Prescription Benefit Medication Prior Authorization Criteria

QuartzBenefits.com

These criteria apply to drugs picked up at the pharmacy.

These medication prior authorization criteria do not apply to drugs picked up at the pharmacy for State and Local Government members or BadgerCare Plus and/or Medicaid SSI members.

State and Local Government members should call **Navitus** at **(866) 333-2757** or visit navitus.com for information about your prescription drug benefits.

Quartz BadgerCare Plus and/or Medicaid SSI members must call the **Wisconsin Department of Health and Family Services** at **(800) 362-3002** or visit forwardhealth.wi.gov for information about your prescription drug benefits.

Pharmacy Benefit Drug
Prior Authorization Criteria

A medication prior authorization request may be started by members, providers, or designated representatives by fax, electronically on Quartz's website, telephone, mail. Or, for medical benefit medications, also by Health Link, Plan Link, MyQuartzTools, or electronic prior authorization (e-PA) within the electronic medical record. Electronic (e-PA) via Surescripts verifies member eligibility and member benefit information. Quartz sends back e-PA criteria questions to the provider staff which can be answered, and medical records can be attached to the request.

Quartz strongly recommends that the health care provider initiate the prior authorization request process on behalf of the member. This is because the health care provider will be able to include the medical history necessary for a timely decision to be made based on all of the relevant information, including any case specific circumstances that can be considered. Once a request and the supporting documentation have been submitted, a pharmacist or appropriate staff review the prior authorization criteria and exception requirements separately to make a coverage decision.

Approval Criteria

1 - Trial and failure to all preferred alternatives available on the formulary of the requested hormone

AND

2 - Meets off-label criteria

AND

3 - For testosterone only, both of the following:

3.1 Submission of medical records (e.g., chart notes) documenting a diagnosis of primary or secondary hypogonadism or mixed hypogonadism that clinically appropriate laboratory data demonstrate androgen deficiency*

AND

3.2 Member is symptomatic with symptoms other than sexual dysfunction

Notes	* Androgen deficiency is defined as a fasting, morning testosterone le vel (drawn between 7 and 10 AM or within 3 hours of waking for shift workers) below the lower limit of normal as defined by the laboratory r eference range. A single low testosterone is not diagnostic for androg en deficiency and must be confirmed with a second fasting, morning testosterone level.

Guideline Note:

Effective Date:	1/1/2024

Note:

These criteria will be applied only if a compound claim requires prior authorization (e.g., most expensive ingredient requires prior authorization)

1 . Criteria

Product Name: Compounded Prescription	
Approval Length	12 month(s)
Guideline Type	Prior Authorization – MN plans only

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - For Minnesota plans only - One of the following:

1.1 Both of the following:

1.1.1 The compound is prescribed for a member with emotional disturbance or mental illness

AND

1.1.2 One of the following:

- Submission of medical records (e.g., chart notes) documenting that all equivalent drugs in the formulary for each active ingredient were considered and it has been determined that the compound prescribed will best treat the person's condition
- For continuation of care (formulary changes or new member) the member has been treated for 90 days prior to the change, the medication is working, and the prescriber attests that the compound prescribed will best treat the member's condition.

OR

1.2 ALL of the following:

- Stage four metastatic cancer and prescribed drug is used for cancer related treatment including but not limited to: pain, constipation, nausea, fatigue related to chemotherapy or bacterial, fungal or viral infection
- Medication is not commercially available in a formulation that is suitable for the person
- Medication is on the formulary or the medication is considered medically necessary by Quartz
- None of the products in the compound are otherwise excluded from coverage as defined by the person's benefit

OR

1.3 All of the following:

- Each active ingredient in the compounded drug is FDA-approved or national compendia* supported for the condition being treated
- The therapeutic amounts are supported by national compendia* or two peer-reviewed literature for the condition being treated in the requested route of delivery
- Compound is not commercially available in a formulation that is suitable for the person
- Each active ingredient in the compounded drug is on the formulary or meets the nonformulary criteria
- None of the active ingredient(s) in the compound are otherwise excluded from coverage as defined by the person's benefit

- None of the active ingredient(s) in the compound are experimental or limited by the FDA to investigational use only

Product Name: Compounded Prescription	
Approval Length	12 month(s)
Guideline Type	Prior Authorization – IL plans only

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - For Illinois plans only - ONE of the following:

