistent, Recurrent, or Metastatic Cervical Cancer** Indicated for the treatment of

persistent, recurrent, or metastatic cervical cancer when used in combination with paclitaxel and cisplatin or paclitaxel and topotecan.

Epithelial Ovarian, Fallopian Tube, or Primary Peritoneal Cancer Indicated, in combination with carboplatin and paclitaxel, followed by bevacizumab as a single agent, for the treatment of patients with stage III or IV epithelial ovarian, fallopian tube, or primary peritoneal cancer following initial resection. Indicated, in combination with paclitaxel, pegylated liposomal doxorubicin, or topotecan, for the treatment of patients with platinum-resistant recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer who received no more than 2 prior chemotherapy regimens. Indicated, in combination with carboplatin and paclitaxel, or with carboplatin and gemcitabine, followed by bevacizumab as a single agent, for the treatment of patients with platinum-sensitive recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer.

Hepatocellular Carcinoma Indicated, in combination with atezolizumab, for the treatment of patients with unresectable or metastatic hepatocellular carcinoma (HCC) who have not received prior systemic therapy.

Drug Name: Mvasi (bevacizumab-awwb), Zirabev (bevacizumab-bvzr), Alymsys (bevacizumab-maly), Vegzelma (bevacizumab-adcd)

Metastatic Colorectal Cancer (mCRC) Indicated for the first- or second-line treatment of patients with metastatic carcinoma of the colon or rectum in combination with intravenous 5-fluorouracil-based chemotherapy. Bevacizumab, in combination with fluoropyrimidine-irinotecan- or fluoropyrimidine-oxaliplatin-based chemotherapy, is also indicated for second-line treatment of patients with metastatic colorectal cancer who have progressed on a first-line bevacizumab product-containing regimen. Limitation of use: Bevacizumab is not indicated for adjuvant treatment of colon cancer.

First-line Non-Squamous Non–Small Cell Lung Cancer (NSCLC) Indicated for the first-line treatment of unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer in combination with carboplatin and paclitaxel.

Recurrent Glioblastoma Indicated for the treatment of recurrent glioblastoma in adults.

Metastatic Renal Cell Carcinoma (mRCC) Indicated for the treatment of metastatic renal cell carcinoma in combination with interferon alfa.

Persistent, Recurrent, or Metastatic Cervical Cancer Indicated for the treatment of persistent, recurrent, or metastatic cervical cancer when used in combination with paclitaxel and cisplatin or paclitaxel and topotecan.

Epithelial Ovarian, Fallopian Tube, or Primary Peritoneal Cancer Indicated, in combination with carboplatin and paclitaxel, followed by bevacizumab as a single agent, for the treatment of patients with stage III or IV epithelial ovarian, fallopian tube, or primary peritoneal cancer following initial resection. Indicated, in combination with paclitaxel, pegylated liposomal doxorubicin, or topotecan, for the treatment of patients with platinum-resistant recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer who received no more than 2 prior chemotherapy regimens. Indicated, in combination with carboplatin and paclitaxel, or with carboplatin and gemcitabine, followed by bevacizumab as a single agent,

for the treatment of patients with platinum-sensitive recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer.

Off Label Uses: **Hepatocellular Carcinoma** Indicated, in combination with atezolizumab, for the treatment of patients with unresectable or metastatic hepatocellular carcinoma (HCC) who have not received prior systemic therapy. [4, A]

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Requested medication is being used for a Food and Drug Administration (FDA)-approved indication

AND

1.1.2 Both of the following labeling requirements have been confirmed:

1.1.2.1 All components of the FDA approved indication are met (e.g., concomitant use, previous therapy requirements, age limitations, testing requirements, etc.)

AND

1.1.2.2 Prescribed medication will be used at a dose which is within FDA recommendations

OR

1.2 Meets the off-label administrative guideline criteria

AND

2 - One of the following (applies to Avastin, Alymsys and Vegzelma only):

2.1 Trial and failure, or intolerance to both of the following:

- Mvasi
- Zirabev

OR

2.2 Continuation of therapy for patients currently in the midst of an ongoing prescribed treatment regimen

Prior Authorization Guideline

Guideline ID	GL-229086
Guideline Name	Bimzelx (bimekizumab-bkzx)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Bimzelx (bimekizumab-bkzx)
Plaque Psoriasis (PsO) Indicated for the treatment of moderate to severe plaque psoriasis in adult patients who are candidates for systemic therapy or phototherapy. **Psoriatic Arthritis (PsA)** Indicated for the treatment of adult patients with active psoriatic arthritis. **Non-radiographic Axial Spondyloarthritis (nr-axSpA)** Indicated for the treatment of adult patients with active non-radiographic axial spondyloarthritis with objective signs of inflammation. **Ankylosing Spondylitis (AS)** Indicated for the treatment of adult patients with active ankylosing spondylitis.

2 . Criteria

Product Name:Bimzelx	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN AUTO-INJECTOR 160 MG/ML	9025051800D520	Brand
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN PREFILLED SYR 160 MG/ML	9025051800E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

- At least 3% body surface area involvement
- Severe scalp psoriasis
- Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

- corticosteroids (e.g., betamethasone, clobetasol)
- vitamin D analogs (e.g., calcitriol, calcipotriene)
- tazarotene
- calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

AND

5 - Trial and failure, contraindication, or intolerance to TWO of the following:

- Cimzia (certolizumab pegol)
- Enbrel (etanercept)
- One formulary adalimumab product*
- One formulary ustekinumab product*
- Cosentyx (secukinumab)
- Skyrizi (risankizumab)
- Tremfya (guselkumab)
- Otezla (apremilast)
- Sotyktu (deucravacitinib)

Notes	* For review process only: Refer to the table in the Background sectio n for carrier-specific formulary products

Product Name:Bimzelx	
Diagnosis	Plaque Psoriasis
Approval Length	12 month(s)

4.1 Trial and failure, contraindication, or intolerance to TWO of the following:

- Cimzia (certolizumab pegol)
- Enbrel (etanercept)
- One formulary adalimumab product*
- Simponi (golimumab)
- One formulary ustekinumab product*
- Cosentyx (secukinumab)
- Skyrizi (risankizumab)
- Tremfya (guselkumab)
- Rinvoq/LQ (upadacitinib)
- Xeljanz/XR (tofacitinib/ER)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

Notes	* For review process only: Refer to the table in the Background section for carrier-specific formulary products

Product Name:Bimzelx	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN AUTO-INJECTOR 160 MG/ML	9025051800D520	Brand
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN PREFILLED SYR 160 MG/ML	9025051800E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following [1, 4]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline
- Reduction in the body surface area (BSA) involvement from baseline

Product Name:Bimzelx	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN AUTO-INJECTOR 160 MG/ML	9025051800D520	Brand
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN PREFILLED SYR 160 MG/ML	9025051800E520	Brand

Approval Criteria

1 - Diagnosis of active non-radiographic axial spondyloarthritis (nr-axSpA)

AND

2 - Patient has objective signs of inflammation (e.g., C-reactive protein [CRP] levels above the upper limit of normal and/or sacroiliitis on magnetic resonance imaging [MRI], indicative of inflammatory disease, but without definitive radiographic evidence of structural damage on sacroiliac joints.) [1, 5]

AND

3 - Prescribed by or in consultation with a rheumatologist

AND

4 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen) at maximally tolerated doses [5]

AND

5 - One of the following:

5.1 Trial and failure, contraindication, or intolerance to TWO of the following:

- Cimzia (certolizumab pegol)
- Cosentyx (secukinumab)
- Rinvoq (upadacitinib)

OR

5.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

Product Name:Bimzelx	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN AUTO-INJECTOR 160 MG/ML	9025051800D520	Brand
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN PREFILLED SYR 160 MG/ML	9025051800E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 5]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Function
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Product Name:Bimzelx	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN AUTO-INJECTOR 160 MG/ML	9025051800D520	Brand
BIMZELX	BIMEKIZUMAB-BKZX SUBCUTANEOUS SOLN PREFILLED SYR 160 MG/ML	9025051800E520	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis (AS)

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [5]

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to TWO of the following:

- Cimzia (certolizumab pegol)
- Enbrel (etanercept)
- One formulary adalimumab product*
- Simponi (golimumab)
- Cosentyx (secukinumab)
- Rinvoq (upadacitinib)
- Xeljanz/XR (tofacitinib/ER)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

Notes	* For review process only: Refer to the table in the Background section for carrier-specific formulary products

5 . Revision History

Date	Notes
12/20/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-228625
Guideline Name	Blood Glucose Monitor & Test Strips - QL
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

Note:

This guideline does not apply to continuous glucose monitors.

1 . Indications

Drug Name: Blood glucose monitoring systems
Quantitative measurements of glucose Intended to be used for quantitative measurements of glucose in fresh capillary and/or venous whole blood. Various devices are designed for testing by persons with diabetes or by health care professionals in the home or health care facilities.

2 . Criteria

Product Name:Preferred or non-preferred test strip products	
Approval Length	12 month(s)
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
GLUCOSE TEST STRIPS	glucose test strip	94100030	
BLOOD GLUCOSE TEST STRIPS	GLUCOSE BLOOD TEST STRIP	94100030006100	Brand

Approval Criteria

1 - Physician confirmation that the patient requires a greater quantity because of more frequent blood glucose testing (e.g., patients on intravenous insulin infusions) [A]

3 . Endnotes

A. The evidence regarding the utility and optimal frequency of blood glucose monitoring (BGM) is not well defined for patients who do not use intensive insulin regimens, such as those with type 2 diabetes using oral agents and/or basal insulin [1]. However for most patients using intensive insulin regimens (multiple-dose insulin or insulin pump therapy) BGM should be performed prior to meals and snacks, at bedtime, occasionally postprandially, prior to exercise, when they suspect low blood glucose, after treating low blood glucose until they are normoglycemic, and prior to and while performing critical tasks such as driving [1].

Prior Authorization Guideline

Guideline ID	GL-228372
Guideline Name	Bonjesta, Diclegis (doxylamine/pyridoxine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Bonjesta, Diclegis (doxylamine succinate and pyridoxine hydrochloride)
Nausea and vomiting of pregnancy Indicated for the treatment of nausea and vomiting of pregnancy in women who do not respond to conservative management. Limitations of Use: Bonjesta and Diclegis have not been studied in women with hyperemesis gravidarum.

2 . Criteria

Product Name:Bonjesta, Brand Diclegis, Generic doxylamine/pyridoxine delayed-release			
Approval Length	9 Months		
Guideline Type	Prior Authorization		
Product Name	Generic Name	GPI	Brand/Generic

DICLEGIS	DOXYLAMINE-PYRIDOXINE TAB DELAYED RELEASE 10-10 MG	50309902100620	Brand
BONJESTA	DOXYLAMINE-PYRIDOXINE TAB ER 20-20 MG	50309902100430	Brand
DOXYLAMINE SUCCINATE/PYRIDOXINE HYDROCHLORIDE	DOXYLAMINE-PYRIDOXINE TAB DELAYED RELEASE 10-10 MG	50309902100620	Generic

Approval Criteria

1 - Diagnosis of nausea and vomiting of pregnancy

AND

2 - Trial and failure or intolerance to generic doxylamine and generic pyridoxine (Vitamin B6) taken together [5, 7]

3 . Endnotes

A. Bonjesta and Diclegis (doxylamine succinate/pyridoxine hydrochloride) are contraindicated in women who are taking monoamine oxidase inhibitors (MAOIs), which prolong and intensify the anticholinergic (drying) effects of antihistamines. [1, 6]

Prior Authorization Guideline

Guideline ID	GL-229096
Guideline Name	Bosulif (bosutinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/13/2012
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Bosulif (bosutinib)
Accelerated or Blast Phase Chronic Myelogenous/Myeloid Leukemia Indicated for the treatment of adult patients with accelerated or blast phase Philadelphia chromosome-positive (Ph+) chronic myelogenous leukemia (CML) with resistance or intolerance to prior therapy. **Chronic Phase Chronic Myelogenous Leukemia** Indicated for the treatment of adult and pediatric patients 1 year of age and older with chronic phase (CP) Philadelphia chromosome-positive chronic myelogenous leukemia (Ph+ CML), newly-diagnosed or resistant or intolerant to prior therapy.

2 . Criteria

Product Name:Bosulif	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOSULIF	BOSUTINIB TAB 100 MG	21531812000320	Brand
BOSULIF	BOSUTINIB TAB 400 MG	21531812000327	Brand

BOSULIF	BOSUTINIB CAP 50 MG	21531812000120	Brand
BOSULIF	BOSUTINIB CAP 100 MG	21531812000130	Brand

Approval Criteria

1 - Diagnosis of Philadelphia chromosome-positive chronic myelogenous/myeloid leukemia (Ph+ CML) [1, 2]

AND

2 - One of the following:

2.1 Disease is in the accelerated or blast phase

OR

2.2 Both of the following:

2.2.1 Both of the following:

- Disease is in the chronic phase
- Patient is 1 year of age or older

AND

2.2.2 One of the following:

2.2.2.1 Trial and failure, contraindication, or intolerance to BOTH of the following:

- generic dasatinib
- generic imatinib

OR

2.2.2.2 Continuation of prior therapy

Product Name:Bosulif	
Approval Length	12 month(s)

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233325
Guideline Name	Botox (onabotulinumtoxinA)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	2/18/2025
P&T Approval Date:	3/17/2000
P&T Revision Date:	12/18/2024

1 . Indications

Drug Name: Botox (onabotulinumtoxin A)
Adult Bladder Dysfunction 1) Overactive Bladder: Indicated for the treatment of overactive bladder with symptoms of urge urinary incontinence, urgency, and frequency, in adults who have an inadequate response to or are intolerant of an anticholinergic medication. 2) Detrusor Overactivity associated with a Neurologic Condition: Indicated for the treatment of urinary incontinence due to detrusor overactivity associated with a neurologic condition (e.g., spinal cord injury, multiple sclerosis) in adults who have an inadequate response to or are intolerant of an anticholinergic medication. 2) Detrusor Overactivity associated with a Neurologic Condition: Indicated for the treatment of urinary incontinence due to detrusor overactivity associated with a neurologic condition (e.g., spinal cord injury, multiple sclerosis) in adults who have an inadequate response to or are intolerant of an anticholinergic medication. **Pediatric Detrusor Overactivity associated with a Neurologic Condition** Indicated for the treatment of neurogenic detrusor overactivity (NDO) in pediatric patients 5 years of age and older who have an inadequate response to or are intolerant of anticholinergic medication.

Chronic Migraine Indicated for the prophylaxis of headaches in adult patients with chronic migraine (greater than or equal to 15 days per month with headache lasting 4 hours a day or longer). Important Limitations: Safety and effectiveness have not been established for the prophylaxis of episodic migraine (14 headache days or fewer per month) in seven placebo-controlled studies.

Spasticity Indicated for the treatment of spasticity in patients 2 years of age and older. Limitations of use: Botox has not been shown to improve upper extremity functional abilities, or range of motion at a joint affected by a fixed contracture.

Cervical Dystonia (Spasmodic Torticollis) Indicated for the treatment of cervical dystonia in adults to reduce the severity of abnormal head position and neck pain associated with cervical dystonia.

Primary Axillary Hyperhidrosis Indicated for the treatment of severe primary axillary hyperhidrosis that is inadequately managed with topical agents. Limitations of use: The safety and effectiveness of Botox for hyperhidrosis in other body areas have not been established. Weakness of hand muscles and blepharoptosis may occur in patients who receive Botox for palmar hyperhidrosis and facial hyperhidrosis, respectively. Patients should be evaluated for potential causes of secondary hyperhidrosis (e.g., hyperthyroidism) to avoid symptomatic treatment of hyperhidrosis without the diagnosis and/or treatment of the underlying disease. Safety and effectiveness of Botox have not been established for the treatment of axillary hyperhidrosis in pediatric patients under age 18.

Blepharospasm and strabismus Indicated for the treatment of strabismus and blepharospasm associated with dystonia, including benign essential blepharospasm or VII nerve disorders (involving muscles of the face) in patients 12 years of age and above.

Off Label Uses: **Chronic Low Back Pain [2, 3]** Used in the treatment of chronic low back pain.

Other Uses [2, 3] Used in the treatment of achalasia, chronic anal fissures, dynamic muscle contracture in pediatric cerebral palsy patients, sialorrhea, hand tremor, and oromandibular dystonia.

Drug Name: Botox Cosmetic (onabotulinumtoxin A)

Cosmetic Uses [Non-approvable Use] Indicated in adult patients for the temporary improvement in the appearance of: 1) Moderate to severe glabellar lines associated with corrugator and/or procerus muscle activity 2) Moderate to severe lateral canthal lines associated with orbicularis oculi activity 3) Moderate to severe forehead lines associated with frontalis muscle activity 4) Moderate to severe platysma bands associated with platysma muscle activity **Please Note: The request for Botox (onabotulinumtoxin A) injections to treat the appearance of facial lines is not authorized given that this use is for cosmetic purposes only.

2 . Criteria

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Adult Bladder Dysfunction OR Neurogenic Detrusor Overactivity (NDO)
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - One of the following conditions: [1, 3, E, F]

- Urinary incontinence that is associated with a neurologic condition (e.g., spinal cord injury, multiple sclerosis)
- Overactive bladder with symptoms (e.g., urge urinary incontinence, urgency, and frequency)
- Neurogenic detrusor overactivity (NDO)

AND

2 - Trial and failure, contraindication, or intolerance to at least one oral anticholinergic (antispasmodic or antimuscarinic) agent [e.g., Bentyl (dicyclomine), Donnatal (atropine/ scopolamine/ hyoscyamine/ phenobarbital), Levsin/Levsinex (hyoscyamine), Ditropan (oxybutynin), Enablex (darifenacin), or VESIcare (solifenacin)]

AND

3 - Patient is routinely performing clean intermittent self-catheterization (CIC) or is willing/able to perform CIC if he/she has post-void residual (PVR) urine volume greater than 200 mL

AND

4 - Prescribed by or in consultation with a urologist

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Chronic Migraine
Approval Length	3 Month [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Diagnosis of chronic migraines [I]

AND

2 - Patient has greater than or equal to 8 migraine days per month [1, 13-16, L]

AND

3 - Patient is 18 years of age or older [N]

AND

4 - Medication overuse headache has been considered and potentially offending medication(s) have been discontinued [M]

AND

5 - History of failure (after at least a two month trial), contraindication or intolerance to TWO of the following preventive treatments for migraine from different mechanisms of action: [H, J, O, P, Q, R]

- Elavil [amitriptyline] or Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, metoprolol
- Candesartan
- Lisinopril

AND

6 - Trial and failure, contraindication or intolerance to one of the following:

- Aimovig
- Ajovy

AND

7 - Prescribed by or in consultation with one of the following:

- Neurologist
- Pain specialist
- Headache specialist

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Chronic Migraine
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand

BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient has experienced a positive response to therapy (e.g., a reduction in headache frequency and/or intensity, a reduction in the number of workdays missed due to migraines) [19]

AND

2 - Use of acute migraine medications [e.g., nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen), triptans (e.g., eletriptan, rizatriptan, sumatriptan)] has decreased since the start of therapy

AND

3 - At least 3 months have or will have elapsed since the last series of injections

AND

4 - Patient continues to be monitored for medication overuse headache (MOH) [M]

AND

5 - Trial and failure, contraindication or intolerance to one of the following:

- Aimovig
- Ajovy

AND

6 - Prescribed by or in consultation with one of the following:

- Neurologist
- Pain specialist

- Headache specialist

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Spasticity
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of upper limb spasticity

AND

1.1.2 Trial and failure, contraindication or intolerance to one of the following:

- Xeomin
- Dysport

OR

1.2 Both of the following:

1.2.1 Diagnosis of lower limb spasticity

AND

1.2.2 Trial and failure, contraindication or intolerance to Dysport

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Upper Limb Spasticity
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have or will have elapsed since the last treatment

AND

3 - Trial and failure, contraindication or intolerance to one of the following:

- Xeomin
- Dysport

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Lower Limb Spasticity
Approval Length	3 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have or will have elapsed since the last treatment

AND

3 - Trial and failure, contraindication or intolerance to Dysport

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Cervical Dystonia
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Diagnosis of cervical dystonia (also known as spasmodic torticollis)

AND

2 - Trial and failure, contraindication or intolerance to one of the following:

- Xeomin
- Dysport
- Myobloc

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Cervical Dystonia
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have or will have elapsed since the last treatment

AND

3 - Trial and failure, contraindication or intolerance to one of the following:

- Xeomin
- Dysport

- Myobloc

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Primary Axillary Hyperhidrosis
Approval Length	1 Time(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Diagnosis of primary axillary hyperhidrosis [G]

AND

2 - One of the following:

2.1 Score of 3 or 4 on the Hyperhidrosis Disease Severity Scale (HDSS) [A, 1, 4]

OR

2.2 Skin maceration with secondary infection [5]

AND

3 - Trial and failure, contraindication, or intolerance to topical prescription strength drying agents [e.g., Drysol, Hypercare, Xerac AC (aluminum chloride hexahydrate)]

Product Name:Botox (Excluded: Botox Cosmetic)

Diagnosis	Primary Axillary Hyperhidrosis
Approval Length	1 Time(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - At least a 2-point improvement in HDSS [1, 4]

AND

2 - At least 3 months have or will have elapsed since the last series of injections [1, 4]

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Blepharospasm, Strabismus, VII Cranial Nerve Disorders
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - One of the following:

1.1 One of the following:

1.1.1 All of the following:

1.1.1.1 Diagnosis of blepharospasm associated with dystonia (e.g., benign essential blepharospasm)

AND

1.1.1.2 Patient is 18 years of age or older

AND

1.1.1.3 Trial and failure, contraindication or intolerance to Xeomin

OR

1.1.2 Patient is 12 thru 17 years of age

OR

1.2 Diagnosis of strabismus

OR

1.3 Diagnosis of VII cranial nerve disorders (hemifacial spasms)

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Blepharospasm
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand

BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have or will have elapsed since the last treatment

AND

3 - One of the following:

3.1 Both of the following:

- Patient is 18 years of age or older
- Trial and failure, contraindication or intolerance to Xeomin

OR

3.2 Patient is 12 thru 17 years of age

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Adult Bladder Dysfunction, Strabismus, VII Cranial Nerve Disorders
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have or will have elapsed since the last treatment

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Chronic Anal Fissure (Off-Label)
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Diagnosis of chronic anal fissure [8, 9]

AND

2 - At least 2 months of one of the following symptoms:

- Nocturnal pain and bleeding
- Postdefecation pain

AND

3 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies:

- Topical nitrates (e.g. Glyceryl trinitrate (Nitroglycerin))
- Topical calcium channel blockers (CCBs) (e.g., diltiazem, nifedipine)

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Chronic Anal Fissure (Off-Label)
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - One of the following:

- Incomplete healing of fissure
- Recurrence of fissure

AND

2 - Patient demonstrates positive clinical response to therapy

AND

3 - At least 3 months have or will have elapsed since the last series of injections

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Chronic Back Pain [D] (Off-Label)

Approval Length	1 treatment session (series of injections) [K]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Diagnosis of low back pain

AND

2 - Low back pain has lasted for greater than or equal to six (6) months

AND

3 - Prescribed by or in consultation with one of the following specialists:

- Neurologist
- Neurosurgeon
- Orthopedist
- Pain specialist

AND

4 - Trial and failure (at least 3 months), contraindication, or intolerance to both of the following conventional therapies: [10-12]

- At least one oral NSAID medication
- At least one opioid medication

AND

5 - Trial and failure or inadequate response to one of the following: [10]

- Physical therapy
- Nonpharmacologic therapy (e.g., spinal manipulation, massage therapy, transcutaneous electrical nerve stimulation (TENS), acupuncture/acupressure, and surgery)

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	Chronic Back Pain [D] (Off-Label)
Approval Length	1 treatment session (series of injections) [K]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have or will have elapsed since the last series of injections

AND

3 - Treatment has not exceeded two treatment sessions total per year

Notes	Authorization will not exceed more than two treatment sessions total per year (including initial authorization).

Product Name:Botox (Excluded: Botox Cosmetic)

Diagnosis	Achalasia (Off-Label)
Approval Length	6 Month(s) [C]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Diagnosis of achalasia

AND

2 - One of the following:

2.1 High risk of complication from or failure to one of the following: [6, 7]

- Pneumatic dilation
- Myotomy

OR

2.2 Prior dilation caused esophageal perforation

OR

2.3 Patient has an increased risk of dilation-induced perforation due to one of the following:

- Epiphrenic diverticulum
- Hiatal hernia

Product Name:Botox (Excluded: Botox Cosmetic)

Diagnosis	Achalasia (Off-Label)
Approval Length	6 Month [C]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (i.e., improvement or reduction in symptoms of dysphagia, regurgitation, chest pain)

AND

2 - At least 6 months have or will have elapsed since the last series of injections [C]

Product Name:Botox (Excluded: Botox Cosmetic)	
Diagnosis	All other diagnoses
Approval Length	6 months unless the FDA-approved treatment duration is less than 6 months. If FDA-approved treatment duration is less than 6 months, utilize the FDA-approved duration for authorization period.
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.2 Additional requirements listed in the “Indications and Usage” and “Dosage and Administration” sections of the prescribing information (or package insert) have been met (e.g.: first line therapies have been tried and failed, any testing requirements have been met, etc)

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

2 - Trial and failure, contraindication, or intolerance to two appropriate formulary alternatives (if available)

Product Name:All Products	
Diagnosis	Cosmetic Use
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BOTOX	ONABOTULINUMTOXINA FOR INJ 100 UNIT	74400020052120	Brand
BOTOX	ONABOTULINUMTOXINA FOR INJ 200 UNIT	74400020052140	Brand
BOTOX COSMETIC	ONABOTULINUMTOXINA (COSMETIC) FOR INJ 50 UNIT	90890020002110	Brand
BOTOX COSMETIC	ONABOTULINUMTOXINA (COSMETIC) FOR INJ 100 UNIT	90890020002120	Brand

Approval Criteria

1 - Requests for coverage of any Botox product for treating the appearance of facial lines are not authorized and will not be approved. These uses are considered cosmetic only.

3 . Endnotes

A. Hyperhidrosis Disease Severity Scale • The HDSS is a 4-point scale designed to assess the severity of hyperhidrosis in everyday clinical practice or in clinical research and the effectiveness of treatment. • The HDSS can be administered by an interviewer or self-completed by the patient. • The HDSS assess disease severity based on the extent of sweating-related impairment of daily activities. (1) Question - My (underarm) sweating is never noticeable and never interferes with my daily activities, Score - 1; (2) Question - My (underarm) sweating is tolerable but sometimes interferes with my daily activities, Score - 2; (3) Question - My (underarm) sweating is barely tolerable and frequently interferes with my daily activities, Score - 3; (4) Question - My (underarm) sweating is intolerable and always interferes with my daily activities, Score - 4

B. This recommendation is based on results from the PREEMPT 2 trial. The primary endpoint of PREEMPT 2 was the mean change from baseline in frequency of headache days for the 28-day period ending with week 24. [13, 14]

C. Approximately 50% of achalasia patients relapse and require repeat treatments at 6 to 24-month intervals. [6]

D. An evidence-based review by the American Academy of Neurology (AAN) concluded that botulinum neurotoxin (BoNT) is possibly effective for the treatment of chronic predominantly unilateral low back pain (LBP) [one Class II study]. The AAN recommends that BoNT may be considered as a treatment option for patients with chronic predominantly unilateral LBP (Level C). [12]

E. An evidence-based review by the AAN established BoNT as safe and effective for the treatment of neurogenic detrusor overactivity (NDO) in adults (one Class I study and one Class II study). Data on the use of BoNT is probably safe and effective for the treatment of detrusor sphincter dyssynergia (DSD) in patients with spinal cord injury (2 Class II studies). On basis of one Class I study, BoNT does not provide significant benefit for the treatment of DSD in patients with multiple sclerosis (MS). The AAN recommends that BoNT should be offered as a treatment option for neurogenic detrusor overactivity (Level A), and that BoNT should be considered for DSD in patients with spinal cord injury (Level B). [12]

F. BoNT is not effective in patients with DSD due to multiple sclerosis in a multicenter, double-blind, placebo-controlled trial; however, in patients with DSD due to spinal cord injury, open-label clinical studies showed improvements in urodynamic parameters [recommendation for DSD: Adult, Class IIb, Category B]. For NDO, the use of BoNT (refractory to antispasmodics) in a randomized, double-blind, placebo-controlled clinical trial of 59 patients (n = 53 with spinal cord injury and n = 6 with multiple sclerosis) showed significant improvement in daily incontinence episodes in weeks 1 through 24 (except for weeks 12 and 18) compared to placebo [recommendation for NDO: Adult, Class IIb, Category B]. [12]

G. The safety and effectiveness of Botox for hyperhidrosis in areas other than the axillae have not been established. [1]

H. Clinical benefit from prophylactic therapy may take as long as 2 to 3 months to manifest. [17, 18] Recommended first-line agents for the prevention of migraine headache are atenolol, nadolol, propranolol, timolol, amitriptyline, venlafaxine, topiramate, divalproex sodium, and sodium valproate. [17]

I. Safety and effectiveness have not been established for the prophylaxis of episodic migraine (14 headache days or fewer per month) in seven placebo-controlled studies. [1] An evidence-based review by the American Academy of Neurology determined that, based on available evidence, Botox was probably ineffective in episodic migraine and tension-type headaches, and should not be considered in patients with these conditions. [12]
J. The effects of Botox in reducing the frequency of headache days in the PREEMPT trial and in the pooled analysis of the PREEMPT trials were very modest. Given the experience and evidence we have for other prophylactic treatments in the management of migraine, which are supported by national guidelines, it is reasonable to require failure with other prophylactic treatments before approving use of Botox. [17]
K. A single small randomized trial (n = 31) compared paravertebral injections of botulinum toxin with saline injections and found significant benefit of botulinum toxin up to eight weeks after injection. There is currently no consensus on number of injections or treatment length for low back pain. [12]
L. The International Classification of Headache Disorders, 3rd addition (beta version) distinguishes chronic and episodic migraine [20]. Chronic migraine is described as headache occurring on 15 or more days per month for more than 3 months, which has the features of migraine headache on at least 8 days per month. Episodic migraine is not clearly defined, but is applied when a patient is diagnosed with migraine but does not meet criteria for chronic migraine.
M. Medication overuse headache (MOH) is defined as headache occurring greater than or equal to 15 days per month. It develops as a consequence of regular overuse of acute or symptomatic headache medication for more than 3 months [20]. Current evidence suggests the best treatment strategy is withdrawal of the offending medication.
N. The safety and effectiveness of Botox for chronic headache in patients below the age of 18 years have not been established. In a 12-week, multicenter, double-blind, placebo-controlled clinical trial, 123 adolescent patients (ages 12 to below 18 years) with chronic migraine were randomized to receive Botox 74 Units, Botox 155 Units, or placebo, for one injection cycle. This trial did NOT establish the efficacy of Botox, compared with placebo, for the prophylaxis of headaches in adolescents with chronic migraine. [1]
O. The American Academy of Neurology supports the use of the following medications for the prevention of episodic migraine in adult patients (with level A or B evidence): antidepressants [i.e., Elavil (amitriptyline), Effexor (venlafaxine)], antiepileptics [i.e., Depakote/Depakote ER (divalproex sodium), Topamax (topiramate)], and beta-blockers [i.e., atenolol, propranolol, nadolol, timolol, metoprolol] [21]. They also support the use of Botox (onabotulinumtoxin A) as an efficacious treatment option for chronic migraine. Botox (onabotulinumtoxin A) is not however recommended for episodic migraine treatment.
P. The US Headache Consortium Consensus (Table e-1) recommends that therapy be initiated with medications that have the highest level of evidence-based therapy while also taking into account patient specific comorbidities [17]. Each medication should be given an adequate trial, it may take two to three months to achieve clinical benefit, and six months to achieve maximal benefit.
Q. The OptumRx clinical team consulted with a neurologist [22]. He confirmed that preventative treatment for chronic migraine and episodic migraine are similar. The choice of preventative medication will not vary much between the episodic vs chronic subtypes. The choice of agent will largely depend more on patient specific factors.
R. The National Institute for Health and Care Excellence guidelines for the management of migraine recommend Botox (onabotulinumtoxin A) as an option in chronic migraine after

failure of at least three other prophylactic medications and that the patient is being managed for medication overuse [23].

Guideline ID	GL-228774
Guideline Name	BPH Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cardura XL (doxazosin mesylate extended-release)
Benign prostatic hyperplasia (BPH) Indicated for the treatment of the signs and symptoms of benign prostatic hyperplasia (BPH). Cardura XL is NOT indicated for the treatment of hypertension.
Drug Name: Entadfi (finasteride and tadalafil)
Benign prostatic hyperplasia (BPH) Indicated for the treatment of the signs and symptoms of benign prostatic hyperplasia (BPH) in men with an enlarged prostate for up to 26 weeks. Limitations of Use: Entadfi is not recommended for more than 26 weeks because the incremental benefit of tadalafil decreases from 4 weeks until 26 weeks, and the incremental benefit beyond 26 weeks is unknown.

2 . Criteria

Product Name:Cardura XL	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
CARDURA XL	DOXAZOSIN MESYLATE TAB SR 24 HR 4 MG (BASE EQUIV)	56852025207520	Brand
CARDURA XL	DOXAZOSIN MESYLATE TAB SR 24 HR 8 MG (BASE EQUIV)	56852025207530	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (minimum 30 days supply), contraindication, or intolerance to any TWO of the following generics: [2]

- alfuzosin
- doxazosin
- tamsulosin
- terazosin
- silodosin

Product Name:Entadfi	
Approval Length	26 weeks [A, 2]
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ENTADFI	FINASTERIDE-TADALAFIL CAP 5-5 MG	56859902300120	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (minimum 30 days supply), contraindication, or intolerance to any ONE of the following generics: [B, 3]

- alfuzosin
- doxazosin
- tamsulosin
- terazosin
- silodosin

AND

3 - Trial and failure, contraindication, or intolerance to any ONE of the following:

- 5-alpha-reductase inhibitor (i.e., finasteride, dutasteride)
- phosphodiesterase type 5 inhibitor (i.e., tadalafil 5 mg)

3 . Endnotes

A. Limitations of Use: Entadfi is not recommended for more than 26 weeks because the incremental benefit of tadalafil decreases from 4 weeks until 26 weeks, and the incremental benefit beyond 26 weeks is unknown. [2]
B. Attempts to identify subgroups of patients who may respond better to one alpha- blocker or another have not shown differences in efficacy. Given that medication type and patient characteristics do not impact effectiveness, it is not recommended to switch between various options for insufficient response. However, changing from one alpha- blocker to another on the basis of a side effect is worthwhile. [3]

Braftovi (encorafenib)

Prior Authorization Guideline

Guideline ID	GL-228376
Guideline Name	Braftovi (encorafenib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Braftovi (encorafenib)
BRAF V600E or V600K unresectable or metastatic melanoma Indicated in combination with Mektovi (binimetinib) for the treatment of patients with unresectable or metastatic melanoma with BRAF V600E or V600K mutation, as detected by an FDA-approved test. Limitations of Use: Braftovi is not indicated for treatment of patients with wild-type BRAF melanoma, wild-type BRAF CRC, or wild-type BRAF NSCLC. **BRAF V600E Mutation-Positive Metastatic Colorectal Cancer (CRC)** Indicated in combination with Erbitux (cetuximab) for the treatment of adult patients with metastatic colorectal cancer with BRAF V600E mutation, as detected by an FDA-approved test, after prior therapy. Limitations of Use: Braftovi is not indicated for treatment of patients with wild-type BRAF melanoma, wild-type BRAF CRC, or wild-type BRAF NSCLC. **BRAF V600E Mutation-Positive Metastatic Non-Small Cell Lung Cancer (NSCLC)** Indicated in combination with Mektovi (binimetinib) for the treatment of adult patients with metastatic non-small cell lung cancer (NSCLC) with a BRAF V600E mutation, as detected by an FDA-approved test. Limitations of use: Braftovi is not indicated for treatment of patients with wild-type BRAF melanoma, wild-type BRAF CRC, or wild-type BRAF NSCLC.

2 . Criteria

Product Name:Braftovi	
Diagnosis	Melanoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRAFTOVI	ENCORAFENIB CAP 75 MG	21532040000130	Brand

Approval Criteria

1 - One of the following diagnoses: [2]

- Unresectable melanoma
- Metastatic melanoma

AND

2 - Cancer is BRAF V600E or V600K mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Used in combination with Mektovi (binimetinib)

AND

4 - One of the following:

4.1 Trial and failure, contraindication or intolerance to one of the following:

- Zelboraf (vemurafenib)
- Tafinlar (dabrafenib)

OR

4.2 For continuation of prior therapy

Product Name:Braftovi	
Diagnosis	Colorectal Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRAFTOVI	ENCORAFENIB CAP 75 MG	21532040000130	Brand

Approval Criteria

1 - One of the following diagnoses:

- Colon Cancer
- Rectal Cancer

AND

2 - One of the following [3,4]:

- Unresectable or advanced disease
- Metastatic disease

AND

3 - Patient has received prior therapy

AND

4 - Cancer is BRAFV600E mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

5 - Used in combination with Erbitux (cetuximab)

Product Name:Braftovi	
Diagnosis	Non-Small Cell Lung Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRAFTOVI	ENCORAFENIB CAP 75 MG	21532040000130	Brand

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer (NSCLC)

AND

2 - Cancer is BRAF V600E mutant type as detected by an FDA-approved test (THxID-BRAF Kit) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Used in combination with Mektovi (binimetinib)

Product Name:Braftovi	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRAFTOVI	ENCORAFENIB CAP 75 MG	21532040000130	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-228377
Guideline Name	Brand Estradiol Transdermal Systems
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Minivelle (estradiol transdermal system)
Moderate to Severe Vasomotor Symptoms Indicated for the treatment of moderate to severe vasomotor symptoms due to menopause. **Prevention of Postmenopausal Osteoporosis** Indicated for the prevention of postmenopausal osteoporosis. Limitation of Use: When prescribing solely for the prevention of postmenopausal osteoporosis, first consider the use of non-estrogen medications. Consider estrogen therapy only for women at significant risk of osteoporosis.
Drug Name: Menostar (estradiol transdermal system)
Prevention of Postmenopausal Osteoporosis Indicated for the prevention of postmenopausal osteoporosis. Limitation of Use: When prescribing solely for the prevention of postmenopausal osteoporosis, first consider the use of non-estrogen medications. Consider estrogen therapy only for women at significant risk of osteoporosis.
Drug Name: Alora (estradiol transdermal system)

Moderate to Severe Vasomotor Symptoms Indicated for the treatment of moderate to severe vasomotor symptoms due to menopause.

Moderate to Severe Symptoms of Vulvar and Vaginal Atrophy Indicated for the treatment of moderate to severe symptoms of vulvar and vaginal atrophy due to menopause. Limitation of Use: When prescribing solely for the treatment of symptoms of vulvar and vaginal atrophy, first consider the use of topical vaginal products.

Hypoestrogenism Indicated for the treatment of hypoestrogenism due to hypogonadism, castration or primary ovarian failure.

Prevention of Postmenopausal Osteoporosis Indicated for the prevention of postmenopausal osteoporosis. Limitation of Use: When prescribing solely for the prevention of postmenopausal osteoporosis, only consider therapy for women at significant risk of osteoporosis. First consider the use of non-estrogen medications.

Drug Name: Vivelle-Dot (estradiol transdermal system)

Moderate to Severe Vasomotor Symptoms Indicated for the treatment of moderate to severe vasomotor symptoms due to menopause.

Moderate to Severe Symptoms of Vulvar and Vaginal Atrophy Indicated for the treatment of moderate to severe symptoms of vulvar and vaginal atrophy due to menopause. Limitations of Use: When prescribing solely for the treatment of moderate to severe symptoms of vulvar and vaginal atrophy, first consider the use of topical vaginal products.

Hypoestrogenism Indicated for the treatment of hypoestrogenism due to hypogonadism, castration, or primary ovarian failure.

Prevention of Postmenopausal Osteoporosis Indicated for the prevention of postmenopausal osteoporosis. Limitations of Use: When prescribing solely for the prevention of postmenopausal osteoporosis, first consider the use of non-estrogen medications. Consider estrogen therapy only for women at significant risk of osteoporosis.

2 . Criteria

Product Name:Minivelle, Menostar, Alora, Vivelle-Dot	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Prior Authorization Guideline

Guideline ID	GL-228380
Guideline Name	Brukinsa (zanubrutinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Brukinsa (zanubrutinib)
Mantle Cell Lymphoma Indicated for the treatment of adult patients with mantle cell lymphoma (MCL) who have received at least one prior therapy. This indication is approved under accelerated approval based on overall response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial. **Waldenstrom's Macroglobulinemia/Lymphoplasmacytic Lymphoma** Indicated for the treatment of adult patients with Waldenström’s macroglobulinemia (WM)/ Lymphoplasmacytic Lymphoma [6] **Marginal Zone Lymphoma** Indicated for the treatment of adult patients with relapsed or refractory marginal zone lymphoma (MZL) who have received at least one anti-CD20-based regimen. This indication is approved under accelerated approval based on overall response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial. **Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma** Indicated for the treatment of adult patients with chronic lymphocytic leukemia (CLL) or small lymphocytic

lymphoma (SLL).

Follicular Lymphoma Indicated for the treatment of adult patients with relapsed or refractory follicular lymphoma (FL), in combination with obinutuzumab, after two or more lines of systemic therapy. This indication is approved under accelerated approval based on response rate and durability of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial.

2 . Criteria

Product Name:Brukinsa	
Diagnosis	Mantle Cell Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRUKINSA	ZANUBRUTINIB CAP 80 MG	21532195000120	Brand

Approval Criteria

1 - Diagnosis of relapsed or refractory mantle cell lymphoma (MCL)

AND

2 - Patient has received at least one prior therapy for MCL (e.g., chemotherapy)

AND

3 - One of the following:

3.1 Trial and failure, contraindication, or intolerance to one of the following:

- Calquence (acalabrutinib)

- Imbruvica (ibrutinib)

OR

3.2 For continuation of prior therapy

Product Name:Brukinsa	
Diagnosis	Waldenström's Macroglobulinemia/Lymphoplasmacytic Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRUKINSA	ZANUBRUTINIB CAP 80 MG	21532195000120	Brand

Approval Criteria

1 - Diagnosis of Waldenström's Macroglobulinemia/Lymphoplasmacytic Lymphoma [6]

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to one of the following:

- Calquence (acalabrutinib)
- Imbruvica (ibrutinib)

OR

2.1 For continuation of prior therapy

Product Name:Brukinsa

Diagnosis	Marginal Zone Lymphoma (MZL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRUKINSA	ZANUBRUTINIB CAP 80 MG	21532195000120	Brand

Approval Criteria

1 - Diagnosis of Marginal Zone Lymphoma (MZL)

AND

2 - Disease is relapsed or refractory

AND

3 - Patient has received at least one anti-CD20-based regimen for MZL (e.g., rituximab, obinutuzumab)

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to one of the following:

- Calquence (acalabrutinib)
- Imbruvica (ibrutinib)

OR

4.2 For continuation of prior therapy

Product Name:Brukinsa	
Diagnosis	Chronic Lymphocytic Leukemia (CLL)/Small Lymphocytic Lymphoma (SLL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRUKINSA	ZANUBRUTINIB CAP 80 MG	21532195000120	Brand

Approval Criteria

1 - Diagnosis of ONE of the following:

- Chronic Lymphocytic Leukemia (CLL)
- Small Lymphocytic Lymphoma (SLL)

AND

2 - One of the following:

2.1 Trial and failure, contraindication, or intolerance to one of the following:

- Calquence (acalabrutinib)
- Imbruvica (ibrutinib)

OR

2.2 For continuation of prior therapy

Product Name:Brukinsa	
Diagnosis	Follicular Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BRUKINSA	ZANUBRUTINIB CAP 80 MG	21532195000120	Brand

Approval Criteria

1 - Diagnosis of follicular lymphoma (FL)

AND

2 - Disease is relapsed or refractory

AND

3 - Used in combination with Gazyva (obinutuzumab)

AND

4 - Patient has received at least two prior lines of systemic therapy including both of the following:

- An anti-CD20 antibody [e.g., rituximab]
- An approved alkylator-based combination therapy [e.g., bendamustine in combination with obinutuzumab or rituximab, CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone)]

Product Name:Brukinsa	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

BRUKINSA	ZANUBRUTINIB CAP 80 MG	21532195000120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Chemotherapy regimens may include bendamustine; cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP); cyclophosphamide, vincristine, prednisone (CVP); fludarabine, cyclophosphamide, mitoxantrone (FCM).

Prior Authorization Guideline

Guideline ID	GL-228381
Guideline Name	Bylvay (odevixibat)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Bylvay (odevixibat)
Pruritus associated with progressive familial intrahepatic cholestasis (PFIC) Indicated for the treatment of pruritus in patients 3 months of age and older with progressive familial intrahepatic cholestasis (PFIC). Limitation of Use: Bylvay may not be effective in PFIC type 2 patients with ABCB11 variants resulting in non-functional or complete absence of bile salt export pump protein (BSEP-3). **Alagille syndrome** Indicated for the treatment of cholestatic pruritus in patients 12 months of age and older with Alagille syndrome.

2 . Criteria

Product Name:Bylvay

Diagnosis	Progressive Familial Intrahepatic Cholestasis (PFIC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BYLVAY	ODEVIXIBAT CAP 400 MCG	52350060000120	Brand
BYLVAY	ODEVIXIBAT CAP 1200 MCG	52350060000140	Brand
BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 200 MCG	52350060006810	Brand
BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 600 MCG	52350060006830	Brand

Approval Criteria

1 - Diagnosis of progressive familial intrahepatic cholestasis (PFIC) type 1, 2, or 3 confirmed by one of the following: [B-D, 2]

- Diagnostic test (e.g., liver function test, liver ultrasound and biopsy, bile analysis)
- Genetic Testing

AND

2 - Patient is experiencing both of the following: [1]

- Moderate to severe pruritus
- Patient has a serum bile acid concentration above the upper limit of the normal reference for the reporting laboratory

AND

3 - Patient is 3 months of age or older

AND

4 - Patient has had an inadequate response to at least two of the following treatments used for the relief of pruritus: [6]

- Ursodeoxycholic acid (e.g., Ursodiol)
- Antihistamines (e.g., diphenhydramine, hydroxyzine)
- Rifampin
- Bile acid sequestrants (e.g., Questran, Colestid, Welchol)

AND

5 - Prescribed by or in consultation with a hepatologist or gastroenterologist

Product Name:Bylvay	
Diagnosis	Progressive Familial Intrahepatic Cholestasis (PFIC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BYLVAY	ODEVIXIBAT CAP 400 MCG	52350060000120	Brand
BYLVAY	ODEVIXIBAT CAP 1200 MCG	52350060000140	Brand
BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 200 MCG	52350060006810	Brand
BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 600 MCG	52350060006830	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduced serum bile acids, improved pruritus)

Product Name:Bylvay	
Diagnosis	Alagille Syndrome (ALGS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BYLVAY	ODEVIXIBAT CAP 400 MCG	52350060000120	Brand
BYLVAY	ODEVIXIBAT CAP 1200 MCG	52350060000140	Brand

BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 600 MCG	52350060006830	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of Alagille Syndrome (ALGS)

AND

1.2 Molecular genetic testing confirms mutations in the JAG1 or NOTCH2 gene [E, 7, 9]

AND

2 - Patient is experiencing both of the following: [10]

- Moderate to severe cholestatic pruritus
- Patient has a serum bile acid concentration above the upper limit of the normal reference for the reporting laboratory

AND

3 - Patient has had an inadequate response to at least two of the following treatments used for the relief of pruritus: [F, 7-8]

- Ursodeoxycholic acid (e.g., Ursodiol)
- Antihistamines (e.g., diphenhydramine, hydroxyzine)
- Rifampin
- Bile acid sequestrants (e.g., Questran, Colestid, Welchol)

AND

4 - Patient is 12 months of age or older

AND

5 - Prescribed by or in consultation with a hepatologist or gastroenterologist

Product Name:Bylvay	
Diagnosis	Alagille Syndrome (ALGS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BYLVAY	ODEVIXIBAT CAP 400 MCG	52350060000120	Brand
BYLVAY	ODEVIXIBAT CAP 1200 MCG	52350060000140	Brand
BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 200 MCG	52350060006810	Brand
BYLVAY (PELLETS)	ODEVIXIBAT PELLETS CAP SPRINKLE 600 MCG	52350060006830	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduced bile acids, reduced pruritus severity score)

3 . Definitions

Definition	Description
PFIC	PFIC:[2] Progressive: tending to get worse over time; Familial: originally described in families and related to changes in genes;

	Intrahepatic: involves disease inside the liver; Cholestasis: means poor bile flow and build-up of substances in the liver that would normally be carried out of the liver into bile and then the intestines

4 . Endnotes

A. If there is no improvement in pruritus after 3 months, the dosage may be increased in 40 mcg/kg increments up to 120 mcg/kg once daily not to exceed a total daily dose of 6 mg [3].
B. The efficacy of BYLVAY was evaluated in Trial 1 (NCT03566238), a 24-week, randomized, double-blind, placebo-controlled trial. Trial 1 was conducted in 62 pediatric patients, aged 6 months to 17 years, with a confirmed molecular diagnosis of PFIC type 1 or type 2, and presence of pruritus at baseline. [3]
C. Trial 2 is a 72-week, open-label, single-arm trial in PFIC type 1, 2, and 3 patients. [3]
D. Diagnostic testing may include liver functions tests, liver ultrasound and biopsy, and/or bile analysis. Genetic testing may be used in selected patients to confirm diagnosis and distinguish type. All 3 subtypes of PFIC have increased serum bile acid levels. [5]
E. Alagille Syndrome is an autosomal dominant disease with variable expressivity, caused by heterozygous mutations in either JAG1 or NOTCH2. The vast majority of cases are due to JAG1 mutations accounting for 94%, and NOTCH2 mutations in additional 2–4%. [7]
F. The management of pruritus in ALGS is challenging, and a variety of therapies are often used. These include antihistamines, rifampin, ursodeoxycholic acid, cholestyramine, naltrexone, and sertraline. Clinical experience suggests that these drugs have variable efficacy in reducing pruritus; however, no prospective clinical trials has quantified the effect of any of these therapies, either alone or in combination. [8]

Prior Authorization Guideline

Guideline ID	GL-228803
Guideline Name	Cablivi (caplacizumab-yhdp)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cablivi (caplacizumab-yhdp)
Acquired Thrombotic Thrombocytopenic Purpura (aTTP) Indicated for the treatment of adult patients with acquired thrombotic thrombocytopenic purpura (aTTP), in combination with plasma exchange and immunosuppressive therapy.

2 . Criteria

Product Name:Cablivi	
Diagnosis	Acquired Thrombotic Thrombocytopenic Purpura (aTTP)
Approval Length	3 Months [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CABLIVI	CAPLACIZUMAB-YHDP FOR INJ KIT 11 MG	85151020806420	Brand

Approval Criteria

1 - Diagnosis of acquired thrombotic thrombocytopenic purpura (aTTP)

AND

2 - First dose was/will be administered by a healthcare provider as a bolus intravenous injection

AND

3 - Used in combination with immunosuppressive therapy (e.g., rituximab, glucocorticoids) [3]

AND

4 - One of the following:

4.1 Used in combination with plasma exchange

OR

4.2 Both of the following:

- Patient has completed plasma exchange
- Less than 59 days have or will have elapsed beyond the last plasma exchange [B]

AND

5 - Prescribed by or in consultation with a hematologist or oncologist[2]

3 . Endnotes

A. Three month approval duration, based on package insert stating longest therapy in trial was 77 days.
B. Per package insert, after the plasma exchange period can use injection once daily for 30 days beyond the last plasma exchange and after the initial treatment course, if signs of persistent underlying disease are present treatment can be extended for a maximum of 28 days, totaling 58 days of therapy after last plasma exchange.

Prior Authorization Guideline

Guideline ID	GL-228805
Guideline Name	Cabometyx (cabozantinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cabometyx (cabozantinib) tablets
Renal cell carcinoma (RCC) Indicated for the treatment of patients with advanced renal cell carcinoma (RCC). **Renal cell carcinoma (RCC)** Indicated, in combination with nivolumab, for the first-line treatment of patients with advanced RCC. **Hepatocellular Carcinoma (HCC)** Indicated for the treatment of patients with hepatocellular carcinoma (HCC) who have been previously treated with sorafenib. **Differentiated Thyroid Cancer** Indicated for the treatment of adult and pediatric patients 12 years of age and older with locally advanced or metastatic differentiated thyroid cancer (DTC) that has progressed following prior VEGFR-targeted therapy and who are radioactive iodine-refractory or ineligible.

2 . Criteria

Product Name:Cabometyx	
Diagnosis	Renal Cell Carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CABOMETYX	CABOZANTINIB S-MALATE TAB 20 MG (BASE EQUIVALENT)	21533010100320	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 40 MG (BASE EQUIVALENT)	21533010100330	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 60 MG (BASE EQUIVALENT)	21533010100340	Brand

Approval Criteria

1 - Diagnosis of renal cell carcinoma (RCC)

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Cabometyx	
Diagnosis	Hepatocellular Carcinoma (HCC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CABOMETYX	CABOZANTINIB S-MALATE TAB 20 MG (BASE EQUIVALENT)	21533010100320	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 40 MG (BASE EQUIVALENT)	21533010100330	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 60 MG (BASE EQUIVALENT)	21533010100340	Brand

Approval Criteria

1 - Diagnosis of hepatocellular carcinoma (HCC)

AND

2 - Trial and failure, contraindication, or intolerance to Nexavar (sorafenib tosylate)*

Notes	*Criterion is part of the FDA-approved label. If patient meets criteria a bove, please approve at GPI-12.

Product Name:Cabometyx	
Diagnosis	Differentiated Thyroid Cancer (DTC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CABOMETYX	CABOZANTINIB S-MALATE TAB 20 MG (BASE EQUIVALENT)	21533010100320	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 40 MG (BASE EQUIVALENT)	21533010100330	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 60 MG (BASE EQUIVALENT)	21533010100340	Brand

Approval Criteria

1 - Diagnosis of differentiated thyroid cancer (DTC) [A, 5]

AND

2 - Patient is 12 years of age or older

AND

3 - Disease has progressed following prior VEGFR-targeted therapy (e.g., Lenvima [lenvatinib], Nexavar [sorafenib])*

AND

4 - Disease or patient is refractory to radioactive iodine treatment or ineligible

Notes	*Criterion is part of the FDA-approved label. If patient meets criteria a bove, please approve at GPI-12.

Product Name:Cabometyx	
Diagnosis	All Indications Listed Above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CABOMETYX	CABOZANTINIB S-MALATE TAB 20 MG (BASE EQUIVALENT)	21533010100320	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 40 MG (BASE EQUIVALENT)	21533010100330	Brand
CABOMETYX	CABOZANTINIB S-MALATE TAB 60 MG (BASE EQUIVALENT)	21533010100340	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Notes	If patient meets criteria above, please approve at GPI-12.

3 . Endnotes

A. Differentiated thyroid carcinomas are broadly categorized as papillary thyroid carcinoma (PTC), follicular cancer (FTC), and Hurthle cell carcinoma (HCTC). [3]

Prior Authorization Guideline

Guideline ID	GL-233225
Guideline Name	Cabotegravir Containing Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	3/17/2021
P&T Revision Date:	3/20/2024

1 . Indications

Drug Name: Cabenuva (cabotegravir and rilpivirine) Injection
Treatment of HIV-1 Infection Indicated as a complete regimen for the treatment of HIV-1 infection in adults and adolescents 12 years of age and older and weighing at least 35 kg to replace the current antiretroviral regimen in those who are virologically suppressed (HIV-1 RNA <50 copies/mL) on a stable antiretroviral regimen with no history of treatment failure and with no known or suspected resistance to either cabotegravir or rilpivirine.
Drug Name: Vocabria (cabotegravir) Tablet
Treatment of HIV-1 Infection Indicated in combination with EDURANT (rilpivirine) for short-term treatment of HIV-1 infection in adults and adolescents 12 years of age and older and weighing at least 35kg who are virologically suppressed (HIV-1 RNA less than 50 copies/mL) on a stable antiretroviral regimen with no history of treatment failure and with no known or suspected resistance to either cabotegravir or rilpivirine. Vocabria may be used as: 1) Oral lead-in to assess the tolerability of cabotegravir prior to administration of Cabenuva extended-release injectable suspension for HIV-1 treatment. 2) Oral therapy for patients who will miss

planned injection dosing with Cabenuva for HIV-1 treatment.

HIV-1 Pre-Exposure Prophylaxis Indicated in at-risk adults and adolescents weighing at least 35 kg for short-term pre exposure prophylaxis (PrEP) to reduce the risk of sexually acquired HIV-1 infection. Vocabria may be used as: 1) Oral lead-in to assess the tolerability of cabotegravir prior to administration of Apretude extended-release injectable suspension for HIV-1 PrEP. 2) Oral therapy for patients who will miss planned injection dosing with Apretude for HIV-1 PrEP.

2 . Criteria

Product Name:Vocabria*, Cabenuva*	
Diagnosis	Treatment of HIV-1 Infection
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CABENUVA	CABOTEGRAVIR 400 MG/2ML & RILPIVIRINE 600 MG/2ML IM SUSP ER	1210990225G120	Brand
CABENUVA	CABOTEGRAVIR 600 MG/3ML & RILPIVIRINE 900 MG/3ML IM SUSP ER	1210990225G130	Brand
VOCABRIA	CABOTEGRAVIR SODIUM TAB 30 MG	12103010200320	Brand

Approval Criteria

1 - All of the following:

1.1 Diagnosis of HIV-1 infection

AND

1.2 Patient is 12 years of age or older

AND

1.3 Patient's weight is greater than or equal to 35 kg

AND

1.4 Patient is currently virologically suppressed (HIV-1 RNA less than 50 copies/mL) on a stable, uninterrupted antiretroviral regimen for at least 6 months

AND

1.5 Patient has no history of treatment failure or known/suspected resistance to either cabotegravir or rilpivirine

AND

1.6 Provider attests that patient would benefit from long-acting injectable therapy over standard oral regimens

AND

1.7 Prescribed by or in consultation with a clinician with HIV expertise

OR

2 - For continuation of prior therapy

Notes	*If patient meets criteria above, please approve both Vocabria and Ca benuva at GPI list “CABOTEGRPA”.

Product Name:Vocabria*, Cabenuva*	
Diagnosis	Treatment of HIV-1 Infection
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

CABENUVA	CABOTEGRAVIR 400 MG/2ML & RILPIVIRINE 600 MG/2ML IM SUSP ER	1210990225G120	Brand

VOCABRIA	CABOTEGRAVIR SODIUM TAB 30 MG	12103010200320	Brand

Approval Criteria

1 - All of the following:

1.1 Diagnosis of HIV-1 infection

AND

1.2 Patient is 12 years of age or older

AND

1.3 Patient's weight is greater than or equal to 35 kg

AND

1.4 Patient is currently virologically suppressed (HIV-1 RNA less than 50 copies/mL) on a stable, uninterrupted antiretroviral regimen for at least 6 months

AND

1.5 Patient has no history of treatment failure or known/suspected resistance to either cabotegravir or rilpivirine

AND

1.6 Provider attests that patient would benefit from long-acting injectable therapy over standard oral regimens

AND

1.7 Prescribed by or in consultation with a clinician with HIV expertise

OR

2 - Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 70-day gap in therapy [A]

Notes	*If patient meets criteria above, please approve both Vocabria and Cabenuva at GPI list “CABOTEGRPA”.

Product Name:Vocabria**	
Diagnosis	HIV-1 Pre-Exposure Prophylaxis
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOCABRIA	CABOTEGRAVIR SODIUM TAB 30 MG	12103010200320	Brand

Approval Criteria

1 - Requested drug is being used for pre-exposure prophylaxis (PrEP) to reduce the risk of sexually acquired HIV-1 infection

AND

2 - Patient's weight is greater than or equal to 35 kg

AND

3 - Documentation of both of the following U.S. Food and Drug (FDA)-approved test prior to use of Vocabria:

- Negative HIV-1 antigen/antibody test
- Negative HIV-1 RNA assay

AND

4 - One of the following:

4.1 Trial of, contraindication or intolerance to generic emtricitabine-tenofovir disoproxil fumarate 200/300mg

OR

4.2 Provider attests to both of the following:

- Patient would benefit from long-acting injectable therapy over standard oral regimens
- Patient would be adherent to testing and dosing schedule

Notes	**If patient meets criteria above, please approve Vocabria at GPI list " APRETUDEPA"

Product Name:Vocabria**	
Diagnosis	HIV-1 Pre-Exposure Prophylaxis
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
VOCABRIA	CABOTEGRAVIR SODIUM TAB 30 MG	12103010200320	Brand

Approval Criteria

1 - Requested drug is being used for pre-exposure prophylaxis (PrEP) to reduce the risk of sexually acquired HIV-1 infection

AND

2 - Patient's weight is greater than or equal to 35 kg

AND

3 - Submission of medical records (e.g., chart notes) confirming documentation of both the following U.S. Food and Drug (FDA)-approved test prior to use of Vocabria:

- Negative HIV-1 antigen/antibody test
- Negative HIV-1 RNA assay

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following:

4.1 Trial of, contraindication or intolerance to generic emtricitabine-tenofovir disoproxil fumarate 200/300mg

OR

4.2 Both of the following:

- Patient would benefit from long-acting injectable therapy over standard oral regimens
- Patient would be adherent to testing and dosing schedule

Notes	**If patient meets criteria above, please approve Vocabria at GPI list " APRETUDEPA"

3 . Endnotes

A. Continuation of therapy for Cabenuva and Vocabria in NF criteria will allow for a 70-day gap to account for the 2-month dosing schedule +/- 7 days. [1]

1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228383
Guideline Name	Calquence (acalabrutinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Calquence (acalabrutinib)
Mantle Cell Lymphoma (MCL) Indicated for the treatment of adult patients with mantle cell lymphoma (MCL) who have received at least one prior therapy. This indication is approved under accelerated approval based on overall response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials. **Chronic Lymphocytic Leukemia (CLL) or Small Lymphocytic Lymphoma (SLL)** Indicated for the treatment of adult patients with chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL).

2 . Criteria

Product Name:Calquence

Diagnosis	Mantle Cell Lymphoma (MCL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Prior Authorization Guideline

Guideline ID	GL-228775
Guideline Name	Camzyos (mavacamten) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Camzyos (mavacamten)
Obstructive hypertrophic cardiomyopathy (HCM) Indicated for the treatment of adults with symptomatic New York Heart Association (NYHA) class II-III obstructive hypertrophic cardiomyopathy (HCM) to improve functional capacity and symptoms.

2 . Criteria

Product Name:Camzyos	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAMZYOS	MAVACAMTEN CAP 2.5 MG	40190050000110	Brand
CAMZYOS	MAVACAMTEN CAP 5 MG	40190050000120	Brand
CAMZYOS	MAVACAMTEN CAP 10 MG	40190050000130	Brand
CAMZYOS	MAVACAMTEN CAP 15 MG	40190050000140	Brand

Approval Criteria

1 - Diagnosis of obstructive hypertrophic cardiomyopathy (HCM)

AND

2 - Patient has New York Heart Association (NYHA) Class II or III symptoms (e.g., shortness of breath, chest pain)

AND

3 - Patient has a left ventricular ejection fraction of greater than or equal to 55%

AND

4 - Patient has valsalva left ventricular outflow tract (LVOT) peak gradient greater than or equal to 50 mmHg at rest or with provocation

AND

5 - Trial and failure, contraindication, or intolerance to both of the following at a maximally tolerated dose: [2]

- non-vasodilating beta blocker (e.g., bisoprolol, propranolol)
- calcium channel blocker (e.g., verapamil, diltiazem)

AND

6 - Prescribed by or in consultation with a cardiologist

Product Name:Camzyos	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAMZYOS	MAVACAMTEN CAP 2.5 MG	40190050000110	Brand

CAMZYOS	MAVACAMTEN CAP 15 MG	40190050000140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improved symptom relief)

AND

2 - Submission of medical records (e.g., chart notes) documenting patient has a left ventricular ejection fraction of greater than or equal to 50% [A, B, 1]

AND

3 - Prescribed by or in consultation with a cardiologist

3 . Endnotes

A. Patients may develop heart failure while taking CAMZYOS. Regular LVEF and Valsalva left ventricular outflow tract (LVOT) gradient assessment is required for careful titration to achieve an appropriate target Valsalva LVOT gradient, while maintaining LVEF ≥50% and avoiding heart failure symptoms. [1]
B. If LVEF <50% while taking Camzyos, interrupt treatment. [1]

Prior Authorization Guideline

Guideline ID	GL-228812
Guideline Name	Cannabinoids
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Marinol (dronabinol) capsule, Syndros (dronabinol) oral solution
Chemotherapy-induced nausea and vomiting Indicated in adults for the treatment of nausea and vomiting associated with cancer chemotherapy in patients who have failed to respond adequately to conventional antiemetic treatments. **Anorexia in patients with AIDS** Indicated in adults for the treatment of anorexia associated with weight loss in patients with Acquired Immune Deficiency Syndrome (AIDS)

2 . Criteria

Product Name:Brand Marinol	
Diagnosis	Chemotherapy-induced nausea and vomiting
Approval Length	6 month(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MARINOL	DRONABINOL CAP 2.5 MG	50300030000110	Brand
MARINOL	DRONABINOL CAP 5 MG	50300030000115	Brand
MARINOL	DRONABINOL CAP 10 MG	50300030000120	Brand

Approval Criteria

1 - Diagnosis of chemotherapy-induced nausea and vomiting

AND

2 - Trial and failure, contraindication, or intolerance to formulary generic dronabinol capsules*

AND

3 - Trial and failure, contraindication, or intolerance to a 5HT-3 receptor antagonist (e.g., Anzemet [dolasetron], Kytril [granisetron], or Zofran [ondansetron]) [1]

AND

4 - Trial and failure, contraindication, or intolerance to one of the following: [1, A]

- Ativan (lorazepam)
- Compazine (prochlorperazine)
- Decadron (dexamethasone)
- Haldol (haloperidol)
- Phenergan (promethazine)
- Reglan (metoclopramide)
- Zyprexa (olanzapine)

Notes	*This product may require prior authorization.

Product Name:Generic dronabinol

Diagnosis	Chemotherapy-induced nausea and vomiting
Approval Length	6 month(s)
Guideline Type	Prior Authorization

4 - One of the following:

- Trial and failure or intolerance to formulary generic dronabinol capsules*
- Patient is unable to swallow capsules

Notes	*This product may require prior authorization.

3 . Endnotes

A. Per NCCN, cannabinoids are agents that can be used for breakthrough treatment. Other agents used for breakthrough treatment include: phenothiazines (prochlorperazine, promethazine), prokinetic agents (metoclopramide), antipsychotic agents (haloperidol, olanzapine), corticosteroids (dexamethasone), benzodiazepines (lorazepam), and 5-HT3 receptor antagonists (dolasetron, granisetron, ondansetron). Caprelsa (vandetanib)

Prior Authorization Guideline

Guideline ID	GL-228810
Guideline Name	Caprelsa (vandetanib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Caprelsa (vandetanib)
Medullary Thyroid Cancer (MTC) Indicated for the treatment of symptomatic or progressive MTC in patients with unresectable locally advanced or metastatic disease. Use Caprelsa in patients with indolent, asymptomatic or slowly progressing disease only after careful consideration of the treatment related risks of Caprelsa.

2 . Criteria

Product Name:Caprelsa	
Approval Length	12 Months
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAPRELSA	VANDETANIB TAB 100 MG	21533085000320	Brand
CAPRELSA	VANDETANIB TAB 300 MG	21533085000340	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Metastatic medullary thyroid cancer (MTC)
- Unresectable locally advanced MTC

AND

2 - One of the following:

- Patient has symptomatic disease
- Patient has progressive disease

Product Name:Caprelsa	
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAPRELSA	VANDETANIB TAB 100 MG	21533085000320	Brand
CAPRELSA	VANDETANIB TAB 300 MG	21533085000340	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Carbaglu (carglumic acid)

Prior Authorization Guideline

Guideline ID	GL-228778
Guideline Name	Carbaglu (carglumic acid)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Carbaglu (carglumic acid) tablets for oral suspension
Acute Hyperammonemia due to N-acetylglutamate Synthase (NAGS) Deficiency Indicated in pediatric and adult patients as adjunctive therapy to standard of care for the treatment of acute hyperammonemia due to NAGS deficiency. **Chronic Hyperammonemia due to N-acetylglutamate Synthase (NAGS) Deficiency** Indicated in pediatric and adult patients as maintenance therapy for the treatment of chronic hyperammonemia due to NAGS deficiency. **Acute Hyperammonemia due to Propionic Acidemia (PA) or Methylmalonic Acidemia (MMA)** Indicated in pediatric and adult patients as adjunctive therapy to standard of care for the treatment of acute hyperammonemia due to propionic acidemia (PA) or methylmalonic acidemia (MMA).

2 . Criteria

Product Name:Brand Carbaglu, Generic carglumic acid	
Diagnosis	Acute Hyperammonemia due to N-acetylglutamate Synthase (NAGS) Deficiency
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CARGLUMIC ACID	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Generic
CARBAGLU	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Brand

Approval Criteria

1 - Diagnosis of acute hyperammonemia due to N-acetylglutamate synthase (NAGS) deficiency

AND

2 - Medication will be used as adjunctive therapy to other ammonia lowering therapies (e.g., protein restriction, ammonia scavengers, dialysis)

AND

3 - Prescribed by or in consultation with a specialist focused in the treatment of metabolic disorders

Product Name:Brand Carbaglu, Generic carglumic acid	
Diagnosis	Acute Hyperammonemia due to Propionic Acidemia (PA) or Methylmalonic Acidemia (MMA)
Approval Length	1 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

CARGLUMIC ACID	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Generic
CARBAGLU	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Brand

Approval Criteria

1 - Diagnosis of acute hyperammonemia due to propionic acidemia (PA) or methylmalonic acidemia (MMA)

AND

2 - Medication will be used as adjunctive therapy to other ammonia lowering therapies (e.g. intravenous glucose, insulin, protein restriction, dialysis)

AND

3 - Patient's plasma ammonia level is greater than or equal to 50 micromol/L

AND

4 - Medication will be used for a maximum duration of 7 days

AND

5 - Prescribed by or in consultation with a specialist focused in the treatment of metabolic disorders

Product Name:Brand Carbaglu, Generic carglumic acid	
Diagnosis	Chronic Hyperammonemia due to N-acetylglutamate Synthase (NAGS) Deficiency
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CARGLUMIC ACID	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Generic
CARBAGLU	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Brand

Approval Criteria

1 - Diagnosis of chronic hyperammonemia due to N-acetylglutamate synthase (NAGS) deficiency

AND

2 - NAGS deficiency has been confirmed by genetic/mutational analysis

AND

3 - Medication will be used as maintenance therapy

AND

4 - Prescribed by or in consultation with a specialist focused in the treatment of metabolic disorders

Product Name:Brand Carbaglu, Generic carglumic acid	
Diagnosis	Chronic Hyperammonemia due to N-acetylglutamate Synthase (NAGS) Deficiency
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CARGLUMIC ACID	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Generic

CARBAGLU	CARGLUMIC ACID SOLUBLE TAB 200 MG	30908230007320	Brand

Approval Criteria

1 - Documentation of a positive clinical response to therapy (e.g., plasma ammonia level within the normal range)

Prior Authorization Guideline

Guideline ID	GL-228815
Guideline Name	Cayston (aztreonam for inhalation solution) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cayston (aztreonam for inhalation solution)
Cystic Fibrosis Indicated to improve respiratory symptoms in cystic fibrosis (CF) patients with Pseudomonas aeruginosa. Safety and effectiveness have not been established in pediatric patients below the age of 7 years, patients with FEV1 less than 25% or greater than 75% predicted, or patients colonized with Burkholderia cepacia. To reduce the development of drug-resistant bacteria and maintain the effectiveness of Cayston and other antibacterial drugs, Cayston should be used only to treat patients with CF known to have Pseudomonas aeruginosa in the lungs.

2 . Criteria

Product Name:Cayston	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAYSTON	AZTREONAM LYSINE FOR INHAL SOLN 75 MG (BASE EQUIVALENT)	16140010402120	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis

AND

2 - Patient has evidence of Pseudomonas aeruginosa in the lungs

AND

3 - Patient is seven years of age or older

AND

4 - Trial and failure, contraindication, or intolerance to TWO of the following:

- Bethkis* (tobramycin [300 mg/4 ml] inhalation solution)
- TOBI* (tobramycin [300 mg/5 ml] inhalation solution)
- Tobi Podhaler (tobramycin capsule)

Notes	*NOTE: Step Therapy (ST) requirements may apply for brand Bethkis and brand TOBI

Product Name:Cayston	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAYSTON	AZTREONAM LYSINE FOR INHAL SOLN 75 MG (BASE EQUIVALENT)	16140010402120	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis

AND

2 - Patient has evidence of Pseudomonas aeruginosa in the lungs

AND

3 - Patient is benefiting from treatment (i.e., improvement in lung function [forced expiratory volume in one second {FEV1}], decreased number of pulmonary exacerbations)

Product Name:Cayston	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
CAYSTON	AZTREONAM LYSINE FOR INHAL SOLN 75 MG (BASE EQUIVALENT)	16140010402120	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of cystic fibrosis

AND

2 - Submission of medical records (e.g., chart notes) confirming patient has evidence of Pseudomonas aeruginosa in the lungs

AND

3 - Patient is seven years of age or older

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to TWO of the following:

- generic tobramycin [300 mg/4 ml] inhalation solution
- generic tobramycin [300 mg/5 ml] inhalation solution
- Tobi Podhaler (tobramycin capsule)

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228385
Guideline Name	Cequa (cyclosporine 0.09%)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cequa (cyclosporine 0.09%) ophthalmic solution
Keratoconjunctivitis sicca Indicated to increase tear production in patients with keratoconjunctivitis sicca (dry eye).

2 . Criteria

Product Name:Cequa	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CEQUA	CYCLOSPORINE (OPHTH) SOLN 0.09% (PF)	86720020002040	Brand

Approval Criteria

1 - Diagnosis of keratoconjunctivitis sicca (dry eye)

Product Name:Cequa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CEQUA	CYCLOSPORINE (OPHTH) SOLN 0.09% (PF)	86720020002040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increased tear production or improvement in dry eye symptoms).

3 . Endnotes

A. As disease severity increases, aqueous enhancement of the eye using topical agents is appropriate (i.e., emulsions, gels, and ointments can be used). Anti-inflammatory therapies (topical cyclosporine and corticosteroids), systemic omega-3 fatty acid supplements, punctual plugs and spectacle side shields/moisture chambers may also be considered in addition to aqueous enhancement therapies in patients who need additional symptom management. [2]

Prior Authorization Guideline

Guideline ID	GL-228816
Guideline Name	CGRP Inhibitors - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Aimovig (erenumab-aooe), Ajovy (fremanezumab-vfrm), Vyepti (eptinezumab-jjmr); Qulipta (atogepant)
Preventive Treatment of Migraine Indicated for the preventive treatment of migraine in adults.
Drug Name: Emgality (galcanezumab-gnlm)
Preventive Treatment of Migraine Indicated for the preventive treatment of migraine in adults. **Episodic Cluster Headache** Indicated for the treatment of episodic cluster headache in adults.
Drug Name: Nurtec ODT (rimegepant)
Acute Treatment of Migraine Indicated for the acute treatment of migraine with or without aura in adults.

Preventive Treatment of Episodic Migraine Indicated for the preventive treatment of episodic migraine in adults.
Drug Name: Ubrelvy (ubrogepant), Zavzpret (zavegepant)
Acute Treatment of Migraine Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: Ubrelvy AND Zavzpret are not indicated for the preventive treatment of migraine.

2 . Criteria

Product Name:Aimovig or Ajovy	
Diagnosis	Preventive Treatment of Migraine
Approval Length	6 Months [E]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
AIMOVIG	ERENUMAB-AOOE SUBCUTANEOUS SOLN AUTO-INJECTOR 70 MG/ML	6770202010D520	Brand

AJOVY	FREMANEZUMAB-VFRM SUBCUTANEOUS SOLN AUTO-INJ 225 MG/1.5ML	6770203020D520	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Diagnosis of episodic migraines

AND

1.1.2 Patient has greater than or equal to 4 migraine days per month [A, B, C]

OR

1.2 All of the following:

1.2.1 Diagnosis of chronic migraines

AND

1.2.2 Patient has greater than or equal to 8 migraine days per month [A]

AND

1.2.3 Medication overuse headache has been considered and potentially offending medication(s) have been discontinued [H]

AND

2 - Patient is 18 years of age or older [I]

AND

3 - History of failure (after at least a two month trial), contraindication or intolerance to TWO of the following preventive treatments for migraine from different mechanisms of action [D, E, F, G, 10]:

- Elavil [amitriptyline] or Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, or metoprolol
- Candesartan
- Lisinopril

AND

4 - Medication will not be used in combination with another CGRP inhibitor for the PREVENTIVE treatment of migraines

Product Name:Aimovig or Ajovy	
Diagnosis	Preventive Treatment of Migraine
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

2 - Patient is 18 years of age or older [I]

AND

3 - History of failure (after at least a two month trial), contraindication, or intolerance to TWO of the following preventive treatments for migraine from different mechanisms of action [D, E, F, G, 10]:

- Elavil [amitriptyline] or Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, or metoprolol
- Candesartan
- Lisinopril

AND

4 - Trial and failure, contraindication, or intolerance to BOTH of the following:

- Aimovig
- Ajovy

AND

5 - Medication will not be used in combination with another CGRP inhibitor for the PREVENTIVE treatment of migraines

Notes	*QL Override for Emgality (For new starts only): For migraine, please enter 2 PAs with the same start date as follows: First PA: Approve two pens or syringes per 30 days for 1 month with a fill count of 2 (Loading dose has a MDD of 0.067); Second PA: Approve one pen or syringe per 30 days (no overrides needed) for 6 months. (Emgality 120 mg/mL is hard-coded with a quantity of one prefilled pen/syringe per 30 days)

Product Name:Emgality 120 mg/mL	
Diagnosis	Preventive Treatment of Migraine
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EMGALITY	GALCANEZUMAB-GNLM SUBCUTANEOUS SOLN AUTO-INJECTOR 120 MG/ML	6770203530D520	Brand
EMGALITY	GALCANEZUMAB-GNLM SUBCUTANEOUS SOLN PREFILLED SYR 120 MG/ML	6770203530E520	Brand

Approval Criteria

1 - Patient has experienced a positive response to therapy (e.g., a reduction in headache frequency and/or intensity, a reduction in the number of workdays missed due to migraines)

AND

2 - Use of acute migraine medications [e.g., nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen), triptans (e.g., eletriptan, rizatriptan, sumatriptan)] has decreased since the start of CGRP therapy

AND

3 - For Chronic Migraine only: Patient continues to be monitored for medication overuse headache (MOH) [H]

AND

4 - Medication will not be used in combination with another CGRP inhibitor for the PREVENTIVE treatment of migraines

AND

5 - Trial and failure, contraindication, or intolerance to BOTH of the following:

- Aimovig
- Ajovy

Product Name:Emgality 120 mg/mL	
Diagnosis	Preventive Treatment of Migraine
Approval Length	6 months [E]
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
EMGALITY	GALCANEZUMAB-GNLM SUBCUTANEOUS SOLN AUTO-INJECTOR 120 MG/ML	6770203530D520	Brand
EMGALITY	GALCANEZUMAB-GNLM SUBCUTANEOUS SOLN PREFILLED SYR 120 MG/ML	6770203530E520	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Submission of medical records (e.g., chart notes) confirming a diagnosis of episodic migraines

AND

1.1.2 Submission of medical records (e.g., chart notes) confirming the patient has greater than or equal to 4 migraine days per month [A, B, C]

OR

1.2 All of the following:

1.2.1 Submission of medical records (e.g., chart notes) confirming a diagnosis of chronic migraines

AND

1.2.2 Submission of medical records (e.g., chart notes) confirming the patient has greater than or equal to 8 migraine days per month [A]

AND

1.2.3 Medication overuse headache has been considered and potentially offending medication(s) have been discontinued [H]

AND

2 - Patient is 18 years of age or older [I]

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming history of failure (after at least a two month trial), contraindication, or intolerance to TWO of the following preventive treatments for migraine from different mechanisms of action [D, E, F, G, 10]:

- Elavil [amitriptyline] or Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, or metoprolol
- Candesartan
- Lisinopril

AND

4 - Both of the following:

4.1 Submission of medical records (e.g., chart notes) confirming a history of failure after at least a 12 week trial to BOTH of the following (unless there is a contraindication or intolerance):

- Aimovig
- Ajovy

AND

4.2 Submission of medical records (e.g., chart notes) confirming a history of failure after at least an 8 week trial to ONE of the following (unless there is a contraindication or intolerance):

- Nurtec
- Qulipta

AND

5 - Medication will not be used in combination with another CGRP inhibitor for the PREVENTIVE treatment of migraines

OR

5.2 Patient has a history of failure (after at least a two month trial), contraindication, or intolerance to THREE preventative treatments for migraine from the following:

- Elavil [amitriptyline] or Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, or metoprolol
- Candesartan
- Lisinopril

AND

6 - Medication will not be used in combination with another CGRP inhibitor for the ACUTE treatment of migraines

Product Name:Zavzpret	
Diagnosis	Acute Treatment of Migraine
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZAVZPRET	ZAVEGEPANT HCL NASAL SPRAY 10 MG/ACT	67701090202020	Brand

Approval Criteria

1 - Diagnosis of migraine with or without aura

AND

2 - Will be used for the acute treatment of migraine

AND

3 - Patient is 18 years of age or older [I]

AND

4 - One of the following: [24]

- Trial and failure or intolerance to two triptans (e.g., eletriptan, rizatriptan, sumatriptan)
- Contraindication to all triptans

AND

5 - If patient has 4 or more headache days per month, one of the following: [D, 24]

5.1 Patient must be currently treated with ONE preventive treatment for migraine from the following:

- Elavil [amitriptyline]
- Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium]
- Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, or metoprolol
- Candesartan

- Lisinopril

OR

5.2 Patient has a history of failure (after at least a two month trial), contraindication, or intolerance to ONE preventative treatment for migraine from the following:

- Elavil [amitriptyline] or Effexor [venlafaxine]
- Depakote/Depakote ER [divalproex sodium] or Topamax [topiramate]
- Atenolol, propranolol, nadolol, timolol, or metoprolol
- Candesartan
- Lisinopril

AND

6 - Medication will not be used in combination with another CGRP inhibitor for the ACUTE treatment of migraines

Product Name:Zavzpret	
Diagnosis	Acute Treatment of Migraine
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZAVZPRET	ZAVEGEPANT HCL NASAL SPRAY 10 MG/ACT	67701090202020	Brand

Approval Criteria

1 - Patient has experienced a positive response to therapy (e.g., reduction in pain, photophobia, phonophobia, nausea)

AND

2 - Will not be used for preventive treatment of migraine

AND

3 - Medication will not be used in combination with another CGRP inhibitor for the ACUTE treatment of migraines

3 . Endnotes

A. The International Classification of Headache Disorders, 3rd addition (beta version) distinguishes chronic and episodic migraine [11]. Chronic migraine is described as headache occurring on 15 or more days per month for more than 3 months, which has the features of migraine headache on at least 8 days per month. Episodic migraine is not clearly defined, but is applied when a patient is diagnosed with migraine but does not meet criteria for chronic migraine.
B. While every patient with chronic migraine should receive preventive therapy, not every patient with episodic migraine needs prevention [12]. Appropriate candidates for preventative treatment include those with at least 4 days per month of headache-related disability.
C. The phase 3 inclusion criteria for the erenumab (LIBERTY, STRIVE, ARISE) and galcanezumab (EVOLVE-1, EVOLVE-2) pivotal trials in episodic migraine required that patients had 4 to 14 migraine days per month [3-9]. The LEADER trial evaluated patients who had failed two to four prior preventive migraine treatments (PMTs). At the start of the trial, 38.6%, 37.8%, and 22.8% of patients had failed two, three, and four prior PMTs, respectively [2].
D. The American Academy of Neurology supports the use of the following medications for the prevention of episodic migraine in adult patients (with level A or B evidence): antidepressants [i.e., Elavil (amitriptyline), Effexor (venlafaxine)], antiepileptics [i.e., Depakote/Depakote ER (divalproex sodium), Topamax (topiramate)], beta-blockers [i.e., atenolol, propranolol, nadolol, timolol, metoprolol], and candesartan [16, 24].
E. The US Headache Consortium Consensus (Table e-1) recommends that therapy be initiated with medications that have the highest level of evidence-based therapy while also taking into account patient specific comorbidities [15]. Each medication should be given an adequate trial, it may take two to three months to achieve clinical benefit, and six months to achieve maximal benefit.
F. The OptumRx clinical team consulted with a neurologist on the prospective review of the CGPR Inhibitors [14]. He confirmed that preventative treatment for chronic migraine and episodic migraine are similar. The choice of preventative medication will not vary much between the episodic vs chronic subtypes. The choice of agent will largely depend more on patient specific factors. Also, he felt that this agent will most likely fall into a similar place in therapy as Botox (onabotulinumtoxin A).
G. The National Institute for Health and Care Excellence guidelines for the management of migraine recommend Botox (onabotulinumtoxin A) as an option in chronic migraine after failure of at least three other prophylactic medications and that the patient is being managed for medication overuse [13].

