

**(Thank you for Completing Your Health Risk Assessment and Biometric Screening)**

**Thank you!**

Thank you for completing your online Health Risk Assessment and participating in our on-site biometric screening or submitting a Biometric Exception Form. You can log into your personal wellness portal to view your HRA report, which provides information on your overall health and recommendations on how to improve it.

Remember, the details of your HRA are kept confidential. It is used only to provide an aggregate group report to help us plan for future wellness programming. We encourage you to follow up with Primary Care Physician (PCP) regarding any risks that have been identified within your individual report.