1.1 ALL of the following:

- Diagnosis of long-term treatment of tick-borne disease
- Medication is not commercially available in a formulation that is suitable for the person
- Medication is on the formulary or the medication is considered medically necessary by Quartz
- None of the products in the compound are otherwise excluded from coverage as defined by the person's benefit

OR

1.2 ALL of the following:

- Request is for a medication for a mental health condition under the mental and behavioral disorder chapter of the International Classification of Disease or is listed in the most recent version of the Diagnostic and Statistical Manual of Mental Disorders
- Medication is not commercially available in a formulation that is suitable for the person
- Medication is on the formulary or the medication is considered medically necessary by Quartz
- None of the products in the compound are otherwise excluded from coverage as defined by the person's benefit
- Determination should not be more restrictive than for non-behavioral health or substance use disorder diagnosis

OR

1.3 BOTH of the following:

- Request is for a medication for treating a substance use disorder
- Determination should be based on criteria established by American Society of Addiction Medicine and should not be more restrictive than non-behavioral health or substance use disorder diagnosis

OR

1.4 All of the following:

- Each active ingredient in the compounded drug is FDA-approved or national compendia* supported for the condition being treated
- The therapeutic amounts are supported by national compendia* or two peer-reviewed literature for the condition being treated in the requested route of delivery
- Compound is not commercially available in a formulation that is suitable for the person
- Each active ingredient in the compounded drug is on the formulary or meets the nonformulary criteria

2 . Background

Benefit/Coverage/Program Information	
***Compendia Requirements**	
For all non-antineoplastic medications	• American Hospital Formulary Service Drug Information (AHFSDI); OR • FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of IIb or better (see DRUGDEX Strength of Recommendation table below); OR

	• One major peer reviewed medical journal submitted by the prescriber that presents data supporting the proposed off-label use or uses as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal
For an antineoplastic medication	• American Hospital Formulary Service Drug Information (AHFSDI); OR • National Comprehensive Cancer Network (NCCN) Drugs and Biologics Compendium with a Category of Evidence and Consensus of 1, 2A, or 2B (see NCCN Categories of Evidence and Consensus table below); OR • FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of IIb or better (see DRUGDEX Strength of Recommendation table below); OR • Clinical Pharmacology (Gold Standard); OR • One peer-reviewed published medical literature submitted by the prescriber: o American Journal of Medicine o Annals of Internal Medicine o Annals of Oncology o Annals of Surgical Oncology o Biology of Blood and Marrow Transplantation o Blood

	○ Bone Marrow Transplantation ○ British Journal of Cancer ○ British Journal of Hematology ○ British Medical Journal ○ Cancer ○ Clinical Cancer Research ○ Drugs ○ European Journal of Cancer (formerly the European Journal of Cancer and Clinical Oncology) ○ Gynecologic Oncology ○ International Journal of Radiation, Oncology, Biology, and Physics ○ The Journal of the American Medical Association ○ Journal of Clinical Oncology ○ Journal of the National Cancer Institute ○ Journal of the National Comprehensive Cancer Network (NCCN) ○ Journal of Urology ○ Lancet ○ Lancet Oncology ○ Leukemia ○ The New England Journal of Medicine ○ Radiation Oncology • Wolters Kluwer Lexi-Drugs rated as "Evidence Level A" with a "Strong" recommendation (see Lexi-Drugs Strength of Recommendation table below)

DRUGDEX Strength of Recommendation:

Class	Recommendation	Description
Class I	Recommended	The given test or treatment has been proven useful, and should be performed or administered.
Class IIa	Recommended, In Most Cases	The given test or treatment is generally considered to be useful, and is indicated in most cases.
Class IIb	Recommended, in Some Cases	The given test or treatment may be useful, and is indicated in some, but not most, cases.
Class III	Not Recommended	The given test or treatment is not useful, and should be avoided
Class Indeterminate	Evidence Inconclusive	

NCCN Categories of Evidence and Consensus:

Category	Level of Consensus
1	Based upon high-level evidence, there is uniform NCCN consensus that the intervention is appropriate.
2A	Based upon lower-level evidence, there is uniform NCCN consensus that the intervention is appropriate.
2B	Based upon lower-level evidence, there is NCCN consensus that the intervention is appropriate.
3	Based upon any level of evidence, there is major NCCN disagreement that the intervention is appropriate.