H. Medication overuse headache (MOH) is defined as headache occurring greater than or equal to 15 days per month. It develops as a consequence of regular overuse of acute or symptomatic headache medication for more than 3 months [11]. Current evidence suggests the best treatment strategy is withdrawal of the offending medication.
I. The safety and effectiveness in pediatric patients has not been established [1, 17-19, 20, 22, 29].
J. Headache specialists are physicians certified by the United Council for Neurologic Subspecialties (UCNS). [25]

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228388
Guideline Name	Chenodal (chenodiol)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Chenodal (chenodiol)
Radiolucent Gallstones Indicated for patients with radiolucent stones in well-opacifying gallbladders, in whom selective surgery would be undertaken except for the presence of increased surgical risk due to systemic disease or age. The likelihood of successful dissolution is far greater if the stones are floatable or small. For patients with nonfloatable stones, dissolution is less likely and added weight should be given to the risk that more emergent surgery might result from a delay due to unsuccessful treatment. Safety of use beyond 24 months is not established. Chenodiol will not dissolve calcified (radiopaque) or radiolucent bile pigment stones.

2 . Criteria

Product Name:Chenodal

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CHENODAL	CHENODIOL TAB 250 MG	52100010000305	Brand

Approval Criteria

1 - Diagnosis of radiolucent gallstones

AND

2 - Patient has a well-opacifying gallbladder visualized by oral cholecystography

AND

3 - Trial and failure, contraindication or intolerance to ursodiol

AND

4 - Patient is not a candidate for surgery

AND

5 - Stones are not calcified (radiopaque) or radiolucent bile pigment stones

AND

6 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- A provider who has specialized expertise in the management of gallstones

Product Name:Chenodal	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CHENODAL	CHENODIOL TAB 250 MG	52100010000305	Brand

Approval Criteria

1 - Patient's disease status has been re-evaluated since the last authorization to confirm the patient's condition warrants continued treatment as evidenced by oral cholecystograms or ultrasonograms

AND

2 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- A provider who has specialized expertise in the management of gallstones

Prior Authorization Guideline

Guideline ID	GL-228817
Guideline Name	Cholbam (cholic acid)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cholbam (cholic acid)
Bile acid synthesis disorders due to single enzyme defects (SEDs) Indicated for the treatment of bile acid synthesis disorders due to single enzyme defects (SEDs). Limitation of use: The safety and effectiveness of Cholbam on extrahepatic manifestations of bile acid synthesis disorders due to SEDs or PDs including Zellweger spectrum disorders have not been established. **Peroxisomal disorders including Zellweger spectrum disorders** Indicated for adjunctive treatment of peroxisomal disorders (PDs) including Zellweger spectrum disorders in patients who exhibit manifestations of liver disease, steatorrhea or complications from decreased fat-soluble vitamin absorption. Limitation of use: The safety and effectiveness of Cholbam on extrahepatic manifestations of bile acid synthesis disorders due to SEDs or PDs including Zellweger spectrum disorders have not been established.

2 . Criteria

Product Name:Cholbam	
Diagnosis	Bile acid synthesis disorders
Approval Length	4 Months [F]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CHOLBAM	CHOLIC ACID CAP 50 MG	52700025000120	Brand
CHOLBAM	CHOLIC ACID CAP 250 MG	52700025000140	Brand

Approval Criteria

1 - Diagnosis of a bile acid synthesis disorder due to a single enzyme defect based on one of the following: [1-6,8,A,B]

- An abnormal urinary bile acid analysis by mass spectrometry
- Molecular genetic testing consistent with the diagnosis

AND

2 - Prescribed by one of the following: [2,7,E]

- Hepatologist
- Medical geneticist
- Pediatric gastroenterologist
- Other specialist that treats inborn errors of metabolism

Product Name:Cholbam	
Diagnosis	Peroxisomal disorders
Approval Length	4 Months [F]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CHOLBAM	CHOLIC ACID CAP 50 MG	52700025000120	Brand
CHOLBAM	CHOLIC ACID CAP 250 MG	52700025000140	Brand

Approval Criteria

1 - Diagnosis of a peroxisomal disorder based on one of the following: [2-5,8,C,D]

- An abnormal urinary bile acid analysis by mass spectrometry
- Molecular genetic testing consistent with the diagnosis

AND

2 - Patient exhibits manifestations of at least one of the following: [2-3]

- Liver disease (e.g., jaundice, elevated serum transaminases)
- Steatorrhea
- Complications from decreased fat-soluble vitamin absorption (e.g., poor growth)

AND

3 - Prescribed by one of the following: [2,7,E]

- Hepatologist
- Medical geneticist
- Pediatric gastroenterologist
- Other specialist that treats inborn errors of metabolism

AND

4 - Used as adjunctive treatment [2-3]

Product Name:Cholbam	
Diagnosis	Bile acid synthesis disorders or Peroxisomal disorders
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CHOLBAM	CHOLIC ACID CAP 50 MG	52700025000120	Brand
CHOLBAM	CHOLIC ACID CAP 250 MG	52700025000140	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement in liver function (e.g., aspartate aminotransferase [AST], alanine aminotransferase [ALT])

3 . Endnotes

A. Congenital deficiencies in the enzymes responsible for catalyzing key reactions in the synthesis of primary bile acids cholic acid and chenodeoxycholic acid are referred to as bile acid synthesis disorders (BASDs) due to single enzyme defects (SEDs). [1] 3 beta-hydroxy-D5-C27-steroid oxidoreductase deficiency (3 beta-HSD) and D4-3-oxosteroid 5 beta-reductase deficiency (AKR1D1 or D4-3-oxo-R), inherited by an autosomal recessive mode, are the most frequent inborn errors of primary bile acid synthesis causing early cirrhosis and liver failure. [6] See Background Table 1 for a list of known bile acid synthesis disorders (BASDs) due to single enzyme defects (SEDs). [1]
B. 2- (or alpha-) methylacyl-CoA racemase (AMACR) deficiency is a deficiency of a single peroxisomal enzyme that may manifest secondary abnormalities of bile acid synthesis; it may thus technically be considered a BASD, as well as, a peroxisomal disorder (PD). [2-5]
C. The spectrum of diseases referred to as peroxisomal disorders (PDs) involve defects in later steps of the bile acid synthetic pathway, such as impaired side-chain oxidation; [3] PDs are therefore classified as either disorders of peroxisome biogenesis (eg, Zellweger syndrome) or deficiencies of a single peroxisomal enzyme (eg, 2- (or alpha-)methylacyl-CoA racemase [AMACR] deficiency). [3] See Background Table 2 for a list of known PDs. [5]
D. Zellweger syndrome, infantile Refsum disease, neonatal adrenoleukodystrophy and rhizomelic chondrodysplasia punctata type 1 (RCDP1) are examples of defective biogenesis in which peroxisomes are absent. [4-5] The first 3 disorders are thought to represent a clinical continuum, referred to as Zellweger spectrum disorders (ZSD), with Zellweger syndrome the most severe, infantile Refsum disease the mildest, and neonatal adrenoleukodystrophy intermediate in severity. [5]
E. As per the prescribing information [2], treatment with Cholbam should be initiated and monitored by an experienced hepatologist or pediatric gastroenterologist. At the University of California, San Francisco, medical geneticists see patients with PDs, while specialists in pediatric gastroenterology see patients with BASDs. [7]

F. Cholbam should be discontinued if liver function does not improve within 3 months of starting treatment. [2] An additional month is added to the initial authorization duration to allow for patient follow-up with the provider.

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233229
Guideline Name	Cimzia (certolizumab pegol)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	5/20/2008
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Cimzia (certolizumab pegol)
Rheumatoid Arthritis (RA) Indicated for the treatment of adults with moderately to severely active rheumatoid arthritis. **Polyarticular Juvenile Idiopathic Arthritis (PJIA)** Indicated for the treatment of active polyarticular juvenile idiopathic arthritis (PJIA) in patients 2 years of age and older. **Psoriatic Arthritis (PsA)** Indicated for the treatment of adult patients with active psoriatic arthritis (PsA). **Plaque Psoriasis (PsO)** Indicated for the treatment of adults with moderate-to-severe plaque psoriasis (PsO) who are candidates for systemic therapy or phototherapy. **Ankylosing Spondylitis (AS)** Indicated for the treatment of adults with active ankylosing spondylitis.

Non-radiographic Axial Spondyloarthritis (nr-axSpA) Indicated for the treatment of adults with active non-radiographic axial spondyloarthritis (nr-axSpA) with objective signs of inflammation.

Crohn's Disease (CD) Indicated for reducing signs and symptoms of Crohn's disease (CD) and maintaining clinical response in adult patients with moderately to severely active disease who have had an inadequate response to conventional therapy.

2 . Criteria

Product Name:Cimzia	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	5250502010F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	5250502010F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis (RA)

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

- methotrexate
- leflunomide
- sulfasalazine

Product Name:Cimzia	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Cimzia	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand

CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Cimzia	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis (PsA)

AND

2 - One of the following [5]:

- actively inflamed joints

- dactylitis
- enthesitis
- axial disease
- active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

- Dermatologist
- Rheumatologist

Product Name:Cimzia	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020106420	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020106420	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 5]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline
- Reduction in the body surface area (BSA) involvement from baseline

Product Name:Cimzia

Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis (PsO)

AND

2 - One of the following [6]:

- Greater than or equal to 3% body surface area involvment
- Severe scalp psoriasis
- Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [7]:

- corticosteroids (e.g., betamethasone, clobetasol)
- vitamin D analogs (e.g., calcitriol, calcipotriene)
- tazarotene
- calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Cimzia	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following [1, 6]:

- Reduction in the body surface area (BSA) involvement from baseline
- Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Cimzia	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand

CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis (AS)

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen) at maximally tolerated doses [8]

Product Name:Cimzia	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 8]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Function
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Product Name:Cimzia	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	5250502010F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	5250502010F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Diagnosis of active non-radiographic axial spondyloarthritis (nr-axSpA)

AND

2 - Patient has objective signs of inflammation (e.g., C-reactive protein [CRP] levels above the upper limit of normal and/or sacroiliitis on magnetic resonance imaging [MRI], indicative of inflammatory disease, but without definitive radiographic evidence of structural damage on sacroiliac joints.) [1, 8]

AND

3 - Prescribed by or in consultation with a rheumatologist

AND

4 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [8]

Product Name:Cimzia	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	52505020 10F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	52505020 10F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 8]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Function
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Product Name:Cimzia	
Diagnosis	Crohn’s disease (CD)
Approval Length	16 Weeks [A]

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	5250502010F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	5250502010F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease (CD)

AND

2 - One of the following [9, 10]:

- Frequent diarrhea and abdominal pain
- At least 10% weight loss
- Complications such as obstruction, fever, abdominal mass
- Abnormal lab values (e.g., C-reactive protein [CRP])
- CD Activity Index (CDAI) greater than 220

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [9, 10]:

- 6-mercaptopurine
- Azathioprine
- Corticosteroids (e.g., prednisone)
- Methotrexate

AND

4 - Prescribed by or in consultation with a gastroenterologist

Product Name:Cimzia	
Diagnosis	Crohn’s disease (CD)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIMZIA	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 2 X 200 MG/ML	5250502010F840	Brand
CIMZIA STARTER KIT	CERTOLIZUMAB PEGOL PREFILLED SYRINGE KIT 6 X 200 MG/ML	5250502010F840	Brand
CIMZIA	CERTOLIZUMAB PEGOL FOR INJ KIT 2 X 200 MG	52505020106420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 9, 10]:

- Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline
- Reversal of high fecal output state

3 . Endnotes

A. The recommended initial adult dose of Cimzia is 400 mg (given as two subcutaneous injections of 200 mg) initially, and at Weeks 2 and 4. In patients who obtain a clinical response, the recommended maintenance regimen is 400 mg every four weeks.

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228780
Guideline Name	Cinqair (reslizumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cinqair (reslizumab)
Severe Eosinophilic Asthma Indicated for the add-on maintenance treatment of patients with severe asthma aged 18 years and older with an eosinophilic phenotype. Limitation of Use: Cinqair is not indicated for treatment of other eosinophilic conditions; Cinqair is not indicated for the relief of acute bronchospasm or status asthmaticus.

2 . Criteria

Product Name:Cinqair	
Approval Length	6 Months [H]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CINQAIR	RESLIZUMAB IV INFUSION SOLN 100 MG/10ML (10 MG/ML)	44604460002020	Brand

Approval Criteria

1 - Diagnosis of severe asthma [1]

AND

2 - Asthma is an eosinophilic phenotype as defined by a baseline (pre-treatment) peripheral blood eosinophil level greater than or equal to 150 cells per microliter [1, B, D]

AND

3 - One of the following:

3.1 Patient has had at least two or more asthma exacerbations requiring systemic corticosteroids (e.g., prednisone) within the past 12 months [A]

OR

3.2 Prior asthma-related hospitalization within the past 12 months [D]

AND

5 - Age greater than or equal to 18 years

AND

4 - Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.1 Both of the following [C, E, F]:

- High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg])

AND

6 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/immunologist

Product Name:Cinqair	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CINQAIR	RESLIZUMAB IV INFUSION SOLN 100 MG/10ML (10 MG/ML)	44604460002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in exacerbations, improvement in forced expiratory volume in 1 second [FEV1], decreased use of rescue medications)

AND

2 - Patient continues to be treated with an inhaled corticosteroid (ICS) (e.g., fluticasone, budesonide) with or without additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium]) unless there is a contraindication or intolerance to these medications

AND

3 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

3 . Background

Clinical Practice Guidelines

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 1. Low, medium and high daily doses of inhaled corticosteroids in adolescents and adults 12 years and older [6]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	200-500	> 500-1000	> 1000
Beclometasone dipropionate (DPI or pMDI, extrafine particle*, HFA)	100-200	> 200-400	> 400
Budesonide (DPI, or pMDI, standard particle, HFA)	200-400	> 400-800	> 800
Ciclesonide (pMDI, extrafine particle*, HFA)	80-160	> 160-320	> 320

Fluticasone furoate (DPI)	100		200
Fluticasone propionate (DPI)	100-250	> 250-500	> 500
Fluticasone propionate (pMDI, standard particle, HFA)	100-250	> 250-500	> 500
Mometasone furoate (DPI)	Depends on DPI device – see product information		
Mometasone furoate (pMDI, standard particle, HFA)	200-400		> 400

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

4 . Endnotes

A. In two duplicate 52-week Phase III studies, eligible patients were required to have experienced at least one asthma exacerbation that required a systemic corticosteroid for at least 3 days within the past 12 months. [2, 3]
B. The Institute for Clinical and Economic Review (ICER) defines eosinophilic inflammation as a blood eosinophil level greater than or equal to 150 cells per microliter at initiation of therapy. This is the lowest measured threshold for eosinophilic asthma in pivotal trials. [8]
C. The ERS/ATS guidelines define severe asthma as that which requires treatment with high-dose ICSs plus a second controller (or systemic corticosteroids [CSs]) to prevent progression to uncontrolled disease status or continuing uncontrolled disease status despite this therapy. [4]
D. Recommended per national P&T committee meeting, December 2015, regarding similar agent first-in-class IL-5 antagonist Nucala (mepolizumab) in the use of severe eosinophilic asthma.

E. In the pivotal study for Nucala (mepolizumab), another IL-5 antagonist indicated for severe eosinophilic asthma, patients met the inclusion criteria with a well-documented requirement for regular treatment with high dose ICS (i.e., greater than or equal to 880 mcg/day fluticasone propionate or equivalent daily), with or without maintenance oral corticosteroids, in the 12 months prior to Visit 1. [5]
F. The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention update lists anti-interleukin- 5 treatment or anti-interleukin 5 receptor treatment as an add on option for patients with severe eosinophilic asthma that is uncontrolled on two or more controllers plus as-needed reliever medication (Step 4-5 treatment). [6]
G. Asthma treatment can often be reduced, once good asthma control has been achieved and maintained for three months and lung function has hit a plateau. However the approach to stepping down will depend on patient specific factors (e.g., current medications, risk factors). At this time evidence for optimal timing, sequence and magnitude of treatment reductions is limited. It is feasible and safe for most patients to reduce the ICS dose by 25-50% at three month intervals, but complete cessation of ICS is associated with a significant risk of exacerbations [6].
H. The GINA Global Strategy for Asthma Management and Prevention update recommends that patients with asthma should be reviewed regularly to monitor their symptom control, risk factors and occurrence of exacerbations, as well as to document the response to any treatment changes. Ideally, response to Type 2-targeted therapy should be re-evaluated every 3-6 months, including re-evaluation of the need for ongoing biologic therapy for patients with good response to Type 2 targeted therapy. [6]

Prior Authorization Guideline

Guideline ID	GL-228390
Guideline Name	Ciprofloxacin-Containing Otic Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cetraxal (ciprofloxacin otic solution)
Acute Otitis Externa Indicated for the treatment of acute otitis externa due to susceptible isolates of Pseudomonas aeruginosa or Staphylococcus aureus.
Drug Name: Ciprodex (ciprofloxacin and dexamethasone otic suspension)
Acute Otitis Media Indicated in pediatric patients (age 6 months and older) with tympanostomy tubes for the treatment of infections caused by susceptible isolates of Staphylococcus aureus, Streptococcus, pneumoniae, Haemophilus influenzae, Moraxella catarrhalis, and Pseudomonas aeruginosa. **Acute Otitis Externa** Indicated in pediatric (age 6 months and older), adult and elderly patients for the treatment of infections caused by susceptible isolates of Staphylococcus aureus and Pseudomonas aeruginosa.

2 . Criteria

Product Name:Brand Cetraxal	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
CETRAXAL	CIPROFLOXACIN HCL OTIC SOLN 0.2% (BASE EQUIVALENT)	87100012102020	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 10-day supply) within the past 180 days, contraindication, or intolerance to generic ofloxacin otic solution

Product Name:Brand Ciprodex	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
CIPRODEX	CIPROFLOXACIN-DEXAMETHASONE OTIC SUSP 0.3-0.1%	87991002361820	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 10-day supply) within the past 180 days, contraindication, or intolerance to generic ofloxacin otic solution

AND

3 - Trial and failure (of a minimum 7-day supply) within the past 180 days, or intolerance to generic ciprofloxacin-dexamethasone otic suspension

Prior Authorization Guideline

Guideline ID	GL-233371
Guideline Name	Clinical Duplicates Program
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	10/21/2021
P&T Revision Date:	2/20/2025

Note:

The purpose of this guideline is to establish policies and procedures on how to handle drugs included on the clinical duplicates list. This guideline will not apply to Non-Formulary reviews, drugs that are benefit exclusions, drugs with step therapy edits, drugs that require quantity limit review only, or drugs that are not reviewed for prior authorization by OptumRx.

1 . Criteria

Product Name:Drugs included on the Clinical Duplicates list for which a Drug-Specific Prior Authorization Guideline is Unavailable*	
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Clinical			
Duplicates			

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.1.3 Requested drug will be used at a dose which is within FDA recommendations

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

2 - One of the following**:

2.1 If the requested drug has a formulary alternative with the same active ingredient, both of the following:

2.1.1 Patient has experienced intolerance (e.g., allergy to excipient) with a formulary alternative that has the same active ingredient

AND

2.1.2 Patient has tried and failed at least 2 additional formulary alternatives within the same therapeutic class. If only 1 formulary alternative within the therapeutic class is available, the patient must have tried the formulary alternative within the therapeutic class AND 1 additional formulary alternative. If there are no formulary alternatives within the same therapeutic class, the patient must have failed 2 formulary alternatives or have a contraindication or intolerance to all formulary alternatives

OR

2.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on formulary, both of the following:

2.2.1 Patient has experienced intolerance (e.g., allergy to excipient) with the individual ingredients in the combination product

AND

2.2.2 Patient has tried and failed at least 2 additional formulary alternatives

OR

2.3 If only over-the-counter (OTC) equivalents^ are available, patient has tried and failed or has contraindications or intolerance to 3 OTC equivalents. If only 1 or only 2 equivalents are available, the patient must have failed or has contraindications or intolerance to all available OTC equivalents [document drug(s), dose, duration of trial]

OR

2.4 If formulary alternatives are available and do not meet above scenarios, patient has tried and failed at least 3 formulary alternatives or has contraindications or intolerance to all formulary alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or has contraindications or intolerance to all available formulary alternatives

OR

2.5 No formulary alternative or OTC equivalent^ is available to treat the patient's condition

AND

3 - Submission of medical records (e.g., chart notes) confirming why the requested drug is expected to provide benefit when the formulary alternative(s) or OTC equivalent(s) has not shown to be effective

Notes	*Drug should be reviewed using the drug-specific Prior Authorization guideline if available. If no drug-specific Prior Authorization guideline is available, proceed with the criteria above. ^OTC equivalents refers to any covered or non-covered OTC equivalent product. **Please consult client-specific resources to determine appropriate generic formulary drugs.

Approval Criteria

1 - Both of the following:

1.1 One of the following:

1.1.1 All of the following:

1.1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.1.1.3 Requested drug will be used at a dose which is within FDA recommendations

OR

1.1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

1.2 One of the following*:

1.2.1 If the requested drug has a formulary alternative with the same active ingredient, both of the following:

1.2.1.1 Patient has experienced intolerance (e.g., allergy to excipient) with a formulary alternative that has the same active ingredient

AND

1.2.1.2 Patient has tried and failed at least 2 additional formulary alternatives within the same therapeutic class. If only 1 formulary alternative within the therapeutic class is available, the patient must have tried the formulary alternative within the therapeutic class AND 1 additional formulary alternative. If there are no formulary alternatives within the same therapeutic class, the patient must have failed 2 formulary alternatives or have a contraindication or intolerance to all formulary alternatives

OR

1.2.2 If the requested drug is a fixed-dose combination product with each individual ingredients available on formulary, both of the following:

1.2.2.1 Patient has experienced intolerance (e.g., allergy to excipient) with the individual ingredients in the combination product

AND

1.2.2.2 Patient has tried and failed at least 2 additional formulary alternatives

OR **1.2.3** If formulary alternatives are available and do not meet above scenarios, patient has tried and failed at least 3 formulary alternatives or has contraindications or intolerance to all formulary alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or has contraindications or intolerance to all available formulary alternatives **OR** **1.2.4** No formulary alternative is available to treat the patient's condition **OR** **1.2.5** For continuation of prior therapy	
Notes	*Please consult client-specific resources to determine appropriate generic formulary drugs.

2 . Revision History

Date	Notes
3/6/2025	Quartz Comm/EHB copied to mirrow to OptumRx

Prior Authorization Guideline

Guideline ID	GL-233294
Guideline Name	Cobenfy (xanomeline and trospium chloride)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/21/2024
P&T Revision Date:	

1 . Indications

Drug Name: Cobenfy (xanomeline and trospium chloride)
Schizophrenia Indicated for the treatment of adults with schizophrenia.

2 . Criteria

Product Name:Cobenfy	
Approval Length	12 Months [A,2]
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
COBENFY STARTER PACK	XANOMELINE-TROSPIUM CHLORIDE CAP PACK 50-20 MG & 100-20 MG	5919990280B220	Brand
COBENFY	XANOMELINE TARTRATE-TROSPIUM CHLORIDE CAP 50-20 MG	59199902800120	Brand
COBENFY	XANOMELINE TARTRATE-TROSPIUM CHLORIDE CAP 100-20 MG	59199902800130	Brand
COBENFY	XANOMELINE TARTRATE-TROSPIUM CHLORIDE CAP 125-30 MG	59199902800135	Brand

Approval Criteria

1 - Both of the following:

1.1 Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

1.2 Trial and failure (of a minimum 30 day supply), contraindication, or intolerance to two of the following [B,C,1-3]:

- aripiprazole
- asenapine
- clozapine
- olanzapine
- paliperidone
- quetiapine IR/ER
- risperidone
- ziprasidone

OR

2 - For continuation of prior therapy [A,D,2]

3 . Endnotes

A. There is insufficient evidence to recommend for or against any specific duration for treatment with an antipsychotic after response or remission of psychosis [2].
B. Antipsychotics are recommended in acute episodes of schizophrenia or first-episode psychosis who have previously responded to antipsychotics. Medication choice is individualized to patient characteristics and medication side effect profiles [2].
C. Patients experiencing an acute exacerbation or relapse of psychotic symptoms with diagnosed schizophrenia could be eligible for inclusion in the pivotal EMERGENT-3 phase 3 trial if they had previously tried other agents, including oral antipsychotics and lithium therapy [1,3].
D. The continued use of an antipsychotic medication for maintenance treatment of schizophrenia to prevent relapse and hospitalization is recommended in patients who have responded to treatment [2].

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228820
Guideline Name	Colony-Stimulating Factors (CSFs) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fulphila (pegfilgrastim-jmdb, G-CSF), Fylnetra (pegfilgrastim-pbbk), Nyvepria (pegfilgrastim-apgf, G-CSF), Stimufend (pegfilgrastim-fpgk), Ziextenzo (pegfilgrastim-bmez, G-CSF)
Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by febrile neutropenia, in patients with non-myeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia. Limitations of Use: Pegfilgrastim is not indicated for the mobilization of peripheral blood progenitor cells for hematopoietic stem cell transplantation. **Off Label Uses: Hematopoietic Subsyndrome of Acute Radiation Syndrome** To increase survival in patients acutely exposed to myelosuppressive doses of radiation. [1, 33, 35, M] **Treatment of High-Risk Febrile Neutropenia (FN)** For the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34, 35]
Drug Name: Granix (tbo-filgrastim, G-CSF)

Febrile Neutropenia (FN), Prophylaxis Indicated to reduce the duration of severe neutropenia in adult and pediatric patients 1 month and older with nonmyeloid malignancies receiving myelosuppressive anticancer drugs associated with a clinically significant incidence of febrile neutropenia.

Off Label Uses: Treatment of High-Risk Febrile Neutropenia (FN) Has been prescribed for the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34]

Hematopoietic Subsyndrome of Acute Radiation Syndrome To increase survival in patients acutely exposed to myelosuppressive doses of radiation. [16]

Drug Name: Leukine (sargramostim, GM-CSF)

Acute Myeloid Leukemia (AML) Following Induction Chemotherapy Indicated to shorten time to neutrophil recovery and to reduce the incidence of severe, life-threatening, or fatal infections following induction chemotherapy in adult patients 55 years and older with acute myeloid leukemia (AML).

Autologous Peripheral Blood Progenitor Cell Mobilization and Collection Indicated in adult patients with cancer undergoing autologous hematopoietic stem cell transplantation for the mobilization of hematopoietic progenitor cells into peripheral blood for collection by leukapheresis.

Autologous Peripheral Blood Progenitor Cell and Bone Marrow Transplantation Indicated for the acceleration of myeloid reconstitution following autologous peripheral blood progenitor cell (PBPC) or bone marrow transplantation in adult and pediatric patients 2 years of age and older with non-Hodgkin's lymphoma (NHL), acute lymphoblastic leukemia (ALL) and Hodgkin's lymphoma (HL).

Allogeneic Bone Marrow Transplantation (BMT) Indicated for the acceleration of myeloid reconstitution in adult and pediatric patients 2 years of age and older undergoing allogeneic bone marrow transplantation from HLA-matched related donors.

Allogeneic or Autologous Bone Marrow Transplantation: Treatment of Delayed Neutrophil Recovery or Graft Failure Indicated for the treatment of adult and pediatric patients 2 years and older who have undergone allogeneic or autologous bone marrow transplantation in whom neutrophil recovery is delayed or failed.

Hematopoietic Syndrome of Acute Radiation Syndrome (H-ARS) Indicated to increase survival in adult and pediatric patients from birth to 17 years of age acutely exposed to myelosuppressive doses of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome [H-ARS]).

Off Label Uses: Febrile Neutropenia (FN), Prophylaxis Has been used in patients with nonmyeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever [11]

Human Immunodeficiency Virus (HIV)-Related Neutropenia Has been prescribed for HIV-

related neutropenia [37]

Treatment of High-Risk Febrile Neutropenia (FN) Has been prescribed for the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34]

Drug Name: Neulasta, Neulasta Onpro (pegfilgrastim, G-CSF)

Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by febrile neutropenia, in patients with non-myeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia. Neulasta is not indicated for the mobilization of peripheral blood progenitor cells for hematopoietic stem cell transplantation.

Hematopoietic Subsyndrome of Acute Radiation Syndrome Indicated to increase survival in patients acutely exposed to myelosuppressive doses of radiation.

Off Label Uses: Treatment of High-Risk Febrile Neutropenia (FN) Has been prescribed for the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34]

Drug Name: Neupogen (filgrastim, G-CSF)

Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by FN, in patients with nonmyeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever.

Patients with Acute Myeloid Leukemia (AML) Receiving Induction or Consolidation Chemotherapy Indicated for reducing the time to neutrophil recovery and the duration of fever, following induction or consolidation chemotherapy treatment of adults with AML.

Patients with Cancer Undergoing Bone Marrow Transplantation (BMT) Indicated to reduce the duration of neutropenia and neutropenia-related clinical sequelae, e.g., febrile neutropenia, in patients with nonmyeloid malignancies undergoing myeloablative chemotherapy followed by bone marrow transplantation.

Patients Undergoing Autologous Peripheral Blood Progenitor Cell (PBPC) Collection and Therapy Indicated for the mobilization of autologous hematopoietic progenitor cells into the peripheral blood for collection by leukapheresis.

Patients with Severe Chronic Neutropenia (SCN) Indicated for chronic administration to reduce the incidence and duration of sequelae of neutropenia (e.g., fever, infections, oropharyngeal ulcers) in symptomatic patients with congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia.

Hematopoietic Syndrome of Acute Radiation Syndrome Indicated to increase survival in patients acutely exposed to myelosuppressive doses of radiation.

Off Label Uses: **Human Immunodeficiency Virus (HIV)-Related Neutropenia** Has been prescribed for HIV-related neutropenia. [11-15, 37]

Hepatitis-C Interferon Induced Neutropenia Neupogen has been prescribed for interferon-induced neutropenia in Hepatitis C virus infected patients [4-10, 23, 24]

Treatment of High-Risk Febrile Neutropenia (FN) Has been prescribed for the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34]

Drug Name: Nivestym (filgrastim-aafi, G-CSF), Zarxio (filgrastim-sndz, G-CSF)

Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by FN, in patients with nonmyeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever.

Patients with Acute Myeloid Leukemia (AML) Receiving Induction or Consolidation Chemotherapy Indicated for reducing the time to neutrophil recovery and the duration of fever, following induction or consolidation chemotherapy treatment of patients with AML.

Patients with Cancer Undergoing Bone Marrow Transplantation Indicated to reduce the duration of neutropenia and neutropenia-related clinical sequelae, e.g., febrile neutropenia, in patients with nonmyeloid malignancies undergoing myeloablative chemotherapy followed by bone marrow transplantation.

Patients Undergoing Peripheral Blood Progenitor Cell (PBPC) Collection and Therapy Indicated for the mobilization of autologous hematopoietic progenitor cells into the peripheral blood for collection by leukapheresis.

Patients with Severe Chronic Neutropenia (SCN) Indicated for chronic administration to reduce the incidence and duration of sequelae of neutropenia (e.g., fever, infections, oropharyngeal ulcers) in symptomatic patients with congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia.

Off Label Uses: **Hematopoietic Subsyndrome of Acute Radiation Syndrome** Has been used to increase survival in patients acutely exposed to myelosuppressive doses of radiation. [1, 33, 35, M]

Hepatitis-C Interferon Induced Neutropenia Has been prescribed for interferon-induced neutropenia in Hepatitis C virus infected patients [4-10, 23, 24, M]

Human Immunodeficiency Virus (HIV)-Related Neutropenia Has been prescribed for HIV-related neutropenia. [11, 37]

Treatment of High-Risk Febrile Neutropenia (FN) Has been prescribed for the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34]

Drug Name: Releuko (filgrastim-ayow)
Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by FN, in patients with nonmyeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever. **Patients with Acute Myeloid Leukemia (AML) Receiving Induction or Consolidation Chemotherapy** Indicated for reducing the time to neutrophil recovery and the duration of fever, following induction or consolidation chemotherapy treatment of patients with AML. **Patients with Cancer Undergoing Bone Marrow Transplantation** Indicated to reduce the duration of neutropenia and neutropenia-related clinical sequelae, e.g., febrile neutropenia, in patients with nonmyeloid malignancies undergoing myeloablative chemotherapy followed by bone marrow transplantation. **Patients with Severe Chronic Neutropenia (SCN)** Indicated for chronic administration to reduce the incidence and duration of sequelae of neutropenia (e.g., fever, infections, oropharyngeal ulcers) in symptomatic patients with congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia. **Off Label Uses: Patients Undergoing Peripheral Blood Progenitor Cell (PBPC) Collection and Therapy** Indicated for the mobilization of autologous hematopoietic progenitor cells into the peripheral blood for collection by leukapheresis. **Hematopoietic Subsyndrome of Acute Radiation Syndrome** Has been used to increase survival in patients acutely exposed to myelosuppressive doses of radiation. [1, 33, 35, M] **Hepatitis-C Interferon Induced Neutropenia** Has been prescribed for interferon-induced neutropenia in Hepatitis C virus infected patients [4-10, 23, 24, M] **Human Immunodeficiency Virus (HIV)-Related Neutropenia** Has been prescribed for HIV-related neutropenia. [11, 37] **Treatment of High-Risk Febrile Neutropenia (FN)** Has been prescribed for the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34]
Drug Name: Rolvedon (eflapegrastim-xnst)
Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by febrile neutropenia, in patients with non-myeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia. Rolvedon is not indicated for the mobilization of peripheral blood progenitor cells for hematopoietic stem cell transplantation.
Drug Name: Udenyca (pegfilgrastim-cbqv, G-CSF)
Febrile Neutropenia (FN), Prophylaxis Indicated to decrease the incidence of infection, as manifested by febrile neutropenia, in patients with non-myeloid malignancies receiving

myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia. Limitations of Use: Udenyca is not indicated for the mobilization of peripheral blood progenitor cells for hematopoietic stem cell transplantation.

Hematopoietic Subsyndrome of Acute Radiation Syndrome To increase survival in patients acutely exposed to myelosuppressive doses of radiation.

Off Label Uses: Treatment of High-Risk Febrile Neutropenia (FN) For the treatment of FN in patients who have received or are receiving myelosuppressive anticancer drugs associated with neutropenia who are at high risk for infection-associated complications. [16, 17, 34, 35]

Approval Criteria

1 - One of the following:

1.1 Patient has non-myeloid malignancies undergoing myeloablative chemotherapy followed by autologous or allogeneic bone marrow transplant (BMT)

OR

1.2 Used for mobilization of hematopoietic progenitor cells into the peripheral blood for collection by leukapheresis

OR

1.3 Patient has had a peripheral stem cell transplant (PSCT) and has received myeloablative chemotherapy

AND

2 - Prescribed by or in consultation with a hematologist/oncologist

AND

3 - Patient is 2 years of age or older (applies to Leukine only)

AND

4 - Trial and failure or intolerance to both of the following (applies to Neupogen and Releuko only):

- Nivestym
- Zarxio

Product Name:Neupogen	
Diagnosis	Bone Marrow/Stem Cell Transplant
Approval Length	3 months or duration of therapy

Approval Criteria

1 - Patient will be receiving prophylaxis for febrile neutropenia (FN) due to one of the following:

1.1 Patient is receiving National Cancer Institute's Breast Intergroup, INT C9741 dose dense chemotherapy protocol for primary breast cancer (see Table 1 in Background section) [16-19, 34, D, E]

OR

1.2 Patient is receiving a dose-dense chemotherapy regimen for which the incidence of FN is unknown [E]

OR

1.3 One of the following:

1.3.1 Patient is receiving chemotherapy regimen(s) associated with greater than 20% incidence of FN (see Table 2 in Background section) [16, 17, 34, I]

OR

1.3.2 Both of the following:

1.3.2.1 Patient is receiving chemotherapy regimen(s) associated with 10-20% incidence of FN (see Table 3 in Background section) [16, J]

AND

1.3.2.2 Patient has one or more risk factors associated with chemotherapy induced infection, FN, or neutropenia [16, 17, 34, K]

OR

1.4 Both of the following:

1.4.1 Patient is receiving myelosuppressive anticancer drugs associated with neutropenia (see Table 4 in Background section) [L]

AND

1.4.2 Patient has a history of FN or dose-limiting event during a previous course of chemotherapy (secondary prophylaxis) [16, 17, 34]

AND

2 - Prescribed by or in consultation with a hematologist/oncologist

AND

3 - One of the following:

3.1 Trial and failure or intolerance to both of the following (applies to Neupogen, Releuko, and Granix only):

- Nivestym
- Zarxio

OR

3.2 Trial and failure or intolerance to both of the following (applies to Fulphila, Fylnetra, Nyvepria, Stimufend, and Ziextenzo only):

- Neulasta/Neulasta Onpro
- Udenyca/Udenyca Onbody

Notes	*If patient meets criteria above, please approve both Neulasta/Neulasta Onpro, Udenyca/Udenyca Onbody at GPI list “FILGRASTPA”.

Approval Criteria

1 - For patients with severe chronic neutropenia (SCN) (i.e., congenital, cyclic, and idiopathic neutropenias with chronic absolute neutrophil count [ANC] less than or equal to 500 cells/mm^3) [16]

AND

2 - Prescribed by or in consultation with a hematologist/oncologist

AND

3 - Trial and failure or intolerance to both of the following (applies to Neupogen and Releuko only):

- Nivestym
- Zarxio

Product Name:Neupogen	
Diagnosis	Severe Chronic Neutropenia (SCN)
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
NEUPOGEN	FILGRASTIM INJ 300 MCG/ML	82401520002010	Brand
NEUPOGEN	FILGRASTIM INJ 480 MCG/1.6ML (300 MCG/ML)	82401520002012	Brand

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Patient is infected with Hepatitis C virus

AND

1.1.2 Patient is undergoing treatment with Peg-Intron (peginterferon alfa-2b) or Pegasys (peginterferon alfa-2a)

AND

1.1.3 Patient has neutropenia (absolute neutrophil count [ANC] less than or equal to 500 cells/mm3) after dose reduction of Peg-Intron or Pegasys [F]

OR

1.2 Both of the following:

1.2.1 Patient is experiencing interferon-induced neutropenia (ANC less than or equal to 500 cells/mm3) due to treatment with Peg-Intron (peginterferon alfa-2b) or Pegasys (peginterferon alfa-2a)

AND

1.2.2 One of the following: [G]

1.2.2.1 Patient with Human Immunodeficiency Virus (HIV) co-infection

OR

1.2.2.2 Status post liver transplant

OR

1.2.2.3 Patient with established cirrhosis

AND

2 - Prescribed by or in consultation with one of the following:

- Hematologist/oncologist
- Infectious disease specialist

- Hepatologist
- Gastroenterologist

AND

3 - Trial and failure or intolerance to both of the following (applies to Neupogen and Releuko only):

3 . Background

Benefit/Coverage/Program Information

Table 1. Intergroup C9741 Protocol [19]

Regimen	Drugs	G-CSF
Sequential	Doxorubicin q2 weeks x4 cycles, then paclitaxel q2 weeks x4 cycles, then cyclophosphamide q2 weeks x 4cycles	Days 3 to 10 of each cycle
Concurrent	Doxorubicin + cyclophosphamide q2 weeks x4 cycles, then paclitaxel q2 weeks x4 cycles	Days 3 to 10 of each cycle

Table 2. Examples of chemotherapy regimens with a high risk of FN (> 20%) [16]

Cancer	Regimen
Bladder Cancer	• Dose-dense MVAC (methotrexate, vinblastine, doxorubicin, cisplatin)
Bone Cancer	• VAI (vincristine, doxorubicin or dactinomycin, ifosfamide) • VDC-IE (vincristine, doxorubicin or dactinomycin, and cyclophosphamide alternating with ifosfamide and etoposide) • Cisplatin/doxorubicin • VDC (cyclophosphamide, vincristine, doxorubicin or dactinomycin) • VIDE (vincristine, ifosfamide, doxorubicin or dactinomycin, etoposide)
Breast Cancer[18]	• Dose-dense AC followed by dose-dense paclitaxel (doxorubicin, cyclophosphamide, paclitaxel) • TAX (docetaxel, doxorubicin, cyclophosphamide) • TC (docetaxel, cyclophosphamide) • TCH (docetaxel, carboplatin, trastuzumab)
Colorectal Cancer	• FOLFOXIRI (fluorouracil, leucovorin, oxaliplatin, irinotecan)
Head and Neck Squamous Cell Carcinoma	• TPF (docetaxel, cisplatin, 5-fluorouracil)
Hodgkin Lymphoma	• Brentuximab vedotin + AVD (doxorubicin, vinblastine, dacarbazine) • Escalated BEACOPP (bleomycin, etoposide, doxorubivin, cyclophosphamide, vincristine, procarbazine, prednisone)
Kidney Cancer	• Doxorubicin/gemcitabine
Non-Hodgkin's Lymphomas	• Dose-adjusted EPOCH (etoposide, prednisone, vincristine, cyclophosphamide, doxorubicin) • ICE (ifosfamide, carboplatin, etoposide) • Dose-dense CHOP-14 (cyclophosphamide, doxorubicin, vincristine, prednisone) • MINE (mesna, ifosfamide, mitoxantrone, etoposide) • DHAP (dexamethasone, cisplatin, cytarabine) • ESHAP (etoposide, methylprednisolone, cisplatin, cytarabine) • HyperCVAD (cyclophosphamide, vincristine, doxorubicin, dexamethasone)
Melanoma	• Dacarbazine-based combination with IL-2, interferon alfa (dacarbazine, cisplatin, vinblastine, IL-2, interferon alfa)

Multiple Myeloma	• DT-PACE (dexamethasone/thalidomide/cisplatin/doxorubicin/cyclophosphamide/etoposide) +/- bortezomib (VTD-PACE)
Ovarian Cancer	• Topotecan • Docetaxel
Pancreatic Cancer	• FOLFIRINOX (fluorouracil, leucovorin, irinotecan, oxaliplatin)
Soft Tissue Sarcoma	• MAID (mesna, doxorubicin, ifosfamide, dacarbazine) • Doxorubicin • Ifosfamide/doxorubicin
Small Cell Lung Cancer	• Topotecan
Testicular Cancer	• VIP (etoposide, ifosfamide, cisplatin) • VeIP (vinblastine, ifosfamide, cisplatin) • TIP (paclitaxel, ifosfamide, cisplatin)

Table 3. Examples of chemotherapy regimens with an intermediate risk of FN (10-20%) [16]

Cancer	**Regimen**
Occult Primary-Adenocarcinoma	• Gemcitabine/docetaxel
Breast Cancer	• Docetaxel • AC (doxorubicin, cyclophosphamide) + sequential docetaxel (adjuvant) (taxane portion only) • Paclitaxel every 21 days•
Cervical Cancer	• Cisplatin/topotecan • Paclitaxel/cisplatin • Topotecan • Irinotecan
Colorectal Cancer	• FOLFOX (fluorouracil, leucovorin, oxaliplatin)
Non-Hodgkin's Lymphomas (NHL)[26]	• GDP (gemcitabine, dexamethasone, cisplatin/carboplatin) • CHOP (cyclophosphamide, doxorubivin, vincristine, prednisone) including regimens with pegylated liposomal doxorubicin • CHP (cyclophosphamide, doxorubicin, prednisone) + brentuximab vedotin

	• Bendamustine
Non-Small Cell Lung Cancer	• Cisplatin/paclitaxel • Cisplatin/vinorelbine • Cisplatin/docetaxel • Cisplatin/etoposide • Carboplatin/paclitaxel • Docetaxel
Ovarian Cancer	• Carboplatin/docetaxel
Prostate Cancer	• Cabazitaxel
Testicular Cancer	• Etoposide/cisplatin • BEP (bleomycin, etoposide, cisplatin)
Esophageal and Gastric Cancer	• Irinotecan/cisplatin • Epirubicin/cisplatin/5-flurouracil • Epirubicin/cisplatin/capecitabine
Small Cell Lung Cancer	• Etoposide/carboplatin
Uterine Cancer	• Docetaxel

Table 4. Examples of FDA-approved chemotherapeutic agents with dose-limiting myelosuppression

Generic Name	**Brand Name**
Busulfan	Busulfex®, Myleran®
Carboplatin	Paraplatin®
Carmustine (BCNU)	BiCNU®, Gliadel®
Chlorambucil	Leukeran®
Cladribine	Luestatin®
Cyclophosphamide	Cytoxan®
Cytarabine	N/A
Dacarbazine (DTIC)	DTIC-Dome®
Dactinomycin	Actinomycin D®, Cosmegen®
Daunorubicin	Cerubidine®
Daunorubicin Liposomal	DaunoXome®
Doxorubicin	Adriamycin PFS®, Adriamycin RDF®, Adriamycin®
Doxorubicin Liposomal	Doxil®
Etoposide	Etopophos®, Toposar®, VePesid®
Fluorouracil (5-FU)	Adrucil®, Efudex®, Fluoroplex®
Floxuridine	FUDR®
Fludarabine	Fludara®
Hydroxyurea	Droxia®, Hydrea®
Ifosfamide/Mesna	Ifex®, Mesnex®

Lomustine (CCNU)	CeeNU®
Mechlorethamine (Nitrogen Mustard)	Mustargen®
Melphalan	Alkeran®
Mercaptopurine (6-MP)	Purinethol®
Methotrexate	Rheumatrex®, Trexall®
Mitomycin	N/A
Mitoxantrone	Novantrone®
Paclitaxel	Onxol™, Taxol®
Procarbazine	Matulane®
Teniposide	Vumon®
Thioguanine (6-TG)	Tabloid®
Thiotepa	Thiotepa®
Vinblastine	N/A
Vincristine	Vincasar® PFS
Vinorelbine	Navelbine®

4 . Endnotes

A. Currently there is no information available about the effect of longer acting pegylated G-CSF in patients with myeloid leukemias, therefore pegylated G-CSF should not be used in such patients outside of clinical trials. [17]
B. The safety and efficacy of Leukine in AML induction or consolidation in adults younger than 55 years old have not been established in clinical trials. [3]
C. Per hematology/oncology consultant and member of P&T, most cycles of induction or consolidation chemotherapy last ~ 1 month, but patients who complete therapy typically receive 1 induction and 2-3 consolidations, so re-approval would need to occur every month.
D. The safety and efficacy of pegylated G-CSF has not been fully established in the setting of dose-dense chemotherapy. [17]
E. Per hematology/oncology consultant and member of P&T, in general, dose-dense regimens require growth factor support for chemotherapy administration. [16] Also, Neulasta is commonly used to support dose dense regimens in current community practice. It would be reasonable to allow Neulasta use [in the INT C9741 Protocol] and to broaden its use for other forms of dose dense chemotherapy.
F. The product information for both PEG-Intron and Pegasys recommends dose reduction in patients with neutropenia with an ANC level < 750 cells/mm^3. [21, 22]
G. Per GI consultant and member of P&T, his medical group of practicing hepatologists recommends Neupogen for a special subpopulation of patients with HIV infection, status post liver transplant, or established cirrhosis who experience interferon-induced neutropenia (ANC less than or equal to 500 cells/mm^3) due to treatment with Peg-Intron or Pegasys.
H. Guidelines issued by the U.S. Public Health Service (USPHS) and the Infectious Diseases Society of America (IDSA) recommend for HIV-related neutropenia, the length of therapy with G-CSF and GM-CSF is 2-4 weeks. The clinical benefit of G-CSF therapy

was evaluated in a randomized, double-blind, placebo controlled trial of 30 patients evaluating G-CSF 03 mg/mL subcutaneously 3 times a week or placebo for 12 weeks. The 6 month approval duration mirrors the 6 month approval duration for the erythropoietic agents, as G-CSF has been effective when used alone or in conjunction with epoetin alfa in adults with acquired immunodeficiency syndrome (AIDS) to ameliorate the hematologic toxicity (severe anemia and/or granulocytopenia) associated with zidovudine therapy. [11, 15, 37]

I. Note: This list is NOT inclusive of all chemotherapy regimens with a high risk of FN: See Table 2 in Background section
J. Note: This list is NOT inclusive of all chemotherapy regimens with an intermediate risk of FN: See Table 3 in Background section
K. Risk factors are based on provider information, not the list in the table below. Examples of risk factors may include (but are NOT limited to): Risk factors associated with chemotherapy-induced infection, FN, or neutropenia • Age > 65 years [16, 17] • History of extensive prior chemotherapy or radiation therapy including large radiation ports [16, 17] • Previous episodes of FN [16, 17] • Administration of combined chemoradiotherapy [17] • Pre-existing neutropenia or bone marrow involvement with tumor [16, 17] • Pre-existing conditions [16] • Neutropenia • Active infection/open wounds • Recent surgery • Poor performance status [16, 17] • Poor renal function [16] • Liver dysfunction [16] • Poor nutritional status [17] • More advanced cancer [17] • Hypotension and multiorgan dysfunction (Sepsis syndrome) [16, 17] • Pneumonia [16] • Invasive fungal infection [16, 17] • Other clinically documented infections [16] • Hospitalization at the time of fever [16] • Anticipated prolonged (> 10 days) and profound neutropenia (< 100/mm^3) [17] • Uncontrolled primary disease [17] • Other serious comorbidities [17]
L. Note: This list is NOT all inclusive: See Table 4 in Background section
M. The FDA defines biosimilar as a biological product that is highly similar to and has no clinically meaningful differences from an existing FDA-approved reference product. [33] The American Society of Clinical Oncology states that pegfilgrastim, filgrastim, tbo-filgrastim, and filgrastim-sndz (and other biosimilars as they become available) can be used for the prevention of treatment-related febrile neutropenia. The choice of agent depends on convenience, cost, and clinical situation. [34] NCCN lists FDA-approved biosimilars as appropriate substitutes for filgrastim and pegfilgrastim. Limited data suggest that patients can alternate between the biosimilar and the originator biologic without any clinically meaningful differences regarding efficacy or safety. [16]
N. The efficacy of G-CSFs or GM-CSF for the acute radiation syndrome setting was studied in non-human primate models of radiation injury measuring 60-day survival. An expert panel convened by the World Health Organization recommends that patients receive G-CSF or GM-CSF treatment until their absolute neutrophil count reaches and maintains a level greater than 1.0 x 10^9 cells per liter in the absence of active infection. Patients with severe hematopoietic injury may recover, either spontaneously or after G-CSF treatment alone. In most cases, a duration of two to three weeks would be expected. [1-3, 36]

Cometriq (cabozantinib)

Prior Authorization Guideline

Guideline ID	GL-229101
Guideline Name	Cometriq (cabozantinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Cometriq (cabozantinib)
Medullary thyroid cancer Indicated for the treatment of patients with progressive, metastatic medullary thyroid cancer (MTC). **Off Label Uses: Non-small cell lung cancer** Has activity against RET gene rearrangements in non-small cell lung cancer (NSCLC). [3]

2 . Criteria

Product Name:Cometriq

Diagnosis	Medullary Thyroid Cancer (MTC)
Approval Length	11 months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COMETRIQ	CABOZANTINIB S-MALATE CAP 3 X 20 MG (60 MG DOSE) KIT	21533010106460	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 1 X 20 MG (100 DOSE) KIT	21533010106470	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 3 X 20 MG (140 DOSE) KIT	21533010106480	Brand

Approval Criteria

1 - Diagnosis of one of the following: [1,2]

- Metastatic medullary thyroid cancer (MTC)
- Unresectable locally advanced MTC

AND

2 - One of the following: [2]

- Patient has symptomatic disease
- Patient has progressive disease

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Cometriq	
Diagnosis	Medullary Thyroid Cancer (MTC)
Approval Length	11 months [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

COMETRIQ	CABOZANTINIB S-MALATE CAP 3 X 20 MG (60 MG DOSE) KIT	21533010106460	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 1 X 20 MG (100 DOSE) KIT	21533010106470	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 3 X 20 MG (140 DOSE) KIT	21533010106480	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Cometriq	
Diagnosis	Non-Small Cell Lung Cancer (NSCLC) (off-label)
Approval Length	11 months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COMETRIQ	CABOZANTINIB S-MALATE CAP 3 X 20 MG (60 MG DOSE) KIT	21533010106460	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 1 X 20 MG (100 DOSE) KIT	21533010106470	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 3 X 20 MG (140 DOSE) KIT	21533010106480	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC) [3]

AND

2 - Presence of RET gene rearrangements as detected by a U.S. Food and Drug Administration (FDA)-approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA) [3]

Notes	If patient meets criteria above, please approve at GPI-12.

Product Name:Cometriq	
Diagnosis	Non-Small Cell Lung Cancer (NSCLC) (off-label)
Approval Length	11 months [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COMETRIQ	CABOZANTINIB S-MALATE CAP 3 X 20 MG (60 MG DOSE) KIT	21533010106460	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 1 X 20 MG (100 DOSE) KIT	21533010106470	Brand
COMETRIQ	CABOZANTINIB S-MAL CAP 1 X 80 MG & 3 X 20 MG (140 DOSE) KIT	21533010106480	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Notes	If patient meets criteria above, please approve at GPI-12.

3 . Endnotes

A. In a phase 3 clinical trial of 330 patients, a statistically significant prolongation in progression free survival (PFS) was demonstrated among Cometriq-treated patients compared to those receiving placebo, with a median PFS time of 11.2 months and 4 months in the Cometriq and placebo arms, respectively. [1]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-229103
Guideline Name	Commercial MEDLIMIT CDUR Criteria
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/16/2017
P&T Revision Date:	10/16/2024

1 . Criteria

Product Name:Requested opioid pain medication	
Diagnosis	Level of Care Change
Approval Length	1 Time(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
morphine			
opioid			
MED			

cumulative			
MEE			

Approval Criteria

1 - Provider confirms replacement prescription(s) of opioid medication(s) is needed because the patient is physically changing locations and cannot take their prescription with them [such as admission to a long term care (LTC) facility]

Product Name:Requested opioid pain medication	
Diagnosis	Cancer-Related Pain or Sickle Cell Anemia
Approval Length	12 Months to override MME edit
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Confirmation opioids are being used for the treatment of cancer-related pain or sickle cell anemia

Product Name:Requested opioid pain medication	
Diagnosis	Hospice, Long Term Care, or End-of-Life Care Enrollment
Approval Length	12 Months to override MME edit
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Patient is currently enrolled in hospice, end-of-life care, or resides in a long term care facility

Product Name:Requested opioid pain medication

Diagnosis	Other Pain
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - A written or verbal supporting statement is received from the requesting prescriber attesting that in his/her clinical judgment, the requested dose exceeding the current cumulative morphine milligram equivalent (MME) threshold* is medically required

Notes	*MME is calculated using all of the member's current opioid prescriptions *Note: Ask provider, "Will there be a dose escalation in the patient's opioid utilization in the next 90 days?" If yes, approve MME level 90 daily MME above the rejected level.

2 . Endnotes

A. All opioid medication edits are subject to review and modification (either to increase or decrease existing MME Limits) based on an Exception request received from the member or the member's provider. The decision to remove, modify, or retain an existing restriction on opioid pain medications will be based on evidence of new clinical information which is documented in the form of a written supporting statement received from the prescriber and which contains all of the required elements as outlined in the criteria above.

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228823
Guideline Name	Compounded Drugs
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Compounded drugs**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Compound	compound		
Compounds	compounds		
Bulk powders	bulk powders		
COMPOUNDS	COMPOUNDS		
COMPOUNDED DRUGS	COMPOUNDED DRUGS		

COMPOUND	COMPOUND		
COMPOUNDS	COMPOUNDS		

Approval Criteria

1 - Each active ingredient in the compounded drug is FDA-approved or national compendia* supported for the condition being treated

AND

2 - The therapeutic amounts are supported by national compendia* or two peer-reviewed literature for the condition being treated in the requested route of delivery

AND

3 - If a drug included in the compound requires prior authorization and/or step therapy or is non-formulary, all drug-specific criteria must be met

AND

4 - The compounded drug must not include any ingredient that has been withdrawn or removed from the market due to safety reasons (refer to Table 1)

AND

5 - The patient has tried and failed therapy or had an intolerance to two FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless one of the following criteria are met:

5.1 Patient has a contraindication to commercially available products

OR

5.2 One or no other therapeutic alternatives are commercially available

OR

5.3 Prepared in a strength not commercially available or currently in short supply

OR

5.4 Prepared in a different dosage form for a patient who is unable to take the commercially available formulation (mixing or reconstituting commercially available products based on the manufacturer's instructions or the product's approved labeling does NOT meet this criteria).

OR

5.5 Patient has an allergy or sensitivity to inactive ingredients (e.g. dyes, preservatives, sugars, etc.) that are found in commercially available products.

AND

6 - The compounded drug must not be used for a cosmetic purpose.

AND

7 - If the compound is subject to the drug-specific/targeted compound program, the member meets all the applicable drug-specific criteria below for all the targeted ingredient(s) used in the requested compound product.

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. *Approved national compendia are referenced in the "Coverage of Off -Label or Non-FDA Approved Indications" Guideline **Administrative guideline may not apply to all compound reviews, dep ending on the ingredients being used and client elections.

Product Name:Diclofenac compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Diclofenac bulk powder			
Diclofenac Ophthalmic Solution			
Arthrotec			
Cambia			
Zorvolex Oral Capsules			
Zipsor Liquid Filled Capsules			
Diclofenac tablets			
Diclofenac tablets			
Dyloject			
Voltaren			
Solaraze			
Pennsaid			
Flector			
Rexaphenac			

Approval Criteria

1 - Compounded drugs that include diclofenac will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 18 years of age or older

AND

1.2 Diagnosis of one of the following:

- Osteoarthritis
- Rheumatoid arthritis
- Mild to moderate pain
- Pain due to minor strains, sprains or contusions
- Migraine

- Primary dysmenorrhea
- Actinic keratosis
- Ankylosing spondylitis
- Inflammatory disorder of the eye
- Photophobia
- Pain in the eye

AND

1.3 The final dosage form will be for oral, topical, or ophthalmic use

AND

1.4 The final dosage form and strength of the diclofenac ingredient is not commercially available

AND

1.5 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the diclofenac targeted compound program.

Product Name:Flurbiprofen compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Flurbiprofen tablets			
Ocufen			
Flurbiprofen bulk powder			

Approval Criteria

1 - Compounded drugs that include flurbiprofen will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 18 years of age or older

AND

1.2 Diagnosis of one of the following:

- Osteoarthritis
- Rheumatoid arthritis
- Intraoperative miosis inhibition

AND

1.3 The final dosage form will be for oral or ophthalmic use

AND

1.4 The final dose is not commercially available

AND

1.5 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the flurbiprofen targeted compound program.

Product Name:Fluticasone compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Fluticasone bulk powder			
Cutivate			

Approval Criteria

1 - Compounded drugs that include fluticasone will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 3 months of age or older

AND

1.2 Diagnosis of Inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses, including but not limited to atopic dermatitis, contact dermatitis, eczema, psoriasis

AND

1.3 The final dose is not commercially available

AND

1.4 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

AND

1.5 The compounded product is not being used for cosmetic purposes (i.e., scar treatment, anti-aging, skin lightening, etc.)

Notes	Compounded drugs are considered experimental/investigational for reasons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may apply. This drug-specific criteria only applies to clients who enrolled in the fluticasone targeted compound program.

Product Name:Gabapentin compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Gabapentin bulk powder			
Gralise			
Horizant			
Neurontin			

Approval Criteria

1 - Compounded drugs that include gabapentin will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 3 years of age or older

AND

1.2 Patient must have one of the following diagnoses:

- Partial seizures
- Postherpetic neuralgia
- Restless leg syndrome (RLS)

AND

1.3 The final dosage form will be for oral use

AND

1.4 The requested dose is not commercially available

AND

1.5 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available)

Notes	Compounded drugs are considered experimental/investigational for reasons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may apply. This drug-specific criteria only applies to clients who enrolled in the gabapentin targeted compound program.

Product Name:Ketamine compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Ketamine bulk powder			
Ketalar			

Approval Criteria

1 - Compounded drugs that include ketamine will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 16 years of age or older

AND

1.2 One of the following:

1.2.1 Patient is requiring ketamine for conscious sedation prior to a diagnostic or surgical procedure that do not require skeletal muscle relaxation

OR

1.2.2 Patient is requiring ketamine for the induction of anesthesia prior to the administration of other general anesthetic agents

OR

1.2.3 Patient is requiring ketamine as a supplement to low-potency anesthetic agents, such as nitrous oxide

AND

1.3 The final dosage form will be for injection

AND

1.4 The requested dose is not commercially available

AND

1.5 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

AND

1.6 The requested dose does not exceed the concentration limit of 100mg/mL*

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. *According to the prescribing information, 100mg/ml product must be

	diluted prior to administration. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the ketamine targeted compound program.

Product Name:Ketoprofen compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Ketoprofen bulk powder			
Ketoprofen extended-release capsules			
Ketoprofen capsules			

Approval Criteria

1 - Compounded drugs that include ketoprofen will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 18 years of age or older

AND

1.2 Diagnosis of one of the following:

- Osteoarthritis
- Rheumatoid arthritis
- Acute pain
- Primary dysmenorrhea

AND

1.3 The final dosage form will be for oral use

AND

1.4 The final dose is not commercially available

AND

1.5 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

Notes	Compounded drugs are considered experimental/investigational for reasons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may apply. This drug-specific criteria only applies to clients who enrolled in the ketoprofen targeted compound program.

Product Name:Levocetirizine compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Levocetirizine bulk powder			
Xyzal			

Approval Criteria

1 - Compounded drugs that include levocetirizine will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 6 months of age or older

AND

1.2 Diagnosis of one of the following:

- Seasonal or perennial allergic rhinitis
- Uncomplicated skin manifestations of chronic idiopathic urticaria

AND

1.3 The final dosage form will be for oral use

AND

1.4 The final dose is not commercially available

AND

1.5 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the levocetirizine targeted compound program.

Product Name:Mometasone compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Mometasone powder			
Elocon			

Approval Criteria

1 - Compounded drugs that include mometasone will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 2 years of age or older

AND

1.2 Diagnosis of Inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses, including but not limited to atopic dermatitis, contact dermatitis, eczema, psoriasis

AND

1.3 The final dose is not commercially available

AND

1.4 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available).

AND

1.5 The compounded product is not being used for cosmetic purposes (i.e., scar treatment, anti-aging, skin lightening, etc.)

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the mometasone targeted compound program.

Product Name:Acyclovir ointment 5% compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Acyclovir 5% Topical Ointment			
Zovirax 5% Topical Ointment			

Approval Criteria

1 - Compounded drugs that include Acyclovir ointment 5% will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 18 years of age or older

AND

1.2 Diagnosis for one of the following:

- Management of initial genital herpes
- Limited non-life-threatening mucutaneous herpes simplex virus infection in immunocompromised patients

AND

1.3 The final dose is not commercially available

AND

1.4 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available)

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the Acyclovir ointment 5% targeted compound program.

Product Name:Doxepin cream 5% compounds**	
Approval Length	6 months, unless the provider requests for a shorter length of therapy
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Doxepin 5% Topical Cream			
Prudoxin 5% Topical Cream			
Zonalon 5% Topical Cream			

Approval Criteria

1 - Compounded drugs that include Doxepin cream 5% will be considered for coverage under the pharmacy benefit program when the following criteria are met:

1.1 Patient is 18 years of age or older

AND

1.2 Treatment of moderate pruritus with atopic dermatitis or lichen simplex chronicus

AND

1.3 The final dose is not commercially available

AND

1.4 The patient has tried and failed therapy or had an intolerance to three FDA-approved commercially-available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless there is there is a reason for not using an alternative (e.g., contraindication, two or less similar products commercially-available)

Notes	Compounded drugs are considered experimental/investigational for re asons not listed in this coverage policy section. **Administrative guideline and other drug-specific guidelines may appl y. This drug-specific criteria only applies to clients who enrolled in the Doxepin cream 5% targeted compound program.

2 . Background

Benefit/Coverage/Program Information

Table 1: Drugs that were withdrawn from the market due to safety or effectiveness

3,3',4',5-tetrachlorosalicylanilide	Methopholine Methoxylflurane
Adenosine phosphate	Methoxyflurane
Adrenal cortex	Mibefradil dihydrochloride
Alatrofloxacin mesylate	Nitrofurazone
Aminopyrine	Nomifensine maleate
Astemizole	Novobiocin
Azaribine	Ondansetron hydrochloride
Benoxaprofen	Oxyphenisatin
Bithionol	Oxyphenisatin acetate
Bromfenac sodium	Pemoline
Bromocriptine mesylate	Pergolide mesylate
Butamben	Phenacetin
Camphorated oil	Phenformin hydrochloride
Carbetapentane citrate	Phenylpropanolamine
Casein, iodinated	Pipamazine
Cerivastatin sodium	Polyethylene glycol 3350, sodium chloride, sodium bicarbonate, potassium chloride, and bisacodyl
Chloramphenicol	

Chlorhexidine gluconate	Potassium arsenite
Chlormadinone acetate	Potassium chloride
Chloroform	Povidone
Cisapride	Propoxyphene
Cobalt	Rapacuronium bromide
Dexfenfluramine hydrochloride	Reserpine
Diamthazole dihydrochloride	Rofecoxib
Dibromsalan	Sibutramine hydrochloride
Diethylstilbestrol	Sparteine sulfate
Dihydrostreptomycin sulfate	Sulfadimethoxine
Dipyrone	Sulfathiazole
Encainide hydrochloride	Suprofen
Esmolol hydrochloride	Sweet spirits of nitre
Etretinate	Tegaserod maleate
Fenfluramine hydrochloride	Temafloxacin hydrochloride
Flosequinan	Terfenadine
Gatifloxacin	Tetracycline
Gelatin	Ticrynafen
Glycerol, iodinated	Tribromsalan
Gonadotropin, chorionic	Trichloroethane
Grepafloxacin	Troglitazone
Mepazine	Trovafloxacin mesylate

Metabromsalan	Urethane
Methamphetamine hydrochloride	Valdexocib
Methapyrilene	Vinyl chloride
	Zirconium
	Zomepirac sodium

Diclofenac Compounds

There is little to no evidence-based literature support for the use of diclofenac for indications and in dosage forms not currently approved by the FDA. Use of compounds containing diclofenac should be limited to the following FDA-approved indications.

1. Diclofenac is indicated for a number of conditions including:
• Management of mild to moderate acute pain or osteoarthritis pain,
• Relief of signs and symptoms of ankylosing spondylitis and rheumatoid arthritis
• Relieve acute pain associated with minor sprains, strains, and contusions
• Treatment of primary dysmenorrhea
• Treatment of acute migraine attacks with or without aura in adults
• Treatment of actinic keratosis
• Treatment of postoperative inflammation in patients who have undergone cataract surgery and temporary relief of pain and photophobia associated with corneal refractive surgery.

2. Safety and efficacy in pediatric populations has not been established.

3. Diclofenac is commercially available in the several dosage forms: oral capsules, oral tablets, oral solution, topical patch, topical gel, topical solution, topical ointment and ophthalmic solution.

Flurbiprofen Compounds

There is little to no evidence-based literature support for the use of flurbiprofen for indications and in dosage forms not currently approved by the FDA. Use of compounds containing flurbiprofen should be limited to the following FDA-approved indications.

- Flurbiprofen tablets are indicated for relief of the signs and symptoms of rheumatoid arthritis and osteoarthritis.
- Flurbiprofen ophthalmic solution is indication for preventing intraoperative miosis.

- Flurbiprofen as a topically compounded formulation has not been shown to be more effective than currently commercially available topical NSAID products.
- Flurbiprofen is commercially available as a 50 and 100 mg oral tablet and also as 0.03% sterile ophthalmic solution.

Fluticasone Compounds

There is little to no evidence-based literature support for the use of fluticasone for indications and in dosage forms not currently approved by the FDA. Use of compounds containing fluticasone should be limited to the following FDA-approved indications.

- Fluticasone cream indicated for the relief of the inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses in patients 3 months of age or older.

Fluticasone is commercially available in the several dosage forms: topical cream, topical lotion, topical ointment, nasal spray and various aerosols and powders for inhalation

Gabapentin Compounds

There is little to no evidence-based literature support for the use of gabapentin for indications or in dosage forms not currently approved by the FDA. Use of compounds containing gabapentin should be limited to the following FDA-approved indications.

- Gabapentin is indicated for treatment postherpetic neuralgia in adults (Gralise prescribing information, 2023; Horizant prescribing information, 2020; Neurontin prescribing information, 2020).
- Gabapentin is indicated as adjunctive therapy in the treatment of partial onset seizures, with and without secondary generalization, in adults and pediatric patients 3 years and older with epilepsy (Neurontin prescribing information, 2020).
- Gabapentin is indicated for the treatment of moderate to severe primary restless leg syndrome (Horizant prescribing information, 2020).

Ketamine Compounds

There is little to no evidence-based literature support for the use of ketamine for indications or in dosage forms not currently approved by the FDA. Use of compounds containing ketamine should be limited to the following FDA-approved indications.

- Ketamine is indicated as the sole anesthetic agent for diagnostic and surgical procedures that do not require skeletal muscle relaxation (Ketalar prescribing information, 2022)

- Ketamine is indicated for the induction of anesthesia prior to the administration of other general anesthetic agents (Ketalar prescribing information, 2022)
- Ketamine is indicated to supplement low-potency agents, such as nitrous oxide (Ketalar prescribing information, 2022)
- Esketamine (the S-enantiomer of racemic ketamine) is indicated, in conjunction with an oral antidepressant, for the treatment of treatment-resistant depression (TRD) in adults (Spravato prescribing information, 2023). Coverage of compounds with racemic ketamine will continue to be limited to the FDA approved indications listed above.

Ketoprofen Compounds

There is little to no evidence-based literature support for the use of ketoprofen for indications and in dosage forms not currently approved by the FDA. Use of compounds containing ketoprofen should be limited to the following FDA-approved indications.

- Ketoprofen immediate-release capsules and ketoprofen extended-release capsules are indicated for the management of the signs and symptoms of rheumatoid arthritis and osteoarthritis.
- Ketoprofen immediate-release capsules are indicated for the management of pain and for treatment of primary dysmenorrhea.
- Ketoprofen extended-release capsules are not recommended for treatment of acute pain because of its extended-release characteristics.
- Ketoprofen as a topically compounded formulation has not been shown to be more effective than currently commercially available topical NSAID products.
- Ketoprofen is commercially available as a 50 and 75 mg oral capsule and 200 mg extended release oral capsule.

Levocetirizine Compounds

There is little to no evidence-based literature support for the use of levocetirizine for indications and in dosage forms not currently approved by the FDA. Use of compounds containing levocetirizine should be limited to the following FDA-approved indications.

- Levocetirizine dihydrochloride, a histamine (H1) receptor antagonist, is indicated for:
    - Treatment of perennial allergic rhinitis in adults and children 6 months of age or older.
    - Treatment of seasonal allergic rhinitis in adults and children 2 years of age and older
    - Uncomplicated skin manifestations of chronic idiopathic urticaria in adults and children 6 months of age and older

- Levocetirizine is commercially available as a 5 mg oral tablet and 2.5 mg/mL oral solution.

Mometasone Compounds

There is little to no evidence-based literature support for the use of mometasone for indications and in dosage forms not currently approved by the FDA. Use of compounds containing mometasone should be limited to the following FDA-approved indications.

- Mometasone cream & ointment are indicated for the treatment of relief of the inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses in patient's ≥ 2 years of age.
- Mometasone lotion is indicated for the treatment of relief of the inflammatory and pruritic manifestations of corticosteroid-responsive dermatoses in patient's ≥12 years of age.
- Mometasone is commercially available in several dosage forms: topical cream, topical lotion, topical ointment, nasal spray, powder for inhalation and sinus implant.

Acyclovir ointment 5% Compounds

There is little to no evidence-based literature support for the use of Acyclovir ointment 5% for indications and in dosage forms not currently approved by the FDA. Use of compounds containing Acyclovir ointment 5% should be limited to the following FDA-approved indications.

- Acyclovir ointment 5% is indicated for the management of initial genital herpes and in limited non-life-threatening mucocutaneous Herpes simplex virus infection in immunocompromised patients.
- Acyclovir is commercially available in several dosage forms: topical ointment, topical cream, buccal tablet, tablet, capsule, oral suspension, and intravenous solution.

Doxepin cream 5% Compounds

There is little to no evidence-based literature support for the use of Doxepin cream 5% for indications and in dosage forms not currently approved by the FDA. Use of compounds containing Doxepin cream 5% should be limited to the following FDA-approved indications.

- Doxepin cream 5% is indicated for short-term (up to 8 days) management of moderate pruritus in adult patients with atopic dermatitis or lichen simplex chronicus.
- Doxepin cream 5% is commercially available in several dosage forms: topical cream, capsule, tablet, and oral concentrate

3 . Endnotes

A. Compounding is a practice in which a licensed pharmacist, a licensed physician, or, in the case of an outsourcing facility, a person under the supervision of a licensed pharmacist, combines, mixes, or alters ingredients of a drug to create a medication tailored to the needs of an individual patient. [1]
B. Compound drugs are customized in the following ways to meet patients need: (1) Removal of a nonessential ingredient for patients' allergies; and (2) Change in medication formulation (e.g., pill to solution in a patient with swallowing difficulties). [1]
C. Benefit design recommendations provided in the OptumRx Commercial Implementation Guide: (1) $200 Rx High Dollar Limit at Retail; (2) The processing of compound drugs will be subject to the same benefit plan edits: day supply, copay and drug coverage; (3) Multiple ingredient processing is recommended; (4) Bulk chemicals and compound kit recommended as standard exclusions.
D. Compounding does not generally include mixing or reconstituting commercially available products in accordance with the manufacturer’s instructions or the product’s approved labeling.

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233383
Guideline Name	Constipation Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	8/18/2008
P&T Revision Date:	2/20/2025

1 . Indications

Drug Name: Amitiza (lubiprostone)
Chronic Idiopathic Constipation (CIC) Indicated for the treatment of CIC in adults. **Opioid-Induced Constipation in Adult Patients with Chronic Non-Cancer Pain** Indicated for the treatment of opioid-induced constipation (OIC) in adult patients with chronic non-cancer pain, including patients with chronic pain related to prior cancer or its treatment who do not require frequent (e.g., weekly) opioid dosage escalation. Limitations of Use: Effectiveness of Amitiza in the treatment of opioid-induced constipation in patients taking diphenylheptane opioids (e.g., methadone) has not been established. **Irritable Bowel Syndrome with Constipation** Indicated for the treatment of irritable bowel syndrome with constipation in women at least 18 years old.
Drug Name: Linzess (linaclotide)

Irritable Bowel Syndrome with Constipation (IBS-C) Indicated in adults for the treatment of irritable bowel syndrome with constipation (IBS-C).

CIC Indicated in adults for the treatment of CIC.

Functional Constipation (FC) Indicated in pediatric patients 6 to 17 years of age for the treatment of functional constipation (FC).

Drug Name: Movantik (naloxegol)

Opioid-Induced Constipation (chronic non-cancer pain, chronic pain related to prior cancer or its treatment) Indicated for the treatment of OIC in adult patients with chronic non-cancer pain, including patients with chronic pain related to prior cancer or its treatment who do not require frequent (e.g., weekly) opioid dosage escalation.

Drug Name: Motegrity (prucalopride)

CIC Indicated for the treatment of CIC in adults.

Drug Name: Relistor (methylnaltrexone bromide) injection

Opioid-Induced Constipation (advanced illness or pain caused by active cancer) [1, 2] Indicated for the treatment of OIC in adult patients with advanced illness or pain caused by active cancer who require opioid dosage escalation for palliative care.

Opioid-Induced Constipation (chronic non-cancer pain, chronic pain related to prior cancer or its treatment) Indicated for the treatment of OIC in adult patients with chronic non-cancer pain, including patients with chronic pain related to prior cancer or its treatment who do not require frequent (e.g., weekly) opioid dosage escalation.

Drug Name: Relistor (methylnaltrexone bromide) tablet

Opioid-Induced Constipation (chronic non-cancer pain, chronic pain related to prior cancer or its treatment) Indicated for the treatment of OIC in adult patients with chronic non-cancer pain, including patients with chronic pain related to prior cancer or its treatment who do not require frequent (e.g., weekly) opioid dosage escalation.

Drug Name: Symproic (naldemedine)

Opioid-Induced Constipation (chronic non-cancer pain, chronic pain related to prior cancer or its treatment) Indicated for the treatment of OIC in adult patients with chronic non-cancer pain, including patients with chronic pain related to prior cancer or its treatment who do not require frequent (e.g., weekly) opioid dosage escalation.

Drug Name: Trulance (plecanatide)

CIC Indicated in adults for the treatment of CIC.

IBS-C Indicated in adults for the treatment of IBS-C.

- Movantik
- Symproic

AND

4 - Trial and failure (of a minimum 30 days supply), contraindication, or intolerance to generic lubiprostone

3 . Endnotes

A. Stimulant and osmotic laxatives should be tried/failed first before patients are placed on OIC agents (ie, Relistor and Movantik). [2, 3]
B. The 2019 American Gastroenterological Association (AGA) Guideline for Opioid-Induced Constipation (OIC) recommends traditional laxative therapy as first-line agents given their established efficacy, safety, and lower cost. If an adequate trial of laxatives does not optimally control symptoms, the AGA recommends treatment with peripherally acting mu-opioid receptor antagonist (PAMORA) drugs with higher quality evidence of efficacy, namely naldemedine and naloxegol. [2]

FREESTYLE LIBRE 3 PLUS/SESOR/GLUCOSE MONITORING SYSTEM	*CONTINUOUS GLUCOSE SYSTEM SENSOR***	97202012046300	Brand

Approval Criteria

1 - ALL of the following:

1.1 Diagnosis of diabetes mellitus

AND

1.2 Patient is adherent to current diabetes treatment plan and participates in ongoing diabetes education and support

AND

1.3 ONE of the following:

1.3.1 Patient is being treated with insulin

OR

1.3.2 Patient has a history of problematic hypoglycemia with at least one of the following:

- Recurrent (more than one) level 2 hypoglycemic events (glucose less than 54mg/dL (3.0mmol/L)) that persist despite multiple (more than one) attempts to adjust medication(s) and/or modify the diabetes treatment plan
- Patient has a history of one level 3 hypoglycemic event (glucose less than 54mg/dL (3.0mmol/L)) characterized by altered mental and/or physical state requiring third-party assistance for treatment of hypoglycemia

Notes	*If patient meets criteria above, please approve all CGM components at NDC list “PREFCGMPA”

Product Name:Dexcom Products*, Freestyle Libre Products*	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Approval Criteria

1 - ONE of the following:

1.1 Patient demonstrates positive clinical response as evidenced by ONE of the following:

- Improvement in glycemic control (e.g., lower and/or maintain A1C levels)
- Reduction or improvement in hypoglycemic events

OR

1.2 Patient is being assessed by the prescriber for adherence to their CGM regimen and diabetes treatment plan

Notes	*If patient meets criteria above, please approve all CGM components at NDC list “PREFCGMPA”

Notes	*If patient meets criteria above, please approve all CGM components at GPI list “CGMPA”

2 . Endnotes

A. People who have been using continuous glucose monitoring, continuous subcutaneous insulin infusion, and/or automated insulin delivery for diabetes management should have continued access across third party payers. Interruption of access to CGM is associated with a worsening of outcomes, therefore, it is important for individuals on CGM to have consistent access. [2]

Prior Authorization Guideline

Guideline ID	GL-229173
Guideline Name	Copiktra (duvelisib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/15/2018
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Copiktra (duvelisib)
Chronic Lymphocytic Leukemia (CLL)/Small Lymphocytic Lymphoma (SLL) Indicated for the treatment of adult patients with relapsed or refractory chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL) after at least two prior therapies.

2 . Criteria

Product Name:Copiktra	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COPIKTRA	DUVELISIB CAP 15 MG	21538030000120	Brand
COPIKTRA	DUVELISIB CAP 25 MG	21538030000130	Brand

Approval Criteria

1 - Diagnosis of chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL)

AND

2 - Disease is relapsed or refractory

AND

3 - Trial and failure, contraindication, or intolerance to at least two prior therapies for CLL/SLL (e.g., Leukeran [chlorambucil], Calquence [acalabrutinib], Gazyva [obinutuzumab], Arzerra [ofatumumab], Venclexta [venetoclax], Bendeka [bendamustine], Imbruvica [ibrutinib], Rituxan [rituximab], etc.) [2]

Product Name:Copiktra	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COPIKTRA	DUVELISIB CAP 15 MG	21538030000120	Brand
COPIKTRA	DUVELISIB CAP 25 MG	21538030000130	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229107
Guideline Name	Copper Chelating Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	8/20/2014
P&T Revision Date:	6/19/2024

1 . Indications

Drug Name: Cuprimine (penicillamine)
Wilson's Disease Indicated in the treatment of Wilson's disease. **Cystinuria** Indicated in the treatment of cystinuria. **Rheumatoid Arthritis** Indicated in the treatment of severe, active rheumatoid arthritis in patients who have failed to respond to an adequate trial of conventional therapy.
Drug Name: Syprine (trientine)
Wilson's Disease Indicated in the treatment of patients with Wilson's disease who are intolerant of penicillamine.
Drug Name: Cuvrior (trientine tetrahydrochloride)

Wilson's Disease Indicated for the treatment of adult patients with stable Wilson's disease who are de-coppered and tolerant to penicillamine.

2 . Criteria

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Wilson's Disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Diagnosis of Wilson's disease (i.e., hepatolenticular degeneration)

AND

2 - Documentation of one of the following: [5]

- Presence of Kayser-Fleisher rings
- Serum ceruloplasmin (CPN) less than 20 mg/dL
- 24-hour urinary copper excretion greater than 100 mcg
- Liver biopsy with copper dry weight greater than 250 mcg/g
- ATP7B mutation via genetic testing

AND

3 - Trial and failure, or intolerance to Depen (penicillamine) tablets

AND

4 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Hepatologist

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Cystinuria
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Diagnosis of cystinuria

AND

2 - Trial and failure, contraindication, or intolerance to both of the following:

- Urinary alkalinization therapy [4]
- Thiola (tiopronin) [A]

AND

3 - Trial and failure, or intolerance to Depen (penicillamine) tablets

AND

4 - Prescribed by or in consultation with one of the following:

- Nephrologist
- Urologist

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Rheumatoid Arthritis
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Diagnosis of severe, active rheumatoid arthritis

AND

2 - Patient's condition is unresponsive to conventional therapy [e.g., traditional DMARDs (e.g., methotrexate, sulfasalazine), TNF inhibitor (e.g., Humira (adalimumab), Enbrel (etanercept)), Non-TNF biologic (e.g., Rinvoq (upadacitinb), Xeljanz (tofacitinib)]

AND

3 - Trial and failure, or intolerance to Depen (penicillamine) tablets

AND

4 - Prescribed by or in consultation with a rheumatologist

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Wilson's disease, Cystinuria, Rheumatoid Arthritis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Wilson's Disease
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Diagnosis of Wilson's disease (i.e., hepatolenticular degeneration)

AND

2 - Submission of medical records (e.g., chart notes) documenting one of the following: [5]

- Presence of Kayser-Fleisher rings
- Serum ceruloplasmin (CPN) less than 20 mg/dL
- 24-hour urinary copper excretion greater than 100 mcg
- Liver biopsy with copper dry weight greater than 250 mcg/g
- ATP7B mutation via genetic testing

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to Depen (penicillamine) tablets

AND

4 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Hepatologist

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Cystinuria
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Diagnosis of cystinuria

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to both of the following:

- Urinary alkalinization therapy [4]
- Thiola (tiopronin) [A]

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to Depen (penicillamine) tablets

AND

4 - Prescribed by or in consultation with one of the following:

- Nephrologist
- Urologist

Product Name:Brand Cuprimine, generic penicillamine	
Diagnosis	Rheumatoid Arthritis
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
CUPRIMINE	PENICILLAMINE CAP 250 MG	99200030000110	Brand
PENICILLAMINE	PENICILLAMINE CAP 250 MG	99200030000110	Generic

Approval Criteria

1 - Diagnosis of severe, active rheumatoid arthritis

AND

2 - Patient's condition is unresponsive to conventional therapy [e.g., traditional DMARDs (e.g., methotrexate, sulfasalazine), TNF inhibitor (e.g., Humira (adalimumab), Enbrel (etanercept)), Non-TNF biologic (e.g., Rinvoq (upadacitinb), Xeljanz (tofacitinib)]

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to Depen (penicillamine) tablets

AND

4 - Prescribed by or in consultation with a rheumatologist

Product Name:Brand Syprine, generic trientine, Cuvrior	
Diagnosis	Wilson's disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYPRINE	TRIENTINE HCL CAP 250 MG	99200020100110	Brand
TRIENTINE HYDROCHLORIDE	TRIENTINE HCL CAP 250 MG	99200020100110	Generic
CUVRIOR	TRIENTINE TETRAHYDROCHLORIDE TAB 300 MG	99200020200330	Brand
TRIENTINE HYDROCHLORIDE	TRIENTINE HCL CAP 500 MG	99200020100130	Generic

Approval Criteria

1 - Diagnosis of Wilson's disease (i.e., hepatolenticular degeneration)

AND

2 - Documentation of one of the following: [5]

- Presence of Kayser-Fleisher rings
- Serum ceruloplasmin (CPN) less than 20 mg/dL
- 24-hour urinary copper excretion greater than 100 mcg
- Liver biopsy with copper dry weight greater than 250 mcg/g
- ATP7B mutation via genetic testing

AND

3 - Trial and failure, contraindication, or intolerance to Depen (penicillamine) tablets

AND

4 - For Brand Syprine and Cuvrior, trial and failure, or intolerance to generic trientine

AND

5 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Hepatologist

Product Name:Brand Syprine, generic trientine, Cuvrior	
Diagnosis	Wilson's disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SYPRINE	TRIENTINE HCL CAP 250 MG	99200020100110	Brand

TRIENTINE HYDROCHLORIDE	TRIENTINE HCL CAP 250 MG	99200020100110	Generic
CUVRIOR	TRIENTINE TETRAHYDROCHLORIDE TAB 300 MG	99200020200330	Brand
TRIENTINE HYDROCHLORIDE	TRIENTINE HCL CAP 500 MG	99200020100130	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - For Brand Syprine and Cuvrior, trial and failure, or intolerance to generic trientine

Product Name:Cuvrior, Brand Syprine	
Diagnosis	Wilson's disease
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
CUVRIOR	TRIENTINE TETRAHYDROCHLORIDE TAB 300 MG	99200020200330	Brand
SYPRINE	TRIENTINE HCL CAP 250 MG	99200020100110	Brand

Approval Criteria

1 - Diagnosis of Wilson's disease (i.e., hepatolenticular degeneration)

AND

2 - Submission of medical records (e.g., chart notes) documenting one of the following: [5]

- Presence of Kayser-Fleisher rings
- Serum ceruloplasmin (CPN) less than 20 mg/dL
- 24-hour urinary copper excretion greater than 100 mcg

- Liver biopsy with copper dry weight greater than 250 mcg/g
- ATP7B mutation via genetic testing

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to Depen (penicillamine) tablets

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, or intolerance to generic trientine

AND

5 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Hepatologist

3 . Endnotes

A. Cystine-binding thiol drugs should be offered to patients with cysteine stones who are unresponsive to dietary modification and urinary alkalinization [3]. Tiopronin should be considered first as it is possibly more effective and associated with fewer adverse events than d-penicillamine.

