

Appendix A: Medications Included in RX Outcomes

The drugs included in the following list are included in the RX Outcomes Benefit value tier. These medications have been shown to improve the overall health outcomes of people with health problems like high blood pressure, high blood sugars (diabetes mellitus), and breathing difficulties (asthma) when taken on a daily schedule. For members whose plan includes the RX Outcomes Benefit, these drugs will process with a lower cost share. These medications have been designated with a "RXO" within the formulary document. **Only applies to plans with the value tier benefit. See the Plan Summary of Benefits documents for details.**