Lexi-Drugs: Strength of Recommendation for Inclusion in Lexi-Drugs for Oncology Off-Label Use and Level of Evidence Scale for Oncology Off-Label Use

Strength of Recommendation for Inclusion

Strong (for proposed off-label use)	The evidence persuasively supports the off-label use (ie, Level of Evidence A).
Equivocal (for proposed off-label use)	The evidence to support the off-label use is of uncertain clinical significance (ie, Level of Evidence B, C). Additional studies may be necessary to further define the role of this medication for the off-label use.
Against proposed off-label use	The evidence either advocates against the off-label use or suggests a lack of support for the off-label use (independent of Level of Evidence). Additional studies are necessary to define the role of this medication for the off-label use.

Level of Evidence Scale for Oncology Off-Label Use

A	**Consistent evidence from well-performed randomized, controlled trials or overwhelming evidence of some other form (eg, results of the introduction of penicillin treatment) to support off-label use. Further research is unlikely to change confidence in the estimate of benefit.**
B	**Evidence from randomized, controlled trials with important limitations (eg, inconsistent results, methodologic flaws, indirect, imprecise); or very strong evidence of some other research design. Further research (if performed) is likely to have an impact on confidence in the estimate of benefit and risk and may change the estimate.**
C	**Evidence from observational studies (eg, retrospective case series/reports providing significant impact on patient care); unsystematic clinical experience; or potentially flawed randomized, controlled trials (eg, when limited options exist for condition). Any estimate of effect is uncertain.**

G	**Use has been substantiated by inclusion in at least one evidence-based or consensus-based clinical practice guideline.**

Approval Criteria

1 - Submission of medical records (e.g., chart notes) documenting ALL of the following:

1.1 Diagnosis of cystic fibrosis (CF)

AND

1.2 Patient has at least one of the following mutations in the cystic fibrosis transmembrane conductance regulator (CFTR) gene:

- Homozygous F508del CFTR mutation
- Heterozygous F508del CFTR mutation
- Heterozygous CFTR mutation that does not include F508del (Mutation is responsive to the drug as noted in the product labeling)

AND

1.3 Patient has chronic sinopulmonary, gastrointestinal or nutritional abnormalities related to cystic fibrosis (CF) requiring medical treatment

AND

2 - Prescribed by or in consultation with one of the following:

- Pulmonologist
- Specialist in the care of cystic fibrosis (CF)

AND

3 - ONE of the following:

3.1 For members with homozygous F508del CFTR mutation, one of the following:

3.1.1 For Trikafta requests ONLY: Member is 2 years of age or older

OR

3.1.2 For Orkambi requests ONLY, one of the following::

3.1.2.1 Member is between 1 and 2 years of age

OR

3.1.2.2 Both of the following:

- Member is 2 years of age or older
- Submission of medical records (e.g., chart notes) documenting trial and failure to a minimum 6-month trial, contraindication, or intolerance to Trikafta

OR

3.1.3 For Symdeko requests ONLY, all of the following:

- Member is 6 years of age or older

- Submission of medical records (e.g., chart notes) documenting trial and failure to a minimum 6-month trial, contraindication, or intolerance to Trikafta
- Submission of medical records (e.g., chart notes) documenting trial and failure to a minimum 6-month trial, contraindication, or intolerance to Orkambi

OR

3.2 For members with heterozygous F508del CFTR mutation, one of the following:

3.2.1 For Trikafta requests ONLY: Member is 2 years of age or older

OR

3.2.2 For Kalydeco requests ONLY, member is 1 months of age or older

OR

3.2.3 For Symdeko requests ONLY, both of the following:

- Member is 6 years of age or older
- Submission of medical records (e.g., chart notes) documenting trial and failure to a minimum 6-month trial, contraindication, or intolerance to Trikafta

OR

3.3 For members with heterozygous CFTR mutation that does not include F508del (Mutation is responsive to the drug as noted in the product labeling), one of the following:

3.3.1 For Kalydeco requests ONLY, member is 1 months of age or older

OR

3.3.2 For Trikafta requests ONLY, member is 2 years of age or older

OR

2 . Background

Benefit/Coverage/Program Information
Severe Asthma Exceptions to high dose inhaled corticosteroids in combination with a long-acting bronchodilator or leukotriene modifier. Exceptions based on adverse effects from high dose ICS or comorbid conditions increasing long-term risks of adverse effects from high dose ICS or oral corticosteroids include: • Cataracts in patients > 40 years of age • Glaucoma • Recurrent Thrush • Dysphonia • Growth inhibition, after evaluation by Endocrine Consult • Diagnosis of osteoporosis, treatment resistant to FDA approved osteoporosis treatment