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Corlanor (ivabradine)

Prior Authorization Guideline

Guideline ID	GL-228826
Guideline Name	Corlanor (ivabradine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Corlanor (ivabradine)
Chronic Heart Failure Indicated to reduce the risk of hospitalization for worsening heart failure in patients with stable, symptomatic, chronic heart failure with left ventricular ejection fraction less than or equal to 35%, who are in sinus rhythm with a resting heart rate greater than or equal to 70 beats per minute and either are on maximally tolerated doses of beta-blockers or have a contraindication to beta-blocker use. **Heart Failure due to Dilated Cardiomyopathy (DCM)** Indicated for the treatment of stable symptomatic heart failure due to dilated cardiomyopathy (DCM) in pediatric patients aged 6 months and older, who are in sinus rhythm with an elevated heart rate. **Off Label Uses: Inappropriate Sinus Tachycardia (IST)** Has been used for the treatment of inappropriate sinus tachycardia (IST). [7]

2 . Criteria

Product Name:Brand Corlanor, generic ivabradine	
Diagnosis	Chronic Heart Failure
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CORLANOR	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Brand
CORLANOR	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Brand
CORLANOR	IVABRADINE HCL ORAL SOLN 5 MG/5ML (BASE EQUIV)	40700035102020	Brand
IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Generic
IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Generic

Approval Criteria

1 - Diagnosis of chronic heart failure [3, 5]

AND

2 - Patient has New York Heart Association (NYHA) Class II, III, or IV symptoms [3, 5, A]

AND

3 - Patient has a left ventricular ejection fraction of less than or equal to 35% [3, 5]

AND

4 - Patient is in sinus rhythm [3, 5]

AND

5 - Patient has a resting heart rate that is greater than or equal to 70 beats per minute [3, 5, E]

AND

6 - Trial and failure, contraindication, or intolerance to all of the following at a maximally tolerated dose: [10]

6.1 One of the following:

- Angiotensin converting enzyme (ACE) inhibitor (e.g., captopril, enalapril)
- Angiotensin II receptor blocker (ARB) (e.g., candesartan, valsartan)
- Angiotensin receptor-neprilysin inhibitor (ARNI) [e.g., Entresto (sacubitril and valsartan)]

AND

6.2 One of the following: [3, 5, 10, B-F]

- bisoprolol
- carvedilol
- metoprolol succinate extended-release

AND

6.3 Sodium-glucose co-transporter 2 (SGLT2) inhibitor [e.g., Jardiance (empagliflozin), Farxiga (dapagliflozin), Xigduo XR (dapagliflozin and metformn)]

AND

6.4 Mineralocorticoid receptor antagonist (MRA) [e.g., eplerenone, spironolactone]

AND

7 - Patient has been hospitalized for worsening heart failure in the previous 12 months [3]

AND

8 - Prescribed by or in consultation with a cardiologist

Product Name:Brand Corlanor, generic ivabradine	
Diagnosis	Heart Failure due to Dilated Cardiomyopathy
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CORLANOR	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Brand
CORLANOR	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Brand
CORLANOR	IVABRADINE HCL ORAL SOLN 5 MG/5ML (BASE EQUIV)	40700035102020	Brand
IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Generic
IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Generic

Approval Criteria

1 - Diagnosis of heart failure due to dilated cardiomyopathy

AND

2 - Patient has New York Heart Association (NYHA) Class II, III, or IV symptoms [6]

AND

3 - Patient is in sinus rhythm

AND

4 - Patient has an elevated heart rate

AND

5 - Trial and failure, contraindication, or intolerance to one of the following: [1, 4, 6]

- Beta blocker (e.g., bisoprolol, metoprolol succinate extended release)
- Angiotensin-converting enzyme (ACE) inhibitor (e.g., captopril, enalapril)
- Diuretic Agent (e.g., spironolactone, furosemide)

AND

6 - Prescribed by or in consultation with a cardiologist

Product Name:Brand Corlanor, generic ivabradine	
Diagnosis	Inappropriate Sinus Tachycardia (IST) [off-label]
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CORLANOR	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Brand
CORLANOR	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Brand
CORLANOR	IVABRADINE HCL ORAL SOLN 5 MG/5ML (BASE EQUIV)	40700035102020	Brand
IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Generic
IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Generic

Approval Criteria

1 - Diagnosis of inappropriate sinus tachycardia (IST) confirmed by both of the following: [7]

- Sinus heart rate greater than 100 beats per minute at rest
- A mean 24 hour heart rate greater than 90 beats per minute

AND

2 - Other causes of sinus tachycardia have been ruled out (e.g., hyperthyroidism, anemia, illicit stimulant drug use, caffeine, etc.) [7]

AND

3 - Provider attests that symptoms of IST are causing significant functional impairment or distress (e.g., palpitations, light-headedness, syncope, chest pain, dyspnea, etc.) [8, 9]

AND

4 - Prescribed by or in consultation with a cardiologist

Product Name:Brand Corlanor, generic ivabradine	
Diagnosis	All Indications
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CORLANOR	IVABRADINE HCL TAB 5 MG (BASE EQUIV)	40700035100320	Brand
CORLANOR	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Brand
CORLANOR	IVABRADINE HCL ORAL SOLN 5 MG/5ML (BASE EQUIV)	40700035102020	Brand

IVABRADINE HYDROCHLORIDE	IVABRADINE HCL TAB 7.5 MG (BASE EQUIV)	40700035100330	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. In the pivotal trial evaluating the efficacy of Corlanor in patients with heart failure, patients' heart failure was defined as New York Heart Association class II, III or IV [1, 3]
B. In the pivotal trial evaluating the efficacy of Corlanor in patients with heart failure, the main reasons for not achieving guideline-recommended doses of beta-blocker therapy were hypotension, fatigue, dyspnea, dizziness, history of cardiac decompensation, and bradycardia [1, 3]
C. In the pivotal trial evaluating the efficacy of Corlanor in patients with heart failure, the main reasons that patients were unable to receive beta-blocker therapy were due to a diagnosis of chronic obstructive pulmonary disease, hypotension or asthma [1, 3]
D. The following are examples of contraindications to beta-blocker therapy but is not a comprehensive list: severe bradycardia, decompensated cardiac failure, cardiogenic shock, second-or-third degree heart block, sick sinus syndrome (without a functional permanent pacemaker) [4]
E. Corlanor slows the heart rate by inhibiting the cardiac pacemaker If current and therefore heart rate should be at or above 70 beats per minute prior to initiation of therapy to ensure bradycardia does not ensue following initiation of therapy with Corlanor [2]
F. Per 2022 AHA/ACC/HFSA guideline for the management of Heart Failure, three beta blockers have been shown to be effective in reducing the risk of death in patients with HFrEF: bisoprolol, metoprolol succinate, and carvedilol. [10]

Prior Authorization Guideline

Guideline ID	GL-228394
Guideline Name	Cosela (trilaciclib) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cosela (trilaciclib)
Chemotherapy-induced myelosuppression Indicated to decrease the incidence of chemotherapy-induced myelosuppression in adult patients when administered prior to a platinum/etoposide-containing regimen or topotecan-containing regimen for extensive-stage small cell lung cancer (ES-SCLC).

2 . Criteria

Product Name:Cosela	
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COSELA	TRILACICLIB DIHYDROCHLORIDE FOR IV SOLN 300 MG	21756570202120	Brand

Approval Criteria

1 - Diagnosis of extensive-stage small cell lung cancer (ES-SCLC)

AND

2 - Patient is receiving one of the following anti-cancer chemotherapeutic regimens:

- Platinum/etoposide-containing regimen
- Topotecan-containing regimen

AND

3 - Infusion is completed within 4 hours prior to the start of chemotherapy

AND

4 - The interval between doses on sequential days will not be greater than 28 hours

Product Name:Cosela	
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
COSELA	TRILACICLIB DIHYDROCHLORIDE FOR IV SOLN 300 MG	21756570202120	Brand

Approval Criteria

1 - Diagnosis of extensive-stage small cell lung cancer (ES-SCLC)

AND

2 - Patient is receiving one of the following anti-cancer chemotherapeutic regimens:

- Platinum/etoposide-containing regimen
- Topotecan-containing regimen

AND

3 - Infusion is completed within 4 hours prior to the start of chemotherapy

AND

4 - The interval between doses on sequential days will not be greater than 28 hours

COSENTYX	SECUKINUMAB SUBCUTANEOUS PREF SYR 150 MG/ML (300 MG DOSE)	9025057500E530	Brand

Approval Criteria

1 - Diagnosis of moderate to severe plaque psoriasis

AND

2 - One of the following [2]:

- Greater than or equal to 3% body surface area involvement
- Severe scalp psoriasis
- Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Patient is 6 years of age or older

AND

4 - Prescribed by or in consultation with a dermatologist

AND

5 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

- corticosteroids (e.g., betamethasone, clobetasol)

- vitamin D analogs (e.g., calcitriol, calcipotriene)
- tazarotene
- calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

COSENTYX SENSOREADY PEN	SECUKINUMAB SUBCUTANEOUS AUTO-INJ 150 MG/ML (300 MG DOSE)	9025057500D530	Brand
COSENTYX UNOREADY	SECUKINUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 300 MG/2ML	9025057500D550	Brand
COSENTYX	SECUKINUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 75 MG/0.5ML	9025057500E510	Brand
COSENTYX	SECUKINUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/ML	9025057500E520	Brand
COSENTYX	SECUKINUMAB SUBCUTANEOUS PREF SYR 150 MG/ML (300 MG DOSE)	9025057500E530	Brand
COSENTYX	SECUKINUMAB IV SOLN 125 MG/5ML	90250575002050	Brand

Approval Criteria

1 - Diagnosis of active non-radiographic axial spondyloarthritis

AND

2 - Patient has objective signs of inflammation (e.g., C-reactive protein [CRP] levels above the upper limit of normal and/or sacroiliitis on magnetic resonance imaging [MRI], indicative of inflammatory disease, but without definitive radiographic evidence of structural damage on sacroiliac joints.) [1, 3]

AND

3 - Prescribed by or in consultation with a rheumatologist

AND

4 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [5]

Product Name:Cosentyx IV & SC	
Diagnosis	Non-radiographic Axial Spondyloarthritis (nr-axSpA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COSENTYX SENSOREADY PEN	SECUKINUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 150 MG/ML	9025057500D520	Brand
COSENTYX SENSOREADY PEN	SECUKINUMAB SUBCUTANEOUS AUTO-INJ 150 MG/ML (300 MG DOSE)	9025057500D530	Brand
COSENTYX UNOREADY	SECUKINUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 300 MG/2ML	9025057500D550	Brand
COSENTYX	SECUKINUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 75 MG/0.5ML	9025057500E510	Brand
COSENTYX	SECUKINUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/ML	9025057500E520	Brand
COSENTYX	SECUKINUMAB SUBCUTANEOUS PREF SYR 150 MG/ML (300 MG DOSE)	9025057500E530	Brand
COSENTYX	SECUKINUMAB IV SOLN 125 MG/5ML	90250575002050	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 5]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Function
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Product Name:Cosentyx SC	
Diagnosis	Enthesitis-Related Arthritis (ERA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

3 . Revision History

Date	Notes
12/20/2024	New Program

Cotellic (cobimetinib)

Prior Authorization Guideline

Guideline ID	GL-228824
Guideline Name	Cotellic (cobimetinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cotellic (cobimetinib)
Melanoma Indicated for the treatment of patients with unresectable or metastatic melanoma with a BRAF V600E or V600K mutation, in combination with vemurafenib. **Histiocytic Neoplasms** Indicated as a single agent for the treatment of adult patients with histiocytic neoplasms.

2 . Criteria

Product Name:Cotellic	
Diagnosis	Melanoma
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COTELLIC	COBIMETINIB FUMARATE TAB 20 MG (BASE EQUIVALENT)	21533530200320	Brand

Approval Criteria

1 - Diagnosis of unresectable or metastatic melanoma

AND

2 - One of the following: [A]

2.1 Patient has a BRAF V600E mutation as detected by a U.S. Food and Drug Administration (FDA)-approved test (e.g., cobas 4800 BRAF V600 Mutation Test) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

OR

2.2 Patient has a BRAF V600K mutation as detected by a U.S. Food and Drug Administration (FDA)-approved test (e.g., cobas 4800 BRAF V600 Mutation Test) or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Used in combination with Zelboraf (vemurafenib)*

Notes	*This product may require prior authorization.

Product Name:Cotellic	
Diagnosis	Histiocytic Neoplasms
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COTELLIC	COBIMETINIB FUMARATE TAB 20 MG (BASE EQUIVALENT)	21533530200320	Brand

Approval Criteria

1 - Diagnosis of histiocytic neoplasm

AND

2 - Used as monotherapy

Product Name:Cotellic	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
COTELLIC	COBIMETINIB FUMARATE TAB 20 MG (BASE EQUIVALENT)	21533530200320	Brand

Approval Criteria

1 - Patient has not experienced disease progression while on therapy

3 . Endnotes

A. The cobas 4800 BRAF V600 Mutation Test is an FDA approved option and was used in the pivotal trial. [2, 3] The cobas 4800 BRAF V600 Mutation Test is also listed as the FDA approved companion diagnostic device for Zelboraf (vemurafenib). [3]

Prior Authorization Guideline

Guideline ID	GL-229117
Guideline Name	Coverage of Off-Label Non-FDA Approved Indications
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/2/2007
P&T Revision Date:	11/21/2024

1 . Criteria

Product Name:A drug (non-anti-cancer chemotherapeutic regimen) used for an off-label indication or non-FDA approved indication	
Diagnosis	Off-label non-cancer indication
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Off-label use			
Non-FDA approved use			

non-fda			
off-label			
off			

Approval Criteria

1 - One of the following:

1.1 Diagnosis is supported as a use in American Hospital Formulary Service Drug Information (AHFS DI) [1]

OR

1.2 Diagnosis is supported in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of IIb or better (see DRUGDEX Strength of Recommendation table in Background section) [1]

OR

1.3 The use is supported by clinical research in two articles from major peer reviewed medical journals that present data supporting the proposed off-label use or uses as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal

Notes	Off-label use may be reviewed for medical necessity and denied as su ch if the off-label criteria are not met. Please refer to drug specific PA guideline for off-label criteria if available.

Product Name:A drug or biological in an anti-cancer chemotherapeutic regimen	
Diagnosis	Off-label cancer indication
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Off-label use			
Non-FDA approved use			

non-fda			
off-label			
off			

Approval Criteria

1 - One of the following:

1.1 Diagnosis is supported as a use in AHFS DI [2]

OR

1.2 Diagnosis is supported as a use in the National Comprehensive Cancer Network (NCCN) Drugs and Biologics Compendium with a Category of Evidence and Consensus of 1, 2A, or 2B (see NCCN Categories of Evidence and Consensus table in Background section) [2, A]

OR

1.3 Diagnosis is supported in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of Class I, Class IIa, or Class IIb (see DRUGDEX Strength of Recommendation table in Background section) [2]

OR

1.4 Diagnosis is supported as an indication in Clinical Pharmacology [2]

OR

1.5 Off-label use is supported in one of the published, peer-reviewed medical literature listed below: [2, B]

- American Journal of Medicine
- Annals of Internal Medicine
- Annals of Oncology
- Annals of Surgical Oncology
- Biology of Blood and Marrow Transplantation
- Blood

- Bone Marrow Transplantation
- British Journal of Cancer
- British Journal of Hematology
- British Medical Journal
- Cancer
- Clinical Cancer Research
- Drugs
- European Journal of Cancer (formerly the European Journal of Cancer and Clinical Oncology)
- Gynecologic Oncology
- International Journal of Radiation, Oncology, Biology, and Physics
- The Journal of the American Medical Association
- Journal of Clinical Oncology
- Journal of the National Cancer Institute
- Journal of the National Comprehensive Cancer Network (NCCN)
- Journal of Urology
- Lancet
- Lancet Oncology
- Leukemia
- The New England Journal of Medicine
- Radiation Oncology

OR

1.6 Diagnosis is supported as a use in Wolters Kluwer Lexi-Drugs rated as "Evidence Level A" with a "Strong" recommendation. (see Lexi-Drugs Strength of Recommendation table in Background section) [2, 4, 5]

Notes	Off-label use may be reviewed for medical necessity and denied as su ch if the off-label criteria are not met. Please refer to drug specific PA guideline for off-label criteria if available.

2 . Background

Clinical Practice Guidelines

DRUGDEX Strength of Recommendation [6]

Class	Recommendation	Description

Class I	Recommended	The given test or treatment has been proven useful, and should be performed or administered.
Class IIa	Recommended, In Most Cases	The given test or treatment is generally considered to be useful, and is indicated in most cases.
Class IIb	Recommended, in Some Cases	The given test or treatment may be useful, and is indicated in some, but not most, cases.
Class III	Not Recommended	The given test or treatment is not useful, and should be avoided
Class Indeterminate	Evidence Inconclusive	

NCCN Categories of Evidence and Consensus [A]

Category	Level of Consensus
1	Based upon high-level evidence, there is uniform NCCN consensus that the intervention is appropriate.
2A	Based upon lower-level evidence, there is uniform NCCN consensus that the intervention is appropriate.
2B	Based upon lower-level evidence, there is NCCN consens the intervention is appropriate.
3	Based upon any level of evidence, there is major NCCN disagreement that the intervention is appropriate.

Lexi-Drugs: Strength of Recommendation for Inclusion in Lexi-Drugs for Oncology Off-Label Use and Level of Evidence Scale for Oncology Off-Label Use [5]

Strength of Recommendation for Inclusion

Strong (for proposed off-label use)	The evidence persuasively supports the off-label use (ie, Level of Evidence A).
Equivocal (for proposed off-label use)	The evidence to support the off-label use is of uncertain clinical significance (ie, Level of Evidence B, C). Additional studies may be necessary to further define the role of this medication for the off-label use.
Against proposed off-label use	The evidence either advocates against the off-label use or suggests a lack of support for the off-label use (independent

	of Level of Evidence). Additional studies are necessary to define the role of this medication for the off-label use.

Level of Evidence Scale for Oncology Off-Label Use

A	**Consistent evidence from well-performed randomized, controlled trials or overwhelming evidence of some other form (eg, results of the introduction of penicillin treatment) to support off-label use. Further research is unlikely to change confidence in the estimate of benefit.**
B	**Evidence from randomized, controlled trials with important limitations (eg, inconsistent results, methodologic flaws, indirect, imprecise); or very strong evidence of some other research design. Further research (if performed) is likely to have an impact on confidence in the estimate of benefit and risk and may change the estimate.**
C	**Evidence from observational studies (eg, retrospective case series/reports providing significant impact on patient care); unsystematic clinical experience; or potentially flawed randomized, controlled trials (eg, when limited options exist for condition). Any estimate of effect is uncertain.**
G	**Use has been substantiated by inclusion in at least one evidence-based or consensus-based clinical practice guideline.**

3 . Endnotes

A. NCCN Categories of Evidence and Consensus. Category 1: The recommendation is based on high-level evidence (i.e., high-powered randomized clinical trials or meta-analyses), and the NCCN Guideline Panel has reached uniform consensus that the recommendation is indicated. In this context, uniform means near unanimous positive support with some possible neutral positions. Category 2A: The recommendation is based on lower level evidence, but despite the absence of higher level studies, there is uniform consensus that the recommendation is appropriate. Lower level evidence is interpreted broadly, and runs the gamut from phase II to large cohort studies to case series to individual practitioner experience. Importantly, in many instances, the retrospective studies are derived from clinical experience of treating large numbers of patients at a member institution, so NCCN Guideline Panel Members have first-hand knowledge of the data. Inevitably, some recommendations must address clinical situations for which limited or no data exist. In these instances the congruence of experience-based judgments provides an informed if not confirmed direction for optimizing patient care. These recommendations carry the implicit recognition that they may be superseded as higher level evidence becomes available or as outcomes-based information becomes more prevalent. Category 2B: The recommendation is based on lower level evidence, and there is nonuniform consensus that the recommendation should be made. In these instances, because the evidence is not conclusive, institutions take different approaches to the management of a particular clinical scenario. This nonuniform consensus does not represent a major disagreement, rather it recognizes that given imperfect information, institutions may adopt different approaches. A Category 2B designation should signal to the user that more than one approach can be inferred from the existing data. Category 3: Including the recommendation has engendered a major disagreement among the NCCN Guideline Panel Members. The level of evidence is not pertinent in this category, because experts can disagree about the significance of high level trials. Several circumstances can cause major disagreements. For example, if substantial data exist about two interventions but they have never been directly compared in a randomized trial, adherents to one set of data may not accept the interpretation of the other side's results. Another situation resulting in a Category 3 designation is when experts disagree about how trial data can be generalized. An example of this is the recommendation for internal mammary node radiation in postmastectomy radiation therapy. One side believed that because the randomized studies included this modality, it must be included in the recommendation. The other side believed, based on the documented additional morbidity and the role of internal mammary radiation therapy in other studies, that this was not necessary. A Category 3 designation alerts users to a major interpretation issue in the data and directs them to the manuscript for an explanation of the controversy. [3]

B. Abstracts (including meeting abstracts) are excluded from consideration. When evaluating peer-reviewed medical literature, the following (among other things) should be considered: 1) Whether the clinical characteristics of the beneficiary and the cancer are adequately represented in the published evidence 2) Whether the administered chemotherapy regimen is adequately represented in the published evidence. 3) Whether the reported study outcomes represent clinically meaningful outcomes experienced by patients. 4) Whether the study is appropriate to address the clinical question. The following should be considered: a) Whether the experimental design, in light of the drugs and conditions under investigation, is appropriate to address the investigative question. (For example, in some clinical studies, it may be unnecessary or not feasible to use

randomization, double blind trials, placebos, or crossover.); b) That non-randomized clinical trials with a significant number of subjects may be a basis for supportive clinical evidence for determining accepted uses of drugs; and c) That case reports are generally considered uncontrolled and anecdotal information and do not provide adequate supportive clinical evidence for determining accepted uses of drugs. [2]

Date	Notes

1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233262
Guideline Name	Crinone Gel 8% Quantity Limit
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	9/18/2024
P&T Revision Date:	

Note:

This quantity limit program is for the 8% strength of Crinone only. Requests for Crinone 4% should be reviewed using the General Quantity Limit Guideline.

1 . Indications

Drug Name: Crinone Gel 8%
Assisted Reproductive Technology Indicated for progesterone supplementation or replacement as part of an Assisted Reproductive Technology (“ART”) treatment for infertile women with progesterone deficiency. **Secondary Amenorrhea** Indicated for the treatment of secondary amenorrhea. Crinone 8% is indicated for use in women who have failed to respond to treatment with Crinone 4%.

2 . Criteria

Product Name:Crinone 8%	
Diagnosis	Assisted Reproductive Technology (ART)
Approval Length	12 Week(s)
Guideline Type	Quantity Limit

Product Name	Generic Name	GPI	Brand/Generic
CRINONE	PROGESTERONE VAGINAL GEL 8%	55370060004020	Brand

Approval Criteria

1 - Quantity requested is intended for use as part of an Assisted Reproductive Technology (ART) treatment for infertile women

AND

2 - One of the following:

2.1 Dose or quantity requested is supported in the dosage and administration section of the manufacturer's prescribing information

OR

2.2 Dose or quantity is supported by one of the following compendia:

- American Hospital Formulary Service Drug Information
- Micromedex DRUGDEX System

AND

3 - Trial and failure, contraindication, or intolerance to Endometrin

AND

4 - Prescribed by or in consultation with a reproductive endocrinologist

3 . References

Guideline Note:

Effective Date:	2/18/2025
P&T Approval Date:	
P&T Revision Date:	8/15/2024

1 . Indications

Drug Name: Crysvita (burosumab-twza)
X-Linked Hypophosphatemia (XLH) Indicated for the treatment of X-linked hypophosphatemia (XLH) in adult and pediatric patients 6 months of age and older. **Tumor-Induced Osteomalacia** Indicated for the treatment of FGF23-related hypophosphatemia in tumor-induced osteomalacia (TIO) associated with phosphaturic mesenchymal tumors that cannot be curatively resected or localized in adult and pediatric patients 2 years of age and older.

2 . Criteria

Product Name:Crysvita	
Diagnosis	X-Linked Hypophosphatemia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CRYSVITA	BUROSUMAB-TWZA INJ 10 MG/ML	30909510602010	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 20 MG/ML	30909510602020	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 30 MG/ML	30909510602030	Brand

Approval Criteria

1 - Diagnosis of X-linked hypophosphatemia

AND

2 - Prescribed by or in consultation with one of the following:

- Endocrinologist
- Specialist experienced in the treatment of inborn errors of metabolism

AND

3 - One of the following:

3.1 Patient is 6 months to 17 years of age

OR

3.2 Both of the following:

3.2.1 Patient is 18 years of age or older

AND

3.2.2 Patient is a candidate for pharmacologic therapy by meeting one of the following: [2]

- Spontaneous insufficiency fractures
- Pending orthopedic procedures (e.g., joint replacement)
- Biochemical evidence of osteomalacia (i.e., elevated serum alkaline phosphatase)
- Disabling skeletal pain

AND

4 - Trial and failure, contraindication, or intolerance to conventional treatment with both of the following: [2, 3]

- Phosphate supplementation
- Vitamin D analog-based therapy (e.g, calcitriol, paricalcitol, doxercalciferol)

Product Name:Crysvita	
Diagnosis	X-Linked Hypophosphatemia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CRYSVITA	BUROSUMAB-TWZA INJ 10 MG/ML	30909510602010	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 20 MG/ML	30909510602020	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 30 MG/ML	30909510602030	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in rickets, improvement in serum phosphorus or Radiographic Global Impression of Change [RGI-C] scores)

Product Name:Crysvita	
Diagnosis	Tumor-Induced Osteomalacia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CRYSVITA	BUROSUMAB-TWZA INJ 10 MG/ML	30909510602010	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 20 MG/ML	30909510602020	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 30 MG/ML	30909510602030	Brand

Approval Criteria

1 - Diagnosis of FGF23-related hypophosphatemia in Tumor-Induced Osteomalacia (TIO)

AND

2 - Tumor could not be curatively resected or localized

AND

3 - Patient is 2 years of age or older

AND

4 - Trial and failure, contraindication, or intolerance to conventional treatment with both of the following: [4, 5]

- Phosphate supplementation
- Vitamin D analog-based therapy (e.g., calcitriol, paricalcitol, doxercalciferol)

AND

5 - Prescribed by or in consultation with one of the following:

- Oncologist
- Endocrinologist

Product Name:Crysvita	
Diagnosis	Tumor-Induced Osteomalacia
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CRYSVITA	BUROSUMAB-TWZA INJ 10 MG/ML	30909510602010	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 20 MG/ML	30909510602020	Brand
CRYSVITA	BUROSUMAB-TWZA INJ 30 MG/ML	30909510602030	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increase in serum phosphorus level, improvement in osteoid thickness, osteoid surface, osteoid volume, mineralization lag time, or improvement as indicated by bone biopsy)

Prior Authorization Guideline

Guideline ID	GL-228830
Guideline Name	Daliresp (roflumilast)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Daliresp (roflumilast)
Chronic obstructive pulmonary disorder (COPD) Indicated as a treatment to reduce the risk of COPD exacerbations in patients with severe COPD associated with chronic bronchitis and a history of exacerbations. Limitations of Use: Daliresp is not a bronchodilator and is not indicated for the relief of acute bronchospasm. Daliresp 250 mcg is a starting dose, for the first 4 weeks of treatment only and is not the effective (therapeutic) dose.

2 . Criteria

Product Name:Brand Daliresp, generic roflumilast	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DALIRESP	ROFLUMILAST TAB 500 MCG	44450065000320	Brand
DALIRESP	ROFLUMILAST TAB 250 MCG	44450065000310	Brand
ROFLUMILAST	ROFLUMILAST TAB 250 MCG	44450065000310	Generic
ROFLUMILAST	ROFLUMILAST TAB 500 MCG	44450065000320	Generic

Approval Criteria

1 - Diagnosis of chronic obstructive pulmonary disease (COPD) [A, B]

AND

2 - History of COPD exacerbations which require the use of systemic corticosteroids, antibiotics, or hospital admission [C]

AND

3 - Trial and failure, intolerance, or contraindication to two prior therapies for COPD (e.g., Combivent, Spiriva)

AND

4 - Trial and failure or intolerance to generic roflumilast (Applies to brand Daliresp only)

Notes	Daliresp 250 mcg is a starting dose, for the first 4 weeks of treatment only and is not the effective (therapeutic) dose.

Product Name:Brand Daliresp, generic roflumilast	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DALIRESP	ROFLUMILAST TAB 500 MCG	44450065000320	Brand
ROFLUMILAST	ROFLUMILAST TAB 250 MCG	44450065000310	Generic
ROFLUMILAST	ROFLUMILAST TAB 500 MCG	44450065000320	Generic
DALIRESP	ROFLUMILAST TAB 250 MCG	44450065000310	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Trial and failure or intolerance to generic roflumilast (Applies to brand Daliresp only)

Notes	Daliresp 250 mcg is a starting dose, for the first 4 weeks of treatment only and is not the effective (therapeutic) dose.

3 . Endnotes

A. Patients enrolled in the pivotal trials had a forced expiratory volume in 1 second [FEV1] less than or equal to 50% of predicted and FEV1/forced vital capacity [FVC] less than 0.7). [1-3]
B. According to the Global Initiative for Chronic Obstructive Lung Disease (GOLD) treatment guidelines, moderate COPD is defined as FEV1 less than 80% but greater than or equal to 50%; severe COPD is defined as FEV1 less than 50% but greater than or equal to 30%; and very severe COPD is defined as FEV1 less than 30%. [4]
C. In the pivotal studies the rate of moderate exacerbations was defined as requiring intervention with systemic glucocorticosteroids. Severe exacerbations were defined as leading to hospitalization and/or to death. [1]

Prior Authorization Guideline

Guideline ID	GL-228827
Guideline Name	Daraprim (pyrimethamine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Daraprim (pyrimethamine)
Treatment of toxoplasmosis Indicated for the treatment of toxoplasmosis when used conjointly with a sulfonamide, since synergism exists with this combination.

2 . Criteria

Product Name:Brand Daraprim, generic pyrimethamine	
Diagnosis	Toxoplasmosis
Approval Length	12 Months [A, B]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

DARAPRIM	PYRIMETHAMINE TAB 25 MG	13000040000310	Brand
PYRIMETHAMINE	PYRIMETHAMINE TAB 25 MG	13000040000310	Generic

Approval Criteria

1 - Both of the following:

1.1 One of the following:

1.1.1 Patient is using pyrimethamine for one of the following: [2, 3]

- Active treatment of toxoplasmosis (e.g., toxoplasmic encephalitis, ocular toxoplasmosis)
- Secondary prophylaxis of toxoplasmosis
- Treatment of congenital toxoplasmosis

OR

1.1.2 All of the following: [2]

1.1.2.1 Patient is using pyrimethamine for primary prophylaxis of toxoplasmosis

AND

1.1.2.2 Patient has experienced intolerance to prior prophylaxis with trimethoprim-sulfamethoxazole (TMP-SMX)

AND

1.1.2.3 One of the following:

1.1.2.3.1 Patient has been re-challenged with trimethoprim-sulfamethoxazole (TMP-SMX) using a desensitization protocol and is still unable to tolerate

OR

1.1.2.3.2 Evidence of life-threatening reaction to trimethoprim-sulfamethoxazole (TMP-SMX) in the past (e.g., toxic epidermal necrolysis [TEN], Stevens-Johnson syndrome)

AND

1.2 Prescribed by or in consultation with an infectious disease specialist

Product Name:Brand Daraprim, generic pyrimethamine	
Diagnosis	Malaria (off-label)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DARAPRIM	PYRIMETHAMINE TAB 25 MG	13000040000310	Brand
PYRIMETHAMINE	PYRIMETHAMINE TAB 25 MG	13000040000310	Generic

Approval Criteria

1 - Requests for coverage of any pyrimethamine products for the treatment and/or prophylaxis of malaria are not authorized and will not be approved. The use of pyrimethamine for the treatment and/or prophylaxis of malaria is not recommended by the Centers for Disease Control and Prevention (CDC) [5]

3 . Endnotes

A. Prescriber should consider discontinuation of primary prophylaxis if CD4 is greater than 200 cells/mm3 for more than 3 months after institution of combination antiretroviral therapy. [2]
B. Prescriber should consider discontinuation of secondary prophylaxis if CD4 is greater than 200 cells/mm3 for more than 6 months after institution of combination antiretroviral therapy. [2]

Prior Authorization Guideline

Guideline ID	GL-228829
Guideline Name	Darzalex (daratumumab), Darzalex Faspro (daratumumab and hyaluronidase-fihj) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Darzalex (daratumumab)
Multiple Myeloma - Monotherapy Indicated as monotherapy, for the treatment of adult patients with multiple myeloma who have received at least three prior lines of therapy including a proteasome inhibitor (PI) and an immunomodulatory agent or who are double-refractory to a PI and an immunomodulatory agent. **Multiple Myeloma - Combination therapy** Indicated in combination with lenalidomide and dexamethasone, or bortezomib and dexamethasone, for the treatment of adult patients with multiple myeloma who have received at least one prior therapy. **Multiple Myeloma - Combination therapy** Indicated in combination with carfilzomib and dexamethasone in adult patients with relapsed or refractory multiple myeloma who have received one to three prior lines of therapy. **Multiple Myeloma - Combination therapy** Indicated in combination with pomalidomide and dexamethasone for the treatment of adult patients with multiple myeloma who have received at least two prior therapies including lenalidomide and a proteasome inhibitor.

Newly Diagnosed Multiple Myeloma Indicated in combination with bortezomib, melphalan, and prednisone for the treatment of adult patients with newly diagnosed multiple myeloma who are ineligible for autologous stem cell transplant.

Newly Diagnosed Multiple Myeloma Indicated in combination with lenalidomide and dexamethasone for the treatment of adult patients with newly diagnosed multiple myeloma who are ineligible for autologous stem cell transplant.

Newly Diagnosed Multiple Myeloma Indicated in combination with bortezomib, thalidomide, and dexamethasone for the treatment of adult patients with newly diagnosed multiple myeloma who are eligible for autologous stem cell transplant.

Drug Name: Darzalex Faspro (daratumumab and hyaluronidase-fihj)

Multiple Myeloma - Monotherapy Indicated as monotherapy, for the treatment of adult patients with multiple myeloma who have received at least three prior lines of therapy including a proteasome inhibitor (PI) and an immunomodulatory agent or who are double-refractory to a PI and an immunomodulatory agent.

Multiple Myeloma - Combination Indicated in combination with lenalidomide and dexamethasone or bortezomib and dexamethasone, for the treatment of adult patients with multiple myeloma who have received at least one prior therapy.

Multiple Myeloma - Combination Indicated in combination with pomalidomide and dexamethasone for the treatment of adult patients with multiple myeloma who have received at least one prior line of therapy including lenalidomide and a proteasome inhibitor.

Multiple Myeloma - Combination Indicated in combination with carfilzomib and dexamethasone in adult patients with relapsed or refractory multiple myeloma who have received one to three prior lines of therapy.

Newly Diagnosed Multiple Myeloma Indicated in combination with lenalidomide and dexamethasone for the treatment of adult patients with newly diagnosed multiple myeloma who are ineligible for autologous stem cell transplant.

Newly Diagnosed Multiple Myeloma Indicated in combination with bortezomib, melphalan and prednisone for the treatment of adult patients with newly diagnosed multiple myeloma who are ineligible for autologous stem cell transplant.

Newly Diagnosed Multiple Myeloma Indicated in combination with bortezomib, thalidomide, and dexamethasone for the treatment of adult patients with newly diagnosed multiple myeloma who are eligible for autologous stem cell transplant.

Newly Diagnosed Multiple Myeloma Indicated in combination with bortezomib, lenalidomide, and dexamethasone for induction and consolidation in newly diagnosed patients who are eligible for autologous stem cell transplant.

Light Chain (AL) Amyloidosis Indicated in combination with bortezomib, cyclophosphamide, and dexamethasone for the treatment of adult patients with newly diagnosed light chain (AL) amyloidosis. This indication is approved under accelerated approval based on response rate.

Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial(s). Limitations of Use: DARZALEX FASPRO is not indicated and is not recommended for the treatment of patients with light chain (AL) amyloidosis who have NYHA Class IIIB or Class IV cardiac disease or Mayo Stage IIIB outside of controlled clinical trials.

2 . Criteria

Product Name:Darzalex	
Diagnosis	Relapsed/Refractory Multiple Myeloma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DARZALEX	DARATUMUMAB IV SOLN 100 MG/5ML	21354027002020	Brand
DARZALEX	DARATUMUMAB IV SOLN 400 MG/20ML	21354027002030	Brand

Approval Criteria

1 - Diagnosis of multiple myeloma

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Used as monotherapy

AND

2.1.2 One of the following:

2.1.2.1 Patient has received at least three prior treatment regimens which included both of the following:

- Proteasome inhibitor (e.g., bortezomib [Velcade], carfilzomib [Kyprolis])
- Immunomodulatory agent (e.g., lenalidomide [Revlimid], thalidomide [Thalomid])

OR

2.1.2.2 Patient is double-refractory to a proteasome inhibitor and an immunomodulatory agent

OR

2.2 Both of the following:

2.2.1 Used in combination with one of the following treatment regimens:

- lenalidomide and dexamethasone
- bortezomib and dexamethasone
- carfilzomib and dexamethasone

AND

2.2.2 Patient has received at least one prior therapy (e.g., bortezomib [Velcade], carfilzomib [Kyprolis], ixazomib [Ninlaro], lenalidomide [Revlimid], thalidomide [Thalomid]) [2]

OR

2.3 Both of the following:

2.3.1 Used in combination with both of the following:

- pomalidomide
- dexamethasone

AND

2.3.2 Patient has received at least two prior therapies including lenalidomide and a proteasome inhibitor (e.g., bortezomib [Velcade], carfilzomib [Kyprolis])

Product Name:Darzalex

2.2.2 One of the following:

2.2.2.1 Used in combination with all of the following:

- bortezomib
- thalidomide
- dexamethasone

OR

2.2.2.2 Used in combination with all of the following: (2)

- bortezomib
- lenalidomide
- dexamethasone

Product Name:Darzalex Faspro	
Diagnosis	Light Chain Amyloidosis
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DARZALEX FASPRO	DARATUMUMAB-HYALURONIDASE-FIHJ INJ 1800-30000 MG-UNIT/15ML	21990002152020	Brand

Approval Criteria

1 - Newly diagnosed light chain (AL) amyloidosis

AND

2 - Used in combination with ALL of the following:

- Bortezomib
- Cyclophosphamide
- Dexamethasone

AND

3 - All of the following: [3]

- Patient does not have New York Heart Association (NYHA) Class IIIB disease
- Patient does not have New York Heart Association (NYHA) Class IV disease
- Patient does not have Mayo Stage IIIB disease

Product Name:Darzalex Faspro	
Diagnosis	Light Chain Amyloidosis
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DARZALEX FASPRO	DARATUMUMAB-HYALURONIDASE-FIHJ INJ 1800-30000 MG-UNIT/15ML	21990002152020	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming newly diagnosed light chain (AL) amyloidosis

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming medication is being used in combination with ALL of the following:

- Bortezomib
- Cyclophosphamide
- Dexamethasone

AND

3 - All of the following: [3]

- Patient does not have New York Heart Association (NYHA) Class IIIB disease
- Patient does not have New York Heart Association (NYHA) Class IV disease
- Patient does not have Mayo Stage IIIB disease

Product Name:Darzalex, Darzalex Faspro	
Diagnosis	All Indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DARZALEX FASPRO	DARATUMUMAB-HYALURONIDASE-FIHJ INJ 1800-30000 MG-UNIT/15ML	21990002152020	Brand

Daurismo (glasdegib)

Prior Authorization Guideline

Guideline ID	GL-228396
Guideline Name	Daurismo (glasdegib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Daurismo (glasdegib)
Acute Myeloid Leukemia (AML) Indicated for use in combination with low-dose cytarabine, for the treatment of newly-diagnosed acute myeloid leukemia (AML) in adult patients who are greater than or equal to 75 years old or who have comorbidities that preclude use of intensive induction chemotherapy.

2 . Criteria

Product Name:Daurismo	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DAURISMO	GLASDEGIB MALEATE TAB 25 MG (BASE EQUIVALENT)	21370030300320	Brand
DAURISMO	GLASDEGIB MALEATE TAB 100 MG (BASE EQUIVALENT)	21370030300335	Brand

Approval Criteria

1 - Diagnosis of newly-diagnosed acute myeloid leukemia (AML)

AND

2 - Used in combination with low-dose cytarabine

AND

3 - One of the following:

3.1 Patient is greater than or equal to 75 years old

OR

3.2 Patient has comorbidities that preclude use of intensive induction chemotherapy [A]

Product Name:Daurismo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DAURISMO	GLASDEGIB MALEATE TAB 25 MG (BASE EQUIVALENT)	21370030300320	Brand
DAURISMO	GLASDEGIB MALEATE TAB 100 MG (BASE EQUIVALENT)	21370030300335	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Examples of comorbid conditions are severe cardiac disease, ECOG performance status greater than or equal to 2, or baseline creatinine greater than 1.3 mg/dL. [2]

Prior Authorization Guideline

Guideline ID	GL-228636
Guideline Name	Daybue (trofinetide) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Daybue (trofinetide)
Rett Syndrome Indicated for the treatment of Rett syndrome in adults and pediatric patients 2 years of age and older.

2 . Criteria

Product Name:Daybue	
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DAYBUE	TROFINETIDE ORAL SOLN 200 MG/ML	74653075002020	Brand

Approval Criteria

1 - Diagnosis of Rett syndrome

AND

2 - One of the following:

2.1 Presence of ALL of the following clinical signs and symptoms: [3-8]

- A pattern of development, regression, then recovery or stabilization
- Partial or complete loss of purposeful hand skills such as grasping with fingers, reaching for things, or touching things on purpose
- Partial or complete loss of spoken language
- Repetitive hand movements, such as wringing the hands, washing, squeezing, clapping, or rubbing
- Gait abnormalities, including walking on toes or with an unsteady, wide-based, stiff-legged gait

OR

2.2 Molecular genetic testing confirms mutations in the MECP2 gene

AND

3 - Patient is 2 years of age or older

AND

4 - Prescribed by or in consultation with one of the following: [A, 2]

- Geneticist

- Neurologist

Product Name:Daybue	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DAYBUE	TROFINETIDE ORAL SOLN 200 MG/ML	74653075002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Daybue	
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DAYBUE	TROFINETIDE ORAL SOLN 200 MG/ML	74653075002020	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of Rett syndrome

AND

2 - Submission of medical records (e.g., chart notes) confirming one of the following:

2.1 Presence of ALL of the following clinical signs and symptoms: [3-8]

- A pattern of development, regression, then recovery or stabilization

- Partial or complete loss of purposeful hand skills such as grasping with fingers, reaching for things, or touching things on purpose
- Partial or complete loss of spoken language
- Repetitive hand movements, such as wringing the hands, washing, squeezing, clapping, or rubbing
- Gait abnormalities, including walking on toes or with an unsteady, wide-based, stiff-legged gait

OR

2.2 Molecular genetic testing confirms mutations in the MECP2 gene

AND

3 - Patient is 2 years of age or older

AND

4 - Prescribed by or in consultation with one of the following: [A, 2]

- Geneticist
- Neurologist

3 . Endnotes

A. A neurologist, or geneticist should be consulted to confirm the diagnosis of Rett syndrome. [9]

Prior Authorization Guideline

Guideline ID	GL-228832
Guideline Name	Deferasirox products
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Exjade (deferasirox), deferasirox tablet, Jadenu (deferasirox), Jadenu Sprinkle (deferasirox)
Chronic Iron Overload Due to Blood Transfusions (Transfusional Iron Overload) Indicated for the treatment of chronic iron overload due to blood transfusions (transfusional hemosiderosis) in patients 2 years of age and older. Limitations of Use: The safety and efficacy of deferasirox when administered with other iron chelation therapy have not been established. **Treatment of Chronic Iron Overload in Non-Transfusion-Dependent Thalassemia Syndromes** Indicated for the treatment of chronic iron overload in patients 10 years of age and older with non-transfusion-dependent thalassemia (NTDT) syndromes and with a liver iron concentration (LIC) of at least 5 milligrams of iron per gram of liver dry weight (mg Fe/g dw) and a serum ferritin greater than 300 mcg/L. Limitations of Use: The safety and efficacy of deferasirox when administered with other iron chelation therapy have not been established. **Off Label Uses: Myelodysplastic syndrome (MDS)** Low to intermediate risk myelodysplastic syndrome (MDS) for management of iron overload and in potential transplant patients who have received more than 20 red blood cell transfusions [11]

2 . Criteria

Product Name:Brand Jadenu, Brand Jadenu Sprinkle, Brand Exjade	
Diagnosis	Chronic iron overload due to blood transfusions (transfusional hemosiderosis)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JADENU	DEFERASIROX TAB 90 MG	93100025000320	Brand

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228834
Guideline Name	Demser (metyrosine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Demser (metyrosine)
Pheochromocytoma Indicated for the treatment of patients with pheochromocytoma for preoperative preparation of patients for surgery, management of patients when surgery is contraindicated, and chronic treatment of patients with malignant pheochromocytoma. Metyrosine capsules are not recommended for the control of essential hypertension.

2 . Criteria

Product Name:Brand Demser, generic metyrosine	
Diagnosis	Preoperative preparation
Approval Length	1 Time(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
METYROSINE	METYROSINE CAP 250 MG	36300025000110	Generic
DEMSER	METYROSINE CAP 250 MG	36300025000110	

Approval Criteria

1 - Diagnosis of pheochromocytoma confirmed by one of the following biochemical testing:

- plasma free metanephrines
- urinary fractioned metanephrines

AND

2 - Medication is being used for preoperative preparation

AND

3 - Trial and failure, contraindication, or intolerance to both of the following:

- alpha-adrenergic blocker (e.g., phenoxybenzamine, doxazosin, terazosin)
- beta-adrenergic blocker (e.g., propranolol, metoprolol)

AND

4 - Prescribed by or in consultation with one of the following:

- Endocrinologist
- Endocrine surgeon

Product Name:Brand Demser, generic metyrosine	
Diagnosis	Treatment of pheochromocytoma
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
METYROSINE	METYROSINE CAP 250 MG	36300025000110	Generic
DEMSER	METYROSINE CAP 250 MG	36300025000110	

Approval Criteria

1 - Diagnosis of pheochromocytoma confirmed by one of the following biochemical testing:

- plasma free metanephrines
- urinary fractioned metanephrines

AND

2 - Patient with hormonally active (catecholamine excess) pheochromocytoma

AND

3 - One of the following:

3.1 Patient is not a candidate for surgery

OR

3.2 Chronic treatment due to malignant pheochromocytoma

AND

4 - Patient has not reached normotension after treatment with a selective alpha-1-adrenergic blocker (e.g., doxazosin, terazosin) and beta-adrenergic blocker (e.g., propranolol, metoprolol)

AND

5 - Medication will not be used to control essential hypertension

AND

6 - Prescribed by or in consultation with one of the following:

- Endocrinologist
- Provider who specializes in the management of pheochromocytoma

Product Name:Brand Demser, generic metyrosine	
Diagnosis	Treatment of pheochromocytoma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
METYROSINE	METYROSINE CAP 250 MG	36300025000110	Generic
DEMSER	METYROSINE CAP 250 MG	36300025000110	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., decreased frequency and severity of hypertensive attacks)

3 . References

Prior Authorization Guideline

Guideline ID	GL-228398
Guideline Name	Diabetic Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Riomet (metformin)
Type 2 diabetes mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in adults and pediatric patients 10 years of age and older with type 2 diabetes mellitus.
Drug Name: Cycloset (bromocriptine)
Type 2 diabetes mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) Cycloset should not be used to treat type 1 diabetes or diabetic ketoacidosis; 2) Limited efficacy data in combination with thiazolidinediones; 3) Efficacy has not been confirmed in combination with insulin.

2 . Criteria

Product Name:Cycloset, Brand Riomet

Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
CYCLOSET	BROMOCRIPTINE MESYLATE TAB 0.8 MG (BASE EQUIVALENT)	27574020100320	Brand
RIOMET	METFORMIN HCL ORAL SOLN 500 MG/5ML	27250050002020	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (of a minimum 30-day supply), intolerance, or contraindication to one of the following generics:

- metformin
- metformin ER
- glipizide-metformin
- glyburide-metformin
- pioglitazone-metformin

Prior Authorization Guideline

Guideline ID	GL-241255
Guideline Name	Diabetic GLP-1 Agonists
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/21/2025

1 . Indications

Drug Name: Byetta (exenatide injection)
Type 2 Diabetes Mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) Byetta is not indicated for use in patients with type 1 diabetes, 2) Byetta contains exenatide and should not be used with other products containing the active ingredient exenatide. 3) Byetta has not been studied in patients with a history of pancreatitis. Consider other antidiabetic therapies in patients with a history of pancreatitis.
Drug Name: Bydureon BCise (exenatide extended-release)
Type 2 Diabetes Mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in adults and pediatric patients aged 10 years and older with type 2 diabetes mellitus. Limitations of Use: 1) Bydureon BCise is not recommended as first-line therapy for patients who have inadequate glycemic control on diet and exercise because of the uncertain relevance of the rat thyroid C-cell tumor findings to humans, 2) Bydureon BCise is not indicated for use in patients with type 1 diabetes mellitus, 3) Bydureon BCise is an extended-release formulation of exenatide and should not be used with other products containing the

active ingredient exenatide, 4) Bydureon BCise has not been studied in patients with a history of pancreatitis. Consider other antidiabetic therapies in patients with a history of pancreatitis.
Drug Name: Mounjaro (tirzepatide)
Type 2 Diabetes Mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: Mounjaro has not been studied in patients with a history of pancreatitis. It is not indicated for use in patients with type 1 diabetes mellitus.
Drug Name: Trulicity (dulaglutide)
Type 2 Diabetes Mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in adults and pediatric patients 10 years of age and older with type 2 diabetes mellitus, and is indicated to reduce the risk of major adverse cardiovascular events (cardiovascular death, non-fatal myocardial infarction, or non-fatal stroke) in adults with type 2 diabetes mellitus who have established cardiovascular disease or multiple cardiovascular risk factors. Limitations of Use: 1) Trulicity has not been studied in patients with a history of pancreatitis. Consider other antidiabetic therapies in patients with a history of pancreatitis, 2) should not be used in patients with type 1 diabetes mellitus, 3) has not been studied in patients with severe gastrointestinal disease, including severe gastroparesis and is therefore not recommended in these patients.
Drug Name: Victoza (liraglutide injection)
Type 2 Diabetes Mellitus Indicated as an adjunct to diet and exercise to improve glycemic control in patients 10 years and older with type 2 diabetes mellitus, and is indicated to reduce the risk of major adverse cardiovascular events (cardiovascular death, non-fatal myocardial infarction, or non-fatal stroke) in adults with type 2 diabetes mellitus and established cardiovascular disease. Limitations of Use: 1) Victoza should not be used in patients with type 1 diabetes mellitus, 2) contains liraglutide and should not be coadministered with other liraglutide-containing products.

LIRAGLUTIDE	LIRAGLUTIDE SOLN PEN-INJECTOR 18 MG/3ML (6 MG/ML)	2717005000D220	Generic

Approval Criteria

1 - One of the following:

1.1 For patients requiring ongoing drug treatment for type 2 diabetes mellitus, submission of medical records (e.g., chart notes) confirming diagnosis of type 2 diabetes mellitus

OR

1.2 Submission of medical records (e.g., chart notes) confirming diagnosis of type 2 diabetes mellitus as evidenced by one of the following laboratory values:

- A1C greater than or equal to 6.5%
- Fasting plasma glucose (FPG) greater than or equal to 126 mg/dL
- 2-hour plasma glucose (PG) greater than or equal to 200 mg/dL) during OGTT (oral glucose tolerance test)
- Random plasma glucose greater than or equal to 200 mg/dL in patient with classic symptoms of hyperglycemia or hyperglycemic crisis

AND

2 - One of the following:

2.1 For Byetta, Mounjaro patient is 18 years of age or older

OR

2.2 For Bydureon Bcise, Trulicity, or liraglutide, patient is 10 years of age or older

AND

3 - Medication is not being co-administered with any of the following:

- GLP-1 receptor agonists (e.g., Victoza, Ozempic, Rybelsus, Trulicity, Wegovy)
- Tirzepatide-containing products (e.g., Mounjaro)

Notes	*If being used for any other indications, deny the case for medical nec essity and do not review for off-label use. **If patient meets criteria above, please approve at GPI-10. ***If being used for weight loss or obesity, deny as plan exclusion

Notes	* If patient meets criteria above, please approve at GPI-10. **If being used for weight loss or obesity, deny as plan exclusion

3 . Endnotes

A. In people with CKD, established CVD or multiple risk factors for CVD, the decision to use a GLP-1 RA with proven benefit should be independent of background use of metformin. The GLP-1 RAs that have shown proven benefit include Ozempic, Trulicity, and Victoza [9].

Dibenzyline (phenoxybenzamine)

Prior Authorization Guideline

Guideline ID	GL-228837
Guideline Name	Dibenzyline (phenoxybenzamine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Dibenzyline (phenoxybenzamine)
Pheochromocytoma Indicated in the treatment of pheochromocytoma to control episodes of hypertension and swelling.

2 . Criteria

Product Name:Brand Dibenzyline, generic phenoxybenzamine	
Diagnosis	Pheochromocytoma
Approval Length	1 Time(s) [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

PHENOXYBENZAMINE HYDROCHLORIDE	PHENOXYBENZAMINE HCL CAP 10 MG	36300010100105	Generic
DIBENZYLINE	PHENOXYBENZAMINE HCL CAP 10 MG	36300010100105	Brand

Approval Criteria

1 - Diagnosis of pheochromocytoma confirmed by one of the following biochemical testing: [2]

- plasma free metanephrines
- urinary fractioned metanephrines

AND

2 - Medication is being used for preoperative preparation [A,1]

AND

3 - Trial and failure, contraindication, or intolerance to one of the following:

- doxazosin
- terazosin
- prazosin

AND

4 - Treatment will also include a high-sodium diet and fluid intake [B]

AND

5 - Prescribed by or in consultation with one of the following:

- Endocrinologist
- Endocrine surgeon

3 . Endnotes

A. Phenoxybenzamine is most commonly used for preoperative control of blood pressure. Its only current clinical use is in preparing patients with pheochromocytoma for surgery. [1]
B. Retrospective studies report that initiation of high-sodium diet a few days after the start of alpha-adrenergic receptor blockade reverses blood volume contraction, prevents orthostatic hypotension before surgery, and reduces the risk of significant hypotension after surgery. [2]

ORMALVI	DICHLORPHENAMIDE TAB 50 MG	37100020000305	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by a decrease in weekly attack frequency from baseline [4]

AND

2 - For Brand Keveyis and Brand Ormalvi, trial and failure or intolerance to generic dichlorphenamide

3 . Endnotes

A. Prescribers should evaluate the patient's response to Keveyis after 2 months of treatment to decide whether treatment should be continued [1]. An additional month is added to the initial authorization duration to allow patient follow-up with the provider.

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-233288
Guideline Name	Doptelet (avatrombopag)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	7/18/2018
P&T Revision Date:	6/19/2024

1 . Indications

Drug Name: Doptelet (avatrombopag)
Thrombocytopenia in Patients with Chronic Liver Disease (CLD) Indicated for the treatment of thrombocytopenia in adult patients with chronic liver disease who are scheduled to undergo a procedure. **Thrombocytopenia in Patients with Chronic Immune Thrombocytopenia (ITP)** Indicated for the treatment of thrombocytopenia in adult patients with chronic immune thrombocytopenia who have had an insufficient response to a previous treatment.

2 . Criteria

Product Name:Doptelet	
Diagnosis	Thrombocytopenia in Patients with Chronic Liver Disease (CLD)
Approval Length	1 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DOPTELET	AVATROMBOPAG MALEATE TAB 20 MG (BASE EQUIV)	82405010200320	Brand

Approval Criteria

1 - Diagnosis of thrombocytopenia

AND

2 - Patient has chronic liver disease

AND

3 - Patient is scheduled to undergo a procedure

AND

4 - Baseline platelet count is less than 50,000/mcL [1, 5]

Product Name:Doptelet	
Diagnosis	Thrombocytopenia in Patients with Chronic Immune Thrombocytopenia (ITP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

DOPTELET	AVATROMBOPAG MALEATE TAB 20 MG (BASE EQUIV)	82405010200320	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Chronic immune (idiopathic) thrombocytopenic purpura (ITP)
- Relapsed/refractory ITP [3]

AND

2 - Baseline platelet count is less than 30,000/mcL [2-4]

AND

3 - Trial and failure, contraindication, or intolerance to at least ONE of the following: [1-4]

- Corticosteroids
- Immunoglobulins
- Splenectomy

AND

4 - Patient's degree of thrombocytopenia and clinical condition increase the risk of bleeding [3]

AND

5 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Doptelet	
Diagnosis	Thrombocytopenia in Patients with Chronic Immune Thrombocytopenia (ITP)
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DOPTELET	AVATROMBOPAG MALEATE TAB 20 MG (BASE EQUIV)	82405010200320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by an increase in platelet count to a level sufficient to avoid clinically important bleeding

4 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-233264
Guideline Name	DPP-4 Inhibitors - ST, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/20/2007
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Janumet (sitagliptin/metformin), Janumet XR (sitagliptin/metformin extended-release), Zituvimet (sitagliptin/metformin), Zituvimet XR (sitagliptin/metformin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) Should not be used in patients with type 1 diabetes mellitus, 2) Has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at increased risk for the development of pancreatitis while using JANUMET.
Drug Name: Januvia (sitagliptin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) Januvia should not be used in patients with type 1 diabetes, 2) Januvia has not been studied in patients with a history of

pancreatitis. It is unknown whether patients with a history of pancreatitis are at increased risk for the development of pancreatitis while using JANUVIA.
Drug Name: Onglyza (saxagliptin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: Not indicated for the treatment of type 1 diabetes mellitus or diabetic ketoacidosis, as it would not be effective in these settings.
Drug Name: Tradjenta (linagliptin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) Not recommended in patients with type 1 diabetes mellitus as it would not be effective., 2) Has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using TRADJENTA.
Drug Name: Jentadueto (linagliptin/metformin), Jentadueto XR (linagliptin/metformin extended-release)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) Not recommended in patients with type 1 diabetes mellitus., 2) Has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using JENTADUETO.
Drug Name: Kazano (alogliptin/metformin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: Not recommended for use in patients with type 1 diabetes mellitus.
Drug Name: Kombiglyze XR (saxagliptin/metformin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus when treatment with both saxagliptin and metformin is appropriate. Limitations of use: Not indicated for the treatment of type 1 diabetes mellitus or diabetic ketoacidosis.
Drug Name: Nesina (alogliptin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: Not recommended for use in patients with type 1 diabetes.
Drug Name: Oseni (alogliptin/pioglitazone)

Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: Should not be used in patients with type 1 diabetes mellitus.
Drug Name: Zituvio (sitagliptin)
Type 2 Diabetes Indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Limitations of use: 1) not recommended in patients with type 1 diabetes mellitus, 2) has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at increased risk for the development of pancreatitis while using ZITUVIO.

2 . Criteria

Product Name:Januvia, Janumet, Janumet XR, Jentadueto, Jentadueto XR, Tradjenta

4 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228843
Guideline Name	Duexis (ibuprofen and famotidine) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Duexis (ibuprofen/famotidine)
Osteoarthritis, rheumatoid arthritis, and gastrointestinal ulcers Indicated for the relief of signs and symptoms of rheumatoid arthritis and osteoarthritis and to decrease the risk of developing upper gastrointestinal ulcers, which in the clinical trials was defined as a gastric and /or duodenal ulcer, in patients who are taking ibuprofen for those indications. The clinical trials primarily enrolled patients less than 65 years of age without a prior history of gastrointestinal ulcer. Controlled trials do not extend beyond 6 months.

2 . Criteria

Product Name:Brand Duexis, generic ibuprofen-famotidine F	
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUEXIS	IBUPROFEN-FAMOTIDINE TAB 800-26.6 MG	66109902320340	Brand
IBUPROFEN/FAMOTIDINE	IBUPROFEN-FAMOTIDINE TAB 800-26.6 MG	66109902320340	Generic

Approval Criteria

1 - One of the following diagnoses:

- Osteoarthritis
- Rheumatoid Arthritis

AND

2 - One of the following [2]:

- History of peptic ulcer disease
- History of gastrointestinal (GI) bleeding, obstruction, or perforation
- Erosive esophagitis
- Used in combination with aspirin

AND

3 - History of a minimum 30 day trial and failure, contraindication or intolerance to two of the following generics:

- etodolac
- fenoprofen
- flurbiprofen
- ibuprofen
- indomethacin
- ketoprofen
- ketorolac
- meloxicam
- nabumetone
- naproxen
- oxaprozin
- piroxicam
- sulindac
- tolmetin

- diclofenac

AND

4 - History of a minimum 30 day trial and failure, or intolerance to two of the following generic H2-receptor antagonists:

- cimetidine
- famotidine
- nizatidine
- ranitidine

AND

5 - Physician has provided rationale for needing to use fixed-dose combination therapy with brand Duexis or generic ibuprofen-famotidine instead of taking individual products in combination

Product Name:Brand Duexis, generic ibuprofen-famotidine NF	
Approval Length	3 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DUEXIS	IBUPROFEN-FAMOTIDINE TAB 800-26.6 MG	66109902320340	Brand
IBUPROFEN/FAMOTIDINE	IBUPROFEN-FAMOTIDINE TAB 800-26.6 MG	66109902320340	Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes) documenting one of the following diagnoses:

- Osteoarthritis
- Rheumatoid Arthritis

AND

2 - Submission of medical records (e.g., chart notes) documenting one of the following [2]:

- History of peptic ulcer disease
- History of gastrointestinal (GI) bleeding, obstruction, or perforation
- Erosive esophagitis
- Used in combination with aspirin

AND

3 - Paid claims or submission of medical records (e.g., chart notes) documenting history of a minimum 30 day trial and failure, contraindication or intolerance to two of the following generics:

- etodolac
- fenoprofen
- flurbiprofen
- ibuprofen
- indomethacin
- ketoprofen
- ketorolac
- meloxicam
- nabumetone
- naproxen
- oxaprozin
- piroxicam
- sulindac
- tolmetin
- diclofenac

AND

4 - Paid claims or submission of medical records (e.g., chart notes) documenting history of a minimum 30 day trial and failure, contraindication or intolerance to two of the following generic H2-receptor antagonists:

- cimetidine
- famotidine
- nizatidine
- ranitidine

AND

5 - Physician has provided rationale for needing to use fixed-dose combination therapy with brand Duexis or generic ibuprofen-famotidine instead of taking individual products in combination

Prior Authorization Guideline

Guideline ID	GL-228400
Guideline Name	Duobrii (halobetasol propionate and tazarotene) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Duobrii (halobetasol propionate and tazarotene)
Plaque Psoriasis Indicated for the topical treatment of plaque psoriasis in adults.

2 . Criteria

Product Name:Duobrii			
Approval Length	12 month(s)		
Guideline Type	Prior Authorization		
Product Name	Generic Name	GPI	Brand/Generic

DUOBRII	HALOBETASOL PROPIONATE-TAZAROTENE LOTION 0.01-0.045%	90559902484120	Brand

Approval Criteria

1 - Diagnosis of plaque psoriasis

AND

2 - Prescribed by or in consultation with a dermatologist

AND

3 - Trial and failure, intolerance, or contraindication to ALL of the following:

- One high potency corticosteroid topical treatment (e.g., halobetasol propionate, clobetasol propionate, fluocinonide)
- Tazarotene
- Enstilar foam, Wynzora, Taclonex suspension/ointment, or generic Taclonex

Product Name:Duobrii	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DUOBRII	HALOBETASOL PROPIONATE-TAZAROTENE LOTION 0.01-0.045%	90559902484120	Brand

Approval Criteria

1 - Diagnosis of plaque psoriasis

AND

2 - Prescribed by or in consultation with a dermatologist

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, intolerance or contraindication to ALL of the following:

- One high potency corticosteroid topical treatment (e.g., halobetasol propionate, clobetasol propionate, fluocinonide)
- Tazarotene
- Enstilar foam, Wynzora, Taclonex suspension/ointment, or generic Taclonex

3 . Background

Clinical Practice Guidelines

Table 1. Relative Potency of Selected Topical Corticosteroid Products [3]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25

	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

Prior Authorization Guideline

Guideline ID	GL-233233
Guideline Name	Dupixent (dupilumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Dupixent (dupilumab)
Atopic Dermatitis (AD) Indicated for the treatment of adult and pediatric patients aged 6 months and older with moderate-to-severe atopic dermatitis whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable. Dupixent can be used with or without topical corticosteroids. **Asthma** Indicated as an add-on maintenance treatment of adult and pediatric patients aged 6 years and older with moderate-to-severe asthma characterized by an eosinophilic phenotype or with oral corticosteroid dependent asthma. Limitations of use: Dupixent is not indicated for the relief of acute bronchospasm or status asthmaticus. **Chronic Rhinosinusitis with Nasal Polyposis (CRSwNP)** Indicated as an add-on maintenance treatment in patients 12 years of age and older with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP). **Eosinophilic Esophagitis (EoE)** Indicated for the treatment of adult and pediatric patients

aged 1 year and older, weighing at least 15 kg, with eosinophilic esophagitis (EoE).

Prurigo Nodularis (PN) Indicated for the treatment of adult patients with prurigo nodularis (PN).

Chronic Obstructive Pulmonary Disease (COPD) Indicated in COPD with evidence of type 2 inflammation.

2 . Criteria

Product Name:Dupixent	
Diagnosis	Atopic Dermatitis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe atopic dermatitis

AND

2 - One of the following:

- Involvement of at least 10% body surface area (BSA)

- SCORing Atopic Dermatitis (SCORAD) index value of at least 25 [A]

AND

3 - Trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to at least ONE of the following [2]:

- Medium or higher potency topical corticosteroid
- Pimecrolimus cream
- Tacrolimus ointment
- Eucrisa (crisaborole) ointment

AND

4 - Patient is 6 months of age or older

AND

5 - Prescribed by or in consultation with one of the following:

- Dermatologist
- Allergist/Immunologist

Notes	*Product may require step therapy

Product Name:Dupixent	
Diagnosis	Atopic Dermatitis
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand

DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as evidenced by at least ONE of the following:

- Reduction in BSA involvement from baseline
- Reduction in SCORAD index value from baseline [A]

Product Name:Dupixent	
Diagnosis	Eosinophilic Asthma
Approval Length	6 Months [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/0.67ML	9027302000E510	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe asthma

AND

2 - Asthma is an eosinophilic phenotype as defined by a baseline (pre-treatment) peripheral blood eosinophil level greater than or equal to 150 cells per microliter [C, D]

AND

3 - One of the following:

3.1 Patient has had at least two or more asthma exacerbations requiring systemic corticosteroids (e.g., prednisone) within the past 12 months [4, 5, 7]

OR

3.2 Prior asthma-related hospitalization within the past 12 months [4, 5, E]

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Patient is 6 years of age or older but less than 12 years of age

AND

4.1.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.1.2.1 Both of the following:

- Medium-dose inhaled corticosteroid (e.g., greater than 100 – 200 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.1.2.2 One medium dosed combination ICS/LABA product (e.g., Advair Diskus [fluticasone

propionate 100mcg/ salmeterol 50mcg], Symbicort [budesonide 80mcg/ formoterol 4.5mcg] Breo Ellipta [fluticasone furoate 50 mcg/ vilanterol 25 mcg])

OR

4.2 Both of the following:

4.2.1 Patient is 12 years of age or older

AND

4.2.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.2.2.1 Both of the following:

- High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.2.2.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg])

AND

5 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Dupixent	
Diagnosis	Eosinophilic Asthma

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/0.67ML	9027302000E510	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy (e.g., reduction in exacerbations, improvement in forced expiratory volume in 1 second [FEV1], decreased use of rescue medications)

AND

2 - Patient continues to be treated with an inhaled corticosteroid (ICS) (e.g., fluticasone, budesonide) with or without additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium]) unless there is a contraindication or intolerance to these medications

AND

3 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Dupixent	
Diagnosis	Oral Corticosteroid Dependent Asthma
Approval Length	6 Months [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/0.67ML	9027302000E510	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe asthma

AND

2 - Patient is currently dependent on oral corticosteroids for the treatment of asthma

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Patient is 6 years of age or older but less than 12 years of age

AND

3.1.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

3.1.2.1 Both of the following:

- Medium-dose inhaled corticosteroid (e.g., greater than 100 – 200 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

3.1.2.2 One medium dosed combination ICS/LABA product (e.g., Advair Diskus [fluticasone propionate 100mcg/ salmeterol 50mcg], Symbicort [budesonide 80mcg/ formoterol 4.5mcg] Breo Ellipta [fluticasone furoate 50 mcg/ vilanterol 25 mcg])

OR

3.2 Both of the following:

3.2.1 Patient is 12 years of age or older

AND

3.2.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

3.2.2.1 Both of the following:

- High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

3.2.2.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone

propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg])

AND

4 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Dupixent	
Diagnosis	Oral Corticosteroid Dependent Asthma
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Approval Criteria

1 - Diagnosis of chronic rhinosinusitis with nasal polyposis (CRSwNP)

AND

2 - Patient is 12 years of age or older

AND

2 - Unless contraindicated, the patient has had an inadequate response to 2 months of treatment with an intranasal corticosteroid (e.g., fluticasone, mometasone) [8, 9]

AND

3 - Used in combination with another agent for CRSwNP [F]

AND

5 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Otolaryngologist
- Pulmonologist

Product Name:Dupixent	
Diagnosis	Chronic rhinosinusitis with nasal polyposis (CRSwNP)
Approval Length	12 month(s)
Therapy Stage	Reauthorization

DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand

Approval Criteria

1 - Diagnosis of eosinophilic esophagitis (EoE)

AND

2 - Patient has symptoms of esophageal dysfunction (e.g., dysphagia, food impaction, heartburn, abdominal pain) [13-15]

AND

3 - Patient has at least 15 intraepithelial eosinophils per high power field (HPF) [1, 13-15]

AND

4 - Other causes of esophageal eosinophilia have been excluded [13-15]

AND

5 - Both of the following:

- Patient is at least 1 year of age
- Patient weighs at least 15 kg

AND

6 - Trial and failure (of a minimum 8-week duration), contraindication, or intolerance to one of the following:

- Proton pump inhibitors (e.g., pantoprazole, omeprazole)
- Topical (esophageal) corticosteroids (e.g., budesonide, fluticasone)

AND

7 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Allergist/Immunologist

Product Name:Dupixent	
Diagnosis	Eosinophilic Esophagitis (EoE)
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as evidenced by improvement of at least one of the following from baseline [1, 13-15]:

- Symptoms (e.g., dysphagia, food impaction, heartburn, chest pain)
- Histologic measures (e.g., esophageal intraepithelial eosinophil count)
- Endoscopic measures (e.g., edema, furrows, exudates, rings, strictures)

Product Name:Dupixent	
Diagnosis	Prurigo Nodularis (PN)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Diagnosis of prurigo nodularis (PN)

AND

2 - Patient has at least 20 nodular lesions

AND

3 - Trial and failure, contraindication, or intolerance to one medium or higher potency topical corticosteroid [16, 17]

AND

4 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Dermatologist

Product Name:Dupixent	
Diagnosis	Prurigo Nodularis (PN)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as evidenced by at least ONE of the following:

- Reduction in the number of nodular lesions from baseline
- Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Dupixent	
Diagnosis	Chronic obstructive pulmonary disease (COPD)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/0.67ML	9027302000E510	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Diagnosis of chronic obstructive pulmonary disease (COPD)

AND

2 - Presence of Type 2 inflammation evidenced by blood eosinophils greater than or equal to 300 cells per microliter at baseline

AND

3 - Patient is receiving one of the following therapies at maximally tolerated doses

- Triple therapy (i.e., an inhaled corticosteroid (ICS), a long-acting muscarinic antagonist (LAMA) and a long-acting beta agonist (LABA)
- If ICS are contraindicated, a LAMA and a LABA

AND

4 - Patient must have post-bronchodilator forced expiratory volume [FEV1] / forced vital capacity [FVC] ratio less than 0.70

AND

5 - Patient has had one of the following within the past 12 months:

5.1 At least two exacerbations where systemic corticosteroids [intramuscular, intravenous, or oral (e.g., prednisone)] were required at least once

OR

5.2 COPD-related hospitalization

AND

6 - Patient experiences dyspnea during everyday activities (e.g., needs to stop for breath when walking on level ground) [G]

Product Name:Dupixent	
Diagnosis	Chronic obstructive pulmonary disease (COPD)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 200 MG/1.14ML	9027302000D515	Brand

DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PEN-INJECTOR 300 MG/2ML	9027302000D520	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/0.67ML	9027302000E510	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	9027302000E515	Brand
DUPIXENT	DUPILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 300 MG/2ML	9027302000E520	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy (e.g., improved lung function, a reduction in COPD exacerbations)

AND

2 - Patient continues to receive one of the following therapies:

- Triple therapy (i.e., an inhaled corticosteroid (ICS), a long-acting muscarinic antagonist (LAMA) and a long-acting beta agonist (LABA)
- If ICS are contraindicated, a LAMA and a LABA

3 . Background

Clinical Practice Guidelines

Table 1. Relative potencies of topical corticosteroids [2]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment, gel	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
	Amcinonide	Cream, lotion, ointment	0.1

High Potency	Augmented betamethasone dipropionate	Cream, lotion	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025
	Flurandrenolide	Cream, ointment, lotion	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream, lotion	0.1
	Triamcinolone acetonide	Cream, ointment, lotion	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 2. Low, medium and high daily doses of inhaled corticosteroids in adolescents and adults 12 years and older [7]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High

Beclometasone dipropionate (pMDI, standard particle, HFA)	200-500	> 500-1000	> 1000
Beclometasone dipropionate (DPI or pMDI, extrafine particle*, HFA)	100-200	> 200-400	> 400
Budesonide (DPI, or pMDI, standard particle, HFA)	200-400	> 400-800	> 800
Ciclesonide (pMDI, extrafine particle*, HFA)	80-160	> 160-320	> 320
Fluticasone furoate (DPI)	100		200
Fluticasone propionate (DPI)	100-250	> 250-500	> 500
Fluticasone propionate (pMDI, standard particle, HFA)	100-250	> 250-500	> 500
Mometasone furoate (DPI)	Depends on DPI device – see product information		
Mometasone furoate (pMDI, standard particle, HFA)	200-400		> 400

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country - specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 2. Low, medium and high daily doses of inhaled corticosteroids in children 6 – 11 years [5] The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 2. Low, medium and high daily doses of inhaled corticosteroids in children 6 – 11 years [5]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
-	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Beclometasone dipropionate (pMDI, extrafine particle, HFA)	50-100	> 100-200	> 200
Budesonide (DPI, or pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Budesonide (nebules)	250-500	>500-1000	>1000
Ciclesonide (pMDI, extrafine particle*, HFA)	80	>80-160	>160
Fluticasone furoate (DPI)	50		n.a.
Fluticasone propionate (DPI)	50-100	> 100-200	> 200
Fluticasone propionate (pMDI, standard particle, HFA)	50-100	> 100-200	> 200
Mometasone furoate (pMDI, standard particle, HFA)	100		200

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply

potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

4 . Endnotes

A. The Scoring Atopic Dermatitis (SCORAD) index is a clinical tool for assessing the severity of atopic dermatitis lesions based on affected body area and intensity of plaque characteristics. [10, 11] The extent and severity of AD over the body area (A) and the severity of 6 specific symptoms (erythema, edema/papulation, excoriations, lichenification, oozing/crusts, and dryness) (B) are assessed and scored by the Investigator. Subjective assessment of itch and sleeplessness is scored by the patient (C). The SCORAD score is a combined score (A/5 + 7B/2 + C) with a maximum of 103. Higher scores indicate greater severity/worsened state. A score of 25 to 50 indicates moderate disease severity and greater than 50 indicates severe disease. [12]
B. The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention update recommends that patients with asthma should be reviewed regularly to monitor their symptom control, risk factors and occurrence of exacerbations, as well as to document the response to any treatment changes. Ideally, response to Type 2-targeted therapy should be re-evaluated every 3-6 months, including re-evaluation of the need for ongoing biologic therapy for patients with good response to Type 2 targeted therapy.
C. In AS Trial 2, reductions in exacerbations were significant in the subgroup of subjects with baseline blood eosinophils greater than or equal to 150 cells/mcL. In subjects with baseline blood eosinophil count less than 150 cells/mcL, similar severe exacerbation rates were observed between Dupixent and placebo. [1]
D. The Institute for Clinical and Economic Review (ICER) defines eosinophilic inflammation as a blood eosinophil level greater than or equal to 150 cells per microliter at initiation of therapy. This is the lowest measured threshold for eosinophilic asthma in pivotal trials. [3]
E. Recommendation inferred from the national P&T committee meeting, December 2015, regarding similar agent first-in-class IL-5 antagonist Nucala (mepolizumab) in the use of severe eosinophilic asthma.
F. Other agents used for CRSwNP include intranasal corticosteroids and nasal saline.
G. In the BOREAS trial, the inclusion criteria included a grade of greater than or equal to 2 on the Medical Research Council (MRC) Dyspnea Scale. [18,19]

6 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228637
Guideline Name	Duvyzat (givinostat)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Duvyzat (givinostat)
Duchenne muscular dystrophy (DMD) Indicated for the treatment of Duchenne muscular dystrophy (DMD) in patients 6 years of age and older.

2 . Criteria

Product Name:Duvyzat	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUVYZAT	GIVINOSTAT HCL ORAL SUSP 8.86 MG/ML	74603025201820	Brand

Approval Criteria

1 - Diagnosis of Duchenne muscular dystrophy (DMD)

AND

2 - One of the following:

2.1 Patient has a confirmed mutation of the dystrophin gene

OR

2.2 Muscle biopsy confirmed an absence of dystrophin protein

AND

3 - Patient is 6 years of age or older

AND

4 - Patient is ambulatory without needing an assistive device (e.g., without side-by-side assist, cane, walker, wheelchair, etc.) prior to initiating Duvyzat

AND

5 - Requested drug will be used concomitantly with a corticosteroid regimen (e.g., prednisone/prednisolone, Emflaza [deflazacort], Agamree)

AND

6 - Prescribed by or in consultation with a pediatric neurologist with expertise in treating DMD

Product Name:Duvyzat	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DUVYZAT	GIVINOSTAT HCL ORAL SUSP 8.86 MG/ML	74603025201820	Brand

Approval Criteria

1 - Patient has experienced a benefit from therapy (e.g., improvement in preservation of muscle strength)

AND

2 - Patient is maintaining ambulatory status without needing an assistive device (e.g., without side-by-side assist, cane, walker, wheelchair, etc.)

AND

3 - Patient continues to receive concomitant corticosteroid regimen (e.g., prednisone/prednisolone, Emflaza [deflazacort], Agamree)

3 . Endnotes

A. Approximately 70% of individuals with DMD have a single-exon or multi-exon deletion or duplication in the dystrophin gene, dystrophin gene deletion, and duplication testing is usually the first confirmatory test. If genetic testing does not confirm a clinical diagnosis of DMD, then a muscle biopsy sample should be tested for the presence of dystrophin protein by immunohistochemistry of tissue cryosections or by western blot of a muscle protein extract. [2]

B. Prednisone 0.75 mg/kg/d should be considered the optimal prednisone dose in DMD. Over 12 months, prednisone 10 mg/kg/weekend is equally effective, although long term outcomes of this alternative regimens are unknown. [3]

Prior Authorization Guideline

Guideline ID	GL-228639
Guideline Name	Dysport (abobotulinumtoxinA)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Dysport (abobotulinumtoxinA)
Cervical Dystonia Indicated for the treatment of cervical dystonia in adults. **Spasticity** Indicated for the treatment of spasticity in patients 2 years of age and older. **Cosmetic Uses [Non-approvable Use]** Indicated for the temporary improvement in the appearance of moderate to severe glabellar lines associated with procerus and corrugator muscle activity in adult patients less than 65 years of age. Note: This indication is generally a plan exclusion. Drugs prescribed to primarily improve or otherwise modify the member's external appearance are excluded from coverage, as this is considered a cosmetic use.

2 . Criteria

Product Name:Dysport

Diagnosis	Cervical Dystonia (also known as spasmodic torticollis)
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 300 UNIT	74400020032115	Brand
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 500 UNIT	74400020032120	Brand

Approval Criteria

1 - Diagnosis of cervical dystonia (also known as spasmodic torticollis) [2, 3]

Product Name:Dysport	
Diagnosis	Spasticity
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 300 UNIT	74400020032115	Brand
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 500 UNIT	74400020032120	Brand

Approval Criteria

1 - Diagnosis of spasticity [3]

AND

2 - Patient is 2 years of age or older

Product Name:Dysport

Diagnosis	All indications listed above
Approval Length	3 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 300 UNIT	74400020032115	Brand
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 500 UNIT	74400020032120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - At least 3 months have elapsed since the last treatment [A]

Product Name:Dysport	
Diagnosis	Cosmetic Uses
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 300 UNIT	74400020032115	Brand
DYSPORT	ABOBOTULINUMTOXINA FOR INJ 500 UNIT	74400020032120	Brand

Approval Criteria

1 - Requests for coverage of any Dysport product for treating the appearance of facial lines are not authorized and will not be approved. These uses are considered cosmetic only.

3 . Endnotes

A. In the pivotal clinical trial, doses of 500 Units and 1000 Units were divided among selected muscles. Repeat treatment should be administered when the effect of a previous injection has diminished, but no sooner than 12 weeks after the previous injection. A majority of patients in clinical studies were retreated between 12-16 weeks; however some patients had a longer duration of response, i.e., 20 weeks. [1]

Prior Authorization Guideline

Guideline ID	GL-233261
Guideline Name	Ebglyss (lebrikizumab-lbkz)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/21/2024
P&T Revision Date:	12/18/2024

1 . Indications

Drug Name: Ebglyss (lebrikizumab-lbkz)
Atopic Dermatitis (AD) Indicated for the treatment of adults and pediatric patients 12 years of age and older who weigh at least 40 kg with moderate-to-severe atopic dermatitis whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable. Ebglyss can be used with or without topical corticosteroids.

2 . Criteria

Product Name:Ebglyss	
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EBGLYSS	LEBRIKIZUMAB-LBKZ SUBCUTANEOUS SOLN AUTO-INJECT 250 MG/2ML	9027304010D520	Brand
EBGLYSS	LEBRIKIZUMAB-LBKZ SOLUTION PREFILLED SYRINGE 250 MG/2ML	9027304010E520	Brand

Approval Criteria

1 - Diagnosis of moderate to severe atopic dermatitis

AND

2 - One of the following:

- Involvement of at least 10% body surface area (BSA)
- SCORing Atopic Dermatitis (SCORAD) index value of at least 25 [A]

AND

3 - Both of the following:

- Patient is 12 years of age or older
- Patient weighs at least 40 kg

AND

4 - Prescribed by or in consultation with one of the following:

- Dermatologist
- Allergist/Immunologist

AND

5 - Trial and failure of a minimum 30-day supply (14-day supply for topical corticosteroids), contraindication, or intolerance to TWO of the following [2]:

- Medium or higher potency topical corticosteroid
- Pimecrolimus cream
- Tacrolimus ointment
- Eucrisa (crisaborole) ointment

AND

6 - Trial and failure, contraindication, or intolerance to TWO of the following:

- Adbry (tralokizumab-ldrm)
- Dupixent (dupilumab)
- Cibinqo (abrocitinib)
- Rinvoq (upadacitinib)

Product Name:Ebglyss	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EBGLYSS	LEBRIKIZUMAB-LBKZ SUBCUTANEOUS SOLN AUTO-INJECT 250 MG/2ML	9027304010D520	Brand
EBGLYSS	LEBRIKIZUMAB-LBKZ SOLUTION PREFILLED SYRINGE 250 MG/2ML	9027304010E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least ONE of the following [1-2]:

- Reduction in body surface area involvement from baseline
- Reduction in SCORing Atopic Dermatitis (SCORAD) index value from baseline [A]

3 . Background

Benefit/Coverage/Program Information

Table 1. Relative potencies of topical corticosteroids [2]

Class	Drug	Dosage Form	Strength (%)
Very high potency	Augmented betamethasone dipropionate	Ointment	0.05
	Clobetasol propionate	Cream, foam, ointment	0.05
	Diflorasone diacetate	Ointment	0.05
	Halobetasol propionate	Cream, ointment	0.05
High Potency	Amcinonide	Cream, lotion, ointment	0.1
	Augmented betamethasone dipropionate	Cream	0.05
	Betamethasone dipropionate	Cream, foam, ointment, solution	0.05
	Desoximetasone	Cream, ointment	0.25
	Desoximetasone	Gel	0.05
	Diflorasone diacetate	Cream	0.05
	Fluocinonide	Cream, gel, ointment, solution	0.05
	Halcinonide	Cream, ointment	0.1
	Mometasone furoate	Ointment	0.1
	Triamcinolone acetonide	Cream, ointment	0.5
Medium potency	Betamethasone valerate	Cream, foam, lotion, ointment	0.1
	Clocortolone pivalate	Cream	0.1
	Desoximetasone	Cream	0.05
	Fluocinolone acetonide	Cream, ointment	0.025

	Flurandrenolide	Cream, ointment	0.05
	Fluticasone propionate	Cream	0.05
	Fluticasone propionate	Ointment	0.005
	Mometasone furoate	Cream	0.1
	Triamcinolone acetonide	Cream, ointment	0.1
Lower-medium potency	Hydrocortisone butyrate	Cream, ointment, solution	0.1
	Hydrocortisone probutate	Cream	0.1
	Hydrocortisone valerate	Cream, ointment	0.2
	Prednicarbate	Cream	0.1
Low potency	Alclometasone dipropionate	Cream, ointment	0.05
	Desonide	Cream, gel, foam, ointment	0.05
	Fluocinolone acetonide	Cream, solution	0.01
Lowest potency	Dexamethasone	Cream	0.1
	Hydrocortisone	Cream, lotion, ointment, solution	0.25, 0.5, 1
	Hydrocortisone acetate	Cream, ointment	0.5-1

4 . Endnotes

A. The Scoring Atopic Dermatitis (SCORAD) index is a clinical tool for assessing the severity of atopic dermatitis lesions based on affected body area and intensity of plaque characteristics. [3, 4] The extent and severity of AD over the body area (A) and the severity of 6 specific symptoms (erythema, edema/papulation, excoriations, lichenification, oozing/crusts, and dryness) (B) are assessed and scored by the Investigator. Subjective assessment of itch and sleeplessness is scored by the patient (C). The SCORAD score is a combined score (A/5 + 7B/2 + C) with a maximum of 103. Higher scores indicate greater severity/worsened state. A score of 25 to 50 indicates moderate disease severity and greater than 50 indicates severe disease. [5]

6 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228401
Guideline Name	Egrifta (tesamorelin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Egrifta SV (tesamorelin)
Excess Abdominal Fat Reduction in HIV-associated Lipodystrophy Indicated for the reduction of excess abdominal fat in HIV-infected adult patients with lipodystrophy. Limitations of use: 1) Long-term cardiovascular safety of EGRIFTA SV has not been established. Consider risk/benefit of continuation of treatment in patients who have not had a reduction in visceral adipose tissue. 2) Not indicated for weight loss management as it has a weight neutral effect. 3) There are no data to support improved compliance with anti-retroviral therapies in HIV-positive patients taking EGRIFTA SV.

2 . Criteria

Product Name:Egrifta SV	
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EGRIFTA SV	TESAMORELIN ACETATE FOR INJ 2 MG (BASE EQUIV)	30150085102130	Brand

Approval Criteria

1 - Diagnosis of HIV-associated lipodystrophy

AND

2 - Patient is 18 years of age or older [A]

AND

3 - One of the following: [B]

- Waist-circumference of greater than or equal to 95 cm (37.4 inches) in men
- Waist-circumference of greater than or equal to 94 cm (37 inches) for women

AND

4 - One of the following: [B]

- Waist-to-hip ratio of greater than or equal to 0.94 for men
- Waist-to-hip ratio of greater than or equal to 0.88 for women

AND

5 - Body mass index (BMI) of greater than 20 kg/m^2 [B]

AND

6 - Fasting blood glucose (FBG) levels less than or equal to 150 mg/dL (8.33 mmol/L) [B]

AND

7 - Patient has been on a stable regimen of antiretrovirals (e.g., nucleoside reverse transcriptase inhibitors, non-nucleoside reverse transcriptase inhibitors, Protease Inhibitors, Integrase Inhibitors) for at least 8 weeks [C]

Product Name:Egrifta SV	
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EGRIFTA SV	TESAMORELIN ACETATE FOR INJ 2 MG (BASE EQUIV)	30150085102130	Brand

Approval Criteria

1 - Patient demonstrates clinical improvement (e.g., improvement in visceral adipose tissue [VAT], decrease in waist circumference, belly appearance, etc.) while on therapy

3 . Endnotes

A. Study sponsors requested a waiver for pediatric studies in children less than 18 years of age, and this waiver was granted by the FDA due to concerns that among patients with open epiphyses, excess growth hormone and IGF-1 may result in linear growth acceleration and excessive growth. [2]
B. Both pivotal studies included patients 18 to 65 years of age (mean age, 48 years) who met the waist circumference criteria [95 cm (37.4 inches) or greater for men; 94 cm (37 inches) or greater for women], who met the waist-to-hip ratio criteria (0.94 or greater for men; 0.88 or greater for women), who had a fasting blood glucose of less than 150 mg/dL (8.33 mmol/L) criteria, and who had been on a stable antiretroviral regimen for at least 8 weeks. Patients with a BMI (body mass index) of 20 kg/m^2 or less and patients with diabetes [fasting blood glucose (FBG) levels > 150 mg/dL] were among those excluded. [2-6]

C. The 8 weeks of antiretroviral regimen listed in the criteria is based on the inclusion criteria in the pivotal study. [2-6]

Prior Authorization Guideline

Guideline ID	GL-228642
Guideline Name	Elaprase (idursulfase)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Elaprase (idursulfase) [1]
Hunter Syndrome Is indicated for patients with Hunter syndrome (Mucopolysaccharidosis II, MPS II). Elaprase has been shown to improve walking capacity in patients 5 years and older. In patients 16 months to 5 years of age, no data are available to demonstrate improvement in disease-related symptoms or long term clinical outcome; however, treatment with Elaprase has reduced spleen volume similarly to that of adults and children 5 years of age and older. The safety and efficacy of Elaprase have not been established in pediatric patients less than 16 months of age.

2 . Criteria

Product Name:Elaprase (idursulfase)	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ELAPRASE	IDURSULFASE SOLN FOR IV INFUSION 6 MG/3ML (2 MG/ML)	30906850002020	Brand

Approval Criteria

1 - Diagnosis of Hunter syndrome (Mucopolysaccharidosis II, MPS II)

Product Name:Elaprase (idursulfase)	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ELAPRASE	IDURSULFASE SOLN FOR IV INFUSION 6 MG/3ML (2 MG/ML)	30906850002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Prior Authorization Guideline

Guideline ID	GL-228404
Guideline Name	Elyxyb (celecoxib) Oral Solution - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Elyxyb (celecoxib) Oral Solution
Migraine Indicated for the acute treatment of migraine with or without aura in adults. Limitations of use: ELYXYB is not indicated for the preventive treatment of migraine.

2 . Criteria

Product Name:Elyxyb			
Approval Length	12 month(s)		
Guideline Type	Prior Authorization		
Product Name	Generic Name	GPI	Brand/Generic

ELYXYB	CELECOXIB ORAL SOLN 120 MG/4.8ML (25 MG/ML)	67604030002020	Brand

Approval Criteria

1 - Diagnosis of migraine with or without aura

AND

2 - Trial and failure, contraindication or intolerance to two of the following generics:

- Almotriptan tablet
- Eletriptan tablet
- Frovatriptan tablet
- Naratriptan tablet
- Rizatriptan tablet/rizatriptan orally dissolving tablet (ODT)
- Sumatriptan tablet/nasal spray
- Zolmitriptan tablet/zolmitriptan ODT

Product Name:Elyxyb	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ELYXYB	CELECOXIB ORAL SOLN 120 MG/4.8ML (25 MG/ML)	67604030002020	Brand

Approval Criteria

1 - Diagnosis of migraine with or without aura

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication or intolerance to two of the following generics:

- Almotriptan tablet

- Eletriptan tablet
- Frovatriptan tablet
- Naratriptan tablet
- Rizatriptan tablet/rizatriptan orally dissolving tablet (ODT)
- Sumatriptan tablet/nasal spray
- Zolmitriptan tablet/zolmitriptan ODT

Prior Authorization Guideline

Guideline ID	GL-228406
Guideline Name	Emergency Agents for the Treatment of Severe Hypoglycemia - ST, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Glucagen
Severe Hypoglycemia Indicated for the treatment of severe hypoglycemia in pediatric and adult patients with diabetes. **Diagnostic Aid** GlucaGen is indicated as a diagnostic aid for use during radiologic examinations to temporarily inhibit movement of the gastrointestinal tract in adult patients.
Drug Name: Glucagon
Severe Hypoglycemia Indicated for the treatment of severe hypoglycemia in pediatric and adult patients with diabetes mellitus. **Diagnostic Aid** Indicated as a diagnostic aid for use during radiologic examinations to temporarily inhibit movement of the gastrointestinal tract in adult patients.
Drug Name: Gvoke

Severe Hypoglycemia Indicated for the treatment of severe hypoglycemia in pediatric and adult patients with diabetes ages 2 years and above.

2 . Criteria

Product Name:Glucagen, Glucagon (manufactured by Lilly), Gvoke	
Approval Length	12 month(s)
Guideline Type	Step Therapy

DEFLAZACORT	DEFLAZACORT SUSP 22.75 MG/ML	22100017001830	Generic

Approval Criteria

1 - Diagnosis of Duchenne muscular dystrophy (DMD)

AND

2 - Patient has received genetic testing for a mutation of the dystrophin gene [A, 2]

AND

3 - One of the following [A, 2]:

3.1 Documentation of a confirmed mutation of the dystrophin gene

OR

3.2 Muscle biopsy confirmed an absence of dystrophin protein

AND

4 - Patient is 2 years of age or older

AND

5 - Prescribed by or in consultation with a neurologist who has experience treating children

AND

6 - Dose will not exceed 0.9 milligrams per kilogram of body weight once daily

AND

7 - Patient has had a trial and failure or intolerance to prednisone or prednisolone given at a dose of 0.75 mg/kg/day or 10 mg/kg/weekend [B, 3-5]

AND

8 - One of the following:

8.1 Trial and intolerance to generic deflazacort tablet (Applies to Brand Emflaza tablet only)

OR

8.2 Trial and intolerance to generic deflazacort suspension (Applies to Brand Emflaza oral suspension only)

Product Name:Brand Emflaza, generic deflazacort	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

DEFLAZACORT	DEFLAZACORT TAB 36 MG	22100017000365	Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) confirming diagnosis of Duchenne muscular dystrophy (DMD)

AND

2 - Patient has received genetic testing for a mutation of the dystrophin gene [A, 2]

AND

3 - Submission of medical records (e.g., chart notes, laboratory values) confirming one of the following [A, 2]:

3.1 Documentation of a confirmed mutation of the dystrophin gene

OR

3.2 Muscle biopsy confirmed an absence of dystrophin protein

AND

4 - Patient is 2 years of age or older

AND

5 - Prescribed by or in consultation with a neurologist who has experience treating children

AND

6 - Dose will not exceed 0.9 milligrams per kilogram of body weight once daily

AND

7 - Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure or intolerance to prednisone or prednisolone given at a dose of 0.75 mg/kg/day or 10 mg/kg/weekend [B, 3-5]

AND

8 - Both of the following (Applies to Brand Emflaza suspension only):

8.1 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) to generic deflazacort suspension

AND

8.2 Submission of medical records (e.g., chart notes) confirming generic deflazacort suspension has not been effective AND valid clinical rationale provided explaining how the Non-Formulary or Excluded Medication is expected to provide benefit when generic deflazacort suspension has not been shown to be effective despite having the same active ingredient

3 . Endnotes

A. Genetic testing after a positive biopsy diagnosis of Duchenne muscular dystrophy (DMD) is mandatory [2]. However a muscle biopsy is not necessary if a positive genetic diagnosis is confirmed first. In rare cases, when a genetic test has been done but no mutation has been found, a muscle biopsy is the next necessary step for patients who have increased creatine kinase concentrations and symptoms consistent with DMD.
B. Prednisone 0.75 mg/kg/d should be considered the optimal prednisone dose in DMD. Over 12 months, prednisone 10 mg/kg/weekend is equally effective, although long term outcomes of this alternative regimens are unknown [3].

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Empaveli (pegcetacoplan)

Prior Authorization Guideline

Guideline ID	GL-228408
Guideline Name	Empaveli (pegcetacoplan)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Empaveli (pegcetacoplan)
Paroxysmal Nocturnal Hemoglobinuria Indicated for the treatment of adult patients with paroxysmal nocturnal hemoglobinuria (PNH).

2 . Criteria

Product Name:Empaveli	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EMPAVELI	PEGCETACOPLAN SUBCUTANEOUS SOLN 1080 MG/20ML (54 MG/ML)	85804065002020	Brand

Approval Criteria

1 - Diagnosis of paroxysmal nocturnal hemoglobinuria (PNH)

AND

2 - Prescribed by or in consultation with one of the following:

- Hematologist
- Oncologist

Product Name:Empaveli	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EMPAVELI	PEGCETACOPLAN SUBCUTANEOUS SOLN 1080 MG/20ML (54 MG/ML)	85804065002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in hemoglobin level, hemoglobin stabilization, decrease in the number of red blood cell transfusions)

Prior Authorization Guideline

Guideline ID	GL-228845
Guideline Name	Enbrel (etanercept)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Enbrel (etanercept)
Rheumatoid Arthritis (RA) Indicated for reducing signs and symptoms, inducing major clinical response, inhibiting the progression of structural damage, and improving physical function in patients with moderately to severely active rheumatoid arthritis. Enbrel can be initiated in combination with methotrexate (MTX) or used alone. **Polyarticular Juvenile Idiopathic Arthritis (PJIA)** Indicated for reducing signs and symptoms of moderately to severely active polyarticular juvenile idiopathic arthritis in patients ages 2 and older. **Psoriatic Arthritis (PsA)** Indicated for reducing signs and symptoms, inhibiting the progression of structural damage of active arthritis, and improving physical function in adult patients with psoriatic arthritis. Enbrel can be used with or without MTX. Also indicated for the treatment of active juvenile psoriatic arthritis (JPsA) in pediatric patients 2 years of age and older. **Plaque Psoriasis (PsO)** Indicated for the treatment of patients 4 years or older with chronic moderate to severe plaque psoriasis who are candidates for systemic therapy or phototherapy.

Ankylosing Spondylitis (AS) Indicated for reducing signs and symptoms in patients with active ankylosing spondylitis.

2 . Criteria

Product Name:Enbrel	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 25 MG/0.5ML	6629003000E525	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

- methotrexate
- leflunomide
- sulfasalazine

Product Name:Enbrel	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 25 MG/0.5ML	6629003000E525	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Enbrel	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand

ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Diagnosis of active psoriatic arthritis

AND

2 - One of the following [5]:

- Actively inflamed joints
- Dactylitis
- Enthesitis
- Axial disease
- Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

- Dermatologist
- Rheumatologist

Product Name:Enbrel	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand

ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 5]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline
- Reduction in the body surface area (BSA) involvement from baseline

Product Name:Enbrel	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 25 MG/0.5ML	6629003000E525	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Diagnosis of moderate to severe chronic plaque psoriasis

AND

2 - One of the following [6]:

- Greater than or equal to 3% body surface area involvement
- Severe scalp psoriasis
- Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [7]:

- corticosteroids (e.g., betamethasone, clobetasol)
- vitamin D analogs (e.g., calcitriol, calcipotriene)
- tazarotene
- calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Enbrel	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 25 MG/0.5ML	6629003000E525	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following [1, 6]:

- Reduction in the body surface area (BSA) involvement from baseline
- Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Enbrel	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 25 MG/0.5ML	6629003000E525	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [8]

Product Name:Enbrel	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENBREL SURECLICK	ETANERCEPT SUBCUTANEOUS SOLUTION AUTO-INJECTOR 50 MG/ML	6629003000D530	Brand
ENBREL MINI	ETANERCEPT SUBCUTANEOUS SOLUTION CARTRIDGE 50 MG/ML	6629003000E230	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 25 MG/0.5ML	6629003000E525	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS SOLN PREFILLED SYRINGE 50 MG/ML	6629003000E530	Brand
ENBREL	ETANERCEPT SUBCUTANEOUS INJ 25 MG/0.5ML	66290030002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 8]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Function
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Prior Authorization Guideline

Guideline ID	GL-228412
Guideline Name	Enjaymo (sutimlimab-jome)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Enjaymo (sutimlimab-jome)
Cold agglutinin disease Indicated for the treatment of hemolysis in adults with cold agglutinin disease.

2 . Criteria

Product Name:Enjaymo	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENJAYMO	SUTIMLIMAB-JOME IV SOLN 1100 MG/22ML (50 MG/ML)	85803085302050	Brand

Approval Criteria

1 - Diagnosis of cold agglutinin disease (CAD) based on ALL of the following: [A, 2, 3]

- Presence of chronic hemolysis (e.g., bilirubin level above the normal reference range, elevated lactated dehydrogenase [LDH], decreased haptoglobin, increased reticulocyte count)
- Positive polyspecific direct antiglobulin test (DAT)
- Monospecific DAT strongly positive for C3d
- Cold agglutinin titer greater than or equal to 64 measured at 4 degree celsius
- Direct antiglobulin test (DAT) result for Immunoglobulin G (IgG) of 1 plus or less

AND

2 - Patient does not have cold agglutinin syndrome secondary to other factors (e.g., overt hematologic malignancy, primary immunodeficiency, infection, rheumatologic disease, systemic lupus erythematosus or other autoimmune disorders) [A, 1, 3]

AND

3 - Baseline hemoglobin level less than or equal to 10.0 gram per deciliter (g/dL) [3]

AND

4 - One of the following: [B,1, 3]

- Prescribed dose will not exceed 6,500 mg on day 0, 7, and every 14 days thereafter for patients weighing between 39 kg to less than 75 kg
- Prescribed dose will not exceed 7,500 mg on day 0, 7, and every 14 days thereafter for patients for patients weighing 75 kg or greater

AND

5 - Prescribed by or in consultation with a hematologist

Product Name:Enjaymo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENJAYMO	SUTIMLIMAB-JOME IV SOLN 1100 MG/22ML (50 MG/ML)	85803085302050	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ALL of the following: [1, 3]

- The patient has not required any blood transfusions after the first 5 weeks of therapy with Enjaymo
- Hemoglobin level greater than or equal to 12 gram per deciliter (g/dL) or increased greater than or equal to 2 g/dL from baseline

AND

2 - One of the following: [B,1, 3]

- Prescribed dose will not exceed 6,500 mg on day 0, 7, and every 14 days thereafter for patients weighing between 39 kg to less than 75 kg
- Prescribed dose will not exceed 7,500 mg on day 0, 7, and every 14 days thereafter for patients for patients weighing 75 kg or greater

AND

3 - Prescribed by or in consultation with a hematologist

3 . Background

Clinical Practice Guidelines
Weight-Based Dosing

The dosing is 6,500mg or 7,500mg Enjaymo (based on body weight) intravenously over approximately 60 minutes on Day 0, Day 7, and every 14 days thereafter	
Body Weight Range	Dose
39kg to less than 75kg	6,500 mg
75kg or greater	7,500 mg

4 . Endnotes

A. Patients with a confirmed diagnosis of CAD based on chronic hemolysis, polyspecific direct antiglobulin test (DAT), monospecific DAT specific for C3d, cold agglutinin titer ≥64 at 4°C, and IgG DAT ≤1+ and a recent blood transfusion in the 6 months prior to enrollment were administered 6.5 g or 7.5 g Enjaymo (based on body weight). Patients with cold agglutinin syndrome secondary to infection, rheumatologic disease, systemic lupus erythematosus, or overt hematologic malignancy were excluded. [1]
B. The recommended dosage of Enjaymo for patients with CAD is based on body weight. For patients weighing 39 kg to less than 75 kg, the recommended dose is 6,500 mg and for patients weighing 75 kg or more, the recommended dose is 7,500 mg [1]

Prior Authorization Guideline

Guideline ID	GL-233198
Guideline Name	Enspryng (satralizumab-mwge)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/21/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Enspryng (satralizumab-mwge)
Neuromyelitis Optica Spectrum Disorder (NMOSD) Indicated for the treatment of neuromyelitis optica spectrum disorder (NMOSD) in adult patients who are anti-aquaporin-4 (AQP4) antibody positive.

2 . Criteria

Product Name:Enspryng	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENSPRYNG	SATRALIZUMAB-MWGE SUBCUTANEOUS SOLN PREF SYRINGE 120 MG/ML	9940507040E520	Brand

Approval Criteria

1 - Diagnosis of neuromyelitis optica spectrum disorder (NMOSD)

AND

2 - Patient is anti-aquaporin-4 (AQP4) antibody positive

AND

3 - Prescribed by or in consultation with one of the following:

- Neurologist
- Ophthalmologist

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to rituximab

OR

4.2 For continuation of prior Enspryng therapy

Product Name:Enspryng	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENSPRYNG	SATRALIZUMAB-MWGE SUBCUTANEOUS SOLN PREF SYRINGE 120 MG/ML	9940507040E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229080
Guideline Name	Entyvio (vedolizumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Entyvio IV	
Diagnosis	Crohn's Disease (CD)
Approval Length	14 Weeks [1, A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENTYVIO	VEDOLIZUMAB FOR IV SOLUTION 300 MG	52503080002120	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - One of the following [2, 3]:

- Frequent diarrhea and abdominal pain
- At least 10% weight loss
- Complications such as obstruction, fever, abdominal mass
- Abnormal lab values (e.g., C-reactive protein [CRP])
- CD Activity Index (CDAI) greater than 220

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [2, 3]:

- 6-mercaptopurine
- azathioprine
- corticosteroids (e.g., prednisone)
- methotrexate

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to TWO of the following:

- Cimzia (certolizumab pegol)
- One formulary adalimumab product*
- One formulary ustekinumab product*
- Skyrizi (risankizumab-rzaa)
- Rinvoq (upadacitinib)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

5 - Prescribed by or in consultation with a gastroenterologist

Notes	* For review process only: Refer to the table in the Background section for carrier-specific formulary products

Product Name:Entyvio SC	
Diagnosis	Crohn's Disease (CD)
Approval Length	14 Weeks [1, A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENTYVIO	VEDOLIZUMAB SOLN PEN-INJECTOR 108 MG/0.68ML	52503080000D520	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - One of the following:

2.1 Will be used as a maintenance dose following two doses of Entyvio IV* for induction

OR

2.2 Patient is currently established on Entyvio IV*

AND

3 - Prescribed by or in consultation with a gastroenterologist

Notes	* This product will require prior authorization

Product Name:Entyvio IV & SC	
Diagnosis	Crohn's Disease (CD)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENTYVIO	VEDOLIZUMAB FOR IV SOLUTION 300 MG	52503080002120	Brand
ENTYVIO	VEDOLIZUMAB SOLN PEN-INJECTOR 108 MG/0.68ML	5250308000D520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

- Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline
- Reversal of high fecal output state

Product Name:Entyvio IV	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	14 Weeks [1, A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ENTYVIO	VEDOLIZUMAB FOR IV SOLUTION 300 MG	52503080002120	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [4, 5]:

- Greater than 6 stools per day
- Frequent blood in the stools
- Frequent urgency
- Presence of ulcers
- Abnormal lab values (e.g., hemoglobin, ESR, CRP)
- Dependent on, or refractory to, corticosteroids

AND

3 - Trial and failure, contraindication, or intolerance to ONE of the following conventional therapies [4, 5]:

- 6-mercaptopurine
- Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)
- Azathioprine
- Corticosteroids (e.g., prednisone)

AND

4 - One of the following:

4.1 Trial and failure, contraindication, or intolerance to TWO of the following:

- One formulary adalimumab product*
- Simponi (golimumab)
- One formulary ustekinumab product*
- Omvoh (mirikizumab-mrkz)
- Skyrizi (risankizumab-rzaa)
- Tremfya (guselkumab)
- Rinvoq (upadacitinib)
- Xeljanz/XR (tofacitinib/ER)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

5 - Prescribed by or in consultation with a gastroenterologist

Notes	* For review process only: Refer to the table in the Background sectio n for carrier-specific formulary products

5 . Revision History

Date	Notes
12/20/2024	New program

Eohilia (budesonide)

Prior Authorization Guideline

Guideline ID	GL-228644
Guideline Name	Eohilia (budesonide)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Eohilia (budesonide)
Eosinophilic Esophagitis (EoE) Indicated for 12 weeks of treatment in adult and pediatric patients 11 years of age and older with eosinophilic esophagitis (EoE). Limitations of Use EOHILIA has not been shown to be safe and effective for the treatment of EoE for longer than 12 weeks.

2 . Criteria

Product Name:Eohilia	
Diagnosis	Eosinophilic Esophagitis (EoE)
Approval Length	12 Weeks [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EOHILIA	BUDESONIDE ORAL SUSPENSION 2 MG/10ML	22100012001820	Brand

Approval Criteria

1 - Diagnosis of eosinophilic esophagitis (EoE)

AND

2 - Patient has symptoms of esophageal dysfunction (e.g., dysphagia, food impaction, heartburn, abdominal pain)

AND

3 - Patient has at least 15 intraepithelial eosinophils per high power field (HPF)

AND

4 - Other causes of esophageal eosinophilia have been excluded

AND

5 - Patient is 11 years of age or older

AND

6 - Trial and failure (of a minimum 8-week duration), contraindication, or intolerance to a proton pump inhibitor (e.g., pantoprazole, omeprazole)

AND

7 - Trial and failure (of a minimum 8-week duration), or intolerance to a topical (esophageal) corticosteroid (e.g., budesonide, fluticasone)

AND

8 - Prescribed by or in consultation with one of the following:

- Allergist/Immunologist
- Gastroenterologist

3 . Endnotes

A. EOHILIA has not been shown to be safe and effective for the treatment of EoE for longer than 12 weeks (1)

Prior Authorization Guideline

Guideline ID	GL-228847
Guideline Name	Epclusa (sofosbuvir/velpatasvir) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Epclusa (sofosbuvir and velpatasvir)
Chronic Hepatitis C (CHC) Indicated for the treatment of adults and pediatric patients 3 years of age and older with chronic hepatitis C virus (HCV) genotype 1, 2, 3, 4, 5 or 6 infection without cirrhosis or with compensated cirrhosis, and with decompensated cirrhosis for use in combination with ribavirin.

2 . Criteria

Product Name:Epclusa*	
Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 1, 2, 3, 4, 5, or 6
Approval Length	12 Week(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EPCLUSA	SOFOSBUVIR-VELPATASVIR TAB 200-50 MG	12359902650320	Brand
EPCLUSA	SOFOSBUVIR-VELPATASVIR TAB 400-100 MG	12359902650330	Generic
EPCLUSA	SOFOSBUVIR-VELPATASVIR PELLET PACK 150-37.5 MG	12359902653020	Brand
EPCLUSA	SOFOSBUVIR-VELPATASVIR PELLET PACK 200-50 MG	12359902653030	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C virus genotype 1, 2, 3, 4, 5, or 6

AND

2 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

3 - Patient does NOT have decompensated liver disease (Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist

Notes	*Approve brand Epclusa at NDC level (i.e., closed NDC) if criteria are met.

Product Name:Brand sofosbuvir/velpatasvir

Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 1, 4, 5, or 6
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOFOSBUVIR/VELPATASVIR	SOFOSBUVIR-VELPATASVIR TAB 400-100 MG	12359902650330	Generic

Approval Criteria

1 - Diagnosis of chronic hepatitis C virus genotype 1, 4, 5, or 6

AND

2 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

3 - Patient does NOT have decompensated liver disease (Child-Pugh Class B or C)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist

AND

5 - One of the following:

5.1 Both of the following:

5.1.1 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to ONE of the following:

- Brand Epclusa (sofosbuvir/velpatasvir)
- Brand Harvoni (ledipasvir/sofosbuvir)

AND

5.1.2 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

5.2 For continuation of prior brand sofosbuvir/velpatasvir

Product Name:Brand sofosbuvir/velpatasvir	
Diagnosis	Chronic Hepatitis C (without decompensation) - Genotype 1, 4, 5, or 6
Approval Length	12 Week(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
SOFOSBUVIR/VELPATASVIR	SOFOSBUVIR-VELPATASVIR TAB 400-100 MG	12359902650330	Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting a diagnosis of chronic hepatitis C virus genotype 1, 4, 5, or 6

AND

2 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

3 - Patient does NOT have decompensated liver disease (Child-Pugh Class B or C)

Product Name:Brand sofosbuvir/velpatasvir	
Diagnosis	Chronic Hepatitis C - Genotype 1, 4, 5, or 6 - Patients with Decompensated Liver Disease - Ribavirin Intolerance/Ineligible OR Prior Sofosbuvir or NS5A-based Treatment Failure
Approval Length	24 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOFOSBUVIR/VELPATASVIR	SOFOSBUVIR-VELPATASVIR TAB 400-100 MG	12359902650330	Generic

Approval Criteria

1 - Diagnosis of chronic hepatitis C virus genotype 1, 4, 5, or 6

AND

2 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

3 - Patient has decompensated liver disease (Child-Pugh Class B or C)

AND

4 - One of the following:

4.1 Patient is ribavirin intolerant or ineligible

OR

4.2 Both of the following:

4.2.1 Prior failure (defined as viral relapse, breakthrough while on therapy, or non-responder therapy) to Sovaldi or NS5A-based treatment

AND

4.2.2 Used in combination with ribavirin

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist

AND

6 - One of the following:

6.1 Trial and failure or intolerance to ONE of the following:

- Brand Epclusa
- Brand Harvoni (ledipasvir/sofosbuvir)

OR

6.2 For continuation of prior brand sofosbuvir/velpatasvir

Product Name:Brand sofosbuvir/velpatasvir	
Diagnosis	Chronic Hepatitis C - Genotype 1, 4, 5, or 6 - Patients with Decompensated Liver Disease - Ribavirin Intolerance/Ineligible OR Prior Sofosbuvir or NS5A-based Treatment Failure
Approval Length	24 Week(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
SOFOSBUVIR/VELPATASVIR	SOFOSBUVIR-VELPATASVIR TAB 400-100 MG	12359902650330	Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting a diagnosis of chronic hepatitis C virus genotype 1, 4, 5, or 6

AND

2 - Not used in combination with another HCV direct acting antiviral agent [e.g., Sovaldi (sofosbuvir)]

AND

3 - Patient has decompensated liver disease (Child-Pugh Class B or C)

AND

4 - One of the following:

4.1 Patient is ribavirin intolerant or ineligible

OR

4.2 Both of the following:

4.2.1 Prior failure (defined as viral relapse, breakthrough while on therapy, or non-responder therapy) to Sovaldi or NS5A-based treatment

AND

4.2.2 Used in combination with ribavirin

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist

AND

6 - One of the following:

6.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure or intolerance to ONE of the following:

- Brand Epclusa
- Brand Harvoni (ledipasvir/sofosbuvir)

OR

6.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

Product Name:Brand sofosbuvir/velpatasvir	
Diagnosis	Chronic Hepatitis C - Genotype 2, 3 - Patients with Decompensated Liver Disease - Ribavirin Intolerance/Ineligible OR Prior Sofosbuvir or NS5A-based Treatment Failure

Prior Authorization Guideline

Guideline ID	GL-228850
Guideline Name	Epidiolex (cannabidiol)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Epidiolex (cannabidiol oral solution)
Lennox-Gastaut syndrome (LGS) Indicated for the treatment of seizures associated with Lennox-Gastaut syndrome (LGS) in patients 1 year of age and older. **Dravet syndrome (DS)** Indicated for the treatment of seizures associated with Dravet syndrome (DS) in patients 1 year of age and older. **Tuberous sclerosis complex (TSC)** Indicated for the treatment of seizures associated with tuberous sclerosis complex (TSC) in patients 1 year of age and older.

2 . Criteria

Product Name:Epidiolex

Diagnosis	Lennox-Gastaut syndrome (LGS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EPIDIOLEX	CANNABIDIOL SOLN 100 MG/ML	72600017002020	Brand

Approval Criteria

1 - Diagnosis of seizures associated with Lennox-Gastaut syndrome (LGS)

AND

2 - Trial of, contraindication, or intolerance to TWO formulary anticonvulsants (e.g., topiramate, lamotrigine, valproate) [2, A-B]

AND

3 - Patient is 1 year of age or older

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Epidiolex	
Diagnosis	Dravet syndrome (DS)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Diagnosis of seizures associated with tuberous sclerosis complex (TSC)

AND

2 - Patient is 1 year of age or older

AND

3 - Prescribed by or in consultation with a neurologist

Product Name:Epidiolex	
Diagnosis	Lennox-Gastaut syndrome (LGS), Dravet syndrome (DS), Tuberous sclerosis complex (TSC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EPIDIOLEX	CANNABIDIOL SOLN 100 MG/ML	72600017002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. The effectiveness of Epidiolex for the treatment of seizures associated with LGS was established in two randomized, double-blind, placebo-controlled trials in patients aged 2 to 55 years. In study 2, 225 patients underwent randomization, of whom 76 were assigned to the 20-mg cannabidiol group, 73 to the 10-mg cannabidiol group, and 76 to the placebo group; Patients in each group had previously received a median of 6 antiepileptic drugs (range, 0 to 22), but the drugs had failed to control the seizures; the patients were receiving a median of 3 antiepileptic drugs concomitantly at the time of trial entry. [3]

B. To improve patient care and facilitate clinical research, the International League Against Epilepsy (ILAE) appointed a Task Force to formulate a consensus definition of drug resistant epilepsy. The following definition was formulated: Drug resistant epilepsy may be defined as failure of adequate trials of two tolerated and appropriately chosen and used antiepileptic drug (AED) schedules (whether as monotherapies or in combination) to achieve sustained seizure freedom. [4]

Prior Authorization Guideline

Guideline ID	GL-228646
Guideline Name	Epinephrine Injection Products
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: EpiPen (epinephrine injection), EpiPen Jr. (epinephrine injection), epinephrine injection
Allergic reactions Indicated in the emergency treatment of allergic reactions (Type I) including anaphylaxis to stinging insects (e.g., order Hymenoptera, which include bees, wasps, hornets, yellow jackets and fire ants) and biting insects (e.g., triatoma, mosquitoes), allergen immunotherapy, foods, drugs, diagnostic testing substances (e.g., radiocontrast media) and other allergens, as well as idiopathic anaphylaxis or exercise-induced anaphylaxis.

2 . Criteria

Product Name:Brand EpiPen, Brand EpiPen Jr.	
Approval Length	6 month(s)

Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
EPIPEN-JR 2-PAK	EPINEPHRINE SOLUTION AUTO-INJECTOR 0.15 MG/0.3ML (1:2000)	3890004000D520	Brand
EPIPEN 2-PAK	EPINEPHRINE SOLUTION AUTO-INJECTOR 0.3 MG/0.3ML (1:1000)	3890004000D540	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure (within the past 180 days) or intolerance to generic epinephrine

3 . References

Prior Authorization Guideline

Guideline ID	GL-228413
Guideline Name	Erectile Dysfunction Medications
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cialis (tadalafil)
Benign Prostatic Hyperplasia (BPH) and Erectile Dysfunction (ED) Indicated for the treatment of erectile dysfunction (ED), the treatment of the signs and symptoms of benign prostatic hyperplasia (BPH) and for the treatment of erectile dysfunction (ED) and the signs and symptoms of BPH (ED/BPH). Limitation of use: If Cialis is used with finasteride to initiate BPH treatment, such use is recommended for up to 26 weeks because the incremental benefit of Cialis decreases from 4 weeks until 26 weeks, and the incremental benefit of Cialis beyond 26 weeks is unknown.

2 . Criteria

Product Name:Brand Cialis 2.5 mg, Brand Cialis 5 mg, Generic tadalafil 2.5 mg, or Generic tadalafil 5 mg

Approval Length	12 month(s)
Guideline Type	Non-Formulary / Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CIALIS	TADALAFIL TAB 2.5 MG	40304080000302	Brand
CIALIS	TADALAFIL TAB 5 MG	40304080000305	Brand
TADALAFIL	TADALAFIL TAB 2.5 MG	40304080000302	Generic
TADALAFIL	TADALAFIL TAB 5 MG	40304080000305	Generic

Approval Criteria

1 - Diagnosis of benign prostatic hyperplasia (BPH) [A]

AND

2 - The request is for one of the following: [B]

- Cialis (tadalafil) 2.5 mg
- Cialis (tadalafil) 5 mg

3 . Endnotes

A. Cialis (tadalafil) is the only impotence agent approved by the FDA for the treatment of benign prostatic hyperplasia (BPH). The medication is available as a 2.5 mg, 5 mg, 10 mg, and 20 mg tablet; however, only the 2.5 mg and 5 mg doses are used for BPH. [1]
B. For BPH: The recommended dose is 5 mg once daily; however, this dose may be reduced to 2.5 mg once daily for patients with renal impairment or drug interactions (i.e., use with CYP3A4 inhibitors). [1]

Prior Authorization Guideline

Guideline ID	GL-228852
Guideline Name	Ergot Alkaloids
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: D.H.E. 45 (dihydroergotamine mesylate) injection
Migraine Indicated for the acute treatment of migraine headaches with or without aura. **Cluster Headache** Indicated for the acute treatment of cluster headache episodes.
Drug Name: Migranal (dihydroergotamine mesylate) nasal spray
Migraine Indicated for the acute treatment of migraine headaches with or without aura. Not intended for the prophylactic therapy of migraine or for the management of hemiplegic or basilar migraine.
Drug Name: Cafergot (ergotamine tartrate and caffeine) tablet, Ergomar (ergotamine tartrate) sublingual tablet, Migergot (ergotamine tartrate and caffeine) suppository
Headache Indicated as therapy to abort or prevent vascular headache, e.g., migraine, migraine variants, or so-called “histaminic cephalalgia”.
Drug Name: Trudhesa (dihydroergotamine mesylate) nasal spray

Migraine Indicated for the acute treatment of migraine with or without aura in adults. Limitations of Use: - Not indicated for the preventive treatment of migraine. - Not indicated for the management of hemiplegic or basilar migraine.

2 . Criteria

Product Name:Brand Cafergot tablet, Generic ergotamine tartrate/caffeine tablet, Brand D.H.E. 45 injection, Generic dihydroergotamine mesylate injection, Ergomar sublingual tablet, Migergot suppository, Brand Migranal nasal spray, Generic dihydroergotamine mesylate nasal spray, or Trudhesa nasal spray

Diagnosis	Migraines
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DIHYDROERGOTAMINE MESYLATE	DIHYDROERGOTAMINE MESYLATE NASAL SPRAY 4 MG/ML	67000030102060	Generic
MIGRANAL	DIHYDROERGOTAMINE MESYLATE NASAL SPRAY 4 MG/ML	67000030102060	Brand

TRUDHESA	DIHYDROERGOTAMINE MESYLATE HFA NASAL AEROSOL 0.725 MG/ACT	67000030113420	Brand

Approval Criteria

1 - Diagnosis of migraine headaches with or without aura

AND

2 - Will be used for the acute treatment of migraine

AND

3 - Patient is 18 years of age or older [A]

AND

4 - One of the following: [3]

- Trial and failure or intolerance to two triptans (e.g., eletriptan, rizatriptan, sumatriptan)
- Contraindication to all triptans

AND

5 - If patient has 4 or more headache days per month, patient must be currently treated with one of the following: [B, 4]

- Elavil (amitriptyline) or Effexor (venlafaxine) unless there is a contraindication or intolerance to these medications
- Depakote/Depakote ER (divalproex sodium) or Topamax (topiramate) unless there is a contraindication or intolerance to these medications
- A beta-blocker (i.e., atenolol, propranolol, nadolol, timolol, or metoprolol) unless there is a contraindication or intolerance to these medications
- Atacand (candesartan) unless there is a contraindication or intolerance to this medication
- Generic lisinopril unless there is a contraindication or intolerance to this medication

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228415
Guideline Name	Erleada (apalutamide)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Erleada (apalutamide)
Non-metastatic castration-resistant prostate cancer Indicated for the treatment of patients with non-metastatic, castration-resistant prostate cancer (NM-CRPC).
Drug Name: Erleada (apalutamide)
Metastatic castration-sensitive prostate cancer Indicated for the treatment of patients with metastatic, castration-sensitive prostate cancer (M-CSPC).

2 . Criteria

Product Name:Erleada	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ERLEADA	APALUTAMIDE TAB 60 MG	21402410000320	Brand
ERLEADA	APALUTAMIDE TAB 240 MG	21402410000360	Brand

Approval Criteria

1 - Diagnosis of prostate cancer

Product Name:Erleada	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ERLEADA	APALUTAMIDE TAB 60 MG	21402410000320	Brand
ERLEADA	APALUTAMIDE TAB 240 MG	21402410000360	Brand

Approval Criteria

1 - Patient does not show evidence of disease progression while on therapy

3 . References

1. Erleada prescribing information. Janssen Ortho LLC. Gurabo, PR. December 2023.

Prior Authorization Guideline

Guideline ID	GL-233237
Guideline Name	Erythropoietic Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	3/17/2000
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Aranesp (darbepoetin alfa)
Anemia Due to Chronic Kidney Disease Indicated for the treatment of anemia due to chronic kidney disease (CKD), including patients on dialysis and patients not on dialysis. **Anemia Due to Chemotherapy in Patients with Cancer** Indicated for treatment of anemia in patients with non-myeloid malignancies where anemia is due to the effect of concomitant myelosuppressive chemotherapy, and upon initiation, there is a minimum of 2 additional months of planned chemotherapy. Limitations of Use: Aranesp has not been shown to improve quality of life, fatigue, or patient well-being. Aranesp is not indicated for use: (1) In patients with cancer receiving hormonal agents, biologic products, or radiotherapy, unless also receiving concomitant myelosuppressive chemotherapy; (2) In patients with cancer receiving myelosuppressive chemotherapy when the anticipated outcome is cure; (3) In patients with cancer receiving myelosuppressive chemotherapy in whom the anemia can be managed by transfusion; and (4) As a substitute for red blood cell (RBC) transfusions in patients who require immediate correction of anemia.

Off Label Uses: Anemia in patients with Myelodysplastic Syndrome (MDS) Has been used for the treatment of anemia in patients with MDS. [20]

Drug Name: Epogen (epoetin alfa), Procrit (epoetin alfa), and Retacrit (epoetin alfa-epbx)

Anemia Due to Chronic Kidney Disease Indicated for the treatment of anemia due to chronic kidney disease (CKD), including patients on dialysis and not on dialysis to decrease the need for red blood cell (RBC) transfusion.

Anemia Due to Zidovudine in Patients with HIV-infection Indicated for the treatment of anemia due to zidovudine administered at less than or equal to 4200 mg/week in patients with HIV-infection with endogenous serum erythropoietin levels of less than or equal to 500 mUnits/mL.

Anemia Due to Chemotherapy in Patients with Cancer Indicated for the treatment of anemia in patients with non-myeloid malignancies where anemia is due to the effect of concomitant myelosuppressive chemotherapy and upon initiation, there is a minimum of 2 additional months of planned chemotherapy. Limitations of Use: Epoetin alfa has not been shown to improve quality of life, fatigue, or patient well-being. Epoetin alfa is not indicated for use: (1) In patients with cancer receiving hormonal agents, biologic products, or radiotherapy, unless also receiving concomitant myelosuppressive chemotherapy; (2) In patients with cancer receiving myelosuppressive chemotherapy when the anticipated outcome is cure; (3) In patients with cancer receiving myelosuppressive chemotherapy in whom the anemia can be managed by transfusion; (4) As a substitute for red blood cell (RBC) transfusions in patients who require immediate correction of anemia.

Reduction of Allogeneic Red Blood Cell Transfusions in Patients Undergoing Elective, Noncardiac, Nonvascular Surgery Indicated to reduce the need for allogeneic RBC transfusions among patients with perioperative hemoglobin greater than 10 to less than or equal to 13 g/dL who are at high risk for perioperative blood loss from elective, noncardiac, nonvascular surgery. Epoetin alfa is not indicated for patients who are willing to donate autologous blood preoperatively. Limitations of Use: Epoetin alfa has not been shown to improve quality of life, fatigue, or patient well-being. Epoetin alfa is not indicated for use: (1) In patients scheduled for surgery who are willing to donate autologous blood; (2) In patients undergoing cardiac or vascular surgery; (3) As a substitute for red blood cell (RBC) transfusions in patients who require immediate correction of anemia.

Off Label Uses: Anemia associated with HIV infection Have been used for the treatment of anemia associated with HIV infection in patients not receiving zidovudine. [5]

Anemia in Hepatitis C virus (HCV) infected patients due to combination therapy of ribavirin and interferon or peg-interferon Have been used for the treatment of anemia in patients with hepatitis C virus (HCV) infection who are being treated with the combination of ribavirin and interferon or peginterferon alfa. [20]

Anemia in patients with Myelodysplastic Syndrome (MDS) Have been used for the treatment of anemia in patients with MDS. [5, 20]

Drug Name: Mircera (methoxy polyethylene glycol-epoetin beta)
Anemia Due to Chronic Kidney Disease Indicated for the treatment of anemia associated with chronic kidney disease (CKD) in: (1) adult patients on dialysis and adult patients not on dialysis; (2) pediatric patients 3 months to 17 years of age on dialysis or not on dialysis, who are converting from another ESA after their hemoglobin level was stabilized with an ESA. Limitations of use: Mircera is not indicated and is not recommended: (1) In the treatment of anemia due to cancer chemotherapy; or (2) As a substitute for RBC transfusions in patients who require immediate correction of anemia. Mircera has not been shown to improve symptoms, physical functioning, or health-related quality of life.

2 . Criteria

Product Name:Aranesp, Epogen, Procrit, or Retacrit	
Diagnosis	Anemia Due to Chronic Kidney Disease (CKD)

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Adequate iron stores confirmed by both of the following: [A, J]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

3 - Verification of anemia as defined by one of the following laboratory values collected within 30 days of the request: [1-3, 9, 13-17, 29, 33, B]

- Hematocrit (Hct) less than 30%
- Hemoglobin (Hgb) less than 10 g/dL

AND

4 - One of the following: [1-3, 33, L]

4.1 Patient is on dialysis

OR

4.2 All of the following:

4.2.1 Patient is NOT on dialysis

AND

4.2.2 The rate of hemoglobin decline indicates the likelihood of requiring a red blood cell (RBC) transfusion

AND

4.2.3 Reducing the risk of alloimmunization and/or other RBC transfusion-related risks is a goal

AND

5 - History of use or unavailability of both of the following (applies to Epogen only): [O]

- Aranesp
- Retacrit or Procrit

Product Name:Mircera	
Diagnosis	Anemia Due to Chronic Kidney Disease (CKD)
Approval Length	6 month(s)

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Adequate iron stores confirmed by both of the following: [A, J]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

3 - One of the following:

3.1 All of the following:

3.1.1 Patient is 18 years of age or older

AND

3.1.2 Verification of anemia as defined by one of the following laboratory values collected within 30 days of the request: [9, 13-17, 29, 31, B]

- Hematocrit (Hct) less than 30%
- Hemoglobin (Hgb) less than 10 g/dL

AND

3.1.3 One of the following: [31]

3.1.3.1 Patient is on dialysis

OR

3.1.3.2 All of the following:

3.1.3.2.1 Patient is NOT on dialysis

AND

3.1.3.2.2 The rate of hemoglobin decline indicates the likelihood of requiring a red blood cell (RBC) transfusion

AND

3.1.3.2.3 Reducing the risk of alloimmunization and/or other RBC transfusion-related risks is a goal

OR

3.2 All of the following:

3.2.1 Patient is between 3 months and 17 years of age

AND

3.2.2 Patient's hemoglobin level has been stabilized by treatment with another erythropoietin stimulating agent (ESA) (e.g., Aranesp, Retacrit)

AND

3.2.3 Patient is converting to Mircera from another ESA (e.g., Aranesp, Retacrit)

AND

4 - History of use or unavailability of both of the following: [O]

- Aranesp
- Retacrit or Procrit

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - One of the following:

2.1 Both of the following:

- Patient is on dialysis
- Most recent or average Hct over 3 months is 33% or less (Hgb 11 g/dL or less)

OR

2.2 Both of the following:

- Patient is not on dialysis
- Most recent or average (avg) Hct over 3 mo is 30% or less (Hgb 10 g/dL or less)

OR

2.3 Both of the following:

- Request is for a pediatric patient
- Most recent or average Hct over 3 mo is 36% or less (Hgb 12 g/dL or less)

AND

3 - One of the following: [1-3, 31, 33]

3.1 Decrease in the need for blood transfusion

OR

3.2 Hemoglobin (Hgb) increased greater than or equal to 1 g/dL from pre-treatment level

AND

4 - Adequate iron stores confirmed by both of the following: [A, J]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

Notes	^Authorization will be given if physician is aware of iron deficiency and is taking steps to replenish iron stores.

- Hematocrit (Hct) less than 36%

AND

3 - Serum erythropoietin level less than or equal to 500 mU/mL [2-3, 24, 26, 33]

AND

4 - One of the following:

- Patient is receiving zidovudine therapy [2-3, 33]
- Diagnosis of HIV infection [off-label] [5, 11, 24-28]

AND

5 - History of use or unavailability of Retacrit or Procrit (applies to Epogen only) [O]

Product Name:Epogen, Procrit, or Retacrit	
Diagnosis	Anemia in Patients with HIV-infection
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Approval Criteria

1 - Verification of anemia as defined by one of the following: [2, 3, 33]

- Most recent or average hematocrit (Hct) over a 3-month period was below 36%
- Most recent or average hemoglobin (Hgb) over a 3-month period was below 12 g/dL

AND

2 - One of the following: [2, 3, 33]

2.1 Decrease in the need for blood transfusion

OR

2.2 Hemoglobin (Hgb) increased greater than or equal to 1 g/dL from pre-treatment level

Product Name:Epogen, Procrit	
Diagnosis	Anemia in Patients with HIV-infection
Approval Length	6 month(s)
Guideline Type	Non Formulary

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming adequate iron stores by both of the following: [2-3, 33]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

2 - Submission of medical records (e.g., chart notes) confirming anemia as defined by one of the following laboratory values collected within 30 days of the request:

- Hemoglobin (Hgb) less than 12 g/dL [11, 25-28, K]
- Hematocrit (Hct) less than 36%

AND

3 - Submission of medical records (e.g., chart notes) confirming serum erythropoietin level less than or equal to 500 mU/mL [2-3, 24, 26, 33]

AND

4 - One of the following:

- Patient is receiving zidovudine therapy [2-3, 33]
- Diagnosis of HIV infection [off-label] [5, 11, 24-28]

AND

5 - Paid claims or submission of medical records (e.g., chart notes) confirming history of use or unavailability of Retacrit or Procrit (applies to Epogen only) [O]

Approval Criteria

1 - Verification that other causes of anemia have been ruled out [1-3, 33, M]

AND

2 - Verification of anemia as defined by one of the following laboratory values collected within the prior two weeks of the request: [1-3, 33]

- Hematocrit (Hct) less than 30%
- Hemoglobin (Hgb) less than 10 g/dL [N]

AND

3 - Adequate iron stores confirmed by both of the following: [1-3, 8, 33, G]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - Verification that the cancer is a non-myeloid malignancy [1-3, 33, F]

AND

5 - Patient is receiving chemotherapy [1-3, 33, D]

AND

6 - History of use or unavailability of both of the following (applies to Epogen only): [O]

- Aranesp
- Retacrit or Procrit

Approval Criteria

1 - Diagnosis of Myelodysplastic Syndrome (MDS) [4]

AND

2 - One of the following: [4]

- Serum erythropoietin level less than or equal to 500 mU/mL
- Diagnosis of transfusion-dependent MDS

AND

3 - Adequate iron stores confirmed by both of the following: [4, A, H]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - History of use or unavailability of both of the following (applies to Epogen only): [O]

- Aranesp
- Retacrit or Procrit

Product Name:Aranesp, Epogen, Procrit, or Retacrit	
Diagnosis	Anemia in Myelodysplastic Syndrome (MDS) patients [off-label]
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Approval Criteria

1 - Verification of anemia as defined by one of the following: [4, E]

- Most recent or average hematocrit (Hct) over a 3-month period was less than or equal to 36%
- Most recent or average hemoglobin (Hgb) over a 3-month period was less than or equal to 12 g/dL

AND

2 - One of the following: [1-3, 33]

2.1 Decrease in the need for blood transfusion

OR

2.2 Hemoglobin (Hgb) increased greater than or equal to 1.5 g/dL from pre-treatment level

Product Name:Epogen, Procrit	
Diagnosis	Anemia in Myelodysplastic Syndrome (MDS) patients [off-label] [4-6, 20]
Approval Length	3 months [I]
Guideline Type	Non Formulary

Approval Criteria

1 - Diagnosis of hepatitis C viral (HCV) infection [12, 20]

AND

2 - Adequate iron stores confirmed by both of the following: [2-3, 33]

- Patient's ferritin level is greater than 100 mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

3 - Verification of anemia as defined by one of the following laboratory values collected within 30 days of the request: [P]

- Hematocrit (Hct) less than 36%
- Hemoglobin (Hgb) less than 12 g/dL

AND

4 - Verification of both of the following:

4.1 Patient is receiving ribavirin

AND

4.2 Patient is receiving one of the following:

- interferon alfa
- peginterferon alfa

AND

5 - History of use or unavailability of Retacrit or Procrit (applies to Epogen only) [O]

Product Name:Epogen, Procrit, or Retacrit	
Diagnosis	Anemia in HCV-infected patients due to ribavirin in combination with interferon or peg-interferon [off-label]
Approval Length	3 Months or if patient has demonstrated response to therapy, authorization will be issued for the full course of ribavirin therapy.
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

1 - Off-label guideline approval criteria have been met*

AND

2 - Off-label requests other than those listed above for coverage in patients with Hgb greater than 10 g/dL or Hct greater than 30% will not be approved [1-3, 31, 33]

Notes	*Off-label requests will be evaluated on a case-by-case basis by a clin ical pharmacist

3 . Endnotes

A. Aranesp, Epogen, Mircera, Procrit, and Retacrit Prescribing Information recommend prior and during therapy, the patient's iron stores should be evaluated. Administer supplemental iron therapy when serum ferritin is less than 100 mcg/L or when serum transferrin saturation is less than 20%. The majority of patients with CKD will require supplemental iron during the course of ESA therapy. [1-3, 31, 33]
B. Aranesp, Epogen, Mircera, Procrit, or Retacrit Prescribing Information states that dialysis, and non-dialysis patients with symptomatic anemia considered for therapy should have a Hgb < 10 g/dL. [1-3, 31, 33]
C. ESA treatment duration for each course of chemotherapy includes the 8 weeks following the final dose of myelosuppressive chemotherapy in a chemotherapy regimen. [18]
D. ESAs are not indicated for patients receiving myelosuppressive therapy when the anticipated outcome is cure. [1-3, 33]
E. NCCN panel recommends MDS patients aim for a target hemoglobin level of less than or equal to 12 g/dL. [4]
F. The American Cancer Society definition of "non-myeloid malignancy" is any malignancy that is not a myeloid leukemia. Non-myeloid cancers include all types of carcinoma, all types of sarcoma, melanoma, lymphomas, lymphocytic leukemias (ALL and CLL), and multiple myeloma. [30]
G. Absolute iron deficiency is defined as ferritin <30 ng/mL and TSAT <20%. Functional iron deficiency in patients receiving ESAs is defined as ferritin 30-800 ng/mL and TSAT 20%-50%. No iron deficiency is defined as ferritin >800 ng/mL or TSAT greater or equal to 50%. [8]
H. Iron repletion needs to be verified before instituting Epo therapy. [4]
I. Detection of erythroid responses generally occurs within 6 to 8 weeks of treatment. If no response occurs in this time frame, this treatment should be considered a failure and discontinued. [4]
J. Iron stores evaluation is recommended to occur every month during initial erythropoietin treatment in adults with chronic kidney disease or at least every 3 months during stable ESA treatment or in patients with HD-CKD not treated with an erythropoietin. [7]
K. Anemia in HIV patients has been defined as hemoglobin less than 10 g/dL [11, 25-26], hemoglobin less than 11 g/dL [11, 27], or hemoglobin less than 12 g/dL. [17]
L. Although primarily used in patients with ESRD, ESAs such as erythropoietin and darbepoetin alfa also correct the anemia in those with CKD who do not yet require dialysis. [21, 32]
M. Examples of other anemias include: vitamin B12, folate or iron deficiency anemia, hemolysis, or gastrointestinal bleeding.
N. Data from a systematic review by the Agency for Healthcare Research and Quality (AHRQ) determined that delaying ESA treatment until hemoglobin is less than 10 g/dL resulted in fewer thromboembolic events and a reduced mortality. [8]
O. Per consult with hematologist/oncologist, if a patient does not respond to one short-acting ESA, switching to another short-acting agent would not provide any added

benefit; instead, one would increase the dose or perhaps switch to a long-acting agent. [34]

P. Epoetin alfa was effective in maintaining the dose of rivabirin in anemic patients with chronic hepatitis C virus in patients with a baseline hemoglobin of 12 g/dL or less. [20]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228418
Guideline Name	Evenity (romosozumab-aqqg injection)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Evenity (romosozumab-aqqg injection)
Postmenopausal women with osteoporosis at high risk of fracture Indicated for the treatment of osteoporosis in postmenopausal women at high risk for fracture, defined as a history of osteoporotic fracture, or multiple risk factors for fracture; or patients who have failed or are intolerant to other available osteoporosis therapy.

2 . Criteria

Product Name:Evenity	
Approval Length	12 Months [A]*
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EVENITY	ROMOSOZUMAB-AQQG INJ SOLN PREFILLED SYRINGE 105 MG/1.17ML	3004486010E520	Brand

Approval Criteria

1 - Diagnosis of postmenopausal osteoporosis or osteopenia

AND

2 - One of the following:

2.1 For diagnosis of osteoporosis, both of the following:

2.1.1 Bone mineral density (BMD) T-score of -2.5 or lower in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.1.2 One of the following:

2.1.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.1.2.2 Trial and failure, contraindication, or intolerance to one anti-resorptive treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab]) [B]

OR

2.2 For diagnosis of osteopenia, both of the following:

2.2.1 BMD T-score between -1.0 and -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site)

AND

2.2.2 One of the following:

2.2.2.1 History of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm

OR

2.2.2.2 Both of the following:

2.2.2.2.1 Trial and failure, contraindication, or intolerance to one anti-resorptive treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia [denosumab]) [B]

AND

2.2.2.2.2 One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities: [C]

- Major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions
- Hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions

AND

3 - Trial of, contraindication, or intolerance to one of the following:

- Forteo (teriparatide)
- Tymlos (abaloparatide)

AND

4 - Treatment duration of Evenity (romosozumab-aqqg) has not exceeded a total of 12 months during the patient's lifetime [A]

Notes	Evenity (romosozumab-aqqg) not to exceed the FDA-recommended tr eatment duration of 12 monthly doses.

	*Evenity will not be approved if the patient has already received 12 m onths of therapy; if the patient has not yet received 12 months of thera py, approval may be granted for the balance of the time remaining.

3 . Endnotes

A. The anabolic effect of Evenity wanes after 12 monthly doses of therapy. Therefore, the duration of Evenity use should be limited to 12 monthly doses. If osteoporosis therapy remains warranted, continued therapy with an anti-resorptive agent should be considered. [1]
B. Antiresorptive agents work by slowing the resorption or breakdown part of the remodeling cycle. Examples of antiresorptive agents include bisphosphonates (alendronate, ibandronate, risedronate, zoledronic acid), Prolia (denosumab), calcitonin, and selective estrogen receptor modulators (raloxifene). [2-4]
C. The WHO FRAX tool is available at https://frax.shef.ac.uk/FRAX/ and incorporates multiple clinical factors that predict fracture risk, largely independent of BMD. [2]

Prior Authorization Guideline

Guideline ID	GL-228648
Guideline Name	Evkeeza (evinacumab-dgnb)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Evkeeza (evinacumab-dgnb)
Homozygous Familial Hypercholesterolemia (HoFH) Indicated as an adjunct to other low-density lipoprotein-cholesterol (LDL-C) lowering therapies for the treatment of adult and pediatric patients, aged 5 years and older, with homozygous familial hypercholesterolemia (HoFH). **Limitations of Use** The safety and effectiveness of Evkeeza have not been established in patients with other causes of hypercholesterolemia, including those with heterozygous familial hypercholesterolemia (HeFH). The effects of Evkeeza on cardiovascular morbidity and mortality have not been determined.

2 . Criteria

Product Name:Evkeeza

Diagnosis	Homozygous Familial Hypercholesterolemia [HoFH]
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EVKEEZA	EVINACUMAB-DGNB IV SOLN 345 MG/2.3ML (150 MG/ML)	39392030202020	Brand
EVKEEZA	EVINACUMAB-DGNB IV SOLN 1200 MG/8ML (150 MG/ML)	39392030202040	Brand

Approval Criteria

1 - Diagnosis of homozygous familial hypercholesterolemia (HoFH) as confirmed by one of the following: [2]

1.1 Genetic confirmation of two mutant alleles at the LDLR, APOB, PCSK9, or LDLRAP1 gene locus

OR

1.2 Both of the following:

1.2.1 Untreated LDL-C greater than 400 mg/dL

AND

1.2.2 One of the following:

- Xanthoma before 10 years of age
- Evidence of heterozygous familial hypercholesterolemia in both parents

AND

2 - Patient is 5 years of age or older

AND

3 - One of the following:

- Patient is currently treated with maximally tolerated statin therapy
- Patient is statin intolerant as evidenced by an inability to tolerate at least two statins, with at least one started at the lowest starting daily dose, due to intolerable symptoms or clinically significant biomarker changes of liver function or muscle function (e.g., creatine kinase)
- Patient has a contraindication to all statins

AND

4 - One of the following:

- Patient has been receiving ezetimibe (Zetia) therapy as adjunct to maximally tolerated statin therapy
- Patient has a history of intolerance or contraindication to ezetimibe
- Patient is less than 10 years of age

AND

5 - One of the following:

- Patient has been treated with PCSK9 therapy or did not respond to PCSK9 therapy
- Physician attests that the patient is known to have two LDL-receptor negative alleles (little to no residual function) and therefore would not respond to PCSK9 therapy
- Patient has a history of intolerance or contraindication to PCSK9 therapy
- Patient is less than 10 years of age

AND

6 - Patient will continue other traditional lipid-lowering therapies (e.g., maximally tolerated statins, ezetimibe) in combination with Evkeeza

AND

7 - Dose will not exceed 15 mg/kg of bodyweight infused once every 4 weeks

AND

8 - Prescribed by or in consultation with one of the following:

- Cardiologist
- Endocrinologist
- Hepatologist

Product Name:Evkeeza	
Diagnosis	Homozygous Familial Hypercholesterolemia [HoFH]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EVKEEZA	EVINACUMAB-DGNB IV SOLN 345 MG/2.3ML (150 MG/ML)	39392030202020	Brand
EVKEEZA	EVINACUMAB-DGNB IV SOLN 1200 MG/8ML (150 MG/ML)	39392030202040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to as evidenced by LDL-C reduction from baseline

AND

2 - Patient will continue other traditional lipid-lowering therapies (e.g., maximally tolerated statins, ezetimibe) in combination with Evkeeza

AND

3 - Dose will not exceed 15 mg/kg of bodyweight infused once every 4 weeks

AND

4 - Prescribed by or in consultation with one of the following:

- Cardiologist
- Endocrinologist
- Hepatologist

3 . Endnotes

A. Per the 2018 ACC/AHA national treatment guidelines, adherence, response to therapy, and adverse effects should be monitored within 4 -12 weeks following LDL-C lowering medication initiation or dose adjustment, repeated every 3 to 12 months as needed. Additionally, in the Evkeeza pivotal trial the primary outcome of change in LDL-C was evaluated at 24 weeks. [3]
B. In patients treated with statins, it is recommended to measure creatine kinase levels in individuals with severe statin-associated muscle symptoms. [3]

J Am Coll Cardiol 2019; 73:e285-e350.

Prior Authorization Guideline

Guideline ID	GL-229138
Guideline Name	Evrysdi (risdiplam)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/21/2020
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Evrysdi (risdiplam)
Spinal Muscular Atrophy Indicated for the treatment of spinal muscular atrophy (SMA) in pediatric and adult patients.

2 . Criteria

Product Name:Evrysdi	
Diagnosis	Spinal Muscular Atrophy
Approval Length	12 Months

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EVRYSDI	RISDIPLAM FOR SOLN 0.75 MG/ML	74706560002120	Brand

Approval Criteria

1 - Diagnosis of spinal muscular atrophy (SMA) Type I, II, or III [1-3, A]

AND

2 - Both of the following: [1-7]

2.1 The mutation or deletion of genes in chromosome 5q resulting in one of the following: [B]

2.1.1 Homozygous gene deletion or mutation (e.g., homozygous deletion of exon 7 at locus 5q13)

OR

2.1.2 Compound heterozygous mutation (e.g., deletion of SMN1 exon 7 [allele 1] and mutation of SMN1 [allele 2])

AND

2.2 Patient has at least 2 copies of SMN2 [C]

AND

3 - Patient is not dependent on invasive ventilation or tracheostomy [2-3, D]

AND

4 - Patient is not dependent on the use of non-invasive ventilation beyond use for naps and nighttime sleep [3, D]

AND

5 - At least one of the following exams (based on patient age and motor ability) has been conducted to establish baseline motor ability*: [2-7, E]

- Hammersmith Infant Neurological Exam Part 2 (HINE-2) (infant to early childhood)
- Hammersmith Functional Motor Scale Expanded (HFMSE)
- Revised Upper Limb Module (RULM) Test (Non ambulatory)
- Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP INTEND)
- Motor Function Measure 32 (MFM-32) Scale
- Item 22 of the Bayley Scales of Infant and Toddler Development Third Edition (BSID-III)

AND

6 - Prescribed by or in consultation with a neurologist with expertise in the diagnosis and treatment of SMA

AND

7 - Patient is not to receive concomitant chronic survival motor neuron (SMN) modifying therapy for the treatment of SMA (e.g., Spinraza) [2-3, 10, F]

AND

8 - One of the following: [2-3, 10, F]

8.1 Patient has not previously received gene replacement therapy for the treatment of SMA (e.g., Zolgensma)

OR

8.2 Both of the following:

- Patient has previously received gene therapy for the treatment of SMA (e.g., Zolgensma)
- Documentation of inadequate response to gene therapy (e.g., sustained decrease in at least one motor test score over a period of 6 months)

Notes	*Baseline assessments for patients less than 2 months of age request ing risdiplam are not necessary in order to not delay access to initial t herapy in recently diagnosed infants. Initial assessments shortly post-t herapy can serve as baseline with respect to efficacy reauthorization assessment.

Product Name:Evrysdi	
Diagnosis	Spinal Muscular Atrophy
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EVRYSDI	RISDIPLAM FOR SOLN 0.75 MG/ML	74706560002120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy from pretreatment baseline status as demonstrated by the most recent results from one of the following exams:

1.1 One of the following HINE-2 milestones: [2]

- Improvement or maintenance of previous improvement of at least a 2 point (or maximal score) increase in ability to kick
- Improvement or maintenance of previous improvement of at least a 1 point increase in any other HINE-2 milestone (e.g., head control, rolling, sitting, crawling, etc.), excluding voluntary grasp
- Patient exhibited improvement, or maintenance of previous improvement in more HINE motor milestones than worsening, from pretreatment baseline (net positive improvement)
- Patient has achieved and maintained any new motor milestones when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk)

OR

1.2 One of the following HFMSE milestones: [8]

- Improvement or maintenance of a previous improvement of at least a 3 point increase in score from pretreatment baseline
- Patient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk)

OR

1.3 One of the following RULM test milestones: [2, 8-9]

- Improvement or maintenance of a previous improvement of at least a 2 point increase in score from pretreatment baseline
- Patient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk)

OR

1.4 One of the following CHOP INTEND milestones: [2]

- Improvement or maintenance of a previous improvement of at least a 4 point increase in score from pretreatment baseline
- Patient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk)

OR

1.5 One of the following MFM-32 milestones: [2]

- Improvement or maintenance of a previous improvement of at least a 3 point increase in score from pretreatment baseline
- Patient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk)

OR

1.6 Improvement in the ability to sit without support for at least 5 seconds as assessed by item 22 of the Gross Motor Scale of the Bayley Scales of Infant and Toddler Development Third Edition (BSID-III) [2-3]

AND

2 - Patient continues to not be dependent on invasive ventilation or tracheostomy [2-3, D]

AND

3 - Patient continues to not be dependent on the use of non-invasive ventilation beyond use for naps and nighttime sleep [3, D]

AND

4 - Prescribed by or in consultation with a neurologist with expertise in the diagnosis and treatment of SMA

AND

5 - Patient is not to receive concomitant chronic survival motor neuron (SMN) modifying therapy for the treatment of SMA (e.g., Spinraza) [2-3, 10, F]

AND

6 - One of the following: [2-3, 10, F]

6.1 Patient has not previously received gene replacement therapy for the treatment of SMA (e.g., Zolgensma)

OR

6.2 Both of the following:

- Patient has previously received gene therapy for the treatment of SMA (e.g., Zolgensma)
- Documentation of inadequate response to gene therapy (e.g., sustained decrease in at least one motor test score over a period of 6 months)

3 . Endnotes

A. There were two major Phase 2/3 trials that the FDA assessed when determining Evrysdi's clinical efficacy and subsequent approval (SUNFISH and FIREFISH). SUNFISH only enrolled patients with SMA Types 2 and 3 and FIREFISH only enrolled patients with SMA Type 1. [2-3]
B. This is the definition that the clinical trials SUNFISH and FIREFISH used. Also consistent with clinical guidelines. [2-7]
C. FIREFISH required patients to have 2 copies of SMN2, and SUNFISH only enrolled patients with 2-4 copies of SMN2. [2-3]
D. Invasive ventilation or tracheostomy was an exclusion criteria in both the SUNFISH and FIREFISH trials. Use of non-invasive ventilation beyond use for naps and nighttime sleep was only an exclusion criteria in FIREFISH. [2-3]
E. MFM-32 was included in Evrysdi criteria but not Spinraza because Spinraza did not study MFM-32 as an endpoint. Baseline motor score standards was only used as an inclusion criterion for SUNFISH. Revised upper limb module (RULM) entry item A (Brooke score) equal to or greater than 2 AND MFM-32 (Item 9) scores equal to or greater than 1 were required. As this was only for the SUNFISH trial and only applied to some of the motor scores, it was deemed unnecessary to include as a criterion. [2]
F. A recent European ad-hoc consensus statement on SMA stated that there currently is no published evidence that the combination of two disease modifying therapies (e.g., Evrysdi and Zolgensma) is superior to any single treatment alone. Both FIREFISH and SUNFISH excluded patients that were on concomitant or previous treatment with either SMN2-targeting antisense oligonucleotide, or gene therapy (e.g., Spinraza or Zolgensma). JEWELFISH is an ongoing open label phase 2 trial that included patients previously treated with another SMA targeted therapy (e.g., Zolgensma, Spinraza). JEWELFISH is scheduled to be completed in January 2025. [2-3,10-11]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228856
Guideline Name	Extended Release Tramadol Products
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Conzip
Pain Indicated for the management of severe and persistent pain that requires an extended treatment period with a daily opioid analgesic and for which alternative treatment options are inadequate. Limitations of Use: Because of the risks of addiction, abuse, and misuse with opioids, which can occur at any dosage or duration, and because of the greater risks of overdose and death with extended-release/long-acting opioid formulations, reserve CONZIP for use in patients for whom alternative treatment options (e.g., non-opioid analgesics or immediate-release opioids) are ineffective, not tolerated, or would be otherwise inadequate to provide sufficient management of pain. CONZIP is not indicated as an as-needed (prn) analgesic.
Drug Name: Tramadol Extended Release (ER)
Pain Indicated for the management of severe and persistent pain that requires an extended treatment period with a daily opioid analgesic and for which alternative treatment options are inadequate. Limitations of Use: Because of the risks of addiction, abuse, and misuse with opioids, which can occur at any dosages or duration, and because of the greater risks of overdose and death with extended-release opioid formulations, reserve tramadol hydrochloride extended-release tablets for use in patients for whom alternative treatment

options (e.g., non-opioid analgesics or immediate-release opioids) are ineffective, not tolerated, or would be otherwise inadequate to provide sufficient management of pain. Tramadol hydrochloride extended-release tablet is not indicated as an as-needed (prn) analgesic.

2 . Criteria

Product Name:ConZip, tramadol ER	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
TRAMADOL HCL ER	TRAMADOL HCL CAP ER 24HR BIPHASIC RELEASE 100 MG	65100095107070	Generic

2. Tramadol Extended Release prescribing information. Lupin Pharmaceuticals, Inc. Baltimore, MD. January 2024.

4 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228649
Guideline Name	Eysuvis (loteprednol etabonate ophthalmic suspension)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Eysuvis (loteprednol etabonate ophthalmic suspension)
Dry eye disease (DED) Indicated for the short-term (up to two weeks) treatment of the signs and symptoms of dry eye disease.

2 . Criteria

Product Name:Eysuvis	
Diagnosis	Dry Eye Disease
Approval Length	14 Day(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EYSUVIS	LOTEPREDNOL ETABONATE OPHTH SUSP 0.25%	86300035101825	Brand

Approval Criteria

1 - Diagnosis of dry eye disease

AND

2 - Prescribed by or in consultation with one of the following:

- Ophthalmologist
- Optometrist

Product Name:Eysuvis	
Diagnosis	Dry Eye Disease
Approval Length	14 Day(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
EYSUVIS	LOTEPREDNOL ETABONATE OPHTH SUSP 0.25%	86300035101825	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in dry eye symptoms)

AND

2 - Prescribed by or in consultation with one of the following:

- Ophthalmologist
- Optometrist

3 . References

Prior Authorization Guideline

Guideline ID	GL-228419
Guideline Name	Fabhalta (iptacopan)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fabhalta (iptacopan)
Paroxysmal Nocturnal Hemoglobinuria (PNH) Indicated for the treatment of adults with paroxysmal nocturnal hemoglobinuria (PNH). **Immunoglobulin A nephropathy (IgAN)** Indicated to reduce proteinuria in adults with primary immunoglobulin A nephropathy (IgAN) at risk of rapid disease progression, generally a urine protein-to-creatinine ratio (UPCR) ≥1.5 g/g. This indication is approved under accelerated approval based on reduction of proteinuria. It has not been established whether Fabhalta slows kidney function decline in patients with IgAN. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory clinical trial.

2 . Criteria

Product Name:Fabhalta	
Diagnosis	Paroxysmal nocturnal hemoglobinuria (PNH)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FABHALTA	IPTACOPAN HCL CAP 200 MG	85807535200130	Brand

Approval Criteria

1 - Diagnosis of paroxysmal nocturnal hemoglobinuria (PNH)

AND

2 - Hemoglobin level of less than 10 g/dL

AND

3 - Prescribed by or in consultation with a hematologist/oncologist

Product Name:Fabhalta	
Diagnosis	paroxysmal nocturnal hemoglobinuria (PNH)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FABHALTA	IPTACOPAN HCL CAP 200 MG	85807535200130	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., hemoglobin stabilization, decrease in the number of red blood cell transfusions)

Product Name:Fabhalta	
Diagnosis	Immunoglobulin A nephropathy (IgAN)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FABHALTA	IPTACOPAN HCL CAP 200 MG	85807535200130	Brand

Approval Criteria

1 - Diagnosis of primary immunoglobulin A nephropathy (IgAN) as confirmed by a kidney biopsy [A]

AND

2 - Patient is at risk of rapid disease progression [e.g., generally a urine protein-to-creatinine ratio (UPCR) greater than or equal to 1.5 g/g, or by other criteria such as clinical risk scoring using the International IgAN Prediction Tool] [B]

AND

3 - Used to reduce proteinuria

AND

4 - Patient has an estimated glomerular filtration rate (eGFR) of greater than or equal to 20 mL/min/1.73 m2

AND

5 - Patient has been on a minimum 90-day trial of a maximally tolerated dose of one of the following:

- An angiotensin-converting enzyme (ACE) inhibitor (e.g., benazepril, lisinopril)
- An angiotensin II receptor blocker (ARB) (e.g., losartan, valsartan)

AND

6 - Prescribed by or in consultation with a nephrologist

Product Name:Fabhalta	
Diagnosis	Immunoglobulin A nephropathy (IgAN)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FABHALTA	IPTACOPAN HCL CAP 200 MG	85807535200130	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as demonstrated by a decrease in urine protein-to-creatinine ratio (UPCR) from baseline

3 . Endnotes

A. IgAN can only be diagnosed with a kidney biopsy [2]
B. The International IgAN Prediction Tool incorporates clinical information at the time of biopsy and is a valuable resource to quantify risk of progression and inform shared decision-making with patients [2]

Prior Authorization Guideline

Guideline ID	GL-233201
Guideline Name	Fabry Disease Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/20/2004
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Fabrazyme (agalsidase beta)
Fabry disease Indicated for the treatment of adult and pediatric patients 2 years of age and older with confirmed Fabry disease.
Drug Name: Elfabrio (pegunigalsidase alfa-iwxj)
Fabry disease Indicated for the treatment of adults with confirmed Fabry disease.

2 . Criteria

Product Name:Fabrazyme	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FABRAZYME	AGALSIDASE BETA FOR IV SOLN 5 MG	30903610102110	Brand
FABRAZYME	AGALSIDASE BETA FOR IV SOLN 35 MG	30903610102120	Brand

Approval Criteria

1 - Diagnosis of Fabry disease

AND

2 - Patient is 2 years of age or older

AND

3 - One of the following: [3, 4]

- Detection of pathogenic mutations in the GLA gene by molecular genetic testing
- Deficiency in α-galactosidase A (α-Gal A) enzyme activity in plasma, isolated leukocytes, or dried blood spots (DBS)
- Significant clinical manifestations (e.g., neuropathic pain, cardiomyopathy, renal insufficiency, angiokeratomas, cornea verticillata)

AND

4 - Will not be used in combination with other drugs used for Fabry disease [A]

Product Name:Fabrazyme	
Approval Length	24 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

FABRAZYME	AGALSIDASE BETA FOR IV SOLN 5 MG	30903610102110	Brand
FABRAZYME	AGALSIDASE BETA FOR IV SOLN 35 MG	30903610102120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Elfabrio	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ELFABRIO	PEGUNIGALSIDASE ALFA-IWXJ IV SOLUTION 20 MG/10 ML	30903660102020	Brand
ELFABRIO	PEGUNIGALSIDASE ALFA-IWXJ IV SOLUTION 5 MG/2.5 ML	30903660102005	Brand

Approval Criteria

1 - Diagnosis of Fabry disease

AND

2 - Disease confirmed by one of the following: [3, 4]

- Detection of pathogenic mutations in the GLA gene by molecular genetic testing
- Deficiency in α-galactosidase A (α-Gal A) enzyme activity in plasma, isolated leukocytes, or dried blood spots (DBS)
- Significant clinical manifestations (e.g., neuropathic pain, cardiomyopathy, renal insufficiency, angiokeratomas, cornea verticillata)

AND

3 - Will not be used in combination with other drugs used for Fabry Disease [A]

Product Name:Elfabrio	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-233266
Guideline Name	Fasenra (benralizumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	1/24/2018
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Fasenra (benralizumab)
Severe Asthma Indicated for the add-on maintenance treatment of patients with severe asthma aged 6 years and older, and with an eosinophilic phenotype. Limitations of use: Fasenra is not indicated for treatment of other eosinophilic conditions. Fasenra is not indicated for the relief of acute bronchospasm or status asthmaticus. **Eosinophilic Granulomatosis with Polyangiitis:** Indicated for the treatment of adult patients with eosinophilic granulomatosis with polyangiitis (EGPA).

2 . Criteria

Product Name:Fasenra	
Diagnosis	Severe Asthma
Approval Length	6 Months [F]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 30 MG/ML	4460402000E520	Brand
FASENRA PEN	BENRALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 30 MG/ML	4460402000D520	Brand
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 10 MG/0.5ML	4460402000E515	Brand

Approval Criteria

1 - Diagnosis of severe asthma

AND

2 - Asthma is an eosinophilic phenotype as defined by a baseline (pre-treatment) peripheral blood eosinophil level greater than or equal to 150 cells per microliter [5, B, F]

AND

3 - One of the following:

3.1 Patient has had at least two or more asthma exacerbations requiring systemic corticosteroids (e.g., prednisone) within the past 12 months [2, 3, B]

OR

3.2 Prior asthma-related hospitalization within the past 12 months [C]

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Patient is 6 years of age or older but less than 12 years of age

AND

4.1.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.1.2.1 Both of the following [A, 4, 5]:

- Medium-dose inhaled corticosteroid (e.g., greater than 100 – 200 mcg fluticasone propionate equivalent/day)
- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.1.2.2 One medium dosed combination ICS/LABA product (e.g., Advair Diskus [fluticasone propionate 100mcg/ salmeterol 50mcg], Symbicort [budesonide 80mcg/ formoterol 4.5mcg] Breo Ellipta [fluticasone furoate 50 mcg/ vilanterol 25 mcg])

OR

4.2 Both of the following:

4.2.1 Patient is 12 years of age or older

AND

4.2.2 Patient is currently being treated with one of the following unless there is a contraindication or intolerance to these medications:

4.2.2.1 Both of the following [4, 5, A]:

- High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day)

- Additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium])

OR

4.2.2.2 One maximally-dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate 500mcg/ salmeterol 50mcg], Symbicort [budesonide 160mcg/ formoterol 4.5mcg], Breo Ellipta [fluticasone 200mcg/ vilanterol 25mcg])

AND

5 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Fasenra	
Diagnosis	Severe Asthma
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 30 MG/ML	4460402000E520	Brand
FASENRA PEN	BENRALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 30 MG/ML	4460402000D520	Brand
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 10 MG/0.5ML	4460402000E515	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in exacerbations, improvement in forced expiratory volume in 1 second [FEV1], decreased use of rescue medications)

AND

2 - Patient continues to be treated with an inhaled corticosteroid (ICS) (e.g., fluticasone, budesonide) with or without additional asthma controller medication (e.g., leukotriene receptor antagonist [LTRA] [e.g., montelukast], long-acting beta-2 agonist [LABA] [e.g., salmeterol], long-acting muscarinic antagonist [LAMA] [e.g., tiotropium]) unless there is a contraindication or intolerance to these medications

AND

3 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Allergist/Immunologist

Product Name:Fasenra	
Diagnosis	Eosinophilic Granulomatosis with Polyangiitis
Approval Length	12 Months
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 30 MG/ML	4460402000E520	Brand
FASENRA PEN	BENRALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 30 MG/ML	4460402000D520	Brand
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 10 MG/0.5ML	4460402000E515	Brand

Approval Criteria

1 - Diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA)

AND

2 - Patient's disease has relapsed or is refractory to standard of care therapy (i.e., corticosteroid treatment with or without immunosuppressive therapy)

AND

3 - Patient is currently receiving corticosteroid therapy (e.g., prednisolone, prednisone) unless there is a contraindication or intolerance to corticosteroid therapy

AND

4 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Rheumatologist
- Allergist/Immunologist

Product Name:Fasenra	
Diagnosis	Eosinophilic Granulomatosis with Polyangiitis
Approval Length	12 Months
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 30 MG/ML	4460402000E520	Brand
FASENRA PEN	BENRALIZUMAB SUBCUTANEOUS SOLN AUTO-INJECTOR 30 MG/ML	4460402000D520	Brand
FASENRA	BENRALIZUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 10 MG/0.5ML	4460402000E515	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increase in remission time)

3 . Background

Clinical Practice Guidelines

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 1. Low, medium and high daily doses of inhaled corticosteroids in adolescents and adults 12 years and older [4]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	200-500	> 500-1000	> 1000
Beclometasone dipropionate (DPI or pMDI, extrafine particle*, HFA)	100-200	> 200-400	> 400
Budesonide (DPI, or pMDI, standard particle, HFA)	200-400	> 400-800	> 800
Ciclesonide (pMDI, extrafine particle*, HFA)	80-160	> 160-320	> 320
Fluticasone furoate (DPI)	100		200
Fluticasone propionate (DPI)	100-250	> 250-500	> 500
Fluticasone propionate (pMDI, standard particle, HFA)	100-250	> 250-500	> 500
Mometasone furoate (DPI)	Depends on DPI device – see product information		
Mometasone furoate (pMDI, standard particle, HFA)	200-400		> 400
DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.			