EMPAVELI	PEGCETACOPLAN SUBCUTANEOUS SOLN 1080 MG/20ML (54 MG/ML)	85804065002020	Brand

Approval Criteria

1 - Confirmed diagnosis of PNH by flow cytometry

AND

2 - Prescribed by, or in consultation with, a Hematologist or Oncologist.

AND

3 - Low hemoglobin (≤ 9 mg/dL with symptoms of anemia), elevated lactate dehydrogenase level (LDH ≥ 1.5 X ULN) and/or number of transfusions in last year

AND

4 - Documentation of the clinical manifestations of disease (e.g., major vascular event, transfusion dependence, renal insufficiency, disabling fatigue and/or other end organ manifestations).

AND

5 - Documentation of receipt of Advisory Committee on Immunization Practices (ACIP) recommended vaccinations at least two weeks prior to therapy initiation as outlined in drug REMS program.

AND

6 - Age greater than or equal to 18

AND

7 - Drug is not being used in combination with another complement inhibitor*

Notes	*Combination of pegcetacoplan with another agent may be considered for circumstances where all three individual complement inhibitors failed to adequately control anemia (eculizumab or ravulizumab) or there are signs of ongoing hemolysis (pegcetacoplan).

Product Name: Non-formulary drugs			
Approval Length	12 month(s)		
Guideline Type	Administrative		
Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - Both of the following:

1.1 One of the following:

1.1.1 Provider attests that it is medically necessary for the individual to receive that specific contraceptive

OR

1.1.2 Both of the following:

1.1.2.1 One of the following:

1.1.2.1.1 Paid claims or submission of medical records (e.g. chart notes) show there have been adequate trials of ALL appropriate therapeutic alternatives and there was (a) inadequate clinical response, (b) inappropriate clinical response, (c) intolerance or (d) allergy to those medications

OR

1.1.2.1.2 An exception to the formulary may be considered when ALL appropriate therapeutic alternatives have not been tried and there is submission of medical records (e.g. chart notes) that documents that ALL appropriate therapeutic alternatives will be (a) ineffective, (b) less effective or (c) will result in adverse effects

OR

1.1.2.1.3 An exception to the formulary may be considered when it is a situation that it is not clinically appropriate to have adequate trials of ALL therapeutic alternatives, such as the individual has complex medical conditions, would be subject to prolonged pain, or there is a risk of severe or significant adverse medical outcomes if there is significant delay in treating the condition AND one of the following were tried:

- At least four formulary alternatives in the same drug class as the requested medication (if the formulary includes an alternative dose form or salt of the requested nonformulary drug, one of the alternatives MUST be the formulary formulation of the requested drug (e.g. bupropion SR or XL must be an alternative for Forfivo XL))
- If there are not four formulary alternatives in the same drug class, at least four formulary alternatives from three different drug classes (if available) when it is appropriate under the standards of acceptable medical practice for the treatment of the diagnosis to trial medications with different mechanisms of action
- No formulary alternative is appropriate to treat the patient's condition based on mechanism of action or lack of data to support use based on standards outlined in the off-label use administrative guideline

AND

1.1.2.2 When there are prior authorization criteria for the drug class or therapeutic alternatives, an exception to the formulary should take into consideration those criteria and should not be less stringent for the non-formulary drug.

AND

1.2 One of the following:

1.2.1 Requested drug is FDA-approved for the condition being treated

OR

1.2.2 If requested for an off-label indication, the off-label guideline approval criteria have been met.

OR

2 - For Illinois Plans only: Member is new to the plan (as evidenced by coverage effective date of less than or equal to 90 days) who are established on nonpreferred therapy, will have coverage under their drug benefit with submission of medical records (e.g., chart notes) documenting symptom improvement or disease stability

Product Name: Non-formulary drugs	
Approval Length	3 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - All of the following:

1.1 Requested non-formulary drug is a brand with a generic available (MSC-O)

AND

1.2 The generic formulation (MSC-Y) of the requested drug is on a covered tier on the formulary

AND

1.3 The generic formulation (MSC-Y) of the requested drug is on a nationwide shortage verified by the Food and Drug Administration (FDA) website

Approval Criteria

1 - Diagnosis of eosinophilic asthma

AND

2 - Prescribed by or in consultation with an asthma specialist (i.e., allergist, immunologist, pulmonologist)

AND

3 - Member is 6 years of age or older

AND

4 - One of the following:

4.1 All of the following:

4.1.1 Submission of medical records (e.g., chart notes) documenting that the blood eosinophil count is greater than or equal to 150 cells/mm3

AND

4.1.2 Other causes of eosinophilia such as hypereosinophilic syndromes, neoplastic disease, or parasitic disease have been ruled out

AND

4.1.3 One of the following:

4.1.3.1 Symptoms are not well controlled or poorly controlled (Table 1) despite adherence* to a greater than or equal to a 3-month trial of medium to high-dose inhaled corticosteroids in combination with a long-acting bronchodilator, long-acting muscarinic antagonist, or leukotriene modifier

OR

4.1.3.2 Member has an intolerance to medium to high dose inhaled corticosteroids in combination with a long-acting bronchodilator or leukotriene modifier. Exceptions based on adverse effects from medium to high dose ICS or comorbid conditions increasing long-term risks of adverse effects from high dose ICS or oral corticosteroids include one of the following:

- Cataracts in members older than 40 years of age
- Glaucoma
- Recurrent thrush
- Dysphonia
- Growth inhibition, after consultation with an endocrinologist
- Diagnosis of osteoporosis, whose treatment is resistant to FDA approved osteoporosis treatment

OR

4.2 Continuation of prior therapy with mepolizumab, verified by paid claims or medical records (e.g. chart notes)

Notes	*Adherence to treatment is defined as a medication possession ratio (MPR) greater than or equal to 70%, based on the previous 120 days o f prescription claims **IL-5 inhibitor drugs in combination with omalizumab will be consider ed on a case-by-case basis if each individual agent with combination high dose ICS/LABA did not control symptoms . Tezepelumab, in combination with other biologics, has not been studied and coverage is not allowed except in extenuating circumstances (applies to both eosinophilic or non-eosinophilic asthma populations)

2 . Background

Benefit/Coverage/Program Information

TABLE 1 - Outcome Measure values for uncontrolled asthma

Measure	Not Well Controlled	Very Poorly Controlled
Baseline symptoms (outside of exacerbation)	Greater than 2 days/week	Throughout the day
Nighttime awakening	1-3 times/week	Greater than or equal to 4 times/week
Interference with normal activity	Some limitation	Extremely limited
Short acting beta agonist use for symptom control	Greater than 2 days/week	Several times per day
FEV1	60-80% predicted or personal best	Less than 60% predicted or personal best
Asthma exacerbations requiring oral steroids	Yes	Yes

greater than or equal to 2 times in the past year		
Asthma Control Test (ACT)	16 - 19	Less than or equal to 15

3 . Definitions

Definition	Description
Relapsing EGPA	At least one confirmed EGPA relapse while the person was on prednisolone dose of greater than or equal to 7.5 mg (or equivalent) within the past 2 years that required an increase in oral corticosteroid dose, initiation/increased immunosuppressive therapy dose, or hospitalization.
Refractory EGPA	1) Failure to attain remission (BVAS = 0 and oral steroid dose less than or equal to 7.5 mg/day prednisolone or equivalent) within the last 6 months following induction treatment with a standard regimen (e.g., cyclophosphamide, methotrexate, azathioprine, mycophenolate, high dose steroids) administered for at least 3 months OR 2) within 6 months prior to initiation, recurrence of symptoms of EGPA while tapering oral steroids, occurring at any dose level greater than or equal to 7.5 mg/day prednisolone or equivalent.
Failure of an immunosuppressant	Defined as EGPA symptoms are not resolving or flare occurring with a prednisone dose change, hospitalization, OR contraindications/clinical inappropriateness to immunosuppressants (i.e., liver disease, fertility etc.).