***This is not a table of equivalence**,* but instead, suggested total daily doses for the 'low', 'medium' and 'high' dose ICS options for adults/adolescents, based on available studies and product information. Data on comparative potency are not readily available and therefore this table does NOT imply potency equivalence. Doses may be country -specific depending on local availability, regulatory labelling and clinical guidelines.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

The Global Initiative for Asthma Global Strategy for Asthma Management and Prevention: Table 2. Low, medium and high daily doses of inhaled corticosteroids in children 6 – 11 years [4]

Inhaled corticosteroid	Total Daily ICS Dose (mcg)		
	Low	Medium	High
Beclometasone dipropionate (pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Beclometasone dipropionate (pMDI, extrafine particle, HFA)	50-100	> 100-200	> 200
Budesonide (DPI, or pMDI, standard particle, HFA)	100-200	> 200-400	> 400
Budesonide (nebules)	250-500	>500-1000	>1000
Ciclesonide (pMDI, extrafine particle*, HFA)	80	>80-160	>160
Fluticasone furoate (DPI)	50		n.a.
Fluticasone propionate (DPI)	50-100	> 100-200	> 200
Fluticasone propionate (pMDI, standard particle, HFA)	50-100	> 100-200	> 200
Mometasone furoate (pMDI, standard particle, HFA)	100		200

DPI: dry powder inhaler; HFA: hydrofluoroalkane propellant; ICS: inhaled corticosteroid; N/A: not applicable; pMDI: pressurized metered dose inhaler (non-chlorofluorocarbon formulations); ICS by pMDI should be preferably used with a spacer *See product information.

For new preparations, including generic ICS, the manufacturer's information should be reviewed carefully; products containing the same molecule may not be clinically equivalent.

4 . Endnotes

A. The Global Initiative for Asthma (GINA) Global Strategy for Asthma Management and Prevention update lists anti-interleukin- 5 treatment or anti-interleukin 5 receptor treatment as an add on option for patients with severe eosinophilic asthma that is uncontrolled on two or more controllers plus as-needed reliever medication (Step 4-5 treatment). [5]
B. The SIROCCO and CALIMA trials evaluated the effect of benralizumab 30mg administered in 4 week and 8 week regimens as add on therapy to standard of care medicine. The trials enrolled patients 12 to 75 years of age with severe asthma defined as a history of two or more exacerbations in the previous year which needed systemic corticosteroids or a temporary increase in the patient's usual maintenance dose of oral corticosteroids. Patients were also required to have received treatment with a medium dose or high dose ICS plus LABA for at least one year before enrollment. Both trials confirmed benralizumab significantly reduced the annual exacerbation rates and was generally well tolerated in patients who were uncontrolled on high dose ICS plus LABA and had a baseline blood eosinophil count of 300 cells per microliter or greater [2, 3]. The baseline eosinophil level requirement of greater than or equal to 150 cells per microliter and the requirement for a history of one or more exacerbations listed in the criteria comes from the inclusion criteria allowed in the ZONDA trial. The ZONDA trial was a 28-week, Phase 3, randomized, double blind, placebo controlled, multicenter, oral corticosteroid reduction trial [6].
C. Recommendation inferred from the national P&T committee meeting, December 2015, regarding similar agent first-in-class IL-5 antagonist Nucala (mepolizumab) in the use of severe eosinophilic asthma.
D. Asthma treatment can often be reduced, once good asthma control has been achieved and maintained for three months and lung function has hit a plateau. However, the

approach to stepping down will depend on patient specific factors (e.g., current medications, risk factors). At this time evidence for optimal timing, sequence, and magnitude of treatment reductions is limited. It is feasible and safe for most patients to reduce the ICS dose by 25-50% at three month intervals, but complete cessation of ICS is associated with a significant risk of exacerbations [5].

E. The GINA Global Strategy for Asthma Management and Prevention update recommends that patients with asthma should be reviewed regularly to monitor their symptom control, risk factors and occurrence of exacerbations, as well as to document the response to any treatment changes. Ideally, response to Type 2-targeted therapy should be re-evaluated every 3-6 months, including re-evaluation of the need for ongoing biologic therapy for patients with good response to Type 2 targeted therapy. [5]
F. The Institute for Clinical and Economic Review (ICER) defines eosinophilic inflammation as a blood eosinophil level greater than or equal to 150 cells per microliter at initiation of therapy. This is the lowest measured threshold for eosinophilic asthma in pivotal trials. [7]

6 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228858
Guideline Name	Fecal Microbiota Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Rebyota (fecal microbiota, live-jslm) suspension
Recurrent Clostridioides difficile infection (CDI) Indicated for the prevention of recurrence of Clostridioides difficile infection (CDI) in individuals 18 years of age and older following antibiotic treatment for recurrent CDI. Limitations of use: Rebyota is not indicated for treatment of CDI.
Drug Name: Vowst (fecal microbiota spores, live-brpk) capsule
Recurrent Clostridioides difficile infection (CDI) Indicated to prevent the recurrence of Clostridioides difficile infection (CDI) in individuals 18 years of age and older following antibacterial treatment for recurrent CDI (rCDI). Limitations of use: Vowst is not indicated for treatment of CDI.
Drug Name: Zinplava (bezlotoxumab) injection
Recurrent Clostridioides difficile infection (CDI) Indicated to reduce recurrence of Clostridioides difficile infection (CDI) in adults and pediatric patients 1 year of age and older

who are receiving antibacterial drug treatment for CDI and are at high risk for CDI recurrence.
Limitations of use: Zinplava is not indicated for the treatment of CDI.

2 . Criteria

Product Name:Rebyota	
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
REBYOTA	FECAL MICROBIOTA, LIVE-JSLM RECTAL SUSP 150 ML	52522010301820	Brand

Approval Criteria

1 - Diagnosis of recurrent clostridioides difficile infection (CDI) as defined by both of the following:

- Presence of diarrhea defined as a passage of 3 or more loose bowel movements within a 24-hour period for 2 consecutive days
- A positive stool test for C.difficile toxin or toxigenic C.difficile

AND

2 - Patient is 18 years of age or older

AND

3 - Patient has a history of one or more recurrent episodes of CDI

AND

4 - Both of the following:

4.1 Patient has completed at least 10 consecutive days of one of the following antibiotic therapies between 24 to 72 hours prior to initiating Rebyota:

- oral vancomycin
- Dificid (fidaxomicin)

AND

4.2 Previous episode of CDI is under control (e.g., less than 3 unformed/loose [i.e., Bristol Stool Scale type 6-7] stools/day for 2 consecutive days)

AND

5 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Infectious disease specialist

Product Name:Rebyota	
Approval Length	14 Day(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
REBYOTA	FECAL MICROBIOTA, LIVE-JSLM RECTAL SUSP 150 ML	52522010301820	Brand

Approval Criteria

1 - Diagnosis of recurrent clostridioides difficile infection (CDI) as defined by both of the following:

- Presence of diarrhea defined as a passage of 3 or more loose bowel movements within a 24-hour period for 2 consecutive days
- A positive stool test for C.difficile toxin or toxigenic C.difficile

AND

2 - Patient is 18 years of age or older

AND

3 - Patient has a history of one or more recurrent episodes of CDI

AND

4 - Both of the following:

4.1 Paid claims or submission of medical records (e.g., chart notes) confirming patient has completed at least 10 consecutive days of one of the following antibiotic therapies between 24 to 72 hours prior to initiating Rebyota:

- oral vancomycin
- Dificid (fidaxomicin)

AND

4.2 Previous episode of CDI is under control (e.g., less than 3 unformed/loose [i.e., Bristol Stool Scale type 6-7] stools/day for 2 consecutive days)

AND

5 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Infectious disease specialist

Product Name:Vowst	
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VOWST	FECAL MICROBIOTA SPORES, LIVE-BRPK CAPS	52522020100120	Brand

Approval Criteria

1 - Diagnosis of recurrent clostridioides difficile infection (CDI) as defined by both of the following:

- Presence of diarrhea defined as a passage of 3 or more loose bowel movements within a 24-hour period for 2 consecutive days
- A positive stool test for C.difficile toxin or toxigenic C.difficile

AND

2 - Patient is 18 years of age or older

AND

3 - Patient has a history of two or more recurrent episodes of CDI within 12 months

AND

4 - All of the following:

4.1 Patient has completed at least 10 consecutive days of one of the following antibiotic therapies 2-4 days prior to initiating Vowst:

- oral vancomycin
- Dificid (fidaxomicin)

AND

4.2 Patient has completed the recommended course of magnesium citrate the day before and at least 8 hours prior to initiating Vowst [A]

AND

4.3 Previous episode of CDI is under control (e.g., less than 3 unformed/loose [i.e., Bristol Stool Scale type 6-7] stools/day for 2 consecutive days)

AND

5 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Infectious disease specialist

AND

6 - Trial and failure, contraindication or intolerance to Rebyota

Product Name:Vowst	
Approval Length	14 Day(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
VOWST	FECAL MICROBIOTA SPORES, LIVE-BRPK CAPS	52522020100120	Brand

Approval Criteria

1 - Diagnosis of recurrent clostridioides difficile infection (CDI) as defined by both of the following:

- Presence of diarrhea defined as a passage of 3 or more loose bowel movements within a 24-hour period for 2 consecutive days
- A positive stool test for C.difficile toxin or toxigenic C.difficile

AND

2 - Patient is 18 years of age or older

AND

AND

4 - All of the following:

4.1 Patient has completed at least 10 consecutive days of one of the following antibiotic therapies 2-4 days prior to initiating Vowst:

- oral vancomycin
- Dificid (fidaxomicin)

AND

4.2 Patient has completed the recommended course of magnesium citrate the day before and at least 8 hours prior to initiating Vowst [A]

AND

4.3 Previous episode of CDI is under control (e.g., less than 3 unformed/loose [i.e., Bristol Stool Scale type 6-7] stools/day for 2 consecutive days)

AND

5 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Infectious disease specialist

AND

6 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication or intolerance to Rebyota

Product Name:Zinplava	
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZINPLAVA	BEZLOTOXUMAB IV SOLN 1000 MG/40ML (25 MG/ML)	19503015002020	Brand

Approval Criteria

1 - Diagnosis of recurrent clostridioides difficile infection (CDI) as defined by both of the following:

- Presence of diarrhea defined as a passage of 3 or more loose bowel movements in less than or equal to 24 hours
- A positive stool test for C.difficile toxin or toxigenic C.difficile

AND

2 - Used for the reduction of the recurrence of CDI

AND

3 - Used in combination with antibacterial drug treatment for CDI [e.g., oral Vancocin (vancomycin), Flagyl (metronidazole), or Dificid (fidaxomicin)]

AND

4 - Patient is 1 year of age or older

AND

5 - Patient has one or more of the following risk factors associated with CDI recurrence: [5-8, B]

- One or more prior episodes of CDI in the previous 6 months
- Immunocompromised
- Chronic dialysis
- Inflammatory bowel disease
- Continued use of non-CDI antimicrobials after diagnosis of CDI and/or after CDI treatment

AND

6 - Prescribed by or in consultation with one of the following:

- Gastroenterologist
- Infectious disease specialist

3 . Endnotes

A. Patients are required to take magnesium citrate 24 hours prior to the first dose of Vowst per the prescribing information. There is currently no efficacy data regarding the use of Vowst without magnesium citrate and the thought is that it helps to clear the antibiotics prior to administration of Vowst. [2,3]

B. Risk factors for CDI recurrence: There is no specific guidance in regards to which patients should be considered high risk for CDI recurrence. There are a multitude of risk factors that increase patients' risk for recurrent CDI. Risk factors reported in one or more previously published studies and confirmed by consultant feedback include: one or more prior episodes of CDI in the previous 6 months, immunocompromised state, renal failure, inflammatory bowel disease, and continued use of non-CDI antimicrobials. Although patients greater than or equal to 65 years of age are at greater risk of recurrent CDI than younger patients, per consultant feedback, not all patients over 65 should be treated with Zinplava, only those with the highest risk. [5-11]

Femring (estradiol acetate ring)

Prior Authorization Guideline

Guideline ID	GL-228421
Guideline Name	Femring (estradiol acetate ring)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Femring (estradiol acetate vaginal ring)
Moderate to Severe Vasomotor Symptoms Indicated for the treatment of moderate to severe vasomotor symptoms due to menopause. **Moderate to Severe Vulvar and Vaginal Atrophy** Indicated for the treatment of moderate to severe vulvar and vaginal atrophy due to menopause.

2 . Criteria

Product Name:Femring	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
FEMRING	ESTRADIOL ACETATE VAGINAL RING 0.05 MG/24HR	55350020109020	Brand
FEMRING	ESTRADIOL ACETATE VAGINAL RING 0.1 MG/24HR	55350020109030	Brand

Approval Criteria

1 - Both of the following:

1.1 Diagnosis of vulvar and vaginal atrophy due to menopause

AND

1.2 Trial and failure (of a minimum 28-day supply), contraindication or intolerance to one of the following:

- Premarin vaginal cream
- Imvexxy
- Osphena

OR

2 - Used for moderate to severe vasomotor symptoms due to menopause

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228424
Guideline Name	Fibric Acid Derivatives
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fenoglide, Fibricor
Primary Hypercholesterolemia and Mixed Dyslipidemia Indicated as adjunctive therapy to diet to reduce elevated low-density lipoprotein cholesterol (LDL-C), total cholesterol (Total-C), triglycerides (TG), and apolipoprotein B (Apo B), and to increase high-density lipoprotein (HDL-C) in adult patients with primary hypercholesterolemia or mixed dyslipidemia. Limitations of Use: Fenofibrate was not shown to reduce coronary heart disease morbidity and mortality in patients with type 2 diabetes mellitus. **Severe Hypertriglyceridemia** Indicated as adjunctive therapy to diet for treatment of adult patients with severe hypertriglyceridemia. Improving glycemic control in diabetic patients showing fasting chylomicronemia will usually reduce fasting triglycerides and eliminate chylomicronemia thereby obviating the need for pharmacologic intervention. Markedly elevated levels of serum triglycerides (e.g., > 2000 mg/dL) may increase the risk of developing pancreatitis. The effect of fenofibrate therapy on reducing this risk has not been adequately studied. Limitations of Use: Fenofibrate was not shown to reduce coronary heart disease morbidity and mortality in patients with type 2 diabetes mellitus.

2 . Criteria

Product Name:Brand Fenoglide, Brand Fibricor	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
FENOGLIDE	FENOFIBRATE TAB 40 MG	39200025000308	Brand
FENOGLIDE	FENOFIBRATE TAB 120 MG	39200025000322	Brand
FIBRICOR	FENOFIBRIC ACID TAB 35 MG	39200024000320	Brand
FIBRICOR	FENOFIBRIC ACID TAB 105 MG	39200024000340	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure or intolerance to a minimum 30 day supply to both of the following:

2.1 One of the following generics:

- fenofibrate micronized capsule
- fenofibrate tablet
- fenofibric capsule
- fenofibric acid tablet

AND

2.2 One of the following:

- Brand Lipofen
- Generic fenofibrate capsule

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	4/19/2023
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Filspari (sparsentan)
Primary immunoglobulin A nephropathy (IgAN) Indicated to slow kidney function decline in adults with primary immunoglobulin A nephropathy (IgAN) who are at risk for disease progression.

2 . Criteria

Product Name:Filspari	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FILSPARI	SPARSENTAN TAB 200 MG	56483065000320	Brand
FILSPARI	SPARSENTAN TAB 400 MG	56483065000340	Brand

Approval Criteria

1 - Diagnosis of primary immunoglobulin A nephropathy (IgAN) as confirmed by a kidney biopsy [A]

AND

2 - Patient is at risk of rapid disease progression [e.g., proteinuria greater than 0.75 - 1 g/day, or by other criteria such as clinical risk scoring using the International IgAN Prediction Tool] [B,C]

AND

3 - Used to slow kidney function decline

AND

4 - Patient has an estimated glomerular filtration rate (eGFR) of greater than or equal to 30 mL/min/1.73 m2

AND

5 - Patient has been on a minimum 90-day trial of a maximally tolerated dose of one of the following:

- An angiotensin-converting enzyme (ACE) inhibitor (e.g., benazepril, lisinopril)
- An angiotensin II receptor blocker (ARB) (e.g., losartan, valsartan)

AND

6 - Medication will not be used in combination with any of the following:

- Angiotensin receptor blockers or angiotensin receptor-neprilysin inhibitor (ARNI) [e.g., Entresto (sacubitril/valsartan)]
- Endothelin receptor antagonists (ERAs) [e.g., Letairis (ambrisentan), Tracleer (bosentan), Opsumit (macitentan)]
- Tekturna (aliskiren)

AND

7 - Prescribed by or in consultation with a nephrologist

Product Name:Filspari	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FILSPARI	SPARSENTAN TAB 200 MG	56483065000320	Brand
FILSPARI	SPARSENTAN TAB 400 MG	56483065000340	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy as demonstrated by a decrease in urine protein-to-creatinine ratio (UPCR) from baseline

AND

2 - Medication is not taken in combination with any of the following:

- Angiotensin receptor blockers or angiotensin receptor-neprilysin inhibitor (ARNI) [e.g., Entresto (sacubitril/valsartan)]
- Endothelin receptor antagonists (ERAs) [e.g., Letairis (ambrisentan), Tracleer (bosentan), Opsumit (macitentan)]

- Tekturna (aliskiren)

3 . Endnotes

A. IgAN can only be diagnosed with a kidney biopsy. [2]
B. The International IgAN Prediction Tool incorporates clinical information at the time of biopsy and is a valuable resource to quantify risk of progression and inform shared decision-making with patients. [2]
C. High risk of progression in IgAN is currently defined as proteinuria >0.75–1 g/d despite ‡90 days of optimized supportive care [2]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228651
Guideline Name	Filsuvez (birch triterpenes) - PA, NF, QL
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: FILSUVEZ (birch triterpenes) topical gel
Wounds Associated with Dystrophic and Junctional Epidermolysis Bullosa Indicated for the treatment of wounds associated with dystrophic and junctional epidermolysis bullosa in adult and pediatric patients 6 months of age and older.

2 . Criteria

Product Name:Filsuvez	
Approval Length	3 months [A,1]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FILSUVEZ	BIRCH TRITERPENES GEL 10%	90944020004030	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Dystrophic epidermolysis bullosa (DEB)
- Junctional epidermolysis bullosa (JEB)

AND

2 - Disease is confirmed by one of the following: [4-6, 10]

2.1 Genetic testing confirms mutation in one of the following genes:

2.1.1 For Dystrophic epidermolysis bullosa (DEB), collagen type VII (COL7A1)

OR

2.1.2 For Junctional epidermolysis bullosa (JEB), one of the following:

- ITGA6
- ITGB4
- collagen type XVII (COL17A1)
- LAMA3
- LAMB3
- LAMC2
- ITGA3
- LAMA3A

OR

2.2 Skin biopsy

AND

3 - Patient is 6 months of age or older

AND

4 - Medication is being used for the treatment of wounds that require healing

AND

5 - Target wound(s) meets all of the following: [B, 1, 7]

- Present for at least 21 days
- No signs of infection
- No evidence or history of basal or squamous cell carcinoma

AND

6 - Patient does not have history of stem cell transplant [7]

AND

7 - Medication is not being used concurrently with other FDA approved therapies (e.g.,Vyjuvek) on the same target wound for the treatment of epidermolysis bullosa

AND

8 - Standard wound care management not adequate in healing wounds (e.g., daily wound dressings, pain management, controlling infections)

AND

9 - Prescribed by or in consultation with a specialist with expertise in wound care

Product Name:Filsuvez	
Approval Length	12 month(s)

Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FILSUVEZ	BIRCH TRITERPENES GEL 10%	90944020004030	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by wound healing (e.g., reduction in number or size of wounds) [C, 1]

AND

2 - Wound(s) being treated continues to meet both of the following:

- No signs of infection
- No evidence or history of basal or squamous cell carcinoma

AND

3 - Medication is not being used concurrently with other FDA approved therapies (e.g.,Vyjuvek) on the same target wound for the treatment of epidermolysis bullosa

AND

4 - Prescribed by or in consultation with a specialist with expertise in wound care

Product Name:Filsuvez	
Approval Length	3 months [A,1]
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
FILSUVEZ	BIRCH TRITERPENES GEL 10%	90944020004030	Brand

Approval Criteria

1 - Diagnosis of one of the following:

- Dystrophic epidermolysis bullosa (DEB)
- Junctional epidermolysis bullosa (JEB)

AND

2 - Submission of medical records (e.g., chart notes) documenting that disease is confirmed by one of the following: [4-6, 10]

2.1 Genetic testing confirms mutation in one of the following genes:

2.1.1 For Dystrophic epidermolysis bullosa (DEB), collagen type VII (COL7A1)

OR

2.1.2 For Junctional epidermolysis bullosa (JEB), one of the following:

- ITGA6
- ITGB4
- collagen type XVII (COL17A1)
- LAMA3
- LAMB3
- LAMC2
- ITGA3
- LAMA3A

OR

2.2 Skin biopsy

AND

3 - Patient is 6 months of age or older

AND

4 - Medication is being used for the treatment of wounds that require healing

AND

5 - Target wound(s) meets all of the following: [B, 1, 7]

- Present for at least 21 days
- No signs of infection
- No evidence or history of basal or squamous cell carcinoma

AND

6 - Patient does not have history of stem cell transplant [7]

AND

7 - Medication is not being used concurrently with other FDA approved therapies (e.g.,Vyjuvek) on the same target wound for the treatment of epidermolysis bullosa

AND

8 - Submission of medical records (e.g., chart notes) confirming that standard wound care management not adequate in healing wounds (e.g., daily wound dressings, pain management, controlling infections)

AND

9 - Prescribed by or in consultation with a specialist with expertise in wound care

Product Name:Filsuvez	
Approval Length	12 month(s)

Guideline Type	Quantity Limit Override

Product Name	Generic Name	GPI	Brand/Generic
FILSUVEZ	BIRCH TRITERPENES GEL 10%	90944020004030	Brand

Approval Criteria

1 - Quantity limit restriction has been deemed insufficient in the treatment of the member's disease or medical condition

AND

2 - Submission of medical records (e.g., chart notes) documenting both of the following: [D]

- Patient total body surface area (m^2) to be treated
- Frequency of wound dressing changes

AND

3 - Requested quantity does not exceed one tube per 0.025m^2 surface area being treated*

AND

4 - Prescribed by or in consultation with a specialist with expertise in wound care

Notes	*Clinician to confirm requested quantity is appropriate based on total BSA provided and frequency of administration (one tube covers up to 0.025m^2 surface area. A tube of Filsuvez is for one-time use and should be discarded once opened)

3 . Definitions

Definition	Description

Epidermolysis Bullosa (EB)	EB is a rare, inherited connective tissue disorder that causes abnormalities in the cohesion of the layers of the epidermis that can lead to fragile skin, resulting in blisters, erosions, nonhealing ulceration, and scars in response to mild skin trauma. EB is classified into four major types based upon the level at which blisters develop in the epidermis and basement membrane zone: Epidermolysis bullosa simplex (EBS), Junctional epidermolysis bullosa (JEB), Dystrophic epidermolysis bullosa (DEB), and Kindler epidermolysis bullosa (KEB or Kindler syndrome). The specific type of EB is determined by the affected gene.Three types are further classified into more than 30 total subtypes based on clinical, pathophysiologic, and molecular criteria. Some subtypes of EB are associated with cutaneous malignancy.There is no cure for EB. The current standard of care for EB is supportive, which includes daily wound care, pain management, and protective bandaging. [2-3]

4 . Endnotes

A. Subjects received topical treatment with either Filsuvez or a placebo gel on partial-thickness wounds every 1 to 4 days for a total of 90 days. Treated wounds were covered with non-adhesive dressings. Following completion of the double-blind phase, all subjects received FILSUVEZ for a total of 24 months during the open-label phase. [1]
B. If a Filsuvez- treated wound becomes infected, discontinue treatment to that wound until the infection has resolved. [1]
C. Apply Filsuvez to cleansed wounds with wound dressing changes until the wound is healed. [1]
D. One tube of FILSUVEZ covers up to 250 cm^2 surface area. A tube of Filsuvez is for one-time use and should be discarded once opened [1, 12]

Prior Authorization Guideline

Guideline ID	GL-228426
Guideline Name	Fintepla (fenfluramine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fintepla (fenfluramine)
Dravet Syndrome Indicated for the treatment of seizures associated with Dravet syndrome in patients 2 years of age and older. **Lennox-Gastaut Syndrome** Indicated for the treatment of seizures associated with Lennox-Gastaut syndrome in patients 2 years of age and older.

2 . Criteria

Product Name:Fintepla	
Diagnosis	Dravet Syndrome
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FINTEPLA	FENFLURAMINE HCL ORAL SOLN 2.2 MG/ML	72600028102020	Brand

Approval Criteria

1 - Diagnosis of seizures associated with Dravet syndrome

AND

2 - Patient is 2 years of age or older

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Trial and failure, contraindication or intolerance to one of the following:

- valproic acid
- clobazam

AND

3.1.2 Trial and failure, contraindication or intolerance to one of the following:

- Diacomit (stiripentol)
- Epidiolex (cannabidiol)
- topiramate
- zonisamide
- levetiracetam
- Briviact (brivaracetam)

OR

3.2 For continuation of prior therapy

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Fintepla	
Diagnosis	Lennox-Gastaut Syndrome
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FINTEPLA	FENFLURAMINE HCL ORAL SOLN 2.2 MG/ML	72600028102020	Brand

Approval Criteria

1 - Diagnosis of seizures associated with Lennox-Gastaut syndrome

AND

2 - Patient is 2 years of age or older

AND

3 - ONE of the following:

- Trial and inadequate response, contraindication, or intolerance to TWO formulary anticonvulsants (e.g., topiramate, lamotrigine, valproate) [2, A]
- For continuation of prior therapy

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Fintepla	
Diagnosis	All Indications
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FINTEPLA	FENFLURAMINE HCL ORAL SOLN 2.2 MG/ML	72600028102020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by the reduction in seizure frequency from baseline

3 . Endnotes

A. The International League Against Epilepsy (ILAE) refers to drug-resistant epilepsy as the failure of adequate trials of two tolerated, appropriately chosen, and used ASM schedules, whether as monotherapy or in combination, to achieve sustained seizure freedom [2]

4 . References

Prior Authorization Guideline

Guideline ID	GL-228857
Guideline Name	Flurazepam
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Flurazepam
Insomnia Indicated for the treatment of insomnia characterized by difficulty in falling asleep, frequent nocturnal awakenings, and/or early morning awakening. Since insomnia is often transient and intermittent, short-term use is usually sufficient. Prolonged use of hypnotics is usually not indicated and should only be undertaken concomitantly with appropriate evaluation of the patient.

2 . Criteria

Product Name:Flurazepam	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FLURAZEPAM HCL	FLURAZEPAM HCL CAP 15 MG	60201010100105	Generic
FLURAZEPAM HCL	FLURAZEPAM HCL CAP 30 MG	60201010100110	Generic

Approval Criteria

1 - Diagnosis of insomnia

AND

2 - Trial and failure, contraindication, or intolerance to two of the following benzodiazepines: [A]

- Estazolam
- Halcion (triazolam)
- Restoril (temazepam)

3 . Endnotes

A. Flurazepam, estazolam, triazolam, and temazepam are only recommended for patients < 65 years old. These drugs were included on the American Geriatrics Society 2019 Beers Criteria update. [2] Flurazepam was removed in the 2023 AGS Beers Criteria update due to low utilization but is still considered potentially inappropriate in alignment with the 2019 AGS Beers Criteria. [3]

Prior Authorization Guideline

Guideline ID	GL-228428
Guideline Name	Fotivda (tivozanib) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fotivda (tivozanib)
Renal cell carcinoma (RCC) Indicated for the treatment of adult patients with relapsed or refractory advanced renal cell carcinoma (RCC) following two or more prior systemic therapies.

2 . Criteria

Product Name:Fotivda	
Diagnosis	Renal cell carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FOTIVDA	TIVOZANIB HCL CAP 890 MCG (BASE EQUIVALENT)	21533076250120	Brand
FOTIVDA	TIVOZANIB HCL CAP 1340 MCG (BASE EQUIVALENT)	21533076250130	Brand

Approval Criteria

1 - Diagnosis of advanced renal cell carcinoma (RCC)

AND

2 - Disease is one of the following:

- Relapsed
- Refractory

AND

3 - Patient has received two or more prior systemic therapies (e.g., chemotherapy)

Product Name:Fotivda	
Diagnosis	Renal cell carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FOTIVDA	TIVOZANIB HCL CAP 890 MCG (BASE EQUIVALENT)	21533076250120	Brand
FOTIVDA	TIVOZANIB HCL CAP 1340 MCG (BASE EQUIVALENT)	21533076250130	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Fotivda	
Diagnosis	Renal cell carcinoma (RCC)
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-233384
Guideline Name	Fruzaqla (fruquintinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	1/17/2024
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Fruzaqla (fruquintinib)
Metastatic colorectal cancer (mCRC) Indicated for the treatment of adult patients with metastatic colorectal cancer (mCRC) who have been previously treated with fluoropyrimidine , oxaliplatin, and irinotecan based chemotherapy, an anti VEGF therapy, and, if RAS wild type and medically appropriate, an anti-EGFR therapy

2 . Criteria

Product Name:Fruzaqla	
Diagnosis	Metastatic colorectal cancer (mCRC)

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FRUZAQLA	FRUQUINTINIB CAP 1 MG	21335035000120	Brand
FRUZAQLA	FRUQUINTINIB CAP 5 MG	21335035000140	Brand

Approval Criteria

1 - Diagnosis of metastatic colorectal cancer (mCRC)

AND

2 - Patient has been previously treated with both of the following:

- Fluoropyrimidine-, oxaliplatin-, irinotecan-based chemotherapy (e.g., FOLFOX, FOLFIRI, FOLFOXIRI)
- Anti-VEGF biological therapy (e.g., Avastin [bevacizumab], Zaltrap [ziv-aflibercept])

AND

3 - One of the following:

3.1 Patient has RAS mutant tumors

OR

3.2 All of the following:

3.2.1 Patient has RAS wild-type tumors

AND

3.2.2 Patient has been previously treated with an anti-EGFR biological therapy (e.g., Vectibix [panitumumab], Erbitux [cetuximab])

AND

3.2.3 One of the following:

3.2.3.1 Trial and failure, contraindication or intolerance to Stivarga [regorafenib]

OR

3.2.3.2 For continuation of prior therapy

Product Name:Fruzaqla	
Diagnosis	Metastatic colorectal cancer (mCRC)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FRUZAQLA	FRUQUINTINIB CAP 1 MG	21335035000120	Brand
FRUZAQLA	FRUQUINTINIB CAP 5 MG	21335035000140	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Prior Authorization Guideline

Guideline ID	GL-229174
Guideline Name	Furoscix (furosemide injection) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/14/2022
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Furoscix (furosemide injection)
Congestion Indicated for the treatment of congestion due to fluid overload in adults with chronic heart failure.

2 . Criteria

Product Name:Furoscix	
Approval Length	3 Month(s) [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FUROSCIX	FUROSEMIDE SUBCUTANEOUS CARTRIDGE KIT 80 MG/10ML	3720003000F720	Brand

Approval Criteria

1 - Diagnosis of chronic heart failure

AND

2 - Patient is currently on maintenance oral diuretic therapy (e.g., bumetanide, furosemide, torsemide) [C]

AND

3 - Provider attests that patient will be closely monitored for fluid, electrolyte, and metabolic abnormalities throughout therapy (e.g., hypokalemia, hypovolemia, hyponatremia) [B]

Product Name:Furoscix	
Approval Length	3 Month(s) [A]
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
FUROSCIX	FUROSEMIDE SUBCUTANEOUS CARTRIDGE KIT 80 MG/10ML	3720003000F720	Brand

Approval Criteria

1 - Diagnosis of chronic heart failure

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming patient is currently on maintenance oral diuretic therapy (e.g., bumetanide, furosemide, torsemide) [C]

AND

3 - Provider attests that patient will be closely monitored for fluid, electrolyte, and metabolic abnormalities throughout therapy (e.g., hypokalemia, hypovolemia, hyponatremia) [B]

3 . Endnotes

A. Furoscix is not for chronic use and should be replaced with oral diuretics as soon as practical. [1]
B. Furosemide may cause fluid, electrolyte, and metabolic abnormalities such as hypovolemia, hypokalemia, azotemia, hyponatremia, hypochloremic alkalosis, hypomagnesemia, hypocalcemia, hyperglycemia, or hyperuricemia, particularly in patients receiving higher doses, patients with inadequate oral electrolyte intake, and in elderly patients. Serum electrolytes, CO , BUN, creatinine, glucose, and uric acid should be monitored frequently during furosemide therapy. [1]
C. Maintenance oral diuretic therapy includes those receiving 40-160 mg of oral furosemide equivalents daily (20-80 mg Torsemide or 1-4 mg Bumetanide). [3]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228429
Guideline Name	Fyarro (sirolimus albumin-bound particles for injectable suspension) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Fyarro (sirolimus albumin-bound particles for injectable suspension)
Perivascular Epithelioid Cell Tumor (PEComa) Indicated for the treatment of adult patients with locally advanced unresectable or metastatic malignant perivascular epithelioid cell tumor (PEComa).

2 . Criteria

Product Name:Fyarro	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FYARRO	SIROLIMUS PROTEIN-BOUND PARTICLES FOR IV SUSP 100 MG	21532560201920	Brand

Approval Criteria

1 - Diagnosis of malignant perivascular epithelioid cell tumor

AND

2 - Disease is one of the following:

- Unresectable locally advanced
- Metastatic

AND

3 - One of the following:

3.1 Trial of or intolerance to one of the following [A]:

- Sirolimus
- Everolimus
- Temsirolimus

OR

3.2 For continuation of prior therapy

Product Name:Fyarro	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

FYARRO	SIROLIMUS PROTEIN-BOUND PARTICLES FOR IV SUSP 100 MG	21532560201920	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Fyarro	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
FYARRO	SIROLIMUS PROTEIN-BOUND PARTICLES FOR IV SUSP 100 MG	21532560201920	Brand

Approval Criteria

1 - Diagnosis of malignant perivascular epithelioid cell tumor

AND

2 - Disease is one of the following:

- Unresectable locally advanced
- Metastatic

AND

3 - One of the following:

3.1 Paid claims or submission of medical records (e.g., chart notes) confirming trial of or intolerance to one of the following [A]:

- Sirolimus
- Everolimus

- Temsirolimus

OR

3.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of therapy, defined as no more than a 45-day gap in therapy

3 . Endnotes

A. mTOR inhibitors such as sirolimus, temsirolimus, and everolimus have shown promising results in patients with metastatic PEComas and are listed as other recommended regimens in NCCN (category 2A). [2]

4 . References

Prior Authorization Guideline

Guideline ID	GL-228864
Guideline Name	Galafold (migalastat)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Galafold (migalastat)
Fabry Disease Indicated for the treatment of adults with a confirmed diagnosis of Fabry disease and an amenable galactosidase alpha gene (GLA) variant based on in vitro assay data. This indication is approved based on reduction in kidney interstitial capillary cell globotriaosylceramide (KIC GL-3) substrate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trials.

2 . Criteria

Product Name:Galafold	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GALAFOLD	MIGALASTAT HCL CAP 123 MG (BASE EQUIVALENT)	30903650100120	Brand

Approval Criteria

1 - Diagnosis of Fabry Disease

AND

2 - One of the following: [3, 4]

- Detection of pathogenic mutations in the GLA gene by molecular genetic testing
- Deficiency in α-galactosidase A (α-Gal A) enzyme activity in plasma, isolated leukocytes, or dried blood spots (DBS)
- Significant clinical manifestations (e.g., neuropathic pain, cardiomyopathy, renal insufficiency, angiokeratomas, cornea verticillata)

AND

3 - Patient has an amenable galactosidase alpha gene (GLA) variant based on in vitro assay data [A]

AND

4 - Will not be used in combination with other drugs used for Fabry disease [B]

Product Name:Galafold	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

GALAFOLD	MIGALASTAT HCL CAP 123 MG (BASE EQUIVALENT)	30903650100120	Brand

Approval Criteria

1 - Documentation of positive clinical response to therapy as evidenced by one of the following: [3, 4]

- Reduction in plasma or urinary sediment lyso-GL-3, GL-3 compared to baseline
- Reduction in number of GL-3 inclusions per kidney interstitial capillary (KIC) in renal biopsy samples compared to baseline
- Improvement and/or stabilization in symptoms (e.g., renal function, neuropathic pain)

AND

2 - Will not be used in combination with other drugs used for Fabry disease [B]

3 . Endnotes

A. In an in vitro assay (HEK-293 assay), Human Embryonic Kidney (HEK-293) cell lines were transfected with specific GLA variants (mutations) which produced mutant alpha-Gal A proteins. A GLA variant was categorized as amenable if the resultant mutant alpha-Gal A activity (measured in the cell lysates) met two criteria: 1) it showed a relative increase of at least 20% compared to the pre-treatment alpha-Gal A activity, and 2) it showed an absolute increase of at least 3% of the wild-type (normal) alpha-Gal A activity. Whether a certain amenable GLA variant in a patient with Fabry disease is disease-causing or not should be determined by the prescribing physician (in consultation with a clinical genetics professional, if needed) prior to treatment initiation. [1]
B. The safety and effectiveness of concomitant use of Galafold and Fabrazyme (agalsidase beta) has not been established. [2]

4 . References

11/19/2024	Bulk Copy. CM 11.19.24

Gamifant (emapalumab-lzsg)

Prior Authorization Guideline

Guideline ID	GL-228865
Guideline Name	Gamifant (emapalumab-lzsg)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Gamifant (emapalumab-lzsg)
Primary Hemophagocytic Lymphohistiocytosis (HLH) Indicated for the treatment of adult and pediatric (newborn and older) patients with primary HLH with refractory, recurrent or progressive disease or intolerance with conventional HLH therapy.

2 . Criteria

Product Name:Gamifant	
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAMIFANT	EMAPALUMAB-LZSG IV SOLN 10 MG/2ML	99405035402020	Brand
GAMIFANT	EMAPALUMAB-LZSG IV SOLN 50 MG/10ML	99405035402040	Brand
GAMIFANT	EMAPALUMAB-LZSG IV SOLN 100 MG/20ML	99405035402060	Brand

Approval Criteria

1 - Diagnosis of primary hemophagocytic lymphohistiocytosis (HLH)

AND

2 - One of the following:

2.1 Disease is one of the following:

- Refractory
- Recurrent
- Progressive

OR

2.2 Trial and failure, contraindication, or intolerance to conventional HLH therapy (e.g., etoposide, dexamethasone, cyclosporine A, intrathecal methotrexate)

AND

3 - Prescribed by or in consultation with a hematologist/oncologist

AND

4 - Patient has not received hematopoietic stem cell transplantation (HSCT)

Product Name:Gamifant

Approval Length	6 Months [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAMIFANT	EMAPALUMAB-LZSG IV SOLN 10 MG/2ML	99405035402020	Brand
GAMIFANT	EMAPALUMAB-LZSG IV SOLN 50 MG/10ML	99405035402040	Brand
GAMIFANT	EMAPALUMAB-LZSG IV SOLN 100 MG/20ML	99405035402060	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in hemoglobin/lymphocyte/platelet counts, afebrile, normalization of inflammatory factors/markers)

AND

2 - Patient has not received HSCT

3 . Endnotes

A. Per clinical consultation, it is appropriate to limit authorization duration to no more than 6 months at a time, given that the ultimate goal in therapy is to receive HSCT and treatment with Gamifant should be viewed as bridge therapy to HSCT. Pivotal trial data duration was also less than 3 months. [2]

4 . References

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-233373
Guideline Name	Gattex (teduglutide)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Gattex (teduglutide)
Short Bowel Syndrome (SBS) Indicated for the treatment of adults and pediatric patients 1 year of age and older with Short Bowel Syndrome (SBS) who are dependent on parenteral support.

2 . Criteria

Product Name:Gattex	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GATTEX	TEDUGLUTIDE (RDNA) FOR INJ KIT 5 MG	52533070006420	Brand

Approval Criteria

1 - Diagnosis of short bowel syndrome

AND

2 - Patient is 1 year of age and older

AND

3 - Documentation that the patient is dependent on parenteral nutrition/intravenous (PN/IV) support for at least 12 consecutive months [A]

AND

4 - Prescribed by or in consultation with a gastroenterologist [C]

Product Name:Gattex	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GATTEX	TEDUGLUTIDE (RDNA) FOR INJ KIT 5 MG	52533070006420	Brand

Approval Criteria

1 - Documentation that the patient has had a reduction in weekly parenteral nutrition/intravenous (PN/IV) support from baseline while on Gattex therapy [B]

AND

2 - Prescribed by or in consultation with a gastroenterologist [C]

3 . Endnotes

A. Twelve consecutive months on parenteral nutrition is an inclusion criterion in clinical trials. [1]
B. In clinical trial data, treatment with Gattex has been shown to reduce the volume and number of days that patients with short bowel syndrome require parenteral nutrition/intravenous (PN/IV) support, with some patients remaining on Gattex therapy even if PN/IV support was no longer required. [1, 6-8]
C. Patients with short bowel syndrome (SBS) have undergone one or more surgical bowel resections due to underlying disease, congenital defects, or other trauma. These resections lead to inadequate digestion and absorption, requiring patients to become dependent on parenteral nutrition and/or intravenous (PN/IV) support. The management of PN/IV is complex and must be individualized to each patient as the degree of malabsorption can vary among patients with SBS. Long-term use of PN/IV can often lead to other complications, such as bacterial infections, blood clots, gallbladder disease, and liver and kidney problems. For SBS patients on chronic PN/IV, the goal of treatment is to reduce the need for PN/IV in order to improve the patients' quality of life and reduce the risk of any life-threatening complications. Careful monitoring of patients treated with Gattex is recommended in order to assess continued safety and manage any adverse effects or complications. [1-7]

5 . Revision History

Date	Notes
3/6/2025	Quartz Comm/EHB copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-233316
Guideline Name	Gaucher Disease Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/17/2025
P&T Approval Date:	11/20/2000
P&T Revision Date:	11/21/2024 ; 11/21/2024

1 . Indications

Drug Name: Cerezyme (imiglucerase for injection)
Type 1 Gaucher Disease Indicated for treatment of adults and pediatric patients 2 years of age and older with Type 1 Gaucher disease that results in one or more of the following conditions: - anemia - thrombocytopenia - bone disease - hepatomegaly or splenomegaly
Drug Name: Elelyso (taliglucerase alfa) for injection
Type 1 Gaucher Disease Indicated for the treatment of patients 4 years and older with a confirmed diagnosis of Type 1 Gaucher disease.
Drug Name: VPRIV (velaglucerase alfa for injection)
Type 1 Gaucher Disease Indicated for long-term enzyme replacement therapy (ERT) for patients with type 1 Gaucher disease.

Drug Name: Cerdelga (eliglustat)
Type 1 Gaucher Disease Indicated for the long-term treatment of adult patients with Gaucher disease type 1 (GD1) who are CYP2D6 extensive metabolizers (EMs), intermediate metabolizers (IMs), or poor metabolizers (PMs) as detected by an FDA-cleared test. Limitations of Use: Patients who are CYP2D6 ultra-rapid metabolizers (URMs) may not achieve adequate concentrations of CERDELGA to achieve a therapeutic effect. A specific dosage cannot be recommended for those patients whose CYP2D6 genotype cannot be determined (indeterminate metabolizers).

Drug Name: Zavesca (miglustat), Yargesa (miglustat)
Type 1 Gaucher Disease Indicated as monotherapy for the treatment of adult patients with mild to moderate type 1 Gaucher disease for whom enzyme replacement therapy is not a therapeutic option (e.g., due to allergy, hypersensitivity, or poor venous access).

2 . Criteria

Product Name:Cerezyme, Elelyso, or VPRIV	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CEREZYME	IMIGLUCERASE FOR INJ 400 UNIT	82700050002120	Brand
VPRIV	VELAGLUCERASE ALFA FOR INJ 400 UNIT	82700085102120	Brand
ELELYSO	TALIGLUCERASE ALFA FOR INJ 200 UNIT	82700080102120	Brand

Approval Criteria

1 - Diagnosis of Type 1 Gaucher disease

AND

2 - Patient has evidence of symptomatic disease (e.g., moderate to severe anemia [A], thrombocytopenia [B], bone disease [C], hepatomegaly [D], or splenomegaly [D])

AND

3 - One of the following:

3.1 Patient is 4 years of age or older (applies to Elelyso and VPRIV only)

OR

3.2 Patient is 2 years of age or older (applies to Cerezyme only)

Product Name:Cerdelga	
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CERDELGA	ELIGLUSTAT TARTRATE CAP 84 MG (BASE EQUIVALENT)	82700040600120	Brand

Approval Criteria

1 - Diagnosis of Type 1 Gaucher disease

AND

2 - Patient is an extensive metabolizer (EM), intermediate metabolizer (IM), or poor metabolizer (PM) of cytochrome P450 enzyme (CYP) 2D6 as detected by an FDA-cleared test

AND

3 - Patient is 18 years of age or older

Product Name:Brand Zavesca, Generic miglustat, or Yargesa	
Diagnosis	Type 1 Gaucher Disease
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZAVESCA	MIGLUSTAT CAP 100 MG	82700070000120	Brand
MIGLUSTAT	MIGLUSTAT CAP 100 MG	82700070000120	Generic
YARGESA	MIGLUSTAT CAP 100 MG	82700070000120	Generic

Approval Criteria

1 - Diagnosis of mild to moderate Type 1 Gaucher disease

AND

2 - Patient is 18 years of age or older

Product Name:Brand Zavesca, Generic miglustat	
Diagnosis	Niemann-Pick disease type C (NPC) (off-label) [E]
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MIGLUSTAT	MIGLUSTAT CAP 100 MG	82700070000120	Generic
ZAVESCA	MIGLUSTAT CAP 100 MG	82700070000120	Brand

Approval Criteria

1 - Diagnosis of Niemann-Pick disease type C (NPC)

AND

2 - Requested drug will be used in combination with Miplyffa (arimoclomol)

AND

3 - Prescribed by or in consultation with a specialist knowledgeable in the treatment of Niemann-Pick disease type C

Product Name:Brand Zavesca, Generic miglustat	
Diagnosis	Niemann-Pick disease type C (NPC) (off-label) [E]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
MIGLUSTAT	MIGLUSTAT CAP 100 MG	82700070000120	Generic
ZAVESCA	MIGLUSTAT CAP 100 MG	82700070000120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Requested drug will be used in combination with Miplyffa (arimoclomol)

3 . Endnotes

A. Goals of treatment with anemia are to increase hemoglobin to greater than or equal to 12.0 g/dL for males (greater than 12 years of age), and to greater than or equal to 11.0

g/dL for both children (less than or equal to 12 years of age) and females (greater than 12 years of age). [6, 8]

B. Moderate thrombocytopenia is defined as a platelet count of 60,000 to 120,000/microliter. A platelet count of 120,000/microliter to meet the criterion of thrombocytopenia is based on the upper end of the range that defines moderate thrombocytopenia. [6]
C. In bone disease, the goal is to lessen or eliminate bone pain and prevent bone crises. Bone disease can be diagnosed using MRI, bone scan, and X-ray. [6-8]
D. Hepatomegaly is defined as a liver mass of greater than 1.25 times normal value. Splenomegaly is defined as a splenic mass greater than the normal, and moderate splenomegaly is considered a spleen volume of greater than 5 and less than or equal to 15 times normal. [6]
E. Criteria is here to support the off-label use of miglustat for the treatment of neurological manifestations of Niemann-Pick disease type C (NPC) in combination with Miplyffa as per Miplyffa FDA labelling. [12-14]

Date	Notes
1/16/2025	Criteria updated

Gavreto (pralsetinib)

Prior Authorization Guideline

Guideline ID	GL-229157
Guideline Name	Gavreto (pralsetinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/12/2020
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Gavreto (pralsetinib)
Non-Small Cell Lung Cancer (NSCLC) Indicated for the treatment of adult patients with metastatic RET fusion-positive non-small cell lung cancer (NSCLC) as detected by an FDA approved test. **RET Fusion-Positive Thyroid Cancer** Indicated for the treatment of adult and pediatric patients 12 years of age and older with advanced or metastatic RET fusion-positive thyroid cancer who require systemic therapy and who are radioactive iodine-refractory (if radioactive iodine is appropriate) This indication is approved under accelerated approval based on overall response rate and duration of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trial(s).

2 . Criteria

Product Name:Gavreto	
Diagnosis	Lung Cancer
Approval Length	12 month(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAVRETO	PRALSETINIB CAP 100 MG	21535750000120	Brand

Approval Criteria

1 - Diagnosis of thyroid cancer

AND

2 - Disease is one of the following:

- Advanced
- Metastatic

AND

3 - Presence of rearranged during transfection (RET) gene fusion-positive tumor(s)

AND

4 - Patient is 12 years of age or older

AND

5 - Disease requires treatment with systemic therapy

AND

6 - ONE of the following :

- Patient is radioactive iodine-refractory
- Radioactive iodine therapy is not appropriate

Product Name:Gavreto	
Diagnosis	Lung Cancer, Thyroid Cancer
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAVRETO	PRALSETINIB CAP 100 MG	21535750000120	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228432
Guideline Name	Gazyva (obinutuzumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Gazyva (obinutuzumab)
Chronic Lymphocytic Leukemia (CLL) Indicated for the treatment of patients with previously untreated chronic lymphocytic leukemia (CLL) in combination with chlorambucil. **Follicular Lymphoma (FL)** 1) Indicated in combination with bendamustine followed by Gazyva monotherapy for the treatment of patients with follicular lymphoma (FL) who relapsed after, or are refractory to, a rituximab-containing regimen. 2) Indicated for the treatment of adult patients with previously untreated stage II bulky, III or IV follicular lymphoma in combination with chemotherapy followed by Gazyva monotherapy in patients achieving at least a partial remission. **Off Label Uses: Small Lymphocytic Lymphoma (SLL) [2]**

2 . Criteria

Product Name:Gazyva	
Diagnosis	Chronic Lymphocytic Leukemia (CLL)/ Small Lymphocytic Leukemia (SLL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAZYVA	OBINUTUZUMAB SOLN FOR IV INFUSION 1000 MG/40ML (25 MG/ML)	21351843002025	Brand

Approval Criteria

1 - One of the following:

- Diagnosis of chronic lymphocytic leukemia (CLL) and is previously untreated for CLL
- Diagnosis of small lymphocytic leukemia (SLL) and previously untreated for SLL [A]

AND

2 - Used in combination with chlorambucil [2,3]

Product Name:Gazyva	
Diagnosis	Follicular Lymphoma (FL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAZYVA	OBINUTUZUMAB SOLN FOR IV INFUSION 1000 MG/40ML (25 MG/ML)	21351843002025	Brand

Approval Criteria

1 - Diagnosis of follicular lymphoma (FL)

AND

2 - One of the following:

2.1 All of the following:

2.1.1 Relapsed or refractory to a rituximab-containing regimen [B]

AND

2.1.2 Will be used in combination with bendamustine for six cycles prior to maintenance treatment with Gazyva monotherapy

OR

2.2 All of the following:

2.2.1 Diagnosis of stage II bulky, III or IV follicular lymphoma

AND

2.2.2 Patient has not been treated with prior therapy

AND

2.2.3 Both of the following:

- Used in combination with chemotherapy until at least partial remission has been achieved
- Followed by Gazyva monotherapy

Product Name:Gazyva	
Diagnosis	All Indications

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAZYVA	OBINUTUZUMAB SOLN FOR IV INFUSION 1000 MG/40ML (25 MG/ML)	21351843002025	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. The National Comprehensive Cancer Network (NCCN) guidelines support the use of obinutuzumab for the treatment of small lymphocytic leukemia (SLL). One clinical trial showed the combination of obinutuzumab plus chlorambucil resulted in significant improvement in the median progression free survival (PFS) compared to chlorambucil alone (26.7 months vs 11.1 months, respectively). [2]
B. NCCN supports use of obinutuzumab in the treatment of follicular lymphoma as maintenance therapy for rituximab refractory disease in patients with indications for treatment as second-line extended dosing. [2]

Approval Criteria

1 - One of the following:

1.1 Both of the following:

- Patient is using the prescribed drug for contraception or other FDA-approved condition*
- The requested product is medically necessary**

OR

1.2 Both of the following:

- Patient is using the prescribed drug for contraception or other FDA-approved condition*
- Trial and failure of a minimum 30 day supply, or intolerance to target's generic counterpart

Notes	*Examples of non-contraception uses: (1) Abnormal or excessive bleeding disorders (eg, amenorrhea, oligomenorrhea, menorrhagia, dysfunctional uterine bleeding); (2) Acne; (3) Decrease in bone mineral density; (4) Dysmennorrhea; (5) Endometriosis; (6) Hirsutism; (7) Irregular menses / cycles; (8) Ovarian cysts; (9) Perimenopausal symptoms; (10) History of Pelvic Inflammatory Disease (PID); (11) Polycystic Ovarian Syndrome (PCO or PCOS); (12) Premenstrual Syndrome (PMS); (13) Premenstrual Dysphoric Disorder (PMDD); (14) Prevention of endometrial and/or ovarian cancer; (15) Prevention of menstrual migraines; (16) Turner's syndrome; (17) Uterine fibroids or adenomyosis. **An

	y justification of medical necessity/appropriateness provided by the pr escriber is adequate to approve access.

3 . Revision History

Date	Notes
2/18/2025	Quartz Com/EHB copied to mirrow OptumRx/EHB

Prior Authorization Guideline

Guideline ID	GL-233253
Guideline Name	Gilenya (fingolimod) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/14/2022
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Gilenya (fingolimod)
Multiple Sclerosis Indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in patients 10 years of age and older.

2 . Criteria

Product Name:Generic fingolimod, Brand Gilenya 0.25mg	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FINGOLIMOD	FINGOLIMOD HCL CAP 0.5 MG (BASE EQUIV)	62407025100120	
GILENYA	FINGOLIMOD HCL CAP 0.25 MG (BASE EQUIV)	62407025100110	

Approval Criteria

1 - Diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A-D]

AND

2 - Patient is 10 years of age or older

AND

3 - Not used in combination with another disease-modifying therapy for MS [E, 5, 6]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Brand Gilenya 0.5mg	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GILENYA	FINGOLIMOD HCL CAP 0.5 MG (BASE EQUIV)	62407025100120	Brand

Approval Criteria

1 - Diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A-D]

AND

2 - Patient is 10 years of age or older

AND

3 - Failure after a trial of at least 4 weeks, or intolerance to generic fingolimod

AND

4 - One of the following:

4.1 Patient is less than 18 years of age

OR

4.2 Both of the following:

4.2.1 Patient is 18 years of age or older

AND

4.2.2 One of the following:

4.2.2.1 Failure after a trial of at least 4 weeks, contraindication or intolerance to two disease-modifying therapies from the following:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Dimethyl fumarate
- Fingolimod

- Kesimpta (ofatumumab)
- Mayzent (siponimod)
- Vumerity (diroximel fumarate)
- Zeposia (ozanimod)

OR

4.2.2.2 Both of the following:

- For continuation of prior therapy, defined as no more than a 45-day gap in therapy
- Patient demonstrates positive clinical response to therapy

AND

5 - Not used in combination with another disease-modifying therapy for MS [E, 5, 6]

AND

6 - Prescribed by or in consultation with a neurologist

Product Name:Brand Gilenya, generic fingolimod	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GILENYA	FINGOLIMOD HCL CAP 0.25 MG (BASE EQUIV)	62407025100110	Brand
GILENYA	FINGOLIMOD HCL CAP 0.5 MG (BASE EQUIV)	62407025100120	Brand
FINGOLIMOD	FINGOLIMOD HCL CAP 0.5 MG (BASE EQUIV)	62407025100120	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., stability in radiologic disease activity, clinical relapses, disease progression)

AND

2 - Failure after a trial of at least 4 weeks, or intolerance to generic fingolimod (applies to Brand Gilenya 0.5mg only)

AND

3 - Not used in combination with another disease-modifying therapy for MS [E, 5, 6]

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Brand Gilenya 0.5mg	
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
GILENYA	FINGOLIMOD HCL CAP 0.5 MG (BASE EQUIV)	62407025100120	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming a diagnosis of a relapsing form of multiple sclerosis (MS) (e.g., clinically isolated syndrome, relapsing-remitting disease, secondary progressive disease, including active disease with new brain lesions) [A-D]

AND

2 - Patient is 10 years of age or older

AND

3 - Both of the following:

3.1 Submission of medical records (e.g., chart notes) confirming lack of adequate clinical response (with related symptoms) with generic fingolimod

AND

3.2 Submission of medical records confirming generic fingolimod has not been effective AND valid clinical justification provided explaining how Brand Gilenya 0.5mg is expected to provide benefit when generic fingolimod has not been shown to be effective despite having the same active ingredient

AND

4 - One of the following:

4.1 Patient is less than 18 years of age

OR

4.2 Both of the following:

4.2.1 Patient is 18 years of age or older

AND

4.2.2 One of the following:

4.2.2.1 Submission of medical records (e.g., chart notes) or paid claims confirming failure after a trial of at least 4 weeks, contraindication or intolerance to two disease-modifying therapies from the following:

- Avonex (interferon beta-1a)
- Betaseron (interferon beta-1b)
- Bafiertam (monomethyl fumarate)
- Copaxone/Glatopa (glatiramer acetate)
- Dimethyl fumarate
- Fingolimod
- Kesimpta (ofatumumab)
- Mayzent (siponimod)

- Vumerity (diroximel fumarate)
- Zeposia (ozanimod)

OR

4.2.2.2 Both of the following:

4.2.2.2.1 Submission of medical records (e.g., chart notes) or paid claims confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy for continuation of therapy

AND

4.2.2.2.2 Patient demonstrates positive clinical response to therapy

AND

5 - Not used in combination with another disease-modifying therapy for MS [E, 5, 6]

AND

6 - Prescribed by or in consultation with a neurologist

3 . Endnotes

A. According to the National MS Society, of the four disease courses that have been identified in MS, relapsing-remitting MS (RRMS) is characterized primarily by relapses, and secondary-progressive MS (SPMS) has both relapsing and progressive characteristics. These two constitute “relapsing forms of MS” if they describe a disease course that is characterized by the occurrence of relapses. [3] The effectiveness of interferon beta in SPMS patients without relapses is uncertain. [2]
B. Initiation of treatment with an interferon beta medication or glatiramer acetate should be considered as soon as possible following a definite diagnosis of MS with active, relapsing disease, and may also be considered for selected patients with a first attack who are at high risk of MS. [2]
C. Based on several years of experience with glatiramer acetate and interferon beta 1a and 1b, it is the consensus of researchers and clinicians with expertise in MS that these agents are likely to reduce future disease activity and improve quality of life for many

individuals with relapsing forms of MS, including those with secondary progressive disease who continue to have relapses. For those who are appropriate candidates for one of these drugs, treatment must be sustained for years. Cessation of treatment may result in a resumption of pre-treatment disease activity. [2]

D. MS specialists will use Copaxone in relapsing forms of disease, including SPMS with relapses. While there have been no trials of Copaxone in SPMS (so we have no evidenced-based data upon which to make decisions or recommendations), it's clear that where there are relapses, the injectable therapies are partially effective – they reduce relapses and new lesions on MRI. In SPMS, the trials suggest that the interferons work better in earlier, more inflammatory (i.e. those with relapses prior to the trial and with gadolinium-enhancing lesions, which is the MRI equivalent of active inflammation). Since Copaxone and the interferons appear to have rather similar efficacy in the head-to-head trials, most assume that Copaxone has a similar efficacy in SPMS: where there are relapses or active inflammation on MRI, it will likely have some benefit. Thus, most MS specialists will use Copaxone in patients with SPMS who have persistent relapses. [4]
E. The advantage of using combination disease-modifying therapy (DMT) compared to monotherapy DMT use has not been demonstrated, but there are safety concerns, such as reduced efficacy or disease aggravation, with combination use. [5, 6]

Gilotrif (afatinib)

Prior Authorization Guideline

Guideline ID	GL-229097
Guideline Name	Gilotrif (afatinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/8/2013
P&T Revision Date:	11/21/2025

1 . Indications

Drug Name: Gilotrif (afatinib)
EGFR Mutation-Positive, Metastatic Non-Small Cell Lung Cancer (NSCLC) Indicated for the first-line treatment of patients with metastatic non-small cell lung cancer (NSCLC) whose tumors have non-resistant epidermal growth factor receptor (EGFR) mutations as detected by an FDA-approved test. Limitation of Use: Safety and efficacy of Gilotrif have not been established in patients whose tumors have resistant EGFR mutations. **Previously Treated, Metastatic Squamous Non-Small Cell Lung Cancer (NSCLC)** Indicated for the treatment of patients with metastatic, squamous non-small cell lung cancer (NSCLC) progressing after platinum-based chemotherapy.

2 . Criteria

Product Name:Gilotrif	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228863
Guideline Name	Gleevec (imatinib mesylate) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Gleevec (imatinib mesylate)
Chronic myelogenous/myeloid leukemia (CML) Indicated for the treatment of newly diagnosed adult and pediatric patients with Philadelphia chromosome positive chronic myeloid leukemia in chronic phase. Gleevec is also indicated for the treatment of patients with Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML) in blast crisis (BC), accelerated phase (AP), or in chronic phase (CP) after failure of interferon-alpha therapy. **Acute lymphoblastic leukemia/ Acute lymphoblastic lymphoma (ALL)** Indicated for the treatment of adult patients with relapsed or refractory Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL). Gleevec is also indicated for the treatment of pediatric patients with newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL) in combination with chemotherapy. **Myelodysplastic/myeloproliferative diseases (MDS/MPD)** Indicated for the treatment of adult patients with myelodysplastic/myeloproliferative diseases (MDS/MPD) associated with platelet-derived growth factor receptor (PDGFR) gene rearrangements. **Aggressive systemic mastocytosis (ASM)** Indicated for the treatment of adult patients with aggressive systemic mastocytosis (ASM) without the D816V c-Kit mutation or with c-Kit

mutational status unknown.

Hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukemia (CEL) Indicated for the treatment of adult patients with hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukemia (CEL) who have the FIP1L1-PDGFRa fusion kinase (mutational analysis or fluorescence in situ hybridization [FISH] demonstration of CHIC2 allele deletion) and for patients with HES and/or CEL who are FIP1L1-PDGFRa fusion kinase negative or unknown.

Dermatofibrosarcoma protuberans (DFSP) Indicated for the treatment of adult patients with unresectable, recurrent and/or metastatic dermatofibrosarcoma protuberans (DFSP).

Gastrointestinal stromal tumors (GIST) Indicated for the treatment of patients with Kit (CD117) positive unresectable and/or metastatic malignant gastrointestinal stromal tumors (GIST). Gleevec is also indicated for the adjuvant treatment of adult patients following complete gross resection of Kit (CD117) positive GIST.

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228434
Guideline Name	Glycopyrrolate Oral Solution
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cuvposa (Glycopyrrolate oral solution)
Chronic Severe Drooling (Sialorrhea) Indicated to reduce chronic severe drooling in patients aged 3 to 16 years with neurologic conditions associated with problem drooling (e.g., cerebral palsy).

2 . Criteria

Product Name:Brand Cuvposa, Generic glycopyrrolate oral solution	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GLYCOPYRROLATE	GLYCOPYRROLATE ORAL SOLN 1 MG/5ML	49102030002060	Generic
CUVPOSA	GLYCOPYRROLATE ORAL SOLN 1 MG/5ML	49102030002060	Brand

Approval Criteria

1 - Diagnosis of chronic severe drooling (sialorrhea)

AND

2 - Diagnosis of a neurologic condition (e.g., cerebral palsy) associated with chronic severe drooling (sialorrhea)

AND

3 - Patient is between 3 and 16 years of age

AND

4 - One of the following:

4.1 Trial and failure, or intolerance to generic glycopyrrolate tablets [A]

OR

4.2 Patient requires liquid formulation due to dosing or inability to take tablet formulation

Product Name:Brand Cuvposa, Generic glycopyrrolate oral solution	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

GLYCOPYRROLATE	GLYCOPYRROLATE ORAL SOLN 1 MG/5ML	49102030002060	Generic
CUVPOSA	GLYCOPYRROLATE ORAL SOLN 1 MG/5ML	49102030002060	Brand

Approval Criteria

1 - Patient demonstrates a positive clinical response to therapy (e.g., reduction in drooling severity compared to baseline)

AND

2 - One of the following:

2.1 Trial and failure, or intolerance to generic glycopyrrolate tablets [A]

OR

2.2 Patient requires liquid formulation due to dosing or inability to take tablet formulation

3 . Endnotes

A. Prior to the approval of glycopyrrolate oral solution, glycopyrrolate tablets were frequently and extensively used off-label in children to treat chronic drooling due to neurological conditions. [2, 3]

Prior Authorization Guideline

Guideline ID	GL-228653
Guideline Name	Glycopyrrolate Tablets - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Dartisla ODT (glycopyrrolate), Robinul/Robinul Forte (glycopyrrolate tablet)
Peptic Ulcer, Adjunct Indicated in adults to reduce symptoms of a peptic ulcer as an adjunct to treatment of peptic ulcer. Limitations of Use: Dartisla ODT/Robinul/Robinul Forte are not indicated as monotherapy for treatment of peptic ulcer because effectiveness in peptic ulcer healing has not been established.
Drug Name: Glycate (glycopyrrolate tablet)
Peptic Ulcer, Adjunct Indicated for use as adjunctive therapy in the treatment of peptic ulcer.

2 . Criteria

Product Name:Dartisla ODT, Brand Glycate, Brand Glycopyrrolate tablet, Robinul, Robinul Forte	
Approval Length	3 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
DARTISLA ODT	GLYCOPYRROLATE TAB DISINTEGRATING 1.7 MG	49102030007220	Brand
ROBINUL	GLYCOPYRROLATE TAB 1 MG	49102030000310	Brand

GLYCOPYRROLATE	GLYCOPYRROLATE TAB 1.5 MG	49102030000312	Generic

Approval Criteria

1 - Diagnosis of peptic ulcer as confirmed by endoscopy

AND

2 - One of the following: [2]

2.1 Patient is receiving concomitant treatment therapy with a proton-pump inhibitor (PPI) (e.g., lansoprazole, omeprazole)

OR

2.2 Both of the following:

2.2.1 Patient has a contraindication or intolerance to PPIs

AND

2.2.2 Patient is receiving concomitant treatment therapy with an H2-receptor antagonist (e.g., famotidine, nizatidine)

AND

3 - One of the following:

3.1 Trial and failure, or intolerance to generic glycopyrrolate tablets

OR

3.2 Patient is unable to swallow tablets (Applies to Dartisla ODT only)

AND

4 - Prescribed by or in consultation with a gastroenterologist

Product Name:Dartisla ODT, Brand Glycate, Brand Glycopyrrolate tablet, Robinul, Robinul Forte	
Approval Length	3 Months [A]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
DARTISLA ODT	GLYCOPYRROLATE TAB DISINTEGRATING 1.7 MG	49102030007220	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming one of the following:

1.1 Patient's peptic ulcer has not healed as confirmed by endoscopy

OR

1.2 Patient has a new peptic ulcer as confirmed by endoscopy

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming one of the following: [2-3]

2.1 Patient is receiving concomitant treatment therapy with a proton-pump inhibitor (PPI) (e.g., lansoprazole, omeprazole)

OR

2.2 Both of the following:

2.2.1 Patient has a contraindication or intolerance to PPIs

AND

2.2.2 Patient is receiving concomitant treatment therapy with an H2-receptor antagonist (e.g., famotidine, nizatidine)

AND

3 - Submission of medical records (e.g., chart notes) confirming patient has experienced a reduction in peptic ulcer symptoms while on therapy

AND

4 - Submission of medical records (e.g., chart notes) confirming that other correctable factors (e.g., medication noncompliance, NSAID use, H. pylori infection, etc.) have been addressed

AND

5 - Prescribed by or in consultation with a gastroenterologist

3 . Endnotes

A. Leading organizations and guidelines for peptic ulcer disease do not recommend glycopyrrolate as an option for the management of peptic ulcer. Due to the limited data

available, Dartisla ODT treatment duration is based on current treatment guidance with antisecretory therapy which recommends initial treatment with a PPI for a maximum of 12 weeks, and an additional maximum 12 weeks for refractory ulcers, after which surgery should be considered. [2-3]

Prior Authorization Guideline

Guideline ID	GL-233311
Guideline Name	Gonadotropin-Releasing Hormone Agonists
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	12/12/2005
P&T Revision Date:	8/15/2024

1 . Indications

Drug Name: Lupron Depot (leuprolide acetate) 1-Month 7.5 mg, Lupron Depot 3-Month 22.5 mg, Lupron Depot 4-Month 30 mg, Lupron Depot 6-Month 45 mg
Prostate Cancer Indicated for the treatment of advanced prostate cancer. **Off Label Uses: Gender Dysphoria [16, 17]** Suppression of pubertal development and gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]
Drug Name: Lupron Depot 1-Month 3.75 mg, Lupron Depot 3-Month 11.25 mg

Endometriosis Indicated for the management of endometriosis, including pain relief and reduction of endometriotic lesions. In combination with a norethindrone acetate, it is also indicated for initial management of the painful symptoms of endometriosis and for management of recurrence of symptoms. Use of norethindrone acetate in combination with LUPRON DEPOT is referred to as add-back therapy, and is intended to reduce the loss of bone mineral density (BMD) and reduce vasomotor symptoms associated with use of LUPRON DEPOT. Limitations of Use: The total duration of therapy with LUPRON DEPOT plus add-back therapy should not exceed 12 months due to concerns about adverse impact on bone mineral density.

Uterine Leiomyomata (Fibroids) Indicated for concomitant use with iron therapy for preoperative hematologic improvement of women with anemia caused by fibroids for whom three months of hormonal suppression is deemed necessary. Consider a one-month trial period on iron alone, as some women will respond to iron alone. LUPRON DEPOT may be added if the response to iron alone is considered inadequate. Limitations of Use: Not indicated for combination use with norethindrone acetate add-back therapy for the preoperative hematologic improvement of women with anemia caused by heavy menstrual bleeding due to fibroids.

Off Label Uses: Gender Dysphoria [16, 17] Suppression of pubertal development and gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]

Drug Name: Leuprolide Acetate

Prostate Cancer Indicated for the palliative treatment of advanced prostatic cancer.

Off Label Uses: Infertility Used for controlled ovarian hyperstimulation to enhance the in vitro fertilization-embryo transfer (IVF-ET) procedure. [5]

Gender Dysphoria [16, 17] Suppression of pubertal development and gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]

Drug Name: Leuprolide Acetate Depot, Eligard (leuprolide acetate), Trelstar (triptorelin pamoate)

Prostate Cancer Indicated for the treatment of advanced prostate cancer.

Off Label Uses: Gender Dysphoria [16, 17] Suppression of pubertal development and

gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]

Drug Name: Lupron Depot-PED (leuprolide acetate)

Central Precocious Puberty (CPP) Indicated for the treatment of pediatric patients with central precocious puberty (CPP).

Off Label Uses: Gender Dysphoria [16, 17] Suppression of pubertal development and gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]

Drug Name: Camcevi (leuprolide)

Prostate Cancer Indicated for the treatment of adult patients with advanced prostate cancer.

Drug Name: Supprelin LA (histrelin acetate)

Central Precocious Puberty (CPP) Indicated for the treatment of children with CPP. Children with CPP (neurogenic or idiopathic) have an early onset of secondary sexual characteristics (earlier than 8 years of age in females and 9 years of age in males). They also show a significantly advanced bone age that can result in diminished adult height attainment. Prior to initiation of treatment a clinical diagnosis of CPP should be confirmed by measurement of blood concentrations of total sex steroids, luteinizing hormone (LH) and follicle stimulating hormone (FSH) following stimulation with a GnRH analog, and assessment of bone age versus chronological age. Baseline evaluations should include height and weight measurements, diagnostic imaging of the brain (to rule out intracranial tumor), pelvic/testicular/adrenal ultrasound (to rule out steroid secreting tumors), human chorionic gonadotropin levels (to rule out a chorionic gonadotropin secreting tumor), and adrenal steroids to exclude congenital adrenal hyperplasia.

Gender Dysphoria [16, 17] Suppression of pubertal development and gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]

Drug Name: Triptodur (triptorelin), Fensolvi (leuprolide acetate)
Central Precocious Puberty (CPP) Indicated for the treatment of pediatric patients 2 years of age and older with central precocious puberty (CPP). **Gender Dysphoria [16, 17]** Suppression of pubertal development and gonadal function is accomplished most effectively by gonadotropin suppression with gonadotropin releasing hormone analogues and antagonists. Analogues suppress gonadotropins after a short period of stimulation, whereas antagonists immediately suppress pituitary secretion. Since no long-acting antagonists are available for use as pharmacotherapy, long-acting analogues are the currently preferred treatment option. [16] Early use of puberty-suppressing hormones may avert negative social and emotional consequences of gender dysphoria more effectively than their later use would. [17]

2 . Criteria

Product Name:Camcevi, Lupron Depot (7.5 mg, 22.5 mg, 30 mg and 45 mg)	
Diagnosis	Prostate Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CAMCEVI	LEUPROLIDE MESYLATE (6 MONTH) EMULSION PREFILLED SYR 42 MG	2140501055E420	Brand
LUPRON DEPOT (1-MONTH)	LEUPROLIDE ACETATE FOR INJ KIT 7.5 MG	21405010106410	Brand
LUPRON DEPOT (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ KIT 22.5 MG	21405010156430	Brand
LUPRON DEPOT (4-MONTH)	LEUPROLIDE ACETATE (4 MONTH) FOR INJ KIT 30 MG	21405010206430	Brand
LUPRON DEPOT (6-MONTH)	LEUPROLIDE ACETATE (6 MONTH) FOR INJ KIT 45 MG	21405010256450	Brand

Approval Criteria

1 - Diagnosis of advanced or metastatic prostate cancer

Product Name:Eligard, Brand Leuprolide Acetate (22.5 mg), Generic leuprolide acetate, Trelstar	
Diagnosis	Prostate Cancer
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ELIGARD	LEUPROLIDE ACETATE FOR SUBCUTANEOUS INJ KIT 7.5 MG	21405010106415	Brand
ELIGARD	LEUPROLIDE ACETATE (3 MONTH) FOR SUBCUTANEOUS INJ KIT 22.5MG	21405010156432	Brand
ELIGARD	LEUPROLIDE ACETATE (4 MONTH) FOR SUBCUTANEOUS INJ KIT 30 MG	21405010206435	Brand
ELIGARD	LEUPROLIDE ACETATE (6 MONTH) FOR SUBCUTANEOUS INJ KIT 45 MG	21405010256445	Brand
LEUPROLIDE ACETATE	LEUPROLIDE ACETATE INJ KIT 5 MG/ML	21405010106407	Generic
TRELSTAR MIXJECT	TRIPTORELIN PAMOATE FOR IM SUSP 3.75 MG	21405050201920	Brand
TRELSTAR MIXJECT	TRIPTORELIN PAMOATE FOR IM SUSP 11.25 MG	21405050201930	Brand
TRELSTAR MIXJECT	TRIPTORELIN PAMOATE FOR IM SUSP 22.5 MG	21405050201940	Brand
LEUPROLIDE ACETATE	LEUPROLIDE ACETATE (3 MONTH) FOR INJ 22.5 MG	21405010152230	Brand

Approval Criteria

1 - Diagnosis of advanced or metastatic prostate cancer

AND

2 - Trial and failure, contraindication, or intolerance to any brand Lupron formulation

Product Name:Camcevi, Eligard, Brand Leuprolide Acetate (22.5 mg), Generic leuprolide acetate, Lupron Depot (7.5 mg, 22.5 mg, 30 mg and 45 mg), Trelstar	
Diagnosis	Prostate Cancer
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ELIGARD	LEUPROLIDE ACETATE FOR SUBCUTANEOUS INJ KIT 7.5 MG	21405010106415	Brand
ELIGARD	LEUPROLIDE ACETATE (3 MONTH) FOR SUBCUTANEOUS INJ KIT 22.5MG	21405010156432	Brand
ELIGARD	LEUPROLIDE ACETATE (4 MONTH) FOR SUBCUTANEOUS INJ KIT 30 MG	21405010206435	Brand
ELIGARD	LEUPROLIDE ACETATE (6 MONTH) FOR SUBCUTANEOUS INJ KIT 45 MG	21405010256445	Brand
LEUPROLIDE ACETATE	LEUPROLIDE ACETATE INJ KIT 5 MG/ML	21405010106407	Generic
TRELSTAR MIXJECT	TRIPTORELIN PAMOATE FOR IM SUSP 3.75 MG	21405050201920	Brand
TRELSTAR MIXJECT	TRIPTORELIN PAMOATE FOR IM SUSP 11.25 MG	21405050201930	Brand
TRELSTAR MIXJECT	TRIPTORELIN PAMOATE FOR IM SUSP 22.5 MG	21405050201940	Brand
CAMCEVI	LEUPROLIDE MESYLATE (6 MONTH) EMULSION PREFILLED SYR 42 MG	2140501055E420	Brand
LUPRON DEPOT (1-MONTH)	LEUPROLIDE ACETATE FOR INJ KIT 7.5 MG	21405010106410	Brand
LUPRON DEPOT (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ KIT 22.5 MG	21405010156430	Brand
LUPRON DEPOT (4-MONTH)	LEUPROLIDE ACETATE (4 MONTH) FOR INJ KIT 30 MG	21405010206430	Brand
LUPRON DEPOT (6-MONTH)	LEUPROLIDE ACETATE (6 MONTH) FOR INJ KIT 45 MG	21405010256450	Brand
LEUPROLIDE ACETATE	LEUPROLIDE ACETATE (3 MONTH) FOR INJ 22.5 MG	21405010152230	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

Product Name:Lupron Depot (3.75 mg and 11.25 mg)	
Diagnosis	Endometriosis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUPRON DEPOT (1-MONTH)	LEUPROLIDE ACETATE FOR INJ KIT 3.75 MG	21405010106405	Brand
LUPRON DEPOT (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ KIT 11.25 MG	21405010156420	Brand

Approval Criteria

1 - Diagnosis of endometriosis

AND

2 - One of the following: [8, 12]

2.1 History of inadequate pain control response following a trial of at least 6 months, or history of intolerance or contraindication to one of the following:

- Danazol
- Combination (estrogen/progestin) oral contraceptive
- Progestins

OR

2.2 Patient has had surgical ablation to prevent recurrence

Product Name:Lupron Depot (3.75 mg and 11.25 mg)

Diagnosis	Endometriosis
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUPRON DEPOT (1-MONTH)	LEUPROLIDE ACETATE FOR INJ KIT 3.75 MG	21405010106405	Brand
LUPRON DEPOT (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ KIT 11.25 MG	21405010156420	Brand

Approval Criteria

1 - Recurrence of symptoms following a trial of at least 6 months with leuprolide acetate

AND

2 - Used in combination with one of the following:

- Norethindrone 5 mg daily
- Other "add-back" sex-hormones (e.g., estrogen, medroxyprogesterone)
- Other bone-sparing agents (e.g., bisphosphonates such as alendronate, risedronate)

Product Name:Lupron Depot (3.75 mg and 11.25 mg)	
Diagnosis	Uterine Leiomyomata (Fibroids) - For the reduction of the size of fibroids [off-label]
Approval Length	4 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUPRON DEPOT (1-MONTH)	LEUPROLIDE ACETATE FOR INJ KIT 3.75 MG	21405010106405	Brand

LUPRON DEPOT (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ KIT 11.25 MG	21405010156420	Brand

Approval Criteria

1 - For use prior to surgery to reduce the size of fibroids to facilitate a surgical procedure (e.g., myomectomy, hysterectomy) [5]

Product Name:Lupron Depot (3.75 mg and 11.25 mg)	
Diagnosis	Uterine Leiomyomata (Fibroids) - Anemia [4,6]
Approval Length	3 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LUPRON DEPOT (1-MONTH)	LEUPROLIDE ACETATE FOR INJ KIT 3.75 MG	21405010106405	Brand
LUPRON DEPOT (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ KIT 11.25 MG	21405010156420	Brand

Approval Criteria

1 - For the treatment of anemia

AND

2 - Anemia is caused by uterine leiomyomata (fibroids)

AND

3 - Patient has tried and had an inadequate response to at least 1 month of monotherapy with iron

AND

4 - Used in combination with iron therapy

AND

5 - For use prior to surgery

Product Name:Fensolvi, Lupron Depot-PED, Supprelin LA, Triptodur	
Diagnosis	Central Precocious Puberty (CPP)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUPPRELIN LA	HISTRELIN ACETATE (CPP) IMPLANT KIT 50 MG	30080045106450	Brand
TRIPTODUR	TRIPTORELIN PAMOATE FOR IM ER SUSP 22.5 MG (BASE EQUIV)	3008007040G240	Brand
FENSOLVI	LEUPROLIDE ACET (6 MONTH) FOR INJ PEDIATRIC KIT 45 MG	30080050256450	Brand
LUPRON DEPOT-PED (1-MONTH)	LEUPROLIDE ACETATE FOR INJ PEDIATRIC KIT 7.5 MG	30080050106420	Brand
LUPRON DEPOT-PED (1-MONTH)	LEUPROLIDE ACETATE FOR INJ PEDIATRIC KIT 11.25 MG	30080050106430	Brand
LUPRON DEPOT-PED (1-MONTH)	LEUPROLIDE ACETATE FOR INJ PEDIATRIC KIT 15 MG	30080050106440	Brand
LUPRON DEPOT-PED (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ PEDIATRIC KIT 11.25 MG	30080050156420	Brand
LUPRON DEPOT-	LEUPROLIDE ACETATE (3 MONTH) FOR INJ PEDIATRIC KIT 30 MG	30080050156440	Brand

PED (3-MONTH)			
LUPRON DEPOT-PED	LEUPROLIDE ACET (6 MONTH) FOR IM INJ PEDIATRIC KIT 45 MG	30080050256460	Brand

Approval Criteria

1 - Diagnosis of central precocious puberty (idiopathic or neurogenic)

AND

2 - Early onset of secondary sexual characteristics in one of the following:

- Females less than 8 years of age
- Males less than 9 years of age

AND

3 - Advanced bone age of at least one year compared with chronological age

AND

4 - One of the following:

4.1 Both of the following:

- Patient has undergone gonadotropin-releasing hormone agonist (GnRHa) testing
- Peak luteinizing hormone (LH) level above pre-pubertal range

OR

4.2 Patient has a random LH level in the pubertal range

AND

5 - One of the following:

5.1 Patient had one of the following diagnostic evaluations to rule out tumors, when suspected:

- Diagnostic imaging of the brain (MRI or CT scan) (in patients with symptoms suggestive of a brain tumor or in those 6 years of age or younger)
- Pelvic/testicular/adrenal ultrasound (if steroid levels suggest suspicion)
- Adrenal steroids to rule out congenital adrenal hyperplasia (when pubarche precedes thelarche or gonadarche)

OR

5.2 Patient has no suspected tumors

AND

6 - Prescribed by or in consultation with an endocrinologist

Product Name:Fensolvi, Lupron Depot-PED, Supprelin LA, Triptodur	
Diagnosis	Central Precocious Puberty (CPP)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SUPPRELIN LA	HISTRELIN ACETATE (CPP) IMPLANT KIT 50 MG	30080045106450	Brand
TRIPTODUR	TRIPTORELIN PAMOATE FOR IM ER SUSP 22.5 MG (BASE EQUIV)	3008007040G240	Brand
FENSOLVI	LEUPROLIDE ACET (6 MONTH) FOR INJ PEDIATRIC KIT 45 MG	30080050256450	Brand
LUPRON DEPOT-PED (1-MONTH)	LEUPROLIDE ACETATE FOR INJ PEDIATRIC KIT 7.5 MG	30080050106420	Brand
LUPRON DEPOT-	LEUPROLIDE ACETATE FOR INJ PEDIATRIC KIT 11.25 MG	30080050106430	Brand

PED (1-MONTH)			
LUPRON DEPOT-PED (1-MONTH)	LEUPROLIDE ACETATE FOR INJ PEDIATRIC KIT 15 MG	30080050106440	Brand
LUPRON DEPOT-PED (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ PEDIATRIC KIT 11.25 MG	30080050156420	Brand
LUPRON DEPOT-PED (3-MONTH)	LEUPROLIDE ACETATE (3 MONTH) FOR INJ PEDIATRIC KIT 30 MG	30080050156440	Brand
LUPRON DEPOT-PED	LEUPROLIDE ACET (6 MONTH) FOR IM INJ PEDIATRIC KIT 45 MG	30080050256460	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., lack of progression or stabilization of secondary sexual characteristics, decrease in height velocity, a decrease in the ratio of bone age to chronological age, improvement in final height prediction, LH levels have been suppressed to pre-pubertal levels) [22]

AND

2 - Patient is currently younger than the appropriate time point for the onset of puberty (e.g., females younger than 11 years of age, males younger than 12 years of age) [22]

AND

3 - Prescribed by or in consultation with an endocrinologist

Product Name:Generic leuprolide acetate*	
Diagnosis	Treatment of Infertility (off-label) [5]
Approval Length	2 Month [A] (or per plan benefit design)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LEUPROLIDE ACETATE	LEUPROLIDE ACETATE INJ KIT 5 MG/ML	21405010106407	Generic

Approval Criteria

1 - Diagnosis of infertility

AND

2 - Used as part of an assisted reproductive technology (ART) protocol

Notes	*Please consult client-specific resources to confirm whether benefit exclusions should be reviewed for medical necessity.