Guideline ID	GL-135255
Guideline Name	Off Label Administrative
Formulary	• Quartz

Guideline Note:

Effective Date:	1/1/2024

1 . Criteria

Product Name: A drug used for an off-label indication or non-FDA approved indication	
Diagnosis	Off-label indication
Approval Length	12 month(s)
Guideline Type	Administrative

Product Name	Generic Name	GPI	Brand/Generic

Approval Criteria

1 - ONE of the following:

1.1 Diagnosis is supported as a use in American Hospital Formulary Service Drug Information (AHFS DI)

OR

1.2 Diagnosis is supported in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of IIb or better (see DRUGDEX Strength of Recommendation table in Background section)

OR

1.3 Provider submits two articles from major peer reviewed medical journals that present data supporting the proposed off-label use or uses as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal

AND

2 - ONE of the following:

2.1 Trial and failure, contraindication or intolerance to an adequate trial of all formulary and/or over the counter (OTC) alternatives

OR

2.2 (Minnesota plans only) person with stage four metastatic cancer and the requested drug is being used as supportive care to treat symptoms directly related to their cancer or chemotherapy regimen

OR

2.3 (Illinois Plans only) The requested FDA approved drug is being used for the long-term treatment of tick-borne disease

2 . Background

Clinical Practice Guidelines

DRUGDEX Strength of Recommendation

Class	Recommendation	Description
Class I	Recommended	The given test or treatment has been proven useful, and should be performed or administered.
Class IIa	Recommended, In Most Cases	The given test or treatment is generally considered to be useful, and is indicated in most cases.
Class IIb	Recommended, in Some Cases	The given test or treatment may be useful, and is indicated in some, but not most, cases.
Class III	Not Recommended	The given test or treatment is not useful, and should be avoided
Class Indeterminate	Evidence Inconclusive	

NCCN Categories of Evidence and Consensus [A]

Category	Level of Consensus
1	Based upon high-level evidence, there is uniform NCCN consensus that the intervention is appropriate.
2A	Based upon lower-level evidence, there is uniform NCCN consensus that the intervention is appropriate.
2B	Based upon lower-level evidence, there is NCCN consensus that the intervention is appropriate.
3	Based upon any level of evidence, there is major NCCN disagreement that the intervention is appropriate.

Lexi-Drugs: Strength of Recommendation for Inclusion in Lexi-Drugs for Oncology Off-Label Use and Level of Evidence Scale for Oncology Off-Label Use [5] Strength of Recommendation for Inclusion

Strong (for proposed off-label use)	The evidence persuasively supports the off-label use (ie, Level of Evidence A).

Equivocal (for proposed off-label use)	The evidence to support the off-label use is of uncertain clinical significance (ie, Level of Evidence B, C). Additional studies may be necessary to further define the role of this medication for the off-label use.
Against proposed off-label use	The evidence either advocates against the off-label use or suggests a lack of support for the off-label use (independent of Level of Evidence). Additional studies are necessary to define the role of this medication for the off-label use.

Level of Evidence Scale for Oncology Off-Label Use

A	**Consistent evidence from well-performed randomized, controlled trials or overwhelming evidence of some other form (eg, results of the introduction of penicillin treatment) to support off-label use. Further research is unlikely to change confidence in the estimate of benefit.**
B	**Evidence from randomized, controlled trials with important limitations (eg, inconsistent results, methodologic flaws, indirect, imprecise); or very strong evidence of some other research design. Further research (if performed) is likely to have an impact on confidence in the estimate of benefit and risk and may change the estimate.**
C	**Evidence from observational studies (eg, retrospective case series/reports providing significant impact on patient care); unsystematic clinical experience; or potentially flawed randomized, controlled trials (eg, when limited options exist for condition). Any estimate of effect is uncertain.**
G	**Use has been substantiated by inclusion in at least one evidence-based or consensus-based clinical practice guideline.**

Approval Criteria

1 - The following mandates apply to Illinois:

1.1 Effective 1/1/2018, step therapy requirements are deemed met if the provider submits medical records confirming the patient is currently stabilized on the requested medication for the medical condition under consideration.

OR

1.2 Effective 1/1/2019, any clinical criteria component involving a trial/failure requirement are deemed met if the prescription drug is used to treat the patient's stage four advanced metastatic cancer and treatment is consistent with the U.S. Food and Drug Administration-approved indication or the National Comprehensive Cancer Network Drugs & Biologics Compendium indication for the treatment of stage four advanced metastatic cancer.

OR

1.3 Effective 6/9/2023, all clinical criteria are deemed met for intravenous immunoglobulin (IVIg) therapy when the medication is being used for a diagnosis of pediatric autoimmune neuropsychiatric disorders associated with streptococcal infections (PANDAS) or pediatric acute onset neuropsychiatric syndrome (PANS).

OR

2 - For Iowa, (effective 1/1/2018), when the provider confirms a patient has previously received either a documented step one prescription drug or submits medical records documenting another prescription drug was received that has the same mechanism of action as the documented step one prescription drug, and the prescription drug was discontinued due to lack of efficacy or effectiveness, diminished effect, or an adverse event, the patient will not be required to try any other alternatives with the same mechanism of action. Where documented step one prescription drugs are deemed met due to this process, all documented step one prescription drugs with the same mechanism of action will count towards the number of alternatives to be tried/failed. If step through other prescription drugs with a different mechanism of action is still required, the patient must meet the additional criteria. Step therapy requirements are also deemed met if the provider submits medical records confirming that the patient is currently stabilized on the requested medication for the medical condition under consideration. Note: Samples and drugs obtained through coupon cards may not count as sufficient experience with the prescribed medication to be considered stable on the medication.

OR

3 - For Minnesota, (effective 1/1/2020), any clinical criteria component involving a trial/failure requirement are deemed met if the prescription drug is used to treat the patient's stage four advanced metastatic cancer, or an associated condition, and treatment is consistent with the U.S. Food and Drug Administration-approved indication or the National Comprehensive Cancer Network Drugs & Biologics Compendium indication for the treatment of stage four advanced metastatic cancer.

OR

4 - For Wisconsin, (effective 11/1/2019), any clinical criteria component involving a trial/failure requirement are deemed met when the provider confirms a patient has previously received either a documented step one prescription drug or submits medical records documenting another prescription drug was received that has the same mechanism of action as the

documented step one prescription drug, and the prescription drug was discontinued due to lack of efficacy or effectiveness, diminished effect, or an adverse event, the patient will not be required to try any other alternatives within the same pharmacological class or with the same mechanism of action. Where documented step one prescription drugs are deemed met due to this process, all documented step one prescription drugs with the same mechanism of action will count towards the number of alternatives to be tried/failed. If step through other prescription drugs with a different mechanism of action is still required, the patient must meet the additional criteria. Any clinical criteria component involving a trial/failure requirement are also deemed met if the provider submits medical records confirming that the patient is currently stabilized on the requested medication for the medical condition under consideration, or if submitted justification and clinical documentation support that the required step one prescription drug is expected to be ineffective.

Approval Criteria

1 - One of the following:

1.1 Diagnosis of gender dysphoria, transsexualism, or other gender identity diagnosis

OR

1.2 All of the following:

1.2.1 Submission of medical records (e.g., chart notes) demonstrating androgen deficiency** in one of the following diagnoses:

- Primary or secondary hypogonadism
- Mixed hypogonadism

AND

1.2.2 Submission of medical records (e.g. chart notes) documenting two morning testosterone levels (drawn between 7:00 – 10:00 a.m. or within 3 hours of waking for shift workers) below the lower limit of normal

AND

1.2.3 Submission of medical records (e.g., chart notes) documenting symptoms due to low testosterone other than decreased libido and/or other sexual dysfunction

OR

1.3 Continuation of prior therapy with testosterone, verified by paid claims or medical records (e.g. chart notes)

Notes	*Continuation of therapy/coverage criteria will not be applied to persons who were not previously approved for coverage but whose therapy was initiated using a manufacturer-sponsored free drug program, provider samples, and/or vouchers. **Androgen deficiency is defined as a fasting, morning testosterone level (drawn between 7 and 10 AM or within 3 hours of waking for shift workers) below the lower limit of normal as defined by the laboratory reference range. A single low testosterone is not diagnostic for androgen deficiency and must be confirmed with a second fasting, morning testosterone level.