Product Name:Lupron Depot, Lupron Depot-PED, Brand Leuprolide Acetate (22.5 mg), Generic leuprolide acetate, Eligard, Supprelin LA, Trelstar, Triptodur, Camcevi, Fensolvi	
Diagnosis	Gender Dysphoria/Gender Incongruence (off-label) [16, 17]
Approval Length	12 month(s)
Guideline Type	Prior Authorization

LUPRON DEPOT-PED	LEUPROLIDE ACET (6 MONTH) FOR IM INJ PEDIATRIC KIT 45 MG	30080050256460	Brand

Approval Criteria

1 - Using gonadotropin for suppression of puberty [16,17]

AND

2 - Diagnosis of gender dysphoria/gender incongruence

3 . Endnotes

A. Sixty days would be a reasonable length of authorization for the treatment of infertility. [13]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228869
Guideline Name	Gonadotropin-Releasing Hormone Antagonists (Infertility Agents)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Cetrotide (cetrorelix)
Controlled ovarian stimulation Indicated for the inhibition of premature LH surges in women undergoing controlled ovarian stimulation.
Drug Name: Generic ganirelix, Generic Fyremadel
Controlled ovarian stimulation Indicated for the inhibition of premature LH surges in women undergoing controlled ovarian hyperstimulation.

2 . Criteria

Product Name:Generic ganirelix*, Generic Fyremadel*	
Approval Length	6 month(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GANIRELIX ACETATE	GANIRELIX ACETATE SOLN PREFILLED SYRINGE 250 MCG/0.5ML	3009004010E520	Generic
FYREMADEL	GANIRELIX ACETATE SOLN PREFILLED SYRINGE 250 MCG/0.5ML	3009004010E520	Generic

Approval Criteria

1 - Diagnosis of infertility

AND

2 - For the development of multiple follicles (ovarian stimulation)

AND

3 - Will be used in conjunction only with assisted reproductive technology (ART)

Notes	*Please consult client-specific resources to confirm whether benefit ex clusions should be reviewed for medical necessity.

Product Name:Cetrotide*	
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CETROTIDE	CETRORELIX ACETATE FOR INJ KIT 0.25 MG	30090025106420	Brand

Approval Criteria

1 - Diagnosis of infertility

AND

2 - For the development of multiple follicles (ovarian stimulation)

AND

3 - Will be used in conjunction only with assisted reproductive technology (ART)

AND

4 - Trial and failure, contraindication or intolerance to one of the following:

- Generic Ganirelix
- Generic Fyremadel

Notes	*Please consult client-specific resources to confirm whether benefit ex clusions should be reviewed for medical necessity.

Prior Authorization Guideline

Guideline ID	GL-233344
Guideline Name	Gonadotropins - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	3/1/2025
P&T Approval Date:	7/20/2001
P&T Revision Date:	8/15/2024

1 . Indications

Drug Name: Follistim AQ (follitropin beta)
Ovulation Induction Indicated for the induction of ovulation and pregnancy in anovulatory infertile women in whom the cause of infertility is functional and not due to primary ovarian failure. **Spermatogenesis Induction** Indicated for the induction of spermatogenesis in men with primary and secondary hypogonadotropic hypogonadism (HH) in whom the cause of infertility is not due to primary testicular failure. **Ovarian Stimulation in association with Assisted Reproductive Technology** Indicated for pregnancy in normal ovulatory women undergoing controlled ovarian stimulation as part of an in vitro fertilization (IVF) or intracytoplasmic sperm injection (ICSI) cycle.
Drug Name: Gonal-F (follitropin alfa)

Ovulation Induction Indicated for the induction of ovulation and pregnancy in oligo-anovulatory infertile women for whom the cause of infertility is functional and not due to primary ovarian failure.

Ovarian Stimulation in association with Assisted Reproductive Technology Indicated for the development of multiple follicles in ovulatory infertile women as part of an assisted reproductive technology (ART) cycle.

Spermatogenesis Induction Indicated for the induction of spermatogenesis in infertile men with primary and secondary hypogonadotropic hypogonadism for whom the cause of infertility is not due to primary testicular failure.

Drug Name: Gonal-F RFF (follitropin alfa)

Ovarian Stimulation in association with Assisted Reproductive Technology [1-5] Indicated for the development of multiple follicles in ovulatory infertile women as part of an assisted reproductive technology (ART) cycle.

Ovulation Induction Indicated for the induction of ovulation and pregnancy in oligo-anovulatory infertile women for whom the cause of infertility is functional and not due to primary ovarian failure.

Off Label Uses: Spermatogenesis Induction [6, 7] Used for the treatment of spermatogenesis in men with primary and secondary hypogonadotropic hypogonadism in whom the cause of infertility is not due to primary testicular failure.

Drug Name: Gonal-F RFF Redi-ject (follitropin alfa)

Ovarian Stimulation in association with Assisted Reproductive Technology [1-5] Indicated for the development of multiple follicles in ovulatory women as part of an assisted reproductive technology (ART) cycle.

Ovulation Induction Indicated for the induction of ovulation and pregnancy in oligo-anovulatory women in whom the cause of infertility is functional and not due to primary ovarian failure.

Off Label Uses: Spermatogenesis Induction [6, 7] Used for the treatment of spermatogenesis in men with primary and secondary hypogonadotropic hypogonadism in whom the cause of infertility is not due to primary testicular failure.

Drug Name: Menopur (menotropins)

Ovarian Stimulation in association with Assisted Reproductive Technology Indicated for the development of multiple follicles and pregnancy in ovulatory women as part of an Assisted Reproductive Technology (ART) cycle.

Off Label Uses: Ovulation Induction [6, 7] Used for the treatment of ovulation induction in patients with polycystic ovary syndrome who failed on clomiphene. The ovulation rate compared to Gonal-f was non-inferior, at rates of 85.7% and 85.5% respectively. [8] In other studies, rates of ovulation of 95% and pregnancy rates of 58% to 72% are demonstrated.

Because of its high cost, higher incidence of serious side effects, and difficult of administration menotropins are usually reserved to treat patients who have failed to respond to therapy with clomiphene. [9]

Spermatogenesis Induction [6, 7] Used for the treatment of spermatogenesis in men with primary and secondary hypogonadotropic hypogonadism in whom the cause of infertility is not due to primary testicular failure.

2 . Criteria

Product Name:Follistim AQ	
Diagnosis	Ovulation Induction
Approval Length	2 months [D] (or per plan benefit design)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FOLLISTIM AQ	FOLLITROPIN BETA INJ 300 UNIT/0.36ML	30062030102020	Brand
FOLLISTIM AQ	FOLLITROPIN BETA INJ 600 UNIT/0.72ML	30062030102030	Brand

3 . Endnotes

A. There is no consensus definition of poor responder to gonadotropins in the setting of ovulation induction. [10-11, 13-15] One study looked at ovulation induction failure with gonadotropin specifically. [10] Poor response in this study was defined as maximum dose of 450 IU gonadotropin daily for 9 days and either: (i) < 4 oocytes obtained at oocyte retrieval, or (ii) cycle cancellation prior to oocyte retrieval because of poor follicular development (< 3 follicles of > 14 mm after 9-12 days of stimulation).
B. There is no consensus definition of poor responder to gonadotropins in the setting of ovarian stimulation in association with ART. [10-11, 13-15] The most cited definition of poor responders was: number of mature follicles < 2-5; number of mature oocytes retrieved < 3: single dominant follicle; mean daily gonadotropin dose > 300 IU; and total gonadotropin dose > 40 ampules. [10]
C. There is no consensus definition of poor responder to gonadotropins in the setting of spermatogenesis induction in men with hypogonadotropic hypogonadism. Outcomes measured for response include time to achieve first sperm, time to conception, and sperm concentration, but poor response was not well-defined. [12, 16] A combined analysis looked at four clinical trials and used the common efficacy outcome of spermatozoa concentration of greater than or equal 1.5 x 10^6 /mL. [12]
D. Sixty days would be a reasonable length of authorization for all of the indications. [20]

Approval Criteria

1 - One of the following:

1.1 One of the following: [12]

1.1.1 Both of the following: [24-26]

- Infant is less than 4 months of age
- Infant has suspected GH deficiency based on clinical presentation (e.g., persistent neonatal hypoglycemia, persistent or prolonged neonatal jaundice/elevated bilirubin, male infant with microgenitalia, midline anatomical defects, failure to thrive, etc.)

OR

1.1.2 History of neonatal hypoglycemia associated with pituitary disease

OR

1.1.3 Diagnosis of panhypopituitarism

OR

1.2 All of the following:

1.2.1 Diagnosis of pediatric GH deficiency as confirmed by one of the following: [10, 11, 12]

1.2.1.1 Height is documented by one of the following (utilizing age and gender growth charts related to height): [11]

- Height is greater than 2.0 standard deviations [SD] below midparental height
- Height is greater than 2.25 SD below population mean (below the 1.2 percentile for age and gender)

OR

1.2.1.2 Growth velocity is greater than 2 SD below mean for age and gender

OR

1.2.1.3 Delayed skeletal maturation of greater than 2 SD below mean for age and gender (e.g., delayed greater than 2 years compared with chronological age)

AND

1.2.2 Documentation of one of the following: [22]

1.2.2.1 Both of the following:

- Patient is male
- Bone age less than 16 years

OR

1.2.2.2 Both of the following:

- Patient is female
- Bone age less than 14 years

AND

1.2.3 One of the following:

1.2.3.1 Both of the following: [10, 11, 12]

1.2.3.1.1 Patient has undergone two of the following provocative GH stimulation tests:

- Arginine

- Clonidine
- Glucagon
- Insulin
- Levodopa

AND

1.2.3.1.2 Both GH response values are less than 10 mcg/L

OR

1.2.3.2 Both of the following: [11]

1.2.3.2.1 Patient is less than 1 year of age

AND

1.2.3.2.2 One of the following is below the age and gender adjusted normal range as provided by the physician's lab: [A, 13, 14]

- Insulin-like Growth Factor 1 (IGF-1/Somatomedin-C)
- Insulin Growth Factor Binding Protein-3 (IGFBP-3)

AND

2 - Prescribed by or in consultation with an endocrinologist

Notes	Includes children who have undergone brain radiation. If patient is a T ransition Phase Adolescent or Adult who had childhood onset GH defi ciency, utilize criteria for Transition Phase Adolescent or Adult GH Def iciency. NOTE: Documentation of previous height, current height and goal expected adult height will be required for renewal. *Approve at N DC list "SOMATROPPA".

OMNITROPE	SOMATROPIN FOR INJ 5.8 MG	30100020002123	Brand

Approval Criteria

1 - Height increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [22, 23]

- Previous height and date obtained
- Current height and date obtained

AND

2 - Both of the following:

- Expected adult height not attained
- Documentation of expected adult height goal

AND

3 - Prescribed by or in consultation with an endocrinologist

Notes	Includes children who have undergone brain radiation. If patient is a T ransition Phase Adolescent or Adult who had childhood onset GH defi ciency, utilize criteria for Transition Phase Adolescent or Adult GH Def iciency. *Approve at NDC list "SOMATROPPA”.

Approval Criteria

1 - One of the following:

1.1 One of the following: [12]

1.1.1 Both of the following: [24-26]

- Infant is less than 4 months of age
- Suspected GHD based on clinical presentation (e.g., persistent neonatal hypoglycemia that is not responsive to treatment, persistent or prolonged neonatal jaundice/elevated bilirubin, male infant with microgenitalia, midline anatomical defects, etc.)

OR

1.1.2 History of neonatal hypoglycemia associated with pituitary disease

OR

1.1.3 Diagnosis of panhypopituitarism

OR

1.2 All of the following:

1.2.1 Diagnosis of pediatric GH deficiency as confirmed by one of the following: [10, 11, 12]

1.2.1.1 Height is documented by one of the following (utilizing age and gender growth charts related to height): [11]

- Height is greater than 2.0 standard deviations [SD] below midparental height
- Height is greater than 2.25 SD below population mean (below the 1.2 percentile for age and gender)

OR

1.2.1.2 Growth velocity is greater than 2 SD below mean for age and gender

OR

1.2.1.3 Delayed skeletal maturation of greater than 2 SD below mean for age and gender (e.g., delayed greater than 2 years compared with chronological age)

AND

1.2.2 Documentation of one of the following: [22]

1.2.2.1 Both of the following:

- Patient is male
- Bone age less than 16 years

OR

1.2.2.2 Both of the following:

- Patient is female
- Bone age less than 14 years

AND

1.2.3 One of the following:

1.2.3.1 Both of the following: [10, 11, 12]

1.2.3.1.1 Patient has undergone two of the following provocative GH stimulation tests:

- Arginine

- Clonidine
- Glucagon
- Insulin
- Levodopa

AND

1.2.3.1.2 Both GH response values are less than 10 mcg/L

OR

1.2.3.2 Both of the following: [11]

1.2.3.2.1 Patient is less than 1 year of age

AND

1.2.3.2.2 One of the following is below the age and gender adjusted normal range as provided by the physician's lab: [A, 13, 14]

- Insulin-like Growth Factor 1 (IGF-1/Somatomedin-C)
- Insulin Growth Factor Binding Protein-3 (IGFBP-3)

AND

2 - Prescribed by or in consultation with an endocrinologist

AND

3 - Trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Notes	Includes children who have undergone brain radiation. If patient is a T ransition Phase Adolescent or Adult who had childhood onset GH defi ciency, utilize criteria for Transition Phase Adolescent or Adult GH Def iciency.

	NOTE: Documentation of previous height, current height and goal exp ected adult height will be required for renewal.

SOGROYA	SOMAPACITAN-BECO SOLUTION PEN-INJECTOR 15 MG/1.5ML	3010000720D230	Brand

Approval Criteria

1 - One of the following:

1.1 One of the following: [12]

1.1.1 History of neonatal hypoglycemia associated with pituitary disease

OR

1.1.2 Diagnosis of panhypopituitarism

OR

1.2 All of the following:

1.2.1 Diagnosis of pediatric GH deficiency as confirmed by one of the following: [10, 11, 12]

1.2.1.1 Height is documented by one of the following (utilizing age and gender growth charts related to height): [11]

- Height is greater than 2.0 standard deviations [SD] below midparental height
- Height is greater than 2.25 SD below population mean (below the 1.2 percentile for age and gender)

OR

1.2.1.2 Growth velocity is greater than 2 SD below mean for age and gender

OR

1.2.1.3 Delayed skeletal maturation of greater than 2 SD below mean for age and gender (e.g., delayed greater than 2 years compared with chronological age)

AND

1.2.2 Documentation of one of the following: [22]

1.2.2.1 Both of the following:

- Patient is male
- Bone age less than 16 years

OR

1.2.2.2 Both of the following:

- Patient is female
- Bone age less than 14 years

AND

1.2.3 Both of the following: [10, 11, 12]

1.2.3.1 Patient has undergone two of the following provocative GH stimulation tests:

- Arginine
- Clonidine
- Glucagon
- Insulin
- Levodopa

AND

1.2.3.2 Both GH response values are less than 10 mcg/L

AND

2 - Patient is 2.5 years of age or older

AND

3 - Prescribed by or in consultation with an endocrinologist

AND

4 - Trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

AND

5 - Trial and failure, contraindication or intolerance to both of the following:

- Skytrofa
- Ngenla

Notes	NOTE: Documentation of previous height, current height and goal exp ected adult height will be required for renewal.

Product Name:Sogroya

Diagnosis	Pediatric Growth Hormone Deficiency (GHD)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SOGROYA	SOMAPACITAN-BECO SOLUTION PEN-INJECTOR 5 MG/1.5ML	3010000720D210	Brand

SOGROYA	SOMAPACITAN-BECO SOLUTION PEN-INJECTOR 15 MG/1.5ML	3010000720D230	Brand

Approval Criteria

1 - Height increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [22, 23]

- Previous height and date obtained
- Current height and date obtained

AND

2 - Both of the following:

- Expected adult height not attained
- Documentation of expected adult height goal

AND

3 - Prescribed by or in consultation with an endocrinologist

AND

4 - Trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)

- Omnitrope (somatropin)

AND

5 - Trial and failure, contraindication or intolerance to both of the following:

- Skytrofa
- Ngenla

Product Name:Sogroya

NUTROPIN AQ NUSPIN 20	SOMATROPIN SOLUTION PEN-INJECTOR 20 MG/2ML	3010002000D250	Brand

Approval Criteria

1 - One of the following:

1.1 Evidence of positive response to therapy (e.g., increase in total lean body mass, decrease in fat mass)

OR

1.2 Submission of medical records (e.g., chart notes) documenting both of the following:

1.2.1 Height increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [22]

- Previous height and date obtained
- Current height and date obtained

AND

1.2.2 Both of the following:

- Expected adult height not attained
- Documentation of expected adult height goal

AND

2 - Prescribed by or in consultation with an endocrinologist

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Product Name:Norditropin Flexpro*, Omnitrope*	
Diagnosis	Growth Failure in Children Small for Gestational Age (SGA)

OMNITROPE	SOMATROPIN FOR INJ 5.8 MG	30100020002123	Brand

Approval Criteria

1 - Diagnosis of SGA based on demonstration of catch up growth failure in the first 24 months of life using a 0-36 month growth chart as confirmed by the following criterion: [10]

1.1 One of the following is below the 3rd percentile for gestational age (more than 2 SD below population mean):

- Birth weight
- Birth length

AND

2 - Height remains less than or equal to 3rd percentile (more than 2 SD below population mean) [10]

AND

3 - Prescribed by or in consultation with an endocrinologist

Notes	NOTE: Documentation of previous height, current height and goal exp ected adult height will be required for renewal. *Approve at NDC list " SOMATROPPA”.

Approval Criteria

1 - Diagnosis of pediatric growth failure associated with one of the following: [10, 22]

1.1 Both of the following:

1.1.1 Turner Syndrome (Gonadal Dysgenesis)

AND

1.1.2 Documentation of both of the following:

- Patient is female
- Bone age less than 14 years

OR

1.2 Both of the following:

1.2.1 Noonan Syndrome

AND

1.2.2 Documentation of one of the following:

1.2.2.1 Both of the following:

- Patient is male
- Bone age less than 16 years

OR

1.2.2.2 Both of the following:

- Patient is female
- Bone age less than 14 years

AND

2 - Height is below the 5th percentile on growth charts for age and gender [10]

AND

3 - Prescribed by or in consultation with an endocrinologist

Notes	NOTE: Documentation of previous height, current height and goal exp ected adult height will be required for renewal. *Approve at NDC list " SOMATROPPA".

Approval Criteria

1 - Height increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [22]

- Previous height and date obtained
- Current height and date obtained

AND

2 - Both of the following:

- Expected adult height not attained
- Documentation of expected adult height goal

AND
3 - Prescribed by or in consultation with an endocrinologist
Notes | *Approve at NDC list "SOMATROPPA".

Product Name:Genotropin, Humatrope, Nutropin AQ NuSpin, Saizen, Zomacton	
Diagnosis	Turner Syndrome [off-label for Saizen] or Noonan Syndrome [off-label] [B, 11]
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Approval Criteria

1 - Diagnosis of pediatric growth failure associated with one of the following: [10, 22]

1.1 Both of the following:

1.1.1 Turner Syndrome (Gonadal Dysgenesis)

AND

1.1.2 Documentation of both of the following:

- Patient is female
- Bone age less than 14 years

OR

1.2 Both of the following:

1.2.1 Noonan Syndrome

AND

1.2.2 Documentation of one of the following:

1.2.2.1 Both of the following:

- Patient is male
- Bone age less than 16 years

OR

1.2.2.2 Both of the following:

- Patient is female
- Bone age less than 14 years

AND

2 - Height is below the 5th percentile on growth charts for age and gender [10]

AND

3 - Prescribed by or in consultation with an endocrinologist

AND

4 - Trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Notes	NOTE: Documentation of previous height, current height and goal expected adult height will be required for renewal.

Approval Criteria

1 - Height increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [22]

- Previous height and date obtained
- Current height and date obtained

AND

2 - Both of the following:

- Expected adult height not attained
- Documentation of expected adult height goal

AND

3 - Prescribed by or in consultation with an endocrinologist

AND

4 - Trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Product Name:Genotropin [off-label], Humatrope, Nutropin AQ NuSpin [off-label], Saizen [off-label] [B, 11], Zomacton	
Diagnosis	Short-Stature Homeobox (SHOX) Gene Deficiency
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Non Formulary

Approval Criteria

1 - Diagnosis of pediatric growth failure with short stature homeobox (SHOX) gene deficiency as confirmed by genetic testing [2]

AND

2 - Submission of medical records (e.g., chart notes) documenting one of the following: [22]

2.1 Both of the following:

- Patient is male
- Bone age less than 16 years

OR

2.2 Both of the following:

- Patient is female
- Bone age less than 14 years

AND

3 - Prescribed by or in consultation with an endocrinologist

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Approval Criteria

1 - Submission of medical records (e.g., chart notes) documenting height increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [22]

- Previous height and date obtained
- Current height and date obtained

AND

2 - Submission of medical records (e.g., chart notes) documenting both of the following:

- Expected adult height not attained
- Documentation of expected adult height goal

AND

3 - Prescribed by or in consultation with one of the following:

- Endocrinologist
- Nephrologist

AND

4 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Product Name:Norditropin Flexpro*, Omnitrope*	
Diagnosis	Adult Growth Hormone Deficiency
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NORDITROPIN FLEXPRO	SOMATROPIN SOLUTION PEN-INJECTOR 5 MG/1.5ML	3010002000D212	Brand

OMNITROPE	SOMATROPIN FOR INJ 5.8 MG	30100020002123	Brand

Approval Criteria

1 - Diagnosis of adult GH deficiency as a result of one of the following: [10, 12, 21]

1.1 Clinical records supporting a diagnosis of childhood-onset GHD

OR

1.2 Both of the following:

1.2.1 Adult-onset GHD

AND

1.2.2 Clinical records documenting that hormone deficiency is a result of hypothalamic-pituitary disease from organic or known causes (e.g., damage from surgery, cranial irradiation, head trauma, or subarachnoid hemorrhage)

AND

2 - One of the following: [10, 12, 20-21]

2.1 Both of the following:

2.1.1 Patient has undergone one of the following GH stimulation tests to confirm adult GH deficiency:

- Insulin tolerance test (ITT)
- Glucagon
- Macimorelin

AND

2.1.2 Patient has one of the following corresponding peak GH values:

- ITT less than or equal to 5 mcg/L
- Glucagon less than or equal to 3 mcg/L
- Macimorelin less than 2.8 ng/mL 30, 45, 60 and 90 minutes following macimorelin administration

OR

2.2 Both of the following:

2.2.1 Documented deficiency of three of the following anterior pituitary hormones:

- Prolactin
- Adrenocorticotropic hormone (ACTH)
- Thyroid stimulating hormone (TSH)
- Follicle-stimulating hormone/luteinizing hormone (FSH/LH)

AND

2.2.2 IGF-1/Somatomedin-C level is below the age and gender adjusted normal range as provided by the physician's lab

AND

3 - Prescribed by or in consultation with an endocrinologist

Notes	Use the following criteria for child- and adult-onset with pituitary disea se; use Isolated GHD in Adult criteria for patients without pituitary dise ase. *Approve at NDC list "SOMATROPPA".

Product Name:Norditropin Flexpro*, Omnitrope*	
Diagnosis	Adult Growth Hormone Deficiency
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

NUTROPIN AQ NUSPIN 5	SOMATROPIN SOLUTION PEN-INJECTOR 5 MG/2ML	3010002000D207	Brand
NUTROPIN AQ NUSPIN 10	SOMATROPIN SOLUTION PEN-INJECTOR 10 MG/2ML	3010002000D220	Brand
NUTROPIN AQ NUSPIN 20	SOMATROPIN SOLUTION PEN-INJECTOR 20 MG/2ML	3010002000D250	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) documenting evidence of ongoing monitoring within the past 12 months of an IGF-1/Somatomedin C level [10, 12, 21]

AND

2 - Prescribed by or in consultation with an endocrinologist

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)

• Omnitrope (somatropin)	
Notes	Use the following criteria for child- and adult-onset with pituitary disea se; use Isolated GHD in Adult criteria for patients without pituitary dise ase.

Product Name:Norditropin Flexpro*, Omnitrope* [off-label]	
Diagnosis	Transition Phase Adolescent Patients
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

OMNITROPE	SOMATROPIN FOR INJ 5.8 MG	30100020002123	

Approval Criteria

1 - One of the following: [21]

- Attained expected adult height
- Closed epiphyses on bone radiograph

AND

2 - One of the following: [20, 21]

2.1 Both of the following:

2.1.1 Documentation of high risk of GH deficiency due to GH deficiency in childhood from one of the following:

2.1.1.1 Embryopathic/congenital defects

OR

2.1.1.2 Genetic mutations

OR

2.1.1.3 Irreversible structural hypothalamic-pituitary disease

OR

2.1.1.4 Panhypopituitarism

OR

2.1.1.5 Deficiency of three of the following anterior pituitary hormones:

- ACTH
- TSH
- Prolactin
- FSH/LH

AND

2.1.2 One of the following:

2.1.2.1 IGF-1/Somatomedin-C level is below the age and gender adjusted normal range as provided by the physician's lab

OR

2.1.2.2 All of the following:

2.1.2.2.1 Patient does not have a low IGF-1/Somatomedin C level

AND

2.1.2.2.2 Discontinued GH therapy for at least 1 month

AND

2.1.2.2.3 Patient has undergone one of the following GH stimulation tests after discontinuation of therapy for at least 1 month:

- ITT
- Glucagon
- Macimorelin

AND

2.1.2.2.4 Patient has one of the following corresponding peak GH values:

- ITT less than or equal to 5 mcg/L
- Glucagon less than or equal to 3 mcg/L
- Macimorelin less than 2.8 ng/mL 30, 45, 60 and 90 minutes following macimorelin administration

OR

2.2 All of the following:

2.2.1 At low risk of severe GH deficiency (e.g., due to isolated and/or idiopathic GH deficiency)

AND

2.2.2 Discontinued GH therapy for at least 1 month

AND

2.2.3 Patient has undergone one of the following GH stimulation tests after discontinuation of therapy for at least 1 month:

- ITT
- Glucagon
- Macimorelin

AND

2.2.4 Patient has one of the following corresponding peak GH values:

- ITT less than or equal to 5 mcg/L
- Glucagon less than or equal to 3 mcg/L
- Macimorelin less than 2.8 ng/mL 30, 45, 60 and 90 minutes following macimorelin administration

AND

3 - Prescribed by or in consultation with an endocrinologist

Notes	*Approve at NDC list "SOMATROPPA".

NUTROPIN AQ NUSPIN 20	SOMATROPIN SOLUTION PEN-INJECTOR 20 MG/2ML	3010002000D250	Brand

Approval Criteria

1 - Evidence of positive response to therapy (e.g., increase in total lean body mass, exercise capacity or IGF-1 and IGFBP-3 levels)

AND

2 - Prescribed by or in consultation with an endocrinologist

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Product Name:Norditropin Flexpro*, Omnitrope*	
Diagnosis	Isolated Growth Hormone Deficiency in Adults
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
NORDITROPIN FLEXPRO	SOMATROPIN SOLUTION PEN-INJECTOR 5 MG/1.5ML	3010002000D212	Brand

NORDITROPIN FLEXPRO	SOMATROPIN SOLUTION PEN-INJECTOR 30 MG/3ML	3010002000D260	Brand
OMNITROPE	SOMATROPIN SOLUTION CARTRIDGE 5 MG/1.5ML	3010002000E210	Brand
OMNITROPE	SOMATROPIN SOLUTION CARTRIDGE 10 MG/1.5ML	3010002000E213	Brand
OMNITROPE	SOMATROPIN FOR INJ 5.8 MG	30100020002123	Brand

Approval Criteria

1 - Documented deficiency of GH as demonstrated by both of the following: [20-21]

1.1 Patient has undergone two of the following GH stimulation tests:

- ITT
- Glucagon
- Macimorelin

AND

1.2 Patient has two of the following corresponding peak GH values:

- ITT less than or equal to 5 mcg/L
- Glucagon less than or equal to 3 mcg/L
- Macimorelin less than 2.8 ng/mL 30, 45, 60 and 90 minutes following macimorelin administration

AND

2 - Prescribed by or in consultation with an endocrinologist

Notes	*Approve at NDC list "SOMATROPPA".

1 - Submission of medical records (e.g., chart notes) documenting evidence of ongoing monitoring within the past 12 months of an IGF-1/Somatomedin C level [10, 12, 21]

AND

2 - Prescribed by or in consultation with an endocrinologist

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure or intolerance to one of the following: [B]

- Norditropin (somatropin)
- Omnitrope (somatropin)

Product Name:Serostim	
Diagnosis	Human Immunodeficiency Virus (HIV)-Associated Cachexia
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SEROSTIM	SOMATROPIN (NON-REFRIGERATED) FOR SUBCUTANEOUS INJ 4 MG	30100020102118	Brand
SEROSTIM	SOMATROPIN (NON-REFRIGERATED) FOR SUBCUTANEOUS INJ 5 MG	30100020102121	Brand
SEROSTIM	SOMATROPIN (NON-REFRIGERATED) FOR SUBCUTANEOUS INJ 6 MG	30100020102125	Brand

Approval Criteria

1 - Diagnosis of HIV-associated wasting syndrome or cachexia [7, 15, 18, 19]

AND

2 - One of the following: [7, 15, 18, 19, C]

2.1 Unintentional weight loss of greater than 10% over the last 12 months

OR

2.2 Unintentional weight loss of greater than 7.5% over the last 6 months

OR

2.3 Loss of 5% body cell mass (BCM) within 6 months

OR

2.4 Body mass index (BMI) less than 20 kg/m^2

OR

2.5 All of the following

- Patient is male
- BCM less than 35% of total body weight
- BMI less than 27 kg/m^2

OR

2.6 All of the following

- Patient is female
- BCM less than 23% of total body weight
- BMI less than 27 kg/m^2

AND

3 - Nutritional evaluation since onset of wasting first occurred [7, 15, 18, 19]

AND

4 - Patient has not had weight loss as a result of other underlying treatable conditions (e.g., depression, mycobacterium avium complex, chronic infectious diarrhea, or malignancy with the exception of Kaposi's sarcoma limited to skin or mucous membranes) [7, 15, 18, 19]

AND

5 - Anti-retroviral therapy has been optimized to decrease the viral load [7, 15, 18, 19]

Product Name:Serostim	
Diagnosis	Human Immunodeficiency Virus (HIV)-Associated Cachexia
Approval Length	6 months [D]
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
SEROSTIM	SOMATROPIN (NON-REFRIGERATED) FOR SUBCUTANEOUS INJ 4 MG	30100020102118	Brand

SEROSTIM	SOMATROPIN (NON-REFRIGERATED) FOR SUBCUTANEOUS INJ 6 MG	30100020102125	Brand

Approval Criteria

1 - Evidence of positive response to therapy (i.e., greater than or equal to 2% increase in body weight and/or BCM) [17, 18]

AND

2 - One of the following targets or goals has not been achieved: [17, 18]

- Weight
- BCM
- BMI

Product Name:Zorbtive	
Diagnosis	Short Bowel Syndrome
Approval Length	4 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZORBTIVE	SOMATROPIN (NON-REFRIGERATED) FOR SUBCUTANEOUS INJ 8.8 MG	30100020102132	Brand

Approval Criteria

1 - Diagnosis of Short Bowel Syndrome [9, 16]

AND

2 - Patient is currently receiving specialized nutritional support (e.g., intravenous parenteral nutrition, fluid, and micronutrient supplements) [9, 16]

AND

3 - Patient has not previously received 4 weeks of treatment with Zorbtive [9, 16]

Notes	NOTE: Treatment with Zorbtive will not be authorized beyond 4 weeks . Administration for more than 4 weeks has not been adequately studi ed.

Approval Criteria

1 - Requests for coverage of growth hormone for the diagnosis of Idiopathic Short Stature (ISS) are not authorized and will not be approved. There is no consensus in current peer-reviewed medical literature regarding the indications, efficacy, safety, or long-term consequences of GH therapy in children with ISS who are otherwise healthy. [E]

Notes	Approval Length: N/A - Requests for non-approvable diagnoses shoul d not be approved

2 . Endnotes

A. Several recent review articles in the literature have suggested that GH stimulation tests should no longer be used to diagnose GHD. [13,14] The authors argue that GH stimulation test may have side effects, lack precision, accuracy, and do not predict response to GH therapy. It has been suggested that newer diagnostic procedures such as serum IGF-1, IGFBP-3 concentrations, genetic testing and neuroimaging could provide an alternative approach to the diagnosis of GHD in childhood.
B. Overall, there are no observable differences in the results obtained among the different preparations as long as the regimen follows currently approved daily injections. Many of the products are available in a variety of injection devices that are meant to make administration more appealing and easier. Currently, there is no evidence that clinical outcome differs among the various injection systems, although there may be patient and parent preferences for some of these devices. [11, 21]
C. Even a 5% weight loss in persons with HIV infection indicates a poor prognosis. [2]
D. Patients with HIV-associated wasting may begin an initial 12-week course of therapy with Serostim, 6 mg/day s.c. The clinician should monitor treatment responses by obtaining serial body weights and BCM measurements by BIA. A positive response to therapy probably should be considered as a 2% increase in body weight and/or BCM. Maintenance therapy may continue on a monthly basis as long as wasting is still evident. Once BCM has normalized, therapy can be stopped, with the patient being observed for an 8-week period. Over these 8 weeks, body weight, BCM, and any appearance of wasting symptoms can be monitored. If wasting reappears, therapy can be restarted. [17]
E. Guidelines for idiopathic short stature recommend against the routine use of GH in every child with height standard deviation score ≤ - 2.25. [23]
F. When GHD is congenital and near complete, the diagnosis is relatively easy to confirm because affected children present with severe growth failure, delayed bone age, and

very low serum concentrations of GH, IGF-1, and IGFBP-3 [8]. For patients with all of these clinical characteristics, it is reasonable to make the diagnosis of GHD without performing GH stimulation testing. [29]

G. Measurements of IGF-1 and IGFBP-3 have shown comparable diagnostic performance with growth hormone stimulation tests and are valuable for patient`s convenience and ease of performance and can be useful in the workup of growth hormone deficiency. [30]

4 . Revision History

Date	Notes
12/20/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-228870
Guideline Name	Harvoni (ledipasvir/sofosbuvir) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Harvoni (ledipasvir/sofosbuvir)
Chronic Hepatitis C (CHC) Indicated for the treatment of adults and pediatric patients 3 years of age and older with chronic hepatitis C virus (HCV)]: - Genotype 1, 4, 5, or 6 infection without cirrhosis or with compensated cirrhosis; - Genotype 1 infection with decompensated cirrhosis, for use in combination with ribavirin; - Genotype 1 or 4 infection who are liver transplant recipients without cirrhosis or with compensated cirrhosis, for use in combination with ribavirin

2 . Criteria

Product Name:Harvoni*, Brand ledipasvir/sofosbuvir	
Diagnosis	Chronic Hepatitis C - Genotype 1 - Treatment Naive without Cirrhosis - Pre-Treatment HCV RNA less than 6 Million IU/mL

Approval Length	8 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HARVONI	LEDIPASVIR-SOFOSBUVIR TAB 45-200 MG	12359902400310	Brand
HARVONI	LEDIPASVIR-SOFOSBUVIR TAB 90-400 MG	12359902400320	Generic
LEDIPASVIR/SOFOSBUVIR	LEDIPASVIR-SOFOSBUVIR TAB 90-400 MG	12359902400320	Generic
HARVONI	LEDIPASVIR-SOFOSBUVIR PELLET PACK 33.75-150 MG	12359902403006	Brand
HARVONI	LEDIPASVIR-SOFOSBUVIR PELLET PACK 45-200 MG	12359902403010	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C genotype 1

AND

2 - Patient is without cirrhosis

AND

3 - Patient is treatment-naive

AND

4 - Pre-treatment HCV RNA less than 6 million IU/mL

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent (e.g., Sovaldi [sofosbuvir])

AND

7 - One of the following (applies to brand ledipasvir/sofosbuvir only):

7.1 Both of the following:

7.1.1 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to ONE of the following:

- Brand Epclusa (sofosbuvir/velpatasvir)
- Brand Harvoni (ledipasvir/sofosbuvir)

AND

7.1.2 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

7.2 For continuation of prior brand ledipasvir/sofosbuvir

Notes	*Approve brand Harvoni at NDC level (i.e., closed NDC) if criteria are met.

Product Name:Brand ledipasvir/sofosbuvir	
Diagnosis	Chronic Hepatitis C - Genotype 1 - Treatment Naive without Cirrhosis - Pre-Treatment HCV RNA less than 6 Million IU/mL
Approval Length	8 Week(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
LEDIPASVIR/SOFOSBUVIR	LEDIPASVIR-SOFOSBUVIR TAB 90-400 MG	12359902400320	Generic

Approval Criteria

1 - Submission of medical records (e.g., chart notes, laboratory values) documenting diagnosis of chronic hepatitis C genotype 1

AND

2 - Patient is without cirrhosis

AND

3 - Patient is treatment-naive

AND

4 - Submission of medical records documenting pre-treatment HCV RNA less than 6 million IU/mL

AND

5 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

6 - Not used in combination with another HCV direct acting antiviral agent (e.g., Sovaldi [sofosbuvir])

AND

7 - One of the following:

7.1 Both of the following:

7.1.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to ONE of the following:

- Brand Epclusa (sofosbuvir/velpatasvir)
- Brand Harvoni (ledipasvir/sofosbuvir)

AND

7.1.2 Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

7.2 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

HARVONI	LEDIPASVIR-SOFOSBUVIR PELLET PACK 45-200 MG	12359902403010	Brand

Approval Criteria

1 - Diagnosis of chronic hepatitis C virus (HCV) genotype 1, 4, 5, or 6

AND

2 - Patient is a liver transplant recipient

AND

3 - One of the following:

3.1 Patient is without cirrhosis or has compensated cirrhosis (Child-Pugh Class A)

OR

3.2 Both of the following:

- Patient has decompensated cirrhosis (Child-Pugh Class B or C)
- Used in combination with ribavirin

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist
- Infectious disease specialist
- HIV specialist certified through the American Academy of HIV Medicine

AND

5 - Not used in combination with another HCV direct acting antiviral agent (e.g., Sovaldi [sofosbuvir])

AND

6 - One of the following (applies to brand ledipasvir/sofosbuvir only):

6.1 Both of the following:

6.1.1 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to ONE of the following:

- Brand Epclusa (sofosbuvir/velpatasvir)
- Brand Harvoni (ledipasvir/sofosbuvir)

AND

6.1.2 Trial and failure, contraindication (e.g., safety concerns, not indicated for patient's age/weight), or intolerance to Mavyret (glecaprevir/pibrentasvir)

OR

6.2 For continuation of prior brand ledipasvir/sofosbuvir

Notes	*Approve brand Harvoni at NDC level (i.e., closed NDC) if criteria are met.

Prior Authorization Guideline

Guideline ID	GL-228608
Guideline Name	Healthcare Reform Copay Waiver Review
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

Note:

The intent of this policy is to allow patients to receive medications/products that are not on the Healthcare Reform (HCR) preventative drug list (but are in the same drug class) at no cost-share. First and foremost, the patient must meet the basic HCR criteria (as described below) in order to qualify for zero cost-share.

1 . Criteria

Product Name:Fluoride supplementation products	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Healthcare Reform Exceptions			

Health Care Reform Exceptions			
Fluoride supplementation products			
Healthcare			
HCR			

Approval Criteria

1 - Patient is between 6 months of age to 4 years of age*

AND

2 - Requested product is a prescription (single ingredient only) oral fluoride supplementation product (does not include topical fluoride products such as toothpaste or rinses, etc.)

AND

3 - There is a clinical reason why the patient cannot take two products on the HCR preventive drug list** (e.g., the patient has had an allergic reaction or intolerance to an inactive ingredient or has experienced an inadequate response)

Notes	*Benefit exclusion if age not met. **The HCR preventive drug list is posted at: https://uhgazure.sharepoint.com/sites/CST/CSDM/Shared%20Documents/UMCS%20Guidelines/Healthcare%20Reform%20Supporting%20Document.

Product Name:Folic acid supplementation products	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Healthcare Reform Exceptions			
Health Care Reform Exceptions			

Folic acid supplementation products			
Healthcare			
HCR			

Approval Criteria

1 - Patient is of childbearing potential who is planning pregnancy*

AND

2 - Requested product is a prescription or OTC folic acid product (with prescription), including prenatal vitamins containing folic acid*

AND

3 - Requested product contains between 0.4 mg to 0.8 mg of folic acid**

AND

4 - There is a clinical reason why the patient cannot take two products on the HCR preventive drug list** (e.g., the patient has had an allergic reaction or intolerance to an inactive ingredient or has experienced an inadequate response)

Notes	*Benefit exclusion if not for childbearing or for multivitamins without folic acid. **Greater than 0.8mg is allowed for medical necessity. ***The HCR preventive drug list is posted at: https://uhgazure.sharepoint.com/sites/CST/CSDM/Shared%20Documents/UMCS%20Guidelines/Healthcare%20Reform%20Supporting%20Document.

Product Name:Aspirin	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Healthcare Reform Exceptions			
Health Care Reform Exceptions			
Aspirin			
Healthcare			
HCR			

Approval Criteria

1 - Patient meets the following*:

1.1 Patient is using 81 mg aspirin for the prevention of morbidity and mortality from preeclampsia

AND

1.2 Requested product is a single agent oral OTC aspirin product (with prescription) (but does not include prescription aspirin products, non-oral aspirin products, or aspirin strengths greater than 81 mg)

Notes	*Benefit exclusion if any criterion is not met.

Product Name:Immunizations	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Healthcare Reform Exceptions			
Health Care Reform Exceptions			
Immunizations			
Heplisav			
Zostavax			

Shingrix			
Healthcare			
HCR			

Approval Criteria

1 - Requested product is a single-entity or combination vaccination for one of the following:**

- Diphtheria
- Haemophilus influenzae type B (applies only to children less than 6 years of age)*
- Hepatitis A
- Hepatitis B (Heplisav B applies only to adults ages 18 years and older)*
- Herpes zoster (Shingrix applies to adults ages 19 years and older)*
- Human papillomavirus (applies only to children and adults 9 years to 45 years of age)*
- Polio
- Influenza (Flumist applies only to children and adults 2 years through 49 years of age. Fluzone HD Quad, Fluad Quad applies only to adults ages 65 years and older)*
- Measles
- Mumps
- Rubella
- Meningococcal infections
- Pertussis
- Pneumococcal infections
- Respiratory Syncytial Virus ([Abrysvo applies to pregnant individuals at 32 through 36 weeks gestational age AND adults 60 years and older] [Arexvy applies only to adults 60 years and older])
- Rotavirus (applies only to children less than 8 months)*
- Tetanus
- Varicella

OR

2 - All of the following:

2.1 Requested product is for Dengvaxia vaccine:

AND

2.2 Member is between ages 9-16 living in a dengue endemic area (endemic areas include Puerto Rico, American Samoa, US Virgin Islands, Federated States of Micronesia, Republic of Marshall Islands, and the Republic of Palau)***

AND

2.3 Member has a laboratory confirmation of a previous dengue infection

OR

3 - All of the following:

3.1 Requested product is for Monkey Pox (JYNNEOS) vaccine

AND

3.2 Member is 18 years of age or older and has risk factors for Mpox infection^

Notes	*Benefit exclusion if age not met. **This list excludes vaccines not listed in the Advisory Committee on Immunization Practices (ACIP) Immunization Schedules (http://www.cdc.gov/vaccines/hcp/acip-recs/vacc-specific/index.html). ***For updated guidance on dengue endemic areas and pre-vaccination laboratory testing see: https://www.cdc.gov/mmwr/volumes/70/rr/rr7006a1.htm and https://www.cdc.gov/dengue/vaccine/hcp/index.html ^For risk factors for Mpox infection see: Use of JYNNEOS (Smallpox and Monkeypox Vaccine, Live, Nonreplicating) for Preexposure Vaccination of Persons at Risk for Occupational Exposure to Orthopoxviruses: Recommendations of the Advisory Committee on Immunization Practices — United States, 2022 | MMWR (cdc.gov) OR Adult Immunization Schedule Notes | CDC

Product Name:Bowel preparation agents for colorectal cancer screening [E]	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Healthcare Reform Exceptions			
Health Care Reform Exceptions			

Bowel preparation agents for colorectal cancer screening			
Healthcare			
HCR			

Approval Criteria

1 - Requested product is a prescription bowel preparation agent used for primary preventative colorectal cancer screening (e.g., patient does not have a previous history of adenomatous polyps or previous colorectal cancer)*

AND

2 - There is a clinical reason why the patient cannot take two generic products on the HCR preventive drug list** (e.g., the patient has had an allergic reaction or intolerance to an inactive ingredient or has experienced an inadequate response). (Some examples of generic bowel prep products include: TriLyte, Gavilyte, PEG-3350/electrolytes)

AND

3 - Quantity requested does not exceed the QL of two primary preventive bowel prep products per year***

Notes	*Benefit exclusion if not for cancer screening. **The HCR preventive drug list is posted at: https://uhgazure.sharepoint.com/sites/CST/CSDM/Shared%20Documents/UMCS%20Guidelines/Healthcare%20Reform%20Supporting%20Document. ***If a patient has an intolerance, allergic reaction, or an inadequate response to one of the products on the HCR preventative drug list, then the quantity limits will not apply for one time only per drug category (to allow for another product to be tried on the HCR preventative drug list).

Product Name:Erythromycin 0.5% ophthalmic ointment	
Approval Length	1 Month: Authorization will be issued for zero copay with deductible bypass for up to 1 month
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

ERYTHROMYCIN	ERYTHROMYCIN OPHTH OINT 5 MG/GM	86101025004210	Generic

OR

5.3 Both of the following:

5.3.1 Request is for Soltamox 20 mg once daily*

AND

5.3.2 Member has had failure, contraindication or adverse reaction to tamoxifen tablets

Notes	*Benefit exclusion if age not met or has prior cancer diagnosis or has t hromboembolic events or less than 3% risk factor or requesting a diffe rent strength. This program is designed to meet Health Care Reform r equirements which require coverage of tamoxifen tablets, Soltamox (t amoxifen) solution, Evista (raloxifene), Aromasin (exemestane), and A

	rimidex (anastozole) at zero dollar cost share if being used for primary prevention of breast cancer and criteria are met.

2 . Endnotes

A. Important Risk Factors for Breast Cancer [5]: (1) Family history of breast or ovarian cancer (especially among first-degree relatives and onset before age 50 years); (2) History of atypical hyperplasia; (3) Non-malignant high-risk breast lesions; (4) Previous breast biopsy; (5) Extremely dense breast tissue; (6) Increasing age; (7) Race or ethnicity; (8) Age at menarche; (9) Age at first live childbirth; (10) Ductal carcinoma in situ (DCIS); (11) Lobular carcinoma in situ (LCIS); (12) Body mass index; (13) Menopause status or age; (14) Estrogen and progestin use; (15) Smoking; (16) Alcohol use; (17) Physical activity; (18) Diet.

B. The Affordable Care Act (ACA) requires private insurers to cover certain preventive services without any patient cost-sharing (i.e., copayments) when they are delivered by a network provider. The Department of Health and Human Services (HHS) has recognized several recommending bodies (e.g., United States Preventive Services Task Force [USPSTF], Advisory Committee on Immunization Practices [ACIP] http://www.cdc.gov/vaccines/hcp/acip-recs/vacc-specific/index.html, Health Resources and Services Administration [HRSA]) who have identified several medication categories that fall within the preventive health mandate.

C. OptumRx has developed a Healthcare Reform Preventative Drug List posted at: https://uhgazure.sharepoint.com/sites/CST/CSDM/Shared%20Documents/UMCS%20Guidelines/Healthcare%20Reform%20Supporting%20Document that identifies which products are eligible for coverage without patient copayment. Some products may be excluded (such as brand oral contraceptives) unless the patient meets the criteria in this exceptions policy.

D. Here is a brief summary of the exceptions allowed in this policy (provided the patient meets all of the specified criteria): (1) The fluoride supplementation exception allows for brand name products at no cost-share, but not combination products; (2) The folic acid exception allows for brand name and Rx products at no cost-share; (3) The smoking cessation exception allows for Nicotrol Inhaler, Nicotrol NS, and brand Zyban at no cost-share, but not additional quantities beyond the QLs; all other covered tobacco cessation products for members ages 18 years and older and not to exceed listed QLs; (4) The contraceptives exception allows for brand name products at no cost-share; (5) The bowel preparation agent exception allows for brand name Rx products at no cost-share but not beyond the QL; and (6) The statin exception allows for atorvastatin 10 mg or 20 mg, or simvastatin 5 mg, 10 mg, 20 mg, or 40mg generics at no cost-share. Other moderate to low dose statins include: pravastatin 10 mg, 20 mg, 40 mg, or 80 mg, fluvastatin 20 mg or 40 mg, pitavastatin 1 mg or 2 mg or 4 mg, rosuvastatin 5 mg or 10 mg.

E. Bowel Preparation Agents: It is important to distinguish between a screening and a surveillance or diagnostic colonoscopy. Screening is performed in asymptomatic patients with no history of colon cancer, polyps, and/or gastrointestinal disease. [1] Whereas, a surveillance colonoscopy can be performed at varying ages and intervals based on the patient’s personal history of colon cancer, polyps, and/or gastrointestinal disease. Patients with a history of colon polyp(s) are not recommended for a screening

colonoscopy, but for a surveillance colonoscopy. Per the USPSTF, when the screening test results in the diagnosis of clinically significant colorectal adenomas or cancer, the patient will be followed by a surveillance regimen, and recommendations for screening are no longer applicable. [6] According to the USPSTF, routine colorectal cancer screening is now recommended in adults beginning at age 45 and continuing only until age 75. The American Cancer Society, the U.S. Multi-Society Task Force on Colorectal Cancer, and the American College of Radiology jointly recommended screening for colorectal cancer beginning at 45 years of age by 1) high-sensitivity FOBT or fecal immunochemical testing annually, 2) flexible sigmoidoscopy every 5 years, 3) CT colonography (virtual colonoscopy) every 5 years, 4) colonoscopy every 10 years, or 5) fecal DNA at an unspecified interval. Based on the collective information above, we have a quantity limit in place of two bowel preparation agents per year. (This quantity limit will not apply if patient was intolerant to, had an allergic reaction, or an inadequate response to one of the bowel prep products on the HCR preventative drug list.)

F. Breast Cancer Prevention: The USPSTF recommends that clinicians engage in shared, informed decision-making with women who are at increased risk for breast cancer about medications to reduce their risk. [5] For women who are at an increased risk for breast cancer and at low risk for adverse medication effects, clinicians should offer to prescribe risk-reducing medications, such as tamoxifen or raloxifene. The USPSTF recommends against the routine use of medications, such as tamoxifen or raloxifene, for risk reduction of primary breast cancer in women who are not at increased risk for breast cancer. The updated STAR trial results show diminished benefits of raloxifene compared to tamoxifen after cessation of therapy, making it a preferred risk reduction choice for most post-menopausal women desiring non-surgical risk reduction therapy. However, consideration of toxicity (e.g., endometrial cancer or uterine bleeding) may still lead to the choice of raloxifene over tamoxifen in some women.
G. Gonococcal Ophthalmia Neonatorum (GON) Prevention: The USPSTF recommends prophylactic ocular topical medication for all newborns to prevent gonococcal ophthalmia neonatorum (GON). [17] GON can cause corneal scarring, ocular perforation, and blindness as early as 24 hours after birth. Erythromycin ophthalmic ointment is the only FDA approved drug for the prophylaxis of GON. Ocular prophylaxis of newborns is mandated in most states and is considered standard neonatal care.
H. The USPSTF recommends that clinicians offer preexposure prophylaxis (PrEP) with effective antiretroviral therapy to persons who are at high risk of HIV acquisition. [19] Once-daily oral treatment with Truvada is the only formulation of PrEP approved by the US Food and Drug Administration (FDA) for use in the United States in persons at risk of sexual acquisition of HIV infection. However, several studies reviewed by the USPSTF found that tenofovir disoproxil fumarate alone was also effective as PrEP, and CDC guidelines note that, given these trial data, tenofovir disoproxil fumarate alone can be considered as an alternative regimen for high-risk heterosexually active men and women and persons who inject drugs. [19, 20]
I. The USPSTF recommends that clinicians offer to prescribe risk-reducing medications, such as tamoxifen, raloxifene, or aromatase inhibitors, to women who are at increased risk for breast cancer and at low risk for adverse medication effects. (B recommendation) The USPSTF recommends against the routine use of risk-reducing medications, such as tamoxifen, raloxifene, or aromatase inhibitors, in women who are not at increased risk for breast cancer. (D recommendation) This recommendation applies to asymptomatic women 35 years and older, including women with previous benign breast lesions on biopsy (such as atypical ductal or lobular hyperplasia and lobular carcinoma in situ). This recommendation does not apply to women who have a current or previous diagnosis of breast cancer or ductal carcinoma in situ.

J. The USPSTF recommends for children younger than 5 years of age, that primary care clinicians prescribe oral fluoride supplementation starting at age 6 months for children whose water supply is deficient in fluoride.

4 . Revision History

Date	Notes
11/8/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-228633
Guideline Name	Healthcare Reform Copay Waiver Review - Contraceptives
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

Note:

The intent of this policy is to allow patients to receive medications/products that are not on the Healthcare Reform (HCR) preventative drug list (but are in the same drug class) at no cost-share. First and foremost, the patient must meet the basic HCR criteria (as described below) in order to qualify for zero cost-share.

1 . Criteria

Product Name:Contraceptives [A]	
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic
Healthcare Reform Exceptions			

Health Care Reform Exceptions			
Contraceptives			
Healthcare			
HCR			
Contraceptive			

Approval Criteria

1 - For medical necessity requests, to waive cost-sharing for a medication not included on a zero cost-sharing coverage list* BOTH of the following must be met:

1.1 Patient is using the prescribed drug for contraception**

AND

1.2 The requested product is medically necessary***

Notes	*Zero cost share contraceptive coverage lists are available at: https://uhgazure.sharepoint.com/sites/CST/CSDM/Shared%20Documents/UMCS%20Guidelines/Healthcare%20Reform%20Supporting%20Document. FDA Contraceptive Methods available at: https://www.fda.gov/consumers/free-publications-women/birth-control. **Benefit exclusion if not for contraception. ***Any justification of medical necessity/appropriateness provided by the prescriber is adequate to approve access of a preferred product at $0 cost share, in accordance with the ACA's contraceptive mandate.

2 . Endnotes

A. Oral Contraceptives: In order to receive an oral contraceptive at zero cost-share, a woman must be of childbearing potential and must be requesting an oral contraceptive for contraception (and not for another use) or if provider states medical necessity (as well as meeting the other criteria noted at the beginning of the policy). In addition, the 21 or 28 day oral contraceptive packs should not be approved for continuous use because there are continuous use products already on the Healthcare Reform Preventative Drug List posted at:

https://uhgazure.sharepoint.com/sites/CST/CSDM/Shared%20Documents/UMCS%20Guidelines/Healthcare%20Reform%20Supporting%20Document.

3 . Revision History

Date	Notes
11/7/2024	New Program

Prior Authorization Guideline

Guideline ID	GL-233387
Guideline Name	Hemangeol (propranolol hydrochloride oral solution)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	1/17/2024
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Hemangeol (propranolol hydrochloride oral solution)
Infantile hemangioma Indicated for the treatment of proliferating infantile hemangioma requiring systemic therapy.

2 . Criteria

Product Name:Hemangeol	
Approval Length	6 Month(s) [A]
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HEMANGEOL	PROPRANOLOL HCL ORAL SOLN 4.28 MG/ML (3.75 MG/ML BASE EQUIV)	33100040102080	Brand

Approval Criteria

1 - Diagnosis of proliferating infantile hemangioma

AND

2 - Patient is less than or equal to 12 months of age [A]

Product Name:Hemangeol	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HEMANGEOL	PROPRANOLOL HCL ORAL SOLN 4.28 MG/ML (3.75 MG/ML BASE EQUIV)	33100040102080	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in size, absence of functional impact, tissue softening)

AND

2 - Patient is less than or equal to 18 months of age [A]

3 . Endnotes

A. Treatment typically is continued for at least 6 months and often is maintained until 12 months of age (occasionally longer). [2]

4 . References

5 . Revision History

Date	Notes
3/13/2025	Quartz guideline copied to mirrow OptumRx

Prior Authorization Guideline

Guideline ID	GL-228655
Guideline Name	Hereditary Angioedema Agents (HAE) Quantity Limit Override
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Berinert (C1 esterase inhibitor [Human])
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute abdominal, facial, or laryngeal attacks of HAE in adult and adolescent patients. The safety and efficacy of Berinert for prophylactic therapy have not been established.
Drug Name: Firazyr (icatibant)
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute attacks of HAE in adults 18 years of age and older.
Drug Name: Sajazir (icatibant)
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute attacks of hereditary angioedema (HAE) in adults 18 years of age and older.
Drug Name: Kalbitor (ecallantide)

Acute treatment of Hereditary Angioedema (HAE) Indicated for treatment of acute attacks of HAE in patients 12 years of age and older.
Drug Name: Ruconest (C1 esterase inhibitor [Recombinant])
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute attacks in adult and adolescent patients with HAE. Limitation of Use: Effectiveness was not established in HAE patients with laryngeal attacks.

2 . Criteria

Product Name:Brand Firazyr, Generic icatibant, Sajazir, Ruconest, Kalbitor, Berinert	
Approval Length	3 month(s)
Guideline Type	Quantity Limit Override

Product Name	Generic Name	GPI	Brand/Generic
SAJAZIR	ICATIBANT ACETATE SUBCUTANEOUS SOLN PREF SYR 30 MG/3ML	8582004010E520	Generic
FIRAZYR	ICATIBANT ACETATE SUBCUTANEOUS SOLN PREF SYR 30 MG/3ML	8582004010E520	Brand
ICATIBANT ACETATE	ICATIBANT ACETATE SUBCUTANEOUS SOLN PREF SYR 30 MG/3ML	8582004010E520	Generic
RUCONEST	C1 ESTERASE INHIBITOR (RECOMBINANT) FOR IV INJ 2100 UNIT	85802022102130	Brand
KALBITOR	ECALLANTIDE INJ 10 MG/ML	85840030002020	Brand
BERINERT	C1 ESTERASE INHIBITOR (HUMAN) FOR IV INJ KIT 500 UNIT	85802022006420	Brand

Approval Criteria

1 - Prescriber attests patient has 3 or more acute HAE attacks per month (document number of attacks per month if available)

AND

2 - Prescriber attests patient has been evaluated for the use of prophylactic therapy

AND

3 - One of the following*:

3.1 For Kalbitor, requested quantity does not exceed the ceiling limit of 48 vials per 30 days. Note to provider: Ceiling limit is based on the quantity sufficient for the treatment of 8 acute attacks per month.

OR

3.2 For Brand Firazyr, generic icatibant, or Sajazir, requested quantity does not exceed the ceiling limit of 24 syringes [72 mL] per 30 days. Note to provider: Ceiling limit is based on the quantity sufficient for the treatment of 8 acute attacks per month.

OR

3.3 For Ruconest, requested quantity does not exceed the ceiling limit of 32 vials per 30 days. Note to provider: Ceiling limit is based on the quantity sufficient for the treatment of 8 acute attacks per month.

OR

3.4 For Berinert, requested quantity does not exceed the ceiling limit of 32 vials per 30 days. Note to provider: Ceiling limit is based on the quantity sufficient for the treatment of 8 acute attacks per month.

Notes	Approve requests to MDD ceiling limits. Refer to background table for ceiling limits. *If all criteria above are met EXCEPT for the ceiling limit criterion, issue a partially favorable decision (i.e. approve to ceiling limit and deny quantities above ceiling limit for medical necessity). Denied quantities are reviewed on appeal.

3 . Background

Benefit/Coverage/Program Information

Ceiling Limits for HAE Agents

Ceiling Limits for HAE Agents	
Drug Name	**Ceiling Limit** (Amount sufficient to provide coverage for up to 8 acute attacks per month based on MDD)
Berinert	MDD = 1.1 (32 vials per 30 days)
Brand Firazyr Sajazir generic icatibant	MDD = 2.4 (24 syringes [72 mL] per 30 days)
Ruconest	MDD = 1.1 (32 vials per 30 days)
Kalbitor	MDD = 1.6 (48 vials per 30 days)

Prior Authorization Guideline

Guideline ID	GL-233314
Guideline Name	Hereditary Angioedema Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/16/2025
P&T Approval Date:	2/17/2009
P&T Revision Date:	2/20/2025

1 . Indications

Drug Name: Berinert (C1 esterase inhibitor [Human])
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute abdominal, facial, or laryngeal attacks of HAE in adult and adolescent patients. The safety and efficacy of Berinert for prophylactic therapy have not been established.
Drug Name: Cinryze (C1 esterase inhibitor [Human])
Prophylaxis of Hereditary Angioedema (HAE) Indicated for routine prophylaxis against angioedema attacks in adults, adolescents and pediatric patients (6 years old and above) with HAE. **Off Label Uses: Acute treatment of Hereditary Angioedema (HAE)** Following treatment with nanofiltered C1 inhibitor concentrate (Cinryze) for an acute attack, the median time to response was 30 minutes in 82 patients with HAE. [3]

Drug Name: Firazyr (icatibant)
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute attacks of HAE in adults 18 years of age and older.
Drug Name: Haegarda (C1 esterase inhibitor [Human])
Prophylaxis of Hereditary Angioedema (HAE) Indicated for routine prophylaxis to prevent HAE attacks in patients 6 years of age and older.
Drug Name: Kalbitor (ecallantide)
Acute treatment of Hereditary Angioedema (HAE) Indicated for treatment of acute attacks of HAE in patients 12 years of age and older.
Drug Name: Orladeyo (berotralstat)
Prophylaxis of Hereditary Angioedema (HAE) Indicated for prophylaxis to prevent attacks of hereditary angioedema (HAE) in adults and pediatric patients 12 years of age and older. Limitations of Use: The safety and effectiveness of ORLADEYO for the treatment of acute HAE attacks have not been established. ORLADEYO should not be used for treatment of acute HAE attacks. Additional doses or doses of ORLADEYO higher than 150 mg once daily are not recommended due to the potential for QT prolongation.
Drug Name: Ruconest (C1 esterase inhibitor [Recombinant])
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute attacks in adult and adolescent patients with HAE. Limitation of Use: Effectiveness was not established in HAE patients with laryngeal attacks.
Drug Name: Takhzyro (lanadelumab-flyo)
Prophylaxis of Hereditary Angioedema (HAE) Indicated for prophylaxis to prevent attacks of hereditary angioedema (HAE) in adult and pediatric patients 2 years and older.
Drug Name: Sajazir (icatibant)
Acute treatment of Hereditary Angioedema (HAE) Indicated for the treatment of acute attacks of hereditary angioedema (HAE) in adults 18 years of age and older.

2 . Criteria

Product Name:Cinryze, Haegarda, Orladeyo, Takhzyro	
Diagnosis	Prophylaxis of HAE attacks

Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

TAKHZYRO	LANADELUMAB-FLYO SOLN PREF SYRINGE 150 MG/ML	8584204020E510	Brand

Approval Criteria

1 - Diagnosis of hereditary angioedema (HAE) [A]

AND

2 - One of the following [A, E]:

2.1 Diagnosis has been confirmed by both of the following:

2.1.1 C4 level below the lower limit of normal

AND

2.1.2 C1 inhibitor (C1-INH) deficiency or dysfunction (Type I or II HAE) as documented by ONE of the following:

- C1-INH antigenic level below the lower limit of normal

- C1-INH functional level below the lower limit of normal

OR

2.2 Diagnosis has been confirmed by both of the following:

2.2.1 Both of the following:

2.2.1.1 Normal C4 level

AND

2.2.1.2 Normal C1-INH levels (HAE-n1-C1INH previously referred to as HAE Type 3)

AND

2.2.2 One of the following:

- Confirmed presence of a factor XII, plasminogen, angiopoietin-1, kininogen-1, myoferlin, or heparan sulfate-glucosamine 3-O-sulfotransferase 6 gene mutation
- Patient has recurrent angioedema attacks that are refractory to high-dose antihistamines (e.g., cetirizine) with a confirmed family history of recurrent angioedema

AND

3 - For prophylaxis against HAE attacks [3]

AND

4 - Not used in combination with other approved treatments for prophylaxis against HAE attacks

AND

5 - One of the following:

- Patient is 6 years of age or older (applies to Cinryze and Haegarda only)
- Patient is 12 years of age or older (applies to Orladeyo only)
- Patient is 2 years of age or older (applies to Takhzyro only)

AND

6 - One of the following:

6.1 Trial and failure, contraindication or intolerance to one of the following: (applies to Cinryze only)

- Orladeyo
- Haegarda
- Takhzyro

OR

6.2 For continuation of prior therapy (applies to Cinryze only)

AND

7 - Prescribed by or in consultation with one of the following: [B]

- Immunologist
- Allergist

Product Name:Cinryze, Haegarda, Orladeyo, Takhzyro	
Diagnosis	Prophylaxis of HAE attacks
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Approval Criteria

1 - Diagnosis of hereditary angioedema (HAE) [A]

AND

2 - One of the following [A, E]:

2.1 Diagnosis has been confirmed by both of the following:

2.1.1 C4 level below the lower limit of normal

AND

2.1.2 C1 inhibitor (C1-INH) deficiency or dysfunction (Type I or II HAE) as documented by one of the following:

- C1-INH antigenic level below the lower limit of normal
- C1-INH functional level below the lower limit of normal

OR

2.2 Diagnosis has been confirmed by both of the following:

2.2.1 Both of the following:

2.2.1.1 Normal C4 level

AND

2.2.1.2 Normal C1-INH levels (HAE-n1-C1INH previously referred to as HAE Type 3)

AND

2.2.2 One of the following:

- Confirmed presence of a factor XII, plasminogen, angiopoietin-1, kininogen-1, myoferlin, or heparan sulfate-glucosamine 3-O-sulfotransferase 6 gene mutation
- Patient has recurrent angioedema attacks that are refractory to high-dose antihistamines (e.g., cetirizine) with a confirmed family history of recurrent angioedema

AND

3 - For the treatment of acute HAE attacks [3, C]

AND

4 - Not used in combination with other approved treatments for acute HAE attacks

AND

5 - One of the following:

- Patient is 6 years of age or older (applies to Cinryze only)
- Patient is 12 years of age or older (applies to Kalbitor only) [D]
- Patient is 13 years of age or older (applies to Ruconest only) [5]
- Patient is 18 years of age or older (applies to Brand Firazyr, generic icatibant, and Sajazir only)

AND

6 - Prescribed by or in consultation with one of the following: [B]

- Immunologist
- Allergist

AND

7 - Trial and failure or intolerance to generic icatibant (applies to brand Firazyr only):

Product Name:Cinryze [off-label], Brand Firazyr, Generic icatibant, Sajazir, Ruconest, or Kalbitor	
Diagnosis	Treatment of acute HAE attacks
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

KALBITOR	ECALLANTIDE INJ 10 MG/ML	85840030002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Not used in combination with other approved treatments for acute HAE attacks

Product Name:Berinert	
Diagnosis	Treatment of acute HAE attacks
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BERINERT	C1 ESTERASE INHIBITOR (HUMAN) FOR IV INJ KIT 500 UNIT	85802022006420	Brand

Approval Criteria

1 - Diagnosis of hereditary angioedema (HAE) [A]

AND

2 - One of the following [A, E]:

2.1 Diagnosis has been confirmed by both of the following:

2.1.1 C4 level below the lower limit of normal

AND

2.1.2 C1 inhibitor (C1-INH) deficiency or dysfunction (Type I or II HAE) as documented by ONE of the following:

- C1-INH antigenic level below the lower limit of normal
- C1-INH functional level below the lower limit of normal

OR

2.2 Diagnosis has been confirmed by both of the following:

2.2.1 Both of the following:

2.2.1.1 Normal C4 level

AND

2.2.1.2 Normal C1-INH levels (HAE-n1-C1INH previously referred to as HAE Type 3)

AND

2.2.2 One of the following:

- Confirmed presence of a factor XII, plasminogen, angiopoietin-1, kininogen-1, myoferlin, or heparan sulfate-glucosamine 3-O-sulfotransferase 6 gene mutation
- Patient has recurrent angioedema attacks that are refractory to high-dose antihistamines (e.g., cetirizine) with a confirmed family history of recurrent angioedema

AND

3 - For the treatment of acute HAE attacks [3, C]

AND

4 - Not used in combination with other approved treatments for acute HAE attacks

AND

5 - One of the following:

5.1 Trial and failure, contraindication, or intolerance to Ruconest

OR

5.2 One of the following [5]:

- Patient is 12 years of age or younger
- Documentation that patient has history of laryngeal attacks

AND

6 - Prescribed by or in consultation with one of the following: [B]

- Immunologist
- Allergist

Product Name:Berinert	
Diagnosis	Treatment of acute HAE attacks
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
BERINERT	C1 ESTERASE INHIBITOR (HUMAN) FOR IV INJ KIT 500 UNIT	85802022006420	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Not used in combination with other approved treatments for acute HAE attacks

Product Name:Cinryze	
Diagnosis	Prophylaxis of HAE attacks
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
CINRYZE	C1 ESTERASE INHIBITOR (HUMAN) FOR IV INJ 500 UNIT	85802022002120	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of hereditary angioedema (HAE) [A]

AND

2 - One of the following [A]:

2.1 Submission of medical records (e.g., chart notes) documenting diagnosis has been confirmed by both of the following:

2.1.1 C4 level below the lower limit of normal

AND

2.1.2 C1 inhibitor (C1-INH) deficiency or dysfunction (Type I or II HAE) as documented by ONE of the following:

- C1-INH antigenic level below the lower limit of normal
- C1-INH functional level below the lower limit of normal

OR

2.2 Submission of medical records (e.g., chart notes) documenting diagnosis has been confirmed by both of the following:

2.2.1 Both of the following:

2.2.1.1 Normal C4 level

AND

2.2.1.2 Normal C1-INH levels (HAE-n1-C1INH previously referred to as HAE Type 3)

AND

2.2.2 One of the following:

- Confirmed presence of a factor XII, plasminogen, angiopoietin-1, kininogen-1, myoferlin, or heparan sulfate-glucosamine 3-O-sulfotransferase 6 gene mutation
- Patient has recurrent angioedema attacks that are refractory to high-dose antihistamines (e.g., cetirizine) with a confirmed family history of recurrent angioedema

AND

3 - For prophylaxis against HAE attacks [3]

AND

4 - Not used in combination with other approved treatments for prophylaxis against HAE attacks

AND

5 - Patient is 6 years of age or older

AND

6 - One of the following:

6.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication or intolerance to one of the following:

- Orladeyo
- Haegarda
- Takhzyro

OR

6.2 Both of the following:

6.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

6.2.2 Patient demonstrates positive clinical response to therapy

AND

7 - Prescribed by or in consultation with one of the following: [B]

- Immunologist
- Allergist

Product Name:Brand Firazyr	
Diagnosis	Treatment of acute HAE attacks
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
FIRAZYR	ICATIBANT ACETATE SUBCUTANEOUS SOLN PREF SYR 30 MG/3ML	8582004010E520	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of hereditary angioedema (HAE) [A]

AND

2 - One of the following [A]:

2.1 Submission of medical records (e.g., chart notes) documenting diagnosis has been confirmed by both of the following:

2.1.1 C4 level below the lower limit of normal

AND

2.1.2 C1 inhibitor (C1-INH) deficiency or dysfunction (Type I or II HAE) as documented by ONE of the following:

- C1-INH antigenic level below the lower limit of normal
- C1-INH functional level below the lower limit of normal

OR

2.2 Submission of medical records (e.g., chart notes) documenting diagnosis has been confirmed by both of the following:

2.2.1 Both of the following:

2.2.1.1 Normal C4 level

AND

2.2.1.2 Normal C1-INH levels (HAE-n1-C1INH previously referred to as HAE Type 3)

AND

2.2.2 One of the following:

- Confirmed presence of a factor XII, plasminogen, angiopoietin-1, kininogen-1, myoferlin, or heparan sulfate-glucosamine 3-O-sulfotransferase 6 gene mutation
- Patient has recurrent angioedema attacks that are refractory to high-dose antihistamines (e.g., cetirizine) with a confirmed family history of recurrent angioedema

AND

3 - For the treatment of acute HAE attacks [3, C]

AND

4 - Not used in combination with other approved treatments for acute HAE attacks

AND

5 - Patient is 18 years of age or older

AND

6 - Both of the following:

6.1 Submission of medical records (e.g., chart notes) confirming the patient has experienced intolerance (e.g., allergy to excipient) with generic icatibant

AND

6.2 Submission of medical records confirming generic icatibant has not been effective AND justification/rationale provided explaining how Brand Firazyr is expected to provide benefit when generic icatibant has not been shown to be effective despite having the same active ingredient

AND

7 - One of the following:

7.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial and failure, contraindication or intolerance to all of the following:

7.1.1 Berinert

AND

7.1.2 Kalbitor

AND

7.1.3 One of the following:

7.1.3.1 Ruconest

OR

7.1.3.2 Documentation that patient has history of laryngeal attacks

OR

7.2 Both of the following:

7.2.1 Paid claims or submission of medical records (e.g., chart notes) confirming continuation of prior therapy, defined as no more than a 45-day gap in therapy

AND

7.2.2 Patient demonstrates positive clinical response to therapy

AND

8 - Prescribed by or in consultation with one of the following: [B]

- Immunologist

- Allergist

3 . Endnotes

A. HAE is a rare genetic disorder that can be broadly divided into two fundamental types: 1) HAE-C1INH (HAE Type 1 or Type 2), which presents with a deficiency of C1-INH; 2) HAE-n1-C1INH (previously referred to as HAE Type 3), a rare variant which presents with normal C1-INH levels. This condition is inherited in an autosomal dominant manner characterized by recurrent episodes of angioedema, without urticaria or pruritus, which most often affect the skin or mucosal tissues of the upper respiratory and gastrointestinal tracts. Diagnosis of Type 1 or Type 2 HAE requires laboratory testing to confirm low or abnormal levels of C1-inhibitor. HAE-n1-C1INH (previously referred to as HAE Type 3) presents a diagnostic challenge given the current lack of a validated biochemical test to confirm diagnosis. Per HAE guidelines, when a diagnosis of HAE-n1-CINH is suspected based on normal C1-INH levels, diagnosis should be confirmed by a known mutation associated with the disease or a positive family history of recurrent angioedema with a lack of efficacy to high-dose antihistamine therapy [10, 14].

B. Includes immunologist and allergist specialties to ensure the requirement for proper diagnosing and assessing the severity of the symptoms. In the pivotal Cinryze trial, criteria for participation of long term prophylaxis included patients 9 years and older with documented HAE (based on: a low C4 level plus low C1 inhibitor antigenic level/or low C1 inhibitor functional level OR a known HAE causing mutation) AND a history of at least two HAE attack per month. [1, 8] Berinert is approved for the treatment of acute attacks in patients who are 13 years and older. In the pivotal Berinert trial patients had laboratory-confirmed C1-inhibitor deficiency (type I or II HAE). [9]

C. Following treatment with nanofiltered C1 inhibitor concentrate (Cinryze) for an acute attack, the median time to response was 30 minutes in 82 patients with hereditary angioedema (median number of attacks per patient, 3; range, 1 to 57 attacks) in an open-label extension trial (median follow-up of 11 months). Additionally, 93% of attacks responded within 4 hr after C1 inhibitor concentrate treatment. [3]

D. Kalbitor carries a black box warning that states the following: "Anaphylaxis has been reported after administration of Kalbitor. Because of the risk of anaphylaxis, Kalbitor should only be administered by a healthcare professional with appropriate medical support to manage anaphylaxis and hereditary angioedema (HAE). Healthcare professionals should be aware of the similarity of symptoms between hypersensitivity reactions and hereditary angioedema and patients should be monitored closely. Do not administer Kalbitor to patients with known clinical hypersensitivity to Kalbitor." In 255 HAE patients treated with intravenous or subcutaneous Kalbitor in clinical studies, 10 patients (3.9%) experienced anaphylaxis. For the subgroup of 187 patients treated with subcutaneous Kalbitor, 5 patients (2.7%) experienced anaphylaxis. Symptoms associated with these reactions have included chest discomfort, flushing, pharyngeal edema, pruritus, rhinorrhea, sneezing, nasal congestion, throat irritation, urticaria, wheezing, and hypotension. These reactions occurred within the first hour after dosing. Other adverse reactions indicative of hypersensitivity reactions included the following: pruritus (5.1%), rash (3.1%), and urticaria (2.0%). Patients should be observed for an appropriate period of time after administration of Kalbitor, taking into account the time to

onset of anaphylaxis seen in clinical trials. In the Kalbitor HAE program, patients developed antibodies to ecallantide. Rates of seroconversion increased with exposure to ecallantide over time. Overall, 7.4% of patients seroconverted to anti-ecallantide antibodies. Neutralizing antibodies to ecallantide were determined in vitro to be present in 4.7% of patients. Anti-ecallantide and anti-Po pastoris IgE antibodies were also detected. While the long-term effects of antibodies to Kalbitor are not known, patients who seroconvert may be at a higher risk of a hypersensitivity reaction. The manufacturer developed a Risk Evaluation and Mitigation Strategy (REMS) program consisting of a Medication Guide and Communication Plan to notify healthcare professionals of the risk of anaphylaxis and the need to distinguish signs and symptoms of anaphylaxis and HAE attack as they may overlap. The presence of the black box warning necessitating administration by a healthcare professional; development of antibodies to ecallantide that may predispose patients to higher risks of hypersensitivity reactions; and the requirement for a REMS program offer compelling evidence to warrant the continued inclusion of an age criterion. [7]

E. When HAE is suspected based on the clinical presentation, appropriate testing includes measurement of the serum C4 level, C1INH antigenic level, and C1INH functional level. Low C4 plus low C1INH antigenic or functional levels are consistent with a diagnosis of HAE-C1INH [14, 15].

5 . Revision History

Date	Notes
1/16/2025	Custom guideline for Quartz Com mirrow Optum standard with no ch ange to criteria.

Prior Authorization Guideline

Guideline ID	GL-228871
Guideline Name	Hetlioz, Hetlioz LQ (tasimelteon) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Hetlioz (tasimelteon) capsule
Non-24-Hour Sleep-Wake Disorder (Non-24) Indicated for the treatment of Non-24-Hour Sleep-Wake Disorder (Non-24) in adults. **Smith-Magenis Syndrome (SMS)** Indicated for the treatment of nighttime sleep disturbances in SMS in patients 16 years of age and older.
Drug Name: Hetlioz LQ (tasimelteon) suspension
Smith-Magenis Syndrome (SMS) Indicated for the treatment of nighttime sleep disturbances in Smith-Magenis Syndrome (SMS) in pediatric patients 3 to 15 years of age.

2 . Criteria

Product Name:Brand Hetlioz capsule, generic tasimelteon capsule	
Diagnosis	Non-24-Hour Sleep-Wake Disorder (Non-24)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ	TASIMELTEON CAPSULE 20 MG	60250070000130	Brand
TASIMELTEON	TASIMELTEON CAPSULE 20 MG	60250070000130	Generic

Approval Criteria

1 - Diagnosis of non-24-hour sleep-wake disorder (also known as free-running disorder, free-running or non-entrained type circadian rhythm sleep disorder, or hypernychthemeral syndrome) [2, 5-6, A]

AND

2 - Patient is totally blind (has no light perception) [2-8, B]

AND

3 - Trial and failure, contraindication, or intolerance to generic tasimelteon (Applies to Brand only)

AND

4 - Prescribed by or in consultation with one of the following:

- Specialist in sleep disorders
- Neurologist

Product Name:Brand Hetlioz capsule, generic tasimelteon capsule

Diagnosis	Non-24-Hour Sleep-Wake Disorder (Non-24)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ	TASIMELTEON CAPSULE 20 MG	60250070000130	Brand
TASIMELTEON	TASIMELTEON CAPSULE 20 MG	60250070000130	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

Product Name:Brand Hetlioz capsule, generic tasimelteon capsule	
Diagnosis	Smith-Magenis Syndrome (SMS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ	TASIMELTEON CAPSULE 20 MG	60250070000130	Brand
TASIMELTEON	TASIMELTEON CAPSULE 20 MG	60250070000130	Generic

Approval Criteria

1 - Diagnosis of Smith-Magenis Syndrome (SMS)

AND

2 - Patient is 16 years of age or older

AND

3 - Patient is experiencing nighttime sleep disturbances (i.e., difficulty falling asleep, frequent nighttime waking and early waking)

AND

4 - Trial and failure, contraindication, or intolerance to generic tasimelteon (Applies to Brand only)

AND

5 - Prescribed by or in consultation with one of the following:

- Specialist in sleep disorders
- Neurologist

Product Name:Hetlioz LQ suspension	
Diagnosis	Smith-Magenis Syndrome (SMS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ LQ	TASIMELTEON ORAL SUSP 4 MG/ML	60250070001820	Brand

Approval Criteria

1 - Diagnosis of Smith-Magenis Syndrome (SMS)

AND

2 - Patient is 3 through 15 years of age

AND

3 - Patient is experiencing nighttime sleep disturbances (i.e., difficulty falling asleep, frequent nighttime waking and early waking)

AND

4 - Prescribed by or in consultation with one of the following:

- Specialist in sleep disorders
- Neurologist

Product Name:Brand Hetlioz capsule, generic tasimelteon capsule, Hetlioz LQ suspension	
Diagnosis	Smith-Magenis Syndrome (SMS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ	TASIMELTEON CAPSULE 20 MG	60250070000130	Brand
HETLIOZ LQ	TASIMELTEON ORAL SUSP 4 MG/ML	60250070001820	Brand
TASIMELTEON	TASIMELTEON CAPSULE 20 MG	60250070000130	Generic

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (i.e., improvement in nighttime total sleep time, improvement in nighttime sleep quality)

Product Name:Hetlioz capsule	
Diagnosis	Non-24-Hour Sleep-Wake Disorder (Non-24)

Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ	TASIMELTEON CAPSULE 20 MG	60250070000130	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of non-24-hour sleep-wake disorder (also known as free-running disorder, free-running or non-entrained type circadian rhythm sleep disorder, or hypernychthemeral syndrome) [2, 5-6, A]

AND

2 - Patient is totally blind (has no light perception) [2-8, B]

AND

3 - Submission of medical records (e.g., chart notes) confirming all of the following (Applies to Brand only):

- Patient has experienced intolerance (e.g., allergy to excipient) with generic tasimelteon
- Generic tasimelteon has not been effective
- Justification or rationale explaining how Brand Hetlioz capsule is expected to provide benefit when generic tasimelteon has not been shown to be effective despite having the same active ingredient

AND

4 - Prescribed by or in consultation with one of the following:

- Specialist in sleep disorders
- Neurologist

Product Name:Hetlioz capsule

Diagnosis	Smith-Magenis Syndrome (SMS)
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ	TASIMELTEON CAPSULE 20 MG	60250070000130	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of Smith-Magenis Syndrome (SMS)

AND

2 - Patient is 16 years of age or older

AND

3 - Submission of medical records (e.g., chart notes) confirming patient is experiencing nighttime sleep disturbances (i.e., difficulty falling asleep, frequent nighttime waking and early waking)

AND

4 - Submission of medical records (e.g., chart notes) confirming all of the following (Applies to Brand only):

- Patient has experienced intolerance (e.g., allergy to excipient) with generic tasimelteon
- Generic tasimelteon has not been effective
- Justification or rationale explaining how Brand Hetlioz capsule is expected to provide benefit when generic tasimelteon has not been shown to be effective despite having the same active ingredient

AND

5 - Prescribed by or in consultation with one of the following:

- Specialist in sleep disorders
- Neurologist

Product Name:Hetlioz LQ suspension	
Diagnosis	Smith-Magenis Syndrome (SMS)
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
HETLIOZ LQ	TASIMELTEON ORAL SUSP 4 MG/ML	60250070001820	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of Smith-Magenis Syndrome (SMS)

AND

2 - Patient is 3 through 15 years of age

AND

3 - Submission of medical records (e.g., chart notes) confirming patient is experiencing nighttime sleep disturbances (i.e., difficulty falling asleep, frequent nighttime waking and early waking)

AND

4 - Prescribed by or in consultation with one of the following:

- Specialist in sleep disorders

- Neurologist

3 . Endnotes

A. The International Classification of Sleep Disorders (an official publication of the American Academy of Sleep Medicine) defines non-24-hour sleep-wake disorder as a circadian rhythm sleep disorder characterized by complaints of insomnia or excessive sleepiness related to abnormal synchronization between the 24-hour light-dark cycle and the endogenous circadian rhythms of sleep and wake propensity, for a duration of 3 months. [2] Patients with non-24 experience a chronic steady pattern comprising 1- to 2-hour daily delays in sleep onset and wake times. As incremental phase delays in sleep occur, the complaint will consist of difficulty initiating sleep at night coupled with oversleeping into the daytime hours or inability to remain awake in the daytime. Therefore, over long periods of time, patients alternate between being symptomatic and asymptomatic, depending on the degree of synchrony between their internal biologic rhythm and the 24-hour world. [2] The condition is very rare in normally sighted people, but quite common in the totally blind who have no access to the entraining effects of the light-dark cycle. [3] Of the estimated 1.3 million legally blind individuals in the United States, approximately 130,000 have no light perception. Epidemiologic studies have found that as many as 70% of this totally blind sub-population suffer from non-24. [4] Non-24 is considered a chronic condition and markedly decreases the quality of life for patients. To varying extents, individuals with non-24 are unable to function in scheduled social activities or hold conventional jobs. [2, 4]

B. Hetlioz was approved on the basis of two pivotal, randomized, double-masked, placebo-controlled, multicenter, parallel-group studies in totally blind patients with non-24-hour sleep-wake disorder. [1, 7] The Safety and Efficacy of Tasimelteon (SET) Trial [1,7] was conducted in 84 totally blind patients with non-24, aged 21-84 years. Subjects received either Hetlioz 20 mg or placebo, one hour prior to bedtime, at the same time every night for up to 6 months. The Randomized-withdrawal study of the Efficacy and Safety of Tasimelteon to treat non-24 (RESET) Trial [1,8] was conducted in 20 entrained totally blind patients with non-24, aged 28-70 years. Subjects were treated for approximately 12 weeks with Hetlioz 20 mg one hour prior to bedtime, at the same time every night. Patients in whom the calculated time of peak melatonin level (melatonin acrophase) occurred at approximately the same time of day (in contrast to the expected daily delay) during the run-in phase were randomized to receive placebo or continue treatment with Hetlioz 20 mg for 8 weeks.