Approval Criteria

1 - Diagnosis of eosinophilic asthma

AND

2 - Prescribed by or in consultation with one of the following:

- Allergist
- Immunologist
- Pulmonologist

AND

3 - Member is 12 years of age or older

AND

4 - One of the following:

4.1 All of the following:

4.1.1 All of the following:

4.1.1.1 Submission of medical records (e.g., chart notes) documenting a blood eosinophil count of ≥ 150 cells/mm3

AND

4.1.1.2 All other causes of eosinophilia such as hypereosinophilic syndromes, neoplastic disease, or parasitic disease have been ruled out

AND

4.1.1.3 One of the following:

4.1.1.3.1 Symptoms are not well controlled or poorly controlled (refer to Table 1 in background section) despite an adherent ‡ ≥ 3-month trial of medium to high-dose inhaled corticosteroids in combination with a long-acting bronchodilator, long-acting muscarinic antagonist, or leukotriene modifier

OR

4.1.1.3.2 One of the following:

4.1.1.3.2.1 Member has an intolerance to medium to high dose inhaled corticosteroids (ICS) in combination with long-acting bronchodilator or leukotriene modifier

OR

4.1.1.3.2.2 Member has one or more of the following comorbid conditions that increase long-term risks of adverse effects from high dose ICS or oral corticosteroids:

- Cataracts in patients > 40 years of age
- Glaucoma
- Recurrent thrush
- Dysphonia
- Growth inhibition, after evaluation by endocrine consult
- Diagnosis of osteoporosis, treatment resistant to FDA approved osteoporosis treatment

AND

4.1.1.4 Trial and failure, contraindication, or intolerance to at least two preferred self-administered biologic therapies for eosinophilic asthma (i.e. dupilumab, benralizumab, mepolizumab)

OR

4.2 Continuation of prior therapy with tezepelumab, verified by paid claims or medical records (e.g. chart notes)

Notes	‡Adherent treatment is defined as a medication possession ratio (MPR) ≥ 70% based on the previous 120 days of prescription claims. NOTE: Il-5 inhibitor drugs in combination with omalizumab will be considered on a case-by-case basis if each individual agent with combination high dose ICS/LABA did not control symptoms. Tezepelumab, in combination with other biologics, has not been studied and coverage is not allowed except in extenuating circumstances (applies to both eosinophilic or non-eosinophilic asthma populations). *Continuation of therapy/coverage criteria will not be applied to persons who were not previously approved for coverage whose therapy was initiated using a manufacturer-sponsored free drug program, provider samples, and/or vouchers.

2 . Background

Benefit/Coverage/Program Information

Table 1. Outcome Measure values for uncontrolled asthma

Measure	Not Well Controlled	Very Poorly Controlled
Baseline symptoms (outside of exacerbation)	> 2 days/week	Throughout the day
Nighttime awakening	1-3 times/week	≥ 4 times/week
Interference with normal activity	Some limitation	Extremely limited
Short acting beta agonist use for symptom control	> 2 days/week	Several times per day
FEV1	60-80% predicted or personal best	< 60% predicted or personal best
Asthma exacerbations requiring oral steroids ≥ 2 times in the past year	Yes	Yes

Asthma Control Test (ACT)	16-19	≤ 15

2 . Definitions

Definition	Description
Inadequate Disease Control of UC/CD:	Worsening of baseline symptoms (i.e. bowel frequency, presence of blood, abdominal pain or tenderness, fever, etc.), extraintestinal manifestations (i.e. fatigue, joint pain, skin rash, and ocular symptoms), laboratory assessment (i.e. Creactive protein (CRP), hemoglobin, ESR white blood count (WBC), albumin, platelets, fecal calprotectin, etc.) and/or recent endoscopy results demonstrating ongoing inflammation
Steroid Dependence:	Demonstrated steroid dependence (defined as equivalent to prednisone 10mg daily for >3 months) with the inability to taper or when tapering of dose leads to loss of symptom control
Inflammatory status: Signs/Symptoms/Labs/Endoscopy for diagnosis	-Bloody diarrhea, weight loss, tenesmus, urgency, abdominal pain, fever, joint swelling/redness, localized abdominal tenderness, anemia, cutaneous signs -CBC,

	CMP, CRP, ESR, stool cultures, C difficile assay, fecal calprotectin -endoscopy, colonoscopy, sigmoidoscopy
Ulcerative Colitis Disease Severity:	Based on the degree of presentation of the signs and symptoms and change in baseline inflammatory status Moderate disease - more than four stools per day with minimal signs of toxicity, anemia, abdominal pain, low grade fever Severe disease - more than six bloody stools per day, fever, tachycardia, anemia, elevated ESR or CRP
Crohn's Disease Classification:	Stricturing - narrowing of bowel that may cause bowel obstruction; Penetrating - fistulae may form between bowel and other structures; Inflammatory - nonstricturing, nonpenetrating - inflammation without strictures or fistula