C. Given the wide range of available dosing regimens for melatonin, the variability in response time to treatment with tasimelteon and melatonin, and the need for consistent monitoring and evaluation of patients' sleep-related symptoms, tasimelteon must be prescribed by or in consultation with a specialist in sleep disorders. [3]

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming request is for an FDA-approved indication

AND

2 - Submission of medical records (e.g., chart notes) (document drug, duration, dose and date of use) confirming history of use of ALL available formulary alternative(s) and over-the-counter (OTC) equivalents*^ (if request is for a combination product, member must have documentation indicating concurrent use of separate agents)

AND

3 - Both of the following:

3.1 Documentation provided stating the formulary alternative(s) and over-the-counter (OTC) equivalents*^ has/have not been effective

AND

3.2 Justification/rationale provided explaining how the Non-Formulary or Excluded Medication is expected to provide benefit when the formulary alternative product(s) and over-the-counter (OTC) equivalents*^ has/have not been shown to be effective despite having the same active ingredient and/or same mechanism of action

Notes	*See table in background section for a list of the Non-Formulary or Ex cluded Medications and their preferred formulary alternatives. Please double check plan formulary for coverage. For off-label use, do not re view against the off-label administration guideline. Deny per guideline criteria. ^OTC equivalents refers to any covered or non-covered OTC equivalent product.

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228657
Guideline Name	High-Cost Brand with Generics Program
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Drugs included on the High Cost Brand with Generics List for which a Drug-Specific Prior Authorization Guideline is Unavailable*	
Approval Length	6 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - One of the following:

1.1 All of the following:

1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

AND

1.1.3 Requested drug will be used at a dose which is within FDA recommendations

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

2 - All of the following:

2.1 Patient has experienced intolerance (e.g., allergy to excipient) with the generic of the requested Brand

AND

2.2 If the requested drug is a Brand fixed-dose combination product, patient has experienced intolerance (e.g., allergy to excipient) with the individual generics in the combination product separately

AND

2.3 Submission of records (e.g., chart notes) confirming why the Brand is expected to provide benefit when the generic product has not been shown to be effective despite having the same active ingredient

AND

3 - One of the following:**

3.1 Patient has tried and failed at least 2 additional lower tier alternatives within the same therapeutic class. If only 1 lower tier alternative within the therapeutic class is available, the patient must have tried the lower tier alternative within the therapeutic class AND 1 additional lower tier alternative. If there are no lower tier alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to 2 lower tier alternatives

OR

3.2 No lower tier alternative is available to treat the patient's condition

Notes	*Drug should be reviewed using the drug-specific Prior Authorization guideline if available. If no drug-specific Prior Authorization guideline is available, proceed with the criteria above. **Please use the ORx Commercial grid to identify covered formulary generic alternatives for the requested target drug

2.1.1 Patient has experienced intolerance (e.g., allergy to excipient) with a formulary generic alternative that has the same active ingredient

AND

2.1.2 Patient has tried and failed at least 2 additional formulary generic alternatives within the same therapeutic class. If only 1 formulary generic alternative within the therapeutic class is available, the patient must have tried the formulary generic alternative within the therapeutic class AND 1 additional formulary generic alternative. If there are no formulary generic alternatives within the same therapeutic class, the patient must have failed or had contraindication or intolerance to 2 formulary generic alternatives

OR

2.2 If formulary generic alternatives are available and do not meet above scenario, patient has tried and failed, or has contraindication or intolerance to at least 3 formulary generic alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or had contraindications or intolerance to all available formulary generic alternatives

AND

3 - Submission of medical records (e.g., chart notes) confirming why the requested drug is expected to provide benefit when the formulary generic alternative(s) has not shown to be effective

Notes	*Drug should be reviewed using the drug-specific Prior Authorization guideline, if available. If no drug-specific Prior Authorization guideline is available, proceed with the criteria above. **Please use the ORx Commercial grid to identify covered formulary generic alternatives for the requested target drug

Prior Authorization Guideline

Guideline ID	GL-228660
Guideline Name	Horizant (gabapentin enacarbil)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Horizant (gabapentin enacarbil)
Restless Legs Syndrome (RLS) Indicated for the treatment of moderate-to-severe primary restless legs syndrome (RLS) in adults. Horizant is not recommended for patients who are required to sleep during the daytime and remain awake at night. **Postherpetic Neuralgia (PHN)** Indicated for the management of postherpetic neuralgia (PHN) in adults.

2 . Criteria

Product Name:Horizant	
Diagnosis	Restless Legs Syndrome (RLS)
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HORIZANT	GABAPENTIN ENACARBIL TAB CR 300 MG	62560030200420	Brand
HORIZANT	GABAPENTIN ENACARBIL TAB CR 600 MG	62560030200430	Brand

Approval Criteria

1 - Diagnosis of moderate-to-severe primary restless legs syndrome (RLS)

Product Name:Horizant	
Diagnosis	Restless Legs Syndrome (RLS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HORIZANT	GABAPENTIN ENACARBIL TAB CR 300 MG	62560030200420	Brand
HORIZANT	GABAPENTIN ENACARBIL TAB CR 600 MG	62560030200430	Brand

Approval Criteria

1 - Patient has experienced an improvement in RLS disease symptoms (e.g., decrease in symptom onset or severity, improved sleep, or decrease in symptom intensity)

Product Name:Horizant	
Diagnosis	Postherpetic Neuralgia (PHN)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HORIZANT	GABAPENTIN ENACARBIL TAB CR 300 MG	62560030200420	Brand
HORIZANT	GABAPENTIN ENACARBIL TAB CR 600 MG	62560030200430	Brand

Approval Criteria

1 - Diagnosis of postherpetic neuralgia (PHN)

AND

2 - One of the following [A]:

2.1 Patient has tried and had an inadequate response to a dose of at least 1,800 mg of generic gabapentin

OR

2.2 History of intolerance to generic gabapentin

Product Name:Horizant	
Diagnosis	Postherpetic Neuralgia (PHN)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HORIZANT	GABAPENTIN ENACARBIL TAB CR 300 MG	62560030200420	Brand
HORIZANT	GABAPENTIN ENACARBIL TAB CR 600 MG	62560030200430	Brand
HORIZANT	GABAPENTIN ENACARBIL TAB ER 300 MG	62560030200420	Brand
HORIZANT	GABAPENTIN ENACARBIL TAB ER 600 MG	62560030200430	Brand

Approval Criteria

1 - Patient has experienced an improvement in PHN disease symptoms (e.g., decrease in pain severity)

3 . Endnotes

A. While Horizant (gabapentin enacarbil) may improve patient convenience (twice daily rather than three times daily dosing), generic gabapentin is a more well-established, cost-effective therapy for PHN. The use of Horizant (gabapentin enacarbil) should be reserved for patients who have experienced treatment failure or intolerance to generic gabapentin. [3, 4]

Prior Authorization Guideline

Guideline ID	GL-229093
Guideline Name	Human Chorionic Gonadotropin (hCG)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/7/2025

1 . Indications

Drug Name: Novarel (chorionic gonadotropin), Pregnyl (chorionic gonadotropin)
Ovulation Induction (OI) Indicated for the induction of ovulation (OI) and pregnancy in the anovulatory, infertile woman in whom the cause of anovulation is secondary and not due to primary ovarian failure, and who has been appropriately pretreated with human menotropins. **Prepubertal Cryptorchidism** Indicated for prepubertal cryptorchidism not due to anatomic obstruction. In general, hCG is thought to induce testicular descent in situations when descent would have occurred at puberty. hCG thus may help to predict whether or not orchiopexy will be needed in the future. Although, in some cases, descent following hCG administration is permanent, in most cases the response is temporary. Therapy is usually instituted between the ages of 4 and 9. **Hypogonadotropic Hypogonadism** Indicated for the treatment of selected cases of hypogonadotropic hypogonadism (hypogonadism secondary to a pituitary deficiency) in males. **Off Label Uses: Infertile women undergoing Assisted Reproductive Technologies (ART)** Used for the induction of final follicular maturation and early luteinization in infertile women who have undergone pituitary desensitization and who have been appropriately pretreated

with follicle-stimulating hormones (FSH) as part of an assisted reproductive technology (ART) program such as in vitro fertilization and embryo transfer. [3]

Drug Name: Ovidrel (chorionic gonadotropin) PreFilled Syringe

Infertile women undergoing Assisted Reproductive Technologies (ART) Indicated for the induction of final follicular maturation and early luteinization in infertile women who have undergone pituitary desensitization and who have been appropriately pretreated with follicle-stimulating hormones (FSH) as part of an assisted reproductive technology (ART) program such as in vitro fertilization and embryo transfer.

Ovulation Induction (OI) Indicated for the induction of ovulation (OI) and pregnancy in anovulatory infertile patients in whom the cause of infertility is functional and not due to primary ovarian failure.

2 . Criteria

Product Name:Pregnyl*^	
Diagnosis	Ovulation Induction [4, 6]
Approval Length	2 Months (or per plan benefit design)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PREGNYL W/DILUENT BENZYL ALCOHOL/NACL	CHORIONIC GONADOTROPIN FOR INJ 10000 UNIT	30062020002140	Generic

Approval Criteria

1 - Diagnosis of anovulatory infertility

AND

2 - Infertility is not due to primary ovarian failure

AND

3 - For induction of ovulation

AND

4 - Patient has been pre-treated with a follicular stimulating agent (e.g., gonadotropins, clomiphene citrate, letrozole)

Notes	*Please consult client-specific resources to confirm whether benefit ex clusions should be reviewed for medical necessity. ^If patient meets c riteria above, please approve Pregnyl at GPI list “XXPAHCGORX”.

Product Name:Pregnyl* ^	
Diagnosis	Controlled Ovarian Hyperstimulation
Approval Length	2 Months (or per plan benefit design)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
PREGNYL W/DILUENT BENZYL ALCOHOL/NACL	CHORIONIC GONADOTROPIN FOR INJ 10000 UNIT	30062020002140	Generic

Approval Criteria

1 - Diagnosis of infertility

AND

2 - For the development of multiple follicles (controlled ovarian hyperstimulation)

AND

3 - Patient has been pre-treated with a follicular stimulating agent (e.g., gonadotropins, clomiphene citrate, letrozole)	
Notes	*Please consult client-specific resources to confirm whether benefit ex clusions should be reviewed for medical necessity. ^If patient meets c riteria above, please approve Pregnyl at GPI list “XXPAHCGORX”.

Product Name:Pregnyl	
Diagnosis	Prepubertal Cryptorchidism
Approval Length	6 Week(s)
Guideline Type	Prior Authorization

Date	Notes
1/7/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228662
Guideline Name	Hydroxyprogesterone caproate injection products
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Hydroxyprogesterone caproate injection (for non-pregnant women)
Amenorrhea Indicated in non-pregnant women for the management of amenorrhea (primary and secondary) and abnormal uterine bleeding due to hormonal imbalance in the absence of organic pathology, such as submucous fibroids or uterine cancer. **Production of secretory endometrium and desquamation** Indicated in non-pregnant women for the production of secretory endometrium and desquamation. **Adenocarcinoma of uterine corpus** Indicated in non-pregnant women for the treatment of advanced (Stage III or IV) adenocarcinoma of the uterine corpus. **Test for endogenous estrogen production** Indicated as a test for endogenous estrogen production in nonpregnant women.

2 . Criteria

Product Name:Hydroxyprogesterone 1.25g/5mL caproate injection (For Non-Pregnant Women)	
Diagnosis	Amenorrhea, Abnormal uterine bleeding
Approval Length	4 Month [B]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HYDROXYPROGESTERONE CAPROATE	HYDROXYPROGESTERONE CAPROATE IM IN OIL 1.25 GM/5ML	21404007202020	Generic

Approval Criteria

1 - Diagnosis of one of the following:

- Primary or secondary amenorrhea
- Abnormal uterine bleeding

AND

2 - Amenorrhea or abnormal uterine bleeding is due to hormonal imbalance in the absence of organic pathology (e.g., submucous fibroids or uterine cancer)

AND

3 - Patient is not pregnant

Notes	Note: This product and its criteria do NOT apply to brand Makena or it s generic.

Product Name:Hydroxyprogesterone 1.25g/5mL caproate injection (For Non-Pregnant Women)	
Diagnosis	Production of secretory endometrium and desquamation
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

HYDROXYPROGESTERONE CAPROATE	HYDROXYPROGESTERONE CAPROATE IM IN OIL 1.25 GM/5ML	21404007202020	Generic

Approval Criteria

1 - Used for production of secretory endometrium and desquamation

AND

2 - Patient is not pregnant

Notes	Note: This product and its criteria do NOT apply to brand Makena or it s generic.

Product Name:Hydroxyprogesterone 1.25g/5mL caproate injection (For Non-Pregnant Women)	
Diagnosis	Adenocarcinoma of uterine corpus
Approval Length	12 month(s)

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HYDROXYPROGESTERONE CAPROATE	HYDROXYPROGESTERONE CAPROATE IM IN OIL 1.25 GM/5ML	21404007202020	Generic

Approval Criteria

1 - Diagnosis of Stage III or IV adenocarcinoma of the uterine corpus

AND

2 - Patient is not pregnant

AND

3 - Prescribed by or in consultation with an oncologist

Notes	Note: This product and its criteria do NOT apply to brand Makena or it s generic.

Product Name:Hydroxyprogesterone 1.25g/5mL caproate injection (For Non-Pregnant Women)	
Diagnosis	Adenocarcinoma of uterine corpus
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HYDROXYPROGESTERONE CAPROATE	HYDROXYPROGESTERONE CAPROATE IM IN OIL 1.25 GM/5ML	21404007202020	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Patient is not pregnant

Notes	Note: This product and its criteria do NOT apply to brand Makena or it s generic.

Product Name:Hydroxyprogesterone 1.25g/5mL caproate injection (For Non-Pregnant Women)	
Diagnosis	Test for endogenous estrogen production
Approval Length	2 Month [C]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
HYDROXYPROGESTERONE CAPROATE	HYDROXYPROGESTERONE CAPROATE IM IN OIL 1.25 GM/5ML	21404007202020	Generic

Approval Criteria **1** - Used for the testing of endogenous estrogen production **AND** **2** - Patient is not pregnant

Notes	Note: This product and its criteria do NOT apply to brand Makena or it s generic.

3 . Definitions

Definition	Description
Singleton spontaneous preterm birth	Delivery at less than 37 weeks of gestation following spontaneous preterm labor or premature rupture of membranes. [1]

4 . Endnotes

A. Pregnant women with a history of preterm birth may benefit from initiating Makena therapy later than the FDA-recommended initiation period (between 16 weeks, 0 days and 20 weeks, 6 days gestation). There are no significant safety concerns with late initiation of therapy. Available evidence suggests it would be reasonable to allow initiation as late as 26 weeks, 6 days. [1-5]
B. Hydroxyprogesterone caproate injection (for non-pregnant women) for amenorrhea can be given as a one-time dosage or as cyclic therapy as part of a 28-day cycle, with each cycle repeated every 4 weeks and stopped after 4 cycles. [6]
C. Hydroxyprogesterone caproate injection (for non-pregnant women) for estrogen testing can be started at any time, with a repeat dose given 4 weeks after the first injection for confirmation. Therapy should be stopped after the second injection. [6]

Prior Authorization Guideline

Guideline ID	GL-228876
Guideline Name	IBS - Diarrhea
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Lotronex (alosetron hydrochloride)
Severe Diarrhea-Predominant Irritable Bowel Syndrome (IBS) in Women Indicated only for women with severe diarrhea-predominant IBS who have: • chronic IBS symptoms (generally lasting 6 months or longer) • had anatomic or biochemical abnormalities of the gastrointestinal tract excluded, and • not responded adequately to conventional therapy. Diarrhea-predominant IBS is severe if it includes diarrhea and one or more of the following: • frequent and severe abdominal pain/discomfort • frequent bowel urgency or fecal incontinence • disability or restriction of daily activities due to IBS. Because of infrequent but serious gastrointestinal adverse reactions associated with Lotronex, the indication is restricted to those patients for whom the benefit-to-risk balance is most favorable. Clinical studies have not been performed to adequately confirm the benefits of Lotronex in men.
Drug Name: Viberzi (eluxadoline)
Irritable bowel syndrome with diarrhea (IBS-D) Indicated in adults for the treatment of IBS-D.

LOTRONEX	ALOSETRON HCL TAB 0.5 MG (BASE EQUIV)	52554015100310	Brand
LOTRONEX	ALOSETRON HCL TAB 1 MG (BASE EQUIV)	52554015100320	Brand
ALOSETRON HYDROCHLORIDE	ALOSETRON HCL TAB 0.5 MG (BASE EQUIV)	52554015100310	Generic
ALOSETRON HYDROCHLORIDE	ALOSETRON HCL TAB 1 MG (BASE EQUIV)	52554015100320	Generic

Approval Criteria

1 - Diagnosis of severe diarrhea-predominant irritable bowel syndrome (IBS)

AND

2 - Symptoms for at least 6 months [A]

AND

3 - Patient is female

AND

4 - Patient is 18 years of age or older

AND

5 - Trial and failure, contraindication, or intolerance to both of the following:

- antispasmodic agent [eg, Bentyl (dicyclomine)] [2, 6, B]
- antidiarrheal agent [eg, loperamide] [2, 3, 6]

Product Name:Brand Lotronex, Generic alosetron	
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LOTRONEX	ALOSETRON HCL TAB 0.5 MG (BASE EQUIV)	52554015100310	Brand
LOTRONEX	ALOSETRON HCL TAB 1 MG (BASE EQUIV)	52554015100320	Brand
ALOSETRON HYDROCHLORIDE	ALOSETRON HCL TAB 0.5 MG (BASE EQUIV)	52554015100310	Generic
ALOSETRON HYDROCHLORIDE	ALOSETRON HCL TAB 1 MG (BASE EQUIV)	52554015100320	Generic

Approval Criteria

1 - Symptoms of IBS continue to persist

AND

2 - Patient demonstrates positive clinical response to therapy as evidenced by one of the following: [1]

- Relief of IBS abdominal pain and discomfort
- Improvement in stool consistency
- Decrease in daily stool frequency
- Moderate or substantial improvement as measured by the Global Improvement Scale [C]

Product Name:Viberzi	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VIBERZI	ELUXADOLINE TAB 75 MG	52558020000330	Brand
VIBERZI	ELUXADOLINE TAB 100 MG	52558020000340	Brand

Approval Criteria

1 - Diagnosis of irritable bowel syndrome with diarrhea

AND

2 - Trial and failure, contraindication, or intolerance to both of the following:

- antispasmodic agent [eg, Bentyl (dicyclomine)] [2, 6]
- antidiarrheal agent [eg, Lomotil (diphenoxylate and atropine)] [2, 3, 6]

Product Name:Viberzi	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VIBERZI	ELUXADOLINE TAB 75 MG	52558020000330	Brand
VIBERZI	ELUXADOLINE TAB 100 MG	52558020000340	Brand

Approval Criteria

1 - Symptoms of IBS continue to persist

AND

2 - Patient demonstrates positive clinical response to therapy as evidenced by both of the following: [D]

- Improvement in the daily worst abdominal pain score
- Reduction in the Bristol Stool Scale

3 . Endnotes

A. Lotronex was removed from the market in late 2000 due to reports of ischemic colitis and severe constipation but has since been re-released with a “black box” warning for use in select cases. [1, 3, 4, 5]
B. Lotronex should be used with caution in debilitated patients, elderly patients, patients with hepatic impairment, and patients taking medications that decrease gastrointestinal motility. [1]
C. The Global Improvement Scale (GIS) assesses multiple symptoms of Irritable Bowel Syndrome (IBS) using a 7-point Likert scale which ranges from symptoms substantially worse to substantially improved. GIS responders were defined as having moderate or substantial improvement in IBS symptoms. [1]
D. The primary endpoint in Studies 1 and 2 to assess the efficacy of Viberzi was defined by both the simultaneous improvement in the daily worse abdominal pain score by ≥30% as compared to the baseline weekly average AND a reduction in the BSS to <5 on at least 50% of the days within a 12-week time interval. [7]

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228664
Guideline Name	Ibsrela (tenapanor) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ibsrela (tenapanor)
Irritable Bowel Syndrome with Constipation Indicated for the treatment of irritable bowel syndrome with constipation (IBS-C) in adults.

2 . Criteria

Product Name:Ibsrela	
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IBSRELA	TENAPANOR HCL TAB 50 MG	52558580100320	Brand

Approval Criteria

1 - Diagnosis of irritable bowel syndrome with constipation (IBS-C)

AND

2 - Used as an adjunct to lifestyle modifications (e.g., increase intake of fibers and fluids, increase physical activity)

AND

3 - Trial and failure, contraindication, or intolerance to ONE the following:

- generic lactulose
- generic polyethylene glycol

AND

4 - Trial and failure, contraindication, or intolerance to Linzess

Product Name:Ibsrela	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IBSRELA	TENAPANOR HCL TAB 50 MG	52558580100320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by ONE of the following:

- Improvement in constipation or stool frequency from baseline
- Decrease in abdominal pain or discomfort

Product Name:Ibsrela	
Approval Length	3 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
IBSRELA	TENAPANOR HCL TAB 50 MG	52558580100320	Brand

Approval Criteria

1 - Diagnosis of irritable bowel syndrome with constipation (IBS-C)

AND

2 - Used as an adjunct to lifestyle modifications (e.g., increase intake of fibers and fluids, increase physical activity)

AND

3 - Submission of medical records (e.g. chart notes) or paid claims confirming trial and failure (minimum 30 days supply), contraindication, or intolerance to ONE the following:

- generic lactulose
- generic polyethylene glycol

AND

4 - Submission of medical records (e.g. chart notes) or paid claims confirming trial and failure (minimum 30 days supply), contraindication, or intolerance to both of the following:

- Linzess
- generic lubiprostone (Amitiza)

Iclusig (ponatinib)

Prior Authorization Guideline

Guideline ID	GL-229140
Guideline Name	Iclusig (ponatinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Iclusig (ponatinib)
Philadelphia Chromosome-Positive Acute Lymphoblastic Leukemia (Ph+ ALL) 1) Newly diagnosed Ph+ ALL in combination with chemotherapy. This indication is approved under accelerated approval based on minimal residual disease (MRD)-negative complete remission (CR) at the end of induction. Continued approval for this indication may be contingent upon verification of clinical benefit in a confirmatory trial(s). 2) As monotherapy in Ph+ ALL for whom no other kinase inhibitors are indicated or T315I-positive Ph+ ALL. **Chronic Myeloid Leukemia (CML)** 1) Indicated for the treatment of adult patients with chronic phase (CP) chronic myeloid leukemia (CML) with resistance or intolerance to at least two prior kinase inhibitors. 2) Indicated for the treatment of adult patients with Accelerated phase (AP) or blast phase (BP) Chronic Myeloid Leukemia (CML) for whom no other kinase inhibitors are indicated. 3) Indicated for the treatment of adult patients with T315I-positive CML (chronic phase, accelerated phase, or blast phase) Limitations of Use: Iclusig is not

indicated and is not recommended for the treatment of patients with newly diagnosed CP-CML

2 . Criteria

Product Name:Iclusig	
Diagnosis	Chronic Myelogenous Leukemia
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ICLUSIG	PONATINIB HCL TAB 10 MG (BASE EQUIV)	21531875100315	Brand
ICLUSIG	PONATINIB HCL TAB 15 MG (BASE EQUIV)	21531875100320	Brand
ICLUSIG	PONATINIB HCL TAB 30 MG (BASE EQUIV)	21531875100330	Brand
ICLUSIG	PONATINIB HCL TAB 45 MG (BASE EQUIV)	21531875100340	Brand

Approval Criteria

1 - Diagnosis of chronic myelogenous leukemia (CML)

Product Name:Iclusig	
Diagnosis	Philadelphia Chromosome-Positive Acute Lymphoblastic Leukemia (Ph+ ALL)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ICLUSIG	PONATINIB HCL TAB 10 MG (BASE EQUIV)	21531875100315	Brand
ICLUSIG	PONATINIB HCL TAB 15 MG (BASE EQUIV)	21531875100320	Brand

ICLUSIG	PONATINIB HCL TAB 30 MG (BASE EQUIV)	21531875100330	Brand
ICLUSIG	PONATINIB HCL TAB 45 MG (BASE EQUIV)	21531875100340	Brand

Approval Criteria

1 - Diagnosis of Philadelphia chromosome-positive acute lymphoblastic leukemia (Ph+ ALL)

AND

2 - One of the following [1]:

2.1 Used in combination with chemotherapy up to 20 cycles

OR

2.2 Used as monotherapy in patients where one of the following applies:

- No other kinase inhibitors are indicated
- Disease is T315I-positive Ph+ ALL

Product Name:Iclusig	
Diagnosis	All indications listed above
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ICLUSIG	PONATINIB HCL TAB 10 MG (BASE EQUIV)	21531875100315	Brand
ICLUSIG	PONATINIB HCL TAB 15 MG (BASE EQUIV)	21531875100320	Brand
ICLUSIG	PONATINIB HCL TAB 30 MG (BASE EQUIV)	21531875100330	Brand
ICLUSIG	PONATINIB HCL TAB 45 MG (BASE EQUIV)	21531875100340	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Resistance in CP-CML while on prior TKI therapy, was defined as failure to achieve either a complete hematologic response (by 3 months), a minor cytogenetic response (by 6 months), or a major cytogenetic response (by 12 months). Patients with CP-CML who experienced a loss of response or development of a kinase domain mutation in the absence of a complete cytogenetic response or progression to AP-CML or BP-CML at any time on prior TKI therapy were also considered resistant. Resistance in AP-CML, BP-CML, and Ph+ALL was defined as failure to achieve either a major hematologic response (by 3 months in AP-CML, and by 1 month in BP-CML and Ph+ALL), loss of major hematologic response (at any time), or development of a kinase domain mutation in the absence of a complete major hematologic response while on prior TKI therapy. Intolerance was defined as the discontinuation of prior TKI therapy due to toxicities despite optimal management in the absence of a complete cytogenetic response in patients with CP-CML or major hematologic response for patients with APCML, BP-CML, or Ph+ALL. [1]

1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Idhifa (enasidenib)

Prior Authorization Guideline

Guideline ID	GL-233203
Guideline Name	Idhifa (enasidenib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/25/2017
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Idhifa (enasidenib)
Relapsed or Refractory Acute Myeloid Leukemia (AML) Indicated for the treatment of adult patients with relapsed or refractory acute myeloid leukemia (AML) with an isocitrate dehydrogenase-2 (IDH2) mutation as detected by an FDA-approved test.

2 . Criteria

Product Name:Idhifa	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IDHIFA	ENASIDENIB MESYLATE TAB 50 MG (BASE EQUIVALENT)	21535030200320	Brand
IDHIFA	ENASIDENIB MESYLATE TAB 100 MG (BASE EQUIVALENT)	21535030200340	Brand

Approval Criteria

1 - Diagnosis of acute myeloid leukemia (AML)

AND

2 - Disease is one of the following:

- Relapsed
- Refractory

AND

3 - Patient has an isocitrate dehydrogenase-2 (IDH2) mutation as detected by an FDA-approved test (e.g., Abbott RealTime IDH2 assay) or performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

Product Name:Idhifa	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228437
Guideline Name	Igalmi (dexmedetomidine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Igalmi (dexmedetomidine)
Agitation Indicated for the acute treatment of agitation associated with schizophrenia or bipolar I or II disorder in adults. Limitations of Use: The safety and effectiveness of Igalmi has not been established beyond 24 hours from the first dose.

2 . Criteria

Product Name:Igalmi	
Approval Length	14 Days [A]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IGALMI	DEXMEDETOMIDINE HCL FILM 120 MCG	60206030108220	Brand
IGALMI	DEXMEDETOMIDINE HCL FILM 180 MCG	60206030108230	Brand

Approval Criteria

1 - One of the following diagnoses:

- Schizophrenia
- Bipolar I or II disorder

AND

2 - For the treatment of acute agitation [B, 1]

AND

3 - Trial and failure, contraindication or intolerance to at least two products used in acute agitation (e.g., olanzapine, ziprasidone) [C, 2-5]

AND

4 - Patient is currently being managed with maintenance medication for their underlying disorder (e.g., aripiprazole, olanzapine, quetiapine, lithium, valproic acid)

3 . Endnotes

A. The safety and effectiveness of Igalmi has not been established beyond 24 hours from the 1st dose. Clinical studies were done on patients who were admitted to a clinical research unit or a hospital and remained under medical supervision for at least 24 hours following treatment. If agitation persists after the initial dose, up to two additional doses may be administered at least two hours apart. [13]
B. We consider agitation to be a psychiatric emergency. Agitation is a state of motor restlessness or excitement and is often accompanied by mental tension and irritability. [14]

C. With the emergence of second generation (atypical) antipsychotics(SGA's), the expert consensus-based guidelines recommend SGA's as 1st line therapy [2]

Prior Authorization Guideline

Guideline ID	GL-228631
Guideline Name	Ilaris (canakinumab injection)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ilaris (canakinumab injection)
Periodic Fever Syndromes: Cryopyrin-Associated Periodic Syndromes (CAPS), Tumor Necrosis Factor Receptor Associated Periodic Syndrome (TRAPS), Hyperimmunoglobulin D Syndrome (HIDS)/Mevalonate Kinase Deficiency (MKD), Familial Mediterranean Fever(FMF) Indicated for the treatment of the following autoinflammatory Periodic Fever Syndromes: Cryopyrin-Associated Periodic Syndromes (CAPS), in adults and children 4 years of age and older including, Familial Cold Autoinflammatory Syndrome (FCAS) or Muckle-Wells Syndrome (MWS); Tumor Necrosis Factor Receptor Associated Periodic Syndrome (TRAPS) in adult and pediatric patients; Hyperimmunoglobulin D Syndrome (HIDS)/Mevalonate Kinase Deficiency (MKD) in adult and pediatric patients; Familial Mediterranean Fever (FMF) in adult and pediatric patients. **Systemic Juvenile Idiopathic Arthritis (SJIA)** Indicated for the treatment of active Systemic Juvenile Idiopathic Arthritis (SJIA) in patients aged 2 years and older. **Still's disease (Adult-Onset Still's Disease [AOSD])** Indicated for the treatment of active Still's disease, including Adult-Onset Still's Disease (AOSD) in patients aged 2 years and older.

Gout Flares Indicated for the symptomatic treatment of adult patients with gout flares in whom nonsteroidal anti-inflammatory drugs (NSAIDs) and colchicine are contraindicated, are not tolerated, or do not provide an adequate response, and in whom repeated courses of corticosteroids are not appropriate.

2 . Criteria

Product Name:Ilaris	
Diagnosis	Periodic Fever Syndromes [Cryopyrin-Associated Periodic Syndromes (CAPS), Tumor Necrosis Factor Receptor Associated Periodic Syndrome (TRAPS), Hyperimmunoglobulin D Syndrome (HIDS)/Mevalonate Kinase Deficiency(MKD), Familial Mediterranean Fever(FMF)]
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Diagnosis of one of the following periodic fever syndromes:

- cryopyrin-associated periodic syndromes (CAPS), including familial cold autoinflammatory syndrome (FCAS) and Muckle-Wells syndrome (MWS)
- tumor necrosis factor (TNF) receptor associated periodic syndrome (TRAPS)
- hyperimmunoglobulin D (Hyper-IgD) syndrome (HIDS/mevalonate kinase deficiency (MKD)
- familial mediterranean fever (FMF)

AND

2 - Prescribed by or in consultation with one of the following:

- Immunologist

- Allergist
- Dermatologist
- Rheumatologist
- Neurologist

AND

3 - Both of the following:

- Patient is not receiving concomitant treatment with Tumor Necrosis Factor (TNF) inhibitors (e.g., Enbrel [etanercept], Humira [adalimumab], Remicade [infliximab])
- Patient is not receiving concomitant treatment with Interleukin-1 inhibitor (e.g., Arcalyst [rilonacept], Kineret [anakinra])

Product Name:Ilaris	
Diagnosis	Periodic Fever Syndrome [CAPS, TRAPS, HIDS/MKD, FMF]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Both of the following:

- Patient is not receiving concomitant treatment with Tumor Necrosis Factor (TNF) inhibitors (e.g., Enbrel [etanercept], Humira [adalimumab], Remicade [infliximab])
- Patient is not receiving concomitant treatment with Interleukin-1 inhibitor (e.g., Arcalyst [rilonacept], Kineret [anakinra])

Product Name:Ilaris	
Diagnosis	Systemic Juvenile Idiopathic Arthritis (SJIA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Diagnosis of active systemic juvenile idiopathic arthritis (SJIA)

AND

2 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [1, 2]:

- Minimum duration of a 3-month trial and failure of methotrexate
- Minimum duration of a 1-month trial of a nonsteroidal anti-inflammatory drug (NSAID) (e.g., ibuprofen, naproxen)
- Minimum duration of a 2-week trial of a systemic glucocorticoid (e.g., prednisone)

AND

3 - Both of the following:

- Patient is not receiving concomitant treatment with Tumor Necrosis Factor (TNF) inhibitors (e.g., Enbrel [etanercept], Humira [adalimumab], Remicade [infliximab])
- Patient is not receiving concomitant treatment with Interleukin-1 inhibitor (e.g., Arcalyst [rilonacept], Kineret [anakinra])

AND

4 - Prescribed by or in consultation with a rheumatologist

Product Name:Ilaris	
Diagnosis	Systemic Juvenile Idiopathic Arthritis (SJIA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 2]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in clinical features or symptoms (e.g., pain, fever, inflammation, rash, lymphadenopathy, serositis) from baseline

AND

2 - Both of the following:

- Patient is not receiving concomitant treatment with Tumor Necrosis Factor (TNF) inhibitors (e.g., Enbrel [etanercept], Humira [adalimumab], Remicade [infliximab])
- Patient is not receiving concomitant treatment with Interleukin-1 inhibitor (e.g., Arcalyst [rilonacept], Kineret [anakinra])

Product Name:Ilaris	
Diagnosis	Still's Disease
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Diagnosis of Still's Disease, including Adult-Onset Still's Disease (AOSD)

AND

2 - Trial and failure, contraindication, or intolerance to one of the following: [1-3]

- Corticosteroids (e.g., prednisone)
- Methotrexate
- Nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen)

AND

3 - Both of the following:

- Patient is not receiving concomitant treatment with Tumor Necrosis Factor (TNF) inhibitors (e.g., Enbrel [etanercept], Humira [adalimumab], Remicade [infliximab])
- Patient is not receiving concomitant treatment with Interleukin-1 inhibitor (e.g., Arcalyst [rilonacept], Kineret [anakinra])

AND

4 - Prescribed by or in consultation with a rheumatologist

Product Name:Ilaris	
Diagnosis	Still's Disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Both of the following:

- Patient is not receiving concomitant treatment with Tumor Necrosis Factor (TNF) inhibitors (e.g., Enbrel [etanercept], Humira [adalimumab], Remicade [infliximab])
- Patient is not receiving concomitant treatment with Interleukin-1 inhibitor (e.g., Arcalyst [rilonacept], Kineret [anakinra])

Product Name:Ilaris	
Diagnosis	Gout Flares
Approval Length	12 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILARIS	CANAKINUMAB SUBCUTANEOUS INJ 150 MG/ML	66460020002015	Brand

Approval Criteria

1 - Diagnosis of gout flares

AND

2 - Trial and failure, contraindication, or intolerance to ALL of the following [1, 6]:

- Nonsteroidal anti-inflammatory drugs (NSAIDs) (e.g., ibuprofen, naproxen)

- Colchicine
- Corticosteroids (e.g., prednisone)

AND

3 - Patient has not received Ilaris in the last 12 weeks [A]

AND

4 - Prescribed by or in consultation with one of the following:

- Rheumatologist
- Nephrologist

3 . Definitions

Definition	Description
Cryopyrin-Associated Periodic Syndromes (CAPS):	A group of rare, autosomal dominantly inherited auto-inflammatory conditions comprising of Familial-Cold Auto-inflammatory Syndrome (FCAS), Muckle-Wells Syndrome (MWS), Neonatal-Onset Multisystem Inflammatory Disease (NOMID) or also known as Chronic Infantile Neurologic Cutaneous Articular Syndrome (CINCA), which are caused by the CIAS1 gene mutation and characterized by recurrent symptoms (urticaria-like skin lesions, fever chills, arthralgia, profuse sweating, sensorineural hearing/vision loss, and increased inflammation markers the blood). Approximately 300 people in the United States are affected by CAPS. [1, 4, 5]
Familial Cold Autoinflammatory Syndrome (FCAS):	The mildest form of CAPS, is characterized by cold-induced, daylong episodes of fever associated with rash, arthralgia, headaches and less frequently conjunctivitis, but without other signs of CNS inflammation. Symptoms usually begin during the first 6 months of life and are predominantly triggered by cold exposure. Duration of episodes usually is less than 24 hours. [5]

Muckle-Wells Syndrome (MWS):	A subtype of CAPS, which is characterized by episodic attacks of inflammation associated with a generalized urticaria-like rash, fever, malaise, arthralgia, and progressive hearing loss. Duration of symptoms usually lasts from 24-48 hours. [5]

4 . Endnotes

A. The recommended dose of Ilaris for adult patients with a gout flare is 150 mg administered subcutaneously. In patients who require re-treatment, there should be an interval of at least 12 weeks before a new dose of Ilaris may be administered [1].

Guideline Note:

Effective Date:	1/1/2025

1 . Criteria

Product Name:Ilumya	
Diagnosis	Plaque Psoriasis
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ILUMYA	TILDRAKIZUMAB-ASMN SUBCUTANEOUS SOLN PREF SYRINGE 100 MG/ML	9025058010E520	Brand

Approval Criteria

1 - Diagnosis of moderate-to-severe plaque psoriasis

AND

2 - One of the following [2]:

- Greater than or equal to 3% body surface area involvement
- Severe scalp psoriasis
- Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [3]:

- corticosteroids (e.g., betamethasone, clobetasol)
- vitamin D analogs (e.g., calcitriol, calcipotriene)
- tazarotene
- calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

AND

5 - One of the following:

5.1 Both of the following:

5.1.1 Trial and failure, contraindication, or intolerance to THREE of the following:

- Cimzia (certolizumab pegol)
- Enbrel (etanercept)
- One formulary adalimumab product*
- One formulary ustekinumab product*
- Cosentyx (secukinumab)
- Skyrizi (risankizumab)
- Tremfya (guselkumab)

- Otezla (apremilast)
- Sotyktu (deucravacitinib)

AND

5.1.2 Trial and failure, contraindication, or intolerance to Bimzelx (bimekizumab-bkzx)

OR

5.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

Notes	* For review process only: Refer to the table in the Background section for carrier-specific formulary products

Prior Authorization Guideline

Guideline ID	GL-228881
Guideline Name	Immune Globulins - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Bivigam (immune globulin [Human])
Primary Immunodeficiency Disorders Indicated for the treatment of adults and pediatric patients 2 years of age and older with primary humoral immunodeficiency (PI). This includes, but is not limited to, the humoral immune defect in common variable immunodeficiency (CVID), X-linked agammaglobulinemia, congenital agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.
Drug Name: Flebogamma 5% (immune globulin [Human])
Primary Immunodeficiency Disorders Indicated in adults and pediatric patients 2 years of age and older for the treatment of primary immunodeficiency (PI), including the humoral immune defects in common variable immunodeficiency, x-linked agammaglobulinemia, severe combined immunodeficiency, and Wiskott-Aldrich syndrome.
Drug Name: Flebogamma 10% (immune globulin [Human])
Primary Immunodeficiency Disorders Indicated as replacement therapy in primary immunodeficiency (PI) including the humoral immune defects in common variable immunodeficiency, xlinked agammaglobulinemia, severe combined immunodeficiency, and

Wiskott-Aldrich syndrome.

Chronic Primary Immune Thrombocytopenia (ITP) Indicated for the treatment of patients 2 years of age and older with chronic primary ITP to raise platelet count.

Drug Name: Gamastan (immune globulin [Human])

Measles (Rubeola) Indicated to prevent or modify measles in a susceptible person exposed fewer than 6 days previously. A susceptible person is one who has not been vaccinated and has not had measles previously. Gamastan may be especially indicated for susceptible household contacts of measles patients, particularly contacts under 1 year of age, for whom the risk of complications is highest. Gamastan is also indicated for pregnant women without evidence of immunity. Gamastan and measles vaccine should not be given at the same time. If a child is older than 12 months and has received Gamastan, he should be given measles vaccine about 5 months later when the measles antibody titer will have disappeared. If a susceptible child exposed to measles is immunocompromised, give Gamastan immediately.

Rubella Indicated to modify rubella in exposed women who will not consider a therapeutic abortion. Some studies suggest that the use of Gamastan in exposed, susceptible women can lessen the likelihood of infection and fetal damage; therefore, Gamastan may benefit those women who will not consider a therapeutic abortion. Do not give Gamastan for routine prophylaxis of rubella in early pregnancy to an unexposed woman.

Hepatitis A Indicated for prophylaxis following exposure to hepatitis A. The prophylactic value of Gamastan is greatest when given before or soon after exposure to hepatitis A. Gamastan is not indicated in persons with clinical manifestations of hepatitis A or in those exposed more than 2 weeks previously.

Varicella Indicated to modify varicella. Passive immunization against varicella in immunosuppressed patients is best accomplished by use of Varicella Zoster Immune globulin (Human) [VZIG]. If VZIG is unavailable, Gamastan, promptly given, may also modify varicella.

Drug Name: Privigen (immune globulin [Human])

Chronic Immune Thrombocytopenic Purpura (ITP) Indicated for the treatment of patients age 15 years and older with chronic ITP to raise platelet counts.

Primary Immunodeficiency Disorders Indicated as replacement therapy for primary humoral immunodeficiency (PI). This includes, but is not limited to, the humoral immune defect in congenital agammaglobulinemia, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) Indicated for the treatment of adults with chronic inflammatory demyelinating polyneuropathy (CIDP) to improve neuromuscular disability and impairment. Limitation of Use: Privigen maintenance therapy in CIDP has not been studied for periods longer than 6 months. After responding during an initial treatment period, not all patients require indefinite maintenance therapy with Privigen in order

to remain free of CIDP symptoms. Individualize the duration of any treatment beyond 6 months based upon the patient's response and demonstrated need for continued therapy.

Drug Name: Gammagard S/D (immune globulin [Human])

Kawasaki Disease Indicated for the prevention of coronary artery aneurysms associated with Kawasaki syndrome in pediatric patients.

B-cell Chronic Lymphocytic Leukemia (CLL) Indicated for prevention of bacterial infections in hypogammaglobulinemia and/or recurrent bacterial infections associated with B-cell Chronic Lymphocytic Leukemia (CLL).

Idiopathic Thrombocytopenic Purpura (ITP) Indicated for the treatment of adult chronic idiopathic thrombocytopenic purpura to increase platelet count and to prevent and/or to control bleeding.

Primary Immunodeficiency Disorders Indicated for the treatment of primary immunodeficiency (PI) associated with defects in humoral immunity, in adults and children two years and older. This includes, but is not limited to, congenital agammaglobulinemia, common variable immunodeficiency, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Drug Name: Gammaked and Gamunex-C (immune globulin [Human])

Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) Indicated for the treatment of CIDP in adults to improve neuromuscular disability and impairment and for maintenance therapy to prevent relapse.

Idiopathic Thrombocytopenic Purpura (ITP) Indicated for the treatment of adults and children with idiopathic thrombocytopenic purpura to raise platelet counts to prevent bleeding or to allow a patient with ITP to undergo surgery.

Primary Immunodeficiency Disorders Indicated for treatment of primary humoral immunodeficiency in patients 2 years of age and older. This includes, but is not limited to, congenital agammaglobulinemia, common variable immunodeficiency, X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Drug Name: Immune globulin products (IVIG)

Off Label Uses: Bone Marrow Transplant (BMT) [6, 19-22] Has been used to decrease the incidence of infections and graft versus host disease (GVHD) in patients 20 years of age and older who underwent bone marrow transplantation.

Dermatomyositis [6, 23] In patients with treatment-resistant dermatomyositis, IVIG therapy resulted in improvements in muscle strength and neuromuscular symptoms.

Multifocal Motor Neuropathy (MMN) [6, 24, 25, 26] In placebo-controlled trials, IVIG has been shown to improve muscle strength and reduce disability and conduction block in patients with MMN.

HIV [6, 27, 28] Used to decrease the frequency of serious and minor bacterial infections; the frequency of hospitalization; and to increase the time free of serious bacterial infections in patients with HIV.

Guillain-Barre Syndrome [6, 29] Considered to be equally effective as plasma exchange for the treatment of Guillain-Barre Syndrome.

Lambert-Eaton Myasthenic Syndrome [6, 30] Considered a first-line treatment option to treat the refractory pattern of weakness seen in patients with LEMS.

Myasthenia Gravis [6, 34] A clinical study comparing IVIG with plasma exchange did not show a significant difference between the two treatments in patients with myasthenia gravis exacerbation. Several open studies support beneficial effects of IVIG in treating myasthenia gravis.

Relapsing Remitting Multiple Sclerosis [6, 35, 36] Published studies indicate that IVIG may reduce the frequency of acute exacerbations and provide symptomatic relief in patients with relapsing-remitting forms of multiple sclerosis.

Stiff-Person Syndrome [6, 64, 65] The efficacy of IVIG for the treatment of stiff-person syndrome was demonstrated in a randomized, double-blind, placebo-controlled, crossover trial.

Polymyositis [6, 23] Found to be effective in reversing chronic polymyositis previously unresponsive to immunosuppressive therapy.

Drug Name: Gammagard Liquid (immune globulin [Human])

Primary Immunodeficiency Disorders Indicated as replacement therapy for primary humoral immunodeficiency (PI) in adult and pediatric patients two years of age or older. This includes, but is not limited to, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, congenital agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Multifocal Motor Neuropathy (MMN) Indicated as a maintenance therapy to improve muscle strength and disability in adult patients with Multifocal Motor Neuropathy (MMN).

Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) Indicated as a therapy to improve neuromuscular disability and impairment in adult patients with Chronic Inflammatory Demyelinating Polyneuropathy (CIDP). Limitation of Use: Gammagard Liquid has not been studied in immunoglobulin-naive patients with CIDP. Gammagard Liquid maintenance therapy in CIDP has not been studied for periods longer than 6 months. After responding during an initial treatment period, not all patients require indefinite maintenance therapy with Gammagard Liquid in order to remain free of CIDP symptoms. Individualize the duration of any treatment beyond 6 months based upon the patient's response and demonstrated need for continued therapy.

Drug Name: Gammaplex (immune globulin [Human])

Primary Immunodeficiency Disorders Indicated for replacement therapy in primary humoral immunodeficiency (PI) in adults and pediatric patients two years of age and older. This includes, but is not limited to, the humoral immune defect in common variable immunodeficiency, X-linked agammaglobulinemia, congenital agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Chronic Immune Thrombocytopenic Purpura (ITP) Indicated for the treatment of adults with chronic immune thrombocytopenic purpura (ITP) to raise platelet counts.

Drug Name: Octagam 10% (immune globulin [Human])

Chronic Immune Thrombocytopenic Purpura Indicated in chronic immune thrombocytopenic purpura to rapidly raise platelet counts to control or prevent bleeding in adults.

Dermatomyositis Indicated for the treatment of dermatomyositis in adults.

Drug Name: Octagam 5% (immune globulin [Human])

Primary Immunodeficiency Disorders Indicated for the treatment of primary immunodeficiency disorders associated with defects in humoral immunity. These include, but are not limited to: congenital agammaglobulinemia, X-linked agammaglobulinemia, common variable immunodeficiency, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Drug Name: Cytogam (cytomegalovirus immune globulin [Human])

Cytomegalovirus Indicated for the prophylaxis of cytomegalovirus disease associated with transplantation of kidney, lung, liver, pancreas and heart. In transplants of these organs other than kidney from CMV seropositive donors into seronegative recipients, prophylactic CMV-IGIV should be considered in combination with ganciclovir.

Drug Name: Varizig (varicella zoster immune globulin [Human] solution)

Post-exposure prophylaxis of varicella Indicated for post-exposure prophylaxis of varicella in high risk individuals. High risk groups include: immunocompromised children and adults, newborns of mothers with varicella shortly before or after delivery, premature infants, neonates and infants less than one year of age, adults without evidence of immunity, pregnant women. Limitations of Use: There is no convincing evidence that Varizig reduces the incidence of chickenpox infection after exposure to VZV. There is no convincing evidence that established infections with VZV can be modified by Varizig administration. There is no indication for the prophylactic use of Varizig in immunodeficient children or adults when there is a past history of varicella, unless the patient is undergoing bone marrow transplantation.

Drug Name: Hizentra (immune globulin [Human]) for subcutaneous administration

Primary Immunodeficiency Disorders Indicated as replacement therapy for primary humoral immunodeficiency (PI) in adults and pediatric patients 2 years of age and older. This includes, but is not limited to, the humoral immune defect in congenital agammaglobulinemia,

common variable immunodeficiency, X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) Indicated for the treatment of adult patients with chronic inflammatory demyelinating polyneuropathy (CIDP) as maintenance therapy to prevent relapse of neuromuscular disability and impairment. Limitations of Use: Hizentra maintenance therapy in CIDP has been systematically studied for 6 months and for a further 12 months in a follow-up study. Maintenance therapy beyond these periods should be individualized based upon the patient's response and need for continued therapy.

Drug Name: Panzyga (immune globulin intravenous [Human] - ifas)

Primary Immunodeficiency Disorders Indicated for treatment of primary humoral immunodeficiency (PI) in patients 2 years of age and older. This includes, but is not limited to, congenital agammaglobulinemia, common variable immunodeficiency, X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Chronic Immune Thrombocytopenia (ITP) Indicated for the treatment of adult patients with ITP to raise platelet counts to control or prevent bleeding.

Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) Indicated for the treatment of adults with chronic inflammatory demyelinating polyneuropathy (CIDP) to improve neuromuscular disability and impairment.

Drug Name: Cuvitru (immune globulin [Human])

Primary Immunodeficiency Disorders Indicated as replacement therapy for primary humoral immunodeficiency (PI) in adult and pediatric patients two years of age and older. This includes, but is not limited to, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, congenital agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Drug Name: Cutaquig (Immune globulin subcutaneous [Human] - hipp)

Primary Immunodeficiency Disorders Indicated as replacement therapy for primary humoral immunodeficiency (PI) in adults and pediatric patients 2 years of age and older. This includes, but is not limited to, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, congenital agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Drug Name: Xembify (immune globulin subcutaneous, human - klhw)

Primary Immunodeficiency Disorders Indicated for treatment of primary humoral immunodeficiency (PI) in patients 2 years of age and older. This includes, but is not limited to, congenital agammaglobulinemia, common variable immunodeficiency, X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies.

Drug Name: Asceniv (immune globulin intravenous, human - slra)

Primary Immunodeficiency Disorders Indicated for the treatment of primary humoral immunodeficiency (PI) in adults and adolescents (12 to 17 years of age). PI includes, but is not limited to, the humoral immune defect in congenital agammaglobulinemia, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies (SCID).
Drug Name: HyQvia (immune globulin with recombinant human hyaluronidase) for subcutaneous administration
Primary Immunodeficiency Indicated for the treatment of Primary Immunodeficiency (PI) in adults and pediatric patients two years of age and older. This includes, but is not limited to, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, congenital agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiencies. **Chronic Inflammatory Demyelinating Polyneuropathy (CIDP)** Indicated for the treatment of chronic inflammatory demyelinating polyneuropathy (CIDP) as maintenance therapy to prevent relapse of neuromuscular disability and impairment in adults.
Drug Name: Alyglo (immune globulin intravenous, human-stwk)
Primary Immunodeficiency Disorders Indicated for the treatment of primary humoral immunodeficiency (PI) in adults. This includes, but is not limited to, the humoral immune defect in congenital agammaglobulinemia, common variable immunodeficiency (CVID), X-linked agammaglobulinemia, Wiskott-Aldrich syndrome, and severe combined immunodeficiency (SCID).

2 . Criteria

Product Name:Intravenous or subcutaneous immune globulins (IVIG or SCIG)	
Diagnosis	Primary Immunodeficiency Syndrome
Approval Length	12 month(s)

Approval Criteria

1 - For patients with a primary immunodeficiency syndrome [1, 3, 5, 6, 40, 44, 48-64, I, J]

AND

2 - Clinically significant functional deficiency of humoral immunity as evidenced by one of the following: [56]

2.1 Documented failure to produce antibodies to specific antigens

OR

2.2 History of significant recurrent infections

AND

3 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

4 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Alyglo, Asceniv	
Diagnosis	Primary Immunodeficiency Syndrome
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ASCENIV	IMMUNE GLOBULIN (HUMAN)-SLRA IV SOLN 5 GM/50ML	19100020802030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 5 GM/50ML	19100020832030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 10 GM/100ML	19100020832035	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - For patients with a primary immunodeficiency syndrome [1, 3, 5, 6, 40, 44, 48-64, I, J]

AND

2 - Clinically significant functional deficiency of humoral immunity as evidenced by one of the following: [56]

2.1 Documented failure to produce antibodies to specific antigens

OR

2.2 History of significant recurrent infections

AND

3 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

4 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:HyQvia	
Diagnosis	Primary Immunodeficiency Syndrome
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 5 GM/50ML	19100020832030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 10 GM/100ML	19100020832035	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Diagnosis of B-cell chronic lymphocytic leukemia (CLL) [5]

AND

2 - One of the following:

2.1 Documented hypogammaglobulinemia (IgG less than 500 mg/dL) [13, 14, 59, B]

OR

2.2 History of bacterial infection(s) associated with B-cell CLL [13, 14, 59, B]

AND

3 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

4 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Alyglo, Asceniv	
Diagnosis	B-cell Chronic Lymphocytic Leukemia (CLL) [5, 10-14]
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ASCENIV	IMMUNE GLOBULIN (HUMAN)-SLRA IV SOLN 5 GM/50ML	19100020802030	Brand

Approval Criteria

1 - Diagnosis of chronic inflammatory demyelinating polyneuropathy (CIDP) as confirmed by all of the following [58, C]:

1.1 Progressive symptoms present for at least 2 months

AND

1.2 Symptomatic polyradiculoneuropathy as indicated by one of the following:

1.2.1 Progressive or relapsing motor impairment of more than one limb

OR

1.2.2 Progressive or relapsing sensory impairment of more than one limb

AND

1.3 Electrophysiologic findings when three of the following four criteria are present:

- Partial conduction block of 1 or more motor nerve
- Reduced conduction velocity of 2 or more motor nerves
- Prolonged distal latency of 2 or more motor nerves
- Prolonged F-wave latencies of 2 or more motor nerves or the absence of F waves

AND

2 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

3 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as measured by an objective scale (e.g., Modified Rankin, Medical Research Council [MRC] scale) [58, H, P]

AND

2 - Documentation of titration to the minimum dose and frequency needed to maintain a sustained clinical effect [P]

AND

3 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

4 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

- Panzyga
- Privigen

AND

3 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Gamastan	
Diagnosis	Hepatitis A
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAMASTAN	IMMUNE GLOBULIN (HUMAN) IM INJ	19100020002200	Brand

Approval Criteria

1 - For prophylaxis of Hepatitis A before or soon after exposure [40, 74]

AND

2 - Patient does not have clinical manifestations of hepatitis A [40, 74]

AND

3 - Patient does not have exposure to hepatitis A for more than 2 weeks previously [40, 74]

Product Name:Gamastan	
Diagnosis	Measles (Rubeola)
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

GAMASTAN	IMMUNE GLOBULIN (HUMAN) IM INJ	19100020002200	Brand

Approval Criteria

1 - For use in susceptible individuals exposed to measles fewer than 6 days previously [40, 74]

AND

2 - Patient is not receiving measles vaccine at the same time [40, 74]

Product Name:Gamastan	
Diagnosis	Varicella
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAMASTAN	IMMUNE GLOBULIN (HUMAN) IM INJ	19100020002200	Brand

Approval Criteria

1 - For passive immunization against varicella [40, 74]

AND

2 - Patient is immunosuppressed [40, 74]

AND

3 - Varicella Zoster Immune Globulin (Human) vaccine is not available

Product Name:Gamastan

Diagnosis	Rubella
Approval Length	14 Day(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
GAMASTAN	IMMUNE GLOBULIN (HUMAN) IM INJ	19100020002200	Brand

Approval Criteria

1 - For pregnant women who are exposed or susceptible to Rubella [40, 74]

AND

2 - Patient will not consider a therapeutic abortion [40, 74]

Product Name:Intravenous immune globulin (IVIG)	
Diagnosis	Bone Marrow Transplantation (off-label) [19-22]
Approval Length	12 month(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Immune globulin (IVIG)	IMMUNE GLOBULIN (HUMAN) IV FOR SOLN	191000201021	Brand

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Confirmed allogeneic bone marrow transplant within the last 100 days [19-21, D]

AND

2 - Documented severe hypogammaglobulinemia (IgG less than 400 mg/dL) [19, D]

AND

3 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

4 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Alyglo, Asceniv	
Diagnosis	Bone Marrow Transplantation (off-label) [19-22]
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Diagnosis of HIV disease [60, 61, K]

AND

2 - One of the following:

2.1 Documented hypogammaglobulinemia (IgG less than 400 mg/dL) [75, L]

OR

2.2 Functional antibody deficiency as demonstrated by one of the following: [60]

- Poor specific antibody titers
- Recurrent bacterial infections

AND

3 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Diagnosis of multifocal motor neuropathy (MMN) as confirmed by all of the following [57, 67, 68, N]:

1.1 Weakness with slowly progressive or stepwise progressive course over at least one month

AND

1.2 Asymmetric involvement of two or more nerves

AND

1.3 Absence of both of the following:

1.3.1 Motor neuron signs

AND

1.3.2 Bulbar signs

AND

2 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

PANZYGA	IMMUNE GLOBULIN (HUMAN)-IFAS IV SOLN	191000206020	Brand
ASCENIV	IMMUNE GLOBULIN (HUMAN)-SLRA IV SOLN 5 GM/50ML	19100020802030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 5 GM/50ML	19100020832030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 10 GM/100ML	19100020832035	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as measured by an objective scale [e.g., Rankin, Modified Rankin, Medical Research Council (MRC) scale] [57, 68]

AND

2 - Documentation of titration to the minimum dose and frequency needed to maintain a sustained clinical effect

AND

3 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

4 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Diagnosis	Multifocal Motor Neuropathy (off-label) [25, 26]
Approval Length	12 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ASCENIV	IMMUNE GLOBULIN (HUMAN)-SLRA IV SOLN 5 GM/50ML	19100020802030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 5 GM/50ML	19100020832030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 10 GM/100ML	19100020832035	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Diagnosis of multifocal motor neuropathy (MMN) as confirmed by all of the following [57, 67, 68, N]:

1.1 Weakness with slowly progressive or stepwise progressive course over at least one month

AND

1.2 Asymmetric involvement of two or more nerves

AND

1.3 Absence of both of the following:

1.3.1 Motor neuron signs

AND

1.3.2 Bulbar signs

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming trial and failure, contraindication, or intolerance to two of the following:

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

3 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Intravenous immune globulin (IVIG)	
Diagnosis	Relapsing-Remitting Multiple Sclerosis (off-label) [35, 36]
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
Immune globulin (IVIG)	IMMUNE GLOBULIN (HUMAN) IV FOR SOLN	191000201021	Brand

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Diagnosis of relapsing remitting multiple sclerosis (RRMS) [6, 35, 36, G]

AND

2 - Documentation of an MS exacerbation or progression (worsening) of the patient's clinical status from the visit prior to the one prompting the decision to initiate immune globulin therapy [6, 35, 36, G, M, O]

AND

3 - Trial and failure, contraindication, or intolerance to two of the following agents: [36, G, M, O]

- Aubagio (teriflunomide)*
- Avonex (interferon beta-1a)*
- Betaseron (interferon beta-1b)*
- Copaxone/Glatopa (glatiramer acetate)*
- Extavia (interferon beta-1b)*
- Gilenya (Fingolimod)*
- Lemtrada (alemtuzumab)*
- Plegridy (peginterferon beta-1a)*
- Rebif (interferon beta-1a)*

- Tecfidera (dimethyl fumarate)*
- Tysabri (natalizumab)*

AND

4 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

5 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Notes	*This agent may require prior authorization.

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - The prescriber maintains and provides chart documentation of the patient's evaluation, including both of the following [6, 35, 36, O]:

1.1 Findings of interval examination including neurological deficits incurred

AND

1.2 Assessment of disability (e.g., Expanded Disability Status Score [EDSS], Functional Systems Score [FSS], Multiple Sclerosis Functional Composite [MSFC], Disease Steps [DS])

AND

2 - Stable or improved disability score (e.g., EDSS, FSS, MSFC, DS) [6, 35, 36]

AND

3 - Documentation of decreased number of relapses since starting immune globulin therapy [6, 35, 36]

AND

4 - Diagnosis continues to be the relapsing-remitting form of MS (RRMS)

AND

5 - Documentation of titration to the minimum dose and frequency needed to maintain a sustained clinical effect

AND

6 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

7 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Alyglo, Asceniv	
Diagnosis	Relapsing-Remitting Multiple Sclerosis (off-label) [35, 36]
Approval Length	12 month(s)
Guideline Type	Non Formulary

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Diagnosis of generalized myasthenia gravis [34, 55, F, R]

AND

2 - Evidence of myasthenic exacerbation, defined by one of the following symptoms in the last month: [34, 55, F, R]

2.1 Difficulty swallowing

OR

2.2 Acute respiratory failure

OR

2.3 Major functional disability responsible for the discontinuation of physical activity

AND

3 - Concomitant immunomodulator therapy (e.g., azathioprine, mycophenolate mofetil, cyclosporine), unless contraindicated, will be used for long-term management of myasthenia gravis [34, 55, F, R]

AND

4 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 5 GM/50ML	19100020832030	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 10 GM/100ML	19100020832035	Brand
ALYGLO	IMMUNE GLOBULIN (HUMAN)-STWK IV SOLN 20 GM/200ML	19100020832040	Brand

Approval Criteria

1 - Diagnosis of Guillain-Barre Syndrome

AND

2 - Patients with severe disease requiring aid to walk [80, E]

AND

3 - Onset of neuropathic symptoms within the last four weeks [80, E]

AND

4 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard
- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

5 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

Product Name:Intravenous immune globulin (IVIG)	
Diagnosis	Guillain-Barre Syndrome (off-label) [29, 80, 83]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Immune globulin (IVIG)	IMMUNE GLOBULIN (HUMAN) IV FOR SOLN	191000201021	Brand

Product Name:Cytogam	
Diagnosis	Prophylaxis for CMV Infection
Approval Length	16 Week(s)
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
CYTOGAM	CYTOMEGALOVIRUS IMMUNE GLOBULIN (HUMAN) IV INJ	19100005002020	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Patient requires prophylaxis for CMV infection following kidney transplantation

AND

1.1.2 Patient is CMV- seronegative and organ donor is CMV-seropositive

OR

1.2 All of the following:

1.2.1 Patient requires prophylaxis for CMV infection following liver, heart, lung, or pancreas transplantation

AND

1.2.2 Patient is CMV- seronegative and organ donor is CMV-seropositive

AND

1.2.3 Used in combination with ganciclovir or valganciclovir unless the patient has a hypersensitivity to, is intolerant of, or therapy is deemed inappropriate

Product Name:Varizig	
Diagnosis	Varicella
Approval Length	1 Dose
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
VARIZIG	VARICELLA-ZOSTER IMMUNE GLOB (HUMAN) IM INJ 125 UNIT/1.2ML	19100070002015	Brand
VARIZIG	VARICELLA-ZOSTER IMMUNE GLOB (HUMAN) FOR IM INJ 125 UNIT	19100070002122	Brand
VARIZIG			

Approval Criteria

1 - For passive immunization or post exposure-prophylaxis of varicella

AND

2 - Patient is considered a high risk individual (e.g., immune compromised, pregnant woman, newborn of mother with varicella, premature infant, and infant less than 1 year old)

AND

3 - Prescribed immune globulin is being used intramuscularly

Product Name:Intravenous immune globulin (IVIG)

Approval Criteria

1 - Diagnosis of one of the following:

- Pediatric Acute-onset Neuropsychiatric Syndrome (PANS)
- Pediatric Autoimmune Neuropsychiatric Disorders Associated with Streptococcal Infections (PANDAS)

AND

2 - Disease is moderate to severe as defined by distressing symptoms that interfere with daily activities that occupy at least 50 percent (%) of waking hours [75]

AND

3 - Trial and failure, contraindication, or intolerance to one of the following: [76]

- Corticosteroids (e.g., prednisone, dexamethasone, methylprednisolone)
- NSAIDs (e.g., Ibuprofen, naproxen, celecoxib)

AND

4 - Trial and failure, contraindication, or intolerance to two of the following (applies to Alyglo and Asceniv only):

- Bivigam
- Gammagard

- Gammaplex
- Gamunex-C
- Panzyga
- Privigen

AND

5 - Prescribed by or in consultation with a physician who has specialized expertise in managing patients on immune globulin therapy (e.g., immunologist, hematologist, neurologist)

3 . Endnotes

A. Guidelines from the British Committee for Standards in Haematology [11] and the National Comprehensive Cancer Network [16] state that IVIG therapy may be beneficial in patients with recurrent infections. Clinical studies show that IVIG reduces the number of bacterial infections, but not viral or fungal infections. [22]
B. Based on inclusion criteria from Molica et al. [14]
C. According to published data, there appears to be no difference in efficacy among IVIG, plasma exchange, and corticosteroids. [15, 16]
D. A controlled trial indicated that treatment with IVIG beyond three months was associated with a delayed recovery of humoral immunity, and the rate of infections after two years of treatment was increased significantly in IVIG recipients. [23] Centers for Disease Control and Prevention, Infectious Disease Society of America, and American Society of Blood and Marrow Transplantation guidelines recommended routine IVIG use to prevent bacterial infections among BMT recipients with unrelated marrow grafts who experience severe hypogammaglobulinemia (e.g., IgG < 400 mg/dl) within the first 100 days after transplant. [19]
E. The American Academy of Neurology recommends that IVIG is for patients with GBS who require aid to walk within 2 weeks from the onset of neuropathic symptoms. [80]
F. The effectiveness of IVIG for moderate-to-severe but stable myasthenia gravis, or for moderate exacerbations of myasthenia gravis have not been demonstrated in adequately controlled trials. [34] IVIG may be as effective as plasma exchange for patients with acute exacerbations of myasthenia gravis. The indications for the use of IVIG are the same as those for plasma exchange: to produce rapid improvement to help the patient through a difficult period of myasthenic weakness. It has the advantages of not requiring special equipment or large-bore vascular access. [42] The usual dose of immune globulin is 400 mg per kilogram per day for five successive days. The improvement rate after immune globulin treatment, calculated from eight published reports, was 73 percent, but this figure is likely to be biased by selective reporting of positive uncontrolled trials. In patients who respond, improvement begins within four to five days. The effect is temporary but may be sustained for weeks to months, allowing intermittent long-term therapy in patients with otherwise refractory disease.
G. Guidelines from the American Academy of Neurology [87] state that interferon Beta or glatirimer are appropriate treatments for patients who have relapsing-remitting multiple sclerosis. The guidelines state that it is only possible that IVIG reduces the attack rate in

RRMS, and that current evidence suggests IVIG is of little benefit with regard to slowing disease progression.

H. Treatment for CIDP includes corticosteroids such as prednisone, which may be prescribed alone or in combination with immunosuppressant drugs. [41] Plasmapheresis and intravenous immunoglobulin (IVIG) therapy are effective. IVIG may be used even as a first-line therapy. Physiotherapy may improve muscle strength, function and mobility, and minimize the shrinkage of muscles and tendons and distortions of the joints.
I. Subcutaneous formulations of immune globulin are available for the treatment of patients with primary immune deficiency. Subcutaneous infusions may be an alternative for patients with adverse effects to intravenous infusions of immune globulin or with poor venous access. Other advantages include decreased cost of administration, independence from scheduled home nursing visits, better maintenance of intravenous immune globulin trough levels, and a serum IgG profile (smaller variation in the peak and trough IgG concentrations compared to intravenous administration) that is similar to that in a normal population. Disadvantages include more frequent infusions and local reactions. [6]
J. There are good data to show that all immune globulins (IVIG/SCIG) are effective for primary immunodeficiency. There are no data for SCIG for indications other than PI. Efficacy is a class effect for all immune globulins products. It is appropriate to combine all IVIG/SCIG products as they are used interchangeably for PI; can combine all IVIG for other indications. Gamastan S/D (IMIG) has unique indications and should be available on the formulary. [85]
K. IVIG has been used in children with symptomatic human immunodeficiency virus (HIV) infection who are immunosuppressed in association with acquired immunodeficiency syndrome (AIDS) or AIDS-related complex (ARC) in an attempt to control or prevent infections and improve immunologic parameters. Results of studies in adults and children with symptomatic HIV infection indicate that IVIG, used in dosages similar to those used for replacement therapy in patients with primary immunodeficiencies, reduces the incidence of recurrent bacterial infections and sepsis, including upper respiratory tract infections. [86]
L. The ACIP, American Academy of Pediatrics (AAP), Centers for Disease Control (CDC), National Institutes of Health (NIH), HIV Medicine Association of the Infectious Diseases Society of America (IDSA), Pediatric Infectious Diseases Society, and other experts state that HIV-infected infants and children who have hypogammaglobulinemia (IgG less than 400 mg/dL) should receive IVIG (400 mg/kg once every 2-4 weeks) to prevent serious bacterial infections. [86]
M. Per expert consultant regarding MS: IVIG is only used in acute, severe MS. IVIG is used for bad relapses of MS with significant neurological dysfunction when a patient is breaking through their regular maintenance medications. It takes about 3 months to see if there is improvement in MS and one cannot say a patient has failed a medication if they have a breakthrough episode of MS within this 3 month period [67].
N. Per expert consultant regarding multifocal motor neuropathy: the European Federation of Neurological Societies (EFNS) guidelines [69] as outlined on page 344 and in the table are fairly reasonable: 1. Weakness with slowly progressive or stepwise progressive course 2. Asymmetric involvement of two or more nerves 3. Absence of upper motor neuron signs and bulbar signs [68].
O. Per expert consultant regarding MS: there are no data to support the initial length of IVIG treatment in MS. I would suggest 3 months and then reevaluate. An appropriate length of time for reauthorization of IVIG is 12 months. Patients who receive IVIG for RRMS should be in acute exacerbation, should have tried steroids, have documentation of inability to tolerate other disease modifying drugs, as well as show progression of

disease. IVIG should be used 2nd or 3rd line if other injectable disease modifying drugs are not tolerated. Guidelines do not support IVIG as first line treatment for MS [68].

P. Per expert consultant regarding CIDP: It is important to reevaluate a patient after initial treatment. Some patients may need changes in dosing intervals due to wearing off of a dose within 2-3 weeks. Treatment can be lifelong for some patient [68].
Q. Per expert consultant regarding dermatomyositis: It is reasonable to ask a patient to try steroids prior to treatment with IVIG. [68]
R. Per expert consultant regarding MG: IVIG should be used in patients with moderate to severe myasthenia gravis with acute exacerbation. Most MDs favor plasma exchange for maintenance therapy in MG patients. Myasthenic exacerbation = myasthenic crisis. [68]

5 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228439
Guideline Name	Inbrija (levodopa) inhalation powder
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Inbrija (levodopa inhalation powder)
Parkinson's Disease Indicated for the intermittent treatment of OFF episodes in patients with Parkinson's disease treated with carbidopa/levodopa.

2 . Criteria

Product Name:Inbrija	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INBRIJA	LEVODOPA INHAL POWDER CAP 42 MG	73200040000160	Brand

Approval Criteria

1 - Diagnosis of Parkinson's disease

AND

2 - Patient is experiencing intermittent OFF episodes

AND

3 - Patient is receiving Inbrija in combination with carbidopa/levodopa at a maximally tolerated dose

AND

4 - Trial and failure, contraindication or intolerance to two of the following: [A]

- MAO-B Inhibitor (e.g., rasagiline, selegiline)
- Dopamine Agonist (e.g., pramipexole, ropinirole)
- COMT Inhibitor (e.g., entacapone)

AND

5 - Prescribed by or in consultation with a neurologist

Product Name:Inbrija	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INBRIJA	LEVODOPA INHAL POWDER CAP 42 MG	73200040000160	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - Patient is receiving Inbrija in combination with carbidopa/levodopa

3 . Endnotes

A. Primary treatment options for patients experiencing intermittent OFF episodes depends on the severity of the episodes. The easiest options include: shortening the dosing interval of levodopa, advising patient to take levodopa on an empty stomach if possible, or crushing the tablet and ingesting it with carbonated water for more predictable and faster absorption. Following the trial of the above options, entacapone, MAO-B Inhibtors or Dopamine Agonists may be added to the patient's therapy to enhance dopamine levels. [2]

Prior Authorization Guideline

Guideline ID	GL-229120
Guideline Name	Increlex (mecasermin [rDNA origin])
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	4/4/2006
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Increlex (mecasermin [rDNA origin]) injection
Severe Primary IGF-1 deficiency (Primary IGFD) Indicated for the treatment of growth failure in pediatric patients 2 years of age and older with severe primary IGF-1 deficiency (Primary IGFD) or with growth hormone (GH) gene deletion who have developed neutralizing antibodies to GH. Severe Primary IGFD is defined by: height standard deviation score less than or equal to -3.0, basal IGF-1 standard deviation score less than or equal to -3.0, and normal or elevated GH. Limitations of use: Increlex is not a substitute to GH for approved GH indications. Increlex is not indicated for use in patients with secondary forms of IGF-1 deficiency, such as GH deficiency, malnutrition, hypothyroidism, or chronic treatment with pharmacological doses of anti-inflammatory corticosteroids.

2 . Criteria

Product Name:Increlex	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INCRELEX	MECASERMIN INJ 40 MG/4ML (10 MG/ML)	30160045002020	Brand

Approval Criteria

1 - One of the following: [A]

1.1 All of the following:

1.1.1 Diagnosis of severe primary IGF-1 deficiency [3]

AND

1.1.2 Height standard deviation score less than or equal to -3.0

AND

1.1.3 Basal IGF-1 standard deviation score less than or equal to -3.0

AND

1.1.4 Normal or elevated growth hormone

AND

1.1.5 Prescribed by or in consultation with a pediatric endocrinologist

OR

1.2 Both of the following:

1.2.1 Diagnosis of growth hormone (GH) gene deletion in patients who have developed neutralizing antibodies to GH

AND

1.2.2 Prescribed by or in consultation with a pediatric endocrinologist

Notes	NOTE: Documentation of previous height, current height and goal exp ected adult height will be required for renewal. Increlex is not a substitute for GH for approved GH indications.

Product Name:Increlex	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INCRELEX	MECASERMIN INJ 40 MG/4ML (10 MG/ML)	30160045002020	Brand

Approval Criteria

1 - Growth increase of at least 2 cm/year over the previous year of treatment as documented by both of the following: [2, B]

- Previous height and date obtained
- Current height and date obtained

AND

2 - Both of the following:

• Expected adult height is not obtained • Documentation of expected adult height goal	
Notes	NOTE: Increlex is not a substitute for GH for approved GH indications.

3 . Endnotes

A. Growth Hormone Deficiency (GHD) and severe Primary IGF-1 Deficiency (IGFD) are two distinct hormone disorders. Patients with severe Primary IGFD are not GH deficient, and therefore, exogenous GH treatment cannot be expected to resolve the patient's growth deficiency. [1]
B. Typically near-adult height is defined as bone age of 16 years or more for males and 14 years or more for females and a growth rate less than 2 cm/year for 1 year. [2]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228883
Guideline Name	Infliximab – PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Remicade (infliximab), Infliximab, Avsola (infliximab-axxq), Inflectra (infliximab-dyyb), Renflexis (Infliximab-abda)
Rheumatoid Arthritis (RA) Indicated in combination with methotrexate, for reducing signs and symptoms, inhibiting the progression of structural damage, and improving physical function in patients with moderately to severely active rheumatoid arthritis. **Psoriatic Arthritis (PsA)** Indicated for reducing signs and symptoms of active arthritis, inhibiting the progression of structural damage, and improving physical function in patients with psoriatic arthritis. **Plaque Psoriasis (PsO)** Indicated for the treatment of adult patients with chronic severe (i.e., extensive and/or disabling) plaque psoriasis who are candidates for systemic therapy and when other systemic therapies are medically less appropriate. Therapy should only be administered to patients who will be closely monitored and have regular follow-up visits with a physician. **Ankylosing Spondylitis (AS)** Indicated for reducing signs and symptoms in patients with active ankylosing spondylitis.

Crohn's Disease (CD) Indicated for reducing signs and symptoms and inducing and maintaining clinical remission in adult patients with moderately to severely active Crohn's disease who have had an inadequate response to conventional therapy. Also indicated for reducing the number of draining enterocutaneous and rectovaginal fistulas and maintaining fistula closure in adult patients with fistulizing Crohn's disease.

Pediatric Crohn's Disease Indicated for reducing signs and symptoms and inducing and maintaining clinical remission in pediatric patients 6 years of age and older with moderately to severely active Crohn's disease who have had an inadequate response to conventional therapy.

Ulcerative Colitis (UC) Indicated for reducing signs and symptoms, inducing and maintaining clinical remission and mucosal healing, and eliminating corticosteroid use in adult patients with moderately to severely active ulcerative colitis who have had an inadequate response to conventional therapy.

Pediatric Ulcerative Colitis Indicated for reducing signs and symptoms and inducing and maintaining clinical remission in pediatric patients 6 years of age and older with moderately to severely active ulcerative colitis who have had an inadequate response to conventional therapy.

Off Label Uses: Sarcoidosis Has been used for the treatment of refractory sarcoidosis. [5-7]

Drug Name: Zymfentra (infliximab-dyyb) SC injection

Crohn's Disease (CD) Indicated in adults for maintenance treatment of moderately to severely active Crohn's disease following treatment with an infliximab product administered intravenously.

Ulcerative Colitis (UC) Indicated in adults for maintenance treatment of moderately to severely active ulcerative colitis following treatment with an infliximab product administered intravenously.

2 . Criteria

Product Name:Avsola, Inflectra	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active RA

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

- methotrexate
- leflunomide
- sulfasalazine

AND

4 - Used in combination with methotrexate

Product Name:Avsola, Inflectra	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand

AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Avsola, Inflectra	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Diagnosis of active PsA

AND

2 - One of the following [4]:

- Actively inflamed joints
- Dactylitis
- Enthesitis
- Axial disease
- Active skin and/or nail involvement

AND

3 - Prescribed by or in consultation with one of the following:

- Dermatologist
- Rheumatologist

Product Name:Avsola, Inflectra	
Diagnosis	Psoriatic Arthritis (PsA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 4]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, pruritus, inflammation) from baseline
- Reduction in the body surface area (BSA) involvement from baseline

Product Name:Avsola, Inflectra	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Diagnosis of chronic severe (i.e., extensive and/or disabling) plaque psoriasis

AND

2 - One of the following [5]:

- Greater than or equal to 3% body surface area involvement
- Severe scalp psoriasis
- Palmoplantar (i.e., palms, soles), facial, or genital involvement

AND

3 - Minimum duration of a 4-week trial and failure, contraindication, or intolerance to one of the following topical therapies [6]:

- corticosteroids (e.g., betamethasone, clobetasol)
- vitamin D analogs (e.g., calcitriol, calcipotriene)
- tazarotene
- calcineurin inhibitors (e.g., tacrolimus, pimecrolimus)

AND

4 - Prescribed by or in consultation with a dermatologist

Product Name:Avsola, Inflectra	
Diagnosis	Plaque Psoriasis (PsO)
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to infliximab therapy as evidenced by ONE of the following [1, 5]

- Reduction in the body surface area (BSA) involvement from baseline
- Improvement in symptoms (e.g., pruritus, inflammation) from baseline

Product Name:Avsola, Inflectra	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Diagnosis of active ankylosing spondylitis

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of one month trial and failure, contraindication, or intolerance to two different NSAIDs (e.g., ibuprofen, naproxen) at maximally tolerated doses [7]

Product Name:Avsola, Inflectra	
Diagnosis	Ankylosing Spondylitis (AS)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by improvement from baseline for at least one of the following [1, 7]:

- Disease activity (e.g., pain, fatigue, inflammation, stiffness)
- Lab values (erythrocyte sedimentation rate, C-reactive protein level)
- Function
- Axial status (e.g., lumbar spine motion, chest expansion)
- Total active (swollen and tender) joint count

Product Name:Avsola, Inflectra	
Diagnosis	Crohn's Disease (CD) or Fistulizing Crohn's Disease
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - One of the following diagnoses:

- Moderately to severely active Crohn's disease
- Fistulizing Crohn's disease

AND

2 - One of the following [8, 9]:

- Frequent diarrhea and abdominal pain
- At least 10% weight loss
- Complications such as obstruction, fever, abdominal mass
- Abnormal lab values (e.g., C-reactive protein [CRP])
- CD Activity Index (CDAI) greater than 220

AND

3 - Prescribed by or in consultation with a gastroenterologist

AND

4 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies [8, 9]:

- 6-mercaptopurine
- Azathioprine
- Corticosteroids (e.g., prednisone)
- Methotrexate

Product Name:Zymfentra	
Diagnosis	Crohn's Disease (CD)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ZYMFENTRA 2-PEN	INFLIXIMAB-DYYB SOLN AUTO-INJECTOR KIT 120 MG/ML	5250504020F530	Brand
ZYMFENTRA 1-PEN	INFLIXIMAB-DYYB SOLN AUTO-INJECTOR KIT 120 MG/ML	5250504020F530	Brand
ZYMFENTRA 2-SYRINGE	INFLIXIMAB-DYYB SOLN PREFILLED SYRINGE KIT 120 MG/ML	5250504020F830	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - Patient has achieved a clinical response following a minimum of 10 weeks of IV infliximab

AND

3 - One of the following:

3.1 Trial of BOTH of the following:

- Avsola
- Inflectra

OR

3.2 Provider attests that continued IV administration is not appropriate for the patient (e.g., problems with IV access)

AND

4 - Prescribed by or in consultation with a gastroenterologist

Product Name:Avsola, Inflectra, Zymfentra	
Diagnosis	Crohn's Disease (CD) or Fistulizing Crohn's Disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand
ZYMFENTRA 2-PEN	INFLIXIMAB-DYYB SOLN AUTO-INJECTOR KIT 120 MG/ML	5250504020F530	Brand

ZYMFENTRA 2-SYRINGE	INFLIXIMAB-DYYB SOLN PREFILLED SYRINGE KIT 120 MG/ML	5250504020F830	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1, 8, 9]:

- Improvement in intestinal inflammation (e.g., mucosal healing, improvement of lab values [platelet counts, erythrocyte sedimentation rate, C-reactive protein level]) from baseline
- Reversal of high fecal output state

Product Name:Zymfentra	
Diagnosis	Crohn's Disease (CD)
Approval Length	6 month(s)
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
ZYMFENTRA 2-PEN	INFLIXIMAB-DYYB SOLN AUTO-INJECTOR KIT 120 MG/ML	5250504020F530	Brand

ZYMFENTRA 2-SYRINGE	INFLIXIMAB-DYYB SOLN PREFILLED SYRINGE KIT 120 MG/ML	5250504020F830	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active Crohn's disease

AND

2 - Patient has achieved a clinical response following a minimum of 10 weeks of IV infliximab

AND

3 - One of the following:

3.1 Paid claims or submission of medical records (e.g., chart notes) confirming a trial of BOTH of the following:

- Avsola
- Inflectra

OR

3.2 Submission of medical records (e.g., chart notes) confirming the provider attests that continued IV administration is not appropriate for the patient (e.g., problems with IV access)

AND

4 - Prescribed by or in consultation with a gastroenterologist

Product Name:Avsola, Inflectra	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active ulcerative colitis

AND

2 - One of the following [10, 11]:

- Greater than 6 stools per day
- Frequent blood in the stools
- Frequent urgency
- Presence of ulcers
- Abnormal lab values (e.g., hemoglobin, ESR, CRP)
- Dependent on, or refractory to, corticosteroids

AND

3 - Prescribed by or in consultation with a gastroenterologist

AND

4 - Trial and failure, contraindication, or intolerance to one of the following conventional therapies [10, 11]:

- 6-mercaptopurine
- Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)

- Azathioprine
- Corticosteroids (e.g., prednisone)

Product Name:Zymfentra	
Diagnosis	Ulcerative Colitis (UC)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

INFLECTRA	INFLIXIMAB-DYYB FOR IV INJ 100 MG	52505040202120	Brand
AVSOLA	INFLIXIMAB-AXXQ FOR IV INJ 100 MG	52505040132120	Brand

Approval Criteria

1 - Diagnosis of sarcoidosis

AND

2 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Dermatologist
- Ophthalmologist

AND

3 - Trial and failure, contraindication, or intolerance to one corticosteroid (e.g., prednisone)

AND

4 - Trial and failure, contraindication, or intolerance to one immunosuppressant (e.g., methotrexate, cyclophosphamide, or azathioprine)

Product Name:Avsola, Inflectra	
Diagnosis	Sarcoidosis [Off-label] [12-15]

INFLIXIMAB	INFLIXIMAB FOR IV INJ 100 MG	52505040002120	Brand

Approval Criteria

1 - Patient has one of the following diagnoses:

- Rheumatoid arthritis (RA)
- Psoriatic Arthritis (PsA)
- Plaque Psoriasis (PsO)

- Ankylosing Spondylitis (AS)
- Crohn's Disease (CD) or Fistulizing Crohn's Disease
- Ulcerative Colitis (UC)
- Sarcoidosis (off-label)

AND

2 - Paid claims or submission of medical records (e.g., chart notes) confirming a minimum duration of a 6-month trial of BOTH of the following:

- Avsola
- Inflectra

AND

3 - Submission of medical records documenting why the covered products have not been effective

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228666
Guideline Name	Ingrezza (valbenazine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Ingrezza (valbenazine)
Tardive Dyskinesia Indicated for the treatment of adults with tardive dyskinesia. **Chorea associated with Huntington's disease** Indicated for the treatment of adults with chorea associated with Huntington’s disease

2 . Criteria

Product Name:Ingrezza	
Diagnosis	Tardive Dyskinesia
Approval Length	3 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INGREZZA	VALBENAZINE TOSYLATE CAP 40 MG (BASE EQUIV)	62380080200120	Brand
INGREZZA	VALBENAZINE TOSYLATE CAP 80 MG (BASE EQUIV)	62380080200140	Brand

INGREZZA	VALBENAZINE TOSYLATE CAPSULE SPRINKLE 80 MG (BASE EQUIV)	62380080206870	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. Patients were included in the pivotal randomized, double-blind, placebo-controlled trial of Ingrezza if they had moderate to severe tardive dyskinesia as determined by clinical observation (qualitative assessment). [1, 2]
B. Verified with consultant that dose reduction, tapering, or discontinuation of the offending medication is considered first-line treatment for tardive dyskinesia. [4]

Prior Authorization Guideline

Guideline ID	GL-228885
Guideline Name	Inhaled Corticosteroids - ST, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Alvesco (ciclesonide) Inhalation Aerosol
Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in adult and adolescent patients 12 years of age and older. Important Limitations of Use: Alvesco is NOT indicated for the relief of acute bronchospasm or for children under 12 years of age.
Drug Name: ArmonAir Digihaler (fluticasone propionate) Inhalation Powder
Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in patients 12 years of age and older. Limitations of Use: ArmonAir Digihaler is not indicated for the relief of acute bronchospasm.
Drug Name: Asmanex HFA (mometasone furoate) Inhalation Aerosol
Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in patients 5 years of age and older. Important Limitations of Use: Asmanex HFA is NOT indicated for the relief of acute bronchospasm.
Drug Name: Asmanex (mometasone furoate) Inhalation Powder

Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in patients 4 years of age and older. Limitations of Use: Asmanex Twisthaler is NOT indicated for the relief of acute bronchospasm or in children less than 4 years of age.
Drug Name: Flovent (fluticasone propionate aerosol) HFA
Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in adult and pediatric patients aged 4 years and older. Limitations of Use FLOVENT HFA is not indicated for the relief of acute bronchospasm.
Drug Name: Flovent (fluticasone propionate powder) Diskus
Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in patients aged 4 years and older. Important Limitation of Use FLOVENT DISKUS is NOT indicated for the relief of acute bronchospasm.
Drug Name: Pulmicort (budesonide aerosol) Flexhaler
Asthma Indicated for the maintenance treatment of asthma as prophylactic therapy in patients six years of age or older. Limitations of Use: PULMICORT FLEXHALER is NOT indicated for the relief of acute bronchospasm.

ASMANEX HFA	MOMETASONE FUROATE INHAL AEROSOL SUSPENSION 200 MCG/ACT	44400036203230	Brand

Approval Criteria

1 - One of the following:

1.1 Both of the following:

1.1.1 Requested drug is FDA-approved for the condition being treated

AND

1.1.2 Additional requirements listed in the "Indications and Usage" sections of the prescribing information (or package insert) have been met (e.g., first line therapies have been tried and failed, any testing requirements have been met, etc.)

OR

1.2 If requested for an off-label indication, the off-label guideline approval criteria have been met

AND

2 - One of the following:

2.1 Submission of medical records (e.g., chart notes) confirming patient requires a metered dose inhaler used with a spacer device due to one of the following: [A, 9]

- Physical dexterity
- Inspiratory flow
- Cognitive status

OR

2.2 Submission of medical records (e.g., chart notes) or paid claims documenting patient has tried and failed, or has contraindication or intolerance to at least 3 formulary alternatives. If only 1 or only 2 alternatives are available, the patient must have failed or had contraindications or intolerance to all available formulary alternatives

3 . Endnotes

A. Dry powder inhalers are not suitable for those unable to use breath activated devices, such as young children or some elderly patients; pressurized metered dose inhalers with spacers remain essential for such patients. [9]

Prior Authorization Guideline

Guideline ID	GL-228889
Guideline Name	Inlyta (axitinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Inlyta (axitinib)
Advanced Renal Cell Carcinoma Indicated in combination with avelumab or pembrolizumab, for the first-line treatment of patients with advanced renal cell carcinoma (RCC). It is also indicated as a single agent, for the treatment of advanced RCC after failure of one prior systemic therapy.

2 . Criteria

Product Name:Inlyta	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
INLYTA	AXITINIB TAB 1 MG	21335013000320	Brand
INLYTA	AXITINIB TAB 5 MG	21335013000340	Brand

Approval Criteria

1 - Diagnosis of renal cell carcinoma

AND

2 - One of the following:

2.1 Used as first-line treatment in combination with one of the following for clear cell renal cell carcinoma**: [2]

- avelumab*
- pembrolizumab*

OR

2.2 Used after failure of one prior systemic therapy (e.g., chemotherapy) for clear cell renal cell carcinoma** [2]

OR

2.3 One of the following:

2.3.1 Both of the following: [2]

- Used in the treatment of non-clear cell renal cell carcinoma
- Trial and failure, contraindication or intolerance to generic sunitinib

OR

2.3.2 For continuation of prior therapy

Notes	*This product may require prior authorization. ***Criterion is part of FDA-approved label

Prior Authorization Guideline

Guideline ID	GL-228890
Guideline Name	Insomnia Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Edluar (zolpidem tartrate)
Insomnia Indicated for the short-term treatment of insomnia characterized by difficulties with sleep initiation. The clinical trials performed with zolpidem tartrate in support of efficacy were 4-5 weeks in duration with the final formal assessments of sleep latency performed at the end of treatment.
Drug Name: Ambien (zolpidem tartrate)
Insomnia Indicated for the short-term treatment of insomnia characterized by difficulties with sleep initiation.
Drug Name: Ambien CR (zolpidem tartrate)
Insomnia Indicated for the short-term treatment of insomnia characterized by difficulties with sleep onset and/or sleep maintenance.
Drug Name: Quviviq (daridorexant)

Insomnia Indicated for the treatment of insomnia characterized by difficulties with sleep onset and/or sleep maintenance in adults.
Drug Name: Belsomra (suvorexant)
Insomnia Indicated for the treatment of insomnia characterized by difficulties with sleep onset and/or sleep maintenance.
Drug Name: Dayvigo (lemborexant)
Insomnia Indicated for the treatment of adult patients with insomnia, characterized by difficulties with sleep onset and/or sleep maintenance.
Drug Name: Zolpidem tartrate capsule
Insomnia Indicated for the short-term treatment of transient insomnia characterized by difficulties with sleep initiation in adults younger than 65 years of age.

2 . Criteria

Product Name:Ambien, Ambien CR, Brand Zolpidem capsules, Edluar	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
EDLUAR	ZOLPIDEM TARTRATE SL TAB 5 MG	60204080100720	Brand

Product Name:Insulin dosers, cartridges, or pen devices			
Guideline Type	Administrative		

Product Name	Generic Name	GPI	Brand/Generic
Insulin			
Delivery			
System			
pen			
doser			
cartridge			

Approval Criteria

1 - Will be approved, except when excluded as a plan benefit, based on one of the following criteria:

1.1 The patient has visual impairment (unable to use insulin vial and syringe)

OR

1.2 The patient has physical impairment (unable to use insulin vial and syringe)

2 . Revision History

Date	Notes
11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-229122
Guideline Name	Interstitial Lung Disease (ILD) Agents
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	11/4/2014
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Esbriet (pirfenidone)
Idiopathic Pulmonary Fibrosis Indicated for the treatment of idiopathic pulmonary fibrosis (IPF).
Drug Name: Ofev (nintedanib)
Idiopathic Pulmonary Fibrosis Indicated for the treatment of adults with idiopathic pulmonary fibrosis (IPF). **Systemic Sclerosis-associated Interstitial Lung Disease** Indicated to slow the rate of decline in pulmonary function in adult patients with systemic sclerosis-associated interstitial lung disease (SSc-ILD). **Chronic Fibrosing Interstitial Lung Diseases (ILDs) with a Progressive Phenotype**

Indicated for the treatment of chronic fibrosing interstitial lung diseases (ILDs) with a progressive phenotype.

2 . Criteria

Product Name:Brand Esbriet, Generic pirfenidone, Ofev	
Diagnosis	Idiopathic Pulmonary Fibrosis (IPF)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ESBRIET	PIRFENIDONE CAP 267 MG	45550060000120	Brand
OFEV	NINTEDANIB ESYLATE CAP 100 MG (BASE EQUIVALENT)	45554050200120	Brand
OFEV	NINTEDANIB ESYLATE CAP 150 MG (BASE EQUIVALENT)	45554050200130	Brand
ESBRIET	PIRFENIDONE TAB 267 MG	45550060000325	Brand
ESBRIET	PIRFENIDONE TAB 801 MG	45550060000345	Brand
PIRFENIDONE	PIRFENIDONE TAB 267 MG	45550060000325	Generic
PIRFENIDONE	PIRFENIDONE TAB 801 MG	45550060000345	Generic
PIRFENIDONE	PIRFENIDONE TAB 534 MG	45550060000333	Generic
PIRFENIDONE	PIRFENIDONE CAP 267 MG	45550060000120	Generic

Approval Criteria

1 - Diagnosis of idiopathic pulmonary fibrosis (IPF) as documented by both of the following: [3]

1.1 Exclusion of other known causes of interstitial lung disease (ILD) (e.g., domestic and occupational environmental exposures, connective tissue disease, drug toxicity)

AND

1.2 One of the following:

1.2.1 In patients not subjected to surgical lung biopsy, the presence of a usual interstitial pneumonia (UIP) pattern on high-resolution computed tomography (HRCT) revealing IPF or probable IPF

OR

1.2.2 In patients subjected to a lung biopsy, both HRCT and surgical lung biopsy pattern revealing IPF or probable IPF

AND

2 - For brand Esbriet capsules and tablets, trial and failure or intolerance to generic pirfenidone

AND

3 - Prescribed by or in consultation with a pulmonologist

Product Name:Ofev	
Diagnosis	Systemic Sclerosis-associated Interstitial Lung Disease (SSc-ILD)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OFEV	NINTEDANIB ESYLATE CAP 100 MG (BASE EQUIVALENT)	45554050200120	Brand
OFEV	NINTEDANIB ESYLATE CAP 150 MG (BASE EQUIVALENT)	45554050200130	Brand

Approval Criteria

1 - Diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) as documented by the following: [5-6]

1.1 Exclusion of other known causes of interstitial lung disease (ILD) (e.g., domestic and occupational environmental exposures, connective tissue disease, drug toxicity)

AND

1.2 One of the following:

1.2.1 In patients not subjected to surgical lung biopsy, the presence of idiopathic interstitial pneumonia (e.g., fibrotic nonspecific interstitial pneumonia [NSIP], usual interstitial pneumonia [UIP] and centrilobular fibrosis) pattern on high-resolution computed tomography (HRCT) revealing SSc-ILD or probable SSc-ILD

OR

1.2.2 In patients subjected to a lung biopsy, both HRCT and surgical lung biopsy pattern revealing SSc-ILD or probable SSc-ILD

AND

2 - Prescribed by or in consultation with a pulmonologist

Product Name:Ofev	
Diagnosis	Chronic Fibrosing Interstitial Lung Diseases (ILDs) with a Progressive Phenotype
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
OFEV	NINTEDANIB ESYLATE CAP 100 MG (BASE EQUIVALENT)	45554050200120	Brand
OFEV	NINTEDANIB ESYLATE CAP 150 MG (BASE EQUIVALENT)	45554050200130	Brand

Approval Criteria

1 - Diagnosis of chronic fibrosing interstitial lung disease

AND

2 - Patient has a high-resolution computed tomography (HRCT) showing at least 10% of lung volume with fibrotic features

AND

3 - Disease has a progressive phenotype as observed by one of the following:

- Decline of forced vital capacity (FVC)
- Worsening of respiratory symptoms
- Increased extent of fibrosis seen on imaging

AND

4 - Prescribed by or in consultation with a pulmonologist

Product Name:Brand Esbriet, Generic pirfenidone	
Diagnosis	Idiopathic Pulmonary Fibrosis (IPF)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

4 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Iqirvo (elafibranor)

Prior Authorization Guideline

Guideline ID	GL-233283
Guideline Name	Iqirvo (elafibranor)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	8/15/2024
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Iqirvo (elafibranor)
Primary biliary cholangitis (PBC) Indicated for the treatment of primary biliary cholangitis (PBC) in combination with ursodeoxycholic acid (UDCA) in adults who have had an inadequate response to UDCA, or as monotherapy in patients unable to tolerate UDCA. This indication is approved under accelerated approval based on reduction of alkaline phosphatase (ALP). Improvement in survival or prevention of liver decompensation events have not been demonstrated. Continued approval for this indication may be contingent upon verification and description of clinical benefit in confirmatory trial(s). Limitations of Use: Use of Iqirvo is not recommended in patients who have or develop decompensated cirrhosis (e.g., ascites, variceal bleeding, hepatic encephalopathy)

2 . Criteria

Product Name:Iqirvo	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IQIRVO	ELAFIBRANOR TAB 80 MG	52780020000320	Brand

Approval Criteria

1 - Diagnosis of primary biliary cholangitis (PBC) (also known as primary biliary cirrhosis)

AND

2 - One of the following:

2.1 Both of the following:

2.1.1 Patient has failed to achieve an alkaline phosphatase (ALP) level of less than 1.67 times the upper limit of normal (ULN) after at least 12 consecutive months of treatment with ursodeoxycholic acid (UDCA) (e.g., Urso, Urso Forte, ursodiol) [2, A]

AND

2.1.2 Used in combination with ursodeoxycholic acid (UDCA)

OR

2.2 History of contraindication or intolerance to ursodeoxycholic acid (UDCA)

AND

3 - Requested drug will not be used in combination with Ocaliva (obeticholic acid) or Livdelzi (seladelpar)

AND

4 - Prescribed by or in consultation with one of the following:

- Hepatologist
- Gastroenterologist

Product Name:Iqirvo	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IQIRVO	ELAFIBRANOR TAB 80 MG	52780020000320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., ALP level less than 1.67 times ULN, total bilirubin less than or equal to ULN, ALP decrease greater than or equal to 15% from baseline)

AND

2 - Requested drug will not be used in combination with Ocaliva (obeticholic acid) or Livdelzi (seladelpar)

3 . Endnotes

A. Biochemical response should be assessed after 1 year of treatment with UDCA [2]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228442
Guideline Name	Iressa (gefitinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Iressa (gefitinib)
Non-Small Cell Lung Cancer (NSCLC) Indicated for the first-line treatment of patients with metastatic non-small cell lung cancer (NSCLC) whose tumors have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations as detected by an FDA-approved test. Limitation of Use: Safety and efficacy of Iressa have not been established in patients with metastatic NSCLC whose tumors have EGFR mutations other than exon 19 deletions or exon 21 (L858R) substitution mutations.

2 . Criteria

Product Name:Brand Iressa, Generic gefitinib	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IRESSA	GEFITINIB TAB 250 MG	21360030000320	Brand
GEFITINIB	GEFITINIB TAB 250 MG	21360030000320	Generic

Approval Criteria

1 - Diagnosis of metastatic non-small cell lung cancer (NSCLC)

AND

2 - Patient has known active epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations as detected by an U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

3 - Trial and failure, or intolerance to generic gefitinib (Applies to Brand Iressa only)

Product Name:Brand Iressa, Generic gefitinib	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IRESSA	GEFITINIB TAB 250 MG	21360030000320	Brand
GEFITINIB	GEFITINIB TAB 250 MG	21360030000320	Generic

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Trial and failure, or intolerance to generic gefitinib (Applies to Brand Iressa only)

3 . References

1. Iressa Prescribing Information. AstraZeneca Pharmaceuticals LP. Wilmington, DE. February 2023.

Prior Authorization Guideline

Guideline ID	GL-228444
Guideline Name	Iron Products
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Accrufer (ferric maltol)
Iron deficiency Indicated for the treatment of iron deficiency in adults
Drug Name: Feraheme (ferumoxytol injection)
Iron deficiency Indicated for the treatment of iron deficiency anemia (IDA) in adult patients who have intolerance to oral iron or have had unsatisfactory response to oral iron or who have chronic kidney disease (CKD).
Drug Name: Injectafer (ferric carboxymaltose injection)
Iron Deficiency Anemia Indicated for the treatment of iron deficiency anemia (IDA) in adult and pediatric patients 1 year of age and older who have either intolerance to oral iron or an unsatisfactory response to oral iron or adult patients who have non-dialysis dependent chronic kidney disease (CKD). **Iron deficiency** Indicated for the treatment of iron deficiency in adult patients with heart failure and New York Heart Association class II/III to improve exercise capacity.

Drug Name: Monoferric (ferric derisomaltose injection)
Iron deficiency Indicated for the treatment of iron deficiency anemia (IDA) in adult patients who have intolerance to oral iron or have had unsatisfactory response to oral iron or who have non-hemodialysis dependent chronic kidney disease (CKD).

2 . Criteria

Product Name:Accrufer, Brand Feraheme, generic ferumoxytol, Monoferric	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
ACCRUFER	FERRIC MALTOL CAP 30 MG (FE EQUIV)	82300063000120	Brand
MONOFERRIC	FERRIC DERISOMALTOSE (ONE DOSE) IV SOL 1000 MG/10ML (FE EQ)	82300061002030	Brand
FERAHEME	FERUMOXYTOL INJ 510 MG/17ML (30 MG/ML) (ELEMENTAL FE)	82300068002020	Brand
FERUMOXYTOL	FERUMOXYTOL INJ 510 MG/17ML (30 MG/ML) (ELEMENTAL FE)	82300068002020	Generic

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - Trial and failure of a minimum 30-day supply or intolerance to one of the following generics:

- ferrous sulfate
- ferrous gluconate
- ferrous fumarate

Product Name:Injectafer	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic
INJECTAFER	FERRIC CARBOXYMALTOSE IV SOLN 750 MG/15ML (FE EQUIVALENT)	82300062002030	Brand

Approval Criteria

1 - Requested drug is being used for a Food and Drug Administration (FDA)-approved indication

AND

2 - One of the following:

2.1 Trial and failure of a minimum 30-day supply or intolerance to one of the following generics:

- ferrous sulfate
- ferrous gluconate
- ferrous fumarate

OR

2.2 Patient has New York Heart Association class II or III Heart Failure [A]

3 . Endnotes

A. 2022 ACC/AHA guidelines note that oral iron supplementation is not adequate to treat iron deficiency anemia in patients with heart failure so having patients try oral iron supplementation is not clinically appropriate. In patients with heart failure with reduced ejection fraction and iron deficiency with or without anemia, IV iron replacement is reasonable to improve functional status and quality of life. Oral iron supplementation did not demonstrate the same effective compared to IV formulations. [5]

Prior Authorization Guideline

Guideline ID	GL-228669
Guideline Name	Isotretinoin
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Absorica, Absorica LD
Severe recalcitrant nodular acne Indicated for the treatment of severe recalcitrant nodular acne in patients 12 years of age and older. Nodules are inflammatory lesions with a diameter of 5 mm or greater. The nodules may become suppurative or hemorrhagic. “Severe,” by definition, means “many” as opposed to “few or several” nodules. Because of significant adverse reactions associated with its use, isotretinoin should be reserved for patients with multiple severe nodular acne who are unresponsive to conventional therapy, including systemic antibiotics. In addition, isotretinoin is indicated only for those female patients who are not pregnant, because isotreinoin can cause severe birth defects. Limitations of Use: A single course of therapy for 15 to 20 weeks has been shown to result in complete and prolonged remission of disease in many patients. If a second course of therapy is needed, it should not be initiated until at least 8 weeks after completion of the first course, because experience with isotretinoin has shown that patients may continue to improve following treatment with isotretinoin. The optimal interval before retreatment has not been defined for patients who have not completed skeletal growth.

2 . Criteria

Product Name:Brand Absorica, Absorica LD	
Approval Length	5 Months [1-4, 10]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
ABSORICA	ISOTRETINOIN CAP 10 MG	90050013000110	Brand

ABSORICA LD	ISOTRETINOIN MICRONIZED CAP 32 MG	90050013100135	Brand

Approval Criteria

1 - Diagnosis of acne [1, 6-7, D]

AND

2 - One of the following:

2.1 Prescribed by a dermatologist

OR

2.2 Trial and failure, contraindication, or intolerance to an adequate trial (at least 6 weeks) on both of the following conventional therapy regimens:

2.2.1 One topical retinoid or retinoid-like agent [e.g., Retin-A/Retin-A Micro (tretinoin)] [2,4]

AND

2.2.2 Combination therapy with benzoyl peroxide and one of the following: [2-5]

2.2.2.1 Oral antibiotic [e.g., Ery-Tab (erythromycin), Minocin (minocycline)] [1, 4, A]

OR

2.2.2.2 If oral antibiotics are not indicated, a topical antibiotic [e.g., Cleocin-T (clindamycin), erythromycin, BenzaClin (benzoyl peroxide/clindamycin), Benzamycin (benzoyl peroxide/erythromycin)] [2-4]

ABSORICA LD	ISOTRETINOIN MICRONIZED CAP 24 MG	90050013100125	Brand
ABSORICA LD	ISOTRETINOIN MICRONIZED CAP 32 MG	90050013100135	Brand

Approval Criteria

1 - Confirmation that the cumulative dose is less than 150 mg/kg (there is little therapeutic benefit to be gained by increasing the cumulative dose beyond 150 mg/kg) [1, 6, C]*

Notes	Authorization will be given only by clinical pharmacist review for 1 mo nth to allow for titration up to target dose within a treatment cycle (20 weeks). *See background section for dosing regimens

3 . Background

Benefit/Coverage/Program Information

Dosing by Body Weight (based on administration with food):

Body Weight		Daily Dose		
Kg	Lbs	0.5 mg/kg/day	1 mg/kg/day	2 mg/kg/day
40	88	20	40	80
50	110	25	50	100
60	132	30	60	120
70	154	35	70	140
80	176	40	80	160
90	198	45	90	180
100	220	50	100	200

4 . Endnotes

A. Isotretinoin use has been associated with a number of cases of pseudotumor cerebri (benign intracranial hypertension), some of which involved concomitant use of tetracyclines. Concomitant treatment with tetracyclines should therefore be avoided. [1]
B. Experience has shown that patients may continue to improve while off isotretinoin therapy. After a period of 2 months or more 'off therapy', and if warranted by persistent or recurring severe nodular acne, a second course of therapy of isotretinoin may be initiated. [1]
C. According to the AAD, acne experts feel strongly that initial flaring can be decreased with a beginning dose of 0.5 mg/kg/day or less. Lower doses can be used for longer periods of time with a total cumulative dose of 120 to 150 mg/kg. [9]
D. Isotretinoin has been effective in treating mild-to-moderate acne vulgaris in a double-blind, placebo-controlled study (n=127), for acne in a study of 156 patients, and for mild-to-moderate acne vulgaris in a double-blind study (n=268) [11]. Additionally, the American Academy of Dermatology recommends isotretinoin for the treatment of severe nodular acne, and states that it may be appropriate for the treatment of moderate acne that is treatment-resistant or for the management of acne that is producing physical scarring and/or psychosocial distress [9].

Prior Authorization Guideline

Guideline ID	GL-228445
Guideline Name	Iwilfin (eflornithine)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Iwilfin (eflornithine)
High-risk neuroblastoma (HRNB) Indicated to reduce the risk of relapse in adult and pediatric patients with high-risk neuroblastoma (HRNB) who have demonstrated at least a partial response to prior multiagent, multimodality therapy including anti-GD2 immunotherapy.

2 . Criteria

Product Name:Iwilfin	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IWILFIN	EFLORNITHINE HCL TAB 192 MG	21757220300320	Brand

Approval Criteria

1 - Diagnosis of high-risk neuroblastoma (HRNB)

AND

2 - Patient has shown at least a partial response to prior multiagent, multimodality therapy as evidenced by ALL of the following [2]:

- 30% or more decrease in longest diameter of primary site tumor
- No new lesions
- MIBG (or 18F-FDG PET) stable or improved
- At least a 50% reduction in absolute MIBG bone score or a 50% or greater reduction in number of 18F-FDG PET-avid bone lesions

AND

3 - Prior therapy included anti-GD2 immunotherapy (e.g., Unituxin (dinutuximab))

AND

4 - Treatment duration of Iwilfin has not exceeded a total of 24 months during the patient's lifetime

Product Name:Iwilfin	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IWILFIN	EFLORNITHINE HCL TAB 192 MG	21757220300320	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

AND

2 - Treatment duration of Iwilfin has not exceeded a total of 24 months during the patient's lifetime

Izervay (avacincaptad pegol)

Prior Authorization Guideline

Guideline ID	GL-233205
Guideline Name	Izervay (avacincaptad pegol)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/18/2023
P&T Revision Date:	10/16/2024

1 . Indications

Drug Name: Izervay (avacincaptad pegol)
Geographic Atrophy (GA) Indicated for the treatment of geographic atrophy (GA) secondary to age-related macular degeneration (AMD).

2 . Criteria

Product Name:Izervay	
Approval Length	6 months [A, 1]
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IZERVAY	AVACINCAPTAD PEGOL INTRAVITREAL SOLN 2 MG/0.1ML (20 MG/ML)	86456020102020	Brand

Approval Criteria

1 - Diagnosis of geographic atrophy (GA) secondary to age-related macular degeneration

AND

2 - Disease is confirmed by one of the following:

- Fundus photography (e.g. fundus autofluorescence [FAF])
- Optical coherence tomography (OCT)
- Fluorescein angiography

AND

3 - Prescribed by or in consultation with an ophthalmologist experienced in the treatment of retinal diseases

Product Name:Izervay	
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
IZERVAY	AVACINCAPTAD PEGOL INTRAVITREAL SOLN 2 MG/0.1ML (20 MG/ML)	86456020102020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in growth rate of GA lesion)

AND

2 - Patient has not exceeded a total of 12 months treatment per eye [B, 1]

3 . Endnotes

A. In GATHER1 and GATHER2, the mean rate of GA growth (slope) from baseline to Month 12, measured by Fundus Autofluorescence (FAF) was evaluated at 3 time points: baseline, Month 6, and Month 12. [1]
B. The recommended dose for Izervay is 2 mg (0.1 mL of 20 mg/mL solution) administered by intravitreal injection to each affected eye once monthly (approximately 28 ± 7 days) for up to 12 months. [1]

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228897
Guideline Name	Jakafi (ruxolitinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Jakafi (ruxolitinib)
Myelofibrosis Indicated for treatment of intermediate or high-risk myelofibrosis, including primary myelofibrosis, post-polycythemia vera myelofibrosis, and post-essential thrombocythemia myelofibrosis in adults. **Polycythemia Vera** Indicated for treatment of polycythemia vera (PV) in adults who have had an inadequate response to or are intolerant of hydroxyurea. **Acute Graft Versus Host Disease** Indicated for treatment of steroid-refractory acute graft-versus-host disease (GVHD) in adult and pediatric patients 12 years and older. **Chronic Graft Versus Host Disease** Indicated for treatment of chronic graft-versus-host disease (cGVHD) after failure of one or two lines of systemic therapy in adult and pediatric patients 12 years and older.

2 . Criteria

Product Name:Jakafi	
Diagnosis	Myelofibrosis
Approval Length	6 Months [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JAKAFI	RUXOLITINIB PHOSPHATE TAB 5 MG (BASE EQUIVALENT)	21537560200310	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	21537560200320	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 15 MG (BASE EQUIVALENT)	21537560200325	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 20 MG (BASE EQUIVALENT)	21537560200330	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 25 MG (BASE EQUIVALENT)	21537560200335	Brand

Approval Criteria

1 - One of the following diagnoses:

- Primary myelofibrosis
- Post-polycythemia vera myelofibrosis
- Post-essential thrombocythemia myelofibrosis

Product Name:Jakafi	
Diagnosis	Polycythemia Vera
Approval Length	8 Months [B]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

JAKAFI	RUXOLITINIB PHOSPHATE TAB 5 MG (BASE EQUIVALENT)	21537560200310	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	21537560200320	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 15 MG (BASE EQUIVALENT)	21537560200325	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 20 MG (BASE EQUIVALENT)	21537560200330	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 25 MG (BASE EQUIVALENT)	21537560200335	Brand

Approval Criteria

1 - Diagnosis of polycythemia vera [1]

AND

2 - Trial and failure, contraindication, or intolerance to hydroxyurea [1]

Product Name:Jakafi	
Diagnosis	Myelofibrosis, Polycythemia Vera
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JAKAFI	RUXOLITINIB PHOSPHATE TAB 5 MG (BASE EQUIVALENT)	21537560200310	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	21537560200320	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 15 MG (BASE EQUIVALENT)	21537560200325	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 20 MG (BASE EQUIVALENT)	21537560200330	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 25 MG (BASE EQUIVALENT)	21537560200335	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., spleen volume reduction, symptom improvement, hematocrit control)

Notes	If the member does not meet the medical necessity reauthorization criteria requirements, a denial should be issued and a 2-month authorization should be issued one time for Jakafi gradual therapy discontinuation.

Product Name:Jakafi	
Diagnosis	Acute Graft Versus Host Disease
Approval Length	6 Month(s) [C]
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JAKAFI	RUXOLITINIB PHOSPHATE TAB 5 MG (BASE EQUIVALENT)	21537560200310	Brand

JAKAFI	RUXOLITINIB PHOSPHATE TAB 15 MG (BASE EQUIVALENT)	21537560200325	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 20 MG (BASE EQUIVALENT)	21537560200330	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 25 MG (BASE EQUIVALENT)	21537560200335	Brand

Approval Criteria

1 - Diagnosis of acute graft-versus-host disease

AND

2 - Disease is steroid-refractory

AND

3 - Patient is 12 years of age or older

Product Name:Jakafi	
Diagnosis	Chronic Graft Versus Host Disease
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JAKAFI	RUXOLITINIB PHOSPHATE TAB 5 MG (BASE EQUIVALENT)	21537560200310	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	21537560200320	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 15 MG (BASE EQUIVALENT)	21537560200325	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 20 MG (BASE EQUIVALENT)	21537560200330	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 25 MG (BASE EQUIVALENT)	21537560200335	Brand

Approval Criteria

1 - Diagnosis of chronic graft-versus-host disease

AND

2 - Patient is 12 years of age or older

AND

3 - Trial and failure of at least one or more lines of systemic therapy (e.g., corticosteroids, mycophenolate, etc.)

Product Name:Jakafi	
Diagnosis	Chronic Graft Versus Host Disease
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JAKAFI	RUXOLITINIB PHOSPHATE TAB 5 MG (BASE EQUIVALENT)	21537560200310	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	21537560200320	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 15 MG (BASE EQUIVALENT)	21537560200325	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 20 MG (BASE EQUIVALENT)	21537560200330	Brand
JAKAFI	RUXOLITINIB PHOSPHATE TAB 25 MG (BASE EQUIVALENT)	21537560200335	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

3 . Endnotes

A. Jakafi should be discontinued after 6 months if there is no spleen size reduction or symptom improvement since initiation of therapy. [1]
B. The initial authorization duration of 8 months is based on clinical trials (primary endpoint of hematocrit control and spleen volume reduction was evaluated at 32 weeks). [1]
C. Authorization duration of 6 months is based median time from response to death or need for new therapy for acute GVHD in clinical trials (173 days). Additionally, tapering of Jakafi may be considered after 6 months of treatment in patients with response who have discontinued therapeutic doses of corticosteroids. [1]

Prior Authorization Guideline

Guideline ID	GL-228448
Guideline Name	Jaypirca (pirtobrutinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Jaypirca (pirtobrutinib)
Mantle Cell Lymphoma (MCL) Indicated for the treatment of adult patients with relapsed or refractory mantle cell lymphoma (MCL) after at least two lines of systemic therapy, including a Bruton Tyrosine Kinase (BTK) inhibitor. This indication is approved under accelerated approval based on response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial. **Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma (CLL/SLL)** Indicated for the treatment of adult patients with chronic lymphocytic leukemia or small lymphocytic lymphoma (CLL/SLL) who have received at least two prior lines of therapy, including a BTK inhibitor and a BCL-2 inhibitor.

2 . Criteria

Product Name:Jaypirca	
Diagnosis	Mantle Cell Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JAYPIRCA	PIRTOBRUTINIB TAB 50 MG	21532165000320	Brand
JAYPIRCA	PIRTOBRUTINIB TAB 100 MG	21532165000330	Brand

Approval Criteria

1 - Diagnosis of mantle cell lymphoma (MCL)

AND

2 - Disease is one of the following:

- Relapsed
- Refractory

AND

3 - Patient has received at least two prior therapies for MCL, one of which is a Bruton Tyrosine Kinase (BTK) inhibitor therapy [e.g., Calquence (acalabrutinib), Brukinsa (zanubrutinib)] [1, 2]

Product Name:Jaypirca	
Diagnosis	Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

JESDUVROQ	DAPRODUSTAT TAB 6 MG	82402520000325	Brand
JESDUVROQ	DAPRODUSTAT TAB 8 MG	82402520000330	Brand

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Patient has been on dialysis for at least 4 months

AND

3 - Adequate iron stores confirmed by both of the following: [A-B, 1, 4]

- Patient's ferritin level is greater than 100mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - Hemoglobin level less than 11 g/dL [E-G, 1,3,9]

AND

5 - Trial and failure, contraindication or intolerance to one of the following:

- Retacrit
- Procrit

- Aranesp

AND

6 - Prescribed by or in consultation with one of the following:

- hematologist
- nephrologist

AND

7 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

Product Name:Jesduvroq	
Approval Length	12 month(s)

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Submission of medical records (e.g., chart notes) confirming patient has been on dialysis for at least 4 months

AND

3 - Submission of medical records (e.g., chart notes) confirming adequate iron stores by both of the following: [A-B, 1, 4]

- Patient's ferritin level is greater than 100mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - Submission of medical records (e.g., chart notes) confirming hemoglobin level less than 11 g/dL [E-G, 1,3,9]

AND

5 - One of the following:

5.1 Submission of medical records (e.g., chart notes) or paid claims confirming a minimum 12 -week trial and failure to one of the following: [I, 10-12]

- Retacrit
- Procrit
- Aranesp

OR

5.2 Submission of medical records (e.g., chart notes) confirming contraindication or intolerance to ALL of the following:

- Retacrit
- Procrit

- Aranesp

AND

6 - Prescribed by or in consultation with one of the following:

- hematologist
- nephrologist

AND

7 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

Product Name:Jesduvroq	
Approval Length	12 month(s)
Therapy Stage	Reauthorization

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., increase in hemoglobin)

AND

2 - Submission of medical records (e.g., chart notes) confirming hemoglobin level does not exceed 12g/dL [H, 1]

AND

3 - Submission of medical records (e.g., chart notes) confirming adequate iron stores by both of the following:

- Patient's ferritin level is greater than 100mcg/L
- Patient's transferrin saturation (TSAT) is greater than 20%

AND

4 - One of the following:

4.1 Submission of medical records (e.g., chart notes) or paid claims confirming a minimum 12 -week trial and failure to one of the following: [I, 10-12]

- Retacrit
- Procrit
- Aranesp

OR

4.2 Submission of medical records (e.g., chart notes) confirming contraindication or intolerance to ALL of the following:

- Retacrit
- Procrit
- Aranesp

AND

5 - Patient is not on concurrent treatment with an erythropoeitin stimulating agent [ESA] (e.g., Aranesp, Epogen, Procrit)

3 . Endnotes

A. Evaluate the iron status in all patients before and during treatment with Jesduvroq. Administer supplemental iron therapy when serum ferritin is less than 100 ng/ml or when serum transferrin saturation is less than 20%. [1]
B. Clinical Trials Exclusion criteria: Ferritin less than or equal to 100mcg/L and transferrin saturation (TSAT) less than or equal to 20% at screening [4]
C. In this randomized, open-label, phase 3 trial, we assigned patients with CKD who were undergoing dialysis and who had a hemoglobin level of 8.0 to 11.5 g per deciliter to receive an oral HIF-PHI (daprodustat) or an injectable ESA (epoetin alfa if they were receiving hemodialysis or darbepoetin alfa if they were receiving peritoneal dialysis). [2]
D. The efficacy and safety of Jesduvroq were evaluated as co-primary endpoints: the mean change in hemoglobin from baseline to the Evaluation Period (Weeks 28 to 52) [1]
E. Ascend-D trial the target hemoglobin range was 10-11g/dL [3]
F. Do not target a hemoglobin higher than 11 g/dL [1]
G. Using ESAs to target a hemoglobin level of greater than 11 g/dL increases the risk of serious adverse cardiovascular events and has not been shown to provide additional patient benefit [9]
H. If hemoglobin exceeds 12 g/dL, interrupt treatment with Jesduvroq [1]
I. Do not increase the dose more frequently than once every 4 weeks. For patients who do not respond adequately, if the hemoglobin has not increased by more than 1 g/dL after 4 weeks of therapy, increase the dose by 25%. For patients who do not respond adequately over a 12-week escalation period, increasing the Retacrit dose further is unlikely to improve response and may increase risks. Use the lowest dose that will maintain a hemoglobin level sufficient to reduce the need for RBC transfusions. Evaluate other causes of anemia. Discontinue Retacrit if responsiveness does not improve. [10-12]

5 . Revision History

Date	Notes
1/9/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228449
Guideline Name	Jevtana (cabazitaxel)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Jevtana (cabazitaxel)
Prostate Cancer Indicated in combination with prednisone for the treatment of patients with metastatic castration-resistant prostate cancer previously treated with a docetaxel-containing treatment regimen.

2 . Criteria

Product Name:Jevtana	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JEVTANA	CABAZITAXEL INJ 60 MG/1.5ML (FOR IV INFUSION)	21500003002020	Brand

Approval Criteria

1 - All of the following:

1.1 Diagnosis of metastatic castration-resistant prostate cancer

AND

1.2 Used in combination with prednisone

AND

1.3 Patient has been previously treated with a docetaxel-containing regimen

Product Name:Jevtana	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JEVTANA	CABAZITAXEL INJ 60 MG/1.5ML (FOR IV INFUSION)	21500003002020	Brand

Approval Criteria

1 - Patient does not show evidence of progressive disease

3 . References

1. Jevtana Prescribing Information. Sanofi-Aventis U.S. LLC, Bridgewater, NJ. July 2023.

Prior Authorization Guideline

Guideline ID	GL-233268
Guideline Name	Juxtapid (lomitapide)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	2/19/2013
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Juxtapid (lomitapide)
Homozygous familial hypercholesterolemia (HoFH) Indicated as an adjunct to a low-fat diet and other lipid-lowering treatments, including LDL apheresis where available, to reduce low-density lipoprotein cholesterol (LDL-C), total cholesterol (TC), apolipoprotein B (apo B), and non-high-density lipoprotein cholesterol (non-HDL-C) in patients with homozygous familial hypercholesterolemia (HoFH). Limitations of use: (1) The safety and effectiveness of Juxtapid have not been established in patients with hypercholesterolemia who do not have HoFH, including those with heterozygous familial hypercholesterolemia (HeFH). (2) The effect of Juxtapid on cardiovascular morbidity and mortality has not been determined.

2 . Criteria

Product Name:Juxtapid	
Approval Length	6 Months [C]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JUXTAPID	LOMITAPIDE MESYLATE CAP 5 MG (BASE EQUIV)	39480050200120	Brand
JUXTAPID	LOMITAPIDE MESYLATE CAP 10 MG (BASE EQUIV)	39480050200130	Brand
JUXTAPID	LOMITAPIDE MESYLATE CAP 20 MG (BASE EQUIV)	39480050200140	Brand
JUXTAPID	LOMITAPIDE MESYLATE CAP 30 MG (BASE EQUIV)	39480050200150	Brand

Approval Criteria

1 - Diagnosis of homozygous familial hypercholesterolemia (HoFH) as confirmed by one of the following: [1-3]

1.1 Genetic confirmation of 2 mutations in the LDL receptor, ApoB, PCSK9, or LDL receptor adaptor protein 1 (i.e., LDLRAP1 or ARH)

OR

1.2 Both of the following:

1.2.1 Untreated LDL-C greater than 400 mg/dL

AND

1.2.2 One of the following:

- Xanthoma before 10 years of age
- Evidence of heterozygous familial hypercholesterolemia (HeFH) in both parents

AND

2 - One of the following:

2.1 Patient is receiving other lipid-lowering therapy (e.g., statin, ezetimibe) [A]

OR

2.2 Patient has an inability to take other lipid-lowering therapy (e.g., statin, ezetimibe)

AND

3 - Trial and failure, contraindication, or intolerance to Repatha therapy

AND

4 - Prescribed by or in consultation with one of the following:

- Cardiologist
- Endocrinologist
- Hepatologist

AND

5 - Not used in combination with a proprotein convertase subtilisin/kexin type 9 (PCSK9) inhibitor

Product Name:Juxtapid	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
JUXTAPID	LOMITAPIDE MESYLATE CAP 5 MG (BASE EQUIV)	39480050200120	Brand
JUXTAPID	LOMITAPIDE MESYLATE CAP 10 MG (BASE EQUIV)	39480050200130	Brand
JUXTAPID	LOMITAPIDE MESYLATE CAP 20 MG (BASE EQUIV)	39480050200140	Brand
JUXTAPID	LOMITAPIDE MESYLATE CAP 30 MG (BASE EQUIV)	39480050200150	Brand

Approval Criteria

1 - One of the following:

1.1 Patient continues to receive other lipid-lowering therapy (e.g., statin, ezetimibe)

OR

1.2 Patient has an inability to take other lipid-lowering therapy (e.g., statin, ezetimibe)

AND

2 - Reduction in LDL-C from baseline while on therapy

AND

3 - Trial and failure, contraindication, or intolerance to Repatha therapy

AND

4 - Prescribed by or in consultation with one of the following:

- Cardiologist
- Endocrinologist
- Hepatologist

AND

5 - Not used in combination with a proprotein convertase subtilisin/kexin type 9 (PCSK9) inhibitor

3 . Endnotes

A. IMPROVE-IT was a prospective RCT evaluating the addition of ezetimibe to simvastatin 40 mg in a high-risk patient population for secondary prevention over 7 years. The addition of ezetimibe significantly reduced ASCVD events, albeit very modestly (HR 0.936; 95% CI 0.887, 0.988; p = 0.016; number needed to treat [NNT] = 50). [5] The effect of lomitapide on cardiovascular morbidity and mortality has not been determined. [1]
B. Lipid specialists are physicians certified by the American Board of Clinical Lipidology (ABCL) or the Accreditation Council for Clinical Lipidology (ACCL). [6, 7] In the opinion of the ACC expert consensus writing committee, lomitapide is best administered under the care of a lipid specialist. [8]
C. Per the 2018 ACC/AHA national treatment guidelines, adherence, response to therapy, and adverse effects should be monitored within 4 -12 weeks following LDL-C lowering medication initiation or dose adjustment, repeated every 3 to 12 months as needed. [4]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-228899
Guideline Name	Kalydeco (ivacaftor)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Kalydeco (ivacaftor)
Cystic fibrosis Indicated for the treatment of cystic fibrosis (CF) in patients age 1 month and older who have at least one mutation in the cystic fibrosis transmembrane conductance regulator (CFTR) gene that is responsive to ivacaftor potentiation based on clinical and/or in vitro assay data. If the patient's genotype is unknown, an FDA-cleared CF mutation test should be used to detect the presence of a CFTR mutation followed by verification with bi-directional sequencing when recommended by the mutation test instructions for use.

2 . Criteria

Product Name:Kalydeco	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KALYDECO	IVACAFTOR TAB 150 MG	45302030000320	Brand
KALYDECO	IVACAFTOR PACKET 50 MG	45302030003020	Brand
KALYDECO	IVACAFTOR PACKET 75 MG	45302030003030	Brand
KALYDECO	IVACAFTOR PACKET 13.4 MG	45302030003005	Brand
KALYDECO	IVACAFTOR PACKET 25 MG	45302030003010	Brand
KALYDECO	IVACAFTOR PACKET 5.8 MG	45302030003002	Brand

Approval Criteria

1 - Diagnosis of cystic fibrosis (CF)

AND

2 - Patient has at least one mutation in the cystic fibrosis transmembrane conductance regulator (CFTR) gene that is responsive to ivacaftor potentiation based on clinical and/or in vitro assay data* as detected by an FDA-cleared cystic fibrosis mutation test or a test performed at a Clinical Laboratory Improvement Amendments (CLIA)-approved facility

AND

3 - Patient is 1 month of age or older

AND

4 - Prescribed by or in consultation with one of the following:

- Specialist affiliated with a CF care center
- Pulmonologist

Notes	*Please consult Background section for table of CFTR gene mutations responsive to Kalydeco.

Product Name:Kalydeco	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KALYDECO	IVACAFTOR TAB 150 MG	45302030000320	Brand
KALYDECO	IVACAFTOR PACKET 50 MG	45302030003020	Brand
KALYDECO	IVACAFTOR PACKET 75 MG	45302030003030	Brand
KALYDECO	IVACAFTOR PACKET 25 MG	45302030003010	Brand
KALYDECO	IVACAFTOR PACKET 13.4 MG	45302030003005	Brand
KALYDECO	IVACAFTOR PACKET 5.8 MG	45302030003002	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response (i.e., improvement in lung function [percent predicted forced expiratory volume in one second {PPFEV1}], decreased number of pulmonary exacerbations) to therapy [A]

3 . Background

Clinical Practice Guidelines

CFTR Gene Mutations that are Responsive to Kalydeco [1]

*Intent of table is to provide a quick reference; PA team members should still review at point of request for clinical appropriateness as off label support continuously evolves. [Last Reviewed: 1/24/24]

11/19/2024	Bulk Copy. CM 11.19.24

Prior Authorization Guideline

Guideline ID	GL-228671
Guideline Name	Kanuma (sebelipase alfa)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Kanuma (sebelipase alfa)
Lysosomal Acid Lipase (LAL) deficiency Indicated for the treatment of patients with a diagnosis of Lysosomal Acid Lipase (LAL) deficiency.

2 . Criteria

Product Name:Kanuma	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KANUMA	SEBELIPASE ALFA IV SOLN 20 MG/10ML (2 MG/ML)	30906360002020	Brand

Approval Criteria

1 - Diagnosis of lysosomal acid lipase deficiency (LAL-D, Wolman Disease, Cholesteryl ester storage disease) [B]

AND

2 - Diagnosis was confirmed by one of the following: [A]

2.1 Enzymatic blood test (e.g., dried blood spot test) demonstrating a deficiency of LAL enzyme activity

OR

2.2 Genetic testing for mutations in the lipase A, lysosomal acid type (LIPA) gene

AND

3 - Prescribed by or in consultation with one of the following:

- A specialist experienced in the treatment of inborn errors of metabolism
- Gastroenterologist
- Lipidologist

Product Name:Kanuma	
Approval Length	24 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

KANUMA	SEBELIPASE ALFA IV SOLN 20 MG/10ML (2 MG/ML)	30906360002020	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., reduction in LDL, triglycerides, AST or ALT, increase in HDL, reduction in liver fat content)

AND

2 - Prescribed by or in consultation with one of the following:

- A specialist experienced in the treatment of inborn errors of metabolism
- Gastroenterologist
- Lipidologist

3 . Endnotes

A. Due to similar clinical presentations, LAL-D is often misdiagnosed as familial defective apolipoprotein B (ApoB) deficiency, heterozygous familial hypercholesterolemia (HeFH), familial combined hyperlipidemia (FCH), or polygenic hypercholesterolaemia [3]. A diagnosis of LAL-D can be confirmed by identification of a LIPA mutation or a deficient LAL enzyme in peripheral blood leukocytes, fibroblasts, or dried blood spots. A biopsy and/or radiographic findings may help support a LAL-D diagnosis, however these are not considered diagnostic. [2,3]
B. LAL deficiency is sub-classified as Wolman disease in infants and cholesteryl ester storage disease (CESD) in children and adults. [4]

Kerendia (finerenone)

Prior Authorization Guideline

Guideline ID	GL-228451
Guideline Name	Kerendia (finerenone)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Kerendia (finerenone)
Chronic Kidney Disease Associated with Type 2 Diabetes Indicated to reduce the risk of sustained eGFR decline, end-stage kidney disease, cardiovascular death, non-fatal myocardial infarction, and hospitalization for heart failure in adult patients with chronic kidney disease (CKD) associated with type 2 diabetes (T2D).

2 . Criteria

Product Name:Kerendia	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KERENDIA	FINERENONE TAB 10 MG	30354030000310	Brand
KERENDIA	FINERENONE TAB 20 MG	30354030000320	Brand

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD) associated with type 2 diabetes (T2D)

AND

2 - Urine albumin-to-creatinine ratio (UACR) greater than or equal to 30 mg/g

AND

3 - Estimated glomerular filtration rate (eGFR) greater than or equal to 25 mL/min/1.73 m2

AND

4 - Serum potassium level less than or equal to 5.0 mEq/L prior to initiating treatment

AND

5 - One of the following:

5.1 Minimum 30-day supply trial of a maximally tolerated dose and will continue therapy with one of the following [2]:

- Generic angiotensin-converting enzyme (ACE) inhibitor (e.g., benazepril, lisinopril)
- Generic angiotensin II receptor blocker (ARB) (e.g., losartan, valsartan)

OR

5.2 Patient has a contraindication or intolerance to ACE inhibitors and ARBs

AND

6 - One of the following:

6.1 Patient is on a stable dose and will continue therapy with a sodium-glucose cotransporter-2 (SGLT2) inhibitor (e.g., Farxiga [dapagliflozin], Jardiance [empagliflozin])

OR

6.2 Patient has a contraindication or intolerance to an SGLT2 inhibitor (e.g., Farxiga [dapagliflozin], Jardiance [empagliflozin])

Product Name:Kerendia	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KERENDIA	FINERENONE TAB 10 MG	30354030000310	Brand
KERENDIA	FINERENONE TAB 20 MG	30354030000320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy

AND

2 - One of the following:

2.1 Patient continues to be on a maximally tolerated dose of ACE inhibitor or ARB

OR

2.2 Patient has a contraindication or intolerance to ACE inhibitors and ARBs

AND

3 - One of the following:

3.1 Patient continues to be on an SGLT2 inhibitor (e.g., Farxiga [dapagliflozin], Jardiance [empagliflozin])

OR

3.2 Patient has a contraindication or intolerance to an SGLT2 inhibitor (e.g., Farxiga [dapagliflozin], Jardiance [empagliflozin])

Prior Authorization Guideline

Guideline ID	GL-228611
Guideline Name	Kevzara (sarilumab)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Kevzara (sarilumab)
Rheumatoid Arthritis (RA) Indicated for treatment of adult patients with moderately to severely active rheumatoid arthritis (RA) who have had an inadequate response or intolerance to one or more disease-modifying antirheumatic drugs (DMARDs). **Polyarticular Juvenile Idiopathic Arthritis (PJIA)** Indicated for treatment of active polyarticular juvenile idiopathic arthritis (PJIA) in patients who weigh 63 kg or greater. **Polymyalgia Rheumatica (PMR)** Indicated for treatment of adult patients with polymyalgia rheumatica who have had an inadequate response to corticosteroids or who cannot tolerate corticosteroid taper.

2 . Criteria

Product Name:Kevzara	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KEVZARA	SARILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/1.14ML	6650006000E520	Brand
KEVZARA	SARILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	6650006000E530	Brand
KEVZARA	SARILUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 150 MG/1.14ML	6650006000D520	Brand
KEVZARA	SARILUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 200 MG/1.14ML	6650006000D530	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis (RA)

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

- methotrexate
- leflunomide
- sulfasalazine

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

- Cimzia (certolizumab pegol)
- Enbrel (etanercept)
- One formulary adalimumab product
- Simponi (golimumab)
- Rinvoq (upadacitinib)
- Xeljanz/XR (tofacitinib/ER)

AND

4.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

- Actemra (tocilizumab)
- Orencia (abatacept)

OR

4.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

Notes	*Includes attestation that a total of two TNF inhibitors have already be en tried in the past, and the patient should not be made to try a third T NF inhibitor. ** For review process only: Refer to the table in the Background sectio n for carrier-specific formulary adalimumab products

Product Name:Kevzara	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KEVZARA	SARILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/1.14ML	6650006000E520	Brand

KEVZARA	SARILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 200 MG/1.14ML	6650006000E530	Brand
KEVZARA	SARILUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 150 MG/1.14ML	6650006000D520	Brand
KEVZARA	SARILUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 200 MG/1.14ML	6650006000D530	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by at least one of the following [1-3]:

- Reduction in the total active (swollen and tender) joint count from baseline
- Improvement in symptoms (e.g., pain, stiffness, inflammation) from baseline

Product Name:Kevzara	
Diagnosis	Polyarticular Juvenile Idiopathic Arthritis (PJIA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KEVZARA	SARILUMAB SUBCUTANEOUS SOLN PREFILLED SYRINGE 150 MG/1.14ML	6650006000E520	Brand

KEVZARA	SARILUMAB SUBCUTANEOUS SOLUTION AUTO-INJECTOR 200 MG/1.14ML	6650006000D530	Brand

Approval Criteria

1 - Diagnosis of active polyarticular juvenile idiopathic arthritis (PJIA)

AND

2 - Patient weighs at least 63 kg

AND

3 - Prescribed by or in consultation with a rheumatologist

AND

4 - Minimum duration of a 6-week trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [4]:

- leflunomide
- methotrexate

AND

5 - One of the following:

5.1 Both of the following:

5.1.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

- Enbrel (etanercept)
- One formulary adalimumab product
- Rinvoq/LQ (upadacitinib)
- Xeljanz (tofacitinib)

AND

5.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

- Actemra (tocilizumab)
- Orencia (abatacept)

OR

5.2 For continuation of prior therapy, defined as no more than a 45-day gap in therapy

Notes	*Includes attestation that a total of two TNF inhibitors have already been tried in the past, and the patient should not be made to try a third TNF inhibitor. ** For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products

Prior Authorization Guideline

Guideline ID	GL-233389
Guideline Name	Khapzory (levoleucovorin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	4/1/2025
P&T Approval Date:	1/15/2020
P&T Revision Date:	1/15/2025

1 . Indications

Drug Name: Khapzory (levoleucovorin)
Rescue After High-Dose Methotrexate Therapy Indicated for rescue after high-dose methotrexate therapy in adult and pediatric patients with osteosarcoma. Limitations of use: Khapzory is not indicated for the treatment of pernicious anemia and megaloblastic anemia secondary to lack of vitamin B12 because of the risk of progression of neurologic manifestations despite hematologic remission. **Overdosage of Folic Acid Antagonists or Impaired Methotrexate Elimination** Indicated for diminishing the toxicity associated with overdosage of folic acid antagonists or impaired methotrexate elimination adult and pediatric patients. Limitations of use: Khapzory is not indicated for the treatment of pernicious anemia and megaloblastic anemia secondary to lack of vitamin B12 because of the risk of progression of neurologic manifestations despite hematologic remission. **Metastatic Colorectal Cancer** Indicated for the treatment of adults with metastatic colorectal cancer in combination with fluorouracil. Limitations of use: Khapzory is not indicated for the

treatment of pernicious anemia and megaloblastic anemia secondary to lack of vitamin B12 because of the risk of progression of neurologic manifestations despite hematologic remission.

2 . Criteria

Product Name:Khapzory	
Approval Length	12 month(s)
Guideline Type	Step Therapy

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228614
Guideline Name	Kineret (anakinra)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Kineret (anakinra)
Rheumatoid Arthritis (RA) Indicated for the reduction in signs and symptoms and slowing the progression of structural damage in moderately to severely active rheumatoid arthritis (RA), in patients 18 years of age or older who have failed 1 or more disease modifying antirheumatic drugs (DMARDs). Kineret can be used alone or in combination with DMARDs other than tumor necrosis factor (TNF) blocking agents. **Cryopyrin-Associated Periodic Syndromes (CAPS): Neonatal-Onset Multisystem Inflammatory Disease (NOMID) [A]** Indicated for the treatment of Neonatal-Onset Multisystem Inflammatory Disease (NOMID). **Deficiency of Interleukin-1 Receptor Antagonist (DIRA)** Indicated for the treatment of Deficiency of Interleukin-1 Receptor Antagonist (DIRA). **Off Label Uses: Systemic Juvenile Idiopathic Arthritis (SJIA)** Has been used for the treatment of systemic juvenile idiopathic arthritis. [7]

2 . Criteria

Product Name:Kineret	
Diagnosis	Rheumatoid Arthritis (RA)
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KINERET	ANAKINRA SUBCUTANEOUS SOLN PREFILLED SYRINGE 100 MG/0.67ML	6626001000E520	Brand

Approval Criteria

1 - Diagnosis of moderately to severely active rheumatoid arthritis (RA)

AND

2 - Prescribed by or in consultation with a rheumatologist

AND

3 - Minimum duration of a 3-month trial and failure, contraindication, or intolerance to one of the following conventional therapies at maximally tolerated doses [2, 3]:

- methotrexate
- leflunomide
- sulfasalazine

AND

4 - One of the following:

4.1 All of the following:

4.1.1 Trial and failure, contraindication, or intolerance to TWO of the following, or attestation demonstrating a trial may be inappropriate*

- Cimzia (certolizumab pegol)
- Enbrel (etanercept)
- One formulary adalimumab product
- Rinvoq (upadacitinib)
- Simponi (golimumab)
- Xeljanz (tofacitinib) or Xeljanz XR (tofacitinib ER)

AND

4.1.2 Trial and failure, contraindication, or intolerance to BOTH of the following:

- Actemra (tocilizumab)
- Orencia (abatacept)

OR

4.2 For continuation of prior Kineret therapy, defined as no more than a 45-day gap in therapy

Notes	*Includes attestation that a total of two TNF inhibitors have already been tried in the past, and the patient should not be made to try a third TNF inhibitor. ** For review process only: Refer to the table in the Background section for carrier-specific formulary adalimumab products

4 . Endnotes

A. Three clinically overlapping, interleukin-1-associated, autoinflammatory disorders are known collectively as the cryopyrin-associated periodic syndromes (CAPS) or cryopyrinopathies: familial cold autoinflammatory syndrome (FCAS), Muckle-Wells syndrome (MWS), and neonatal onset multisystem inflammatory disorder (NOMID, also known as chronic infantile neurological cutaneous and articular [CINCA] syndrome). [4]
B. In addition to clinical symptoms, a diagnosis should be made using a combination of procedures including laboratory assessments, skin biopsy, and genetic testing. [5] Diagnostic criteria developed by a multidisciplinary team of international experts in the care of children and adults with CAPS found that the best diagnosis criteria model included: raised inflammatory markers (CRP/SAA) plus two or more of six CAPS-typical signs/symptoms including (1) urticaria-like rash, (2) cold-triggered episodes, (3) sensorineural hearing loss, (4) musculoskeletal symptoms (arthralgia/arthritis/myalgia), (5) chronic aseptic meningitis, and (6) skeletal abnormalities (epiphyseal overgrowth/frontal bossing). This proposed model had a sensitivity of 81% and a specificity of 94%. It performed equally well for all CAPS subtypes and in subgroups with and without evidence of NLRP3 mutation ($p < 0.001$). [4, 6]

4 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no changes to criteria.

Prior Authorization Guideline

Guideline ID	GL-229069
Guideline Name	Kisqali (ribociclib), Kisqali Femara Co-Pack (letrozole and ribociclib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Kisqali (ribociclib)
Breast cancer Indicated for the treatment of adult patients with hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative advanced or metastatic cancer in combination with one of the following: (1) an aromatase inhibitor as initial endocrine-based therapy, (2) fulvestrant as initial endocrine-based therapy or following disease progression on endocrine therapy.
Drug Name: Kisqali Femara Co-Pack (letrozole and ribociclib)
Breast cancer Indicated as initial endocrine-based therapy for the treatment of adult patients with hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative advanced or metastatic breast cancer.

2 . Criteria

Product Name:Kisqali, Kisqali Femara Co-Pack	
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228674
Guideline Name	Korlym (mifepristone)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Korlym (mifepristone)
Hyperglycemia in Patients with Endogenous Cushing's Syndrome and Type 2 Diabetes Mellitus Indicated to control hyperglycemia secondary to hypercortisolism in adult patients with endogenous Cushing's syndrome who have type 2 diabetes mellitus or glucose intolerance and have failed surgery or are not candidates for surgery. Limitations of use: Korlym should not be used in the treatment of patients with type 2 diabetes unless it is secondary to Cushing's syndrome.

2 . Criteria

Product Name:Brand Korlym, Generic mifepristone 300mg	
Approval Length	6 month(s)
Therapy Stage	Initial Authorization

Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KORLYM	MIFEPRISTONE TAB 300 MG	27304050000330	Brand
MIFEPRISTONE	MIFEPRISTONE TAB 300 MG	27304050000330	Generic

Approval Criteria

1 - Diagnosis of endogenous Cushing's syndrome (i.e., hypercortisolism is not a result of chronic administration of high dose glucocorticoids) [A]

AND

2 - One of the following:

- Diagnosis of type 2 diabetes mellitus
- Diagnosis of glucose intolerance

AND

3 - Patient has hyperglycemia that is secondary to hypercortisolism

AND

4 - One of the following: [1,2]

- Patient has failed surgery
- Patient is not a candidate for surgery

AND

5 - Trial or intolerance to generic mifepristone 300 mg (applies to Brand Korlym only)

AND

6 - Prescribed by or in consultation with an endocrinologist

AND

7 - Patient is not pregnant [1]

Product Name:Brand Korlym, Generic mifepristone 300mg	
Approval Length	6 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KORLYM	MIFEPRISTONE TAB 300 MG	27304050000330	Brand
MIFEPRISTONE	MIFEPRISTONE TAB 300 MG	27304050000330	Generic

Approval Criteria

1 - Documentation of one of the following:

- Patient has improved glucose tolerance while on therapy
- Patient has stable glucose tolerance while on therapy

AND

2 - Trial or intolerance to generic mifepristone 300 mg (applies to Brand Korlym only)

3 . Endnotes

A. Korlym should not be used in the treatment of patients with type 2 diabetes unless it is secondary to Cushing's syndrome. [1]

4 . References

1. Korlym prescribing information. Corcept Therapeutics Inc. Menlo Park, CA. November 2019.
2. Nieman LK, Biller BM, Findling JW, et al. Treatment of Cushing's Syndrome: An Endocrine Society Clinical Practice Guideline. J Clin Endocrinol Metab. 2015;100(8):2807-2831.

Prior Authorization Guideline

Guideline ID	GL-228676
Guideline Name	Korsuva (difelikefalin)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Korsuva (difelikefalin) injection
Chronic kidney disease (CKD) Indicated for the treatment of moderate-to-severe pruritus associated with chronic kidney disease (CKD-aP) in adults undergoing hemodialysis (HD). Limitations of use: Korsuva has not been studied in patients on peritoneal dialysis and is not recommended for use in this population.

2 . Criteria

Product Name:Korsuva	
Approval Length	3 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KORSUVA	DIFELIKEFALIN ACETATE 65 MCG/1.3ML (50 MCG/ML)	99690020102020	Brand

Approval Criteria

1 - Diagnosis of chronic kidney disease (CKD)

AND

2 - Patient is currently undergoing hemodialysis (HD) at an optimal dialysis dose (e.g., Kt/V greater than or equal to 1.2) [A, B, 4]

AND

3 - Patient is experiencing moderate to severe pruritus associated with CKD (CKD-aP)

AND

4 - Exclusion of other causes of pruritus (e. g., eczema, infections, drug-induced skin dryness) [C, 3]

AND

5 - Trial and failure, contraindication, or intolerance to ONE topical anti-pruritic treatment: [2,3]

- emollient cream
- analgesics (e.g., pramoxine lotion, capsaicin)
- corticosteroids (e.g., hydrocortisone, triamcinolone)

AND

6 - Trial and failure, contraindication, or intolerance to ONE oral treatment: [2,3]

- antihistamine (e.g., diphenhydramine, hydroxyzine, loratadine)

- gabapentin
- pregabalin

AND

7 - Prescribed by or in consultation with one of the following:

- Nephrologist
- Dermatologist

Product Name:Korsuva	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KORSUVA	DIFELIKEFALIN ACETATE 65 MCG/1.3ML (50 MCG/ML)	99690020102020	Brand

Approval Criteria

1 - Patient is currently undergoing hemodialysis [A]

AND

2 - Patient demonstrates positive clinical response to therapy (e.g., improved quality of life, improved worst itching intensity numerical rating score from baseline)

3 . Endnotes

A. Korsuva is administered by intravenous bolus injection into the venous line of the dialysis circuit at the end of each HD treatment. [1]
B. On average, a Kt/V of 1.2 is roughly equivalent to a URR of about 63 percent. Thus, another standard of adequate dialysis is a minimum Kt/V of 1.2. The Kidney Disease

Outcomes Quality Initiative (KDOQI) group has adopted the Kt/V of 1.2 as the standard for dialysis adequacy. [4]

C. Pruritus associated with Chronic Kidney Disease (CKD-aP), previously known as uremic pruritus, may vary from a localized itch, commonly in the back, face, and arms, to a generalized itch involving the entire body. Primary skin lesions may present with similar symptoms, and any suspicion of an underlying primary lesion should be first evaluated by dermatology. [3]

Prior Authorization Guideline

Guideline ID	GL-228898
Guideline Name	Koselugo (selumetinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Koselugo (selumetinib)
Neurofibromatosis Type 1 Indicated for the treatment of pediatric patients 2 years of age and older with neurofibromatosis type 1 (NF1) who have symptomatic, inoperable plexiform neurofibromas (PN)

2 . Criteria

Product Name:Koselugo	
Diagnosis	Neurofibromatosis Type 1
Approval Length	6 Month(s) [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KOSELUGO	SELUMETINIB SULFATE CAP 10 MG	21533565500110	Brand
KOSELUGO	SELUMETINIB SULFATE CAP 25 MG	21533565500125	Brand

Approval Criteria

1 - Diagnosis of neurofibromatosis type 1

AND

2 - Patient has plexiform neurofibromas that are both of the following:

- Inoperable [B]
- Causing significant morbidity (e.g., disfigurement, motor dysfunction, pain, airway dysfunction, visual impairment)

AND

3 - One of the following:

3.1 Patient is less than 18 years of age

OR

3.2 Both of the following:

- Patient is 18 years of age or older
- Patient is continuing therapy [C]

AND

4 - Patient is able to swallow a capsule whole

Product Name:Koselugo

Diagnosis	Neurofibromatosis Type 1
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KOSELUGO	SELUMETINIB SULFATE CAP 10 MG	21533565500110	Brand
KOSELUGO	SELUMETINIB SULFATE CAP 25 MG	21533565500125	Brand

Approval Criteria

1 - Patient does not show evidence of disease progression while on therapy

3 . Endnotes

A. The initial authorization duration of 6 months is to allow for assessment of adverse reactions (e.g., cardiomyopathy) without interruption of therapy [1,2].
B. Inoperable plexiform neurofibromas are defined as those that could not be completely removed without risk for substantial morbidity due to encasement of, or close proximity to, vital structures, invasiveness, or high vascularity of the PN [1].
C. It is the recommendation of the consultant that the medication should not be discontinued due to patient's age [2].

Prior Authorization Guideline

Guideline ID	GL-228455
Guideline Name	Krazati (adagrasib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Krazati (adagrasib)
Non-small cell lung cancer (NSCLC) Indicated for the treatment of adult patients with KRAS G12C-mutated locally advanced or metastatic non-small cell lung cancer (NSCLC), as determined by an FDA-approved test, who have received at least one prior systemic therapy. This indication is approved under accelerated approval based on objective response rate (ORR) and duration of response (DOR). Continued approval for this indication may be contingent upon verification and description of a clinical benefit in a confirmatory trial(s). **Colorectal Cancer (CRC)** Indicated in combination with cetuximab, for the treatment of adult patients with KRAS G12C-mutated locally advanced or metastatic CRC, as determined by an FDA-approved test, who have received prior treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy.

2 . Criteria

Product Name:Krazati	
Diagnosis	Non-Small Cell Lung Cancer (NSCLC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KRAZATI	ADAGRASIB TAB 200 MG	21532410000320	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is one of the following:

- Locally advanced
- Metastatic

AND

3 - Disease is KRAS G12C-mutated as detected by a U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - Patient has received at least one prior systemic therapy (e.g., chemotherapy, immunotherapy)

Product Name:Krazati	
Diagnosis	Colorectal Cancer (CRC)
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
KRAZATI	ADAGRASIB TAB 200 MG	21532410000320	Brand

Approval Criteria

1 - Diagnosis of colorectal cancer (CRC)

AND

2 - Disease is one of the following:

- Locally advanced
- Metastatic

AND

3 - Tumor is KRAS G12C-mutated as detected by a U.S. Food and Drug Administration (FDA) -approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

AND

4 - Medication is used in combination with Erbitux (cetuximab)

AND

5 - Patient has received prior treatment with ALL of the following:

- fluoropyrimidine-based chemotherapy
- oxaliplatin-based chemotherapy
- irinotecan-based chemotherapy

Product Name:Krazati	
Diagnosis	All Indications
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic

Prior Authorization Guideline

Guideline ID	GL-228677
Guideline Name	Lambert-Eaton Myasthenic Syndrome (LEMS) Agents - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Firdapse (amifampridine phosphate)
Lambert-Eaton Myasthenic Syndrome (LEMS) Indicated for the treatment of Lambert-Eaton myasthenic syndrome (LEMS) in adults and pediatric patients 6 years of age and older.

2 . Criteria

Product Name:Firdapse	
Approval Length	3 Month(s) [A]
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FIRDAPSE	AMIFAMPRIDINE PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	76000012100320	Brand

Approval Criteria

1 - Diagnosis of Lambert-Eaton myasthenic syndrome (LEMS)

AND

2 - Documentation of symptomatic LEMS that interfere with daily functions (e.g., difficulty climbing stairs, walking up steep hills)

AND

3 - Patient is 6 years of age or older

AND

4 - Prescribed by or in consultation with a neurologist

Product Name:Firdapse	
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
FIRDAPSE	AMIFAMPRIDINE PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	76000012100320	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy (e.g., improvement in dynamometry, Timed 25-Foot Walk Test, Timed Up and Go Test)

Product Name:Firdapse	
Approval Length	3 Month(s) [A]
Guideline Type	Non Formulary

Product Name	Generic Name	GPI	Brand/Generic
FIRDAPSE	AMIFAMPRIDINE PHOSPHATE TAB 10 MG (BASE EQUIVALENT)	76000012100320	Brand

Approval Criteria

1 - Submission of medical records (e.g., chart notes) confirming diagnosis of Lambert-Eaton myasthenic syndrome (LEMS)

AND

2 - Submission of medical records (e.g., chart notes) documenting symptomatic LEMS that interfere with daily functions (e.g., difficulty climbing stairs, walking up steep hills)

AND

3 - Patient is 6 years of age or older

AND

4 - Prescribed by or in consultation with a neurologist

3 . Endnotes

A. Per clinical consultation and P&T committee recommendation, it is appropriate to check for positive clinical response earlier due to the drug's rapid onset of action. [2]

4 . References

Lazcluze (lazertinib)

Prior Authorization Guideline

Guideline ID	GL-233297
Guideline Name	Lazcluze (lazertinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	10/16/2024
P&T Revision Date:	

1 . Indications

Drug Name: Lazcluze (lazertinib)
Non-small cell lung cancer (NSCLC) Indicated in combination with amivantamab, for the first-line treatment of adult patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R substitution mutations, as detected by an FDA-approved test.

2 . Criteria

Product Name:Lazcluze	
Approval Length	12 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LAZCLUZE	LAZERTINIB MESYLATE TAB 80 MG	21360048300320	Brand
LAZCLUZE	LAZERTINIB MESYLATE TAB 240 MG	21360048300340	Brand

Approval Criteria

1 - Diagnosis of non-small cell lung cancer (NSCLC)

AND

2 - Disease is one of the following:

- Locally advanced
- Metastatic

AND

3 - Used as first line treatment of NSCLC

AND

4 - Used in combination with Rybrevant (amivantamab)

AND

5 - Presence of epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R substitution mutations as detected by a U.S. Food and Drug Administration (FDA) approved test or a test performed at a facility approved by Clinical Laboratory Improvement Amendments (CLIA)

Product Name:Lazcluze

Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LAZCLUZE	LAZERTINIB MESYLATE TAB 80 MG	21360048300320	Brand

Guideline ID	GL-233240
Guideline Name	Lenvima (lenvatinib)
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/10/2025
P&T Approval Date:	4/14/2015
P&T Revision Date:	11/21/2024

1 . Indications

Drug Name: Lenvima (lenvatinib)
Differentiated Thyroid Carcinoma Indicated for the treatment of patients with locally recurrent or metastatic, progressive, radioactive iodine-refractory differentiated thyroid cancer (DTC). **Renal Cell Carcinoma** 1) Indicated for use in combination with pembrolizumab, for the first line treatment of adult patients with advanced renal cell carcinoma (RCC). 2) Indicated for use in combination with everolimus for the treatment of adult patients with advanced renal cell carcinoma (RCC) following one prior anti-angiogenic therapy. **Hepatocellular Carcinoma** Indicated for the first-line treatment of patients with unresectable hepatocellular carcinoma (HCC). **Endometrial Carcinoma** In combination with pembrolizumab, is indicated for the treatment of patients with advanced endometrial carcinoma (EC) that is mismatch repair proficient (pMMR), as determined by an FDA-approved test, or not microsatellite instability-high (MSI-

H), who have disease progression following prior systemic therapy in any setting and are not candidates for curative surgery or radiation

2 . Criteria

Product Name:Lenvima	
Diagnosis	Differentiated thyroid cancer (DTC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LENVIMA 4 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 4 MG (4 MG DAILY DOSE)	2133505420B210	Brand
LENVIMA 8 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 2 X 4 MG (8 MG DAILY DOSE)	2133505420B215	Brand
LENVIMA 10 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 10 MG (10 MG DAILY DOSE)	2133505420B220	Brand
LENVIMA 12MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 3 X 4 MG (12 MG DAILY DOSE)	2133505420B223	Brand
LENVIMA 20 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 2 X 10 MG (20 MG DAILY DOSE)	2133505420B230	Brand
LENVIMA 14 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 10 & 4 MG (14 MG DAILY DOSE)	2133505420B240	Brand
LENVIMA 18 MG DAILY DOSE	LENVATINIB CAP THER PACK 10 MG & 2 X 4 MG (18 MG DAILY DOSE)	2133505420B244	Brand
LENVIMA 24 MG DAILY DOSE	LENVATINIB CAP THER PACK 2 X 10 MG & 4 MG (24 MG DAILY DOSE)	2133505420B250	Brand

Approval Criteria

1 - Diagnosis of differentiated thyroid cancer (DTC) [A]

Product Name:Lenvima	
Diagnosis	Renal Cell Carcinoma (RCC)
Approval Length	12 month(s)
Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LENVIMA 4 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 4 MG (4 MG DAILY DOSE)	2133505420B210	Brand
LENVIMA 8 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 2 X 4 MG (8 MG DAILY DOSE)	2133505420B215	Brand
LENVIMA 10 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 10 MG (10 MG DAILY DOSE)	2133505420B220	Brand
LENVIMA 12MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 3 X 4 MG (12 MG DAILY DOSE)	2133505420B223	Brand
LENVIMA 20 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 2 X 10 MG (20 MG DAILY DOSE)	2133505420B230	Brand
LENVIMA 14 MG DAILY DOSE	LENVATINIB CAP THERAPY PACK 10 & 4 MG (14 MG DAILY DOSE)	2133505420B240	Brand
LENVIMA 18 MG DAILY DOSE	LENVATINIB CAP THER PACK 10 MG & 2 X 4 MG (18 MG DAILY DOSE)	2133505420B244	Brand
LENVIMA 24 MG DAILY DOSE	LENVATINIB CAP THER PACK 2 X 10 MG & 4 MG (24 MG DAILY DOSE)	2133505420B250	Brand

Approval Criteria

1 - Diagnosis of renal cell carcinoma

AND

2 - One of the following:

2.1 Both of the following*:

- Used as first-line treatment
- Used in combination with Keytruda (pembrolizumab)

OR

2.2 Both of the following*:

- Treatment follows one prior anti-angiogenic therapy [e.g., Inlyta (axitinib), Votrient (pazopanib), Nexavar (sorafenib), Sutent (sunitinib)]
- Used in combination with Afinitor (everolimus)

Notes	*Criterion is part of FDA-approved label.

Product Name:Lenvima	
Diagnosis	Hepatocellular Carcinoma (HCC)
Approval Length	12 month(s)

Approval Criteria

1 - Patient does not show evidence of progressive disease while on therapy

3 . Endnotes

A. Differentiated thyroid carcinoma includes papillary carcinoma, follicular carcinoma, Hurthle cell carcinoma, and poorly differentiated carcinoma. [2]

5 . Revision History

Date	Notes
1/10/2025	Custom guideline for Quartz COM/EHB to mirrow ORx with no chang es to criteria.

Prior Authorization Guideline

Guideline ID	GL-228679
Guideline Name	Leqvio (inclisiran) - PA, NF
Formulary	• Quartz Commercial (QTZQHBPCC, QTZQHICC, QTZQHPMCC, QTZQHPCC, QTZQHSS)

Guideline Note:

Effective Date:	1/1/2025

1 . Indications

Drug Name: Leqvio (inclisiran) injection, for subcutaneous use
Primary Hyperlipidemia Indicated as an adjunct to diet and statin therapy for the treatment of adults with primary hyperlipidemia, including heterozygous familial hypercholesterolemia (HeFH), to reduce low-density lipoprotein cholesterol (LDL-C).

2 . Criteria

Product Name:Leqvio	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD)]
Approval Length	6 month(s)

Therapy Stage	Initial Authorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LEQVIO	INCLISIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 284 MG/1.5ML	3935604040E520	Brand

Approval Criteria

1 - One of the following diagnoses:

- Heterozygous familial hypercholesterolemia (HeFH)
- Atherosclerotic cardiovascular disease (ASCVD)
- Primary hyperlipidemia

AND

2 - One of the following: [4]

- Patient has been receiving at least 12 consecutive weeks of highest tolerable dose of statin therapy
- Patient is statin intolerant as evidenced by an inability to tolerate at least two statins, with at least one started at the lowest starting daily dose, due to intolerable symptoms or clinically significant biomarker changes of liver function or muscle function (e.g., creatine kinase)
- Patient has an FDA labeled contraindication to all statins

AND

3 - One of the following:

- Patient has been receiving at least 12 consecutive weeks of ezetimibe (Zetia) therapy as adjunct to maximally tolerated statin therapy
- Patient has a history of contraindication or intolerance to ezetimibe

AND

4 - One of the following:

4.1 Both of the following:

4.1.1 Patient has been receiving at least 12 consecutive weeks of Repatha therapy as adjunct to maximally tolerated lipid lowering therapy (e.g., statins, ezetimibe)

AND

4.1.2 Despite adherence to Repatha therapy, patient has been unable to achieve LDL-C goal as evidenced by one of the following within the last 120 days:

- LDL-C greater than or equal to 55 mg/dL with ASCVD [7]
- LDL-C greater than or equal to 70 mg/dL without ASCVD [7]

OR

4.2 Patient is unable to maintain adherence to Repatha therapy due to one of the following:

- Manual dexterity problems (e.g., tremors, arthritis)
- Visual impairment (e.g., best-corrected visual acuity of 20/200 or worse) [6]

OR

4.3 Patient has experienced a hypersensitivity reaction, defined as angioedema, vasculitis, urticaria, to Repatha therapy

AND

5 - Prescribed by or in consultation with one of the following:

- Cardiologist
- Endocrinologist
- Lipid specialist

AND

6 - Medication will not be used in combination with PCSK9 inhibitor therapy [2,3]

Product Name:Leqvio	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD)]
Approval Length	12 month(s)
Therapy Stage	Reauthorization
Guideline Type	Prior Authorization

Product Name	Generic Name	GPI	Brand/Generic
LEQVIO	INCLISIRAN SODIUM SUBCUTANEOUS SOLN PREF SYR 284 MG/1.5ML	3935604040E520	Brand

Approval Criteria

1 - Patient demonstrates positive clinical response to therapy as evidenced by LDL-C reduction from baseline

AND

2 - One of the following:

- Patient continues to receive other lipid-lowering therapy (e.g., statins, ezetimibe) at the maximally tolerated dose
- Patient has a documented inability to take other lipid-lowering therapy (e.g., statins, ezetimibe)

AND

3 - One of the following:

3.1 Both of the following:

3.1.1 Patient has previously received at least 12 consecutive weeks of Repatha therapy as adjunct to maximally tolerated lipid lowering therapy (e.g., statins, ezetimibe)

AND

3.1.2 Despite adherence to Repatha therapy, patient was unable to achieve LDL-C goal as evidenced by one of the following within the last 120 days:

- LDL-C greater than or equal to 55 mg/dL with ASCVD [7]
- LDL-C greater than or equal to 70 mg/dL without ASCVD [7]

OR

3.2 Patient continues to be unable to maintain adherence to Repatha therapy due to one of the following:

- Manual dexterity problems (e.g., tremors, arthritis)
- Visual impairment (e.g., best-corrected visual acuity of 20/200 or worse) [6]

OR

3.3 Patient has experienced a hypersensitivity reaction, defined as angioedema, vasculitis, urticaria, to Repatha therapy

AND

4 - Medication will not be used in combination with PCSK9 inhibitor therapy [2,3]

Product Name:Leqvio	
Diagnosis	Primary Hyperlipidemia [Including Heterozygous Familial Hypercholesterolemia (HeFH), Atherosclerotic Cardiovascular Disease (ASCVD)]
Approval Length	6 month(s)
Therapy Stage	Initial Authorization
